

COMMISSION OF THE EUROPEAN COMMUNITIES

COM(88) 438 final
Brussels, 28 July 1988

SIX-MONTHLY REPORT FROM THE COMMISSION TO THE COUNCIL AND EUROPEAN PARLIAMENT

on the rate of utilization of the tranches of the
new community instrument (NCI)
1 July 1987-31 December 1987

I. INTRODUCTION :

This report has been drawn up by the Commission in accordance with Article 6 of the Council Decision of 19 April 1983 empowering the Commission to contract loans under the New Community Instrument (NCI) ¹, which stipulates that "the Commission shall inform the Council and the European Parliament every six months of the rate of utilization of the tranches". This six-monthly reporting period is also laid down in article 8 of the Decision of 9 March 1987 ². The present report covers the period 1.7.1987 to 31.12.1987.

The Council had authorized by the end of the period the following global amounts for ordinary NCI operations :

NCI I : 1 000 million ECU in borrowing ³
NCI II : 1 000 million ECU in borrowing ⁴
NCI III : 3 000 million ECU in borrowing ¹
NCI IV : 750 million ECU in lending ²

For NCI I, II and III these global authorizations take effect in line with implementing Decisions by the Council, which enable the activation of successive tranches of borrowing. There were three tranches of NCI I (500 million ECU, 400 million ECU and 100 million ECU); a single 1 000 million ECU tranche for NCI II; and two tranches of NCI III (1 500 million ECU, and 1 400 million ECU). Effective authorizations for borrowing under NCI III therefore currently total 2 900 million ECU, with a margin of 100 million ECU held in reserve.

For NCI IV, the global authorization took effect automatically without the need for an implementing Decision.

¹ Decision 83/200/EEC : OJ No L 112, 28.04.83;

² Decision 87/182/EEC : OJ No L 71, 14.03.1987;

³ Decision 78/870/EEC : OJ No L 298, 25.10.1978;

⁴ Decision 82/169/EEC : OJ No L 78, 24.03.1982.

In addition to the ordinary operations, which are its chief activity, the NCI also contributes to operations which provide exceptional aid for the Italian and Greek areas affected by earthquakes in 1980 and 1981.

The Council Decisions relating to such aid for reconstruction do not set precise amounts for NCI activity, but limit the combined assistance, financed from the resources of both the European Investment Bank and the NCI, to :

- 1 000 million ECU in borrowing and lending for Italy ¹;
- 80 million ECU In borrowing and lending for Greece ².

II. SITUATION AT 31 DECEMBER 1987 :

The different legal bases for the ceilings applicable to the successive NCI authorizations determine the exact method of assessing the value of each loan signed in relation to the appropriate ceiling :

- For NCI I, II and III the ceilings are expressed in terms of borrowing and the loans signed are therefore converted into "borrowing equivalent", estimated on the basis of the currencies borrowed (which are slightly more than the currency amounts which are on-lent because of the costs incurred).
- For the reconstruction operations after the earthquakes in 1980 and 1981, the legislation in force assumes that the amounts borrowed and lent are identical. It is therefore the currencies actually disbursed for each loan which are taken into consideration.
- For NCI IV the ceiling is established in terms of loans, and it is therefore the "statistical" amount which is used; this is calculated directly from the contractual amount of each loan.

¹ Decision 81/19/EEC : OJ N° L 37, 10.02.1981;

² Decision 81/1013/EEC : OJ N° L 367, 23.12.1981.

Having regard to these special considerations, the situation at 31 December 1987 with respect to operations authorized was as follows :

(million ECU)

	NCI I	NCI II	NCI III	NCI IV	Earthquake reconstruction	
					Italy (of wh. NCI)	Greece (of wh. NCI)
Ceilings	1 000	1 000	2 900	750	1 000	80
Amounts granted	1 000	997	2 834	308	955 (613)	80 (80)
Balance	-	3	66	442	45	-

NCI I and II are closed, except for a small outstanding balance from NCI II which will be absorbed at the same time as NCI III is used up.

The amount granted under NCI III comprises 2 760 million ECU already paid, and 74 million ECU still to be paid out on loans already signed : this leaves a "borrowing equivalent" of 66 million ECU, for the granting of new loans.

NCI IV, which came into force in March 1987, started up rapidly, with over 40 % of the authorized amount already granted at the end of the year. The prospects are that this rapid rate of utilization will continue.

The special reconstruction operations after the earthquakes of 1980 and 1981, already completed in the case of Greece by a single NCI operation, are also coming to an end in Italy. With 95 % of the total authorized for the latter country already granted, 64 % of the assistance for Italy has been financed by the NCI and 36 % by the EIB.

.../...

III. ANALYSES BY COUNTRY AND BY SECTOR :

Such analyses can be carried out with regard to loans signed, expressed in terms of "statistical" amounts ¹. The following table shows the overall situation at 31 December 1987. The lists of individual operations appear in the Annex, except for NCI I and II for which the definitive lists were annexed to the Report concerning the second half of 1986 (doc. COM (87)258).

LOANS SIGNED : SITUATION AT 31 DECEMBER 1987 ²

(million ECU)

COUNTRY/SECTOR	NCI I	NCI II	NCI III	NCI IV	NCI ³ RECONS- TRUCTION	TOTAL	%
DENMARK	66,7	100,5	302,9	31,8	-	501,9	8,6
GREECE	-	114,9	111,3	-	80,0	306,2	5,2
SPAIN	-	-	69,2	113,7	-	182,9	3,1
FRANCE	70,0	125,0	938,9	-	-	1 133,9	19,4
IRELAND	239,0	116,5	68,4	-	-	423,9	7,3
ITALY	480,0	473,5	1 223,5	152,1	632,8	2 961,9	50,7
PORTUGAL	-	-	29,9	9,9	-	39,8	0,7
UNITED KINGDOM	139,2	67,0	86,4	-	-	292,6	5,0
TOTAL	994,9	997,4	2 830,5	307,5	712,8	5 843,1	100,0
of which :							
Energy	45,3%	30,2%	11,6%	-			
Infrastructure	54,2%	31,7%	16,0%	-			
Productive Sectors	0,5%	38,2%	72,4%	100,0%			

¹ Contractual amounts (usually expressed in the national currency of the recipient), converted into ECU at the exchange rate in force on the last working day of the quarter preceding the signing of the loan.

² Taking account of cancellations and a number of minor adjustments between the various sectors.

³ Because of the special nature of these operations, no sectoral breakdown is given here.

The breakdown of loans signed shows that the largest share of the activity is in Italy (even if reconstruction operations are excluded), with France in the second position. Whereas the proportion of operations in Italy has proved to be relatively constant (between 40 and 50 %) through successive tranches of NCI, France's share has definitely increased : it reached 33 % for NCI III, before falling momentarily to zero for NCI IV. For the latter authorization, Spain's share now stands at 37 %.

Taking together all NCI loans signed for ordinary operations, there is evidence of an increasing shift in activity towards the productive sectors, in accordance with the priorities laid down for NCI III to assist small and medium-sized enterprises. In contrast, there has been a fall in the proportion of loans signed under NCI III for the energy and infrastructure sectors.

These tendencies have culminated with the implementation of NCI IV, the purpose of which is exclusively to finance the investment projects of small and medium-sized enterprises in industry and other productive sectors, in particular, with a view to the application of new technologies and innovation and improving the rational use of energy. To this end, NCI IV has certain special features which distinguish it from the previous initiatives, such as the options of converting a loan into equity capital, of using it to finance the acquisition of intangible assets and of deferring interest payments.

IV. CONCLUSIONS :

NCI I, II and III, and the reconstruction operations after the earthquakes of 1980 and 1981, are virtually completed, while 41 % of NCI IV has been used up, following a series of loans signed from late July onwards. At the same time as NCI IV came into force, the EIB set up, on the Council's invitation, a "parallel" action out of its own resources, with criteria and a ceiling similar to those of NCI IV. At 31 December 1987 20 % of this parallel scheme had been used up.
