

# COMMISSION OF THE EUROPEAN COMMUNITIES

COM(85) 348 final

Brussels 4 July 1985

## COMMISSION REPORT TO THE COUNCIL

on cooperation with European non-governmental organizations  
(NGOs) active in the development field, with special reference  
to the cofinancing of projects (1984 Budget)

---

EXPLANATORY MEMORANDUM

1. At its meeting on 28 November 1977 the Council of Ministers (Development) approved the procedure to be followed for the use of the appropriations for the financing of projects with non-governmental organizations (NGOs).\*)

That procedure includes a stipulation that the Commission will present an annual report to the Council on the use of the credits allocated during the preceding year.

In accordance with that procedure the Commission presents this report, which deals with the use made of the budget of 35.0 m ECU entered under Article 941 of the 1984 Community Budget.

2. Although relations with the NGOs are mainly in the field of project cofinancing in developing countries, other important areas for cooperation with the NGOs are also covered, such as raising public awareness within the Community, food aid, emergency aid and inter-NGO coordination.

---

\*) See Council Document R/207/78/(GCD) of 26 January 1978.

## 1. INTRODUCTION

I. Cooperation between the European Communities and the non-governmental organizations (NGOs) began in 1976 with the aim of adding a new dimension to the Community's development policy. The idea was to enable the Community to take an active part in the expression of solidarity shown by Europe at a non-official level towards the poorest sections of the population in the Third World. That objective was reflected initially in the establishment of a Community budget heading to finance, with the European NGOs, projects in the developing countries. The appropriation, fixed on an experimental basis at 2.5 m ECU in 1976, increased progressively in subsequent years to cope with the increase in requests for cofinancing submitted by the NGOs. Accordingly, it reached 14m ECU in 1981, doubled to 28m ECU in 1982, and was then further increased to 31.2m ECU in 1983 and 35.0m ECU in 1984.

II. A review of Community cofinancing from the start of operations up to the end of 1984 indicates that from 1976 to 1984 the Community contribution totalled 135.7m ECU and made it possible for 1 598 projects to be cofinanced in developing countries. Table I in the Annex gives a breakdown by Member State of the total Community contribution committed from 1976 to 1984 inclusive.

These projects were undertaken with 238 NGOs in 108 developing countries. A list of recipient countries with the respective Community contributions is given in Tables II (ACP countries) and III (non-ACP countries).

The geographical breakdown shows that over the reference period 47% of the funds were allocated to African countries south of the Sahara, 25% to Latin America, 20% to Asia, 7% to the Mediterranean area and 1% to the Pacific. ACP countries were allocated 47% and non-ACP countries 53% of the total Community contribution.

Finally, 57% of the total available funds were allocated to developing countries with a per capita GNP of less than US\$ 500.

The total joint investment between NGOs and the Commission from 1976 to 1984 was around 343M ECU, giving a multiplier effect of 2.5 times the Community contribution.

In addition, between 1979 and 1984 inclusive the Commission cofinanced 209 projects with 110 NGOs for a total amount of 7,5m ECU to raise European public awareness of development issues.

In all, between 1976 and 1984, 1 807 projects were cofinanced under budget Article 941. The 2,000th project mark will therefore be passed in the course of 1985, the tenth year of activity. It is worth noting that almost half the projects cofinanced have been so during the last three years (1982-1984), evidence of the increasing interest which the Community is taking in this form of development cooperation.

III. Despite the steady increase, these figures are still relatively modest if compared with other items of the Community's development budget or with the figures concerning the total worldwide activities of the development NGOs. In 1983 the 2,000 or so NGOs active in the DAC member countries mobilized private funds of the order of US \$ 2,400m. At the same time, the official assistance granted by the DAC member countries to the NGOs amounted to US \$ 1,300million, representing an annual joint investment of US \$ 3,700m.<sup>1)</sup>

It is generally agreed among official suppliers of funds that the success of the "NGO formula" is due to the high degree of motivation and personal commitment of the NGOs, their independence from any external conditioning, their relatively modest size and the autonomy and flexibility of management that are the corollary of this. The interplay of these positive factors is generally reflected in the design and execution of projects in the developing countries, by a marked degree of effectiveness, speed and flexibility, and, above all, by the capacity of the NGOs to adapt their operations - almost from one day to the next - to any economic, political and technical changes

---

1) Source : OECD January 1985

that may occur. The necessary conditions therefore prevail for the NGO projects to have, generally speaking, a direct and positive impact on the suffering resulting from poverty, disease, ignorance and injustice.

The Commission, for its part, has undertaken to respect and encourage the special features of NGOs, such as their autonomy and pluralism based on the wide variety of motivations encountered amongst these organizations. Relations between the Commission and NGOs are marked by confidence in the latter's deep-rooted motivations and real abilities. In the vast majority of cases, this confidence continues to be fully borne out by the results.

IV. The cofinancing of development projects in developing countries is, however, only one of the various forms of cooperation between NGOs and the Community. Other aspects, which are just as important, are the support given to NGOs in projects to raise European public awareness of development issues, cooperation in the distribution of food aid and in emergency operations, and the role of catalyst that the Commission continues to play in the context of inter-NGO cooperation at European level through a constant dialogue with NGOs, both individually and collectively.

In 1984, the Community contribution to NGOs totalled 137m ECU (34.4m ECU for cofinancing, 56.4m ECU for food aid and 46m ECU for emergency aid). This report sets out to give an account of the Commission's activities in 1984, dealing in turn with the various aspects of cooperation with NGOs while not forgetting contacts with other European institutions and the prospects and trends already taking shape for 1985.

## 2. ALLOCATION OF COMMUNITY AID IN 1984

### 2.1. Cofinancing of NGO projects in developing countries (budget Article 941)

#### 2.1.1. Commitments and payments

Commitment appropriations available under budget Article 941 amounted to 35.0 m ECU in 1984. To this was added approximately 6.7 m ECU of commitment appropriations remaining from financial year 1983.

During the year 483 project applications totalling 58.1 m ECU were submitted to the Commission. It was possible to cofinance 271 of these with a total Community contribution of 31.2 m ECU. Some 92 other projects, amounting to 9.5 m ECU, were not accepted or were withdrawn by the NGOs. The others, i.e. 120 admissible applications totalling 17.4 m ECU, had to be carried over to 1985.

Commitments under Article 941, including projects to raise public awareness and the Liaison Committee subsidy, totalled 34.4 m ECU. This amount constitutes 98 % of the appropriations allocated in the 1984 budget alone, or 82 % of the appropriations available, including appropriations remaining from previous financial years.

The following list of commitment rates achieved under Article 941 since its inception is of interest in this context :

Year	Appropriations available in annual budget (m ECU)	Percentage of budget committed
1976	2,5	99,0
1977	4,0	98,0
1978	12,0	91,0
1979	12,0	96,0
1980	14,0	98,5
1981	14,0	99,5
1982	28,0	95,5
1983	31,2	84,0
1984	35,0	98,0

The above figures (average commitment rate 95.5 %) show that it has been possible, with great regularity, to fully commit the cofinancing appropriations allocated in the successive budgets of the last few years (including when the 1981 budget was doubled in 1982). That the only notable drop (84 % in 1983) ever recorded - and noted in the last report - was exceptional and purely circumstantial was confirmed by the upturn in 1984, even if it should be noted that the unexpended balance accumulated during the preceding years has not yet been absorbed.

As the budget proposed for 1985 does not provide for any increase in appropriations as compared to 1984 (35 m ECU) it should be possible to commit this balance during the course of the year. In the light of these results, the increasing number of applications, inflation, and the imminent eligibility of Portuguese and Spanish NGOs for cofinancing, a judicious increase in the appropriations allocated to line 941 should be envisaged as from the 1986 budget. Table IV in the annex gives the breakdown by Member State of the 1984 allocation.

The total payments of 25.3 m ECU effected in 1984 include 12.3 m ECU of commitments from 1984 and 13.0 m ECU of commitments from the preceding years.

#### 2.1.2. Type and scale of the project ; block grants

Table V in the annex gives a complete list of the 271 projects cofinanced in 1984 in developing countries.

As in the past, the project content is extremely varied and continues to be broken down into three main traditional sectors, namely rural development, training and health. Most of the projects, however, fall within more than one sector, reflecting the integrated approach which is characteristic of NGO operations (see Table VI in the annex).

As regards the scale of the projects cofinanced, the Commission's average contribution was 115,000 ECU in 1984. Although the Community

contribution can be as much as 360,000 ECU over three years, it has been above 200,000 ECU in only 52 cases, whereas in 75 cases it was less than 50,000 ECU. This confirms once more the NGOs' penchant for small-scale operations, which is in fact one of the main reasons for their success.

The total joint investment between NGOs and the Community reached 76.7 m ECU in 1984, giving a multiplier effect of about 2.5 times the Community contribution. This result confirms the capacity of the NGOs to mobilize growing amounts of their own and outside resources for the projects they undertake.

In 1984, 39 block grants were made, amounting to a total of 3.1 m ECU. It is appropriate to set out below the trend in block grants over the last few years :

Year	Amount of block grants (m ECU)	% of total budget	Number of block grants	Number of mini-operations	Average amount of mini-operation
1982	1.2	4	25	161	7,453
1983	2.3	7	34	296	7,770
1984	3.1	9	39	383	8,202

The figures given above point to the considerable, progressive increase in block grants, in absolute terms and as a percentage of the total budget. This is in line with the wishes expressed by the NGOs in 1983 and 1984.

They also reveal the veritable burgeoning of mini-operations, to which the Commission is increasingly able to contribute, thanks to the "capillary" approach which, as has already been pointed out, is a feature of the non-governmental organizations' activity.

### 2.1.3. Population concerned and recipient countries

The 271 development projects cofinanced in 1984 were carried out in 80 developing countries. The geographical breakdown shows that of the allocated funds 45 % went to African countries south of the Sahara, 28 % to Latin America, 22 % to Asia and 5 % to the Mediterranean area.

In all, ACP States received 13.9m ECU (45%), while non-ACP States received 17.3 m ECU(55%).

In 1984, 54% of the total appropriations available were allocated to countries with a per capita GNP of less than US \$ 500. However, it must be stressed once more that cofinanced projects are aimed by definition at the poorest sections of the population in developing countries, the country's per capita GNP being of only fairly relative significance in practice.

In general, the breakdown of appropriations in 1984 continues to reflect a trend towards a wider variety of beneficiaries.

## 2.2. Cofinancing of projects undertaken by NGOs to raise European public awareness of development issues (budget Article 941)

The revised general conditions governing the system for the cofinancing of projects to raise European public awareness of world development issues came into force in January 1984.

The importance of the projects directed towards public opinion carried out by the NGOs is reflected not only in the increasing number of NGOs seeking to cooperate with the Commission in this sphere but also in the emphasis placed in such projects on the priorities laid down in the revised general conditions. These include in particular the concept of a "Community dimension", on the basis of which priority is given to projects linked with Community development policies and to projects involving cooperation among NGOs in a number of Member States.

In 1984, 63 projects were cofinanced with 52 NGOs for a total of 2.9 m ECU (the equivalent of 8.3% of the annual appropriation under budget Article 941); this represents a consolidation in relation to 1983, when the total sum for the projects cofinanced in this sphere was 2.2 m ECU, i.e. 7% of the total appropriation.

Table VII in the annex gives a complete list of projects cofinanced in 1984 with individual NGOs or with informal networks of NGOs. An analysis of the 63 projects cofinanced in 1984 reveals first of all the main areas covered : Community policies affecting development (7 projects), food and agriculture problems (13), industrial restructuring and international trade (8), the problems of southern Africa (4), the role of women (7), health (3), as well as projects dealing in more general terms with North-South relations.

The projects were aimed at a very wide range of target groups. The priority groups identified by the NGOs themselves at the various General Assemblies - the farming and trade union worlds and schools - were well represented, as were projects aimed at local communities and political circles.

The results of a public opinion poll concerning development problems, conducted jointly by the Commission and the NGOs in the ten Member States, were published in 1984. These results constitute important material for reflection upon the needs and requirements still to be met in this sphere.

### 2.3. Community food aid channelled through NGOs (budget Chapter 92)

The following products, of a total value of 47.4 m ECU, were allocated under the Community's normal food aid programme for 1984 to various developing countries through European NGOs, most of them affiliated to churches : 35,000 t of cereals, 23,000 t of milk powder, 1,500 t of butteroil, 1,400 t of sugar, 500 t of vegetable oil, 1,500 t of beans and 400 t of dried fish.

This represents a drop of 4.6 m ECU compared with 1983 due mainly to the decrease in the quantities of milk powder and butteroil supplied. On the other hand, for the following products supplied as food aid, the amounts increased as follows : by 10,000 t for cereals, 300 t for vegetable oil, 800 t for beans and 350 t for dried fish.

In 1984, 11 emergency food aid operations of an approximate value of 9 m ECU were carried out in seven countries - Ethiopia, Sudan, Angola, Burundi, Uganda, Zaire and Kampuchea - through NGOs. The particularly important role played by NGOs in Ethiopia proves that they are able to assume their function of providing aid even on a wide scale, dispatching considerable quantities of cereals (11 000 t), butteroil ( 1,200 t), milk powder (350 t), vegetable oil (250 t) and various other products, for a total value of 7.2 m ECU.

The total expenditure for 1984, including the annual food aid programme and emergency operations, was 56.4 m ECU (See Annex VIII for details of these operations).

Lastly, attention should be drawn to the importance of the positive role played constantly by Euronaïd throughout the year. This organization not only did a great deal of work in coordinating the transport and distribution of food aid for the NGOs, but it provides the NGOs with an opportunity to exchange views and experience. The Commission for its part carried out a study on the system for the distribution of milk powder, the conclusions of which will result in changes which could improve future operations.

2.4. Community emergency aid channeled through NGOs (budget Article 950, Article 137 of the Lomé Convention and Article 117 of the Council Decision regarding the association of the OCT)

During 1984, 247 m ECU were made available for emergency aid operations. A detailed breakdown of the appropriations allocated to the NGOs cannot be given in this report, since two operations involving large sums (95 m ECU and 80 m ECU to combat the famine in Africa will be carried out in 1985.

However, emergency aid channeled directly or indirectly through NGOs in 1984 totalled around 46 m ECU.

Annex IX lists emergency aid decided upon during 1984.

2.5. Non-governmental organizations; support for inter-NGO coordination and miscellaneous activities at European level (budget Article 941)

In 1984, 117 NGOs (34 of which for the first time) benefited from at least one cofinancing. This compares with 93 and 18 respectively in 1983, thus confirming the trend towards diversification, which is furthermore actively encouraged by the Commission.

Informal contacts have been maintained with Spanish and Portuguese NGOs in order to familiarize them with the Community's approach and procedures.

The instruments set up in previous years for the democratic representation of European NGOs and dialogue between them (National Assemblies, European General Assembly, Liaison Committee) continued to play their institutional role in the course of 1984.

The Liaison Committee was allocated an amount of 298,133 ECU in 1984 to cover its operating costs. This includes both the activities pursued directly by the Committee and the various advisory, organizational and coordination tasks that are carried out throughout the year by its ad hoc subcommittees (which are responsible respectively for raising public awareness, food aid, emergency operations and volunteers).

The grant made to the Liaison Committee in 1984 is lower than that made in 1983 (i.e. 318,431 ECU).

Progress was made in 1984 on social security protection for volunteers. A draft Council recommendation was prepared by the Commission and is currently under examination by the Council Working Party on Social Questions.

Lastly, the second evaluation of the NGO projects got off the ground at the end of 1984 and will be continued over the first half of 1985.

### 3. INSTITUTIONAL CONTACTS

The Committee on Development and Cooperation of the newly elected European Parliament met the NGO Liaison Committee, as is now customary, in November 1984. These exchanges of views focused on four main subjects, namely :

- hunger in the world, and particularly in Africa;
- the situation in Central America;
- the implementation of Lomé III;
- the action taken on European Parliament resolutions.

It was agreed that such meetings should be held at more frequent intervals over the next few months and that they would deal notably with ad hoc topics set out in information papers to be prepared by the Liaison Committee.

The Council Working Party on Development Cooperation took note, in July 1984, of the Commission's annual report on the various aspects of cooperation between the Community and NGOs in 1983.

### 4. CONCLUSION AND PROSPECTS

The main feature of 1984 will probably be seen as the intensification of Community operations designed to attenuate the effects of the famine in Africa, notably through the NGOs. These operations must continue in 1985, with the NGOs taking on an increasingly important role.

It is obvious that emergency operations must not be regarded as substitutes for normal development activities, which are the only means of avoiding, in the medium and long term, the repetition of disastrous food shortages such as the present one. It is vital that European public opinion should become increasingly aware of this truth, and the contribution which development education projects cofinanced in Europe with the NGOs can make to this growing awareness should not be underestimated.

For the cofinancing of development projects in the developing countries, a judicious increase in the appropriation available in future is to be recommended, in view of the excellent absorption capacity constantly shown by the NGOs in the past, the growing number of acceptable cofinancing applications made to the Commission, and the imminent eligibility of the Spanish and Portuguese NGOs for cofinancing.

There is also the role played by the NGOs in the ad hoc Community operations to promote the food self-sufficiency of refugees and displaced persons.
