

COMMISSION OF THE EUROPEAN COMMUNITIES

COM (88) 309 final

Brussels, 1 June 1988

COMMISSION REPORT TO THE COUNCIL

on cooperation with European non-governmental organizations
(NGOs) active in the development field, with special
reference to the cofinancing of projects (1987 budget)

EXPLANATORY MEMORANDUM

1. At a Council meeting on 28 November 1977, development ministers approved a procedure to be followed for the use of appropriations to cofinance projects with non-governmental organizations (NGOs).*

That procedure includes a stipulation that the Commission will present an annual report to the Council on the use of appropriations allocated during the preceding year.

The Commission accordingly presents this report on the use of the appropriations entered under Article 941 of the 1987 Community budget.

2. Although Article 941 relates solely to project cofinancing in developing countries and the raising of public awareness in the Community, other important areas of cooperation with NGOs are also covered in this report, such as food aid, emergency aid and inter-NGO coordination.

* See Council Document R/207/78(GCD) of 26 January 1978.

1. INTRODUCTION AND SUMMARY

- I. Cooperation between the European Community (EC) and the non-governmental organizations (NGOs) began in 1976 with the aim of adding a new dimension to the Community's development policy. The idea was to enable the Community to take an active part in the expression of solidarity shown by Europe at a non-official level towards the poorest sections of the population in the Third World. That objective was reflected initially in the establishment of a Community budget heading (Article 941) to finance projects in the developing countries with European NGOs. The appropriation, fixed on an experimental basis at 2.5 m ECU in 1976, increased progressively in subsequent years to cope with the increase in requests for cofinancing submitted by the NGOs. Accordingly, it reached 14 m ECU in 1981, doubled to 28 m ECU in 1982, and was then further increased to 45 m ECU in 1986. In 1987 an initial sum of 52 m ECU was entered in Article 941; this was increased in the course of the year to 62 m ECU.

Together with this development of cofinancing, there has been a gradual increase in the share of both food aid and emergency aid which is channelled through NGOs. Lastly, in the last few years specific articles have been included in the budget to cover projects carried out by NGOs (aid for refugees and displaced persons, aid for NGOs operating in Chile, aid for NGOs working to deal with drugs).

- II. Article 941 covers the cofinancing with NGOs of development projects in developing countries and of operations to raise public awareness in Europe.

A review of Community cofinancing from the start of operations in developing countries shows that from 1976 to end 1987 the Community contribution totalled 271 m ECU, allowing 2 629 projects to be cofinanced in developing countries.

These projects were undertaken with 365 NGOs in 115 developing countries. A list of recipient countries with the respective Community contributions is given in Table I (Annex).

The geographical breakdown shows that over the reference period 45% of the funds were allocated to African countries south of the Sahara, 29% to Latin America, 20% to Asia, 5.5% to the Mediterranean area and 0.5% to the Pacific. ACP countries were allocated 46% and non-ACP countries 54% of the total Community contribution.

Finally, 51% of the total available funds were allocated to developing countries with a per capita GNP of less than US \$ 500.

The total joint investment between NGOs and the EC from 1976 to 1987 was around 656 m ECU, giving a multiplier effect of 2.4 times the Community contribution; in other words, the Community contribution accounts on average for 41% of joint NGO/EC investment.

¹ ACP: African, Caribbean and Pacific States signatory to the Lomé Convention.

In addition, between 1978 and 1987 inclusive the EC cofinanced 445 projects with 194 NGOs at a total cost of 21.2 m ECU to raise European public awareness of development issues.

Between 1976 and 1987, 3 074 projects in all were cofinanced under Budget Article 941, representing a total contribution of 292.2 m ECU. The 3 000 mark was passed in 1987, the twelfth year of activity. It is worth noting that more than half (52%) of all the projects were cofinanced and almost two thirds (63%) of all funds were committed during the last four years (1984-87) - evidence of the increasing interest which the Community and the NGOs are taking in this form of development cooperation.

Table II (annex) gives a breakdown by Member State of the total Community grant from 1976 to 1987 inclusive.

III. The cofinancing of development projects in developing countries and of projects to raise public awareness in Europe are, however, just two aspects of cooperation between NGOs and the Community. Other equally important aspects are cooperation in the distribution of food aid, emergency relief operations, assistance to refugees and the role of catalyst that the Commission continues to play in the context of inter-NGO cooperation at European level through a constant dialogue with NGOs, both individually and collectively.

Thus, in 1987 the Community contribution committed for the various NGO activities was 197.5 m ECU (compared with 136 m ECU in 1986) and was allocated as follows:

- 62.8 m ECU for cofinancing, including operations to raise public awareness;
- 109.4 m ECU for food aid;
- 19.1 m ECU for emergency aid;
- 1.7 m ECU as aid for refugees and displaced persons;
- 2.0 m ECU for aid to NGOs operating in Chile;
- 2.6 m ECU for aid on drugs.

This report sets out to give an account of the Community's cooperation with NGOs in 1987, dealing in turn with the various aspects while not forgetting the prospects and trends taking shape for the future.

2. UTILIZATION OF COMMUNITY AID IN 1987

2.1. Cofinancing of NGO projects (Budget Article 941)

2.1.1. Cofinancing of NGO projects in developing countries

Commitment appropriations available under Article 941 of the 1987 Budget amounted initially to 52 m ECU. This sum having been committed in full by June 1987, the Commission sought and obtained the transfer of a further 10 m ECU within Chapter 9, to be credited to Article 941.

¹ Plus 0.8 m ECU carried over from 1986.

The additional 10 m ECU has also been committed in full, bringing total commitments for 1987 to 62.8 m ECU, with utilization of the available funds approaching 100% (projects in developing countries, public awareness operations and the subsidy for the Liaison Committee).

It should be stressed that since Article 941 was created, appropriations committed annually have been constantly increasing:

Year	Annual Commitment (million ECU)	Utilization rate of available appropriations (%)
1976	2.5	100
1979	12.2	98
1982	26.9	95
1984	34.4	83
1985	42.4	99
1986	45.0	98
1987	62.8	99

The NGOs have therefore shown time and time again that they have no problem in absorbing budgets which are constantly and sometimes rapidly being increased.

With particular reference to projects in developing countries, in 1987 905 requests for cofinancing were processed by the Commission, totalling 130,3 m ECU (compared with 83.6 m ECU in 1986). It was possible to cofinance 423 of these projects (as against 293 in 1986), giving a total Community contribution of 56.6 m ECU (compared with 40.1 m ECU in 1986). A further 164 projects, totalling 20.7 m ECU, were not adopted or were withdrawn by the NGOs. The remaining 318 requests represented a total of 53 m ECU and were carried over to 1988.

In the light of the above results and of the continually increasing number of applications being sent in (a great many of which could not be financed owing to lack of appropriations), an increase in Article 941 under the 1988 and 1989 budgets seems indispensable.

Table III of the Annex gives the breakdown by Member State for the 1987 allocation.

The payments total of 51.5 m ECU in 1987 (compared with 34.6 m ECU in 1986) comprises 24.8 m ECU under commitments in 1987 and 26.7 m ECU under commitments from the preceding years.

¹In 1987 this subsidy was 472 550 ECU.

Type and scale of projects; block grants

Table IV in the Annex gives a complete list of the 423 projects cofinanced in 1987 in developing countries.

As in the past, the project content is extremely varied and continues to be broken down into three main traditional sectors, namely rural development, training and health. Most of the projects, however, fall within more than one sector, reflecting the integrated approach which is characteristic of NGO operations.

As regards the size of the projects cofinanced, the average contribution was 134 000 ECU in 1987, as against 137 000 ECU in 1986. Although the Community contribution can be as much as 360 000 ECU over three years, it was above 250 000 ECU in only 57 cases, whereas in 86 cases it was less than 50 000 ECU (excluding block grants). This confirms once more the NGO's penchant for small-scale operations, which is in fact one of the main reasons for their success.

The 423 development projects cofinanced in 1987 included 59 block grants amounting to 6.8 m ECU. It is worth noting the trend in block grants over the last few years:

Year	Amount in block grants (million ECU)	% of total budget	Number of block grants	Number of mini-operations	Average EC contrib. by mini-operation (ECU)
1982	1.2	4	25	161	7 453
1983	2.3	7	34	296	7 770
1984	3.1	9	39	383	8 202
1985	3.7	11	43	450	8 146
1986	5.7	13	50	671	8 507
1987	6.8	11	59	822	8 272

The figures given above point to the progressive increase in block grants in absolute terms, while they have stayed more or less at the same percentage of the total budget in 1987 as in 1985 and 1986. There is a prospect that this percentage will increase in 1988, given the increasing number of NGOs which are eligible and the higher ceilings provided for in the new measures in this area.

Lastly, it should be noted that 168 NGOs had at least one operation cofinanced in 1987 (77 being newcomers). The figure of 77 new NGOs can be compared with the 1986 figure of 33. In all, 559 NGOs were helped over the 1976-1987 period.

Population concerned and recipient countries

The 423 development projects cofinanced in 1987 were carried out in 96 developing countries. The geographical breakdown shows that of the allocated funds 43% went to African countries south of the Sahara, 32% to Latin America, 18% to Asia, 5.5% to the Mediterranean area, and 1.5% to the Pacific area.

Of the total Community grant 24.8 m ECU (44%) went to ACP countries and 31.8 m ECU (56%) to non-ACP developing countries.

In 1987, 46% of the total appropriations available were allocated to countries with a per capita GNP of less than US \$ 500. However, it must be stressed once more that cofinanced projects are aimed by definition at the poorest sections of the population in developing countries, the country's per capita GNP being of only fairly relative significance in practice.

2.1.2. Cofinancing of operations undertaken by NGOs to raise European public awareness of development issues

In 1987, 87 projects were cofinanced with 75 NGOs, for a total of 5.7 m ECU (equivalent to 9% of appropriations available under Article 941). Table V in the Annex gives a complete list of projects cofinanced in 1987.

Over the year, 178 applications totalling 12.5 m ECU were processed by the Commission. Of these, 40 projects, representing 2.8 m ECU, were not accepted or were withdrawn by the NGO and the remaining 51 applications, representing a total of 4 m ECU, were carried over to 1988.

Among the 87 cofinanced operations, the topics most frequently dealt with were: general development issues (29 projects), food and agricultural problems (10) and southern Africa and apartheid (7). Other topics chosen included the cultural aspects of development (4), Latin America (4) and the role of women (5). The general public (17) and education (19) were once again priority target groups and particular attention was given to opinion leaders, the media and political circles (22 projects) (see Table in Annex VI for details).

The particular characteristic of 1987 was the desire to obtain information in depth. Amongst the cofinanced projects was a public opinion poll carried out in the twelve Member States (report to be published in March-April 1988), and a survey on the use of audio-visual equipment. The survey complements research carried out throughout the year on the image of Africa portrayed by the NGOs and the media, and also the increased coordination in this important area via the activities of new networks.

The culmination of this process of reflection and coordination will be the 1988 General Assembly, which, following a resolution from the 1987 Assembly, will deal with the raising of public awareness as its main theme. The 1988 Assembly coincides with the campaign by the Council of Europe on the interdependence of North and South. Much of the NGOs' work in 1987 was in preparation for these two events. The Community financed the first preparatory activities for the Council of Europe campaign towards the end of 1987.

2.2. Community food aid channelled through NGOs (Budget Chapter 92) and contributions to NGOs to help finance food purchases (Budget Article 951)

2.2.1. The report presented to the Council for 1986 noted that food aid allocated to NGOs had reached record levels. That record was broken again in 1987. The quantities distributed via the NGOs as part of the 1987 food aid programme were as follows:

Products	Quantities distributed (tonnes)	Increase in tonnage compared with 1986 (%)
Cereals	210 450	70.5
Skimmed milk powder	29 740	9.1
Butteroil	3 760	178.5
Sugar	3 900	290.0
Vegetable oil	4 215	743.0
Beans	3 200	88.2
Dried fish	960	106.5
Other	60 000 ECU	- }

In budget terms, the 1987 programme totalled 109.4 m ECU, i.e. an increase of 51.9% on 1986.

The breakdown of food aid operations carried out by the NGOs in 1987 is as follows (by volume, i.e. tonnage):

- development operations	8.4%
- mixed operations (development/relief)	50.6%
- relief operations	16.8%
- emergency operations	24.2%

2.2.2. The increases mentioned above correspond to the increased needs of developing countries (especially regions hit by disasters). They also reflect the NGOs' ability to distribute satisfactorily the quantities of products allocated to them. The Commission was able to justify the increased demands for food aid by means of better-quality information being supplied through the active involvement of its delegates in this field. Euronaid dealt effectively with deliveries and sometimes purchases of foodstuffs. It should however be stressed that such large volumes are pushing both the Commission and Euronaid to the limits of their present absorption capacities.

For the ACP States, the increased quantities (particularly in cereals) reflect the catastrophic situation in Angola, in Ethiopia (including Eritrea and Tigre) and Mozambique. This contrasts with the work done in Zaire to set up cereal banks in the north-east of the country, which is to be seen as a development operation.

The quantities allocated to the Maghreb countries were increased, thanks to better coordination among NGOs and with the Commission delegates. This particularly facilitated the humanitarian aid given to Saharawi refugees. As regards the Mashreq countries, food aid to Jordan was increased and larger quantities were allocated to Lebanon in view of the present crisis.

The considerable increase in food aid to Central America is due in particular to the increased activity of European NGOs in Nicaragua. The largest recipient in South America was Chile, which has continued to receive Community humanitarian aid via the European NGOs. The situation for skimmed milk powder worsened when the United States decided to stop its consignments to several Latin American countries, including Chile. In the Caribbean, both the Dominican Republic and Haiti receive Community food aid, with most going to Haiti because of the country's desperate situation.

Lastly, in Asia, the largest amounts were allocated in the second half of 1987 following floods and typhoons in Bangladesh, Kampuchea, Laos and Viet Nam. Food aid was granted in the Philippines to assist unemployed sugar cane workers on the island of Negros.

2.2.3. Some difficulties were encountered in certain cases of food aid implementation, in particular:

- delays in obtaining the necessary import licences;
- attempts by local authorities to impose import duties on food aid to be distributed free of charge;
- refusal to import food aid products because of fears that they were radioactive.
- the time taken between programming and delivery (the product can sometimes become available locally following on early harvest, in which case import is refused);
- lack of security in some areas.

In 1987, NGOs encountered difficulties of these types in the following countries: Brazil, Cameroon, Ghana, Haiti, India, Sudan, Uganda and Zaire.

2.2.4. Lastly, as regards Article 951 (contributions to the financing of foodstuffs purchased by NGOs), the available appropriations were used only for emergency operations.

In the ACP States, humanitarian aid was supplied to victims of the fighting in Angola, Mozambique and Ethiopia (Eritrea and Tigre). In Benin, Burkina Faso and Niger, the aid went to those living in the driest areas and hit by famine or malnutrition. A coordinated operation was mounted by three NGOs in Lebanon to help victims of the civil war, and a similar nutritional project was implemented in Suriname to help those in the population who had suffered from the fighting. Lastly, aid in Asia went to civil war victims in Afghanistan and Sri Lanka.

2.3. Community emergency aid channelled through NGOs (Budget Article 950, Lomé Convention, Council Decision on association of OCT)

The total value of emergency aid operations implemented through NGOs in 1987 was 19.1 m ECU, representing 43.4% of the total 44.1 m ECU approved by the Commission for disaster relief in developing countries.

The percentage of emergency aid channelled through the NGOs was higher this year than ever before, and confirms the important role of the NGOs as an operating channel for the Commission.

Breakdown of 1987 emergency aid by implementing channels ('000 ECU)						
	Governments/ delegations	NGOs	UNHCR	Other UN bodies	Red Cross	Total
EDF	5 755	9 805	-	2 617	5 370	22 573
Budget	5 136	9 330	-	3 220	2 825	21 485
TOTAL	10 891	19 135	-	5 837	8 195	44 058
%	24.7	43.4	-	13.3	18.6	100

Aid to victims of drought and armed conflicts made up 67% of the total Community emergency aid approved in 1987 and went essentially to Mozambique, Ethiopia, Angola and Lebanon. Of this, 48% was channelled through the NGOs.

In addition, considerable amounts of Community emergency aid went to emergency medical programmes, where rapid implementation is essential if a spread of epidemics of malaria, yellow fever, etc. is to be checked. In this area, the NGOs played an important role in channelling almost three-quarters of the emergency aid for use in direct medical programmes.

2.4. Aid for refugees and displaced persons (Budget Article 936)

On the initiative of the European Parliament, appropriations have been included under Article 936 since 1984, with the aim of enabling the Community to continue its assistance for refugees and displaced persons in Asian and Latin-American developing countries in the period after the emergency relief stage (covered by Article 950).

From 1984 to the end of 1987, 29 projects were financed, totalling 23.5 m ECU.

Each time, all the appropriations have been committed before the end of the budget year. The appropriations were used to help refugees (71%) or displaced persons (25%), and for repatriation operations (4%).

Cofinancing with NGOs covered 16 projects, representing 31% of the appropriations; 11 projects (65%) were cofinanced with the UNHCR and UNBRO, and two projects with governments (4%).

Asia received 50.6% of the commitments (Pakistan, Thailand, Sri Lanka), Central and South America 45% (Mexico, El Salvador, Nicaragua, Honduras, Guatemala, Uruguay), and Africa (in 1984) 4.4% (Mozambique).

Cooperation under Article 936 is a means of financing medium-term projects covering capital and operating costs in all sectors (agriculture, stockfarming, fisheries, craft industries, hygiene, health care, training and housing), plus the technical assistance necessary for implementation and the cost of preparing and evaluating projects.

In 1987 the commitment appropriations under Article 936 doubled to reach 10 m ECU, and allowed 11 projects (7 in Latin America and 4 in Asia) to be financed. Particular attention was focused on moves towards voluntary repatriation and reintegration of refugee populations in Central America, particularly from Honduras to Nicaragua and from Mexico to Guatemala, and on people displaced within those countries.

The table in Annex VII gives the five projects cofinanced with the NGOs in 1987 at a total cost of 1.7 m ECU.

2.5. Aid to NGOs for operations in Chile (Budget Article 992)

This Article was first entered in the Community budget in 1986 and was renewed for the same amount of 2 m ECU in 1987. The aim is still to provide assistance, through non-governmental organizations, to the people of Chile.

In 1987, 71 proposals were submitted to the Commission for financing, to a total value of 5.3 m ECU. The much greater number submitted, as compared with those in 1986 (40), shows that people both in Chile and in European NGO circles are becoming aware of the possibilities open under Article 992.

Of the projects submitted, 37 were financed for a total of 2 m ECU (100% utilization rate). As in the past, the activities chosen were those aimed at giving direct help to the people of Chile, and in particular to those considered to be the poorest and most in difficulty. The Commission also endeavoured to strike a balance as far as possible between projects for the capital and those for the provinces, and amongst the different types of projects (social, economic, cultural, etc.), and the different sectors of activity (agriculture, craft industries, services, training, health care, etc.). Almost a third of the projects were financed through European NGOs, with the rest being financed direct with Chilean organizations.

Finally, it should be noted that the projects financed in 1986 were being satisfactorily implemented in 1987, with most showing very encouraging results.

2.6. Programme for North-South cooperation on drugs (Budget Article 949)

This programme was new in 1987, with a budget of 5.5 m ECU. This enabled a total of 18 projects to be financed, with the commitments totalling 5 463 094 ECU. Administrative costs (missions to identify and prepare projects, support from the Commission's departments) of around 30 000 ECU must be added to this figure.

Partner NGOs received a total of 2 583 616 ECU in 11 financing operations; this represented 47% of total commitments.

Projects financed cover a broad spread of countries in all five continents. However, European NGOs did not submit any projects concerning Asia, which is a region of the world very much affected by the problem of drugs. The Malaysian Government submitted a training programme for voluntary workers in its national NGOs. The activities of European and local NGOs in fighting the illicit production of drugs and drug abuse were most intensive in Latin America.

In accordance with the guidelines drawn up by the Council on 26 January 1987, the activities were aimed at the various stages in the drug trade, with the intention of containing the illegal production of drugs, curbing their sale, and reducing - if possible preventing - their use; an extremely wide variety of projects could be used to achieve these aims.

Thus, alternatives to drug production can take the form of prevention (development projects aimed at the economically weaker population groups) or substitution (e.g. complementing programmes for eradicating drug crops), and may use a wide variety of methods.

Projects for curbing drug consumption may also be aimed at both prevention and cure, and are targeted either on the victims (treatment, rehabilitation of addicts), or on groups considered to be at risk or who should be more aware in general terms of the problem. Here too, such projects may be very varied and operate on very different levels: direct financing for projects

on raising awareness and on prevention or for treatment centres, and the training of people to run such schemes; research and studies; strengthening of institutions and encouraging coordination amongst those in charge, etc.

3. EVALUATION (Budget Article 941)

The figures throughout this report show a constant growth in the number of projects cofinanced with NGOs; it is of course just as essential to ensure that the quality of these projects remains satisfactory. Regular evaluations have proved to be important in this respect.

The Commission's report on 1985 provided the results of the evaluation carried out during that year, as well as its own comments. The evaluation covered 32 projects (25 projects cofinanced with NGOs and 7 EDF micro-projects), already implemented or being implemented in 17 developing countries in Africa, Latin America and Asia.

Since then, the Commission has endeavoured to follow up some of the assessors' recommendations, in particular in its revised text for the General Conditions for cofinancing, which comes into force on 1 January 1988. The new text now provides for three ways to evaluate a cofinanced project:

- (i) assessment of a specific project carried out by the NGO itself;
- (ii) joint assessment by the NGO and the Commission at the beginning, in the middle or at the end of a specific project;
- (iii) overall assessment by the Commission of a number of projects with similar features (e.g. cofinanced by the same NGO, implemented in the same country, in the same sector, etc.).

In the first two cases, a clause can be incorporated at the outset in the cofinancing contract, specifying that the project be evaluated at a given stage. This is particularly useful for multiannual projects, where the Community can now offer cofinancing for up to five years. This type of evaluation is also very useful for any project of an experimental nature or, more generally, for any project which depends on conclusive results from a first phase before it can be continued.

An example of this was evaluation of a fish farming project under way in Honduras, which enabled a similar project in Paraguay, for which cofinancing was being requested, to be modified. In the same way, the Community financed the evaluation of four projects cofinanced with a French NGO in Haiti which had reached different stages of implementation. Work in situ showed that the projects were aimed at giving an active role to the local population and corresponded to the real needs of the country, which should ensure their viability once the outside assistance ends. In future the Commission intends to make use more often of such ad hoc evaluations, for which the terms of reference, timetable and costs can be incorporated in the project itself with a minimum of formalities.

As regards the third type of evaluation (overall assessment), the Commission is preparing an operation similar to that carried out in 1985, but this time geared more to identifying projects. It is at

the identification stage that parameters are determined (objectives, priorities, means, etc.) which may later turn out to be wrong or unsuited. Such an assessment will cover projects cofinanced in developing countries and detailed arrangements for its implementation will be established in 1988.

Lastly, the Commission is also preparing an assessment of the projects for increasing public awareness in Europe of development problems. The impact of such projects is particularly difficult to assess, and the Commission is fully aware that this is an ambitious undertaking. Minute preparation is needed, and prior definition of methodology, parameters for choosing projects to be assessed, etc., is essential. The work was begun in 1987 and will continue into 1988 and, amongst other things, contacts are planned with those Member States which show particular interest in this topic.

4. NORTH-SOUTH CAMPAIGN OF THE COUNCIL OF EUROPE

The Community, through European NGOs, is participating actively in preparing and implementing the Council of Europe's North-South campaign. The Commission responded to the approaches made by the campaign organizers by making a contribution to the preparatory work at the very beginning, and has sought, within the NGO-Commission liaison bodies, to interest NGOs in supporting the campaign by means of various projects to promote awareness. The Commission announced that such projects could receive cofinancing of the order of 2.5 to 3 m ECU in 1987 and 1988, under Article 941.

At the end of January 1988, NGOs from various Member States had submitted 14 projects for cofinancing, requiring a total contribution of just over 1 m ECU. Other projects have been announced and will be cofinanced as quickly as possible.

As well as these 14 projects, two other operations deserve particular attention:

- (i) Together with a consortium of European NGOs, the Commission has started a second survey of the opinions of Europeans on development cooperation. This project follows the survey carried out in 1983-84. The survey itself was completed at the end of January 1988; processing of the data is under way, and the final report will be published at the end of March or the beginning of April 1988.
- (ii) A travelling exhibition, "Train 2000", will be touring ten European countries (8 Community Member States, plus Austria and Switzerland). The train will make stops mainly in provincial towns and will serve as a back-up to various events organized by local NGOs with the media, schools, local authorities, etc. The train is to begin its journey in autumn 1988, thus rounding off the Council of Europe campaign. A large group of European NGOs set up this project, which immediately created considerable interest in the Council of Europe and in the European general public. It will form an integral part of the campaign and display many of its themes. The Community's financial contribution to this project will be of particular significance.

5. CONCLUSIONS AND PROSPECTS

- 5.1. With regard to Budget Article 941, 1987 saw the commitment in full not only of the appropriations initially entered in the budget but also of the additional appropriations subsequently requested and transferred. For the third year running (1985-87), the rate at which available appropriations were committed was around 99%. In 1987 the NGOs showed that they were able easily to absorb appropriations of almost 63 m ECU in the course of a single budget year (compared to 45 m ECU in 1986 and 34 m ECU in 1985).

In the light of the results mentioned above, and given the constantly increasing number of requests being submitted for cofinancing (very many of which could not be financed in 1987 owing to lack of appropriations), an increase of the appropriations under Budget Article 941 for the 1988 and 1989 budgets seems indispensable. Such an increase would, of course, have to be gradual and would have to reflect the absorption capacity of both the NGOs and the Commission.

- 5.2. Throughout 1987, as in the past, the NGOs maintained close cooperation with the European Parliament, e.g. at the plenary session in February 1987 devoted to development cooperation. Parliament also adopted several reports in 1987 concerning NGO activities, in particular the report drawn up by Mr J. Ulburghs on NGO-Community cooperation.

The Council's Development Cooperation Group took note in September 1987 of the Commission's annual report covering the various aspects of NGO-Community cooperation in 1986. As part of its contacts with the Community institutions, the NGO-EC Liaison Committee continued its dialogue on development cooperation with the Council presidencies in 1987.

Lastly, the bodies providing democratic representation of European NGOs (National Assemblies, European General Assembly, Liaison Committee) continued to fulfil their institutional role throughout 1987.

It is to be hoped that, in parallel with the operational projects in the various areas of cooperation (cofinancing, raising public awareness, food aid and emergency aid, refugees, NGO's operating in Chili, the fight against drugs), and beyond such projects, 1988 and the following years will see further consolidation and deepening of the continuing dialogue between the NGOs themselves and with the various Community bodies.
