## INTRODUCTION

During the period covered by this report, the Association has almost completed its second year of operation since the entry into force of the Second Yaoundé Convention. At the same time, it has seen two major events which will certainly have repercussions on its medium and long term future.

Firstly, through the information supplied to it and the consultations which have taken place in the Association Council, it has followed the negotiations between the Community and the four applicant States, negotiations which culminated in the signature of the Treaty of Accession in Brussels on 22 January 1972.

This Treaty, which will enter into force on 1 January next, will involve fairly considerable changes in Community life. The authors of the Treaty left relations between the Community of Six and the Associated African and Malagasy States intact until the expiry of the Yaoundé Convention, i.e. until 31 December 1975. Similarly, until this date, the United Kingdom will maintain its relations with the Commonwealth States which are themselves likely to become associated with the enlarged Community.

Besides this status quo rule, which ensures for the Associated States the full benefit of the 1969 Convention, the Treaty of Accession contains an offer for the independent Commonwealth States which so desire to become associated

with the Community. In fact, it is next year that the negotiations for the renewal of the Yaoundé Convention are due to open. The present and future associated States will thus meet after 1 August 1973 to establish their relations with the enlarged Community.

However, one of the independent Commonwealth States did not wish to await the outcome of the future negotiations and expressed its desire to become party to the Yaoundé Convention immediately. This State is Mauritius, whose links with some of the Member States are of long standing. Signed at Port Louis on 12 May 1972, the Act of Accession of Mauritius to the 1969 Convention is at present awaiting ratification by the competent authorities of the Member States and Mauritius and will enter into force next year.

At the same time as the negotiations for enlargement of the Community and the accession of Mauritius to the Yaoundé Convention, the Association has followed with interest the talks between the Community and the States of the European Free Trade Association (EFTA) which have not applied for membership. The success of these negotiations, certain aspects of which have a direct bearing on the AAMS' interests, had the effect of creating around the Community a vast economic unit which will be sure to play an important role in the world.

It is precisely in terms of these increased world responsibilities that one should consider the action to be taken following the 3rd United Nations Conference on Trade and Development which met in April.

and May 1972 in Santiago, Chile. The interests of the Associated States coincided with those of other developing countries each time that the proposals by the "Group of 77" were aimed at improving the present position with regard to the underdeveloped countries. To improve co-ordination of this constant search for the best solution and to take into account at the same time Community links with the group of industrialised countries, its links with its associates and the presence of the latter in the "Group of 77", consultations were organised in Brussels, before the Conference opened, and also in the capital of Chile in the light of the items on the agenda. During these consultations frank and detailed discussions enabled the parties to the Yaoundé Convention to listen to the viewpoints of each of the parties present. The major debate on the results of UNCTAD III has not yet taken place in the Association Council, but already it is possible to say that the attempts made, particularly to organise trade on a world scale under universally acceptable conditions, are still far from being successful and the association as it stands at present between the Community and the AAMS remains the best achievement to date under the circumstances. All the same, the contracting Parties and those which join them next year will not be able to ignore what was said and proposed at the Santiago Conference, particularly since 1973 will see, besides the opening of negotiations for the renewal of the Yaoundé Convention, the major multilateral trade negotiations within GATT and the negotiations which should lead to the re-moulding of the international monetary system.

The task of the enlarged Community, surrounded by its European associates and partners, and of its present and future associates in other continents - conscious of their importance on the chess board of the world - will be to act in such a way that the new Convention, which should see the light of day on 1 February 1975, may always be considered as a model of what can be achieved in relations between industrialised countries and developing countries.

The Parliamentary Conference and the Joint Committee have always been able to show, with a considerable degree of foresight, the ways towards the construction and smooth operation of a harmonious and efficient association. The Association Council assessed the resolutions transmitted to it and took account as far as possible of the suggestions contained therein. It is convinced that in this exhilarating and particularly important period for future relations between the enlarged Community and its present and future associates, the Parliamentary Conference will continue to act as a beacon and to give the contracting parties food for thought as well as concrete proposals helping the authorities responsible to act in such a way that the association is of benefit both to the Associated States and to the Community.

A. THE INSTITUTIONS OF THE ASSOCIATION

1. The Association Council

During the period under review the Association Council held an important extraordinary meeting on 30 November 1971 in Brussels, with Mr CISSOKO, Minister of Foreign Affairs and Co-operation of the Republic of Mali, in the Chair.

The main reason for convening this twelfth meeting had been the wish of all Parties to discuss within the Council the information which the Community had already given and had still to give, pursuant to the provisions of Article 60 of the Convention, concerning the negotiations with the four States applying for accession to the European Communities, at a time when the prospects of such accession had become considerably more distinct. The deliberate coincidence between the date of this meeting and the almost final stage which the negotiations had by then reached was confirmation of the fact that developments in Europe did not only concern the latter but also had implications for the future of the African countries.

The meeting enabled there to be a very positive exchange of views within the Association Council on this question of fundamental importance for the future of the Association.

During the same meeting the Council was also informed by the Community of the negotiations envisaged with the EFTA States not applying for accession to the Communities, and of the application of Mauritius for association with the Community. Finally, the Council used this opportunity for definitively drawing up and adopting the general articles and conditions for public works contracts financed by the European Development Fund.

## 2. The Association Committee

The Association Committee held its 33rd and 34th meetings on 22 October and 25 November 1971 respectively. During these it prepared the work of the Council. In addition, on instructions from the Association Council, the Joint Experts Working Party met from 6 to 8 October 1971 to prepare the final version of the draft general articles and conditions. The Joint Experts Working Party also met on 22 and 25 November 1971 to prepare work on the general pattern for financial and technical co-operation.

The Association Committee subsequently held three further meetings, on 24 March (35th meeting), 30 June (36th meeting) and 29 September 1972 (37th meeting). The Committee's work was in particular concerned with the association of Mauritius, the third meeting of UNCTAD, the negotiations with the EFTA States not applying for accession to the Communities, generalised preferences and the treatment to be applied to certain agricultural and tropical products.

The Association Committee's meeting on 29 September 1972 was mainly concerned with the preparation of the 13th meeting of the Association Council (Luxembourg, 10 October 1972).

In addition, the Joint Experts Working Party, at its meeting on 29 February 1972, continued its examination of the quantitative restrictions on imports in the AAMS. It also met on 28 September 1972 in order to prepare, for the Association Council, a draft resolution on the general pattern for financial and technical co-operation.

3. The Parliamentary Conference of the Association

The Association Council continued the policy of efficient collaboration which it has been pursuing for several years with the Parliamentary Conference of the Association and its Joint Committee. Thus the President

in office of the Association Council, Mr Mohamed OULD CHEIK-SIDIA, Minister for Planning and Research of the Islamic Republic of Mauritania, represented the Council at the eighth annual meeting of the Parliamentary Conference which was held from 12 to 14 January 1972 at The Hague. Similarly, Mr Charles Samba CISSOKO, Minister of Foreign Affairs of the Republic of Mali, and Mr Gaston THORN, Minister of Foreign Affairs of the Grand Duchy of Luxembourg, in their capacity of Chairmen of the Association Council, participated in the work of the Joint Committee, the former at Fort-Lamy from 27 to 29 October 1971 and the latter in Luxembourg from 29 May to 1 June 1972.

Further to the work of Parliamentary Conference of the Association, the Association Council was presented with the resolution of the Conference on the sixth annual report of the Association Council to the Conference. This resolution dealt with both the present problems of the Association and its future. It is included on the provisional agenda of the meeting of the Association Council on 10 October 1972, which will accordingly be required to deal with it, thus proving once again the importance which it attaches to the Conference.

B. THE ENLARGEMENT OF THE COMMUNITY AND OF THE ASSOCIATION

1. The association of Mauritius with the EEC

One of the major events to have occurred in connection with the Association during the period covered by this report concerned the negotiation and signature on 12 May 1972, of the Port Louis Agreement.

The Agreement between the Community and Mauritius, one of the independent member countries of the Commonwealth, to which the offer of association contained in Protocol No 22 of the Accession Treaty is addressed, represents the first accession of a third country to the Yaoundé Convention, Mauritius thus becoming the 19th member of the AAMS.

Because of the importance of the Port Louis Agreement, in particular in the context of the enlargement of the Communities, the Association Council and Committee were closely associated with the negotiations by means of the consultations provided for in Article 60 of the Convention. In addition, the Chairman of the AAMS Co-ordinating Committee attended the negotiations themselves.

Since the Associated States had from the start been favourable to Mauritius' application to the Community, discussions in the Association Council and the Committee were brief and mainly concerned with the volume of financial aid and the implementation of certain derogations granted to Mauritius to enable a progressive and harmonious adjustment to the system of the Yaoundé Convention.

The Port Louis Agreement has the following main characteristics: it provides for the creation of an association between the Community and Mauritius, the accession of the latter to the Yaoundé Convention and for the acts of the EEC-AAMS to be binding on Mauritius. Mauritius will, upon the entry into force of the Agreement, enjoy the same rights and be subject to the same obligations as the AAMS.

There are, however, certain exceptions to this rule, the main ones of which concern the timetable for the setting up of a free trade area between the Community and Mauritius (customs franchise privileges for products originating in the Community will be implemented by progressive stages) and the application of the decisions of the Association Council on the rules of origin (the Association Council may have submitted to it adjustments which appear to be necessary to enable Mauritius to comply with the rules of origin).

With respect to sugar, the main export product of Mauritius, a Protocol in the Agreement provides for the status quo to be maintained until the expiry of the Commonwealth Sugar Agreement, reference also being made to the texts laid down on this subject in the Accession Treaty.

As regards financial and technical co-operation, in order to meet the requirement of Article 60 (3) second subparagraph of the Convention, the Member States of the Community decided to increase the endowment of the European Development Fund by 5 million units of account.

In addition the E.I.B. Board of Governors included Mauritius amongst the recipients of loans granted by the Bank to the AAMS out of its own resources pursuant to Article 18 (b) of the Convention.

From the summary of discussions which were held during the meetings of the Association Committee and the Council, it will be possible to reconstruct the various stages of the negotiation of the Port Louis Agreement.

During the meeting of the Committee on 22 October 1971, the Community informed the Associated States that an official application had been submitted by Mauritius on 9 September 1971 for the association of the latter country with the Community by accession to the Yaoundé Convention. It proposed to add to this information at a later date when the examination of the application was sufficiently advanced and without prejudice to the consultation with the Associated States due to be held pursuant to Article 60 (2) of the Convention.

The Associated States took note of this information and the Community's intention to consult them, in accordance with Article 60 (2) of the Convention. They stated that they were attentively following developments in this matter.

At the extraordinary meeting of the Association Council on 30 November 1971, the Associated States requested the Community to give as detailed information as possible both on the measures which it intended to adopt for opening negotiations with Mauritius and on the position it would defend in respect of the question to be discussed during these negotiations.

The Community pointed out that Article 60 (3) of the Yaoundé Convention provided for the possibility of accession to the Convention for a State having an economic structure and production comparable to those of the AAMS provided that such accession did not adversely affect the advantages accruing to the Associated States signatories to the Convention from the provisions relating to financial and technical co-operation. It also emphasised the importance which it attached to consultation with the AAMS, laid down in Article 60 (2) of the Convention, since the application in question would in fact extend to a 25th State the relations uniting the two parties in the framework of the Association.

The AAMS stated that they sympathetically supported Mauritius' application for association by accession to the Yaoundé Convention, provided that such association was effected in compliance with Article 60 (3) of the Convention and that proper consultations were held between the Community and the Associated States throughout the negotiations.

Negotiations with a delegation from Mauritius were able to be rapidly conducted and the Community, at the meeting of the Association Committee on 24 March 1972 notified its intention of consulting the AAMS in accordance with Article 60 (2) of the Convention of Association, on the draft agreement for the association of Mauritius with the EEC by accession to the Yaoundé Convention. In this connection the Community also pointed out that the endowment of the present European Development Fund would

be increased by 5 million units of account having regard to the provision of Article 60 (3), second subparagraph of the Yaoundé Convention.

The Associated States expressed their satisfaction at the speedy conclusion of this Agreement which protects the interests of the contracting parties to the Yaoundé Convention and the prerogatives of the Association Council particularly with respect to the definition of the concept of "originating products". However they pointed out that the Community should have seized this opportunity to make considerable readjustments to the aggregate amount granted by the EDF as a necessary consequence of the present economic and monetary depression.

The consultations provided for under Article 60 (2) of the Convention was concluded by the written procedure in the Association Council. They began on 28 March 1972 and were completed on 8 April 1972;

The Association Agreement between the EEC and Mauritius concerning the latter's accession to the Yaoundé Convention was signed at Port Louis on 12 May 1972. It will enter into force after ratification by the Member States and Mauritius and its formal conclusion by the Community. Since the ratification procedures would require a certain amount of time, the Association Committee agreed, at its meeting on 30 June 1972, to propose to the Association Council that it should adopt a resolution inviting the representatives of Mauritius to participate as observers in the meetings of the Association

Council, the Association Committee and the Working Parties which had been or would be set up by them, during the period between the signing of the Agreement on the Association of Mauritius and its entry into force.

Pending formal adoption of this resolution, the Committee decided to invite the Representatives of Mauritius to attend its meetings and those of its Working Parties as observers.

The Representatives of Mauritius were thus allowed to participate in the work of the Association Committee from the meeting on 30 June 1972 onwards.

2. The accession of the United Kingdom, Denmark, Ireland and Norway (1)

In view of the influence of the enlargement of the Communities on the relations between the Community and the AAMS, in particular due to the accession of the United Kingdom, detailed discussions were held on this problem at each of the meetings of the Association Council and the Association Committee. Aware of the importance of this question, the Association Council held an extraordinary meeting in November 1971 which dealt mainly with the repercussions of the enlargement of the Communities on the Association.

---

(1) It is known that Norway has not ratified the Accession Acts.

The discussions within the Association Council and the Association Committee reflect the gradual development of the various texts of the Accession Treaty concerning the AAMS and the Commonwealth countries to whom an offer of accession has been made: since the consultations with the AAMS took place before the final adoption of the texts, a summary of these discussions is partly only of historical interest but it will nevertheless serve to record that the Community succeeded in taking into account, in the texts drawn up with the acceding States, the main anxieties expressed by the AAMS during these consultations.

The extraordinary meeting of the Association Council on 30 November 1971 was convened mainly in order to enable the Community, in pursuance of Article 60 of the Convention, to inform the Associated States of the progress in negotiations with the States applying for accession and to give the AAMS an opportunity for broad discussion of the consequences of these negotiations for the future of the Association.

The Community recalled that there had been an preliminary exchange of views at the meeting of the Association Council held on 22 April 1971 and that it had subsequently given, at the Committee meetings on 22 October and 23 November, additional information on the progress in these negotiations; the Community emphasised its intention of giving as extensive and complete information as possible not only to comly with

the commitment in the Yaoundé Convention but also to take account of the spirit of collaboration which had always inspired both parties. It then retraced the history of the negotiations stressing both the procedural aspects and the basic problems liable to be of particular interest to the AAMS.

It recalled that its clearly expressed objective in its policy of association remained that of safeguarding what had been achieved and the following fundamental principles:

- the accession to the Community of the new Member States and the possible extension of the policy of association should not be the source of any weakening in the Community's relations with the AAMS,
- the Community's relations with the AAMS should ensure for those States a range of advantages and should be based on structures which give the Association its distinctive character in the fields of trade relations, financial and technical cooperation and joint institutions,
- in the spirit of the provisions of Article 62 of the Yaoundé Convention, the Community was prepared to pursue its policy of association both with regard to the AAMS and with regard to the independent developing Commonwealth countries which would become parties to the same Association.

The Community stated that as a result, the independent Commonwealth countries which had an economic structure and

production comparable to those of the AAMS, and which were situated in Africa, the Indian Ocean, the Pacific Ocean and the Caribbean, would be offered by the enlarged Community the choice of ordering their relations with it according to one of the three following formulae:

- participation in the Convention of Association which, upon the expiry of the Yaoundé Convention, would govern relations between the Community and the Associated African and Malagasy States which signed the latter Convention,
- the conclusion of one or more special conventions of association on the basis of Article 238 of the Treaty of Rome comprising reciprocal rights and obligations, particularly in the field of trade,
- the conclusion of trade agreements with a view to facilitating and developing trade between the Community and those countries.

It would be suggested to the countries concerned that the negotiations envisaged for the conclusion of agreements based on one of the formulae contained in the offer should begin as from 1 August 1973. In addition it had been considered desirable, for practical reasons, for these countries to take up a position with respect to this offer as soon as possible after accession.

The Community also stated that, since a transitional period was necessary, the existing provisions would continue to be applied in full between the same parties until

31 January 1975, and even possibly beyond that date in the case of the implementation of the transitional measures provided for in Article 62, subparagraph 2 of the Yaoundé Convention.

The Community then gave some more detailed information in reply to a series of questions posed by the AAMS concerning:

- the safeguard of the Community patrimony and the intention not to weaken the present relations between the Community of Six and the AAMS,
- the period for which the offer would be open to Commonwealth countries which might become associated,
- the application of the status quo to the machinery for managing and administering development aid, in particular in respect of matters concerning the Association Council and the Board of the EDF,
- the possibility for the enlarged Community to envisage in certain cases the conclusion with the Associated States of regional agreements on products,
- measures to enable relations between the Associated States and the acceding States to remain unchanged when the tariffs of the acceding States were approximated to the Common Customs Tariff.

- the measures which the Community would take during the transitional period to ensure an overall balance of reciprocal advantages, in particular in the field of sugar originating in the AAMS,
- the interpretation of the formula for taking into account the experience acquired by the EEC-EAMA Association and the wishes of the Associated States.

The AAMS emphasised the need to safeguard the comprehensive and dynamic nature of co-operation. They pointed out that at a time when they were feeling the effects of tariff reductions in the Community and of the generalised preferences scheme implemented autonomously by the Community, it was necessary to continue to use jointly financial and commercial resources and the joint institutional machinery which alone could guarantee the economic efficiency, the political significance and the distinctive character of the Association.

They stated that they hoped that the privileged relations would not be confined to the advantages accruing from the present system but might be supplemented by measures

ensuring that primary products upon whose export the economies of the Associated States depended to a considerable extent, had stable markets at guaranteed prices, along similar lines to what had been decided for sugar.

For this product they had requested that they be allowed to enjoy, during the transitional period of the enlarged Community, a system similar to that which was granted to Commonwealth producers in order to ensure an overall balance of reciprocal advantages.

Finally the AAMS stated that they would hold an extraordinary meeting of the Co-ordinating Council at the beginning of April 1972 and that on that occasion they would study all the political and economic problems confronting them in the context of the enlargement of the Association.

The Community subsequently communicated to the Association Council the text of the documents concerning the accession to the European Communities of the Kingdom of Denmark, Ireland, the Kingdom of Norway and the United Kingdom of Great Britain and Northern Ireland which were signed at Brussels on 22 January 1972.

C. CO-OPERATION AT INTERNATIONAL LEVEL

1. Consultations in connection with the third United Nations Conference on Trade and Development

At the meeting of the Association Committee on 24 March 1972, the Communities stressed the special importance which it attached to the third meeting of UNCTAD (Santiago, Chile, 13 April/20 May 1972), particularly in view of the fact that the Associated States would be taking part in it and would, like itself, be affected by the conclusions of the Conference.

It notified the Associated States of the broad approach it meant to follow at that Conference with regard to the chief problems which concerned the developing countries and particularly the Associated States. This approach was concerned especially with questions relating to:

- basic commodities
- the diversification of economies
- manufactured goods
- export promotion and regional co-operation and integration between developing countries other than AAMS
- "the least advanced" developing countries
- the effects of the formation of regional economic groups between industrialised countries
- the effect of the monetary situation on world trade and development, especially as far as the the developing countries were concerned.

The Community stated that, as in the past, this approach could be finalised or defined on the spot when it came to determining the positions which it must take in Santiago itself. It wished furthermore that, in the spirit of the Yaoundé Convention, the briefing and consultation procedures between the Community and the AAMS should be applied with the greatest possible efficiency and flexibility.

The Associated States likewise stressed the importance of the third meeting of UNCTAD as a great event of equal concern to the developed and the developing countries, even though the problems discussed had different implications for their respective economies. They pointed out the need to do everything to ensure that they would afford one another the necessary co-operation and mutual assistance on that occasion.

They moreover gave a reminder that vigilance was all the more vital because, in their view, the first two meetings of the Conference had resulted in a weakening of the preferential advantages which they enjoyed on the Community's market. That situation caused them all the more concern since, together with the enlargement of the Community, they would be faced with the problems arising out of the Association's enlargement. In addition, they would have to face up to the consequences of the trade negotiations which the Community, the United States and Japan had decided to open within GATT in 1973.

Setting out their ideas on the problems to be discussed at the Conference, the AAMS drew attention to a number of points which were of special concern to them:

- basic commodities and policies directed towards the conclusion of world commodity agreements,
- maintenance of special tariff preferences,
- diversification and sharing of markets,
- the least advanced developing countries,
- effects of the formation of regional economic groups.

In his reply the Community spokesman expressed the view in particular that the concrete measures which could be put in operation for the diversification and sharing of markets should be carefully discussed and examined in advance. In the sphere of generalised preferences, he hoped that regular consultations of a thorough and serious kind, taking honest account of the interests of all, could continue and be intensified. He considered likewise that, as far as subsequent negotiations were concerned, the Association's machinery for concerted action must continue to work smoothly and should even be improved.

During the Conference several consultation meetings were held in Santiago, Chile, between the Community delegations and those of the AAMS on 24 April, 5 May and 11 May 1972. The two parties were thus able to make their respective points of view known on a whole series of questions discussed within the Conference or its specialised commissions and relating directly or indirectly to the Yaoundé Convention. These consultations, which were mainly concerned with questions relating to basic

commodities (Commission 1), manufactured goods (Commission 2), financial and monetary problems (Commission 3) and the least advanced developing countries (Commission 4), were all the more important in that, in certain cases, they indirectly made it possible for the views of the "Group of 77" (developing countries), to which the AAMS belonged, and those of "Group B" (industrialised countries), to which the Community belonged to be compared.

Once the Conference had finished it was difficult to immediately assess the results in an objective and complete manner. One point relating to the results of UNCTAD III, which appeared initially on the draft agenda for the meeting of the Association Committee on 30 June 1972, was therefore withdrawn by the Committee at the request of the AAMS. The Committee considered it preferable that this examination be carried over to subsequent meetings of the Association Committee and the Association Council in view of the need on both sides for a thorough prior examination of this question, the importance of which had been stressed by both parties. The Association Council will, therefore, have to examine this problem at its meeting on 10 October 1972. However the Association Committee declared that it was already satisfied with the consultations which had taken place on the spot at the Conference and with the results to which they had led.

2. Meeting of the Committee on the Peaceful Uses of the  
Sea-Bed and the Ocean Floor beyond the limits of  
national jurisdiction

(July - August 1972)

This question, which had originally been included on the draft agenda of the Association Committee meeting on 30 June 1972 by the Community, was withdrawn, as the Associated States considered that there was no direct connection between this question and the aims of the Association Convention. However, the AAMS did not oppose the holding of consultations on this subject between the delegations of the Member States and States associated with the various bodies preparing the United Nations Conference on the Law of the Sea, of which the above Committee forms a part.

D. TRADE

1. Generalised preferences in favour of developing countries

In a letter dated 17 December 1971, the Community, acting pursuant to Article 15 of the Yaoundé Convention and to Decision No 35/71 of the Association Council regarding the information and consultation procedures provided for in Title I of the Convention, informed the Associated States that, subject to certain adaptations, it intended to prolong for 1972 the generalised preferences which it grants to developing countries.

At the meeting of the Association Committee on 24 March 1972, the Associated States emphasised the need, in the present circumstances, for a review of the Community's offer in order to protect the interests of the AAMS by achieving a better balance. Furthermore, they opposed a certain tendency to enlarge the list of recipients particularly to countries that were not members of the "Group of 77", and requested that there should be exhaustive consultations within the Association Council on the results of the study of this subject then in progress within the Commission.

With regard to plywood, laminboard and blockboard, they suggested that:

- the Community should reconsider the amount of the nil-duty quota for 1973, in the light of 18 months of the operation of the Community's preference scheme,

- or that the cut-off should be lowered immediately from 50% to 25%.

The Community on its side, while making it clear that it was fully aware of the preoccupations of the AAMS about the protection of their interests, since alluded to the need to preserve a certain tactical flexibility. It pointed out that in regard to plywood, laminboard and blockboard, this product was already subject to a special ceiling calculation to the advantage of the AAMS. Furthermore, the Commission was continuing with its review of suitable technical measures which would be the subject of concrete proposals at the earliest possible moment.

At the meeting of the Association Committee on 30 June 1972, the Associated States recalled their concern about the extension of generalised preferences to other countries, bearing in mind moreover the imbalance caused by the abstention of the United States. They made a strong request that the Community, if it should nevertheless decide on such an extension, should notify the Associated States early enough to enable them to express their views and should bear in mind the need for there to be no detrimental effects upon a certain number of their products.

The Community noted with interest the observations of the AAMS. It reminded the AAMS that, in their periodic contacts with the Representatives of the United States, the Commission and the Council had regularly requested strongly that the United States should also apply generalised preferences. It pointed out that the examination of the problem of plywood, laminboard and blockboard was being conducted with the greatest goodwill where the question of

lowering the cut-off applied to the import of these products into the Community is concerned. Pointing out that the Implementing Regulations expire on 31 December 1972, it stated that in application of Decision No 35/71 of the Association Council, it would transmit to the latter, in good time, the proposed regulations concerning the application of the system from 1 January 1973 - which could include certain changes in relation to the present situation - and that it would not come to definite conclusions before appropriate consultations with the Associated States had taken place.

The Community stated its common position with regard to the extension, from 1 January 1973, of generalised preferences to certain countries <sup>(1)</sup>. It declared on the other hand, that no decision to extend the benefit of generalised preferences to countries other than those mentioned was likely to be taken before month of October.

The Associated States approved the proposed information and consultation procedures. With regard to the list of new beneficiaries, they stated that they had no comment to make, subject to subsequent examination on their part. It remained understood that the Community system could not be applied to countries other than those included in the "Group of 77".

---

<sup>(1)</sup> The countries concerned are: Cuba, Bhutan; Fiji, Bangla Desh, Bahrain, Qatar, Ras-al Khaimah, the Gulf States, Oman, Sikkim, Nauru, Western Samoa and Tonga.

2. Statement on the negotiations between the EEC and the EFTA non-candidate States

In the spirit of Article 15 of the Yaoundé Convention, and bearing in mind Decision No 35/71 of the Association Council, relating to information and consultation procedure in the sphere of commercial policy, the Community issued statements to the AAMS, at the meeting of the Association Council of 30 November 1971, on the subject of the opening of negotiations with the non-candidate EFTA States (Austria, Finland, Iceland, Portugal, Sweden, Switzerland).

A reminder was given that, at the same time as it had negotiated with the four States that had applied for accession, it had given consideration to the question of establishing preferential relations with the other members of EFTA and that, in the case mentioned, it had decided that preferential agreements should be offered to the third Countries concerned.

The general tendency of these negotiations would then be towards establishing with the European States in question a basis for development of trade and for co-operation of a type that would not jeopardise the autonomy of the Community, distinguishing clearly between those States that were prepared to take part in the construction of Europe as envisaged in the Treaty of Rome and those seeking another type of arrangement.

The Community stated that the agreements envisaged with the countries mentioned would be for the purpose of establishing the closest possible economic and commercial contacts, following a timetable identical to that arranged with the countries that had applied for accession, in accordance with Article XXIV paragraph 5 of GATT. These agreements would liberalise most trade between the enlarged Community and the countries concerned, in the form of commercial agreements based on Article 113 of the Treaty of Rome. In the industrial sector, tariff barriers would be abolished on 1 July 1977 for most products, but a special arrangement would apply to certain sensitive products. The agricultural sector would not normally be covered by these agreements, but the idea of a certain number of provisions or arrangements concerning certain agricultural products was not excluded.

The Community noted that these agreements could have certain implications for the interests of the Associated States insofar as they would apply, among many other products, to certain products which the Associated States are particularly interested in exporting. Therefore, a special system would be set up for plywood, laminboard and blockboard. The particular interests of the AAMS would also be taken into account, notably, in the case of certain fruits and vegetables and processed products, nuts, tinned pineapple and certain types of preserved fish, which would, a priori, be excluded from the concessions envisaged by the Community.

As the Associated States had expressed the wish to follow the development of this question right through to its solution, the Community, at the meeting of the Association Committee on 24 March 1972, made a supplementary statement on the negotiations in progress with the EFTA non-applicant States.

It confirmed in particular that the agreements with these States would aim at the establishment of close economic and commercial ties to be developed according to a timetable identical to the one arranged with the acceding States and aiming at the liberalisation of most trade between the enlarged Community and the States concerned. However, save in exceptional cases the system applied to agricultural products would be the system applied to third countries. As the AAMS wished, the situation with regard to plywood, laminboard and blockboard, would be treated with particular attention.

Noting these statements, the Associated States insisted that plywood, laminboard and blockboard should figure on the list of sensitive products and that they should be strictly watched in the context of the agreements to be reached with those countries.

The Community gave its assurance that a now exchange of views would take place in the Association Committee before the Council made a decision, without prejudice to formal consultation which might take place before the conclusion of the Agreements.

At the meeting of the Association Committee on 30 June 1972, the Community provided information on the objectives of and progress made in these negotiations, stating that it would inform the Associated States of the measures still likely to be negotiated and of the final results of the negotiations.

The AAMS were pleased with the arrangements for plywood, laminboard and blockboard.

With regard to agricultural products, they would reserve their judgement in respect of the arrangements concerning fruit and vegetables until a future meeting of the Committee, as the import of these products could constitute serious competition against the AAMS products benefiting from a special Community system.

The Community declared, with regard to the negotiations as a whole, that it will not seek to evade any discussion that might be requested by the AAMS in the framework of the Association, in application of Article 15 of the Convention and of Decision No 35/71 of the Association Council.

On this occasion, the Associated States drew attention to a resolution of the Heads of State of Member Countries of the Organisation for African Unity, addressed to the Community on the subject of the special case of Portugal. They considered that this appeal to the Community not to contribute, in an indirect manner, to the support of Portuguese policy in Africa, should be heard, and declared their insistence that the Community should take particular account of it, in order to meet the wishes of all the African States, including clearly the AAMS.

The Community noted this declaration.

3. System applied to agricultural products and tropical products

(a) System applied to certain fruits and vegetables originating in AAMS countries

At the meeting of the Association Committee on 24 March 1972, the Community consulted the AAMS, in accordance with Article 1 of Protocol 1 annexed to the Yaoundé Convention, on the system it planned to adopt with regard to certain fruits and vegetables originating in these States.

This system provides freedom from duties on imports into the Community, for the fruits and vegetables concerned, but this is limited in the case of certain products (peas, beans, pimentos and sweet peppers, aubergines, courgettes, celery, melons and the like) to a marketing calendar <sup>(1)</sup>.

The Associated States declared that they could not consider themselves satisfied, as the products involved had until recently been totally free of customs duty, without any time limit, and the system envisaged for fruit and vegetables from the AAMS was also less favourable than the system applied to the same products originating in third countries, such as Greece. They emphasised the importance they attached to this legal point and requested that this question should remain on the agenda of the coming meetings of the Association Committee and of the Association Council.

---

<sup>(1)</sup> This system is the subject of Council Regulation (EEC) No 859/72 of 25 April 1972. It came into force on 1 May 1972.

The Community stated that the position adopted could not have direct legal implications for the current proceedings in the Community, and that each party would be free to draw from it the conclusion it found most opportune.

The Community noted this request that examination of the question should continue in the Association Committee and, if the need arose, in the Association Council, and expressed its acceptance thereof.

At the meeting of the Association Council on 30 June 1972, the AAMS confirmed their position on the retention of this question on the agenda for the meetings, insisting that the franchise granted to fruit and vegetables originating in their countries should be granted without any limitation as to date. The Associated States considered that the request for retention on the agenda was intended to permit the Community to look at the problem constructively, and to allow proposals to be made to the Association Council which would allow it to take appropriate measures to meet the wishes of the AAMS, and to avoid action through the Court of Arbitration of the Association.

On the occasion of the meeting of the Association Committee on 24 March, the Associated States also raised the problem of certain phyto-sanitary regulations applied by one Member State of the Community (Italy), in respect of imports of fruits and vegetables, which could constitute restrictive practices in the opinion of the AAMS.

After reminding the meeting of the non-discriminatory nature of the phyto-sanitary regulations, the Italian representative stated that

the Italian authorities are ready, in collaboration with the AAMS exporters concerned, to examine every possibility for improving the conditions of application of these measures, in order to facilitate imports of these products. To that end, the AAMS could assist by supplying the competent Italian authorities with a list of actual cases or real difficulties which might have occurred.

After this exchange of views, more detailed information on the phyto-sanitary regulations applicable to imports of certain agricultural products into Italy, and on the measures to be taken to ensure that they are applied to the best advantage, was brought to the notice of the Association Council by letter dated 28 July 1972.

(b) Measures to be taken in favour of sugar originating in the AAMS

At the meeting of the Association Committee on 24 March 1972, the Associated States declared that the Associated States exporting sugar are at present unfavourably treated in comparison with the majority of countries which benefit from the Commonwealth Sugar Agreement, and that this de facto situation will result in a lack of balance of advantages between the Associated States and the countries to become associated, as from 1 January 1973, when the Accession Treaty will come into effect.

They therefore requested the Community to grant the AAMS a preferential price quota of 50,000 tons of sugar, to date from 1 January 1973.

The Community drew particular attention to recent factors (increase in world sugar prices, existence of the OCAM sugar Agreement, the Sugar protocol to the Accession Treaty) which - although it had not been possible at that stage to arrive at preferential treatment for sugar originating in the AAMS as the Community had a sugar surplus - had nevertheless placed the AAMS as far as sugar was concerned, in a more favourable position than previously. It recalled that the sugar question would form an integral part of the negotiations opening in 1973, but progress between now and then in the work going on in the Community within the framework of the present Convention, should not be ruled out.

The Associated States took note of this statement and stated that the question would continue to appear on the agenda of subsequent meetings of the Association Committee and Council.

(c) Protection of the designation "natural vanilla"

At the AAMS' request, the Association Council at its meeting of 23rd November 1971 examined a communication from the Malagasy authorities concerning the protection of natural vanilla. The study of this question was pursued at the Association Council's meeting on 30 November 1971. The Associated States felt that in the proposed directive based on Article 100 of the Treaty of Rome, concerning the approximation of provisions laid down by law, regulation or administrative action by the Member States concerning ice cream and similar edible products (OJEC of 13 October 1970), insufficient interest was accorded to the protection of natural vanilla.

The Community observed that the problem of vanilla came within the scope of a whole set of complex measures. However, it said it was fully conscious of the importance for the Malagasy economy of an increase in the consumption of natural vanilla. Desirous, in the spirit of the Yaoundé Convention, to contribute to the promotion of AAMS trade in this product, the Community expressed itself favourably disposed to effectively taking into consideration the AAMS request. It proposed giving more specific information at a later date, once the experts had been able to work out the most suitable solutions from the technical point of view.

(d) Position of blockboard and laminboard originating in the AAMS

During its meeting on 30 November 1971 the Association Council examined a communication from the Gabon Republic on the position of blockboard and laminboard originating in the AAMS.

Taking into account the difficulties encountered by this product, the AAMS requested that the Community should apply the safeguard clause provided for in its generalised preferences system, that the Community should take their interests into consideration when negotiating both with the EFTA member countries which are not applying for accession and with Israel, and that it should obtain from the acceding countries, especially the United Kingdom, an assurance that blockboard and laminboard originating in the AAMS should not be liable to harbour dues or any other discriminatory measures.

The Community took note of these requests and gave assurances that the AAMS interests with regard to block-board and laminboard, in the various spheres mentioned, would be taken into consideration.

(c) Information from the AAMS on the solutions adopted concerning pineapple preserves originating in East Africa

At the Association Committee's meeting on 24 March 1972 the Community informed the Associated States of the solutions adopted at Nairobi during the EEC - East Africa Association Council meeting on 21 February 1972, on imports into the Community of pineapple preserves originating in East Africa.

Since experience in this field in 1971 had shown that the Community was not constrained to apply safeguard measures once the tonnage of 860 metric tons laid down in Protocol No 2 to the Arusha Agreement was reached, the Community considered it would not have to resort to such measures in 1972, as long as the level of imports would not have exceeded 2,000 metric tons or thereabouts.

The Associated States took note of this information, but regretted that it had not been given before the Community made its decision.

Returning, at the Association Committee's meeting of 30 June 1972, to the problem of pineapple preserves originating in East Africa, imports of which into the Community were said to be approaching 2,000 metric tons, the Associated States asked if suitable measures were planned in this field to meet the concern expressed by them at the previous meeting.

After an exchange of views on the nature of these 2,000 metric tons, the Associated States made a formal request, bearing in mind the assurances already received, that these measures which in their opinion should have been planned and adopted, would be effectively imposed by the Community.

The Community took note of the statements and requests put forward by the Associated States on this matter.

(f) Promotion of trade in products originating in the AAMS

Since an initial distribution had been made of the study on the promotion of trade in products originating in the AAMS, which was carried out at the request of the Associated States within the Council of Association, the Association Committee agreed at its meeting of 22 October 1971 to instruct the Joint Experts Working Party to review the study in question and to report on its findings.

#### 4. AAMS Customs tariffs

At the meeting of the Committee on 22 October 1971, the Community recalled that a number of Associated States had not yet forwarded their customs tariff as stipulated in Article 2 (1) of Protocol No 2 to the Convention. The Community requested that any customs tariffs or lists of customs duties still missing should be forwarded to the Association Council as soon as possible. The Community proposed to make its comments when all the customs tariffs or lists of customs duties had been received.

At the Association Committee's meeting of 30 June 1972, the Community thanked the AAMS for forwarding their customs tariff in compliance with Article (1) of Protocol No 2 (with the exception of Chad). The Community announced that it had noted that Rwanda, Togo and Zaïre were not applying Article 3 (1) of the Convention which provides for the admission of goods originating in the Community free of customs duty and charges having equivalent effect. It had also noted that these States had not invoked Article 63 of the Yaoundé Convention when sending their tariffs.

The AAMS took note of this communication together with the Community's remarks, to which the delegates concerned would reply later.

5. Quantitative restrictions in the AAMS

The Joint EEC/AAMS Experts Working Party instructed by the Association Committee to examine the question of quantitative restrictions on imports into the AAMS, when it resumed its work focused its attention on the quantitative restrictions notified to date by the Associated States to the Association Council, in accordance with Article 2 (1) of Protocol No 3 to the Convention.

However, since a certain number of Associated States have not so notified the Community, the Community returned to this problem at the Association Council meeting on 22 October 1971. On this occasion, the Associated States declared that those of them which had not informed the Community on this subject were applying neither quantitative restrictions nor measures having equivalent effect, on goods originating in the Member States. The Community took note of this statement, whereupon it was recorded that this point had been clarified and could be considered definitively settled.

At its meeting on 23 November 1971, the Association Committee had called upon the Joint Experts Working Party to complete its work within two to three months, and to submit a comprehensive report to it then.

The Joint Working Party held a further meeting on 29 February 1972, after which its report was drawn up and submitted to the Association Committee.

At the Association Committee's meeting on 24 March 1971, the Community observed that certain information, without which the Working Party's report could not be considered final, was still missing. It asked the Associated States concerned to submit this information to the Association Council and proposed to return to this question at the Association Committee's next meeting in the hope that meanwhile the Working Party's report would have been satisfactorily completed and that the few problems still outstanding would have been solved in the spirit of the adequate provisions of the Convention.

At the Association Committee's meeting on 30 June 1972, the Community noted yet again the difficulties which arise intermittently in the application of Article 7 of the Convention and of Protocol No 3 with regard to quantitative restrictions and measures having equivalent effect.

Whilst thanking the States which had meanwhile supplied the further information required, the Community again wished to receive more details as soon as possible from those States which had not yet supplied the information requested, so as to aid efficiency and mutual understanding <sup>(1)</sup>.

---

<sup>(1)</sup> A number of Associated States have subsequently informed the Association Council by letter of details about quantitative restrictions applicable in their countries.

After they had supplied details or given a reminder of those already supplied on some of the measures taken by their respective Governments, the Representatives of some of the Associated States emphasised the minor importance of these questions in comparison with the essential point, which was the general impact of the measures on imports and on the development of local industry. Furthermore, they considered that the consequences of a few minor breaches in procedure were minimal, whilst the measures adopted by the Community could have dire consequences on the economy of one or more Associated States.

The Community emphasised its interest in knowing the exact reasons for the restrictive measures adopted by the Associated States, so as to enable exporters to avoid developing export patterns which would later have to be discontinued, in view of the AAMS industrialisation policies, for example.

The Associated States, however, expressed the wish that only really important questions should be raised at the Association Committee level; the Community took note of this suggestion.

6. Definition of the concept of "originating products"

(a) Adoption of decisions Nos 40/71 and 41/71 of the Association Council

Pursuant to decision No 37/71 of 22 April 1972, the Association Council delegated to the Association Committee the power to modify or supplement decision No 36/71 of the Association Council on the definition of the concept of "originating products", by means of provisions covering only the following matters, which it had not been possible to settle at the Council meeting on 22 April 1971:

- postal consignments (packets, parcels)
- fisheries products
- the incorporation of non-originating detachable parts or spares into the machinery and mechanical-appliances under chapters 84 to 92 of the Brussels Nomenclature
- Dyed "Guinea" and "Towareg" fabrics under the heading ex 55.09 of the Common Customs Tariff.

During the meeting of the Association Committee on 22 October 1971 overall agreement was reached on the questions which had remained in abeyance. On the basis of this, the Committee at its meeting on 23 November adopted the two following decisions, which came into force on 1 January 1972 and 1 December 1971 respectively:

- Decision No 40/71 of the Association Council, amending and supplementing Decision No 36/71 of the Association Council;
- Decision No 41/71 of the Association Council derogating from the definition of the concept of originating products to make allowance for the special situation of Mauritania as regards fisheries products

Decision No 40/71 lays down in the first place a simplified method of certifying the origin of products which are sent by post, where their value does not exceed 600 UA per parcel sent. In this case benefit of the preferential treatment under Title I of the Yaoundé Convention is granted by the Customs authorities of the importing Member or Associated State, on sight of an A.Y.2 form drawn up by the exporter, without the Customs authorities of the exporting country being required to endorse that form. Such a system has the advantage of considerably reducing the work-load of the Customs departments, although a posteriori inspection remains a possibility if there is doubt as to the correct origin of products sent in this way.

Another provision of Decision No 40/71 lays down that the incorporation of non-originating parts or spare parts in machines and equipment under Chapters 84 to 92 (BN) will not result in these products losing their status as originating products, on condition that the value of these parts does not exceed 5% of the value of the finished product.

The Association Council made no amendment to the definition of origin in respect of dyed cloth called "Guinea" or "Touareg". As regards fisheries products, Decision No 41/71 of the Association Council allows fisheries products caught in Mauritanian waters by Canary Island fishermen residing on Mauritanian territory to be considered, on certain conditions, as products originating in Mauritania. These products must have been submitted to a process of preparation carried out exclusively in that country. This derogation is restricted to an annual amount of 3,500 metric tons of fisheries products listed under certain tariff headings.

(b) The Customs Co-operation Committee

Under Article 33 of Decision No 36/71 of the Association Council of the definition on the concept of originating products it is the responsibility of the Association Committee to adopt the rules of procedure of the Customs Co-operation Committee set up pursuant to Article 31 of the same Decision <sup>(1)</sup>.

The Association Committee adopted these rules of procedure at its 33rd meeting, on 22 October 1971. At its meeting of 23 November 1971, it convened the Customs Co-operation Committee, mainly in order to examine the effect of the amendments made to the Brussels Customs Nomenclature on the rules defining origin within the framework of the Association.

---

<sup>(1)</sup> This Committee is responsible to the Association Committee for arranging for administrative co-operation with a view to the correct and uniform application of Decision No 36/71 and also for carrying out any other task in the Customs sector which the Association Committee might assign to it.

It was also stated that until Decision No 36/71 of the Association Council has been formally amended, the present provisions would remain in force provisionally, even if they differed, in certain respects, from the new nomenclature.

The Customs Co-operation Committee held its first two meetings on 17 December 1971 and 29 February 1972 respectively. At these meetings it:

- examined a draft decision of the Association Council, amending Decision No 36/71 on the definition of the concept of originating products and on methods of administrative co-operation (in order to make the technical amendments to it which were necessary in view of the changes in the Brussels Customs Nomenclature);
- exchanged views on the application of Decision No 36/71 and on the difficulties encountered regarding certificates of origin.

Following these two meetings a report was made to the Association Committee which, at its meeting of 24 March 1972, congratulated it on the quality of the work which it had done.

On the basis of the work done by the Customs Co-operation Committee, the Association Committee agreed to recommend that the Association Council should adopt the abovementioned draft decision of the Association Council, amending Decision No 36/71, bearing in mind the suggested amendment regarding the date of entry into force, which would become 1 November 1972.

The Associated States also proposed that the period for which export documents or copies of movement certificates used in place thereof (Article 30 (3), last subparagraph, of Decision No 36/71 of the Association Council) must be kept should be extended to three years (instead of two years). When the Associated Committee met on 30 June 1972 the Community indicated that it would make its position regarding this request known at a later date, so that if an amendment had to be made to the present rule the Association Council would be able formally to adopt it.

I. FINANCIAL AND TECHNICAL CO-OPERATION

1. Commission reports on the administration of the Community's financial and technical aid

The Commission's report on the administration of financial and technical co-operation in 1970 was submitted to the Association Council on 28 September 1971, and the report for 1971 on 30 June 1972.

As usual, these two reports were submitted to the Parliamentary Conference of the Association.

2. Definition of the general guidelines for financial and technical co-operation

At its extraordinary meeting of 30 November 1971, the Association Council took note of the work done by the Association Committee and the Joint Working Party with a view to drawing up a draft Resolution of the Association Council on the general guidelines for financial and technical co-operation, on the basis of the Commission report for 1970 and of the Community declaration on the funding and management of investments financed by the EDF which was submitted at the 11th session of the Association Council (Tananarive, 22 April 1971).

As it was not possible to finish the work in time, the Council extended the mandate which had been given to the Joint Working Party and to the Association Committee.

3. The general clauses and conditions for public works and supplies contracts financed by the European Development Fund

At its extraordinary meeting on 30 November 1971, the Association Council was able to adopt the general clauses and conditions for public contracts for works and supplies financed by the European Development Fund (Decision No 42/71 on the general clauses and conditions applicable to the award and performance of public works and supplies contracts financed by the European Development Fund.

The Council's work had been prepared by the Joint Working Party, the mandate of which had been extended by the Association Council, at its meeting of 22 April 1971, and by the Association Committee.

It proved possible to obtain a definitive agreement on the general clauses and conditions in the Association Council, as each of the parties was anxious to make it easier to solve all the many problems raised by this text by making reciprocal concessions.

The general clauses and conditions which apply only to works and supplies contracts contain, in Title I, provisions which must form an integral part of all contracts, and, in Title II, the contractual, administrative and technical clauses to which reference will be made, according to the nature of the goods or services to be supplied, in the special provisions.

In Article 2 the abovementioned decision of the Association Council lays down rules for the transposition of the general clauses and conditions into the various internal systems of legislation, laying down that the Associated States, the Member States and the Community must, each to the extent to which it is concerned, take the steps which implementation of the decision involves before 31 March 1972 and submit the text of the measures taken to the Association Council without delay. Application of this Article has, however, been subject to some delay in certain Associated States.

When all the internal procedures have been completed it will become clear that the adoption of a single system of regulation for works and supplies contracts financed by the EDF, unifying the basic conditions for competition and participation in calls for tender, would be an important contribution towards the establishment of equal opportunities for access to contracts financed by the Community for all nationals and all firms in the Member States and Associated States.

4. Accounts of commitments made by the EDF and the EIB

(a) Transactions involving the resources of the European Development Fund

On 30 September 1972 the Commission had made in all 148 decisions to provide finance from the resources of the 3rd European Development Fund, involving an aggregate total amount of 395,886,000 units of account.

Loans on special terms <sup>(1)</sup>

In addition, four loans on special terms, signed by the Commission and the Bank, acting as authorised agents of the Community, were granted during the period covered by this report, amounting to a total of 7,056,000 UA.

These loans were earmarked for financing the following schemes:

- Congo-Brazzaville : Extension of the Port of Brazzaville  
amount: 2,052,000 UA
- Dahomey : Palm oil refinery at Agonvy  
amount: 3,276,000 UA
- Gabon : Radio links at Monila-Moando-Franceville  
amount: 756,000 UA
- Senegal : Factory for cotton ginning at Velingara  
amount: 972,000 UA

<sup>(1)</sup> See Table on page 55

As regards transactions on special terms involving EDF resources the following will be noted:

- the financing of two industries to make agricultural production more profitable (palm oil refinery and cotton ginning) which supplement schemes financed by aid not chargeable to the EDF in the agricultural sector;
- assistance given in the improvement of profitable infra-structures (a tug and storage area in the Congo, radio links in Gabon);

Participation (1)

The Commission and the Bank have subscribed to a first participation, amounting to 990,240 UA, in favour of the Utexi Company (Ivory Coast). This scheme is also receiving an ordinary loan from the European Investment Bank (see below).

(b) Transactions involving the "own resources" of the European Investment Bank (2)

Since the entry into force on 1 January 1971 of the second Yaoundé Association Agreement until 31 July 1972, the European Investment Bank has signed 6 ordinary loans from its own resources for 31.7 million UA.

---

(1) See table on page 56  
(2) See table on page 57

The following should be noted:

- the large amount of the contribution to develop extractive industries (approximately half the loans signed during the period), an amount which reflects the place which this activity occupies in the economy of the Republic of Zaire;
- the quite significant proportion of transactions for schemes involving the economic infrastructure (approximately a quarter of the loans signed during the period) in two countries the economic and financial situation of which permits such financing;
- initial activity in favour of tourism which is beginning to be developed in the AAMS;
- a first transaction to finance a scheme through a national agency for financing development;
- the continuance of the Bank's traditional operations to promote manufacturing industries, including a scheme which is partly orientated towards the export market;
- of 6 ordinary loans from the Bank 4 had reduced rates of interest, 3 of these being granted at a standard rate and one according to the "case by case" procedure.

**ANNEX**

- Loans on special terms from EKF funds

Country	Name of project	Sector	Aim	Amount of loan (M UA)	Total cost of investment (M UA)	Financial Conditions

A N N E X

RECENT TRENDS IN THE DEVELOPMENT  
OF TRADE BETWEEN THE COMMUNITY  
AND THE AAMS

=====  
=====

Since final information is now available on trade between the Community and the AAMS in 1970 and 1971, applying both to total trade and to a number of products of particular importance in the exports of the Associated States, it seemed worthwhile to supplement the statistical tables that follow by a rapid analysis of the development of this trade during the past two years.

This analysis in conjunction with that annexed to the Sixth Annual Report for the period 1968-1969, also allows medium-term trends to be assessed over a period covered partly by the first and partly by the second Yaoundé Convention.

1. EXPORTS FROM THE AAMS

In 1971, exports from the AAMS to the Community (calculated on a CIP basis on importation into the EEC) were 12.1% below the 1970 figure, falling from \$1,863 million to \$1,638 million (- \$225 million). The almost continuous growth in these exports since 1965 was therefore reversed for the first time and, in addition, the fall in relation to 1970 was of a far greater order of magnitude than the slight reduction in 1965 compared with 1964.

.../...

During the same period imports into the Community from all the developing countries increased by 9.7% (Middle East + 44.3%, Far East + 12.8%, other African countries + 11.1%, Latin America - 3.4%, African countries bordering on the Mediterranean -6.2%).

It should be noted, however, that the reduction in the value of exports from the AAMS was not accompanied by a parallel change in the tonnage exported to the Community, which increased slightly from 15,389,741 metric tons in 1970 to 15,727,885 metric tons in 1971 for the 26 main agricultural and mining products listed in Table II.

A comparison of these somewhat conflicting figures indicates that the price trends for certain important products exported by the AAMS and, to a certain extent, by Latin America (<sup>1</sup>) was distinctly unfavourable in 1971.

---

.../...

(<sup>1</sup>) The reduction in North African exports, a fairly large proportion of which consist of products covered by the common agricultural policy, seems to be due to factors of a different kind.

The main reason for the decline was the fall in the world prices of cocoa and in particular copper, which led to reductions of 22% and 40% respectively in the unit values of imports of these products from the AAMS. Copper imports increased slightly in tonnage from 357,578 metric tons in 1970 to 363,424 metric tons in 1971, but the total value was only \$306 million in 1971 against \$499 million in 1970. Disregarding other factors, the fall in the price of copper accounted for approximately 85% of the reduction in the total exports of the AAMS to the EEC (~ \$225 million). The quantities of cocoa exported by the AAMS remained more or less constant, but the value of these exports fell by approximately \$35 million. The fall in the price of cocoa accounted for approximately 15% of the reduction in the total value of exports from the AAMS to the EEC.

In contrast to previous years, the relative increase in the prices of petroleum products did not unduly influence the value of exports from the AAMS to the Community compared with those from other developing countries. If petroleum products are excluded, exports from the AAMS to the EEC fell in value by 13.2% from 1970 to 1971, a larger decrease than shown by exports

.../...

of all products (12.1%). The increase recorded for four consecutive years in the share of petroleum products in AAMS exports to the EEC is, in view of the high and increasing value of these products, certainly of benefit to the Associated States, but as the quantities exported are still low: 2.4 million metric tons worth \$44.5 million in 1971 against 0.58 million metric tons worth \$10 million in 1968 - it does not on the whole compensate for the loss of export revenue resulting from the fall in copper prices, for example.

The overall analysis must be modified by taking into consideration the other main products exported by the AAMS: in 1971 their exports to the EEC of tropical wood, cotton, not carded or combed, palm oil, calcium phosphates and small quantities of zinc ore, rice and copra increased in volume and in value. However, there was a fall in exports not only of copper and cocoa, as has been mentioned, but also of groundnuts, groundnut oil and oil cake (as a result of the poor harvests, in particular in Senegal) and palm oil, bananas, manganese ore, sugar and tobacco. There was little change in the position of raw coffee, which is still a tropical agricultural product of particular importance to the AAMS as a whole, or of iron and tin ore, rubber, palm nuts and kernels, vanilla and pepper.

.../...

Moreover, the trend towards diversification of AAMS exports to the EEC, which became evident in 1969, does not seem to have continued in 1970. The share of the 26 main products in total AAMS exports to the EEC, which was approximately 81% in 1969, rose to 85% in 1970. However, as a result of the efforts made to export new products and the difficulties encountered by certain traditional products, the latter accounted for only about 23% in 1971.

All Member States, with the exception of France, reduced their purchases from the AAMS in 1971 compared with 1970. There was a particularly large reduction for the Benelux Economic Union (from \$514 million to \$337 million which must be related to the fall in copper prices). Italy recorded a lesser reduction (imports falling from \$239 million to \$203 million) as did the Netherlands (imports down from \$133,5 million to \$120 million). Germany's purchases were only slightly down (from \$273 million to \$272 million), after showing an uninterrupted increase since 1962. France's share, which had declined in previous years, was up in 1971 (\$705 million, or 43% of the total EEC imports of \$1,637 million in 1971 - against \$704 million or 38% of the total EEC imports of \$1,863 million in 1970).

.../...

By way of comparison it may be noted that total imports into the EEC from "all sources" increased in value from \$45,638 million in 1970 to \$49,129 million in 1971. Since imports from the AAMS fell in the same period from \$1,863 to \$1,638 million, the share of the AAMS in supplying the Community market declined, from about 4.4% by value in 1968 and in 1969, to no more than approximately 4% in 1970 and about 3.3% in 1971.

The statistics available on the situation of each of the Associated States are not at present adequate to show precisely how far each was affected by the general recession in the value of AAMS exports to the EEC in 1971. It seems, however, that Zaire was most seriously affected by the fall in the price of copper (this product accounts for approximately 75% of the country's total exports). Senegal was in a similar position, greatly affected by the fall in production of groundnuts and derived products, in particular as a result of climatic hazards. However, Ivory Coast was probably better able to absorb the effects of the fall in the price of cocoa because the price of coffee and tropical wood remained at a satisfactory level.

.../...

By way of reference it may be noted that the value of exports to the EEC increased in 1970 in the following Associated States: Burundi, Dahomey, Malagasy Republic, Mali, Mauritania, Niger, Rwanda, Senegal, Togo and Zaire. They remained stable in Ivory Coast and Upper Volta and declined in Cameroon, the Central African Republic, Gabon, Somalia and Chad.

In comparison with 1970, there was in 1972 a definite decline in Community imports from the AAMS and indeed from all the developing countries if petroleum products are excluded. This decline is in contrast to the general trend in the rate of expansion of these imports, which showed an increase of 6.2% per annum during the period 1958 - 1971. This situation, which was not confined to the AAMS but affected numerous developing countries, was mainly due to unfavourable economic factors which, even if they were to continue in 1972, should not prevent the value of AAMS exports to the EEC from increasing again.

.../...

2. IMPORTS OF THE AAMS

Imports into the AAMS from the EEC, which represent between 60 and 65% of their total imports, continued to increase in 1971, rising by 10.8% from \$1,265 million to \$1,401 million (the increase in 1970 was 13.1%).

All the Member States contributed to the development of this export pattern (Netherlands: + 16%, FRG: + 15.2%, France: + 11.2%, Italy: + 9.9%, Benelux Economic Union: + 1.9% only). In absolute terms France remains the leading supplier of the AAMS taken as a whole (\$841 million in 1971 on a CIF basis, or 60% of supplies from the EEC), followed by the Federal Republic of Germany (\$182 million, or 13%), the Benelux Economic Union (\$158 million, or 11.2%), Italy (\$133 million, or 9.5%) and the Netherlands (\$87 million, or 6.2%). It may be observed that the tendency, apparent since 1959, for France's share as a supplier of the AAMS to decline was practically halted in 1971: this share, 59.9% in 1970, was 60% in 1971. The share of the Benelux Economic Union decreased appreciably, however.

.../...

Exports from the EEC to the AAMS still only represent quite a small proportion of total Community exports: \$1,400 million out of a total of some \$100,000 million or 1.4%. The market offered by the AAMS takes 4% of total exports from France. The figures are 1.3% for the Benelux Economic Union, 0.6% for the Netherlands, 0.6% for the Federal Republic of Germany and 0.9% for Italy.

Of the AAMS, Zaïre continues to be the largest importer of products originating in the Community (\$301 million in 1971), and its imports were considerably up on 1970 (\$263 million). The Benelux Economic Union remains its main supplier (\$123 million in 1971 against \$130 million in 1970). This situation reflects the rapid development of the Zaïrian economy during the last few years.

Ivory Coast occupies second position in the quantity of imports originating in the EEC (\$266 million), followed by Cameroon (\$147 million), Malagasy Republic (\$138 million) and Senegal (\$134 million).

A certain decline in these imports in absolute terms may be noted in Cameroon, the Central African Republic and Niger. In all the other Associated States however, imports originating in the EEC increased or remained constant.

.../...

3. BALANCE OF TRADE OF THE AAMS

The statistics available enable an assessment to be made of the development in the AAMS balance of trade with the Community. This balance, which already showed a slight surplus in 1962, improved gradually until 1970, when it achieved a record surplus (on a CIF basis) of \$598 million. This situation is particularly favourable to the economy of the AAMS, compared to the balance of trade of numerous developing countries. It seems likely to continue provided that economic development does not involve an increase in consumer and investment expenditure which local resources could not cover and which is not offset by a corresponding increase in traditional exports or by the establishment of new export industries. Account must also be taken of the importance of invisible transactions in the AAMS balance of trade.

For economic reasons analysed previously, which affected exports from the AAMS, their balance of trade surplus fell for the first time in 1971, but it still remained at \$237 million.

The actual ratio of imports over exports, which was 113 in 1962, reached a maximum of 147 in 1970 and amounted to 117 in 1971.

.../...

The general situation, analysed above, masks fairly substantial differences from one Associated State to another. In 1970, on the whole a very satisfactory year, five of these States had a balance of trade surplus <sup>(1)</sup> with the EEC: Zaïre, followed far behind, in descending order of surplus, by Togo, Ivory Coast, Mauritania and Gabon.

On the other hand, 12 Associated States <sup>(2)</sup> had a balance of trade deficit with the EEC in 1970. These were in descending order of deficit, Malagasy Republic, the People's Republic of the Congo, Dahomey, Upper Volta, Niger, Mali, Senegal, Somalia, the Central African Republic, Cameroon, Chad and Rwanda.

.../...

---

<sup>(1)</sup> FOB value of exports  
CIF value of imports obtained by applying a standard coefficient of 108 to the figures in Table III

<sup>(2)</sup> The case of Burundi cannot be accurately assessed.

It is obvious that the size of the surplus or deficit must be compared with the volume of foreign trade, which varies greatly from State to State. Moreover, the deficit shown by landlocked States (all of which figure among the States showing a deficit) in their trade with the EEC is at least partially offset by a surplus in their trade with neighbouring countries, which are often themselves Associated States. Nonetheless, the surpluses in trade with the EEC which five Associated States enjoyed in 1970 came mainly from exports of ores or tropical wood in three cases and from exports of similar products plus raw coffee and cocoa beans in the other two cases.

These are the products which at the present time enable the producer Associated States enjoying the most favourable economic conditions to obtain surpluses in their trade with the Community.
