The Council

**NINTH ANNUAL REPORT TO THE PARLIAMENTARY CONFERENCE  
OF THE ASSOCIATION ON THE ACTIVITIES OF THE  
ASSOCIATION COUNCIL**

**(30 September 1972 - 30 June 1973)**

TABLE OF CONTENTS

	<u>Pages</u>
INTRODUCTION	1
A. THE INSTITUTIONS OF THE ASSOCIATION	
1. The Association Council	6
2. The Association Committee	9
3. The Parliamentary Conference of the Association	11
B. THE ENLARGEMENT OF THE COMMUNITY AND OF THE ASSOCIATION	
1. Accession of Mauritius to the Yaoundé Convention	13
2. Consequences of the enlargement of the Community for the institutions of the Association	16
C. OPENING OF NEGOTIATIONS PROVIDED FOR IN ARTICLE 62 OF THE YAOUNDE CONVENTION	18
D. INTERNATIONAL CO-OPERATION	
1. Outcome of the third UNCTAD	23
2. Exchange of views on the draft International Cocea Agreement	25
3. Intergovernmental consultations on commodities - Resolution 83 (III) of UNCTAD	26
4. Multilateral trade negotiations within GATT	27

E. TRADE

1. Generalised preferences in favour of developing countries	29
2. Information on the negotiations with the EFTA States not applying for accession to the Communities	32
3. Information concerning the trade negotiations with Brazil	34
4. Information concerning the Agreements with the countries of the Mediterranean basin	40
5. Information concerning the negotiations with Norway	42
6. Arrangements for agricultural and tropical products	
(a) Treatment applicable by the Community to certain fruits and vegetables originating in the AAMS	43
(b) Treatment applicable by the Community to sugar originating in the AAMS	47
(c) Protection of the appellation "natural vanilla"	50
(d) Problems relating to the sale of bananas from Somalia on the Community market	51
(e) Effects of the suspension of the International Coffee Agreement on the CCT suspension measures in respect of that product	51
(f) Problems of the commercial promotion of products originating in the AAMS	52
(g) Progress made by the Community in determining the maximum-content of aflatoxin in groundnut oilcake	55

7. Definition of the concept of originating products
  - (a) Adoption of Decision No 43/72 of the Association Council 57
  - (b) Adoption of Decision No 46/73 of the Association Council 57

F. FINANCIAL AND TECHNICAL COOPERATION

1. Definition of the general guidelines for financial and technical cooperation 59
2. Commission report on the management of the Community's financial and technical aid 60
3. Statement of the commitments of the EDF and the EIB
  - (a) Operations financed out of the resources of the European Development Fund (3rd EDF) 61
  - (b) Operations financed out of the European Bank's own resources 62

G. OTHER PROBLEMS

- The plight of the Sahel countries 66

INTRODUCTION

During the period covered by this report, the Association, which has entered into its third year of operation since the entry into force of the Second Yaoundé Conference, has yet again shown itself to be both active and capable of coping with new situations on the basis of established principles which remain entirely valid.

The Association owes its vitality to its internal and international activities. As an original form of development cooperation it has enabled eighteen developing States enjoying privileged relations with the Community to improve their economies, by facilitating the expansion of their trade, modernising and strengthening their structures, in accordance with their own development plans and programmes but with the assistance of the Community, in all the areas provided for in the Convention. The Community has also undoubtedly benefitted from its relations with the Associated States, above all to the extent that mutual interests have found expression in the balanced expansion of trade and a more harmonious economic development.

In international terms, the Association remains a point of reference for the developing countries as a whole and for certain developed countries, as well as providing an example of constructive cooperation within international organisations such as UNCTAD and GATT and in work on World Commodity Agreements. The third session of UNCTAD in Santiago, Chile, was ample proof of this cooperation, it was further confirmed by the successful conclusion of the International Cocoa Agreement, in achieving which the concerted action of the Community and the Associated States was probably decisive.

However, both the Community and the Associated States have found themselves faced with a new set of circumstances in 1973. The accession of Denmark, Ireland and the United Kingdom came into force on 1 January 1973, increasing the number of Members from six to nine. The status quo rule laid down in Articles 109 et seq. of the Act of Accession, which applies to relations with Associated States ensured that no upsets occurred as a result of the enlargement, either in trade or as regards financial and technical cooperation.

As regards the institutions, the representatives of the three new Member States are now members of the Association Council - in their capacity as Members of the Council of the European Communities, - and are consequently also members of the Association Committee, it being understood that in pursuance of the provisions relating to the status quo, the joint position of the Communities on matters concerning the Association continues, as in the past, to be determined solely by the original Member States.

In the longer term, however, the enlargement of the Community must inevitably have far-reaching implications for the Association. Protocol No 22 to the Act of Accession, on relations between the Community, the Associated African and Malagasy States and the independent developing Commonwealth countries situated in Africa, the Indian Ocean, the Pacific Ocean and the Caribbean, offers the possibility of accession to the Association to the last-mentioned countries as it states (with reference to the association system to be implemented when the Yaoundé Convention expires,) that the Community is ready to pursue its policy of association both with regard to the AAMS and with regard to the Commonwealth countries concerned which become parties to the same association.

A fruitful exchange of views between the Associated States and the Community took place at the 14th Meeting of the Association Council on 15 June 1973 concerning the Community's intentions regarding the negotiation of the Convention which is to succeed the Yaoundé Convention. Article 62 of the Yaoundé Convention states that "the Contracting Parties shall examine the provisions which might be made for a further period" eighteen months before the expiry of the Convention. Taking due account of the views expressed by the Associated States at the Meeting held on 15 June, the Community convened an Opening Conference in Brussels on 25 and 26 July 1973 to which, along with other countries, the countries referred to in Protocol No 22 were invited. The scope of this Conference, which was held as planned, greatly exceeds that of this report on the activities of the Association Council. It should nevertheless be pointed out that the Conference offered an opportunity for initial contacts and exchange of information between the participants in preparation for the actual negotiations, scheduled to begin with a Ministerial Conference on 17 October 1973, for the purpose of defining future relations between the countries concerned and the Community.

Finally, it should be recalled that Mauritius signed an Association Agreement with the Community at Port Louis on 12 May 1972 concerning the accession of that country to the Yaoundé Convention, without awaiting the enlargement of the Community or the renegotiation of the Convention. This Agreement, which made Mauritius the nineteenth State associated with the Community under the Yaoundé Convention, came into force on 1 June 1973, a few days before the 14th Meeting of the Association Council, which was also held in Mauritius.

A. THE INSTITUTIONS OF THE ASSOCIATION

1. The Association Council

During the period under review, the Association Council held two meetings, the 13th meeting on 10 October 1972 at Luxembourg and the 14th meeting on 15 June 1973 in Mauritius.

The 13th meeting, with Mr Harouna BEMBELLO, Minister of Cooperation and Development of the Republic of Niger, President of the Coordinating Council of the AAMS, in the Chair, saw the decision of the Association Council to admit the Representatives of Mauritius - as observers - to its meetings and to those of the Association Committee and Working Parties pending the Association Agreement entry into force. This admission in itself constituted a first step towards the full Association of Mauritius with the Community, which came into force on 1 June 1973.

Disagreement arose at the 13th Meeting on the treatment applied by the Community to certain fruit and vegetables originating in the AAMS. The problem was however resolved thanks to the political goodwill of both parties.

Finally, this meeting adopted a number of important provisions such as the resolution on the definition of the general pattern for financial and technical cooperation (Art. 29 of the Convention) and the Community's resolution to give favourable consideration to preferential price treatment for sugar originating in the AAMS.

The 14th Meeting of the Association Council, with Mrs PETRY, State Secretary for Development Cooperation of the Kingdom of Belgium, in the chair was held in Mauritius on 15 June 1973.

One of the results of this meeting, which was attended by the three new Member States of the Community (Denmark, Ireland and the United Kingdom), was that the controversy which had arisen in the matter of the treatment applicable to certain fruits and vegetables originating in the AAMS was resolved to the satisfaction of both parties. The Association Council also adopted a decision derogating from the definition of the concept of originating products for 1973 and 1974 in order to take into account the special situation of Mauritius as regards certain products of the textile industry.

The Council was informed of the progress made in the negotiations between the Community and the countries of the Mediterranean basin and those with the Federative Republic of Brazil, and on the future multilateral trade negotiations within GATT.

The Community and the AAMS were able in conclusion to clear up certain problems raised by the application of Article 62 of the Yaoundé Convention and of Protocol No 22 to the Acts of Accession by further defining the rules for their implementation.

2. The Association Committee

The Association Committee held three meetings during the period under review: on 29 September 1972 (37th), 2 February 1973 (38th) and 25 May 1973 (39th).

The representatives of Denmark, Ireland and the United Kingdom, which have been Member States of the Community since 1 January 1973, have been attending meetings of the institutions of the Association since 2 February 1973.

The Committee dealt, inter alia, with the Association of Mauritius, Community negotiations with the EFTA States, Norway, the Federative Republic of Brazil and with the countries of the Mediterranean basin; also with the GATT multilateral trade negotiations, generalised preferences applicable in 1973, the treatment applicable to certain fruits and vegetables originating in the AAMS and that applicable to sugar of the same origin, the definition of the general pattern for financial and technical cooperation, the problem of commercial promotion of products originating in the AAMS, the problem of maximum aflatoxin levels in groundnut oil cake and the protection of the designation of natural vanilla.

The meetings on 29 September 1972 and 25 May 1973 were partly concerned with the preparation of the 13th and 14th meetings respectively of the Association Council.

A Joint Working Party met on 28 September and 4 October 1972 to prepare the draft resolution of the Association Council laying down general guidelines for financial and technical cooperation. Another Working Party met on 22, 23 and 24 May 1973 to examine a survey on the commercial promotion of AAMS products on the markets of the Member States.

3. The Parliamentary Conference of the Association

Under the established arrangements for collaboration between the Association Council and the Parliamentary Conference of the Association and its Joint Committee, the President in office of the Association Council Mr Deogratias GASHONGA, Minister for the Coordination of economic, technical and financial affairs in the Government of Rwanda, represented the Association Council at the 9th annual meeting of the Parliamentary Conference of the Association in Kinshasa (Zaire) from 29 to 31 March 1973.

Mr HAROUNA BEMBELLO, Minister for Cooperation and Development of the Republic of Niger and Mr GASHONGA both attended meetings of the Joint Committee in their capacity as Presidents of the Association Council in Ouagadougou (Upper Volta) from 24 to 26 October 1972, and in Kinshasa from 27 to 28 March 1973, respectively. Mrs Irène PETRY, State Secretary for Development Cooperation of the Kingdom of Belgium, likewise attended the meeting of the Joint Committee in the dual capacity of President of the Association Council and President of the Council of the European Communities. The meeting was held from 26 to 29 June 1973 in Bruges (Belgium).

At its meeting on 10 October 1972 and 15 June 1973, the Association Council noted with interest the resolutions adopted by the Parliamentary Conference, on:

- 7th annual report to the Conference on the activities of the Association Council (meeting of 10 October 1972)
- 8th annual report to the Conference on the activities of the Association Council
- memorandum from the Commission of the European Communities on a Community policy for development cooperation
- coordination of the activities of the 24 partner States of the Association within the context of international organisations for economic cooperation and development, pursuant to Protocol No 5 to the Yaoundé Convention (meeting of 15 June 1973).

B. THE ENLARGEMENT OF THE COMMUNITY AND OF THE ASSOCIATION

1. Accession of Mauritius to the Yaoundé Convention

Following the formal consultation of the AAMS on the Association Agreement concerning the accession of Mauritius to the Yaoundé Convention, signed at Port-Louis on 12 May 1973, the Association Council resolved at its meeting on 10 October 1972, to invite the representatives of Mauritius to take part as observers in the meetings of the Association Council and Committee, and Working Parties set up by them, during the period between the signing of the Agreement and its entry into force. This was in consideration of the time taken by ratification procedures.

With this in mind, the Association Council issued an urgent appeal to the signatory States to make every effort to ratify the Port-Louis Agreement as quickly as possible so that Mauritius could enjoy the benefits to which accession to the Yaoundé Convention entitled it.

At the meeting of the Association Council on 2 February 1973, the Community informed the Council of the progress of ratification procedures in the Member States signatory to the Association Agreement concerning the accession of Mauritius to the Yaoundé Convention. It stated that the Council of the Communities had just appealed to those States which had not yet ratified the Agreement to speed up the relevant procedures, so that Mauritius should not wait long to benefit from the association.

The AAMS, appealed to the Member States to ratify the Agreement as quickly as possible so that the Association Council's decision to meet in Mauritius in June could be implemented.

They then requested that immediate measures be taken to enable Mauritius to enjoy the trade and financial benefits it expected from association with the Community.

The situation was again reviewed at the Association Committee's meeting on 25 May 1973. Ratification procedures has still not yet been completed in two Member States of the Community. The representatives of these two States assured the Committee that the instruments of ratification would be deposited in good time, bearing in mind that the meeting of the Association Council planned for the 15 June 1973 was to be held in Mauritius. The AAMS, however, expressed regret that it had not been possible for the Association Agreement to enter into force on 1 January 1973. They pointed out the gravity of the situation, especially as it was politically impossible for the Association Council to go back on its decision concerning the next meeting. The Community replied that it was by no means opposed to the meeting being held at the appointed place and as planned.

At the same meeting of the Association Council, the Community stated that the Council of the European Communities had adopted the Regulation concluding the Association Agreement at its meeting on 14/15 May 1973. Under the terms of this Regulation (Article 3), any reference in acts of the Institutions of the Community to the "Associated African and Malagasy States" after entry into force of the Agreement likewise applied to Mauritius, save as otherwise provided.

It was subsequently found that all the Member States signatories of the Agreement had completed the necessary procedures; the Association Agreement thus entered into force on 1 June 1973.

2. Implications of the Enlargement of the Community for the institutions of the Association

Following the extraordinary meeting of the Association Council on 30 November 1971, which was convened mainly in order to discuss progress in the negotiations with those States applying for accession, the Association Council was, at its meeting on 10 October 1972, given details concerning the composition and operation of the institutions of the Association as from 1 January 1973. Since the Council of the Communities was to increase from six to nine members, the logical conclusion to be drawn from the texts was that all the Members of the Council of the Communities should sit on the Association Council.

The Community emphasised that this change would not affect the operation of the Association. The new situation within the institutions could only be favourable, for it would enable the acceding States to become better acquainted with the problems confronting the Association and to prepare under the best possible conditions for the negotiations with the AAMS and other countries to be opened on 1 August 1973. Again, the AAMS could not be adversely affected since Community positions adopted under the Yaoundé Convention would still be determined in the same way as before the entry into force of the Accession Treaty, i.e. by the Six original Member States.

Among the new Member States, the United Kingdom would be able to maintain its traditional relations with the Commonwealth countries until 31 January 1975. As far as the period after 1 February 1975 was concerned, the Community drew the attention of the Associated States to the content of the offer made to certain Commonwealth countries with a view to ordering their relations with the Community. While taking note of the de facto situation, the AAMS requested that the question be left open, since they were of the opinion that existing arrangements would probably be adequate in the meantime to ensure that the result which all parties hoped to attain might be reached rapidly and pragmatically.

C. OPENING OF THE NEGOTIATIONS PROVIDED FOR UNDER ARTICLE 62  
OF THE YAOUNDÉ CONVENTION

At the meeting of the Association Council on 15 June 1973, the Community gave details of the letter addressed to the Heads of State or of Government of the Associated States or potential associate States by the President of the Council of the Communities, inviting them to be represented at an Opening Conference (25/26 July 1973). It was pointed out that this letter expressed the Community's concern to comply with Article 62 of the Yaoundé Convention, Article 36 of the Arusha Agreement, and the provisions of Protocol No 22. The Community noted, in this connection, that certain provisions in this Protocol spelt out the Community's commitments towards those Associated States which were Contracting Parties to the Yaoundé Convention and extended them beyond the terms of Article 62. While Article 62 refers only to "the provisions which might be made for a further period", Protocol No 22 speaks of "the new Convention to follow the Convention signed on 29 July 1969." In addition, Part II of this Protocol was devoted entirely to the association arrangements to be made on the expiry of the Yaoundé Convention and on behalf of the Member States of the enlarged Community, safeguarded for the AAMS, what had been achieved under the Association.

The Community also stated that the opening Conference should provide an opportunity for participants to make initial contacts and to exchange information, in anticipation of the actual negotiations which would start as soon as possible. The negotiations would fulfil the undertakings given in Article 62 of the Yaoundé Convention and the Community would negotiate on the basis of a form of agreement which would ensure a range of advantages for the AAMS and be founded on structures giving the Association a distinctive character in the fields of trade relations, financial and technical co-operation and joint institutions. During that Conference a decision could be taken concerning the date on which the actual negotiations could be opened on the basis of Article 62 and Protocol No 22. These negotiations would be conducted on behalf of the Community by the Commission in close cooperation with the Member States and the Council of the Communities.

The Community observed that the last part of the letter was addressed to the potential associate States which, pursuant to Protocol No 22, would have to choose one of the three formulae on the basis of which to negotiate with the Community. Participation in the Conference therefore would leave open the question of when the potential Associated States would make their actual choice.

The Community emphasised the exceptional importance which the coming negotiations would have, in terms of both the obligations which association entailed, and of new obligations towards the potential Commonwealth associates.

The AAMS emphasised that the provisions of Article 62 (1), in conjunction with those of Article 61 which laid down that the 1969 Convention was to expire on 31 January 1975, meant that negotiations for the establishment of further relations between the Associated States and the Community under the Yaoundé formula should begin on 1 August 1973. On this fundamental question, the AAMS therefore requested that a procedure be adopted at the meeting on 15 June 1973 or, at the very least, a timetable for the implementation of Article 62 (1) on the measures to be adopted for the opening of negotiations for the renewal of the Yaoundé Convention. This desire was in keeping with Protocol No 22 to the Accession Treaty which also made provision for the same commitments. They also hoped that, in the circumstances, the Community would state the date on which it thought the negotiations could begin. In the view of the Associated States, the date should be as close as possible to 1 August 1973 and preferably towards mid-September 1973.

The AAMS drew attention to the fact that, having regard to the good relations which ought to characterise their cooperation with the Community, the latter could have taken the precaution of consulting them about the substance and form of their letter of invitation.

So as to be able to make a more detailed examination of the matter, the Associated States wished to know whether the fact that the negotiations for the renewal of the Yaoundé Convention had not started eighteen months before the expiry would not prejudice the interests acquired by the Associated States, the preservation of which was, moreover, a stated aim. In this connection they were of the opinion that the delays would result in a fairly long transitional period, detrimental to their interests. The AAMS also raised questions concerning the nature of the Opening Conference and the business which the Community intended to handle on that occasion. Finally they requested precise information both as to the actual content of the three formulae of association offered to the potential associate countries listed in Protocol No 22 and as to the Community's position on the concept of a free trade area which until now had constituted one of the bases of the EEC-AAMS Association.

The Community observed that the opening Conference should provide an occasion for initial contacts between the Community and the Associated States. The purpose was to brief potential associates more fully on the actual negotiations, having regard to the political importance which the Community and the Associated States attached to the conclusions of the widest possible Association. The Community stated that it was highly desirable that the AAMS contribute actively to the success of the Conference. Moreover, the Community would have the opportunity when carrying out exchanges of information, to make known the broad outlines of its position and similarly, the Associated States and potential associates would be able to define their own viewpoints.

In conclusion the Community emphasised that it would, at all events, make proposals at the Opening Conference concerning the procedural details for the conduct of the actual negotiations, including the date on which they were to begin. In view of the date of expiry of the Yaoundé Convention, the Community recognised that these negotiations should begin as soon as possible after the summer recess and in any event before the end of September 1973.

After asking that answers to the questions they had raised be supplied as quickly as possible, the AAMS solemnly reaffirmed their political will to have with them at the negotiating table for the renewal of the Yaoundé Convention the largest number of potential associates who had expressed obvious interest in this formula for cooperating with the European Economic Community.

D. INTERNATIONAL CO-OPERATION

1. Outcome of the third UNCTAD

The Association Committee, at its meeting on 29 September 1972, noted that the Associated States intended to inform the Association Council of their views on the results of the 3rd UNCTAD held in Santiago, Chile from 13 April to 20 May 1972 and the conclusions which should be drawn from them.

At the Association Council's meeting on 10 October 1972, the AAMS said that they had carefully examined these results in order to discover what lessons could be drawn from them for development policy and the Association's future. They noted that although positive results were obtained in some sectors, particularly in favour of the least developed countries, no specific commitment was made for a programme of action in essential sectors, such as that of primary products, which were of vital importance for them. Therefore, they requested the Community to correct the system of generalised preferences in their favour and to accept regular consultations in Brussels on the preparation and conduct of the 1973 multilateral trade negotiations (GATT), so that these should not jeopardise the advantages which they enjoyed on the Community market.

The AAMS further requested that Association arrangements, which must remain a Community priority, should take the form of practical measures, as regards not only financial aid, but also the markets and prices for their export products, by means of the conclusion of regional agreements on the stabilisation of commodity prices. Finally, the Community should keep the Associated States regularly briefed on its studies on the promotion of a development aid policy.

In this connection, the Association Council heard an important statement from the Community on the examination of the development aid problem as a whole, the guidelines for which were laid down by the Paris Conference of Heads of State or of Government on 19 and 20 October 1972. The Community was resolved to respect both the letter and the spirit of its commitments, and especially those entered into with the present Associated countries.

The Associated States were convinced, as was the Community, that the Association would retain a favourable position in any Community policy vis-à-vis the Third World as a whole, and would be a fundamental factor in such a policy.

2. Exchange of views on the draft international cocoa agreement

At the Association Committee's meeting on 2 February 1973, the AAMS stressed the great psychological and political importance which it attached to the conclusion of the International Cocoa Agreement. The Agreement, which they hoped would soon come into force, was in their view a document which would help induce Governments to conclude other commodity agreements within UNCTAD. The Associated States therefore expressed their satisfaction at the signing of this Agreement and their appreciation of the vigorous role played by the Community, despite the refusal of the largest cocoa importer to participate; they also stressed that the Association had been a truly dynamic force at the negotiating Conference.

3. Intergovernmental consultations on commodities - Resolution 83 (III) of UNCTAD

The Community observed, at the Association Committee meeting on 25 May 1973, that a timetable had been drawn up by the Secretary-General of UNCTAD in collaboration with the Director-General of the FAO with a view to the opening of intergovernmental consultations on commodities pursuant to Resolution 83 (III) of UNCTAD. This timetable covered two periods of nine months each; during the first (July 1973 - March 1974) consultations on the following products were planned: bananas, tobacco, cereals other than wheat, cotton, tungsten, leather and hides, rice, oleaginous products, tea and manganese.

It was proposed that, where products of interest to the AAMS were concerned, EEC-AAMS consultation meetings should whenever necessary be organised in the place concerned, in accordance with Protocol No 5 to the Yaoundé Convention.

The AAMS agreed to this procedure of holding formal consultations with the Community in conjunction with any intergovernmental consultations on basic commodities.

4. Multilateral trade negotiations within GATT

At the Association Council meeting on 15 June 1973, the AAMS first of all recalled the main principles of the multilateral trade negotiations to be opened within GATT as defined at the 28th meeting of the Contracting Parties to the GATT, held in Geneva in November 1972. They then drew the attention of the Association Council to the guidelines laid down by the Heads of State or of Government of the EEC at the Paris Summit Conference in October 1972, pointing out that the political willingness had been expressed at the highest level that the Community should participate with an open mind in the establishment of stable and balanced economic relations in which the interests of the developing countries would be taken fully into account.

The AAMS accordingly considered that, when working out its overall concept, the Community should do everything possible to see that these guidelines were observed and that, whatever happened, the offers it made in these negotiations should in no way prejudice the interests of their countries, which had for decades enjoyed privileged relations with the Community.

They also requested that permanent consultations and exchanges of information take place in the institutions of the Association during the preparatory phase and throughout the negotiations.

The Community gave certain details on the factors likely to be taken into consideration, with particular regard to the consequences which the negotiations might have for the Associated States, which it undertook to inform of any new factors which might be of interest to them, if and when these arose.

It was agreed that consultations could take place, in accordance with Article 14 of the Yaoundé Convention and Protocol No 5 annexed thereto, on the occasion of the 3rd meeting of the GATT Preparatory Committee (July 1973) and of the GATT Ministerial Conference (Tokyo, September 1973) at which the negotiations were to open.

By letter dated 16 July 1973, the Community then forwarded for information to the Association Council the text of the overall concept adopted by the Council of the Communities at its meeting on 25 and 26 June 1973 for the multilateral trade negotiations within GATT.

E. TRADE

1. Generalised preferences in favour of developing countries

Following discussions within the institutions of the Association on the problem arising from the Community's generalised preferences scheme, the Community confirmed at the Association Council meeting on 10 October 1972 that the Council of the Communities had, in order to allay the anxieties of the Associated States, decided that the ceiling for veneered wood and plywood imported from developing countries not yet associated would not be increased in 1973, and that the "cut-off" (the specific ceiling per exporting country) would be lowered (it fell from 50% in 1972 to 20% in 1973).

The Associated States' main concern was to obtain from the Community an assurance that it would in future refrain from making any new offer on actual or potential AAMS export products, that there would be no increase in the list of offers as long as all the industrial countries did not introduce generalised preferences and that the list of beneficiaries would be restricted to members of the Group of 77.

Pursuant to Decision No 35/71 of the Association Council on the information and consultation procedure provided for in Title I of the Yaoundé Convention and following the Association Council's deliberations on 10 October 1972, the Community forwarded to the Association Council, by letter dated 18 September 1972, a series of proposals for Council Regulations and two draft Decisions of the representatives of the Governments of the Member States, meeting within the Council. These dealt with the application in 1973 of generalised tariff preferences for exports of manufactured articles and semi-finished products from developing countries.

At the meeting on 2 February 1973, the AAMS expressed their satisfaction that the Community had in substance acceded to their requests. They regretted however that in the matter of procedure the commitments entered into by the Community had not been honoured and hoped that in the future the information and consultation procedure would operate in accordance with the provisions of the Yaoundé Convention.

While regretting the delay in the official forwarding of the Commission's proposals of which the AAMS had, however, been unofficially informed, the Community stated that the Regulations adopted in no way differed from the proposals, except as regards a number of questions concerning the internal administration of the scheme.

In accordance with Article 15 of the Yaoundé Convention, the Community informed the Association Council at its meeting on 15 June 1973 of the decision in principle taken by the Council of the Communities to include Romania, as from 1 January 1974, among the countries benefiting from the generalised preferences granted by the Community. The decision proper, like the others taken in this sphere, would be an autonomous and non-contractual decision. It would be adopted by the Council on the basis of proposals to be forwarded by the Commission. [The Council had also agreed, in respect of Turkey and Malta, to take the steps necessary for these two countries to obtain, as from 1 January 1974, treatment not less favourable than that granted to countries benefiting from generalised preferences.]

The AAMS wished to know the reasons, economic or otherwise, which had led the Community to waive the principles adopted at the UNCTAD whereby only the developing countries belonging to the Group of 77 would benefit from the generalised preferences scheme. To their knowledge, Romania was not one of the Group of 77 developing countries.

The Community stated that the draft Regulations on applying generalised preferences in 1974 would be submitted for information before the end of the year to the AAMS, who could then present their comments within the institutions of the Association.

2. Information on the negotiations with the non-applicant EFTA States

Acting in the spirit of Article 15 of the Yaoundé Convention and Decision No 35/71 of the Association Council concerning the information and consultation procedure, the Community briefed the Associated States on the negotiations with the non-applicant EFTA States, i.e. Austria, Finland, Iceland, Portugal, Sweden and Switzerland, which led to the Agreements signed in Brussels on 22 July 1972. At the Association Council meeting on 10 October 1972, the Community imparted information additional to that given at the Association Committee on 24 March, 30 June and 29 September 1972, highlighting the prime objective of these Agreements: to obviate the re-establishment of customs barriers between acceding and non-acceding States. It also pointed out that the Council of the Communities, in its desire to take account of products of interest to the AAMS, had provided for a special safeguard clause for veneered wood and plywood originating in the AAMS. The Associated States commented only on the Agreement with Portugal.

Following the Council meeting on 10 October 1972 and the forwarding by the Community of the text of the Agreements it had concluded with the above countries, the Associated States indicated at the Association Committee meeting on 2 February 1973 that they had no general remarks to make on the content of the Agreements, since a special safeguard clause had been

included for veneered wood and plywood to protect the interests of the Associated States in respect of that product.

At the meeting of the Association Council on 10 October 1972, the Associated States said that they had learned with regret of the signing of the Agreement with Portugal. They recalled that their Ambassadors had on two occasions drawn the attention of their European colleagues to the terms of the resolution adopted at Rabat by the Heads of State and of Government of the Organisation of African Unity requesting the Community not to adopt any measure regarding Portugal that would strengthen that country in its colonial policy.

Moreover, noting that this Agreement granted Portugal major concessions in agriculture, the Associated States expressed anxiety on the matter and hoped that the measures in question would not prejudice the marketing of fruit and vegetables from the AAMS in the Community.

The Community took note of these statements and declared the exchange of views on these Agreements closed.

3. Information concerning the trade negotiations with Brazil

At the Association Committee's meeting on 2 February 1973, the Community informed the Associated States that the Council of the Communities had, at its meeting on 4/5 December 1972, agreed in principle to open trade negotiations with Brazil with a view to concluding an agreement with that country; the Council also agreed to adopt the final decision to open negotiations, following notification of the AAMS and pursuant to Article 15 of the Yaoundé Convention. The decision would be adopted on the basis of draft directives.

Following a request by Brazil that the negotiations should extend to certain products of direct interest to the AAMS, such as soluble coffee and cocoa butter, or of indirect interest to them, such as castor oil, the Community said that it would be interested at this stage in hearing the observations of the AAMS.

The Associated States said that they were very concerned about tariff adjustments which might possibly be made in the context of the negotiations with Brazil, especially as regards cocoa butter and soluble coffee. They pointed out that the tariff arrangements for tropical products constituted one of the most important factors in the negotiations which had led to the 1969 Yaoundé Convention, and that, on that occasion, tariff adjustments had been agreed for raw coffee and cocoa beans; these had been implemented at the time of entry into force of the Yaoundé Convention (in the case of raw

coffee, suspension of the 9.6% duty at 7%, it being understood that this suspension depended on the existence and satisfactory operation of an International Coffee Agreement; any failure of the Agreement to operate would have to be ascertained by the Council acting unanimously. The duty of 5.4% on cocoa beans had been suspended at 4%). However, during the consultations organised within the Association Council on 30 September 1970, the AAMS stated that they could not support the reductions envisaged and regretted in particular that the autonomy as regards tariffs enjoyed by the Parties within the Association - which was a mainstay of that Association - always acted to the detriment of the Associated States.

Accordingly, and in view of the suspension of the International Coffee Agreement, the Community should do nothing in this field vis-à-vis Brazil for the time being, least of all under the generalised preference system. Tariff concessions "erga omnes" should in no circumstances be contemplated.

In addition, the AAMS had requested that they be consulted on the negotiating directives and expressed a wish that the matter should remain open throughout the negotiations with Brazil.

The Community noted the AAMS statements, which had been included in the dossier submitted to the Council of the Communities, and undertook to keep the Associated States informed of the course of the negotiations, so that they could request consultations as and when more practical points liable to affect their trading arrangements came to be discussed.

Following this exchange of views, the Community, by letter dated 15 March 1973, notified the Associated States that the Council of the Communities had decided, at its meeting on 4/5 March 1973, to authorise the Commission to open negotiations with the Federative Republic of Brazil. It also gave details of the content of these negotiations.

At the meeting of the Association Committee on 25 May 1973, the Commission representative gave a progress report on the negotiations between Brazil and the Community for the purpose of concluding a trade agreement, which had begun at the end of March; a second series of meetings had been held from 7 to 9 May. He made it clear that this initial, exploratory stage of the negotiations could now be considered over, and that the basis for a possible agreement had at that stage been examined from a technical point of view.

With special reference to cocoa butter and soluble coffee, the two products of vital importance to Brazil, the latter had expressed its desire to maintain access to the Community market and in particular to that of the United Kingdom, in spite of the enlargement of the Community. The enlargement would produce a gradual rise in the customs duties levied in the United Kingdom (cocoa butter = 0, soluble coffee = 3.6%), till they reached the level of the Common Customs Tariff.

As a solution, Brazil had proposed a reduction of the GCT to the level of the customs duties levied on raw coffee and cocoa beans or, alternatively, the opening of tariff quotas, valid only for the United Kingdom market and fixed at the level of the duties levied at present in the United Kingdom.

The Commission representative pointed out that without entering into any commitment vis-à-vis Brazil, his Institution had, in accordance with the negotiating directives, attempted to obtain further information about Brazilian export policy with regard to these two products. It was preparing a report on the work done, after which the Council would finalise the negotiating directives presented to the Commission at its meeting on 5 March 1973.

The Associated States took note of these facts and expressed the hope that detailed discussions would be initiated on this important matter within the Association Council at its meeting on 15 June 1973.

At the above-mentioned meeting of the Association Committee, the Community gave additional information on this matter, stating that the AAMS would be informed of the outcome of the negotiations and in particular of the draft instructions of the Council of the Communities, so that they could submit their observations in ample time.

The AAMS expressed their satisfaction with detailed information given by the Community on the progress of the negotiations. Whilst they understood Brazil's decision to safeguard its interests on the United Kingdom market, they felt that it should be borne in mind that any fundamental changes in the tariff policy relating to the products in question would affect very adversely the competitive position of certain AAMS on the Community market.

They believed that, for the time being at least, no tariff reduction measures should be taken before in-depth studies had been carried out by the Commission so that the true importance of these products could be assessed for the economy not only of Brazil, but also of the Associated States concerned, the aim would be to eliminate any possibility of industrialised countries which were major exporters of soluble coffee benefiting from measures which the Community might take.

It was agreed that the statements made on this matter would be included in the Community file when it resumed examination of this problem.

4. Information on the agreements with the countries of the Mediterranean Basin

At the meeting of the Association Committee on 2 February 1973, the Community gave a briefing, at the request of the AAMS, on its negotiations with the countries of the Mediterranean Basin. It explained the scope of the agreements signed with the Arab Republic of Egypt, the Lebanese Republic and the Republic of Cyprus. It also gave information on the additional Protocols to the Agreements with the countries of the Mediterranean Basin, to take account of the enlargement of the Community. Finally, it gave an outline of the global approach to relations between the Community and the countries of the Mediterranean Basin.

The Associated States noted the Community's statements, reserving the right to return to them at a later date; it remained understood that the Community would, in the meantime, keep the AAMS informed of the progress of the negotiations, in which the interests of the Associated States would be safeguarded.

At the meeting of the Association Council on 15 June 1973 the Community stated that the Council of the Communities had decided in November 1972, pursuant to the resolutions of the Conference of Heads of State or of Government in October 1972, to establish a coherent policy in respect of all the countries bordering the Mediterranean, together with Jordan.

Within this overall approach priority was given to Spain, Israel, Malta and the three Maghreb countries. Future agreements would contain different sections, including one on trade and one on co-operation (also a labour section for the Maghreb countries).

After the details given by the Community on these different sections, the AAMS requested that the file remain open and the question continue to appear on the agenda of the Association bodies, in view both of its importance, as the African countries were involved in the establishment of an overall approach to Community relations with the countries of the Mediterranean Basin, and of the fact that certain non-African countries exported processed agricultural and industrial products to the Community which competed directly with AAMS exports.

They therefore requested the Community not to take any measure in this context which might either be detrimental to their immediate interests or pose a potential threat to the economic development of their countries.

5. Information on the negotiations with Norway

At the Association Committee meeting on 2 February 1973, the Community informed the Associated States of its intention of opening negotiations with Norway shortly, with a view to concluding a preferential agreement with that country. It stated that, pursuant to Article 15 of the Yaoundé Convention, it would inform the Associated States if this agreement involved measures likely to affect their interests were adopted in it. This was not in fact done in the case of this agreement, which was signed in Brussels on 14 May 1973.

6. Arrangements for agricultural and tropical products

(a) Treatment to be accorded by the Community to certain fruits and vegetables originating in the AAMS

The AAMS returned to this problem at the Council Association meeting on 10 October 1972 following discussions at previous meetings on Council Regulation No 859/72 on the treatment to be accorded to certain fruit and vegetables originating in the Associated African States and Madagascar or in the Overseas Countries and Territories. The Community expressed its understanding of the anxiety manifested by the Associated States. It confirmed its intention of effectively reviewing the arrangement in question by 1 May 1973 with a view to making improvements in favour of exports from the AAMS. However, it upheld its interpretation of the words "economic interest" appearing in the abovementioned Protocol No 1 and also considered that comparison with the treatment granted to Greece was not relevant.

The Community and the Associated States accordingly felt that the best way of overcoming the difficulties arising from the arrangement in question was to resort to the good offices procedure provided for in the Declaration appearing in Annex VIII to the Final Act of the Yaoundé Convention, rather than bring the dispute before the Court of Arbitration of the Association. This Declaration states that any Contracting Parties which are parties to a dispute within the meaning of Article 53 of the Convention are prepared, if circumstances permit, to have recourse to a good offices procedure before bringing the dispute before the Association Council. This mission, which was to be

completed by 31 December 1972 at the latest, was entrusted to a person chosen by both parties, namely Mr J. Rey, former President of the Commission of the Communities. By the end of December Mr J. Rey had submitted his conclusions, together with recommendations to the parties involved. The Community gave its position with respect to these recommendations in a letter forwarded to the Chairman of the AAMS Co-ordinating Committee on 19 January 1973.

At the Association Committee meeting on 2 February 1973, the AAMS stated that it was impossible for them, at the level of the AAMS Co-ordinating Committee, to adopt a standpoint with regard to Mr Jean Rey's recommendations or to the Community's position, which they noted. Since the arbitration procedure had been instigated by the Association Council, it seemed to them that the latter should deal with it directly.

The Community considered that this situation should not be prejudicial to the interests of the Associated States from 1 March 1973 onwards, and said that it wished to make a gesture while waiting for the Associated States to express their views. It explained that it had studied the possibility of applying the new timetable provisionally from 1 March 1973, on the understanding that it was waiting until the AAMS had expressed their views, of which it hoped to be notified at the Association Council meeting in June 1973 at the latest, in order to be able finally to settle the issue.

The AAMS took formal note of the measures envisaged by the Community to avoid any hiatus in this sector after 1 March 1973, so that the products concerned should not be subject to customs duties until the final settlement of the dispute, which should be reached no later than the next meeting of the Association Council.

Giving effect to its statement, the Community, in a letter dated 27 February 1973, communicated to the Association Council the Regulation adopted by the Council of the Communities on 26 February 1973, temporarily suspending the customs duties applicable to certain fruit and vegetables originating in the AAMS.

At the Association Council meeting on 15 June 1973, the Community requested the Associated States to let it know their reactions to its intention of introducing a new Regulation as soon as possible which would apply throughout the duration of the present Convention, and provide for an extension of the timetable for duty-exempt marketing in accordance with the second alternative recommended by Mr Jean Rey in his good offices mission.

The AAMS stated that they accepted the proposal for a new version of the Regulation in their desire to assist the smooth functioning of the Association and in view of the goodwill which Mr Jean Rey had always shown towards the Association. In so doing they were acting in the interests of the Association, mindful of the overriding need to safeguard its basic principles.

However they drew the attention of the Community to the serious strains thus put upon the provisions of the Convention and to the burden upon the Association of an agricultural policy which was becoming increasingly protectionist vis-à-vis the Associated States, to whom treatment was applied less favourable than that for similar products from a country like Greece, which was a third country with respect to the Yaoundé Convention.

(b) Treatment to be applied by the Community to sugar  
originating in the AAMS

At the 13th meeting of the Association Council on 10 October 1972, the Community undertook, in response to requests from the AAMS, to examine the possibility of determining a preferential quota for a small quantity of sugar originating in the AAMS to be imported into the Community.

In a letter dated 8 May 1973, the Community informed the Association Council of its intention to adopt a Regulation whereby the levy applicable to the importation of sugar originating in the AAMS into the original Member States of the Community would be reduced by 1 UA/100 kg for an annual quantity of 8,000 tons, calculated prorata temporis. It proposed that the Associated States be consulted about this draft Regulation at the Association Committee meeting on 25 May 1973.

During that meeting, the AAMS recalled that they had requested a preferential price quota far larger than that proposed by the Community. They expressed surprise at the fact that this quota fell so far short of the 50,000 tons requested. Finally, they stated that the question should be examined in the Association Council so as to ensure a better balance between exports of sugar from the AAMS and the Community's requirements.

In its reply, the Community particularly drew the attention of the AAMS to the fact that, whilst it understood the arguments put forward by the Associated States, it seemed rather unlikely that it could revise its position with regard to the preferential quota laid down in the draft Regulation, since this quota represented the maximum that the Community could grant under the present Convention.

It recalled its statements at the Association Council meeting on 10 October 1972, which made it clear that, as a result of the commitments entered into in Protocol No 22 to the Accession Treaty, the formula worked out by the enlarged Community for the benefit of the potential Commonwealth associates would apply in the same terms to the AAMS sugar producers.

It followed that the present situation, or the solution which might be found for AAMS sugar within the framework of the Yaoundé Convention of 1969, did not in any way prejudge the solution which would have to be made for all the sugar-producing States, in accordance with the aforementioned Protocol No 22.

On this occasion, the AAMS hoped that the preferential quota attributed to them would be modified to take account of the vital importance of this product for the economies of the supplier countries. They also hoped that, at the Association Council meeting on 15 June 1973, the agenda of which would include this question, the Community would be able to revise its position and improve the draft Regulation in a spirit of genuine consultation, and not merely as an exercise in information.

At its meeting on 15 June 1973, the Association Council resumed the consultations already begun in the Association Committee on the draft Regulation in question.

The AAMS, having pointed out that it welcomed the Community's intention finally to admit sugar from their countries into the Community under a preferential scheme, repeated that the quantities proposed were quite inadequate and not consistent with the wishes or previous references of the AAMS. Having commented on the mechanism provided for in the draft Regulation, they observed that the aim of the AAMS sugar exporters was to have guaranteed access for a fixed quantity of sugar within the Community at a price to be fixed in advance irrespective of the world price.

Consequently, the AAMS stated that they could not accept the formula proposed by the Community and requested that the file remain open for further discussions.

The Community, having re-examined the problem, agreed with the proposal of the Associated States that the file be left open for further discussion; this accords with the statement the Community made on the matter at the Association Council meeting on 10 October 1973, which has lost none of its validity.

(c) Protection of the appellation "natural vanilla"

At the Association Council's meetings on 10 October 1972 and 15 June 1973, the AAMS reiterated their views on the problem arising from the appellation "natural vanilla" and wished to know what progress had been made in discussions concerning the proposed Directive on the approximation of provisions laid down by law, regulation or administrative action by the Member States concerning ice cream.

Noting the request of the AAMS, the Community pointed out that the discussions had made little progress; it had however been recognised that it was advisable to wind up the excessively lengthy discussions which had taken place in specialist circles concerning the regulations desirable within the general framework of the harmonisation of the rules of the Member States governing the use of synthetic products for the manufacture of edible ice cream.

Furthermore, the Community representative raised the matter of the commercial promotion of natural vanilla, and its importance.

(d) Problem relating to the sale of bananas from Somalia on the Community market

At its meeting of 10 October 1972, the Association Council heard a statement made by the AAMS concerning the market decline in the export to the Community of bananas originating in Somalia, particularly after the closing of the Suez Canal and the abolition under the terms of the Treaty of Rome, of the preferential system from which they benefited, in one of the Member States of the Community.

The Community took note of this statement and said that discussion of the question would be resumed after it had been examined more thoroughly.

(e) Effect of the suspension of the International Coffee Agreement on the CCT suspension measures on that product

At the Association Council meeting on 15 June 1973, the AAMS recalled that, when it decided in 1969 to bring the suspension of the CCT duty on raw coffee from 9.6% to 7%, the Council of the Communities had linked this suspension with the proper functioning of the International Coffee Agreement. They asked what the Community proposed to do, now that all the economic clauses of this Agreement had been suspended as from the beginning of 1973.

The Community stated that the question would receive close attention, and that the decisions it had taken in 1969 in relation to the suspension of duty on coffee would be borne in mind.

(f) Problems relating to the sales promotion of products originating in the AAMS

At its meeting on 22 October 1971 the Association Committee instructed the Joint EEC-AAMS Working Party to examine the study on the promotion on the markets of the Member States of the Community of products originating in the AAMS - a study prepared by independent experts under the aegis of the Commission, as requested by the Associated States at a meeting of the Association Council - and to report back. At its meeting on 2 February 1973, the Association Committee confirmed the Working Party's brief without altering its terms.

The Joint Working Party met in Brussels, on 22, 23 and 24 May 1973. At these meetings, a general discussion was held on the problems raised by this study; in addition, experts from the Community and the Associated States submitted observations, which were noted by both sides.

The Joint Working Party unanimously stressed the importance of sales promotion as a means of increasing exports from the Associated States.

The Working Party, however, noted that the observations submitted by the Community experts and those submitted by the Associated States' experts only corresponded to each other on a certain number of points. The two parties had in fact approached these problems from a different angle. The Associated States' experts considered that promotion was inadequate to solve the marketing problems which their products met with on the markets of the Member States of the Community insofar as the trade policies practiced by those States prevented any rapid expansion expansion of AAMS exports.

The Community experts, without denying the importance of trade policy, thought that the Association Committee brief should be strictly respected; consequently, only promotional measures which could be adopted under Article 19 of the Yaoundé Convention and Article 4 of Protocol No 6 annexed thereto, should be examined.

Account being taken, on the one hand, of this difference of opinion, and on the other hand of the short time available for the work of the Joint Working Party, the latter agreed to submit to the Association Committee at its 39th meeting on 25 May 1973, a short, provisional report with observations from the experts attached. It suggested that the Committee

should renew its brief on the most appropriate terms, so that it could continue its work in greater detail and possibly produce a draft Association Council resolution on the matter.

Taking note of the report made by the Joint Working Party, the Association Committee observed that there was a difference in interpretation regarding the content of the brief given to the Joint Working Party.

The Community found it acceptable that this Working Party, whose main concern was sales promotion, should also be competent to trace and bring to light relevant problems. The Community would take note of the latter with a view to examining them itself or noting them for any future negotiations.

Since the Associated States were of the opinion that the Working Party should be able to examine every aspect of the problem without necessarily having to reach unanimous conclusions on all the problems brought to light, the Committee instructed both Chairmen to combine their efforts to find a solution, failing which the question would be referred to a future meeting of the Committee.

(g) Progress made by the Community in determining the maximum content of aflatoxin in groundnut oilcake

In a letter dated 30 January 1973, the Associated States again expressed concern regarding the work undertaken by the Community to determine the maximum content of aflatoxin in groundnut oilcake.

At the Association Committee Meeting on 2 February 1973, the Community said that it could only confirm at that time that the question was still being examined by the Communities and that it would probably be some time before a final solution was reached. Since this question had serious implications, both from the public health angle and in connection with the production of feedingstuffs, the Community emphasised that it was obliged to take all these points into account and that it would continue to give all the weight possible to the anxieties expressed by the AAMS and would keep them informed of any arrangements made.

The Representative of Senegal pointed out that it had never been proved that aflatoxin could cause cancer and expressed surprise that restrictive measures had been envisaged by the Community when technical progress had enabled one of the large, highly developed countries which was a producer of groundnut oilcake, to eliminate aflatoxin from these oilcakes. He made the point that the criteria

applied by the Member States' experts appeared to be far stricter than those adopted by the Commission experts. Emphasising that the rules in question would constitute a non-tariff barrier which would be extremely damaging to Senegal's interests, he hoped that there might be more understanding and less haste on the part of the Community in handling the matter.

The Community said that the technical Working Party of the Council of the Communities, which should meet at the end of March, would be informed of the anxieties expressed both by the Chairman, on behalf of the AAMS, and by Senegal.

7. Definition of the concept of originating products

(a) Adoption of Decision No 43/72 of the Association Council

Following changes in the Brussels Customs Nomenclature, it had been necessary to make alterations to Lists A and C of Decision No 36/71 of the Association Council on the definition of the concept of originating products, for the purpose of giving effect to Title I of the Convention of Association and on the methods of administrative cooperation.

On the basis of work by the Customs Cooperation Committee and on the recommendation of the Association Committee, the Association Council, at its meeting on 10 October 1972, adopted Decision No 43/72 amending Decision No 36/71 to that effect.

(b) Adoption of Decision No 46/73 of the Association Council

In the Declaration contained in Annex I to the Final Act of the Association Agreement concerning the Accession of Mauritius to the Yaoundé Convention, the Contracting Parties agreed that they would, upon signing the Agreement, study the possibility of providing for a period of adaptation, in no case extending beyond 31 December 1974, in order to solve the difficulties resulting, in respect of the export of certain products from Mauritius, from the rules of origin applicable under the Yaoundé Convention.

At its meeting on 15 June 1973, the Association Council adopted, on the basis of a proposal presented by the Community, Decision No 46/73 derogating from the definition of the concept of originating products for 1973 and 1974, in order to take account of the special situation of Mauritius with regard to certain products of the textile industry.

Under this derogation, up to 1250 metric tons of certain textile products manufactured in Mauritius which fall within several tariff headings would in 1973 and in 1974 be considered as originating products. This quota would be spread over the various tariff headings.

It was also laid down that, should the amount fixed for one of the tariff headings referred to in the Decision not be reached during 1973, quantities not used during that year could be carried over to 1974, up to a maximum of 20% of the amount fixed for the same tariff heading.

F. FINANCIAL AND TECHNICAL COOPERATION

1. Definition of the general pattern for financial and technical cooperation

At its meeting on 10 October 1972 the Association Council, on the basis of the work of the Joint Working Party and the Association Committee, adopted a new Resolution defining the general pattern for financial and technical cooperation.

This Resolution was drawn up in the light of reports on the management of financial and technical cooperation for 1970 and 1971 and dealt with three fields which are for various reasons of fundamental importance to the development process, namely training, the upkeep and operation of investments financed by the EDF, and industrialisation. With regard to these points, it supplemented and amplified either the information contained either in the Convention itself or in certain guidelines which had emerged in the course of negotiations.

The main stress in the Resolution is laid on training. Training is adapted to the requirements of development, but should also be adapted to local situations, the objective being to enable the Associated States to have available a sufficient number of qualified executive staff.

Another part of the Resolution deals with the problems encountered by the Associated States in ensuring the upkeep and operation of investments financed by the EDF. The major responsibility for this lies with the recipient States, but the Community stated that it was ready, taking account of the statement which it had made on this matter at the 11th meeting of the Association Council on 22 April 1971, to help them if they encountered special difficulties.

The third part of the Resolution lists certain projects which the Community would be prepared to undertake in the light of the priority needs and requests of the Associated States with a view to promoting their industrialisation.

2. Commission report on the administration of Community financial and technical aid

The report on the administration of financial and technical aid in 1972 was forwarded to the Association Council on 15 June 1973. As the Council was meeting on the same day, it was unable to examine this report and draw its conclusions. It was agreed to include this item on the agenda for its next meeting.

The management report was, as usual, communicated to the Parliamentary Conference of the Association.

3. Account of EDF and EIB commitments

(a) Transactions financed from the European Development Fund (3rd EDF)

On 30 June 1973 the Commission and the Council had made in all 28 decisions to provide finance from the resources of the 3rd EDF, involving a total amount of 564,809,000 UA.

Loans on special terms <sup>(1)</sup>

The Commission of the European Communities and the European Investment Bank as an authorised agent of the European Economic Community, concluded during the period from 1 August 1972 to 30 June 1973 two loan contracts on special terms involving EDF resources totalling 5.7 million UA.

The following should be noted:

- contribution to the improvement of the road infrastructure of a French Overseas Department (Martinique)
- financing of an agro-industrial complex (sugar-mill in Upper Volta).

These new transactions bring to 6 the number of loans on special terms signed since the second Yaoundé Convention, involving a total amount of 12.7 million UA.

---

<sup>(1)</sup> See table A

(b) Transactions involving the European Investment Bank's own resources <sup>(1)</sup>

Between 1 August 1972 and 30 June 1973, the European Investment Bank signed 3 loan contracts from its own resources for an amount of 4.9 million UA.

The following should be noted:

- intervention on behalf of an economic infrastructure project in countries which can afford such financing with a reduced rate of interest on EDF resources
- a further transaction in support of the tourist sector, which had already received a loan from the Bank in 1971
- the continuation of the traditional transactions of the Bank in support of the industrial sector
- the 3 ordinary loans from the Bank were made at reduced rates of interest, 2 of these being granted at a flat rate and one by the "case by case" procedure.

---

(<sup>1</sup>) See table B

On 30 June 1973 the European Investment Bank had signed 9 ordinary loan contracts from its own resources for a total of 36.6 million UA under the 2nd Yaoundé Convention.

Of the total amount of loans signed on 30 June 1973, nearly 72% were for industrial schemes in the wider meaning of the term, 21% for infrastructure, and more than 7% for tourism.

On 30 June 1973 a certain number of loans on special terms, contributions from EDF resources to the raising of risk capital and loans involving the European Investment Bank's own resources were on the point of being concluded.

TABLE A

## LOANS ON SPECIAL TERMS FROM EUROPEAN DEVELOPMENT FUNDS

Current situation as regards loans underwritten during the period 1.8.1972 to 30.6.1973

Country	Name of project	Sector	Aim	Amount of loan (MUA)	Total cost (MUA)	Financial conditions		
						Length (years)	Deferred (years)	Rate of interest
1972 Republic of Upper Volta	SOSUEV (2) (Société Soudanaise de Cultures Volantines)	Agro-industrial complex	A sugar cane plantation of 2,250 ha and the construction of a sugarmill-refinery with a capacity of 20,000 metric tons of refined sugar per year at Banfora	5.04	18.00	24	10	7%
French department of Martinique	RS 2 (1)	Road infrastructure	Straightening and widening of Route Nationale 2 which links Port-de-France to Saint-Pierre over a stretch of 5.7 km	0.63	2.70	25	5	3%
TOTAL	2 Projects	///	///	5.67	20.70	///	///	///

(\*) Loans on special terms from EDF funds which formed the subject to a decision by the Commission to provide finance subsequent to :

(1) favourable opinion from the EIB

(2) instructions from the EIB in consultation with the Commission.

ORDINARY LOANS FROM THE EUROPEAN INVESTMENT BANK'S OWN FUNDS UNDER THE SECOND YAOUNDE ASSOCIATION AGREEMENT

TABLE B

Current situation as regards loans underwritten during the period 1.8.1972 to 30.6.1972

Country	Name of project	Sector	Aim	Amount of loan (MUA)	Total cost (MUA)	Financial Conditions		
						Length (years)	Rate of Interest (%)	Rebate
<u>1972</u> Republics of the Ivory Coast and the Upper Volta	HAN II (Abidjan-Cote d'Ivoire State railways)	Railway infrastructure	Renewal and increase of the rolling and service stock	3.00	8.77	14	5 3/4 %	2% (2)

(1) After deduction of the interest rebate where appropriate  
 (2) Standard rate rebate (Art. 7 (1)(b) and (1)(c) of the Internal Agreement)  
 (3) Rebate granted according to the "case by case" procedure

H. OTHER PROBLEMS

- The plight of the Sahel countries suffering from drought

At the Association Council meeting on 15 June 1973, the AAMS first of all expressed their gratitude for the efforts of the Member States of the European Economic Community, under the Yaoundé Convention or on a bilateral basis, to assist the Sahel countries suffering from drought.

The hope engendered by the display of international solidarity in saving what could be saved, together with the knowledge that the countries concerned could not themselves carry out the rebuilding of their ravaged economies within a reasonable time, had led the Associated States to turn to the Member States of the EEC so that steps could be taken forthwith on a multilateral and bilateral basis to rebuild the economies of the Associated States concerned.

The Associated States were of the opinion that since these measures came under the heading of reconstruction rather than development, they must be financed from other sources in addition to the European Development Fund if rescue operations were to be large enough.

The Associated States therefore asked that the problems be tackled on an overall basis, particularly in the following fields.

1. Restocking with and improvement of livestock.
2. Development of stock-farming areas through the conservation and creation of grazing, ensuring the progressive and necessary settlement of the nomads of the regions concerned.
3. Increasing agricultural production in irrigated areas by construction of dams, reservoirs, pools, wells, etc.
4. Re-afforestation to halt the progressive encroachment of the desert on the regions concerned.
5. Implementation of a system which will induce artificial rain in order to prevent pockets of drought (seeding of clouds).

The Associated States expressed the hope that the Community would bear in mind the urgency and seriousness of the problem and would give effective support to the Associated States concerned.

The Community noted the operations undertaken by it and the Member States to help the countries concerned both with regard to food aid and EDF operations. It emphasised that the projects themselves would only achieve their full usefulness if effective coordination were ensured and the will of the governments involved were clearly expressed.
