COM(75)601 provisional

Brussels,

PART III

THE AGRICULTURAL SITUATION IN THE COMMUNITY

1975 REPORT

Part III - Annex

COM(75)601 provisional

The statistical information in this report is based mainly on data supplied by the Statistical Office of the European Communities, brought up to date and elaborated in the Directorate-General for Agriculture.

The number of comparative figures is relatively high in order to meet the requirement for a description of the development of the Common Agricultural Policy. For complete series of statistics the reader should refer to the "Yearbook of Agricultural Statistics" and other publications of EUROSTAT.

NOTICE TO THE READER

In these tables the decimal point appears as a comma, and the point is used where English practice would require a comma. This saves retyping the figures, which were initially prepared in accordance with Continental practice in the matter.

Source: EUROSTAT on the basis of national figures. For the annual indices of input prices: SOEC, Agricultural Statistics.

¹ The annual indices of input prices for 1968-74 have been calculated on the basis of SOEC agricultural economic statistics. They relate to the price deflators for intermediate consumption and the price of machinery and farm buildings. Where the statistics are available, the prices of machinery and farm buildings have been replaced by the price deflators for gross fixed capital formation. The indices relate to calendar years.

² Marketing year 1970 = 1970/71 etc.

- 1 For the complete series of fixed prices see Table I.7/10 p. 28 et seq. in the 1973 Report on the situation in agriculture Doc. COM(73)1850 final, Annexes, Part III.
- 2 In 1967/68 intervention prices were different for Arles (123,00 u.a./m.t.) and Vercelli (120,00 u.a./m.t.); thereafter intervention prices were identical. From 1971/72, a threshold price was fixed for round grained husked rice. Since 1972/73 the target price for husked rice and the intervention price for paddy rice have been fixed at the same time.
- 3 On 2 October 1974, the guide price was first fixed for soya for the 1974/75 marketing year which begins on 1 November.
- 4 Basic and buying-in prices fixed for fruit and vegetables since 1967/68, for the first time in January 1967 and thereafter in terms of the beginning of the marketing year for each product. Since April 1973, prices for fruit and vegetables have been fixed at the same time as for all the other agricultural products.
- 5 Since so many prices have been fixed, they are not all included here (prices in the fruit and vegetable sector for cauliflowers, tomatoes, sweet oranges, mandarins, lemons, table grapes, apples, pears, peaches; the nineteen varieties of tobacco, prices and premiums which relate to the harvest of the calendar year; there are different categories of prices for the numerous fishery products for which the marketing year is the calendar year).
- 6 The price of 735 u.a./m.t. was valid from 1 July 1967 to 31 July 1968 and the price of 750 u.a./m.t. from 1 August to 31 October 1968. The price of 930 u.a./m.t. was not applied owing to the general increase in prices on 7 October 1974. The price of 1.060 u.a./m.t. is valid from 1 August 1975 to 31 October 1976.
- 7 1966/67 for olive oil, 1971/72 for cottonseed, from 1 February to 31 December 1971 for fishery products, 1972/73 for seeds, hops and silkworms, 1974/75 for dehydrated fodder.

¹In effect from 7 October 1974.

²Identical compensatory amounts for the three new Member States, respectively:

	1972/73	1973/74	1974/75	1975/76	1972/73	1973/74	1974/75	1975/76

Paddy rice	79,00	65,33	59,58	49,16	91,50	75,63	68,18	55,84

³Aid granted to the producer is equal to the difference between the target price and the world market price. For seeds harvested in the UK, this aid has been reduced by a compensatory amount equal to 60,30 u.a./m.t., and in Denmark to 13,80 u.a./m.t. in 1972/73

51,40	11,50	1973/74
44,30	10,10	1974/75
36,90	8,50	1975/76

⁴Theoretical prices at the beginning of the marketing year: for the UK and Ireland, prices are based on the highest derived intervention prices.

⁵Prices differentiated according to variety and product. The accession compensatory amounts for fruit and vegetables were finally fixed in January 1973 and are to be reduced by 20% each year during the period 1974 to 1978.

⁶For milk products the prices are valid from the beginning of the marketing year until 15 September 1975 and from 16 September 1975 until the end of the marketing year. For pigmeat 1975/76 prices applied from 1 August 1975 until 31 October 1975.

⁷Price of butter in Denmark aligned with common price from 1 January 1975.

⁸From January 1974 total abolition of compensatory amounts in the fishery sector.

Footnotes to Table E/3.1

¹At national level:

- aid and interest subsidies provided for in the agricultural budgets of the Member States, of the Länder and of the Italian autonomous regions, (Italy: the last figures available for the structural and general measures date back to 1971);
- parafiscal charges levied in France, Germany, the Netherlands and Denmark;
- reduction of tax on agricultural fuel.

At Community level:

- actual expenditure of the European Guidance and Guarantee Fund (EAGGF); estimates for 1975.

²Market support:

Market support expenditure not eligible under the EAGGF (administrative expenditure of intervention agencies, costs of intervention, buying-in and storage in excess of the regulation amount; support expenditure for products not subject to a common market organization); special compensation for beef and veal in Belgium.

³Structural measures:

Early retirement from farming, investments at farm level, market structures, infrastructure, rural public services, forests, national share in expenditure on common projects under directives on the modernization of agricultural structures.

⁴Miscellaneous measures:

- Measures to direct and develop certain lines of production;
- veterinary and plant health measures, - control of quality and variety, - lowering of the price of certain inputs (fuels, fertilizers), - natural disasters;
- compensation for loss of income caused by the revaluation of the DM granted by the Federal Republic of Germany to farmers either by budgetary means or by rebates on VAT (only VAT rebates as from 1974);
- the revaluation of the guilder (1974);
- special compensation for incomes in France and Luxembourg 1974/1975.

- ⁵Aid, transfers and charges allocated for the award of old-age pensions, family allowances, sickness payments, compensation for accidents to farmers and family helpers.
Actual expenditure for 1973 and 1974 - estimates for 1974/75.

Footnotes to Table E/3.1 (contd)

⁶Market intervention, export refunds, monetary compensatory amounts in intra-Community trade, and accession compensatory amounts in intra-Community trade. Actual expenditure for 1973 and 1974 - estimates for 1975.

The calculation of the trend of support expenditure should be used with caution. Actual expenditure for one budget year often extends over two or more budget years; it is therefore difficult to assess the actual extent to which expenditure has increased from one year to the next.

- ⁷ - individual projects for the improvement of agricultural structures (Council Regulation No 17/64/EEC of 5 February 1964);
- launching of common measures in implementation of the directives on the modernization of agricultural structures;
 - special measures such as financial compensation, payment of the costs of certain agricultural disasters, aid to fruit and vegetable producer groups; aid granted for 1973 and 1974 and forecast for 1975.

NB. Expenditure on agricultural training and advisory services and on agricultural research is not shown.

By and large the operational expenditure of the Ministries for Agriculture has not been taken into account. It should be noted, however, that some countries include in programme expenditure the share of the operational expenditure of the Ministries for Agriculture incurred in connection with these programmes. Other countries have not included this expenditure.
