- VII Proportion of translated documents intended for publication in 11 languages
- VIII Effects of enlargement on the volume of translation work and contributions

FOREWORD

By Ms C. Flesch, Chairman of the Management Board

1998 was a landmark year in the Centre's development. The number of pages translated rose to almost 200 000 – an increase of 77 000 compared with 1997. This growth clearly vindicates the decision to create a specialised translation body. This is not only evident from the figures for pages translated, but also by the growth in the number of the Centre's partners.

The new cooperation agreements signed in 1998 are in keeping with continued pursuit of the objective set by the Centre's founding regulation, which states that the Centre should provide the necessary translation services for the operation of the decentralized agencies and offices and that the institutions and bodies which already have their own translation services may call on the Centre's services.

1998 was further distinguished by the adoption of a series of measures enabling the Centre to adjust its structure to meet demand. Much work was done to increase both its human and technical resources.

The intention of the Centre's 1999 Work Programme is to consolidate and build on this experience. This essentially involves strengthening, or even extending, the partnerships already developed and focusing further on the area of interinstitutional cooperation.

In the short term (1999-2003), the Centre will also be faced with the linguistic implications of future accessions to the European Union. Although many matters are yet to be clarified, one thing is certain: new languages will be joining those already in use today. At present, the European Union operates on the principle of equality of its 11 official languages, which are also working languages. Tomorrow's Union will undoubtedly maintain this principle of multilinguism, since it springs from the right of all citizens to have access, in their own language, to the laws, regulations and other texts which govern their lives.

hund

REPORT ON THE ACTIVITIES OF THE TRANSLATION CENTRE IN 1998

I.INTRODUCTION

1998 marked the end of the start-up period for the Translation Centre, which, in accordance with Article 10(2)(c) of Council Regulation (EC) No. 2965/94 of 28 November 1994 as amended by Council Regulation (EC) No. 2610/95 of 30 October 1995, was not to exceed more than three budgetary periods. Whilst the Centre actually came into operation in October 1995, as was clear from the figures for budget implementation presented to the Management Board at the time, the budget drawn up and approved for the year covered a full financial year, i.e. 12 months. The high degree of dedication and professionalism shown by all members of the Translation Centre staff and the administrative bodies between 1996 and 1997 have since made it possible to catch up on the initial backlog. The change in the method for calculating revenue laid down in the Centre's Basic Regulation could therefore be implemented at the beginning of 1998. The principle of a lump sum contribution which had hitherto been applied was abandoned in favour of an estimate subsequently adjusted in the light of the work actually performed for each decentralised body. This, de facto, brought to a conclusion the start-up period for the Translation Centre.

II. ACTIVITIES OF THE MANAGEMENT BOARD OF THE CENTRE

The Centre's Management Board met twice in 1998. The key issues at the first meeting, which took place on 31 March 1998, were as follows:

1) Court of Auditors' Report on the Financial Statements for 1995 and 1996

The Management Board examined in detail the report presented by the Court of Auditors on the financial statements of the Translation Centre for 1995 and 1996, published in Official Journal C 393/97 of 29 December 1997. The Management Board took on board the observations of the Court of Auditors on the implementation of the budget and the fact that:

"The financial statements for the financial years 1995 and 1996 were reliable and, on the whole, the legality and regularity of the underlying transactions were guaranteed".

The Management Board also noted that, according to this audit report, the final outcome for the two financial years concerned was as follows:

	1995	1996	
Expenditure Title I, Staff	574	2 060	ecu '000
Expenditure Title II, buildings, equipment,etc.	397	726	u
Total expenditure	971	2 786	и
Volume of translations	19 592	40 347	(Pages) (1)
Final cost per page	49.6	69.0	(ecu)

⁽¹⁾ These figures do not include pages translated for the Centre's Management Board.

The Management Board therefore instructed the Centre's Director to proceed to settle definitively the accounts for each of the agencies, offices and bodies served by the Centre for the financial years in question on the basis of the work actually undertaken and the prices thus established. Finally, the Management Board approved the management of the accounts and granted discharge to the Director for the implementation of the budgets for 1995 and 1996.

2) The Report on the Activities of the Centre in 1997 and the Work Programme for 1998

Both these documents were presented to the Management Board by the Centre's Director and approved following discussion and clarification of certain details relating to potential developments and the policy to be followed in the medium term for the future activities of the Centre.

3) Seat of the Translation Centre

The Director described the existing situation with regard to the offices occupied by the Translation Centre and future requirements in the light of the Work Programme approved by the Management Board. Given the obvious limitations and failings of the premises currently occupied by the Centre, the Management Board felt that alternatives should be examined with a view to the Centre acquiring a permanent seat which would enable it to operate smoothly in the medium and long term. In this regard, the property market in the host State had first to be investigated and, secondly, negotiations would have to be instituted with the national authorities and the European Parliament.

Finally, representatives of the Chamber of Commerce of the Grand Duchy of Luxembourg presented a building project which might meet the Centre's requirements. The Management Board took due note of this project but decided to continue to examine other alternatives at future meetings.

4) Preliminary draft budget for 1999

The Management Board considered this document, which highlighted the following concrete trends for the subsequent year:

Estimated total revenue and expenditure 14 162 000 ecu

Volume of translations 179 300 pages

Estimated cost per page 79 ecu

Staff 131 Persons

5) Draft Regulation prepared by the Working Group on Security and Confidentiality

Mr McCluskey, the Commission representative and Chairman of this Working Group, outlined a new draft Regulation based on the observations and suggestions made earlier by the Management Board. The Management Board examined the new draft in detail and it was approved subject to certain amendments, and pending clarification by the Commission legal service of a number of issues of a legal nature.

The ninth meeting of the Centre's Management Board took place on 26 October 1998 and dealt, inter alia, with the following issues:

1) Seat of the Translation Centre

Mr Berns, the Luxembourg representative, explained to the Management Board the principles underlying the Luxembourg Government's policy on property with respect to European Union institutions and bodies located in the Grand Duchy and reiterated that it was the Luxembourg authorities' intention to continue to support the Translation Centre, both as regards its interim seat and in its search for permanent premises. He went on to present a new real estate project, the architectural and financial details of which had not however been completely finalised. Ms Theato, the European Parliament representative, pointed out that before any definitive solution could be adopted, it would have to be approved by the budgetary authority and meet certain criteria as regards suitability and viability in the long term. The Management Board would continue to discuss this matter at its forthcoming meetings.

2) New invoicing method

The Technical Working Group set up by the Management Board, which comprised representatives of the decentralised agencies and offices and of the Translation Centre and was chaired by Ms Schurings (European Training Foundation — Turin), provided an overview of the preparatory work undertaken for the introduction of the new invoicing method for work undertaken by the Translation Centre which would encompass the provision of services other than translation (terminology, standardisation, etc.) and reflect the deadlines set (scheduled work, urgent documents, etc.). The final report and a concrete proposal would be presented to the Management Board shortly.

3) Supplementary and amending budget for 1998 and draft budget for 1999

Following negotiations with the European Parliament on the resources required to start up the inter-institutional activities set out in the Work Programme, the Centre was allocated a sum of ecu 450 000 for 1998 by the budgetary authority. This addition to the initial budget, and other changes of a minor nature to the contributions made by various agencies, offices and bodies served by the Centre, meant that a supplementary and amending budget of ecu 466 000 had to be drawn up and submitted to the Management Board. This was approved following discussion.

Once the amendments submitted by the Centre's customer agencies and bodies and other members of the Management Board had been introduced, the draft budget for 1999 was approved. The figures were the following:

Estimated total revenue and expenditure 13 602 000 EUR

Volume of translations 172 200 pages

Estimated cost per page 79 EUR

Staff 131 persons

4) Draft Regulation on the Electronic Transmission of Confidential Data

Following clarification of certain details of a legal nature in the draft Regulation on Security and Confidentiality and its approval by the Management Board, this document would be submitted to the Advisory Committee on Security, as laid down in Commission Decision no. C (94) 3282 of 30 November 1994 on security measures applicable to classified information produced or transmitted in connection with the activities of the European Union. Before bringing its work to a close, the Working Group chaired by Mr McCluskey expressed the view that the aforementioned draft should be supplemented by a proposal on the additional protection measures required for computer-aided or electronic transmission. This supplementary text was presented to the Management Board for discussion.

5) Timetable of calls for tender by the Translation Centre

The Management Board was informed by the Director of the Centre's intention to publish a series of specialised calls for tender in the course of 1999 for translation services, to provide it with a sufficient number of skilled specialist translators and translation agencies to satisfy the needs of its customers in terms of quality and speed. These calls for tender would be published in the Official Journal of the European Communities as and when the Centre's Advisory Committee on Procurements and Contracts (ACPC) completed the preparatory work.

III. MANAGEMENT REPORT

A)Staff

The number of staff employed by the Translation Centre increased significantly in 1998, in line with the growth in the workload, rising to a total of 104 persons (see the attached Establishment Plan and Organisational Chart).

Elections for staff representatives were held on 28 January 1998. On the basis of the number of votes received by each of the candidates and the statutory requirement for all groups and categories to be represented, the Translation Centre Staff Committee was established on 4 February 1998. It was composed of the following persons:

Function	Representative	Alternates
Chair .	Monique GRÖSSL	Barbara HESS
Deputy	Rebecca WEST	Carole LITKOWSKI
Secretary	Marc MARECHAL	Louis VAQUIN
Member	Marcus ANGIONI	Margaret WARTON-WOODS
Member	Pascal DUFOUR	Julie NOYAU

The first meeting between management representatives and the Staff Committee convened on 6 February 1998 and dealt with the statutory procedures for social dialogue. Both parties agreed that relations should be flexible and open, and that there should be no restrictions as to the matters to be raised now or in the future. Meetings and informal contacts between both parties have taken place in a spirit of openness and cooperation. At present, the Staff Committee is represented on the Centre's Staff Recruitment Selection Boards. A list of the selection procedures carried out in 1998 is annexed to this Report, together with a comprehensive list of regradings and contract renewals which took place in 1998.

B)Operations

The volume of work expressed in number of pages translated continued to rise in 1998 as compared with previous years.

Year	Total pp	ΔPp	Δ %
1995 1996 1997 1998	20 204 40 899 122 106 199 118	+ 20 695 + 81 207 + 77 012	+ 102.4 + 198.6 + 63.1

These figures show that whilst the volume of work increased considerably, the trend levelled out in 1998, both as a percentage and in terms of absolute figures. To provide a clearer picture, a distinction must be made between trade mark translation and the translation of documents, as can be seen from the table below.

Year	Pp trade marks	Pp docs	Total pp
1995	_	20 204	20 204
1996	4 851	36 048	40 899
1997	80 126	41 980	122 106
1998	155 440	43 678	199 118
	j		

From these figures, it can be seen that whilst the total number of pages increased by 81 207 in 1997, the vast majority of these - 75 275 - related to the translation of trade marks for the OHIM in Alicante, which began publication of its Trade Mark Bulletin that same year. Virtually the same situation arose in 1998, in that 75 314 pages out of a total increase of 77 012, i.e. a figure very similar to that of the previous year, were again attributable to trade mark translation for the OHIM in Alicante, the total volume of which almost doubled in 1998. This highlights the efforts made by the Translation Centre to meet the OHIM's demands as regards this type of translation which is particularly exacting because of both its complexity and the stringent requirements imposed as to deadlines and quality.

As regards the translation of documents, the figures, whilst less dramatic, are also positive, showing a steady increase in volume. In this context, it is interesting to note that whilst the demand for translation from some decentralised agencies, bodies and institutions has declined (the European Foundation for the Improvement of Living and Working Conditions (EFIL) in Dublin, the European Agency for the Evaluation of Medicinal Products (EMEA) in London, the European Training Foundation (ETF) in Turin, the European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) in Lisbon), the volume of translation has increased for others (the European Agency for Safety and Health at Work (EASH) in Bilbao, the Court of Auditors, European Centre for the Development of Vocational Training (CEDEFOP) in Thessaloniki, EUROPOL, the European Environment Agency (EEA) in Copenhagen, the European Central Bank, the Community Plant Variety Office (CPVO) in Angers and the Office for Harmonization in the Internal Market (OHIM) in Alicante). This change in the pattern of demand over the year is also apparent from the quarterly figures for translation requests, which bear out, firstly, the declining trend in the volume of trademark translation (although the total for the year was almost double that of the previous year) and, secondly, a clear increase, in both absolute terms and as a percentage, in the volume of documents to be translated. It should be remembered, in this context, that a gradual decline in trademark translation had been anticipated once the OHIM caught up with the initial backlog in processing trademark applications. This again confirms the benefits of centralising translation resources in order to even out the inevitable fluctuations in demand due to differences in the policies and work programmes pursued by the decentralised agencies, offices and bodies of the European Union.

A breakdown of translation work undertaken by the Centre for all the European Union bodies, agencies, offices and institutions is provided in the statistical annex at the end of this report. This annex also contains a breakdown by language and other interesting data.

Of the total translation work undertaken, about half was handled by the freelance sector, reflecting a considerable increase in 1998.

Year	FL pages	Difference
1995	13 620	-
1996	26 927	+ 13 307
1997	75 669	+ 48 742
1998	89 656	+ 13 987

At the same time, greater resources, in terms of both staff and equipment, were required to deal with this workload, with a call for tender for trademark translation being issued in addition to the day-to-day activities of the Centre. This represented a major departure from the normal procedure for calls for tender for freelance services, both as regards the administrative and financial aspects (calculation of deadlines and prices, introduction of penalties) and in technical and linguistic terms (with the requirement for translation into more than one language and the obligation to use the Translators Workbench application, which in turn required the necessary licences to be obtained and the appropriate training to be provided). This highly complex and innovative call for tender provided the Centre with valuable experience for the future, on which it can base the new series of calls for tender to be launched in 1999.

11

It should also be pointed out that in April 1998 the Centre concluded more than 600 service contracts establishing direct contractual relationships with other freelance translators and agencies, rather than passing through the European Commission, as had been the case in the past. These contracts govern not only the legal and financial aspects of the relationships with the Centre but also the technical and linguistic assistance (provision of reference documents and glossaries or lists of terms, access to databases, etc.) which the Centre offers to service providers with a view to ensuring that the Centre's customers are provided with the level of quality they require.

Lastly, the Centre's Freelance Section launched a quarterly newsletter in mid-1998, aimed at agencies and individual translators working for the Centre and other interested persons or companies involved in translation within European institutions and in the private sector. Through these newsletters, the Centre hopes to establish good working relations with all those involved in translation not just for the Centre but also for the other European Union institutions and bodies.

With regard to standardisation work, the focus, in the first half of 1998, was primarily on support for trademark translation, leading to the installation of the Translator's Workbench application and its customisation to the Centre's computer configuration. At the same time, the Centre organised training courses for more than 70 in-house users and freelance translators. The work on the specialised calls for tenders for trademark translation came to an end and the corresponding contracts were concluded in May. Following the creation, duplication and transmission of the necessary databases to all those awarded the new contracts and once the technical problems initially encountered had been resolved, the translation of Community trademarks entered into a more structured and predictable phase.

In the latter half of the year, following the recruitment of additional staff, the Standardisation Section was able to begin work on a series of new in-house and external activities. With regard to in-house projects, this involved the consolidation and expansion of the Centre's terminological resources, extension of the Translator's Workbench application to the translation of certain documents (other than trademarks) and migration to a new version of this software. With regard to external activities, the Centre was commissioned by the Interinstitutional Translation Committee, via the Sub-Committee on Terminology and Document Flow, to carry out a feasibility study on the creation of an interinstitutional terminological database to consolidate the current panoply of different (and in some cases almost incompatible) terminological resources created and managed separately by each of the European Union institutions. This project, for which the European Parliament has released the necessary financial resources, is an ambitious one and will call for the cooperation of the translation services in all the institutions.

In 1998, the Translation Centre concluded cooperation agreements with the European Monitoring Centre on Racism and Xenophobia (EMCRX) in Vienna, the General Secretariat of the Council of the European Union and Directorate-General VII for Transport of the European Commission. The EMCRX in Vienna is the latest decentralised agency of the European Union, having started up in 1998.

_

12

As regards the agreements concluded with the Council and the Commission, these fall within the framework of interinstitutional cooperation in the field of translation and confirm the forecasts made in the Centre's 1998 Work Programme. In both cases, the figures for translation in this first year of cooperation are modest, but the Centre is convinced that the volume will increase, as has been the case with the Court of Auditors, in the coming years.

C)Advisory Committee on Procurements and Contracts

In 1998, there were two changes to the Centre's Advisory Committee on Procurements and Contracts (ACPC), with the addition of Mr F. NICOLAS, the Centre's Accounting Officer, and Ms N. LAMBORAY-GUERIN, the Legal Affairs Officer, as new members. It should be remembered that it was thanks to the support and assistance of the Commission Legal Service that the Centre's ACPC could be set up and convened in 1997. The Translation Centre would like to take this opportunity to thank once again members of the Legal Service of the European Commission for the help they provided, not only within the context of the ACPC, but also with other important matters of a legal nature.

In the course of 1998, the Centre's ACPC delivered 10 favourable opinions, eight relating to the use by the Centre of framework contracts or lists drawn up by other European institutions (in practice, those of the European Parliament and the Commission), one on the call for tender for trademark translation and the last on the conclusion by private treaty of a contract for the installation of a computerised budget and accounting system (SI2), supplied by the European Commission and developed and coordinated by the ETF in Turin for a series of European Union decentralised agencies, offices and bodies with similar requirements in this area. In addition to issuing these formal opinions, the ACPC examined a whole series of matters with a view to providing advice and guidance to various of the Centre's departments in drawing up calls for tender and contracts. This was the case, inter alia, with the lease for the Centre's temporary seat, the method for ensuring quality control of external translation services, the introduction of penalties for failure to comply with deadlines and the arbitration clause provided for in Article 181 of the Treaty.

IV.ANALYSIS OF FINANCIAL MANAGEMENT

The volume of translation work was 199 118 pages, which was very close to the initial estimate of 197 301 pages.

In total 197 337 pages were invoiced to the Centre's customers. The total amount invoiced for translation work was ECU 14 906 011 and ECU 120 900 for terminology work, i.e. an overall total of ECU 15 026 911 (95.8% of the figure given in budget forecasts).

Revenue amounted to ECU 14 987 864 and expenditure to ECU 12 837 800, i.e. 4.4% and 18% respectively below budget estimates.

The average cost per page was ECU 65.1, i.e. 14% below the figure of ECU 76 per page used in drawing up the 1998 budget adopted by the Management Board.

The difference is a reflection, firstly, of the appointment of a number of new temporary staff members towards the end of the year and, secondly, of a very significant improvement in cost-effectiveness achieved by the Centre, in accordance with the principle of sound financial management laid down in Article 2 of the Financial Regulation.

Revenue

The 1998 budget provided for contributions from the bodies served by the Centre totalling ECU 15 604 000. Established entitlements came to ECU 15 026 911, i.e. 96.3% of the figure anticipated.

At the end of the financial year, ECU 1 072 117 had still to be recovered and advances from the bodies concerned amounted to ECU 2 843 316. In 1998, the Centre collected all established entitlements brought forward from the previous year, amounting to ECU 788 439.

Expenditure

Appropriations for the year

DESCRIPTION	ECU	%
Appropriations for the year	15 679 000.00	100
Commitments entered into	12 837 800.03	82
Payments made	10 376 914,41	66
Appropriations to be carried over automatically	2 460 884.22	15
Appropriations cancelled	2 841 199.97	18

Remarks

Title 1: Staff

DESCRIPTION	ECU	%
Appropriations for the year	13 162 800.00	100
Commitments entered into	10 781 270.81	82
Payments made	9 702 398.97	74
Appropriations carried over	1 078 871.01	8
Appropriations cancelled	2 381 529.19	18

The Centre's establishment plan for 1998 provided for a total of 112 members of staff, representing an increase of 64 as compared with 1997. Of the posts occupied at 31 December 1998, 87 were filled by temporary staff, 15 by auxiliary staff and two by experts on a contract basis.

The unexpended appropriations were due to the fact that most of the appointments were taken up in the last guarter of 1998.

The average number of auxiliary staff was 28, at a total cost of ECU 1 770 779.29. Most of these were appointed as language experts for the revision of trademarks. Following the selection procedure held by the Centre in October, ten LA-category temporary staff were recruited.

Item 1174: External translation services

Of the ECU 5 316 000 allocation for this item, 90% was used. In total, 89 656 pages were sent for external translation.

Title 2: Buildings, equipment and miscellaneous operating expenditure

DESCRIPTION	ECU	%
Appropriations for the year	2 491 200.00	100
Commitments entered into	2 056 529.22	82.6
Payments made	674 515.44	32.8
Appropriations carried over	1 382 013.21	67.2
Appropriations cancelled	434 670.78	17.4

The appropriations carried over related, for the most part, to contracts for the purchase of equipment and the hiring of outside computer staff which were still outstanding at the end of the year.

The cancelled appropriations reflected the fact that expenditure on the fitting out of the premises, publications, meetings and telecommunications was lower than expected.

Appropriations automatically carried over from 1997 to 1998

DESCRIPTION	ECU	%
Appropriations carried over	3 007 279.12	100
Payments made	2 127 370.07	71
Appropriations cancelled	879 909.05	29

The appropriations automatically carried over from 1997 which did not give rise to payments in 1998 represented, for the most part, sums put aside for the payment of external translation services and translation provided by the European Commission.

Details of the balance for the financial year

DESCRIPTION	ECU
+ Appropriations cancelled in 1998	2 841 199.97
+ Appropriations carried over from 1997 and subsequently cancelled	879 909.05
+ Cancelled appropriations for re-use	3 288.80
+ Exchange rate gains	19 370.48
- Exchange rate losses	3 847.60
- Recovery below that forecast	691 136.00
Balance for the financial year	3 048 787.43

1999 WORK PROGRAMME AND MEDIUM-TERM STRATEGY FOR THE TRANSLATION CENTRE

I. INTRODUCTION

While 1998 was the first full year of operation following the end of the three-year start-up period laid down in the Translation Centre's founding regulation, 1999 will be the Centre's year of consolidation, especially in the area of interinstitutional cooperation. The Centre actually began translating for the decentralized agencies when it was set up in 1995. Its activities developed satisfactorily over the subsequent years in line with the policies and priorities set at the time by the Management Board, based on the view that, since the newly-created agencies had no translation services of their own, it was absolutely essential to provide them with an external service to enable them to develop their work programmes in a satisfactory manner. Once this initial aim had been achieved, the Translation Centre, in accordance with the provisions of Article 2 (3) of its founding regulation, established its first contacts with the EU institutions and bodies which already had their own translation services as early as in 1997, to examine the conditions under which they could have recourse to the Centre's services. These discussions led to the signing in 1998 of contracts with some of those institutions, as indicated in the report on the Centre's activities.

II. OPERATIONS

1) Decentralized agencies, offices and bodies

Annex I shows a full list of agencies, offices, bodies and institutions of the European Union served by the Translation Centre. In 1999 the Centre will have to negotiate the renewal of cooperation agreements with the following agencies:

January: European Monitoring Centre on Racism and Xenophobia – Vienna

- April: European Monitoring Centre for Drugs and Drug Addiction – Lisbon

September: European Environment Agency – Copenhagen

European Training Foundation – Turin

European Police Office (Europol) – The Hague

- October: Community Plant Varieties Office - Angers

European Agency for Safety and Health at Work - Bilbao

At the same time, the Centre will remain alert to proposals to set up new decentralized agencies with a view to offering its services.

2) European Union Institutions

All the cooperation agreements signed with the institutions mentioned at Annex I will have to be renegotiated since they were initially concluded for one year only. To this end, the Centre has already initiated dialogue with all of these institutions. In addition, it intends to pursue the negotiations underway with the Court of Justice and the Committee of the Regions, which progressed positively, but inconclusively, in 1998.

3) Interinstitutional Committee on Translation

Throughout 1998, the Translation Centre took part in all the activities of the Interinstitutional Committee on Translation, while at the same time chairing the Sub-Committee on External Translation. The Centre will continue to act as chair in 1999, with the objective of drafting a model contract for the provision of translation services which could be used by all the institutions of the European Union. It will also continue to be represented on all the other sub-committees.

For its part, the Sub-Committee on Terminology has asked the Translation Centre to examine the feasibility of setting up an interinstitutional terminology database. This study is already underway and it is expected that preliminary conclusions, together with concrete proposals, will be available before the summer.

Finally, and also in the context of interinstitutional cooperation, the Centre will continue with its project for the translation and publication of the "Joint Aviation Requirements", in conjunction with the Commission's Directorate-General VII and the Office for Official Publications of the European Communities. It should be stressed that this is a project of considerable magnitude involving the aviation authorities of the Member States; its purpose is to pave the way for agreement at Community level on the standards to be met by technical equipment installed in aircraft for civil use.

4) Freelance Translation

The principal task of the Centre's Freelance Section in 1999 will be to organize a series of calls for tender (see list at Annex II). In total there will be three calls for tender for the highly specialized translation of texts in the fields of medicine, the environment and aviation, and a further 22 of a more general nature, covering translation relating to:

- education, vocational training, living and working conditions, social and cultural matters; and
- legal and financial matters.

The experience gained in 1998 with the call for tender for the translation of Community trademarks will enable the Centre to establish more targeted selection criteria to ensure that companies and individuals ultimately awarded contracts provide a high level of quality. As regards the translation of trademarks, the contracts signed in 1998 will for the most part be renewed. There will be a small number of exceptions, where the tenderers who were successful in 1998 have shown themselves to be unable to maintain the quality of service required; where this is the case, the new contracts will be awarded to those who ranked second in the initial award.

In addition, the Centre intends to continue a number of projects started in 1998, such as the quarterly newsletter, the drafting of a vade mecum for freelance translation, the development of a database for the management of freelance resources and a project to provide external translators with access to electronic translation tools.

5) Standardization

As regards terminology, the Centre will start work on the creation of its own terminology database in 1999. This will include training for all the translators on the use of electronic search engines and the creation of datafiles using the databases of the various Community institutions as well as the Internet. In addition, the Centre will upgrade its existing electronic tools to handle the compilation and distribution of specialist glossaries and terminology lists to support and improve the efficiency of translators. The Centre also expects to complete its work on the creation of its own website, which will enable it to offer on-line access to its terminology databases.

As regards computer-assisted translation, the Centre will, in the course of 1999, extend the licensing of the Translator's Workbench programme, currently used by its own translators and those translating trademarks, to include external translators working on all types of documents. This will mean a substantial increase in the number of users. At the same time, and with a view to overcoming the technical and capacity limitations of this system, the Centre will step up its use of SYSTRAN and publish a call for tender for a computer-assisted translation system with integrated database and document-flow management. The Centre will then select the system most appropriate to its needs.

6) General Administration, Finance and Personnel

To cope with the increase in tasks and functions assigned to it, the General Administration, Finance and Personnel Department also grew steadily over the course of 1998, from a team of seven at the start of the year to 12 at the end. This consolidation of the Centre's administrative complement is expected to continue in 1999, finally completing the three sections which make up the department.

The essential tasks of the General Administration Section will be as follows:

- determination of policy on office accommodation, both in the short term (the search for provisional solutions to the lack of office space in the building currently occupied) and in the long term (final location);
- definition of an integrated inventory system which uses bar codes for the identification and checking of stock;
- improvement of the stock management system and the ordering of office equipment and other supplies;
- improvement of physical working conditions for Centre staff, in particular in view of the current space limits;

- negotiation with the host country authorities of agreements relating to security and the Centre's final seat, as well as the lease for its temporary offices;
- drafting of a code of conduct governing relations between Translation Centre staff and the general public, as requested by the European Ombudsman;
- drafting of internal rules and regulations on the implementation of budgets, the assignment
 of functions and responsibilities, the circulation of documents, the delegation of powers and
 appointment of deputies, as well as other matters relating to the internal organization of the
 Centre:
- drafting of amendments to the Centre's key regulations, such as its Financial Regulation, cooperation agreements with agencies, offices, bodies and institutions of the European Union, the general conditions applicable to contracts and tenders, etc.

For its part, the Finance Section will focus its efforts in 1999 on installing and implementing the SI2 accounting system developed jointly by the European Commission and a group of agencies coordinated by the European Training Foundation in Turin. The Translation Centre is confident that the gradual introduction of the various modules making up this accounting system will not only improve the financial information provided to the Management Board and the Court of Auditors; it will also increase internal efficiency by providing clear, rapid information on the real costs attributable to each of the Centre's departments, which in turn will serve as a basis for invoicing its customers.

Finally, the Personnel Section, whose nucleus was formed at the end of 1998, will be assuming all the functions which the Centre has up to now delegated to the relevant departments of the European Commission in Luxembourg. Its tasks will essentially be as follows:

- establishing recruitment programmes and timetables for the necessary selection procedures to fill vacancies in the establishment plans approved by the Management Board;
- compiling lists of tasks and job descriptions;
- drawing up policies on training, promotions, contract renewals, etc., for presentation to the Management Board, following consultation of the Centre's Staff Committee;
- maintaining contacts with the personnel departments of other agencies and institutions of the European Union, as well as with the Translation Centre's Staff Committee.

III. VOLUME OF WORK AND MEDIUM-TERM OUTLOOK 1999 – 2003

The forecast volume of work for 1999 is slightly higher than that forecast a year ago. The upward revision, from 162 150 pages to 171 200, is due solely to an increase in the translation of documents, with the volume of trademarks remaining virtually unchanged (currently 111 300 pages forecast as against 111 250 a year ago). As regards documents, the forecast number of pages to be translated has risen from 50 900 to 59 900 - an increase of 9 000 pages - with expected demand being revised both downwards, as expected, for certain agencies (EEA in Copenhagen, EFIL in Dublin, EMEA in London and EMCDDA in Lisbon), and upwards for others (EUROPOL in The Hague, ETF in Turin, CPVO in Angers and EMCRX in Vienna). The biggest single increase as compared with the previous forecast, however, is due to the Joint Aviation Requirements translation project for DG VII of the European Commission, with the translation of some 12 000 pages into all languages. Moreover, this figure represents only the beginning of a project which is currently estimated to involve the translation of some 100 000 pages into all the official languages of the European Union and span several years. As regards contributions, an average price of EUR 79 per page is budgeted for, given the uncertainty over the impact of the new invoicing method, with the application of surcharges or discounts depending on the deadlines actually requested by the Centre's customers.

With regard to the medium-term outlook from the year 2000, a decrease in the volume of trademark translation – as forecast a year ago – is still predicted. This will be only partly offset by an increase in the demand for the translation of documents, with a resulting slight fall in the total volume of work that will probably not recover until 2002. Attention is drawn to the fact that the forecast contributions remain constant over the whole period; this is because most economic forecasts currently available indicate that the current low level of inflation in the European Union will also continue unchanged over the next few years.

Despite the slight reduction in the volume of translation work forecast for the year 2000 as compared with 1999 (-7 200 pages = -4.2%), the Translation Centre considers that a slight increase in the establishment plan will still be necessary, essentially to fill the remaining gaps in the translation support services (Computer Department, Standardization Section, library, documentation, etc.). The potential need for additional staff will be examined more closely in the course of 1999 before finalization of the corresponding budget, to be adopted in October this year.

PROPERTY AND THE PROPERTY OF A SHARE PROPERTY OF THE PROPERTY

To conclude the medium-term forecasts, the Centre has re-examined the figures established a year ago on the impact of EU enlargement on its activities. Following a review of the proportion of documents for publication translated in 1998 – i.e., those which, in the event of enlargement, would have to be translated into the official languages of the new Member States – the figures obtained are not very different from those obtained the year before (see Annex VII). To be more specific, the weighted percentage for translation into the 10 language versions would be 53.2% (55.5% the previous year), i.e., 26.6% for five additional official languages. This has formed the basis for our assumptions and there would seem to be no need to alter it at this stage, given that the information available does not differ greatly from that of a year ago. Since translation of Community trademarks would also have to be into five new official languages, the overall increase in the Centre's total translation volume would be approximately 57 600 pages, or 33.7%. From the information currently available, it would seem that no enlargement will take place in any event before 2003, the final year of the period under review, and quite possibly even later. For this reason, all these figures, and their possible impact on the contributions of the organizations, as set out in Annex VIII, should be regarded as purely indicative.

LIST OF AGENCIES, OFFICES, BODIES AND INSTITUTIONS SERVED BY THE TRANSLATION CENTRE

ANNEX I

A) Decentralized agencies, offices and bodies

- European Agency for Safety and Health at Work Bilbao
- European Police Office (Europol) The Hague
- European Environment Agency Copenhagen
- European Foundation for the Improvement of Living and Working Conditions Dublin
- European Agency for the Evaluation of Medicinal Products London
- European Training Foundation Turin
- Office for Harmonization in the Internal Market (Trade Marks and Designs) Alicante
- European Monitoring Centre for Drugs and Drug Addiction Lisbon
- Community Plant Variety Office Angers
- European Centre for the Development of Vocational Training Thessaloniki
- European Monitoring Centre for Racism and Xenophobia Vienna

B) European Union institutions

- European Central Bank
- Court of Auditors
- European Commission
- Council of the European Union

TIMETABLE OF CALLS FOR TENDER

ANNEX II

1999 - 1st Quarter

EN into all official languages of the European Union texts relating to medicine (primarily to meet the needs of the EMEA)

EN into all official languages of the European Union, plus IC and NO texts relating to the environment (primarily to meet the needs of the EEA)

EN and FR into IT

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

EN and FR into EL

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

EN and FR into PT

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

1999 - 2nd Quarter

EN into FR

texts relating to education, vocational training, employment and social affairs

EN and FR into DA

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

1999 - 3rd Quarter

EN into DE

texts relating to education, vocational training, employment and social affairs EN and FR into NL

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

1999 - 4th Quarter

EN and FR into ES

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

EN and FR into FI

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting

EN and FR into SV

texts relating to education, vocational training, employment and social affairs texts relating to finance and public accounting
