# INFORMATIONS INTERNES sur L'AGRICULTURE

## Analyse régionale des structures socio-économiques agricoles

– Essai d'une typologie régionale pour la  
Communauté des Six

Partie II : Données de base par circonscription

Avant - propos

Cette étude a été réalisée dans le cadre des programmes d'études de la Direction Générale de l'Agriculture et de la Direction Générale de la Politique Régionale par :

P. RAINELLI

Maître de Recherches

INRA - RENNES

en collaboration avec

M. KERBAOL

Ingénieur - Analyste

Aux travaux ont collaboré également la division "Objectifs et méthodes de la programmation régionale" de la Direction Générale de la Politique Régionale, les divisions "Structures de production et environnement agricole", "Structures sociales en agriculture, problème foncier", "Bilans, études, informations statistiques", "Analyse de la situation des exploitations agricoles" de la Direction Générale de l'Agriculture et avec la participation de la division "Etudes" de la Direction Générale des Affaires Sociales.

Le présent volume constitue la partie II (1) et contient les statistiques de base par circonscription qui ont été utilisées dans les différentes analyses.

+

+

+

Cette étude ne reflète pas nécessairement les opinions de la Commission des Communautés Européennes dans ce domaine et n'anticipe nullement sur l'attitude future de la Commission en cette matière.

---

(1) Le premier volume : Partie I : Essai de typologie a été publié dans la série "Informations internes sur l'agriculture" sous le n° 139.

Les données rassemblées dans ce document sont fournies à titre d'information et sont celles qui ont été utilisées pour les analyses dont les résultats ont été diffusés dans le Tome I de la présente étude<sup>(1)</sup>.

Il s'agit d'un regroupement de différentes données à un certain niveau géographique réalisé à partir des statistiques disponibles au moment de l'exécution de l'étude.

Il ne s'agit dès lors pas d'une oeuvre à caractère statistique prétendant fournir des données parfaitement comparables d'un pays à l'autre, mais d'un regroupement au niveau géographique indiqué de données jugées suffisamment fiables pour être utilisées dans les différentes analyses de l'étude.

Avant toute utilisation, il est recommandé au lecteur de se référer aux définitions et descriptions contenues dans les pages suivantes, mais également au Tome I e.a. au Chapitre II.

---

REMARQUES INTRODUCTIVES RELATIVES AUX TABLEAUX

Les données statistiques utilisées dans le rapport sont présentées :

- regroupées par circonscription pour chacun des six anciens Etats membres;
- regroupées par pays (et subdivisées par circonscription).

Les listes et codes des circonscriptions figurent en troisième lieu.

A. DONNEES REGROUPEES PAR CIRCONSCRIPTION

1. Les données du tableau 1

Ce tableau donne par circonscription :

- Surface exprimée en Km<sup>2</sup>
- Population totale exprimée en centaines
- Densité de population au Km<sup>2</sup>
- Valeur ajoutée : secteur primaire  
secteur secondaire  
secteur tertiaire  
total ) exprimée en centaines de  
milliers U.C. et en %
- Nombre d'actifs : secteur primaire  
secteur secondaire  
secteur tertiaire  
total ) exprimé en centaines et en %
- Valeur ajoutée par actif : secteur primaire  
secteur secondaire  
secteur tertiaire  
total ) exprimée en milliers U.C.
- Système de production réparti en : terres arables  
prairies permanentes  
cultures permanentes ) exprimé en dizaines ha/SAU  
et en %  
total
- Nombre d'exploitations réparti par classe de superficie et exprimé en unités et en % du nombre total (dans la classe de superficie < 2 ha ne sont pas comprises les exploitations sans sol).

Source des données :

- Surface : Annuaires statistiques nationaux
- Population totale et active : L'évolution régionale dans la Communauté - Bilan analytique 1971<sup>(1)</sup> - Annexe statistique p. 169 à 314 Commission des Communautés Européennes.
- Valeur ajoutée : Direction Générale de la Politique Régionale des Communautés Européennes (cfr. p. 54, partie I. Essai de typologie - Informations Internes sur l'Agriculture n° 139).
- Système de production et nombre d'exploitations : "Enquête sur la structure des exploitations agricoles" OSCE 1967, sauf pour l'Italie (provinces) Recensement Général Agricole de 1970.

2. Les données des tableaux 2, 3 et 4

Ces tableaux donnent par circonscription :

les exploitations réparties en 6 classes de superficie<sup>(2)</sup>, dont :

- le chef d'exploitation est âgé de plus de 50 ans avec ou sans successeur potentiel;
- le chef d'exploitation est âgé de moins de 50 ans;

et ceci pour 3 niveaux d'activité du chef d'exploitation :

Tableau 2 - Niveau 1. Exploitations dont le chef d'exploitation est en même temps exploitant et n'a aucune activité professionnelle (lucrative) en dehors de l'exploitation. Ceci correspond donc à une notion d'agriculture à plein temps.

Tableau 3 - Niveau 2. Exploitations dont le chef d'exploitation est en même temps exploitant et n'a aucune activité professionnelle extérieure ou a une activité professionnelle (lucrative) en dehors de l'exploitation égale ou inférieure à 50% de son temps de travail ce qui correspond à une notion d'agriculture à titre principal.

---

(1) Pour la R.F. d'Allemagne : Population totale = population résidente au 30/6/66. Population active au 30/4/66.

(2) Les exploitations sans sol figurent dans la classe de superficie de moins de 2 ha.

Tableau 4 - Niveau 3. Ensemble des exploitations dont le chef est en même temps exploitant, quelle que soit l'importance de l'activité extérieure du chef.

Source : Enquête sur la structure des exploitations agricoles - OSCE 1967.

Signification des abréviations des tableaux 2, 3 et 4

SURF = Superficie des exploitations répartie en 6 classes et exprimée en 10 ha/SAU et en %

NOMB = Nombre des exploitations réparti en 6 classes et exprimé en valeur absolue et en %

DENS = Densité exprimée en nombre de Chefs d'exploitation aux 100 ha/SAU

SA = Superficie des exploitations dont le chef est âgé de 50 ans et plus avec successeur potentiel<sup>(1)</sup>

SS = Superficie des exploitations dont le chef est âgé de 50 ans et plus sans successeur potentiel<sup>(1)</sup>

< 50 = Superficie des exploitations dont le chef est âgé de moins de 50 ans

> 50 = Superficie des exploitations dont le chef est âgé de 50 ans et plus (SA + SS)

---

(1) Sont considérées comme exploitations avec successeur potentiel les exploitations ayant dans leur main-d'oeuvre familiale au moins une personne masculine autre que le chef, âgée d'au moins 10 ans de moins que celui-ci :

- qui n'a pas d'occupation professionnelle (lucrative) en dehors de l'exploitation;
- qui lorsqu'elle a une occupation professionnelle (lucrative) en dehors de l'exploitation, occupe plus de la moitié de son temps de travail sur l'exploitation.

B. DONNEES REGROUPEES PAR PAYS ET SUBDIVISEES PAR CIRCONSCRIPTION

Les données des tableaux 5, 6, 7 et 8

Ces tableaux donnent pays par pays subdivisé par circonscriptions :

a.- la superficie des exploitations, répartie en 6 classes de superficie, dont le chef d'exploitation est en même temps exploitant

- selon qu'il est âgé de moins de 50 ans ou de 50 ans et plus (tab. 5),

- âgé de 50 ans et plus, subdivisés selon la présence ou non d'un successeur potentiel (tab. 6).

b.- la superficie selon 6 classes de superficie d'exploitation subdivisée suivant le système de production (répartition des cultures groupées en terres labourables, superficie toujours en herbe, cultures permanentes et terres cultivées en céréales). (Tab. 7 et 8).

Ces données sont exprimées en 10 ha/SAU.

Source : "Enquête sur la structure des exploitations agricoles" OSCE 1967.

Signification des abréviations des tableaux 7 et 8

tl = terres labourables

sth = superficie toujours en herbe

c perm = cultures permanentes

cer = terres cultivées en céréales

ITALIE - Provincie et Regioni (données du tableau 1)

1) Provincie

Le code alphabétique retenu comprend deux lettres majuscules qui sont celles ayant cours pour l'immatriculation des automobiles en Italie (1). Les circonscriptions sont présentées par regioni. Seules les provincie Isernia et Campobasso n'ont pas été prises en considération en raison de l'absence de données dans certains domaines pour ces circonscriptions. Nous avons donc dû prendre en compte l'unité Molise qui regroupe Isernia et Campobasso.
