The Committee notes that, in particular for the financial year 1980 and despite some reduction in the allocation for that year, the total available was considerably more than the Centre was able to absorb.

It asks the Centre to take the necessary steps, in agreement with the Commission, to ensure that, in future, payments under the annual subsidy from the European Development Fund for the Centre's budget are properly staggered in accordance with the Centre's expenditure and do not as a rule exceed an amount corresponding to three month's expenditure.

BUILDING, EQUIPMENT & MISCELLANEOUS EXPENDITURE (TITLE 2)

The Centre has now implemented its framework, and the expenditures foreseen for building, equipment and miscellaneous are based on realistic estimates. The rate of inflation taken into account for adjusting the estimates for 1983 is 10%.

RENTAL OF BUILDING & INCIDENTAL EXPENDITURE (Chapter 21)Rent (Art. 211)

The rent remains stable, because the final negotiations with the CCC held after the 1982 Budget had been drawn up, resulted in better conditions.

MOVABLE PROPERTY & INCIDENTAL EXPENDITURE (Chapter 22)Purchase office machinery & furniture (Art. 221)

As some of CID's equipment is more than five years old, there is a risk of breakdown during the year and replacement might be necessary.

Rental furniture & equipment (Art. 222)

The rent of the IBM photocopier has slightly increased due to the cost of living index; the rent of a new book-keeping machine for the accounting section is also considered.

Maintenance furniture and equipment (Art. 223)

Cost of maintenance of existing equipment may increase by 6% in 1983, due to increase in cost of living.

Art. 311 - CID antennae field activities in ACP  
States :  
promotion of industrial contacts.

210,000 190,000

By the end of 1982, CID might appoint 20 paid antennae and establish arrangements with Industrial Development Institutions which are not currently paid. However, until such time as member States are able to have an industrial expert under the ICEP proposed by CID, the Centre will aim at extending its paid antennae network within the limits of its financial possibilities. An experience shows that antennae performance is improved by the grant of some remuneration it is proposed to reimburse also 40 institutional antennae for some of their costs. Detailed professional work undertaken by antennae on a specific project will also be remunerated. Compared to last year, the emphasis is therefore more on payment for actual work performed by antennae.

- 20 ACP private antennae

- Provision for 40 ACP institutional antennae to cover out of pocket expenses, public expenses, public relations and travel costs

- Fees for substantiation of project ideas

ACP industrial potential surveys (Art. 312)

Art. 312 - ACP industrial potential surveys :

300,000 180,000

In 1983 special emphasis will be placed on the substantiation of existing and new project proposals that will allow the exploitation of the resource potentials of ACP countries. In this respect the Centre will not only be undertaking substantiation of the existing project proposals, but will undertake project identification surveys of some sectors that will be relevant to a number of ACP countries. The multisectoral surveys are part of our overall plan to cover every least developed country with one of these surveys during the Convention.

In 1983 the Centre proposes to undertake sectoral studies in 6 least developed countries for which we have not so far carried out such a study. Specific sectoral surveys will cover sectors to identify resource potential in one or more countries (e.g. the forestry resources study carried out in the Caribbean and Pacific Region); such surveys are to be carried out at the specific request of ACP states.

- General sectoral surveys of six least developed States

- 10 specific sectoral surveys

CURRENT ADMINISTRATIVE OPERATIONS (Chapter 23)Stationery & office supplies (Art.231)

Due to increase of activities, the amount of writing paper and all office supplies increased significantly in 1982. Consequently a budgetary provision for an increase has been considered in 1983.

Postal charges & telecommunications (Art.232)

The Directorate has introduced cost reducing procedures for use of telephone, telex and cable which will enable the CID to reduce these expenses slightly in 1983.

Other operating expenditures (Art.235)

These expenses mainly concern the use of the additional software for the computerized calculation of salaries and accounting.

MISSION EXPENSES, REPRESENTATION & ENTERTAINMENT' EXPENDITURE (Chapter 24)General duty travel expenses (Art.241) (Europe and ACP countries)

Mission expenditures unrelated to projects and other specific interventions have been kept as low as in the previous year.

Attendance at seminars, symposia, etc. (Art.313)

CID participation and assistance to ACP parties in events organized by others have been considered for 1983.

CID extensive field activities in EEC (Art.314) :

promotion for partners in industrial undertakings.

Efforts will be placed on organizing a number of project workshops where identified prospective investors will be invited to discuss specific projects. A significant effort will therefore be made in the area of identification of serious prospective EEC investors by both CID staff and local consultants.

Two promotional meetings will be organized in Ireland and Greece respectively where general CID activities will be reinforced in the business communities in the two countries, along with presentation of project proposals that may be of interest to prospective investors. Project workshops will also be organized in ACP countries where possible projects from EEC investors and appropriate technology holders will be presented to ACP businessmen.

Travel incentive scheme & advice towards joint-ventures for ACP & EEC industrialists including members of Chambers of Commerce & promotional agencies (Art.315)

A more liberal offer of travel assistance to ACP project sponsors and prospective EEC investors in 1982 has proved an effective tool in generating more interest in possible cooperation. Therefore, the Centre plans a wider application of this assistance to allow more ACP and EEC entrepreneurs, industrialists and industrial promotion specialists to meet for discussions on specific projects, particularly for projects from the least developed and island states.

Travel incentive assistance might be exceptionally offered also to serious and small EEC investors who will be encouraged to visit the ACP states (e.g. least developed states) where, due to distance and other considerations, EEC investors are not at the moment showing active interest.

Art.315 - Travel incentive scheme & advice towards joint-ventures for ACP & EEC industrialists including members of Chambers of Commerce & promotional agencies

Assistance to ACP industrialists, promotional agencies, Chambers of Commerce, etc., to visit Europe. This assistance might be exceptionally offered to serious and small EEC investors within the limits of 30,000 ECU.

NEW PRODUCTIVE UNDERTAKINGS, STUDIES, ASSISTANCE, PUBLIC RELATIONS (Chapter 32)

Implementation/feasibility studies, market and financial analysis, (including planning of Industrial Development Enterprises) (Art.321, formerly Art.321 & 322).

These studies cover new or existing enterprises and will be undertaken to support ACP requests for project evaluations. Committed partners and their contributions to study costs will ensure involvement and commitment to project implementation after positive results of studies. As the concept of Engineering and Development Enterprises becomes better known, more requests will be expected. This is the development of specific engineering/rural/island enterprises where a central manufacturing organisation supplies tools, parts, repair/maintenance and engineering and other essential services to smaller 'satellite' facilities. These enterprises, in many cases, come close to looking like ordinary enterprises; therefore, the differentiation is not always possible. The CID will encourage ACP governments to participate in implementing such enterprises by injecting technical assistance (bilateral, multi-lateral, EDF, etc.) for training in productive units.

Assistance with actual implementation of industrial enterprises (Art.323)

This covers start-up assistance for new or diversification of existing enterprises. A number of projects remain dormant after studies have been finalized and sometimes they are abandoned because of numerous problems inhibiting implementation. Unless these problems are known, CID is not able to provide assistance and in the past correspondence with project sponsors has proved a poor source of information as no replies have been forthcoming to CID enquiries. Project visits and discussions are considered a better alternative and will be stepped up in 1983, e.g. for management/technical assistance, installation and commissioning of plant, market development assistance, negotiation of equipment supply contracts, etc.

TECHNICAL OPERATIONS & SERVICES (Chapter 33)

Assistance with expansion or rehabilitation of ACP  
industries (Art.331)

The emphasis will be placed on implementing rehabilitation studies, by assisting ACP industries towards modernisation and expansion. In addition to a continuing programme of expert consultations, some projects will be identified for detailed and substantial rehabilitation assistance. However the supply of hardware will be limited to exceptional cases, where it would be essential to eliminate serious bottlenecks.

Development of industrial profiles based on proven  
adapted technologies (Art.332)

The identification of fresh profiles and the revision of existing ones will continue at a reduced level as the inventory now contains a substantial number of profiles.

Implementation of selected enterprises based on adapted  
technologies (Art.333)

The application of adapted technologies in ACP countries will be assisted, with expert technical advice where necessary. Suitable profiles will be promoted and followed up for implementation.

Training to help ACP industries (Art.334)

The need for technical upgrading by in-plant training remains strong and this facility will be developed, including some arrangements for training in ACP countries.

Documentation, library and computer services (Art.335)

The use of the Centre's computer terminal for information will increase during 1983 and the provision of other library and documentation services will be further developed.

CIPMUN EXPENSES DIRECTLY RELATED TO INTERVENTIONS  
(Chapter 34)

Travel expenses in connection with specific interventions (Art.341) (promotion in ACP countries, EEC missions, missions related to project implementation, technical operations and other actions)

As in 1982, the travel activity during 1983 is putting emphasis on follow-up missions to countries already visited; also, the rest of the ACP countries not visited in 1982 will be visited in 1983.

Promotion attached programme (Art.342) (previously 'In-CID training')

The reinforced programme for In-CID training of ACP promotion officers is expected to be useful for coordination and follow-up in the ACP countries. It is proposed to invite two groups of five each from French and English speaking ACP countries, as done in the previous year.

Industrial sector specialized meetings (Art.343)

An agro-food meeting directed towards the Caribbean, Pacific and East African countries will be held in May 1983, and a metal/woodworking and building materials meeting will be held for ECOWAS in October/November 1983. An intensive travel incentive programme will be included in the organization of these meetings, so as to ensure participation of ACP industrial promoters.
