PRESENTATION OF THE EC 2006 ANNUAL REPORT TO CITES

In accordance with Art. 15 (4) of Council Regulation (EC) 338/97¹ as well as with regard to Art. VIII 7 (a) of the CITES Convention, the European Commission gathered the necessary trade data from all Member States and charged the UNEP World Conservation Monitoring Centre with the production of the annual report.

This report provides information on each Member State's individual trade with third countries. To the extent possible, the information contains the following elements for each shipment:

- the States with which such trade occurred,
- the number or quantities and types of specimens,
- the Latin names of the specimens,
- purpose of the export, re-export, import or introduction from the sea.

Equivalent information was gathered for non-CITES species, included in Annexes B and D to Regulation (EC) 338/97.

The report will be published on the EUROPA website http://ec.europa.eu/environment/cites/home_en.htm under "Reports and Studies". Requests from Parties for information on individual shipments can be addressed to the European Commission, Environment Directorate General, Unit ENV/E/2, B-1049 Brussels, env-cites@ec.europa.eu.

¹ OJ L 61 of 3.3.1997, p. 1

INTRODUCTION TO THE EC 2006 ANNUAL REPORT TO CITES

The Community and CITES

Although the European Union is not yet a Party to CITES², its provisions have been implemented in Community law since 1982, when the first **Community-wide legislation** implementing the Convention entered into force.

There are three main reasons why CITES is implemented at EU level and not individually by each EU Member State:

- the fact that external trade rules are of exclusive Community competence;
- the absence of systematic border controls as a result of the customs union; and
- the existence of a Community policy on the environment and legislation on the protection and conservation of the Community's indigenous species.

Currently CITES is implemented across the EU through a **comprehensive Regulation** adopted in **1996** (Council Regulation (EC) No. 338/97 of 9 December 1996 on the protection of species of wild fauna and flora by regulating trade therein³) and a more detailed **implementing Regulation** (Commission Regulation (EC) 865/2006 of 4 May 2006⁴).

² Accession by the Community requires the ratification of the Gaborone Amendment to the Convention by 54 Countries that were a Party in 1983. 47 Parties have ratified the Amendment to date.

³ OJ L 61, 3.3.1997, p. 1. Last amended by Commission Regulation (EC) No 318/2008 (OJ L 95, 8.4.2008, p. 3)

⁴ OJ L 166, 19.6.2006, p. 1. Last amended by Commission Regulation (EC) No 100/2008 (OJ L 31, 5.2.2008, p. 3)

Together, these two Regulations reflect the provisions of the Convention and those CoP Resolutions which the Member States have decided collectively to implement. However, they are stricter than the Convention in a number of crucial respects:

- Council Regulation (EC) No. 338/97 has **four Annexes** of which **Annexes A, B and C** loosely correspond to **Appendices I, II and III** respectively of the Convention but not exactly – for example, some Appendix II and III species are listed in Annex A because of their status on other Community nature protection legislation (the **Birds** and **Habitats Directives**), while Annexes A and B also include some **non-CITES** species;
- **Annex D**, which has **no equivalent in CITES**, lists species for which import levels are **monitored**;
- **Stricter import** conditions apply for species in Annexes A and B than for those in the corresponding Appendices I and II of the Convention;
- **Import permits** are also required for **Annex B** species and these can only be granted when the **importing Member State** – if necessary, in consultation with all the Member States – deems that trade in the relevant species from the country concerned is **sustainable**;
- **Import notifications** are required for **Annex C and D** species;
- There are additional requirements regarding **housing** and **transport** of **live** specimens;
- More comprehensive **restrictions** apply for **internal** trade in **Annex A** species.

In addition, the Regulations allow for the Commission to establish **general restrictions** on the introduction into the Community from certain countries of origin of:

- Annex A specimens if the introduction would have a harmful effect on the conservation status of the species, or on the extent of the territory occupied by the relevant population of the species, or on the grounds of other factors relating to conservation;
- Annex B specimens if, given the current or anticipated trade levels, the introduction would have a harmful effect on the conservation status of the species, or on the extent of the territory occupied by the relevant population of the species or on the grounds of other factors relating to conservation;
- Live specimens in Annex B, which have a high mortality rate during shipment or as to which it has been established that live animals are unlikely to survive in captivity for a considerable proportion of their life span; and
- Live specimens of species for which it has been established that their introduction into the natural environment of the Community would present an ecological threat to wild species of fauna and flora indigenous to the Community.

Import restrictions can only be established after consultation with the countries of origin. They are published in the Official Journal of the EU. The most recent “Suspensions Regulation” is Regulation (EC) No 811/2008 of 13 August 2008⁵.

For more details on these and other provisions of the Regulations please consult http://ec.europa.eu/environment/cites/home_en.htm.

The situation with regard to import restrictions under Art. 4 (1), (2) and (6) can also be checked on the Internet web site created for that purpose by the UNEP World Conservation Monitoring Centre in Cambridge (<http://www.unep-wcmc.org/species/trade/eu/traderef.html>)

⁵ OJ L 219, 14.8.2008, p. 17

PRESENTATION DU RAPPORT ANNUEL 2006 DE LA CE A LA CITES

Conformément à l'article 15 (4) du Règlement (CE) 338/97 du Conseil ¹, ainsi que par rapport à l'article VIII 7 (a) de la Convention CITES sur le commerce international des espèces de faune et de flore sauvages menacées d'extinction (CITES), la Commission Européenne a recueilli les données commerciales nécessaires auprès de tous les Etats Membres et a chargé le UNEP World Conservation Monitoring Centre d'établir le rapport annuel.

Ce rapport fournit des informations sur le commerce individuel de chaque Etat membre avec les pays tiers. Dans la mesure du possible, l'information contient les éléments suivants pour chaque envoi:

- les Etats avec lesquels le commerce a eu lieu,
- le nombre ou les quantités et les types de spécimens,
- le nom latin des spécimens,
- le but de l'exportation, de la ré-exportation, de l'importation ou de l'introduction en provenance de la mer.

Des informations équivalentes pour les espèces inscrites aux Annexes B et D du Règlement (CE) N° 338/97 étaient rassemblées également.

Le rapport sera publié sur le site web EUROPA http://ec.europa.eu/environment/cites/home_en.htm (anglais) sous la rubrique "Useful information". Les demandes des Parties pour des informations sur les différents envois peuvent être adressées à la Commission européenne, direction générale de l'environnement, l'unité ENV/E/2, B-1049 Bruxelles, env-cites@ec.europa.eu.

¹ JO L 61 du 3.3.1997, p. 1

INTRODUCTION AU RAPPORT ANNUEL 2006 DE LA CE A LA CITES

La Communauté et la CITES

Bien que l'Union européenne (UE) ne soit pas encore Partie à la CITES², les dispositions de la Convention sont appliquées en droit communautaire depuis 1982, année de l'entrée en vigueur de la première **législation communautaire** d'application de la CITES.

La CITES est appliquée au niveau de l'UE et non individuellement par chacun des Etats membres pour trois raisons principales :

- le fait que les règles du commerce extérieur relèvent exclusivement de la compétence de la Communauté ;
- l'absence de contrôles systématiques aux frontières du fait de l'union douanière; et
- l'existence d'une politique environnementale communautaire et d'une législation sur la protection et la conservation des espèces indigènes de la Communauté.

Actuellement, la CITES est appliquée dans toute l'UE par le biais d'un **règlement d'ensemble** adopté en **1996** (Règlement (CE) n°338/97 du Conseil du 9 décembre 1996 relatif à la protection des espèces de faune et de flore sauvages par le contrôle de leur commerce³) et d'un **règlement d'application** plus détaillé (Règlement (CE) n°865/2006 du 4 mai 2006 de la Commission⁴).

² L'adhésion de l'Union européenne nécessite la ratification de l'amendement de Gaborone par 54 pays qui étaient Parties à la Convention en 1983. A ce jour, 47 Parties l'ont ratifié.

³ JO L 61, 3.3.1997, p. 1. Modifié en dernier lieu par le règlement (CE) no 318/2008 de la Commission (JO L 95 du 8.4.2008, p. 3)

⁴ JO L 166, 19.6.2006, p.1. Modifié en dernier lieu par le règlement (CE) no 100/2008 de la Commission (JO L 31 du 5.2.2008, p. 3)

A eux deux, ces règlements reflètent les dispositions de la Convention et des résolutions de la Conférence des Parties à la CITES que les Etats membres ont décidé collectivement d'appliquer. Toutefois, ils sont plus stricts que la Convention sur un certain nombre de points cruciaux:

- Le règlement (CE) n° 338/97 du Conseil comporte **quatre annexes**, dont les **annexes A, B et C**, qui correspondent en gros, mais pas exactement, aux Annexes **I, II et III** de la Convention: certaines espèces de l'Annexe II et de l'Annexe III, par exemple, sont inscrites à l'Annexe A en raison de leur statut dans d'autres législations communautaires sur la protection de la nature (directive **Oiseaux** et directive **Habitats**), alors que les Annexes A et B incluent aussi certaines espèces **non-CITES** ;
- **L'Annexe D**, qui n'a **pas d'équivalent à la CITES**, donne la liste des espèces dont le niveau des importations est **surveillé**;
- Pour les espèces des Annexes A et B, des **conditions d'importation plus strictes** que celles des Annexes I et II correspondantes de la Convention sont applicables ;
- Un **permis d'importation** est également requis pour les espèces de **l'Annexe B**; il ne peut être délivré que quand **l'Etat membre qui est le pays d'importation** considère - en consultation avec tous les Etats membres s'il y a lieu - que le commerce de l'espèce en question à partir du pays concerné est **durable**;
- Une **notification d'importation** est requise pour les espèces des **Annexes C et D**;
- D'autres conditions sont requises concernant **l'hébergement** et le **transport** des spécimens **vivants**; et
- Des **restrictions** plus complètes s'appliquent au commerce **intérieur** des espèces de **l'Annexe A**.

De plus, ces règlements permettent à la Commission d'établir des **restrictions générales** à l'introduction dans la Communauté depuis certains pays d'origine:

- de spécimens de l'Annexe A, si l'introduction a des effets défavorables sur l'état de conservation de l'espèce ou sur l'étendue du territoire occupé par la population en question de l'espèce, ou sur la base d'autres facteurs liés à la conservation;
- de spécimens de l'Annexe B, si, compte tenu du niveau actuel ou anticipé du commerce, l'introduction a des effets défavorables sur l'état de conservation de l'espèce ou sur l'étendue du territoire occupé par la population en question de l'espèce, ou sur la base d'autres facteurs liés à la conservation;
- de spécimens vivants d'espèces inscrites à l'annexe B qui ont un taux de mortalité élevé durant le transport ou dont il est établi qu'ils ont peu de chance de survivre en captivité pendant une part importante de leur durée de vie potentielle; et
- de spécimens vivants d'espèces dont l'introduction dans la Communauté représente une menace écologique pour des espèces de faune et de flore sauvages indigènes de la Communauté.

Des restrictions d'importation ne peuvent être établies qu'après consultation des pays d'origine. Elles sont publiées au journal officiel des Communautés européennes. Le « règlement de suspensions » le plus récent est le règlement (CE) de la Commission n° 811/2008 du 13 août 2008⁵.

Consultez http://ec.europa.eu/environment/cites/home_en.htm pour plus d'informations.

Il est également possible de vérifier la situation en matière de restrictions d'importation imposées en application de l'article 4 (1), (2) et (6) sur le site Internet créé à cet effet par le Centre mondial de surveillance de la conservation (UNEP-WCMC) de Cambridge (<http://www.unep-wcmc.org/species/trade/eu/traderef.html>).

⁵ JO L 219, 14.8.2008, p. 17

PRESENTACIÓN DEL INFORME ANNUAL DE 2006 DE LA COMUNIDAD EUROPEA PARA LA CITES

De conformidad con el artículo 15 (4) del Reglamento (CE) 338/97¹ del Consejo y en relación con el apartado 7 (a) del artículo VIII de la Convención Internacional sobre Comercio de Especies Amenazadas de Fauna y Flora Silvestres (CITES), la Comisión Europea reunió los datos comerciales de todos los Estados miembros y encargo a la UNEP World Conservation Monitoring Centre la elaboración del informe anual.

Asimismo, este informe recoge información sobre el comercio de cada Estado miembro con terceros países. En la medida de lo posible, esta información contiene los siguientes elementos para cada envío:

- los Estados con los que tiene lugar dicho comercio;
- el número o cantidades y tipos de ejemplares;
- los nombres de los ejemplares en Latín;
- objetivo de la exportación, reexportación, importación de la introducción procedente del mar.

Una información equivalente ha sido recopilada para las especies no-CITES que figuran en el Anexo D del Reglamento (CE) 338/97.

El informe será publicado en el sitio web de EUROPA http://ec.europa.eu/environment/cites/home_en.htm (en inglés) bajo "Useful Information". Las Partes pueden solicitar información sobre envíos particulares a la Comisión Europea, Dirección General de Medio Ambiente, Unidad ENV/E/2, B-1049 Bruselas, env-cites@ec.europa.eu.

¹ DO L 61 de 3.3.1997, p. 1

INTRODUCCIÓN DEL INFORME ANNUAL DE 2006 DE LA COMUNIDAD EUROPEA PARA LA CITES

La Comunidad Europea y la CITES.

Aunque la Unión Europea (CE) aún no es Parte en la CITES², sus disposiciones se han aplicado en la legislación de la Comunidad desde 1982, fecha en que entró en vigor la primera **legislación comunitaria** que aplicaba la Convención.

Hay tres motivos por los que la CITES se aplica a escala de la UE y no individualmente por cada uno de los Estados miembros de la UE:

- el hecho de que el reglamento de comercio exterior es competencia exclusiva de la Comunidad;
- la ausencia de controles fronterizos sistemáticos como resultado de la unión aduanera; y
- la existencia de una política comunitaria sobre medio ambiente y legislación sobre la protección y la conservación de especies indígenas de la Comunidad.

En la actualidad la CITES se aplica en toda la Unión Europea a través de la **reglamentación exhaustiva** adoptada en **1996** (Reglamento (CE) No. 338/97 del Consejo, de 9 de diciembre de 1996, relativo a la protección de especies de la fauna y flora silvestres mediante el control de su comercio³) y un **reglamento de ejecución** más detallado (Reglamento (CE) 865/2006 del 4 mayo de 2006 de la Comisión⁴).

² La adhesión de la Unión Europea requiere la ratificación de la enmienda de Gaborone por los 54 países que eran Partes en 1983. Hasta la fecha, la enmienda ha sido ratificado por 47 Partes.

³ DO L 61, 3.3.1997, p. 1. Reglamento modificado en ultimo lugar por el Reglamento (CE) n° 318/2008 de la Comisión (DO L 95 de 8.4.2008, p. 3).

⁴ DO L 166, 19.6.2006, p. 1. Reglamento modificado en ultimo lugar por el Reglamento (CE) n° 100/2008 de la Comisión (DO L 31 de 5.2.2008, p. 3).

Conjuntamente, ambos reglamentos reflejan las disposiciones de la Convención y las resoluciones de la Conferencia de las Partes en la CITES que los Estados miembros han decidido aplicar colectivamente. Sin embargo, en varios aspectos esenciales son más estrictos que la propia Convención:

- el Reglamento (CE) No. 338/97 del Consejo tiene **cuatro anexos** de los que los **Anexos A, B y C** corresponden estrechamente a los **Apéndices I, II y III**, respectivamente, de la Convención, aunque no exactamente - por ejemplo, algunas especies de los Apéndices II y III están incluidas en el Anexo A debido a su estatuto en otra legislación de protección de la naturaleza de la Comunidad (**Directivas sobre Aves y Hábitats**), mientras que en los Anexos A y B también se incluyen algunas especies **no incluidas en la CITES**;
- en el **Anexo D**, que **no tiene equivalente en la CITES**, se incluyen especies para las que **se controla** el nivel de importación;
- se aplican condiciones de **importación más estrictas** para las especies de los Anexos A y B que para las correspondientes de los Apéndices I y II de la Convención;
- también se requieren **permisos de importación** para las especies del **Anexo B**, y estos solo pueden concederse cuando el **Estado miembro importador** - en caso necesario, en consulta con todos los Estados miembros - estima que el comercio de la especie relevante del país concernido es sostenible;
- se requieren **notificaciones de importación** para las especies de los **Anexos C y D**;
- hay requisitos adicionales respecto del **alojamiento** y el **transporte** de especímenes **vivos**; y
- se aplican **restricciones** más exhaustivas para el comercio **interno** de especies del **Anexo A**.

Además, el reglamento permite a la Comisión establecer **restricciones generales** sobre la introducción en la Comunidad, procedente de ciertos países de origen:

- de especímenes del Anexo A, si la introducción tuviese un efecto perjudicial sobre el estado de conservación de la especie, o sobre la extensión del territorio ocupado por la población relevante de la especie, o atendiendo a otros factores relacionados con la conservación;
- de especímenes del Anexo B, si dados los niveles actuales o previstos de comercio, la introducción tuviese un efecto perjudicial sobre el estado de conservación de la especie, o sobre la extensión del territorio ocupado por la población relevante de la especie, o atendiendo a otros factores relacionados con la conservación;
- de especímenes vivos de especies del Anexo B, que tienen una elevada tasa de mortalidad durante el transporte o para los que se ha establecido que es poco probable que sobrevivan en cautividad durante una parte considerable de su duración de vida potencial; y
- de especímenes vivos de especies respecto de las que se ha establecido que su introducción en el medio natural de la Comunidad representaría una amenaza ecológica para las especies silvestres de fauna y flora nativas de la Comunidad.

Las restricciones a la importación sólo pueden establecerse tras consultar con los países de origen. Se publican en el Diario Oficial de la Unión Europea. La reglamentación más reciente sobre "suspensiones" es el Reglamento (CE) No 811/2008 de la Comisión del 13 de agosto de 2008⁵.

Para más detalles sobre estas y otras disposiciones de los nuevos reglamentos se puede consultar http://ec.europa.eu/environment/cites/home_en.htm.

La situación de las restricciones a la importación impuestas con arreglo a los apartados 1, 2 y 6 del artículo 4 puede consultarse también en un sitio de Internet creado a tal fin por el UNEP-WCMC (Centro de Seguimiento de la Conservación, de la Vida Silvestre) de Cambridge (<http://www.unep-wcmc.org/species/trade/eu/traderef.html>)
