FOREWARD

This is the annual report of the European Social Fund for 1982 presented by the Commission to the European Parliament and the Council pursuant to Article 6 of Council Regulation (EEC) No 858/72¹, which reads as follows :

"Every year the Commission shall, before 1 July, submit to the European Parliament and to the Council a report on the activities of the Fund carried out during the past financial year giving inter alia a breakdown of the appropriations committed for operations during that financial year. The report shall also cover foreseeable developments in the coming three years regarding expenditure relating to actions undertaken pursuant to Articles 4 and 5 of the Decision 71/66/EEC".

The report is based on the format adopted in 1981, which was approved by the Council.

In order not to delay presentation of this report, the Commission's forecasts of Social Fund expenditure over the next few years (which have yet to be made) are not included but will be given in the preliminary draft budget for 1984 (see Annex to Volume 7 - Triennial Financial estimates 1984-1987).

Under Article 5 of Commission Decision 78/706/EEC², Member States were required to forward to the Commission not later than 31 March 1983 their reports on operations assisted by the Fund. When all the reports are available, they will be incorporated in a separate annex to this report.

¹ OJ No L 337, 27.12.1977, p. 5.

² OJ No L 238, 30.8.1978, p. 21.

INTRODUCTION

In 1982, Social Fund action was carried on against the background of a still more gloomy employment situation : a decline of 1.4 million in the employment level; slow deterioration in the agricultural sector; faster deterioration in the industrial sector; slow-down in job creation in the service sector; increasing precariousness of vacancies offered; rise in unemployment accompanied by an increase in its duration.

By the end of the year, there were over 12 million registered unemployed in the Community, corresponding to 10.8 % of the working population (by comparison, the unemployment rate in 1979 was 5.7 %); 40 % of the unemployed were young people aged under 25, of whom 48.6 % were women.

The result has been a further increase in the total volume of applications for assistance, which rose to 2 888.2 million ECU, up by over 50 % on 1981. The largest applications by volume were those concerning "young people" (1 265.71 million ECU) and "regions" (857.43 million ECU).

Commitment appropriations available amounted to 1 577.85 million ECU, an increase of 42.4 % on the previous year.

The European Social Fund budget allocation plus transfers effected during the year in question corresponded to 5.82 % of the total volume of the general Community budget, against 4.57 % in 1981.

However, despite a substantial increase in appropriations available, the gap between needs and resources continued to widen in 1982. The total volume of applications submitted corresponded to 183 % of available appropriations against 174 % in 1981; the greatest discrepancy between applications and resources was to be found under the headings "women", "migrants" and "young people".

The Commission pronounced itself on the applications for assistance after dividing them into five batches, of which three were of special importance, and after consulting the European Social Fund Committee. The decisions were taken in accordance with the guidelines for the management of the Fund for the years 1982-84. These guidelines were aimed at concentrating the Fund's action on training operations closely linked to employment, training programmes to provide skilled labour in

regions which are under-developed or in decline, and training for advanced technologies. The guidelines also take account of regional imbalances and the economic capacities available to remedy them.

On the applications submitted, 85 % - corresponding to a total of 2 467.44 million ECU - were classified under the various levels of priority, while 14.5 % - 411.73 million ECU - were classified as inadmissible, not eligible or non-priority.

The total amount of assistance approved was 1 510.28 million ECU, corresponding to a utilization rate vis-à-vis available commitment appropriations of 95.72 % (against 90 % in 1981). Reserves were kept in hand to meet possible parity changes. This, together with technical and administrative factors, accounts for the fact that 4.28 % of the appropriations remained unused.

As in the preceding years, almost 80 % of Fund assistance was allocated to operations under the headings "young people" and "regions". The assistance granted was divided almost equally between these two fields, with 599.48 million ECU for training operations and aids to employment for young people and 598.03 million ECU for operations aimed at solving problems in less-developed or declining regions suffering from serious and prolonged imbalances in employment.

Almost 90 % of the appropriations (1 365.40 million ECU) were allocated to operations submitted under a variety of fields of intervention but carried out in regions qualifying for European Regional Development Fund aid, nearly 45 % of which was allocated (616.23 million ECU) in the six absolute priority regions - Greenland, the French Overseas Departments, Greece, Ireland, Northern Ireland and the Mezzogiorno.

Total payment appropriations available amounted to 1 088.83 million ECU, an increase of almost 32 % on the previous year. Of this amount, only 905.58 million ECU were used, the balance being carried over to the next financial year. Payments of first and second advances rose considerably in 1982, accounting for 74 % of the total sum disbursed.

During the year the Commission, after consultation with the European Social Fund Committee, transmitted to the Council an opinion together with proposals

for the review of the tasks and rules of the Social Fund, which were under examination by the Council, the European Parliament and the Economic and Social Committee at the end of the year.

I. THE EMPLOYMENT SITUATION IN THE COMMUNITY IN 1982

1. Employment

The rapid deterioration in the employment level recorded in 1981 - a loss of 1.65 million jobs - continued in 1982 with a further fall of about 1.4 million, mainly affecting the United Kingdom.

In general, the previous year's trends persisted : slow decline in employment in the agricultural sector, steeper decline in the industrial sector, slowdown in job creation in the service sector.

In addition, job vacancies offered continued to become more precarious, particularly as regards relatively unskilled jobs sought by young people and women.

2. Unemployment

At the end of 1982 there were more than 12 million registered unemployed in the Community, corresponding to 10.8 % of the working population - a rate double that recorded in 1979 (5.7 %).

From December 1981 to December 1982 the number of jobless rose by 16.7 % - which, admittedly, is a lower rate than for the two previous years. However, this figure is an average which conceals sharp disparities between the countries; registered unemployment was fairly stable in Denmark (+ 2.6 %) and France (+ 5.8 %), whilst, except for Luxembourg and Greece, the two countries with the lowest unemployment rates at the end of 1981 saw the sharpest increases - + 36 % in the Netherlands and + 30.5 % in Germany. This phenomenon is in line with the tendency noted earlier towards a reduction in the disparities between one country and another.

There was little change in the structure of unemployment by sex and age group, since young people have accounted for about 40 % of the total for several years past with an unemployment rate double that for adults.

Women continue to be disadvantaged. Despite a downward trend in the number of jobless women which can be seen in the progress of the unemployment rate during the past 3 years - 46.9 % in 1980, 42.8 % in 1981 and 42.3 % in 1982 - this rate still substantially exceeds the

proportion of women in the working population (about 37 % in 1982). Young women are mainly affected; 48.6 % of all unemployed persons under 25 are women.

The most disturbing phenomenon is the persistent increase in the duration of unemployment, which now affects every category. At the end of 1982, over a million young people under 25 had been without a job for more than 12 months.

Faced with a situation which can hardly be expected to improve spontaneously, the Commission has transmitted to the Council a number of proposals aimed at combating unemployment, of which the most important are the following :

- A draft resolution adopted by the Council on Community action to combat unemployment¹. This resolution stresses the role of private and public productive investment in job creation; the role of small and medium sized undertakings; the potential of local initiatives and cooperatives and the importance of the re-organization of working time.
- A draft resolution on vocational training policies in the 1980's²; this resolution proposes a "social guarantee" regarding the preparation for working life of young school-leavers, greater equality of opportunity, and stresses the contribution of training to local development.
- A memorandum on the reduction and re-organization of working time³, which describes the situation in the Member States and highlights the conditions to be fulfilled if a policy along these lines is to have a significant impact on employment.

II. NEW MEASURES RELATING TO THE STRUCTURE AND MANAGEMENT OF THE FUND

1. Review of the European Social Fund

Article 11 of Council Decision 71/66/EEC¹ stipulates that the Council shall review this Decision not later than 31 December 1982, if necessary on the basis of a Commission opinion. After consulting the Committee of the European Social Fund, the Commission adopted a communication on the review of the European Social Fund (document COM(82)485 final), which it presented to the Council on 8 October 1982.

The Council has asked the European Parliament and the Economic and Social Committee to give their opinion on this communication.

The Commission's communication comprises an opinion accompanied by a draft Decision to replace Decision 71/66/EEC, a proposal for a Council Regulation to implement the draft Decision replacing Council Regulation (EEC) No 2396/71², and an opinion on the rules of the Committee of the European Social Fund accompanied by a draft Decision replacing the Decision of 25 August 1960³. The most important of the proposals made by the Commission are the following:

- An extension of the list of persons eligible for Fund assistance. The Fund should above all be in a position to assist Member States in devising training measures for all young people who have completed compulsory schooling as well as training measures in favour of persons exercising training activities: professional guidance or placement experts; development officers. The new list of eligible persons would replace the existing separate fields of intervention.
- Adoption of a ranking of Community regions as a means of allocating the Fund's limited financial resources among those areas with the greatest need. Regions eligible for a higher rate of intervention would be placed at the head of the list.

- Introduction of rules to rationalize the management of the Fund.

¹ OJ L 28, 4.2.1971, p. 15.

² OJ L 249, 1.11.1971, p. 54.

³ OJ L 56, 31.8.1960.

At the year's end the Council, Parliament and Economic and Social Committee were still examining the Commission's communication.¹

¹On 2 June 1983 the Council adopted common guidelines on the draft proposals concerning the revision of the European Social Fund.

2. Extension of decisions relating to Fund intervention on behalf of certain categories of persons

On a proposal from the Commission, the Council decided on 10 December 1982 to abolish the time limit on Fund intervention to help persons affected by employment difficulties, persons occupied in the textile and clothing industries, migrant workers and women.¹

3. Administrative procedures for the operation of the Fund

The Commission has decided to amend² Articles 4 of Decision 78/706/EEC on certain administrative procedures for the operation of the European Social Fund³, ruling that the provision obliging Member States to submit their requests for payment within 18 months following the date of the completion of operations must be imposing a preclusive time limit.

This change was made necessary by the judgement of the Court of Justice of the European Communities on 26 May 1982 concerning clearance of the Fund's accounts. In making this judgement, the Court recognized the right of the Commission to impose penalties.

4. Guidelines

The Guidelines for the Management of the European Social Fund for the years 1982 to 1984⁴, which were adopted on 30 April 1981, have been extended to cover 1983⁵. Although the Guidelines have to adapt to changes in the economic and social situation in the Community, experience has shown that a degree of stability is needed to enable national administrations and promoters to gear their programmes to the priorities laid down. Moreover, the fundamental problem of imbalance between the volume of applications and the appropriations available borne out by the figures in this Report cannot be resolved satisfactorily simply by amending the Guidelines.

¹ OJ L 357, 18.12.1982, p. 26.

² Decision 82/541/EEC, 26.7.1982.
OJ L 236, 11.8.1982, p. 21.

⁴ OJ C 110, 13.5.1981, p. 2.

⁵ OJ C 133, 25.5.1982, p. 13.

5. Procedures

On 7 January 1982¹ the Commission adopted two communications relating to procedures.

The first gives a list of the public authorities empowered by Member States to provide financial assistance for operations carried out by bodies governed by private law, and guarantee the completion of such operations. The second concerns the procedures laid down by the Member States for the submission of applications for assistance from the European Social Fund and their transmission to the Commission.

¹ OJ C 6, 12.1.1982, pages 2 and 4.

III. FINANCING AND BUDGET

A. COMMITMENTS

1. Available appropriations

The Commitment appropriations available to the Fund in 1982, which amounted to 1 577 85 million ECU, exceeded the total amount available in 1981 by 469 47 million ECU (42.4%).

The total was largely made up of appropriations under Chapters 60, 61 and 62 of the general budget of the Communities (1 242.76 million ECU as against 963 million ECU in 1981). This included a further 335.08 million ECU made up as follows:

- 112.21 million ECU carried over from the previous financial year;
- 14.95 million ECU from appropriations made available following currency realignments during the year;
- 98.05 million ECU from refunds released for re-use during the year from commitments made in 1981;
- 109.87 million ECU derived from two transfers effected on 19 October 1982 and 20 December 1982 respectively.

In addition to the abovementioned refunds released for re-use, refunds amounting to 140.47 million ECU were recorded but could not be re-used. These were appropriations released for re-use by the Fund in 1982 from commitments entered into prior to 31 December 1980. In most cases failure to re-use these appropriations was noted when final claims for payment were submitted on winding up the operations concerned. Consequently these appropriations (116.01 million ECU in 1981) have been released for cancellation.

Fund resources in addition to transfers made during the year amounted to 1.352.63 million ECU - 5.82% of the Community's general budget in 1982 as against 4.57% in 1981.

2. Utilisation of appropriations

Out of the commitment appropriations available, only 1510.28 million ECU were committed, leaving 67.57 million ECU to be carried over to the next financial year.

The rate of utilization of appropriations in 1982 (95.72%) was higher than in 1981 (89.88%). As in the previous year, a proportion (in this case 4.28%) of the appropriations available at the end of 1982 had not been taken up. The reasons were as follows :

- to maintain reserves to cover any subsequent parity changes;
- certain refunds made during the year were received too late to be taken into account when the last batch of applications were approved;
- to observe the principle whereby refunds on appropriations made available for re-use must be entered in the accounts before they can be re-used for new commitments.

3. Volume of applications

Applications for assistance from the Fund 1982 amounted to 2 888.20 million ECU, 50% up on the previous year (1 924.21 million ECU). At the same time, available appropriations rose by 42.4% compared with 1981, so that the gap between resources and needs widened further despite a substantial increase in available resources, particularly through the two transfers made during the year.

The volume of applications represented 183% of available commitment appropriations compared with 174% in 1981, i.e. a coverage of less than 55% compared with 57.6% in 1981.

In absolute terms, the volume of applications was highest in respect of "young people" (1 107.64 million ECU for training operations and 258.07 million ECU for aids to employment) and "regions" (857.43 million ECU). In percentage terms, "young people" (111% for training and 54.2% for employment) and preparatory studies and pilot schemes (98.9%) showed largest increases.

The discrepancy between applications and resources was most marked in the case of "women" (338.10%), "migrants" (+283.63%) and "young people" (132.94% for training and 66.59% for employment aids).

4. Classification of applications

Of the total amount of applications for assistance, 2 467.44 million ECU¹ was classified at different levels of priority according to the Guidelines

¹Excluding preparatory studies and pilot schemes.

for the Management of the Fund¹ and taken into consideration for financing within the limits of available appropriations.

The remainder of the applications (411.73 million ECU - about 14.5% of the total² - was classified as inadmissible, not eligible or non-priority with the following breakdown:

- 1.05 million ECU inadmissible,
- 14.82 million ECU not eligible,
- 395.86 million ECU non-priority.

Preparatory studies and pilot schemes were not classified by level of priority; of a total volume of 9.05 million ECU, applications amounting to about 2.55 million ECU were approved and 1.50 million ECU were rejected.

¹ OJ C 110, 13.5.1981.

² Excluding preparatory studies and pilot schemes.

The table below sets out the applications for assistance by field of intervention and level of priority (excluding preparatory studies and pilot schemes).

| Budget nomenclature | Priorities | | | | | Total |
|---|---------------|---------------|---------------|--------------|---------------|-----------------|
| | 1 | 2 | 3 | 4 | 5 | |
| 6000 Agriculture | 13.70 | - | - | - | - | 13.70 |
| 6001 Textiles | 24.22 | 8.21 | - | - | - | 32.43 |
| 6010 Young people - Training | 220.37 | 234.43 | 382.35 | - | - | 837.15 |
| 6011 Young people - Employment | 19.04 | 68.44 | 108.47 | - | - | 195.95 |
| 6012 Special job creation programme | - | - | - | - | - | - |
| 6031 Migrant Workers | 162.58 | - | - | - | - | 162.58 |
| 6061 Women | 22.09 | 95.51 | - | - | - | 117.60 |
| 60 | 462.00 | 406.59 | 490.82 | - | - | 1,359.41 |
| 6100 Regions | 388.55 | 7.46 | 99.67 | 85.63 | 266.51 | 847.82 |
| 6101 Groups of firms | 17.56 | - | - | - | - | 17.56 |
| 6102 Technical progress | 38.72 | 25.53 | - | - | - | 64.25 |
| 6110 Handicapped persons | 60.65 | 117.75 | - | - | - | 178.40 |
| 612 Consequences of industrial conversion | - | - | - | - | - | - |
| 61 | 505.48 | 150.74 | 99.67 | 85.63 | 266.51 | 1,108.03 |
| 6200 Pilot schemes | - | - | - | - | - | - |
| 60-61 Total | 967.48 | 557.33 | 590.49 | 85.63 | 266.51 | 2,467.44 |
| % | 39.21 | 22.59 | 23.93 | 3.47 | 10.80 | 100.00 |

It will be noted that nearly 86% of applications deemed eligible for Community financing (2 115.30 million ECU) were placed in the first three levels of priority, compared with 83% in 1981. In other words, as in the previous financial year, the Member States departments had effected a selection process before submitting applications for assistance. However, despite these efforts, a large number of applications could not be approved on account of the lack of appropriations.

5. Weighted reduction

Applications classified as priorities - excluding those in respect of preparatory studies and pilot schemes - represented a total of 2 467.44 million ECU, exceeding the available appropriations by some 894.20 million ECU. The discrepancy between needs and resources continued to grow, representing nearly 57 % of available appropriations as against 53% in 1981. The weighted reduction procedure had to be applied to narrow this gap and achieve a balance between resources and needs¹.

As set out in the Guidelines for the Management of the Fund, the weighted reduction procedure is applied where, at the lowest priority level for which appropriations are still available, the volume of applications exceeds that of appropriations. The weighted reduction coefficient for each Member State is calculated on the basis of the average unemployment rate and gross domestic product per capita at current exchange rates. This takes account of the unemployment situation in the various Member States and the financial resources available to each country to deal with it.

The total amount to be deducted is obtained by applying the appropriate coefficient to the applications for each Member State classified at the priority level subject to weighted reduction. The amount thus obtained is apportioned by the Commission between the individual applications after consultation with the national authorities.

¹The cuts made on the basis of the weighted reduction procedure in 1982 amounted to 938.01 million ECU not 894.20 million ECU. The higher figure is accounted for by the inability to use 100% of commitment appropriations, as explained in paragraph 2.

The two tables below illustrate the effects of the application of the weighted reduction procedure by field of intervention and by country:

(a) Amounts approved by field of intervention after application of the weighted reduction procedure

(in million ECU)

| Field of intervention | Total committed | Committed without weighted reduction | Amount subjected to weighted reduction | Amount of III approved | Amount of weighted reduction (III-IV) |
|---------------------------|-----------------|--------------------------------------|--|------------------------|---------------------------------------|
| | I | II | III | IV | V |
| Agriculture | 9.76 | 0.52 | 13.18 | 9.24 | 3.94 |
| Textile | 26.41 | 24.22 | 8.21 | 2.19 | 6.02 |
| Young people - training | 457.28 | 454.80 | 382.35 | 2.48 | 379.87 |
| Young people - employment | 152.24 | 111.88 | 84.07 | 40.36 | 43.71 |
| Migrant workers | 49.51 | 1.08 | 161.50 | 48.43 | 113.07 |
| Women | 27.35 | 22.09 | 95.51 | 5.26 | 90.25 |
| Regions | 607.99 | 581.31 | 266.51 | 26.68 | 239.83 |
| Groups of firms | 17.56 | 17.56 | - | - | - |
| Technical progress | 58.88 | 38.72 | 25.53 | 20.16 | 5.37 |
| Handicapped | 122.45 | 60.65 | 117.75 | 61.80 | 55.95 |
| Pilot schemes | 2.55 | 2.55 | - | - | - |
| Total | 1,531.98 (x) | 1,315.38 | 1,154.61 | 216.60 | 938.01 |

(x) The discrepancy between the figures relating to "amounts committed" in the various tables stems from the use of a single exchange rate - that applying in December 1982 - for the "non-budget" tables. Furthermore, these tables take account of Commission decisions as a whole; no account is taken of refunds during the current year.

(b) Amounts approved after application of the weighted reduction procedure by country

(in million ECU)

| | Applications subject to weighted reduction I | Weighted reduction indicator II | Amounts approved (x) III | Amounts allocated as percentage of I IV |
|----------------|---|------------------------------------|-----------------------------|--|
| Belgium | 21.16 | 1.28 | 4.93 | 23.3 |
| Denmark | 39.28 | 0.82 | 10.20 | 26.0 |
| Germany | 305.61 | 0.53 | 25.84 | 8.5 |
| France | 367.18 | 0.82 | 44.98 | 12.3 |
| Greece | - | - | - | - |
| Ireland | 0.52 | 2.57 | 0.29 | 55.8 |
| Italy | 137.33 | 1.64 | 39.10 | 28.5 |
| Luxembourg | 0.67 | 0.08 | 0.03 | 4.5 |
| Netherlands | 25.84 | 0.87 | 4.36 | 16.9 |
| United Kingdom | 257.46 | 1.45 | 71.02 | 27.6 |
| Total | 1,155.05 | - | 200.75 | 17.4 |

(x) The amounts approved do not depend solely on the application of the weighted reduction indicator to the volume of applications submitted by each country and classified at the lowest level of priority, but also on the degree of mismatch in each field of intervention between the total volume of applications by each country and available appropriations.

These two tables show that as in 1981, apart from "Groups of firms", the weighted reduction procedure had to be applied to all fields of intervention. The overall amount affected was 938.31 million ECU (as against 704.23 million in 1981), i.e. 38% of the total volume of applications classified as priorities and an increase of more than 33% over the previous year.

In absolute terms the weighted reduction was highest for "young people" and "regions" (423.58 million ECU and 239.88 million ECU respectively). However, the proportion of applications to which it was applied was highest for "migrant workers" and "women". In both cases, the amount of the reduction was far in excess of the amount committed - in some cases by as much as 300%.

6. Article 9(2) of Council Decision 71/66/EEC

This provision requires that at least 50% of the budget of the Fund be reserved each year for operations carried out under Article 5(1) of the above Decision in the European Regional Development Fund regions which are eligible for aid.

The effect of this provision in 1982 was as follows:

| | <u>(million ECU)</u> |
|--|----------------------|
| I. Budget allocation | 1,242.76 |
| II. Commitment appropriations entered in the budget for operations under Article 5(1) of Council Decision 71/66/EEC | 663.85 |
| III. Commitment appropriations to be set aside pursuant to Article 9(2) of the abovementioned Decision (50% of total) | 621.38 |
| IV. Remaining commitment appropriations available for use under Article 5(1) of Decision 71/66 for operations outside ERDF regions | 42.47 |

As a result of this calculation, only 42.47 million ECU were available to finance operations in the categories "technical progress", "groups of firms" and "handicapped persons" in regions other than ERDF regions.

B. PAYMENTS

1. Appropriations available

Payment appropriations amounted to 1 088.83 million ECU in 1982, made up of the budget allocation of 911.32 million ECU plus 73.01 million ECU carried over from the previous year, in addition to transfers on 19 October and 21 December totalling 104.5 million ECU. The amounts carried over represented the unused part of appropriations made available in 1981, particularly in respect of "regions". The transfers were aimed at supplementing the funds available under budget item 6010 (training for young people) by a sum of 64.5 million ECU to avoid a repetition of the situation in the previous year when available appropriations under this item were insufficient to cover all the claims for payments submitted.

There was an increase of 269.75 million ECU (32 %) in the payment appropriations as compared with 1981 (819.08 million ECU).

2. Utilisation of appropriations

Out of an available amount of 1 088.83 million ECU, a sum of 905.58 million ECU was used in 1982 compared with a total of 745.85 million ECU in 1981.¹ The appropriations remaining at the end of the year (183 25 million ECU) were carried over to the following year and no unused appropriations were cancelled.

Although payments amounting to 159.73 million ECU were higher than payments made in 1981, these figures nevertheless reflect a relatively low rate of utilization (83.17%). This result is partly due to an additional transfer of 40 million ECU made at the end of December to item 6100 - Regions - from budget chapter 61, which at that time did not show any particular payment needs. Certain other circumstances also played a part in preventing maximum utilization of available payment appropriations in 1982:

¹The discrepancy between the figures relating to "amounts paid" in the various tables is due to the use of a single exchange rate - that of December 1982 - for "non-budget" tables. These tables have been set out in a simplified form disregarding monthly updatings in the accounts and taking into account the amounts paid at the exchange rate in effect in the month concerned.

- approval of a fifth group of applications in December, too late for requests for advances to be received before the year end. This group of decisions directly concerned applications amounting to 260.57 million ECU and indirectly another group of applications the subject of partial decisions when the fourth group of applications had been approved but for which applications for advances could not be submitted. The fifth group of decisions could not have been considered earlier in the year since it had only been made possible as a result of new appropriations made available through the transfer of 104.5 million ECU in the second half of October 1982;
- late presentation (30 December) of a group of payment claims amounting to about 30 million ECU;
- holding over of a group of payment claims concerning operations under investigation by the national authorities (about 6 million ECU). Paradoxically, whilst a substantial amount was still unused at the end of 1982, applications for assistance amounting to 5 million ECU could not be satisfied for lack of appropriations under budget heading 60 - in particular items 6000 (Agriculture) and 6011 (Young people : Employment).

In normal circumstances it would have been possible, by means of transfers between Chapters, to provide the budget headings concerned with the appropriations required. However this could not be done as these claims for payment were not submitted to the Commission in time to initiate the necessary transfer procedure before 15 October as required under Article 21 of the Financial Regulation in the case of transfers to be approved by the budgetary authority.

3. Payments made

Payments relating to commitments entered into in 1982 amounted to 434.65 million ECU - an increase of about 50% against 1981 for this type of payment and representing, as in 1981, about 29% of the total of the appropriations committed.

This figure might have been higher if a large number of commitments had not been entered into too late in the year to allow for the presentation of new requests for payment of the first advance.

The table below gives a breakdown of payments made in 1982 by Member State and year in which appropriations were committed:

(million ECU)

| Country | 1975 | 1976 | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | TOTAL |
|----------------|------|------|------|-------|-------|--------|--------|--------|--------|
| Belgium | - | - | - | 0,07 | 8,05 | 7,62 | 4,51 | 3,70 | 15,95 |
| Denmark | - | - | - | - | 0,15 | 2,86 | 2,38 | 12,41 | 17,80 |
| Germany | - | - | 0,26 | - | 7,97 | 14,45 | 23,56 | 34,23 | 80,47 |
| France | - | - | 0,11 | 1,47 | 2,42 | 28,19 | 51,56 | 38,13 | 121,88 |
| Greece | - | - | - | - | - | - | 7,08 | 16,53 | 23,61 |
| Ireland | - | - | - | - | 5,07 | 12,73 | 22,70 | 74,41 | 114,91 |
| Italy | - | - | 6,27 | 7,45 | 40,63 | 37,23 | 78,54 | 89,40 | 259,52 |
| Luxembourg | - | - | - | - | 0,52 | 0,55 | - | 0,03 | 1,10 |
| Netherlands | - | - | 0,28 | - | 0,38 | 4,05 | 1,75 | 1,85 | 8,31 |
| United Kingdom | - | - | 0,14 | 1,46 | 3,45 | 58,00 | 44,32 | 163,96 | 271,33 |
| Total | - | - | 7,06 | 10,45 | 60,64 | 165,68 | 236,40 | 434,65 | 914,83 |

4. Pattern of payments

The following two tables illustrate some of the most significant trends in the pattern of payments in recent years:

(a) Advances and other forms of payment as part of total payments made (1979 to 1982)

(million ECU)

| Year | Advance payments | Additional and final payments | Total |
|------|------------------|-------------------------------|----------------|
| 1979 | 441,79 (74,3 %) | 152,81 (25,7 %) | 594,60 (100 %) |
| 1980 | 479,08 (65,6 %) | 250,82 (34,4 %) | 729,90 (100 %) |
| 1981 | 470,27 (63,79 %) | 266,89 (36,21 %) | 737,16 (100 %) |
| 1982 | 675,07 (73,79 %) | 239,81 (26,21 %) | 914,88 (100 %) |

(b) Annual change in appropriations committed and unclaimed balanced at the end of each year (1977 to 1982)

| Year | Appropriations committed | % change | Appropriations unclaimed at year end | % change |
|------|--------------------------|----------|--------------------------------------|----------|
| 1977 | 616,63 | - | 953,37 | - |
| 1978 | 568,08 | - 7,87 | 1,221,15 | + 28,09 |
| 1979 | 774,45 | + 36,32 | 1,341,00 | + 9,81 |
| 1980 | 1,014,93 | + 31,05 | 1,399,88 | + 4,24 |
| 1981 | 996,17 | - 1,85 | 1,375,70 | - 0,30 |
| 1982 | 1,510,28 | + 51,61 | 1,784,56 | + 27,90 |

An analysis of these two tables shows that there has been an abrupt increase in payments of first and second advances, amounting to nearly 74% of the total amounts paid out in 1982. On the other hand, for the first time appropriations used in the form of payments of balances or additional payments have contracted in volume and percentage compared with the previous financial year (Table a). Despite a sharp increase in commitments, there has been no abnormal accumulation of appropriations committed and unclaimed at the end of the financial year (Table b).

There has been a marked reversal in the overall trend since 1979. Until then the volume of appropriations remaining unclaimed at the end of the year was rising in proportion to the volume of appropriations committed each year. At the end of 1978, a significant increase in unclaimed appropriations was recorded even though there had been a decline in appropriations committed.

Since 1979 the amount of appropriations unclaimed at the end of each year has risen much less steeply than the amount of appropriations committed. This was particularly true in 1982 where commitment appropriations increased by over 51% compared with the previous year while at the same time unclaimed appropriations rose by less than 28%.

The decline in requests for payments of balances or additional payments can partly be attributed to the singular increase in amounts released for cancellation in 1982. In addition, in 1982 as in the past the volume of

payments actually made was lower than it might have been. This is clear from the estimates in the table below, where the volume of unclaimed appropriations at the year end is calculated on the basis of net amounts which for various reasons were not included in claims for payment:

| | <u>million ECU</u> | |
|---|--------------------|--------|
| - Appropriations unclaimed at 31.12.1982 | 1,785.73 | |
| <u>Less:</u> | | |
| - Probable volume of cancellations | 150.00 | |
| - Commitments made prior to 1.1.1982 relating to 1983/84 (estimate) | 180.00 | |
| - Commitments made in 1982 for which payments could not have been claimed in the same year (estimate) | 750.00 | |
| - Requests for payment of advances not met owing to lack of appropriations | 5.10 | |
| - Unused appropriations released for re-use in 1983 out of appropriations committed in 1982 | 120.00 | |
| - Payment claims being processed by the Commission | 60.40 | |
| - Proposals for payment suspended pending enquiries by national authorities | 5.56 | |
| Total: | <u>1,271.06</u> | |
| Unclaimed balance: | | 514.67 |

These estimates show that the net balance of appropriations remaining unclaimed (but which could have been claimed) was 36% higher than in the previous year (514.67 million ECU in 1982 against 376.70 million ECU in 1981). This increase, however, is substantially smaller than the overall increase in commitments in 1982 compared with 1981 (+ 51%).

On-the-spot checks

1. In 1982 checks were carried out on 50 operations financed by the Fund. These checks, which are based on Article 5 of Council Regulation No 858/72¹, were conducted either by sample survey or where claims for payment were incomplete or gave rise to doubt and where it had proved impossible to resolve the problems thus posed by letter.

On-the-spot checks were carried out by the authorizing departments and Financial Control and entailed the scrutiny of supporting documents and an examination of the way in which schemes receiving Fund assistance were being implemented. In certain cases additional information was collected for an appraisal of other applications for assistance or claims for payment submitted by the bodies under scrutiny.

Where checks uncovered significant discrepancies between the nature of the scheme and the description of the operations given in the Commission's approval decision, steps were taken to reduce the amount of assistance granted and recover part or all of the advances improperly claimed.

The discrepancies concerned for the most part insufficient grounds for expenditure, non-compliance with special criteria applying to certain types of operation and time scales at variance with those proposed. Time lags in completing projects would appear to be one of the main reasons for failure to use appropriations committed.

Another major cause for discrepancy is that in certain Member States, national and Community criteria for expenditure eligibility are different (age of young persons is the most frequent example observed). The direct consequence of such a difference is the difficulty for the Commission in relying on national controls as a basis for its own.

2. Financial Control, together with the authorizing departments and the Court of Auditors, is scrutinising the management and financing systems used by the national bodies receiving Fund assistance.

In 1982 the systems applied in five Member States came under scrutiny: Denmark, Ireland, Greece, Luxembourg and the United Kingdom.

¹OJ L 101, 28.4.1972, p. 3.

Greece, who is building up a Fund management system was visited by the authorising departments and the Financial Control.

Such scrutiny, as a permanent working instrument between the Commission services and national administrations, will lead to the correction of certain weak points affecting the proper financial management of the Fund, and to the elimination of the difficulties in controlling certain expenses for which national eligibility criteria differ from those of the Fund.

IV. ACTIVITIES BY FIELD OF INTERVENTION

1. Persons leaving agriculture

Volume of applications and commitment appropriations

The volume of applications for aid for persons leaving agriculture, made pursuant to Council Decision 72/428/EEC¹, amounted to 14.7 million ECU as compared with 18.1 million ECU in 1981, i.e. a reduction of 19%. In 1980 the figure was 16.3 million ECU.

This reduction is due to the fact that in 1981 - for the first time - a major weighted reduction had to be applied to the applications classified as being of a priority nature (67%), which caused promoters to submit some of their applications, which had traditionally been submitted under Article 4 (Agriculture), under other headings covering agricultural and rural areas.

Six Member States submitted applications on the same scale as in 1982: France (56% of the total), Italy (28.4%), Ireland (3.7%) Germany 8% Greece (3.5%) and the Netherlands (0.1 %).

The appropriations available amounted to 9.8 million ECU, 7.5 million of which were a budget allocation and 2.3 million were refunded appropriations, i.e. an increase of 4 million ECU over 1981. Despite this increase and the drop in the volume of applications classified as of a priority nature, as compared with last year, a weighted reduction had to be applied. It was applied to a sum amounting to 4 million ECU and representing 28% of the priority applications as compared with 12 million ECU in 1981 (67%).

Selection criteria and general characteristics of applications

As in previous years, only one level of priority was accorded in the agricultural sector to operations:

- coming within the framework of specialised measures for the agricultural sector or for the rural environment;

¹OJ L 291 of 27.12.1972, p. 158; OJ L 337 of 27.12.1977, p. 10.

- taking place in disadvantaged areas with an income below the Community average or certain hill-farming areas¹.

These operations must be intended for farmers, farm workers or family helpers who are leaving agriculture or who left agriculture no more than two years ago to take up employment in another sector or who wish to engage in another activity as well as farming.

Applications classified as of a priority nature amounted to 13.7 million ECU, while non-priority operations amounted to 959,200 ECU, i.e. 6.5% of the total.

The applications approved were of a similar nature to those in previous years. The vast majority of the training operations were carried out by national bodies (Germany, France, Greece) or regional bodies (Italy). These operations trained persons formerly occupied in the agricultural sector for a wide variety of occupations in the building trade, the engineering industry, the agri-food sector, the catering and hotel trade, the operation and repair of machinery, etc.

For the first time an operation carried out in most regions of Greece was devoted specifically to the training of 1,394 farmers' wives enabling them to engage in another activity as well as farming: farm holidays, the manufacture of foodstuffs, the manufacture of textile goods and so on.

Only France and Italy carried out - in addition to their national or regional programmes - ad hoc operations in limited areas intended to enable the local population to remain where they were in an attempt to combat the abandonment of these areas and encourage their economic development (Brittany and the Mezzogiorno).

These operations were usually preceded by an enquiry into the economic situation of the areas in question and a search for activities suited to their specific characteristics. These enquiries and the development projects resulting from them were carried out with the participation of local business circles, associations, trade unions and educational bodies interested in collaborating in a joint endeavour.

¹ Areas defined by Council Directive 75/268/EEC, OJ L 128, 19.5.1975, p. 1.

The training given was related mainly to a variety of occupations in the tourist sector, the agri-food sector and agriculture-related trades - for example, persons able to operate and repair complex machinery and qualified staff for cooperatives and small and medium-sized undertakings.

Beneficiaries

Bearing in mind that the weighted reduction method was applied, the programmes approved should benefit 7,558 persons, 2,754 in the absolute priority regions (Mezzogiorno), 3,016 in the other priority regions and 1,788 in the other regions.

Applications raising specific problems

One application was introduced following three others of the same nature approved in consecutive years since 1979. It concerned the training of persons leaving agriculture to exercise a nursing profession. The training was organised through educational bodies attached to hospitals.

The problem was to determine whether the application could yet again be classed as priority.

The services of the Fund claimed that previous training for para-medical professions had been exceptionally approved within the guidelines for a period of three years in order to meet a need for qualified personnel in these professions. In view of the fact that similar operations restricted to a three-year financing period were approved in the Young People's and Regions areas, it was deemed suitable to accord equal treatment by classifying this application as non-priority. The Committee approved the proposal.

2. Persons working in the textile and clothing sectors

Volume of applications and commitment appropriations

The volume of applications for assistance submitted for workers in the textile and clothing sector pursuant to Council Decision 76/206/EEC¹ amounted to 36 million ECU, against 36.6 million ECU in 1981.

The fact that the volume has not increased does not mean that there has been an improvement in the sector, where, indeed, the situation continues to deteriorate. However, the shortfall in financing resources in 1981 led the responsible authorities to submit their applications, where these were eligible, under other Fund intervention headings - technical progress, groups of undertakings, regions - which they thought more likely to provide the required financing. Because of the shortfall in appropriations in 1981 only 77% of the applications classified as first-level priority were financed. Not one of the applications classified as second-level priority was approved.

In 1982 the budget allocation for this area was 19.5 million ECU. Taking refunds into account, total resources amounted to 26.5 million ECU against 16.05 million ECU in 1981.

Thus available appropriations rose by 65%, while the volume of applications submitted remained roughly the same.

Consequently, applications classified as first-level priority were financed in full. Those classified as second-level priority were financed on the basis of a weighted reduction amounting to 26% of the assistance applied for.

The 26.4 million ECU break down as follows:

| | <u>Amount requested</u> | <u>Amount approved</u> |
|----------------|-------------------------|------------------------|
| France | 5.542 | 5.265 |
| Belgium | 0.379 | 0.379 |
| Netherlands | 1.119 | 0.205 |
| Germany | 3.276 | 1.698 |
| Italy | 17.205 | 12.438 |
| United Kingdom | 7.558 | 5.433 |
| Ireland | 0.641 | 0.641 |
| Greece | 0.355 | 0.355 |

¹OJ L 39, 14.2.1976, p. 39; OJ L 337, 27.12.1977, p. 10.

Selection criteria and general characteristics of applications

The guidelines applied were the same as in 1981.

First-level priority was reserved for operations for:

- persons leaving the sector in areas with a high unemployment rate;
- persons remaining in the sector, when the operation formed part of a conversion or restructuring programme.

Second-level priority was accorded to other operations on behalf of persons remaining in the sector or leaving it, where training corresponded to the requirements of jobs assured in advance by employers.

The applications approved bore the same characteristics as those submitted the previous year. They showed that it was vital for undertakings to:

- drop low-technology processes producing goods subject to strong competition from low-priced products from non-Community countries;
- modernize their plant and bring the qualifications of their staff into line with more up-to-date production and management methods;
- produce high-quality goods meeting fashion requirements.

As in 1981, only applications relating to activities regarded as being viable within the textile sector were accorded priority. No applications were approved for activities related to products which are selling very poorly within the Community or are no different from low-price products originating in non-Community countries - where these activities involved an increase in production capacity likely to create new employment problems.

First-level priority was accorded to applications relating to a radical conversion or restructuring involving a change of product, while second-level priority was accorded to those relating to modernisation but not involving a real change in the type of production.

A not inconsiderable proportion of the applications approved - 25% in terms of persons - related to workers leaving the textile and clothing sector to take up employment in a wide range of other sectors, in particular the electronics, engineering, electrical, plastics and building industries, and the services sector.

The average duration of training courses again varied considerably - from 200 to 700 hours in most cases.

Beneficiaries

The programmes approved in 1982 are estimated to benefit 16,252 workers. They break down by Member State as follows:

| | |
|----------------|-------|
| Belgium | 180 |
| Germany | 905 |
| Denmark | - |
| Greece | 186 |
| France | 4,063 |
| Italy | 7,809 |
| Ireland | 900 |
| Luxembourg | - |
| Netherlands | 117 |
| United Kingdom | 2,092 |

The breakdown by regions was: 2,578 workers in absolute-priority regions, 9,883 workers in the other priority regions and 3,791 workers outside priority regions.

3. Migrant workers

Volume of applications and commitment appropriations

The volume of applications for assistance for migrant workers and their families, pursuant to Council Decision 77/803/EEC¹, amounted to 196 million ECU, i.e. 5% more than in 1981.

As was noted in previous years, the increased volume of applications for assistance was not due to a rise in the number of migrant workers in the Community. The reason is a gradual shift in the applications submitted by governments and private bodies towards operations aimed at the children of second-generation migrant workers, since the preparation of these children for adequate vocational training is a matter of concern for the relevant authorities.

The appropriations allotted to this field of intervention amounted to 48 million ECU, i.e. a budget allocation of 47.6 million ECU and 0.4 million ECU in refunds.

As in past years, the discrepancy between the volume of applications submitted and the available resources was considerable. To mitigate the effects of this discrepancy it was necessary to apply a weighted reduction coefficient to all the applications classified as being of a priority nature - which resulted in financing being awarded to only 29% of the total of applications, i.e. some 51 million ECU.

This led to financing problems for a number of operations. These were overcome by means of a joint effort with the Member States, involving increased national assistance and a limitation or carry-over of operations.

Selection criteria and general characteristics of applications

Priority was accorded to:

- operations intended for persons moving from one Community country to another; these operations must be part of integrated programmes and

¹OJ L 337, 27.12.1977, p. 12.

apply to at least two phases of the migration process; these two phases need not necessarily involve the same persons;

- the training or further training of social workers and teachers working with migrant workers and/or members of their families;
- demonstration projects aimed at improving the standard of special teaching for migrant workers' children; for such operations, intervention by the Fund will not exceed three years;
- language tuition or vocational preparation which includes a substantial element of language tuition. Such operations must aim at integrating migrants into their social and occupational environment.

These operations may also include operations carried out specifically for migrant workers newly arrived in the Community in emergency conditions.

Integrated programmes

The total cost of integrated programmes amounts to 25 million ECU, or 15% of the total volume of priority applications. This year most of them were again submitted by Germany and Italy.

The programmes were made up mainly of language courses for migrant workers and their families, reception, information and guidance activities. A growing proportion of the programmes was geared to preparation for a return to the migrant workers' country of origin.

Integration measures

Unlike the integrated programmes, these measures are not limited to workers from Community countries.

The volume of applications approved for integration measures amounted to 130 million ECU, i.e. some 81% of the total volume of priority applications.

In 1982, as in previous years, they related mainly to language courses. However, some applications included vocational guidance and preparation for working life, particularly applications from Germany, Belgium, Denmark and France.

Some applications were for demonstration projects carried out in Germany, Belgium and France. These projects were aimed, above all, at solving the specific problems involved in satisfactorily integrating the children of migrant workers, mainly by means of special language courses and by establishing closer contacts with families. They showed an increased interest in multi-cultural education. This approach is particularly evident in programmes submitted by the United Kingdom.

Training of teachers and social workers

The volume of operations approved for the training of teachers and social workers amounted to 5 million ECU, i.e. 3.5% of the total priority applications. In 1981 this was 1 million ECU. Thus, since the volume of applications for assistance increased by only 5% over the previous year, the increase in the number of such operations shows that the Member States are paying greater attention to them. This increase derived from the implementation of multi-cultural training projects necessitating improved preparation of a larger number of teachers and social workers.

Beneficiaries

Taking account of the application of the weighted reduction method, it is estimated that assistance provided by the Fund should help to educate 95,000 migrant children, to provide special language courses for 180,000 young migrants and adults, and provide specialised training for 3,500 teachers and social workers.

4. Young people

Volume of applications and commitment appropriations

The volume of applications under Council decision EEC 75/459¹ for assistance for young people reached 1.366 million ECU in 1982, a 50% increase over the previous year.

Of this, 1.108 million ECU concerned training programmes and 250 million ECU concerned employment promotion under Council Regulation EEC No 3039/78².

This was the most significant increase to date, particularly in the case of applications relating to training schemes, which increased by 53% by volume between 1982 and 1981 as against 10% between 1980 and 1981.

The budget allocation of 478 million ECU (340 million ECU for training and 138 million ECU for employment aids) was augmented by refunds and transfers amounting to 155 million ECU, bringing the total available appropriations in this field to 633 million ECU, i.e. 35.3% higher than in the previous year (409 million ECU).

General characteristics of applications and selection criteria

Priorities were identical with those established for the previous year.

First priority:

- vocational preparation and pre-training operations, training or retraining programmes related to labour market needs, recruitment or work in the public interest, for young people in Greenland, French overseas territories, Greece, Ireland, Northern Ireland and the Mezzogiorno;
- training or re-training operations for women to promote a better mix of job opportunities in new occupations and occupations in which women are under-represented.

¹OJ 199, 30.7.1975, p. 36; OJ L 337, 27.12.1977, p. 10.

²OJ 361, 23.12.1978, p. 3.

Second level priority was accorded to:

- vocational preparation or pre-training or re-training programmes linked to labour market needs, recruitment or work in the public interest for young people in areas located in regions given priority in respect of youth unemployment¹ and affected by serious industrial restructuring or conversion problems for which Community policies have been adopted; training and retraining operations must be accompanied by conversion and restructuring programmes.

The Commission draws up a list of youth unemployment priority regions on the basis of the results of the biennial Community labour force survey. The unemployment rate must be 30% higher than the national average in countries in which the regions overall have a rate lower than the Community average.

Industrial restructuring and conversion areas are defined on the basis of per capita gross domestic product and unemployment rate (to assess the general economic and social situation) and the degree of dependence on employment in four sectors (coal, iron and steel, textiles/clothing and shipbuilding). Accordingly, following discussions with the Member States concerned, a list was drawn up of the areas in which employment was concentrated in one or more of these four sectors.

Third level priority was accorded to:

- vocational preparation and pre-training operations and training and re-training programmes linked to labour market needs, recruitment or work in the public interest for young people located in areas in regions to which priority was accorded on the basis of youth unemployment, classified as second priority.

Operations under these three levels of priority are reserved for young first job seekers except in the case of recruitment operations or work in the public interest and operations for women accorded first priority.

¹See list of priority regions based on youth unemployment, OJ C 42, 27.2.1981, p. 3.

Exceptions:

Apart from the abovementioned priority levels, the following may be financed in exceptional cases and for a maximum of three years:

- operations to improve local training facilities;
- new training/work experience schemes¹ in the context of experimental training projects for a limited number of participants (200).

The Commission assesses the situation of the various categories of young people in the light of national legislation and practice.

The three priority levels were applied with the same desire for simplification and harmonization prevailing when they were re-cast in 1981.

The number of applications approved was an indication of the worsening youth unemployment situation and the Member States' growing interest in Social Fund assistance. Out of 90 applications, 18 related to about 88% of potential beneficiaries of Fund assistance. Of these, 12 applications concerned between 10,000 and 50,000 people and four between 50,000 and 100,000 people. The two others were submitted by the Minister responsible for Employment in France (128,100 people) and the Department of Employment for the Manpower Services Commission (224,300 people) in the United Kingdom.

Training programmes

More than 90% of approved applications related to major national programmes. National public authorities (notably in Belgium, Denmark, France, Ireland, Netherlands and the United Kingdom) or public or private bodies with national scope (Italy) were involved. In other cases (Germany and Italy) the regional authorities ensured the implementation of national programmes while also organizing their own programmes. Lastly, there was little increase in the number of programmes implemented by local authorities except in the case of training for instructors and organisers to implement operations for particularly disadvantaged young people.

The most outstanding innovation was the new transitional programme launched in the United Kingdom as a result of the evaluation of the Youth Opportunities Programme.

¹Council Resolution of 18.12.1979 on linked work and training for young people, OJ C 1, 3.1.1980, p. 1.

Some of the key elements of the New Style Training Places scheme are: extension of training from six to 12 months; integration of all training components - induction, guidance, acquisition of common course skills, theoretical training, planned work experience and general education; the theoretical and practical aspects of the training are assessed on the basis of a record of achievements and noted on a certificate to facilitate the approach to potential employers. This large-scale experiment began in 1982 and affected about 50,000 young people; it is to be continued in 1983.

The volume of first priority programmes approved totalled 220.4 million ECU. As in preceding years, the programmes mainly concerned vocational preparation for disadvantaged young people without training who make up the large majority of the long-term unemployed.

Training programmes for young women involved approximately 35,000 persons, i.e. 51% more than in the previous year. Programmes presented by France (17,000 persons) and Germany (10,600 persons) were on a larger scale. In Germany, placement at the end of the training period in the previous year was 75%. The programmes mainly concern training giving access to technical and industrial occupations (adjuster-fitter, turner, precision tool operator, etc.). A variety of specific programmes were also implemented, e.g.: landscape gardener, zoo keeper (Germany), warehouseman (France), micro and macro industrial photography (Italy), motor vehicle mechanics (United Kingdom).

Programmes classified as second priority amounted to 234.4 million ECU. These programmes were implemented in re-structuring or conversion areas with weak economic structures. In the case of vocational preparation or pre-training, the schemes had to be linked to labour market needs. Training and re-training schemes had to support conversion or restructuring programme.

In both cases it appeared, when the applications were submitted and examined, that in many cases the Member States had experienced particular difficulty in meeting the selection criteria mentioned above. The Commission was bound to ensure that the operations it supported were well adapted to labour market needs in areas where employment is threatened by the decline of dominant industries to a degree which has resulted in the implementation of Community policies.

Programmes classified as third priority amounted to 382.4 million ECU. A weighted reduction of 264.0 million ECU, i.e. 23.8% of the total volume of applications relating to training schemes, was applied to this last level of priority.

Experimental training schemes

Improvement in local training structures

The applications exceptionally classified at this level of priority concerned specific local operations to meet unfilled training needs. These operations corresponded to job openings that were listed or assumed in known firms. They reflected a wish to improve training structures corresponding to the promotion of new technology and modern management structures in small and medium-sized businesses. The operations affected 3,160 young people, mostly long-term unemployed, for the large part in Italy (2,400) and France (670).

Linked work and training

The new training/work experience operations related to the Council Resolution of 18 December 1979¹. In this Resolution, the Social Fund was requested to cooperate with the Member States in the spirit of Article 7 of Regulation (EEC) 2396/71 with regard to preparatory studies and pilot schemes. In application of the guidelines the Commission approved 29 applications involving approximately 3,770 young people, that is a slight increase on the previous year (18 applications for 3,000 young people).

These applications covered a wide variety of operations which made it possible to implement a broad range of experimental schemes.

For example, in Belgium several operations were carried out subsequent to surveys by placement officers in the Regional Employment Office of small and medium-sized businesses in the Liège region with the prime object of identifying qualifications needed to take up available jobs. The operations were carried out in liaison with and under the supervision of the Regional Employment Committee, composed of representatives of the employers, trade unions and Ministry of Education.

¹OJ C 1, 3.1.1980, P. 1. The report to be presented by the Commission on the application of this resolution, will shortly be sent to the Council.

In one instance, research workers were incorporated in the team responsible for training in the application of a new technology creating jobs in a specialised firm engaged in the manufacture of an electronic pressure gauge.

In Germany, the Bundesinstitut für Berufsbildung coordinated several experiments in Bochum, Paderborn and Freiburg designed to identify difficulties encountered by young second generation migrants in the transition to working life and to set up new teaching methods for them.

A joint Germano-Italian programme under the Berlin Senate and the ENAIP (Ente Nazionale ACLI Istruzione Professionale) administered by a joint team provided multi-skill training for 38 young Germans and 37 Italians from the Calabria region in six groups of trades in the building industry. This project combined the benefits of a training/work experience scheme with instruction and work abroad.

In Greece, a programme gave 25 young islanders the possibility of becoming marine technicians in actual working conditions on vessels operated by a cooperative recently set up by the inhabitants of the Dodecanese Islands.

In France, in the Rhône-Alpes region, a project was organised with the aim of training disadvantaged young people threatened with marginalisation up to a sufficient level of skill in three years to take up employment in cooperatives or other types of association in sectors with a high probability of employment.

In Ireland two operations were carried out for young people with no access to traditional training or employment, to furnish them with the means to acquire skilled training or take up semi-skilled work in the distribution sector, catering trade or tourism.

In Italy, about a dozen new programmes were set up to provide specific job-related training in printing, new technology, and new management techniques for which there are no traditional training programmes. In other cases, experimental schemes for final classes in technical and vocational institutions were carried out to compare knowledge acquired with actual work experience.

In the Netherlands, to improve the quality of the results, a programme integrating two existing measures - the creation of additional jobs and traditional skilled training - was put forward.

In the United Kingdom, a demonstration project was designed in the context of the re-organisation of several major national programmes mentioned earlier. The results achieved in each theoretical and practical training scheme can be measured and assessed by the individual concerned on the basis of predetermined levels and increasing degrees of difficulty.

Training included a knowledge of information technology and the use of computer keyboards. The individual assessment of the overall training is accorded in a training report and a certificate is awarded.

As a general rule, experimental training/work experience schemes financed by the Fund were not the forerunners of a parallel training network. Despite their diversity, they reflected the joint concern of all the Member States to alleviate by this means certain specific inadequacies in traditional training systems affecting the most disadvantaged, and in addition to experiment with new training methods that could have a substantial impact on vocational integration measures for young people, including in certain cases the teaching methods used in the final years of traditional education.

These points were discussed at the first meeting held to evaluate the experimental training/work experience schemes financed by the Fund (Brussels, 10 and 11 March 1982). On that occasion 50 representatives of the Member States and the promoters described their operations, particularly stressing problems of recruitment, instructor training, distribution of the time between theoretical and on-the-job training, coordination and interface between the two types of training, supervision and recognition of training completed. Other aspects involved in conducting the operations were also discussed, e.g. financing, working conditions and social protection, individual follow-up and self-evaluation techniques. An experiment in cooperation between Belgian and Greek promoters was prepared.

Employment aids

In volume terms, France (34%) and the United Kingdom (44%) accounted for the largest share of applications for recruitment subsidies, while Denmark (24%), Belgium (17%), the United Kingdom (16%) and Ireland (13%) were in the lead as regards community service projects.

First priority was accorded to applications submitted by Greenland, the French overseas territories, Ireland, Northern Ireland and the Mezzogiorno, for a total of 60 million ECU, representing respectively 23% for recruitment subsidies and 74% for community service projects out of total resources available for employment aids.

Second level priority was accorded to operations in areas with weak economic structures affected by restructuring or conversion measures; the total granted was 68 million ECU, representing respectively 74% for recruitment subsidies and 26% for community service projects.

Third level priority was accorded to operations in the remaining priority "young people" regions; in this case the total granted was 108.47 million ECU, representing respectively 77.5% for recruitment subsidies and 14.8% for community service projects.

A weighted reduction of 43.72 million ECU was applied to third level priority recruitment subsidy operations.

The estimated number of beneficiaries, about 290,500, was broken down as follows: 79% for recruitment subsidies for additional jobs in firms, 21% for job creation under community service projects to meet unfilled needs.

Beneficiaries

It is estimated that operations approved in 1982 will help to train 501,910 young persons and find employment for some 290,500 people under the age of 25.

5. Women

Volume of applications and commitment appropriations

The volume of applications relating to measures for women provided for by Council Decision 77/804/EEC¹ reached 118.68 million ECU in 1982, compared with 103 million in 1981 (+ 15%).

With the exception of Denmark, applications were submitted by all the Member States, and for the first time by Luxembourg. Germany alone submitted applications amounting to nearly 90% of the total assistance requested.

In 1981 Germany submitted 87% of these applications, against 60% in 1980.

The tendency of the Member States to introduce a growing proportion of applications eligible for first priority classification, as pointed out in last year's report, continued in 1982. This was particularly marked for France and the United Kingdom.

The budget allocation for this field of intervention amounted to 22.8 million ECU; refunds of 4.5 million ECU brought total available appropriations up to 27.2 million ECU, as opposed to 22.5 million ECU in 1981.

Despite this substantial increase, available resources were sufficient to finance no more than 23.2% of the applications eligible for priority as against 21.8% in 1981.

As in previous years, and in similar proportions, Germany remained the principal beneficiary of assistance, receiving 15.6 million ECU, i.e. 57.05% of total commitment appropriations, against 23% for France.

Selection criteria and general characteristics of applications

The Commission established the same priorities as for 1981 and 1980.

¹OJ No L 337, 27.12.1977, p. 13.

First priority was accorded to operations to promote a better mix of job opportunities in new occupations and occupations in which women are under-represented.

Second level priority was accorded to operations concerned with jobs traditionally occupied by women but intended for those who were victims of mass dismissals, or operations to enable women to obtain a more highly skilled job than the one previously held.

Operations for women with an education above secondary level could not be taken into account until all the applications for operations for women with no educational qualifications had been met.

The volume of applications classified as first priority amounted to 22.09 million ECU compared with 17 million in 1981 and 14 million in 1980. They were financed in full. Of this amount, 10.5 million ECU were allocated to Germany, that is, 47.5% of the total.

The majority of these operations concerned training for industrial or service occupations where women are under-represented.

In Greece, where the promotion of women's work outside traditional occupations is a relatively recent phenomenon, and for which no application had been approved in 1981, submitted two applications. One concerned training for occupations such as office machine operation, assembly of fibre optics, electronic and telecommunications components, as well as self-employed work.

A Luxembourg application based on a proposal by the Luxembourg Committee on Women's Employment concerned training in welding.

Several sponsors submitted training projects for new technologies, particularly electronics and information technology.

In Leeds, in the United Kingdom, a project forming part of an overall investment programme involving job creation was designed to provide a basic training in electronics as preparatory training for control systems supervision and maintenance engineers.

In Liguria in Italy training was given for assistants in distributed data-processing and office electronics. It was designed to prepare participants for basic data utilisation in such areas as archives management and documentation centres.

In France, in the Paris area and the Centre-East, several operations were developed to train technicians in electronics, digital techniques and microprocessors.

Attention should, however, be drawn to the fact that the assessment of the priority level of applications is not concerned with the sector of activity itself, but the occupation or function for which training prepares women and the diversification of the range of jobs open to them.

In 1981, the Social Fund financed an application for assistance from the United Kingdom to cover the child-minding costs for participants in a training operation on the premises of a training centre. In 1982, six similar applications were also granted for the United Kingdom.

The volume of applications classified as second priority amounted to 95.51 million ECU. After financing first priority applications, 5.25 million ECU were available; weighted reduction had therefore to be applied to the second priority applications.

Beneficiaries

The number of women over 25 estimated to be benefiting under this intervention field was approximately 14,000, i.e. nearly 31% more than in 1981. Among these, 13,400 would be involved in first priority operations.

Under "young people", training operations were approved for women under 25 for new occupations or occupations where they are under-represented. About 35,000 - nearly twice as many as in 1981 - should benefit from these measures.

In the other intervention fields of the European Social Fund, men and women are of course placed on an equal footing. Figures for 1980 contained in the national reports forwarded to the Commission in 1982 show that about one-third of the beneficiaries of Social Fund operations are women.

6. Regions

Volume of applications and commitment appropriations

The volume of applications for assistance concerning measures for workers in less-developed or declining regions submitted under Article 5 of Council Decision 71/66/EEC¹ rose to 858 million ECU, an increase of about 27% in 1981. The 1981 increase over 1980 was only 12%, of the same order as the increase for 1980 on 1979.

The budget allocation for this area of intervention amounted to 478 million ECU. Taking account of refunds - which, as in 1981, were substantial - and a transfer of 40 million ECU, total available appropriations for commitment amounted to 620 million ECU against 466 million in 1981, an increase of about 33%.

However, the discrepancy between available resources and the volume of applications in 1982 was even more marked than in previous years. Applications classified in the first four levels of priority were financed in full; a weighted reduction was applied to applications classified as fifth priority, with the result that 10% of the amount requested was granted as against 12.7% in 1981 and 34% in 1980.

Selection criteria and characteristics of applications

As in the previous year the guidelines for 1982 established five levels of priority.

First priority

Upgrading and training operations, with recruitment where new jobs were created, and resettlement operations following recruitment decided in advance by employers, for workers in the French overseas departments, Greenland, Ireland, Northern Ireland, the Mezzogiorno and Greece. Training operations for unemployed workers were to be linked to labour market requirements.

¹OJ L 28, 4.2.1971, p. 15; OJ L 337, 27.12.1971, p. 8.

2) Second level priority

Resettlement operations following recruitment decided in advance by employers; training operations for unemployed workers or workers threatened with unemployment. These operations were carried out in connection with recruitment decided in advance by employers or aimed at maintaining employment.

The operations were for the benefit of workers in regions and areas eligible for assistance from the European Regional Development Fund (ERDF)¹ and affected by serious industrial restructuring or conversion problems with regard to which Community policies have been adopted.

3) Third level priority

Operations identical to those classified as second level priority, for the benefit of workers in other regions and areas eligible for assistance from the European Regional Development Fund.

4) Fourth level priority

Upgrading or training operations or recruitment programmes involving job creation for the benefit of workers unemployed for more than 6 months; recruitment programmes involving job creation for the benefit of unemployed workers recruited by firms employing fewer than 25 people. These operations were for the benefit of workers in the regions and areas referred to under (2) and (3) above.

5) Fifth level priority

Other training operations for workers either unemployed or threatened with unemployment, and recruitment programmes involving job creation, for the benefit of workers in regions and areas referred to under (2) and (3).

Exceptionally and for a maximum of three years, operations designed to improve the efficiency of local training structures could be financed. In assessing the situation of the various categories of workers, the Commission referred to national legislations and practice.

¹Article 3 of Regulation (EEC) No 724/75, OJ L 73, 21.3.1975, p. 1; OJ L 35, 9.2.1979, p.1.

The volume of first priority applications approved rose from 300 million ECU in 1981 to 388,9 million in 1982. The share of commitment appropriations allocated to the six first priority regions represented 64% of the total available. In the past few years this share has varied as follows: 69% for 1981, 52% for 1980 and 64% for 1979. However, given the substantial increase in resources available, the assistance granted to the six regions continued to rise in 1982, by about 30% in nominal terms.

In percentage terms the increase was 5.7% for the French overseas departments, 24.5% for Ireland, 33.6% for the Mezzogiorno, 67.5% for Greece and 68.5% for Northern Ireland.

In real terms, however, the volume of first priority applications fell off to some extent in relation to budget resources; this fall was particularly marked for applications submitted by Greenland, the French overseas departments and Ireland, but less so as regards applications submitted by Italy.

The sharp increase in the appropriations allocated to Greece is explained by the fact that during this second year of Fund intervention the Greek authorities were in a position to submit a far greater number of applications than in 1981.

For Ireland, the increase in commitment appropriations is accounted for - apart from the fluctuations in the parity of the Irish pound - by the participation of a much greater number of firms in the training programmes and by increases in the cost of these programmes.

The Commission continues to attach great importance to the concentration of assistance in the regions. Following the completion of a study on vocational training structures in these regions, the conclusions of which were transmitted to the Member States concerned and the Social Fund Committee in 1982, the Commission is now in possession of valuable information which should enable it to contribute, in agreement with the national authorities, to improving training structures linked to the development of these regions through intervention by the Social Fund.

An example of the training programmes being developed is the one carried out in favour of craftsmen in Réunion, designed to train and establish several thousand craftsmen in various branches over a period of several years. The teacher training scheme, developed on the initiative of the craftsmen's associations, is especially original.

The volume of second priority applications approved was significantly lower: 7.4 million ECU against 12 million in 1981. While operations of this type are in decline in the French steel-producing areas, in the United Kingdom they have nearly ceased altogether (0.7 million ECU against 5 million in 1981). These operations accounted for only 1.2% of the total Social Fund allocation under the heading "regions". However, a certain number of second priority operations were in fact classified as third priority (also financed in full) for practical reasons relating to the grouping together of regional projects.

Third priority operations approved totalled 99.7 million ECU, corresponding to 16.4% of the appropriations under the heading in question and representing an increase of 57% over the previous year. In 1981, the volume of applications of this type - 64.4 million ECU - was 36% lower than in 1980. The increase in 1982 illustrates the fact that the promoters had adapted their projects in the light of the possibilities for re-employment or safeguarding existing jobs. The increase was particularly marked in France, Italy, the Netherlands and the United Kingdom. The applications concerned training operations conducted in regions other than first priority regions and carrying a guarantee of continuing employment or re-employment for trainees.

The volume of fourth priority operations approved amounted to 85.6 million ECU against 27.7 million in 1981, an increase of 309%. This rise was particularly marked for the United Kingdom (53.4 million ECU against 4.3 million in 1981), France (11.6 million against 4.3 million) and Belgium (3.6 million ECU against 1.2 million).

Altogether, these operations accounted for 14% of the budget allocation for this area of intervention in 1982 against 6.6% in 1981. Fourth priority approvals concerned upgrading and wage subsidy operations, both of which had declined considerably in 1981; on the other hand, the volume of operations for workers unemployed for more than six months held fairly steady.

The increase of 300% in fourth priority approvals calls for an explanation, especially as regards the United Kingdom. Accelerated upgrading operations and more particularly wage subsidies (Aid E) in this Member State had declined steadily since 1979 as a result of the abolition of national aid measures for this type of scheme. However, efforts by regional and local authorities to mobilize public funds in support of operations of this type for small and medium-sized firms taking on workers gave rise to large-scale programmes which in 1982 covered virtually all the zones benefiting from regional aid. In addition, two large-scale upgrading programmes were given financial support by the Merseyside authorities and the Great Manchester Council respectively.

The problems involved in the upgrading of basic skills were the subject of exchanges of views between representatives of the authorities, promoters of operations and experts at a symposium organised in Liège by the Commission with the aim of channeling Fund intervention more effectively in accordance with needs.

The Commission approved seven applications relating to operations designed to improve the efficiency of local training structures. These were experimental projects which rejected the traditional concept of training for a particular job in favour of training to promote individual development based on self-actualisation and the creation of activities.

Four of these operations were designed to promote the revival of rural areas in Haute Loire, the Pyrenees and Vosges in France and the Cilento (province of Salerno) in Italy. Three projects concerned the constitution of a new industrial base through the creation of small and medium-sized businesses in urban areas with traditional industries in decline in the United Kingdom: Newcastle, Wigan, Carrickfergus.

The seven projects provided for continuing evaluation carried out jointly on the basis of a methodology formulated by the promoters, an expert and the Commission. The resulting exchange of experience made it possible in the course of 1982 to establish the principal criteria to which this type of operation must conform: the existence of a consensus at local level; a structured steering group representing the various economic interests of the region or area; a credible project leader; continuing evaluation.

Taking account of three-year operations approved earlier and at present in progress, the Fund will have at its disposal a range of experience in the field of local development which should enable it to promote new initiatives to the best advantage.

The volume of fifth priority applications approved amounted to 266.5 million ECU, an increase of 3.7% on the previous year (257 million). However, available appropriations amounted to only 26.69 million ECU instead of 33 million in 1981; as a result, a drastic weighted reduction had to be applied once more in 1982. In view of the limited resources available, it was decided to apply the reduction to the major national programmes. On the other hand assistance was provided to all regional public or private bodies making an innovative contribution to the development of regional programmes.

Beneficiaries

It is estimated that 600,000 persons should benefit from programmes approved in 1982.

Applications raising specific problems

One application concerned a training scheme at high level - training managers/supervisors - for 155 prisoners in order to offer them good job possibilities on their release. A series of elements relating to the structure of the courses and the fact that the trainees were registered as job-seekers differentiated this programme from other training activities normally taking place in prisons.

The problem raised was to determine to what degree the Fund could finance such an operation when the trainees, registered as job seekers, were not available on the labour market. With a few reservations, the Committee gave a favourable opinion on the application.

A second application concerned a training course of 120 hours for 95 persons engaged as hairdressers. According to the legislation of the Member State concerned, persons wishing to exercise such a profession must sit a qualifying examination. The training course was designed to prepare such persons for the examination. However, no mention appeared in the application justifying such an operation on the grounds of superior

qualifications required or the threat of unemployment. The problem raised by several Committee members dealt with the advisability of establishing such a precedent. The Committee declared itself in favour of the measure by 21 votes to 10 with 7 abstentions.

More generally, a problem was raised concerning applications relating to operations in favour of workers unemployed for over six months. Programmes introduced by Member States were often divided into those designed for workers unemployed for over six months and those designed for other unemployed persons. However, apart from the criterion length of unemployment no difference in the nature of the operations to be carried out in the two categories mentioned could be noted. It therefore had to be determined whether such a practice, often used to obtain a fourth priority rating for operations concerning workers unemployed for over six months, was acceptable.

Given that these general programmes were indefinite as to their options and objectives the Fund services suggested that programmes not specifically designed for those unemployed for over six months be classified in fifth priority. Such a solution presented to their minds, the advantage of allowing the financing of small scale projects for which the Fund's assistance proved necessary.

The Committee approved the suggestion.

7. Technical progress

Volume of applications and commitment appropriations available

The volume of applications for assistance submitted in respect of this field of intervention under Article 5 (1)(b) of Council Decision 71/66/EEC¹ was 89.9 million ECU against 55.5 million in the previous year.

This increase of 62% reflects the importance attributed by promoters, the public authorities, employers and workers to vocational retraining to meet the needs of technical progress. The new technologies are affecting every branch of activity to an ever greater extent, calling for the modernization of production and management methods in response to a rapidly changing market.

Approximately 90% of the applications by volume were submitted by three Member States: France, Italy and the United Kingdom. They mainly concerned the modernization of management and production techniques in small and medium-sized businesses, as well as the telecommunications, data processing, motor vehicle and printing sectors.

The budget allocation for this area was 53.5 million ECU; carry-overs of 3 million ECU from 1981 and refunds to 2 million ECU therefore brought total available appropriations up to 58.5 million ECU.

The total volume of applications for assistance exceeded available resources by 54%, despite the fact that resources had risen by 93% against an increase of 62% in applications by volume.

In consequence, while applications classified as first priority were financed in full, a weighted reduction had to be applied to those classified as second level priority, with the result that the amount granted was reduced to 6% of the amount requested (against 5% in 1981).

¹OJ L 28, 4.2.1971, page 15; OJ L 337, 27.12.1977, page 8.

Selection criteria and characteristics of applications

The priorities established were the same as for 1981.

First priority was accorded to operations:

- which contributed to safeguarding jobs in sectors of economic activity where the introduction of new technologies or production techniques jeopardized employment levels (threat of unemployment);
- launched to encourage the modernization of production and management techniques in small and medium-sized businesses.

Second level priority was accorded to operations:

- designed to apply, for the first time in a Member State, a new technology capable of benefiting an entire sector;
- implemented in expanding branches of economic activity where the introduction of new technologies or production techniques would lead to the creation of new jobs in so far as the skills in demand were innovative and a shortage of labour exists such that the development of the new technology is liable to be jeopardised.

The operations referred to could be designed to retrain workers or keep them in the same occupation (training in new skills), but in either case they should not merely involve routine retraining measures (in particular, training courses must last at least 200 hours for workers who are unemployed, threatened with unemployment or under-employment).

Technical progress is assessed in relative terms depending on the location and size of the firms concerned.

The principal criteria in determining priorities were the following:

- characteristics of the new technologies or production techniques introduced in a given branch of activity and their consequences for employment;

- nature of the modernization measures in small and medium-sized firms;
- branch of economic activity and, where relevant, the situation of the particular company concerned;
- the nature and level of the skills to be acquired to master the new technology or production technique;
- the employment situation of the workers taking part in the training operation (first job seekers, threatened with unemployment, under-employed, unemployed).

Applications relating to branches of economic activity in which the introduction of new technologies was jeopardizing employment levels, classified as first priority, represented a total of 16 million ECU and involved 11,000 persons. They were financed in full. The applications were submitted mainly by France (36% by volume) and Italy (26% by volume) and to a lesser extent by Germany (15%), the United Kingdom (8%), Greece (8%) and the Netherlands (7%).

They concerned training programmes for workers threatened with unemployment or already dismissed following the introduction of new technologies.

The operations mainly related to the following sectors: micro-processors, telecommunications and industrial automation (motor vehicles, machine tools, printing industry).

Applications classified as first priority relating to operations to encourage the modernization of production and management techniques in small and medium-sized businesses involved a total sum of 22.5 million ECU. They were financed in full. The number of beneficiaries was estimated at 12,900 persons.

About 60% of the applications approved and accorded first priority related to operations of this type; 80% of these applications were submitted by Italy and mainly involved training programmes designed to promote the application of data processing techniques in the management of small and medium-sized businesses.

Other operations related to the conversion of machine tools to numerically controlled operation, photocomposition, data transmission, energy conservation and prospection and the application of new energy sources - especially solar energy.

These technical training operations were often accompanied by business management courses aimed at promoting the integration of the new technologies.

It may be noted that about 16% of these operations involved cooperatives in the following sectors: engineering, construction engineering, food products, printing and catering.

Among the applications submitted by other Member States, training operations relating to data processing applications in the commercial and scientific fields and the use of microprocessors - especially in the engineering and metalworking sectors - were the most numerous.

Attention should be drawn to certain specific operations concerning the training of advisers in the transfer and introduction of new technologies in small and medium-sized firms (France); the training of craftsmen and supervisory staff for new production techniques in the woodworking, furniture and construction engineering sectors (Greece); and training in the use of new precision machine tools, organised by a cooperative representing a number of firms in conjunction with the local authorities.

Second priority applications approved involved a total of 25.5 million ECU. As in 1981, a weighted reduction had to be applied since the balance of appropriations available amounted to only 20 million ECU; as a result, the amount granted corresponded to 6% of the total requested against 5% for the previous year. About 11,500 persons should benefit under the second priority applications approved.

Since no application relating to the first introduction of a new technology in a Member State was submitted, second priority approvals related solely to operations in expanding branches of economic activity; 95% by volume of these applications were accounted for by three Member States - Italy (42%), France (38%), and the United Kingdom (15%).

The operations mainly concerned the following sectors: data processing, aerospace, robotics, electronic typewriters, heavy diesel engines (Italy); data processing, robotics, microprocessors (France); printing and mechanical engineering (new operations - United Kingdom).

Attention should be drawn to certain small scale operations concerning specialised or novel types of training, in the following fields: construction of nuclear generating stations, high and low pressure welding; techniques of geophysical research (France); deep-sea diving, energy conservation and new forms of energy (France and Italy); protection against radiation and isotope technology (Germany).

Three applications submitted by the United Kingdom and involving 150 persons concerned basic training in data processing in the new "Information Technology Centres"; these are public centres set up to provide technical training combined with an introduction to working life for young first job seekers.

Beneficiaries

After application of the weighted reduction, the probable number of persons benefiting from Fund assistance was estimated at 35,400.

Applications raising specific problems

One application relating to the requalification of workers in the newspaper industry following the introduction of new technology was submitted as a complement to an application approved in 1976 for a period of three years. The programme had been extended to the end of 1981 following justified delays in its realisation. The new application covered, with one exception, the same firms and provided for the same type of operation as the preceding one.

The services of the Fund considered that after six consecutive years the application of new technology in a firm could no longer be taken into consideration in the field of "Technical Progress".

The European Social Fund Committee agreed with the suggestion put forward by the Fund's services to classify the application non priority.

Four series of grouped applications introduced by three Member States related to operations carried out by training bodies and designed to introduce job seekers into small and medium enterprises with a view to stimulating their modernisation.

Accordingly, the position of the Fund services was to consider these operations non priority in the field of Technical Progress but to integrate some into programmes classified as a priority under the heading of "Groups of Enterprises". The Committee gave a favourable opinion.

8. Groups of firms

Volume of applications and commitment appropriations

The volume of applications submitted in respect of this field, under Article 5(1)(c) of Council Decision 71/66/EEC¹ was identical with that for the previous year, i.e. 19.8 million ECU.

Four Member States submitted applications: Italy (14.7 million ECU), accounted for 74% of the total, while the remainder - a much smaller proportion - was taken up by Denmark (1.6 million ECU), France (1.2 million ECU) and Belgium (0.1 million ECU).

Total appropriations amounted to 18 million ECU, including a budget allocation of 16.7 million and carry-overs and refunds totalling 1.3 million (against 8.4 million in 1981), i.e. an increase of over 50%.

However, it appears that the promoters were not always aware of this increase in good time, which explains why the volume of applications submitted was no higher than in 1981. As a result, all applications - or parts of applications - accorded priority were approved in full.

Selection criteria and characteristics of applications

The selection criteria were the same as those in effect in the previous year. Two categories of operation were accorded priority status:

- (a) those aimed at solving employment problems in sectors affected by serious industrial restructuring or conversion problems, with regard to which Community policies had been adopted;
- (b) in other sectors, those aimed at assisting the mobility of workers affected by large scale redundancies, for whom stable re-employment was assured in an expanding sector.

¹OJ L 28, 4.2.1971, page 15; OJ L 337, 27.12.1977, page 8.

Certain applications or parts thereof submitted by France and Italy were approved under category (a) above; the relevant part of the French application concerned training operations in connection with the restructuring of the steel industry (cessation of manufacture of bars and sections). Altogether 168 persons were retrained for other occupations in the same sector, especially in engineering, metalworking and nuclear energy.

The relevant parts of the applications submitted by Italy concerned 3,000 workers employed in the steel and shipbuilding industries. Most of the shipyard workers left the sector and were retrained for jobs in other branches of economic activity. The steel industry workers remained in the sector and were reassigned to other activities.

The other applications or parts thereof were approved under category (b) above (mobility). Some of the workers concerned stayed with their firm, which was able - once they had been retrained - to offer them stable employment in other occupations, principally in the following sectors: electrical engineering, electronics, chemicals, motor vehicles, food products. Other workers, who were obliged to leave their firm, were retrained for other occupations, especially in the tertiary sector: secretarial work, book-keeping, data processing.

In one Italian region a substantial number of workers left the telecommunications equipment industry for jobs in the tertiary sector (telephone installation). Others were retrained for occupations in the engineering, electrical engineering and food products sectors.

Beneficiaries

Applications classified as priority should benefit altogether 9,600 persons including 115 in absolute regions (Mezzogiorno), 5,207 in priority regions and 4,281 in other regions.

9. The Handicapped

Volume of applications and commitment appropriations

The volume of applications for assistance concerning the integration or re-integration of handicapped persons into working life submitted under Article 5(1)(b) of Council Decision 71/66/EEC¹ as amended by decision 77/801/EEC², amounted to 180 million ECU in 1982 against 154 million in the previous year, i.e. an increase of 16%.

As in previous years, the majority of these applications were submitted by public authorities; however, a number of interesting programmes originated from private bodies.

In both cases, the operations included demonstration projects. These latter, whose number has more than tripled (37 against 11 in 1981) were submitted by most Member States, but primarily Germany, Italy and the United Kingdom.

The budget allocation for this area of intervention was 115.7 million ECU. Carry-overs from the previous year (7.2 million) and refunds (1.5 million) brought total available appropriations up to 124.4 million ECU, 32% higher than the corresponding figure for 1981 (83.8 million ECU).

Applications classified as first priority were financed in full. However, a weighted reduction had to be applied to those classified as second priority, with the result that 52% of the amount requested was granted in the case of these operations.

Selection criteria and characteristics of applications

Two levels of priority, identical to those applied in 1981, were established for this area of intervention:

First level priority was accorded to:

- demonstration projects linked to employment and innovative in character, where not more than 200 persons were involved and Fund assistance was requested for not more than three years;

¹OJ L 28, 4.2.1971, page 15.

²OJ L 337, 27.12.1977, page 8.

- operations aimed at the integration of handicapped persons in open employment in Greenland, the French Overseas Departments, Ireland, Northern Ireland, the Mezzogiorno and Greece.

Second level priority was accorded to vocational training or rehabilitation operations, the adaptation of jobs, work places or equipment and the recruitment of handicapped persons for jobs in open employment.

First priority operations approved involved a total of 60.6 million ECU.

Of this sum, demonstration projects accounted for 13.7 million ECU against 7.1 million in 1981, i.e. an increase of 92%.

In general, these operations concerned integration in open employment in undertakings. Some of these demonstration projects are described below.

A private centre in Belgium proposed to set up a new training section for office work. This operation was considered as a demonstration project since it concerned the integration of handicapped persons in a work situation; the training programme includes vocational adaptation to modern equipment and techniques.

In Denmark, an innovative project was set up for physically and mentally handicapped persons rescued from shipwrecks in South East Asian waters by Danish vessels. The operation includes tuition in the Danish language and a linked work and training programme. The progress of each individual is evaluated quarterly to permit changes to be made to the training programme or functional rehabilitation carried out in specialised institutions, as necessary.

In Germany, a vocational integration programme for mentally handicapped persons was carried out in two private centres. The emphasis was on providing job stability by giving the handicapped persons a sense of security.

An operation conducted in France concerned a variety of population groups experiencing vocational and social integration problems. Preparation was given for occupations in the tertiary sector: specialists in management and administration with local authorities, tourist sector personnel (e.g. travel agencies), catering sector personnel, arts and crafts occupations, data processing maintenance staff.

Another operation in France was based on a three-year experiment in the re-education of the physically and mentally handicapped and was designed to exploit the results obtained by developing a teaching method. To this end, the project had to be continued on a larger scale, entailing its extension to other establishments. The teaching methodology in question is multidisciplinary and with a strong practical bias; in particular, it relates to aspects of everyday life such as the correct use of various types of documents - i.e. post office, banks, savings, income, taxes, social security, birth or marriage certificates, etc. This was the first project of its kind to be undertaken in the context of adult education.

An experimental project in the Netherlands concerned a linked work and training system, technical training being given in the context of traditional structures, while the practical side of the training was given in firms.

In Italy, among a great many demonstration projects undertaken, mention should be made of a training operation for photographers designed to promote the integration in the tertiary sector of handicapped persons discharged from psychiatric institutes and a modular training project involving the direct integration of the beneficiaries in a factory producing metal furniture.

An operation in the United Kingdom was designed to illustrate the feasibility of integrating handicapped persons with a very low intelligence quotient in stable open employment provided that they are given a sense of self-confidence and backed up by specialised personnel.

Operations classified as second level priority involved a total amount of 117.8 million ECU. However, a weighted reduction had to be applied, with the result that the amount approved was only 61.8 million ECU.

Special measures for Greece

With a view to obtaining the maximum benefit from Fund assistance to meet current needs, the Greek authorities requested the Commission to provide technical assistance and advice for the development and improvement of the Greek vocational rehabilitation system for handicapped persons.

In response, the Commission set up a working group consisting of rehabilitation experts from several Member States. This group was given the task of preparing recommendations on the best means of improving the participation of Greece in this area of intervention. The group's work was still in progress at the end of the year in question.

Beneficiaries

The number of handicapped persons who should benefit from Fund assistance in 1982 has been estimated at 66,000.

V. PILOT SCHEMES AND PREPARATORY STUDIES

Interest in this field has been growing for some years and the trend continued in 1982. The volume of applications rose to around 9 million ECU as compared with 4.56 million ECU in 1981.

The funds available totalled 4.07 million ECU (as compared with 3.54 million in 1981), made up of 3.9 million ECU allocated under the 1982 budget and 0.17 million carried over.

Whilst all the appropriations available were used, some applications classified as priority under the guidelines for 1982 nevertheless could not be approved for lack of funds.

Annex XVIII gives a list of the preparatory studies and pilot schemes approved, broken down by field of intervention and indicating the nature of the study or scheme, the name of the promoter and the amount approved.

The basic aspects of the studies and pilot schemes approved in 1981 may be summarised as follows:

- (a) As regards young people, eleven schemes were conducted, primarily for the benefit of unemployed and socially disadvantaged young people, with a view either to helping participants to create jobs for themselves or to ensuring their integration into various sectors of the economy.
- (b) In the field of regions, two schemes involved the training of people resident in remote areas using correspondence/distance education methods. A third scheme was aimed at encouraging the development of small local firms in an area of high unemployment.
- (c) In the field of agriculture, pilot schemes were conducted with a view to maintaining and developing rural activities in mountainous areas.
- (d) Three of the pilot schemes funded were aimed at equipping migrant workers to cope with their everyday working and social lives. A fourth scheme concerned the establishment of a cooperative with a view to facilitating the re-integration of migrant workers returning to

their country of origin and a fifth related to a programme of literacy and language training.

- (e) In the field of technical progress, four schemes involved training or retraining in the management of the new information technologies, robotics, composite materials, energy conservation and renewable energy sources. A fifth concerned the training of skilled workers with a view to the application of research results in industry, whilst another involved the development of new training methods to improve ship safety.
- (f) As regards the handicapped, the schemes approved concerned: the occupational and social re-integration of handicapped persons by various means, research on working conditions in the context of "telecommuting", the provision of help and advice aimed at eliminating barriers to the employment of handicapped persons in ordinary firms, the establishment of flexible guidance/monitoring services and the experimental use of computers as an aid in work with the handicapped.
- (g) Eight projects were approved in the field of small and medium-sized firms. Six involved training in management techniques for the managers or heads of firms, whilst the other two concerned the promotion of craft trades.
- (h) Finally, five schemes were aimed at fostering the occupational integration of adults from disadvantaged or marginal groups via vocational pretraining programmes and the establishment of reception and guidance structures to assist their personal development.

VI. REGIONAL IMPACT OF THE FUND

As stated in Chapter IV.6, assistance approved in 1982 under the heading of "Regions" amounted to 607.99 million ECU. With the addition of assistance granted in other fields of intervention for programmes in regions eligible for assistance from the European Regional Development Fund, assistance granted to these regions amounted to 1,365.40 million ECU, almost 54% more than in 1981.

These regions are thus taking an increasingly large share of the overall volume of Fund aid. In 1982 almost 90% of the total was allocated to regions. Out of this total, an amount of 616.23 million ECU, almost 45%, was allocated to the six absolute priority regions¹.

These six regions are eligible for a rate of intervention 10% higher than the normal rate² and first priority is assigned to operations in these regions in accordance with the Guidelines for the Management of the Fund, particularly in respect of fields of intervention such as "young people" and "regions".

A breakdown of appropriations approved by region and field of intervention for 1982 is given in Annex VIII.3. A second breakdown by field of intervention for each of the absolute priority regions appears in Annex VIII.1.

The table below shows the amounts approved for the absolute priority regions since 1979.

| Year | Total amount approved | % change | Amount approved for absolute priority regions | % change |
|------|-----------------------|----------|---|----------|
| 1979 | 774.45 | | 299.10 | |
| 1980 | 1,014.93 | + 31.05 | 335.15 | + 12.05 |
| 1981 | 996.17 | - 1.84 | 343.57 | + 29.66 |
| 1982 | 1,531.98 | + 53.79 | 616.23 | + 41.80 |

¹The list established pursuant to Article 8(3) of Decision EEC/71/66 comprised the following regions in 1982: Greenland, the French Overseas departments, Greece, Ireland, Northern Ireland and the Mezzogiorno.

²OJ No L 337, 27.12.1977, page 7.

In 1981 a particular effort was made to redress the situation of the absolute priority regions (see Tenth Report) but in 1982, the appropriations allocated to these regions rose to a lesser extent than total commitments. However, appropriations approved for absolute priority regions were nearly 42% up on 1981, whilst there was a relative decline in the volume of applications submitted.

The average amount of aid per capita in the six absolute priority regions rose from 37 ECU in 1981 to 52 ECU in 1982 (see Table II).

ASSISTANCE APPROVED, 1982

| Field of intervention | Absolute priority regions | | Other ERDF regions | | Other Community regions | | TOTAL |
|---------------------------|---------------------------|-------|--------------------|-------|-------------------------|-------|-------------|
| | million ECU | % | million ECU | % | million ECU | % | million ECU |

VII. EUROPEAN SOCIAL FUND COMMITTEE

In 1982, as in previous years, the European Social Fund Committee, an advisory committee made up of representatives of Governments, trade unions and employers, set up by the Treaty, continued to give valuable assistance to the Commission.

The Committee held three plenary meetings to consider:

- two batches of applications for assistance,
- the re-examination of the rules governing the Fund and its tasks
- the draft budget for 1983.

ANNEXES

The differences in the figures for "commitments" quoted in the various tables arise from the use of a single rate of exchange - that applicable in December 1982 - for the non-budgetary tables.

In addition the decisions presented in these tables do now allow for unused appropriations for the 1982 financial year.

| 6200 | Pilot projects | 9,05 ^{x)} | 2,55 ^{x)} | - | - | 1.50 | - | 1.50 |
| 60-62 | Total | 2.888,20 | 1.531,98 | | | | 937.99 | |

x) The difference between the amounts approved and the amounts requested is explained as follows:

1) Through lack of available appropriations requests amounting to 3.4 million ECU were carried over to 1983.

2) For the remainder commitments were made only when promoters submitted detailed provisional estimates for the projects, i.e. after the end of the 1982 financial year.

V.2 AMOUNTS REQUESTED AND REFUSED IN 1982

By Member State

(million ECU)

| Member State | Amounts Requested | Amounts approved | Amounts refused | | | | |
|----------------|-------------------|------------------|-----------------|---------------|--------------|--------------------|----------|
| | | | non-acceptable | non eligibles | non-priority | Weighted reduction | Total |
| Belgium | 45.95 | 23.70 | | | 4.24 | 16.22 | 20.46 |
| Denmark | 56.61 | 27.54 | | | | 29.08 | 29.08 |
| Germany | 373.56 | 91.28 | | 2.26 | 6.70 | 273.32 | 282.28 |
| France | 592.22 | 266.76 | | 0.16 | 5.25 | 317.38 | 322.79 |
| Greece | 67.16 | 60.46 | | 5.80 | 0.25 | | 6.05 |
| Ireland | 146.20 | 145.15 | | | 0.76 | 0.23 | 0.99 |
| Italy | 576.99 | 455.36 | 1.04 | 2.56 | 20.76 | 96.63 | 120.99 |
| Luxembourg | 1.14 | 0.46 | | | | 0.64 | 0.64 |
| Netherlands | 86.37 | 16.53 | | | 48.13 | 21.47 | 69.60 |
| United Kingdom | 942.- | 444.74 | | 4.04 | 309.77 | 183.03 | 496.84 |
| | 2.888.20 | 1.531.98 | 1.04 | 14.82 | 395.86 | 938.00 | 1.349.72 |

difference of 6.50 is due to pilot projects
