This report is published under the regis of the Directorate-General for Internal Market and Industrial Affairs (III/A/1).

It gives the up-to-date position on the progress of the work undertaken in the fields of the Elimination of Technical Barriers to Trade in industrial products and the standardization of iron and steel products.

The work of harmonizing the laws of the Member States follows from the General Programme for the elimination of technical barriers to trade in industrial products which was adopted by the Council on the 28 May 1969. Chapter A contains Acts of a general nature and other acts of a purely specific nature which have been subdivided into three parts comprising the recapitulatory list of directives and proposals for directives:

- I. Directives adopted by the Council
- II. Directives adopted by the Commission
- III. Directives submitted by the Commission to the Council and not yet adopted.

A list of directives by sector is contained in a special Chapter.

Harmonization work in the field of technical specifications for steel commenced in 1953 and was at first the direct responsibility of the High Authority of the European Coal and Steel Community but since the merger Treaty this has come under the Commission of the European Communities. A list of EURONORMS is contained in Chapter B.
