## FOREWORD

The generalized system of preferences (GSP) should be seen against the background of an international effort, beginning with the launching of the First United Nations Development Decade in 1961, to encourage greater cooperation among the industrialized countries to promote the development of the poorest countries. The GSP idea was formally put forward by the Community and the States associated with it (the AASM) at a GATT ministerial meeting in 1963. What it did, in fact, was to call into question, for the benefit of the developing countries, the rules of international trade enshrined in the General Agreement. Painstaking work needed to be done on this subject at the first two UNCTAD sessions (1964 and 1968) and by the Special Committee on Preferences from 1969 onwards before finally culminating in October 1970 in the latter's 'concerted conclusions', which constitute the charter, as it were, of autonomous, non-discriminatory generalized tariff preferences. In June 1971 the GATT accorded a 10-year waiver on most-favoured-nation treatment, thus giving the go-ahead for the system, which has the effect of exempting from customs charges the industrialized countries' imports of products originating in the developing countries, without reciprocity on the part of the latter. On 1 July 1971 the Community introduced, for a six-month period, its first GSP scheme, which was subsequently renewed each calendar year. It was intended for member countries of the Group of 77 (the 'self-election' process) and for Member States' or third countries' dependent territories. Applications from other developing countries to join the Community's scheme were to be examined on their merits; Romania and China were included in the list of beneficiaries in 1974 and 1980 respectively.

In March 1975, just over two years after its enlargement to nine Member States, the Community was already announcing, via a Council resolution, that it intended to extend its scheme beyond the

initial decade. The Legal Framework Group decided in the multi-lateral trade negotiations that the generalized preferences system could be extended without this being made contingent on a further waiver.

In December 1980, the Council decided to extend the application of the generalized preferences system for a further period of 10 years, a period which brings it into line with the development strategy framed by the United Nations for 1981-90.

The new system applied by the Community, now enlarged by the accession of Greece, remains autonomous, and this will enable it to continue to be as open as possible and ensure that it can still be applied flexibly. As before, it contains differentiated arrangements for agricultural, textile and industrial products; product coverage, the conditions governing eligibility, the principle of duty-free admission and the system of ceilings for industrial products (including ECSC and textile products) have also been maintained for the first five-year period of application, at the end of which some of these aspects may be modified. In practice the main feature of the new scheme is the extension to all industrial products of the system of individually allocated and differentiated preferential entitlement, which was introduced in 1980 but applied only to textile products covered by the Multifibre Arrangement.

### **1. Agricultural products**

Depending on the sensitivity of the product the preferential margin can consist of a cut of varying depth in the customs duty, or even total duty-free entry (there are 85 such products in 1983 with the variable component being levied in some cases on five of them).

Imports under the preferential arrangements are admitted without any restrictions as to volume. However, a safeguard clause modelled on Article XIX of the GATT enables duties to be reintroduced in part or in full if goods are imported under the preferential arrangements in such quantities or at such prices as to cause or threaten serious injury to Community producers of like or directly competitive products. This clause is selective, i.e. it may be applied solely in respect of the country or countries causing the injury, which gives the safeguard mechanism some flexibility and prevents the other beneficiary countries from being harmed. It has never been invoked.

The number of products<sup>1</sup> in respect of which tariff preference is enjoyed by all beneficiary countries has risen from 145 in 1971 to 340 in 1983 (8 new products have been brought within the 1983 scheme: horseradish 07.01 G III, frozen or dried okra, 07.02 ex B, 07.04 ex B, sweet peppers, 07.02 ex B, dates, 08.01 ex A, bilberries, 08.08 ex C, dried rose-hips fruit, 08.12 ex G, seasnails, 16.05 ex B). Over the years, some products have been included in the scheme because of specific undertakings given by the Community to developing countries, such as implementation of the Joint Declaration of Intent on the Asian Commonwealth countries, which was adopted in the final stage of the negotiations with the United Kingdom and annexed to the Treaty of Accession. Thus products where preferential imports were administered in the form of tariff quotas or ceilings were added to the agricultural scheme: cocoa butter, soluble coffee, preserved pineapple other than in slices and flue-cured Virginia tobacco in 1974, other types of preserved pineapple and other raw or manufactured tobaccos in 1977 (the last category is the only case where there is a tariff ceiling on agricultural products).

Since 1979 the least-developed countries have enjoyed duty-free entry for all the products covered by the scheme, subject however, to preferential volumes for raw or unmanufactured Virginia type tobaccos (for which there is a quota) and for other raw or unmanufactured tobaccos (for which there is a ceiling).

<sup>1</sup> By 'products' is meant the different tariff entries distinguished in the GSP Regulation. Dried cut flowers (06.03 ex B), for instance, bearing a GSP duty of 7%, and other cut flowers (06.03 ex B), bearing a GSP duty of 16%, are considered as two different products. Some CCT subheadings are grouped together under a single GSP entry where the preferential duty is the same. The five agricultural quotas and the agricultural ceiling count as six products (though in fact they correspond to ten CCT tariff entries).

Also since 1980 a number of products (a total of 14 in 1982) have been included in the scheme solely for their benefit. The list of these products has been considerably extended for 1983, as a result of which the least-developed countries will enjoy virtually the same advantages as the ACP in respect of all agricultural products which are not subject to levies or other such charges. This doubles the number of products in the offer made to the least-developed countries; the detailed list is given on p. 277.<sup>1</sup>

## 2. Industrial products

In accordance with Resolution 21 (II) of the second UNCTAD Conference, primary industrial products are not covered by the Community scheme. The fact that the Community has excluded these products has only a very limited impact since almost all industrial raw materials already enter the Community duty-free.

For finished and semi-finished industrial products the Community system has from the outset been based on three features: ceilings, duty-free entry and the principle that no products are excepted. Since the new system was put into effect in 1981, two additional features have been introduced — individualization and differentiation of concessions — to take account of changing patterns of trade. Over the past few years a number of the beneficiary countries have speeded up their development and are now capable of exporting their products and marketing them in the Community on normal competitive terms. The granting of the tariff preference under the old GSP system's global ceilings led to an imbalance as these countries made greater use of the preferential arrangements. The *butoir*<sup>2</sup> mechanism was not an adequate correcting factor, as the less-competitive countries were left only limited scope for taking advantage of the ceilings<sup>2</sup> and quotas<sup>2</sup> that had already been considerably eaten into by the most dynamic beneficiaries. In order to prevent this, under the new scheme the global quotas and ceilings and the *butoirs* have been done away with and the principle of individual preferential amounts has been adopted (in the same way as for MFA textile products), according to the beneficiaries' relative competitiveness.

<sup>1</sup> As a result of internal difficulties the Community offer on dried grapes is suspended for 1983.

<sup>2</sup> See p. 357.

Products are classified in two categories, to which different administrative rules apply, but in every case each beneficiary is guaranteed an individual preferential amount. Firstly, in the case of sensitive products, which are listed in Annex A to the Regulation opening preferences where a beneficiary country is particularly competitive for a given product, GSP imports from that country are administered by quota, while the individual amounts opened for the other countries are administered by ceiling. If no beneficiary is outstandingly competitive GSP imports from all beneficiary countries are administered under a system of individual ceilings. As a result each beneficiary knows that it can avail itself of the preferential facilities offered by the Community and will not be affected by the performance of other countries; these arrangements have also widened to the greatest possible extent the advantages reserved for the less-competitive countries, which are the ones that most need facilities to promote their exports. In the case of quotas the duty is reintroduced at national level when the share, plus any drawings on the reserve, is totally used up. In the case of ceilings the duty is reintroduced by the Commission for the whole of the Community *vis-à-vis* the beneficiary country in question. In order to optimize the collection of information on duty-free imports detailed practical arrangements determine how often and within what period the data supplied by the customs departments of the Member States have to be transmitted to the Commission.

Secondly, there are non-sensitive products, which are listed in Annex B to the Regulation opening preferences. In the case of these products duties may likewise be reintroduced by the Commission, at the request of a Member State, but only after an information procedure designed to make the mechanism more flexible. For these products the reference basis to be taken into account for reintroducing the normal duty is worked out product by product and is generally 138% of the maximum country amount (*butoir*) for 1980; the reference basis is not published in the Regulation, since this would complicate the presentation and be of little practical use.

For three products—ex 29.03 (musc-xylene), ex 29.44 (antibiotics excluding chloramphenicol and tetracyclines) and ex 39.06 (certain high polymers)—the reference basis is at a lower level (see pp. 108, 121 and 140 respectively) specified in Annex B to Regulation (EEC) No 3377/82.

The least-developed countries enjoy duty-free entry on all industrial products without any quantitative limitation.

### 3. Textile products

Textile products falling within Chapters 50 to 63 of the CCT are subject to the same general arrangements as other industrial products (duty-free entry, non-exclusion, ceilings). However, in the case of two categories—products covered by the Arrangement regarding International Trade in Textiles (MFA), and jute and coir products—special conditions apply because of the particular sensitivity of the sector and the arrangements governing international trade.

The textile scheme was radically overhauled in 1980 with regard to MFA products, in respect of which preferences are reserved for the developing country beneficiaries of the general scheme which have concluded bilateral agreements with the Community on trade in textile products (or entered into undertakings similar to those provided for in the agreements).

Depending on its level of development, measured in terms of GNP, and of competitiveness, measured in terms of textile exports, each beneficiary was reserved an individual amount of duty-free imports for each category based in 1980 on its exports to the Community in 1977 (the categories are those used for the bilateral agreements).

At the same time, a flat-rate offer on each category was made to the beneficiary countries for which a specific individual ceiling could not be calculated because their exports were zero or negligible in 1977. This minimum offer corresponds to a percentage of the Community's total extra-EEC imports, varying according to the sensitivity of the groups of textile categories defined under the bilateral agreements: for Group I, 0.01 %; for Group II, 0.06 %; for Groups II, IV and V, 0.15 %.

Sensitive products were placed under ceilings allocated among the Member States (without reserve shares) and the other products under non-allocated ceilings. Non-MFA products remained subject to global preferential ceilings (plus a *butoir*) open to all beneficiaries of the general scheme and allocated, or not as the case may be, among the Member States according to the same rules as for MFA products. The amount of the ceilings was established at 55 % of the Community's imports from the beneficiaries in 1977 with, however, a maximum increase of 25 % compared with 1979.

In 1981, all the preferential amounts were increased by 2% in order to take account of the impact of Greece's accession to the Community, and for 1982 the scheme was maintained as it stood.

For 1983 various amendments have been made to the textile scheme in accordance with the line followed in the negotiations for the renewal of the bilateral agreements under the MFA. Thus the number of groups of categories is now three; categories 10 and 11, which have become less sensitive, have moved to Group III, while categories 32 (ex 32 and 32 a in GSP) and 39, which previously came under Group III, and 68, 73, 76, 78, 81 and 83, which were in Group IV, have been added to Group II; also, categories 13, 21, 26 and 73 have been made subject to the same rules as Group I. Lastly, categories 19 and 89 (handkerchiefs) have been merged; categories 10 and 11, however, and categories 24 and 25 remain separate although they are lumped together under the MFA.

For five ('dominant' or State-trading) countries, the textile offer has been maintained at the same level as in 1982, but rounded off to the nearest decimal point, except with regard to the ceilings corresponding to the minimum offer for the Group III categories which have been reassessed in the same way for all countries.

The other beneficiaries' specific individual ceilings have been maintained with the 1982 amounts for Group I categories and the four which are treated in the same way; they have been increased by 2.5% and 5% respectively for the Group II and Group III categories. The minimum offer has been reassessed on the basis of 1980 figures, subject to the necessary corrective factors being applied to take account of the varying degree of sensitivity of the different categories.

Generally speaking, the way in which the specific ceilings are administered has not changed since 1982. In the case of the minimum offer, however, the ceilings are not allocated among the Member States except for the five countries referred to above (China, Hong Kong, Macao, Romania and South Korea) in respect of Groups I and II and the Group III categories regarded as sensitive in 1982 (Annex A to Regulation (EEC) No 3602/81). Some exceptions have had to be made to this principle in the case of supplier countries which, although they exported negligible amounts in 1977 (and therefore received a minimum offer) have been exporting considerable amounts in recent years; to compensate for this, the level

of the offer has been raised to that of the specific ceiling immediately above (except in one case, where the ceiling would otherwise have been increased nineteen-fold).

For non-MFA products, the system of global ceilings and *butoirs* has been abolished; the individual ceilings are based on the *butoirs* in force in 1982, i.e., 50% or 30% of the theoretical global ceilings fixed at 55% of the Community's imports in 1980, plus 2% in order to take account of Greece, whose trade has been included in Community statistics only since 1981.

As in the industrial scheme, the ceilings are allocated among the Member States for preferential imports from competitive countries.

For all textile products the least-developed countries enjoy preferences without any restriction except those which might result from implementation of bilateral agreements (negotiated voluntary restraint amounts).

Jute and coir products are not subject to ceilings, but the granting of preferences is conditional on special measures (voluntary restraint agreements or similar undertakings) to be negotiated with the exporting developing countries. Currently the least-developed countries are eligible for preferences on all such products, and India, Sri Lanka and Thailand for preferences on some of them.

#### 4. The beneficiaries

- (a) There are 126 countries on the general list of beneficiaries. Sixty-three of those countries already enjoy preferential trade arrangements under the Lomé Convention, and a further nine do so by virtue of bilateral agreements with the Community. Of the 22 dependent countries and territories, 15 are subject to the same trade arrangements as the ACP States themselves.
- (b) China and Romania are eligible for the GSP under special arrangements, which means that they are not granted preference on all products. In 1983, China gets preferential benefit on three new agricultural tariff subheadings (various grapefruit and pomelo juices under subheadings 20.07 A III ex a), b) ex 1 and ex 2) and three new sensitive industrial subheadings (85.15 A III,

94.01 B II and 94.03 B). For Romania three new industrial products have been brought in (64.03, 71.16 and 85.15 A III); the first of these is non-sensitive while the other two are sensitive. Since 1978 Romania has no longer been excluded from benefit on any product on the scheme for agricultural products.

- (c) From 1983 onwards Bolivia and Ecuador have become beneficiaries for the *whole* of the textile scheme: these two countries have now given undertakings similar to those provided in the bilateral agreements on trade in textile products concluded with the Community under the Multifibre Arrangement.

On 1 January 1983, 21 countries or territories had met the conditions required for the granting of preference on products covered by the MFA: Bolivia, Brazil, China, Colombia, Ecuador, Guatemala, Hong Kong, India, Indonesia, Macao, Malaysia, Mexico, Pakistan, Peru, Philippines, Romania, Singapore, South Korea, Sri Lanka, Thailand and Uruguay.

- (d) For GSP purposes the Community recognizes a list of 38 least-developed countries—including for 1983 two new countries,

Togo and Sierra Leone. Of these 27 are ACP countries which already enjoy preferential treatment under the Lomé Convention, so that the special rules introduced by the Community in 1977 apply essentially to Afghanistan, Bangladesh, Bhutan, Haiti, Laos, Maldives, Nepal, North Yemen and South Yemen.

As noted above, the least-developed countries enjoy full duty-free entry for all agricultural products covered by the scheme, subject to the quota and ceiling arrangements for tobacco. Furthermore the list of agricultural products included for their benefit alone has been greatly enlarged in 1983.

The least-developed countries enjoy full duty-free entry on industrial (including ECSC) and textile products, without any limitation other than may be entailed by application of their MFA-based agreements with the Community on trade in textile products. The Community also allows these countries unconditional duty-free entry on their exports of jute and coir products.

## EXPLANATORY NOTES FOR THE RULES OF ORIGIN APPLICABLE TO THE COMMUNITY'S GENERALIZED SYSTEM OF PREFERENCES

### Introduction

This set of notes sets out to explain how the concept of 'originating products' works and how it is controlled by the authorities. In order to benefit from the Community's Generalized System of Preferences the goods concerned have to be shown to originate in one of the countries to which the scheme applies.

### Part 1 — The general concept of an originating product and the rule on direct transport

#### 1.1. *The general concept of an originating product*

A product is an originating one if it has been entirely produced (wholly obtained) in the country concerned, for example flowers plucked from a plant growing in that country are originating flowers. In addition to this simple rule, if sufficient work is carried out on an imported product originating status can be obtained for the end product.

#### 1.2. *The concept of a wholly obtained or entirely produced product*

This concept has been defined as follows:

- (a) mineral products extracted from the soil or from the seabed of a country;
- (b) vegetable products harvested in a country;
- (c) live animals born and raised in a country;
- (d) products obtained in a country from live animals;
- (e) products obtained by hunting or fishing conducted in a country;

- (f) products of sea fishing and other products taken from the sea by the vessels of a country<sup>1</sup>;
- (g) products made on board the factory ships of a country from the products in (f) above;
- (h) used articles collected in a country which are only capable of being used for the recovery of the raw materials they contain;
- (i) waste and scrap resulting from manufacturing operations carried out in a country; and
- (j) any product produced in a country using only products which fall into categories (a) to (i) above.

#### 1.3. *The concept of sufficient working or processing*

The concept of sufficient working or processing is defined as that amount of working or processing that places the final product in a different tariff heading under the Customs Cooperation Council Nomenclature (CCCN) than that of any of the imported ingredients. But there are exceptions to this general rule which are contained in Lists A and B annexed to Commission Regulation (EEC) No 3606/82 (see further on pages 23 to 40). List A says that, for the final products listed there, in addition to the change of tariff heading condition the supplementary conditions listed also have to be met. List B on the contrary says that, for the final products it contains, the change of tariff heading criterion does not have to be satisfied if certain other conditions have been satisfied instead.

1.3.1. The rules in Lists A and B can be either specific rules requiring that a particular kind of processing is carried out or that specific

<sup>1</sup> The definition of vessels belonging to the country is contained in the 'Explanatory Notes' to Commission Regulation (EEC) No 3606/82 of 23 December 1982 (OJ L 377, 31.12.1982).

raw materials have to be used, or percentage rules requiring that a specific proportion of the value of the final product be attributable to the country concerned.

## EXAMPLES

### 1. Change of tariff heading case (no rule in List A or B)

Scrap of unhardened rubber of heading No 40.04 imported from a third country is processed in a GSP-country into reclaimed rubber of heading No 40.03; the change of tariff heading confers on the reclaimed rubber the status of a product originating in the GSP country.

### 2. List A specific rule case

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
61.01	Men's and boys' outer garments		Manufacture from yarn

Outer garments of heading No 61.01 obtained in a country which is a beneficiary under the GSP can be considered as originating in that country only if they are manufactured from, say, third country yarn; if such clothing were manufactured from third country fabrics, it would not be considered as an originating product.

### 3. List A percentage rule case

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
71.15	Articles consisting of, or incorporating, pearls, precious or semi-precious stones (natural, synthetic or reconstructed)		Manufacture in which the value of the products used does not exceed 50% of the value of the value of the product obtained

Articles consisting of, or incorporating, pearls, precious or semi-precious stones, etc. of heading No 71.15 obtained by working in a country which is a beneficiary under the GSP can be considered as originating in that country only if the value of the third country products used does not exceed 50% of the value of the finished product.

### 4. List B percentage rule case

Products obtained		Working or processing that confers the status of originating products
Heading No	Description	
ex Chapters 28 to 37	Products of the chemical and allied industries excluding sulphuric anhydride (ex 28.13), tannins (ex 32.01), some products falling within heading No 33.01, preparations for tenderizing meat, clarifying beer and preparations for the desizing of textiles (ex 35.07)	Working or processing in which the value of the non-originating products used does not exceed 20% of the value of the product obtained

Natural boric acid containing more than 85% of orthoboric acid, calculated on the dry weight, of heading No 28.12 is imported from a third country and used in a GSP country to obtain orthoboric acid of heading No 28.12; the orthoboric acid obtained is an originating product on condition that the value of the third country natural boric acid does not exceed 20% of its value.

The use of percentage rules of value implies that the basis for determining the value has to be defined. Paragraph 1.5. below explains this.

1.3.2. However, some products are found in both List A and List B, in which case the conditions in both lists taken together must be fulfilled. But if both lists refer to a percentage rule the percentage of imported parts cannot exceed the higher of the two percentages. They can in no case be added together.

## EXAMPLE

### 1. List A rule

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
38.15	Prepared rubber accelerators		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

### 2. List B rule

Products obtained		Working or processing that confers the status of originating products
Heading No	Description	
ex Chapter 38	Miscellaneous chemical products, other than refined tall oil (ex 38.05) and wood pitch (wood tar pitch) (ex 38.09)	Working or processing in which the value of the non-originating materials used does not exceed 20% of the value of the product obtained

Heading 38.15 'prepared rubber accelerators' has a 50% rule in List A and a 20% rule in List B. This means that, if all the raw materials are imported, only 20% of the value of the final product can be composed of imported products which were classified under heading 38.15 at import and that not more than 50% of the value of the final product can be made up of the imported products in total.

1.3.3. In Annex I to these notes there is a 'logical tree' designed to help you decide if your product is an originating product or not.

#### 1.4. Minimal processing

However the rules on sufficient working or processing explained above do have the proviso or condition that, even if the work car-

ried out satisfies the change of tariff heading rule and/or the List A or B conditions as appropriate, if the work carried out consists only of a minimal process origin is *not* conferred.

The following are what are considered as minimal processes:

- (a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading out, drying, chilling, placing in salt, sulphur dioxide or other aqueous solutions, removal of damaged parts, and like operations);
- (b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, painting, cutting up;
- (c) (i) changes of packing and breaking up and assembly of consignments,
  - (ii) simple placing in bottles, flasks, bags, cases, boxes, fixing on cards or boards, etc., and all other simple packing operations;
- (d) the affixing of marks, labels or other like distinguishing signs on products or their packaging;
- (e) simple mixing of products, whether or not of different kinds, where one or more components of the mixture do not meet the conditions laid down to enable them to be considered as originating products;
- (f) simple assembly of parts of products to constitute a complete product;
- (g) a combination of two or more operations specified in (a) to (f);
- (h) slaughter of animals.

#### 1.5. Values to be used in the case of percentage rules

The values to be used in the calculation of percentage rules are as follows:

##### *For imported goods*

Their customs value at the time of importation as defined in the convention concerning the Valuation of Goods for Customs signed in Brussels on 15 December 1950.

*For goods for which it cannot be established whether or not they were imported (which must always be assumed to be non-originating goods)*  
The earliest price that can be traced which was paid for the goods in the country where they are used for further manufacture.

### *For final products*

The ex-works price of the goods, which is understood as the price paid or notionally payable to the manufacturer in whose plant the last working or processing took place, provided the price includes the value of all the inputs. However the amount of local internal taxes paid (example — sales tax) which can be reclaimed at export shall be subtracted.

#### 1.6. 'Direct shipment' or 'Direct transport'

In addition to being an originating product a product has to be shipped direct from the country of production to the Community. However, goods may go through another country if the crossing of, or entry into, that country is necessary for geographical reasons or because of transport requirements and then only under the following conditions:

- (a) that the goods do not undergo any operations other than transshipment or temporary warehousing. However, this does not exclude any process only intended to keep the goods in good condition;
- (b) that the goods do not 'enter into the commerce of the transit country'—that is, for example, that the goods are not bought or sold there;
- (c) that the goods do not enter into home use—that is the goods are not cleared through customs; and
- (d) that the goods remain under customs surveillance there.

If goods are passed through another country for geographical or transport reasons the fulfillment of the above four conditions must be demonstrated to the customs authorities in the Community. This can be done by submission of either:

- (a) a through bill of lading drawn up in the exporting beneficiary country covering the passage through the country of transit; or
- (b) a certification by the customs authorities of the country of transit:
  - giving an exact description of the products,
  - stating the dates of unloading and reloading of the products or of their embarkation or disembarkation, identifying the ships used,
  - certifying the conditions under which the products remained in the transit country; or failing these
- (c) any substantiating documents that are acceptable to the customs authorities in the Community.

Furthermore, products which pass through the territory of certain EFTA countries which are preference donors (Austria, Finland, Norway, Sweden and Switzerland) may be re-exported in full or in part to the Community provided that the conditions relating to direct transport have been observed in these countries. In such cases, the EFTA countries concerned will issue replacement certificates of origin Form A for importations into the Community.<sup>1</sup> This procedure applies on a reciprocal basis, for the Community to the EFTA countries, mentioned above.

However, slightly different rules apply to goods sent to exhibitions in other countries. These are explained in Article 10 of Commission Regulation (EEC) No 3606/82.<sup>1</sup>

## **Part 2 – What has to be done at export**

### 2.1. *What documents are needed?*

After the origin of an export consignment has been established to the satisfaction of the exporter he has to consider how much it is worth and how it is to be sent in order to decide what documentation, if any, is to be used.

#### 2.1.1. No documentation necessary

No documentation is necessary if:

- (a) the goods are sent as small packages from private persons to private persons and the value is not more than 105 ECU.<sup>2</sup>
- (b) the goods form part of the personal luggage of a traveller and the value is not more than 325 ECU.<sup>2</sup>

However this concession is restricted to those imports which are occasional and are made up only of products for the personal use of the person to whom they are sent or the traveller or their families. It must be obvious from the nature and quantity of the goods that no commercial purpose is served. The customs authorities in the Community may require a declaration that the goods have originating status and the necessary conditions outlined above have been complied with.

#### 2.1.2. Forms APR

If the consignment is by post, including parcel post, its value does not exceed 1 600 ECU<sup>2</sup> the exporter may choose to use a Form

<sup>1</sup> See Nos 7 and 8 of the explanatory notes to Regulation (EEC) No 3606/82 (OJ L 377, 31.12.1982).

<sup>2</sup> The equivalent of the ECU in the national currencies of the Member States of the Community is given in the footnote to Article 6(2) of Regulation (EEC) No 3606/82.

APR (see p. 41) which he fills in himself or allows his authorized representatives to complete. The form may be completed in English or French: if it is done by hand, ink and block capitals must be used.

One APR form must be completed for each consignment.

In the case of consignment by parcel post the exporter attaches the form to the despatch note. In the case of consignment by letter post he encloses the form in the package.

### 2.1.3. Origin certificates Form A

For all shipments other than those mentioned in 2.1.1 and 2.1.2 above a Form A (see p. 45) must be filled out. The Form A origin certificate contains twelve numbered boxes to be filled in by the exporter and one un-numbered box which must contain the name of the issuing country. Boxes 1, 3, 4, 5, 6, 7, 9 and 10 call for no particular observation.

Box 2 does not have to be filled out if the consignee is not known. It is filled in but the consignee is later changed this does not matter.

Box 12 contains the exporter's declaration as to the origin of the goods and must clearly indicate that the goods are for the European Economic Community or one of its Member States or in cases where the transit procedure referred to in point 1.6 is used, one of the EFTA countries concerned. The use of the word 'Europe' is not enough. Box 8 ('Origin criteria') has to be filled out according to the code explained in Note 3 on the back of the form.

Box 11 ('Certification') is for the approved issuing authority to certify the form as correct, using the stamp designed for that purpose.

When the form is filled out and signed by the exporter or his authorized representative it must be taken to the governmental authority authorized to issue Form A in the country concerned. If it is incorrectly made out the customs authorities of the importing country may refuse to accept it.

#### Certificates issued retrospectively

In exceptional cases an origin certificate Form A can be issued after the export of the goods where it can be shown that a request was not made at the proper time because of an error, involuntary

omission or some other special circumstance. In such cases the Form A may be issued only if the issuing authorities are satisfied that the certificate of origin Form A corresponds to the goods sent on the basis of comparison with the export documentation, and that no certificate of origin Form A had already been issued.

A certificate so issued is marked 'ISSUED RETROSPECTIVELY' in box 4.

#### *Duplicates*

It is of course always possible that a certificate of origin Form A that has been issued is lost, stolen or destroyed. In these cases the exporter may ask the issuing authority for a replacement or duplicate. This is marked in box 4 'Duplicate' and is given the *same* date of issue as the original and is valid for the same period (see PART 3 paragraph 3.1).

### 2.2. *Goods sent in instalments*

Goods classified under Chapters 84 and 85 of the Customs Cooperation Council Nomenclature, that is 'Machinery and mechanical appliances; electrical equipment and parts thereof' which are imported by instalments may be considered as making up one whole only subject to the conditions made by the customs authorities of the country of importation and a certificate of origin Form A made out for the total may be submitted at the time of the first import to cover subsequent instalments as well.

### 2.3. *Accessories, spare parts and tools sent with a piece of equipment, machine, apparatus or vehicle*

These, if they are part of the normal equipment and are not separately invoiced or paid for, are regarded as part of the equipment etc. Naturally the rules of origin contained in PART 1 of these notes apply equally to the accessories, spare parts and tools but they are regarded as being classified under the same heading as the equipment etc., and their value must be included in any percentage value calculation carried out for the purposes of application of a percentage rule.

### 2.4. *Sets*

Goods put up in sets and classified in accordance with General Rule No 3 of the Customs Cooperation Council Nomenclature are

considered to have originating status if all the articles making up the set have that status.

A set made up of both originating and non-originating articles may be considered to have originating status provided the value of the non-originating articles does not exceed 15% of the total value of the set.

### 2.5. *Packing*

Packing, which is of the normal type for the article packed, and itself has no intrinsic utilization value of a durable nature except as packing is considered to be a part of the article packed. Again its value must be taken into account in calculation carried out in application of a percentage rule.

## Part 3 — What has to be done at import into the Community

### 3.1. *Period of validity of certificates of origin Form A*

The certificate of origin Form A shall be valid for 10 months from the date of issue by the competent authority in the country of export.

### 3.2. *Expiry of period of validity*

If the Certificate is submitted after the period of validity has expired, the customs authorities in the Community may accept the certificate afterwards provided they are satisfied that the delay was unavoidable or due to exceptional circumstances.

### 3.3. *Submission of certificates of origin Form A to customs*

As a general rule, the certificate of origin should accompany the goods to which they refer. However certificates may be submitted afterwards within a period of four months from the date on which the entry form for the release of goods into free circulation was accepted by customs. The customs authorities reserve the right to request the importer to produce a translation of the certificate into one of the Community languages and they may also require the importer to make and sign a declaration that the goods satisfy the conditions concerning origin and direct transport.

### 3.4. *Slight differences between the descriptions of the goods and the goods themselves*

The customs may ignore any small differences between the description on the Form A and the actual goods provided that they can be sure the certificate does in fact correspond to the goods.

## 3.5. *Treatment of Forms APR*

When a postal package arrives it will be seen by the customs authorities, who will check the contents and the Form APR.

## Part 4 — When verification takes place

The Community customs authorities may request verification of certificates of origin Form A or Forms APR by the issuing authorities in the country concerned.

## Part 5 — Regional Cumulation

### 5.1. *Who is concerned*

There are three special schemes, which are identical, for three regional groupings:

(a) ASEAN (Association of South East Asian Nations), comprising:

Indonesia	Singapore
Malaysia	Thailand
<b>The Philippines</b>	

(b) CACM (The Central American Common Market), comprising:

Costa Rica	Honduras
El Salvador	Nicaragua
Guatemala	

(c) The Andean Group, comprising:

Bolivia	Peru
Colombia	Venezuela
Ecuador	

### 5.2. *What is cumulation?*

Under the Communities' GSP scheme each developing country normally is considered in isolation and goods cannot be further worked in another country without losing the status of originating products nor can they go through another country unless geographical or transport requirements render this necessary (see Part 1 paragraph 1.6). Under the regional cumulation systems this is, under certain conditions, not the case. These conditions are explained below.

### 5.3. How cumulation works

- (a) If goods originating in one country in a regional grouping are not further processed after they have gone to a second country in the regional grouping, from which they are sent to the Community, then originating status is not lost.
- (b) If further working or processing of goods originating in one country of a regional grouping takes place in a second country of the same regional grouping using only products originating in the regional grouping, then originating status is preserved.
- (c) However, if further working or processing of goods originating in one country of a regional grouping takes place in a second country of the regional grouping, using products *not originating* in the regional grouping; then there are two different possibilities depending on whether
  - (i) the final product is covered by a List A or B percentage rule or
  - (ii) the final product is covered by the change of tariff heading rule or a List A or B rule not involving percentages.

### 5.4. Application of percentage rules

In the case of the application of a percentage rule (see paragraph 5.3. (c) (i) above), those goods incorporated that originate in another country in the regional grouping are regarded as neutral, that is they are regarded as neither originating goods nor non-originating goods and they are left out of the calculation. For example, where the percentage rule to be applied is one which allows up to 40% of non-originating goods to be incorporated, if the imported products originating in another country in the same regional grouping have a value of USD 50 and the value of the final product is USD 100, then non-originating parts incorporated in the country in the regional grouping where final processing takes place cannot exceed USD 20, that is 40% of the value added in this last country of processing (which is USD 50), if the final product is to have originating status.

#### EXAMPLE

List A limits the value of any non-originating products incorporated in products of Chapter 84 to 40% of the value of the finished product. By way of illustration, an incomplete machine has ac-

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
ex Chapter 84	Boilers, machinery and mechanical appliances and parts thereof, excluding refrigerators and refrigerating equipment (electric and other) (heading No 84.15) and sewing machines, including furniture specially designed for sewing machines (heading No ex 84.41)		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

quired the status of originating product of one country of the grouping in question through the use in manufacture of third country products to the value of USD 300, the cost of the processing and the use of originating parts amounting to USD 700 and the machine being therefore worth USD 1 000. This machine is sent to another country of the grouping where it has added to it USD 200 worth of third country non-originating parts covered by a tariff heading other than that covering the machine; as the cost of processing etc., amounts to USD 300 the value of the machine after this operation is USD 1 500; it retains its originating status since the value of the third country parts incorporated in it (USD 200) does not exceed 40% of the amount of the total value added in the second country in the regional grouping (USD 500).

### 5.5. Application of non-percentage rules

In the case of the application of a non-percentage rule (see paragraph 5.3. (c) (ii) above), the goods retain originating status provided that in addition to the use of any products originating in the regional grouping the third country non-originating goods incorporated do not exceed 5% of the total value of the final product *and* provided that if these third country goods had been incorporated in the first country of the regional grouping the product obtained would not have lost its originating status when exported.

## EXAMPLE

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
55.09 <sup>2</sup>	Other woven fabrics of cotton		Manufacture from products falling within heading No 55.01, 55.03 or 55.04

Cotton cloth of heading No 55.09 is manufactured in the first country of the regional grouping from imported carded cotton of heading No 55.04. This product, which has originating status by virtue of the rule in List A, is exported to a second country in the regional grouping where imported dye is used to dye the cotton cloth. The value of the dye being less than 5% of the value of the final product, the product retains its originating status upon export to the Community because:

- (1) the value of the dye is less than 5% of the total value; and
- (2) if the dye had been used in the first country of the regional grouping the product would not have lost originating status there.

### 5.6. *Determination of the actual country of origin in the regional grouping*

A product which obtains originating status by reason of the application of the cumulation rules as regarded as originating in the country which has contributed the highest percentage of the final value.

### 5.7. *Special reference on certificates of origin Form A*

If a product obtains originating status because of the application of the regional cumulation system then box 4 of the certificate of origin must contain one of the following as appropriate: 'Cumulation ASEAN', 'Cumulation CACM', 'Cumulation Andean Group'.

**'LOGICAL TREE' TO ESTABLISH WHETHER A PRODUCT HAS ORIGINATING STATUS<sup>1</sup>**

Q1           Is your product 'entirely produced'?  
YES — *originating product*  
NO — Q2

---

Q2<sup>2</sup>        Do the imported parts have a different 4 figure  
CCCN classification from that of the final product?  
YES — Question 3  
NO — Question 5

---

Q3           Is your product listed in List A?  
YES — Question 4  
NO — *originating product*

---

Q4           Does your product satisfy the additional criteria set  
out in List A?  
YES — *originating product*  
NO — non-originating product

---

Q5           Is your product listed in List B?  
YES — Question 6  
NO — non-originating product

---

Q6           Does your product satisfy the additional criteria set  
out in List B?  
YES — *originating product*  
NO — non-originating product

---

*N.B.* At the head of the last column in List B is a general 5% waiver for products of Chapters 84-92.

---

<sup>1</sup> This 'logical tree' does not take into account the possibilities available under the cumulation system (see PART 5).

<sup>2</sup> If your answer is YES and NO (that is, some imported parts are classified under the same heading as the final product and others are classified under a different heading) you have to follow through both the YES (Q 3) and NO (Q 5) possibilities. If all the answers come out as *originating product* then your product has originating status.

#### Notes to Lists A and B

1. The lists contain some products which do not benefit from tariff preferences but which may be used in the manufacture of products which do benefit.
2. The description of the products in column 2 in the lists corresponds to that of the same heading number in the Customs Cooperation Council nomenclature.
3. When a Customs Cooperation Council nomenclature heading number in column 1 of the lists is prefixed by 'ex', the corresponding rule applies only to the products stated in column 2.

LIST A

List of working or processing operations which result in a change in the nomenclature heading without conferring the status of originating products on the products undergoing such operations, or conferring this status only subject to certain conditions

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
02.06	Meat and edible meat offals (except poultry liver), salted, in brine, dried or smoked	Salting, placing in brine, drying or smoking of meat and edible meat and edible meat offals of heading Nos 02.01 and 02.04	
03.02	Fish, dried, salted or in brine, smoked fish, whether or not cooked before or during the smoking process		
07.02	Vegetables (whether or not cooked), preserved by freezing	Freezing of vegetables	
07.03	Vegetables provisionally preserved in brine, in sulphur water or in other preservative solutions, but not specially prepared for immediate consumption	Placing in brine or in other solutions of vegetables falling within heading No 07.01	
07.04	Dried, dehydrated or evaporated vegetables, whole, cut, sliced, broken or in powder, but not further prepared	Drying, dehydration, evaporation, cutting, breaking, powdering of vegetables falling within heading Nos 07.01 to 07.03 inclusive	
08.10	Fruit (whether or not cooked) preserved by freezing, not containing added sugar	Freezing of fruit	
08.11	Fruit provisionally preserved (for example, by sulphur dioxide gas, in brine, in sulphur water or other preservative solutions), but unsuitable in that state for immediate consumption	Placing in brine or in other solutions of fruit falling within heading Nos 08.01 to 08.09 inclusive	
08.12	Fruit, dried other than that falling within heading No 08.01, 08.02, 08.03, 08.04 or 08.05	Drying of fruit

16.02	Other prepared or preserved meat or meat offal	Manufacture from products falling within Chapter 2	
16.04	Prepared or preserved fish, including caviar and caviar substitutes	Manufacture from products falling within Chapter 3	
16.05	Crustaceans and molluscs, prepared or preserved	Manufacture from products falling within Chapter 3	
ex 17.01	Beet sugar and cane sugar, solid, flavoured or coloured	Manufacture from any product	
17.02	Other sugar in solid form; sugar syrups, not containing added flavouring or colouring matter; artificial honey, whether or not mixed with natural honey; caramel	Manufacture from any product	
ex 17.03	Molasses, flavoured or coloured	Manufacture from any product	
17.04	Sugar confectionery, not containing cocoa	Manufacture from other products falling within Chapter 17	
18.04	Cocoa butter (fat or oil)		Manufacture from originating cocoa beans
18.06	Chocolate and other food preparations containing cocoa	Manufacture from sucrose or manufacture in which the value of the products falling within heading Nos 18.01 to 18.05 inclusive used exceeds 40% of the value of the product obtained	
ex 19.02	Malt extract	Manufacture from products of heading No 11.07	
ex 19.02	Preparations of flour, meal, starch or malt extract, of a kind used as infant food or for dietetic or culinary purposes, containing less than 50% by weight of cocoa	Manufacture from cereals and derived products, meat, milk and sugars	
19.03	Macaroni, spaghetti and similar products		Manufacture from durum wheat

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
19.04	Tapioca and sago; tapioca and sago substitutes obtained from potato or other starches	Manufacture from any product	
19.05	Prepared foods obtained by the swelling or roasting of cereals or cereal products (puffed rice, corn flakes and similar products)	Manufacture from any product	
19.07	Bread, ships' biscuits and other ordinary bakers' wares, not containing added sugar, honey, eggs, fats, cheese or fruits; communion wafers, empty cachets of a kind suitable for pharmaceutical use, sealing wafers, rice paper and similar products	Manufacture from products falling within Chapter 11	
19.08	Pastry, biscuits, cakes and other fine bakers' wares whether or not containing cocoa in any proportion	Manufacture from products falling within Chapter 11	
20.01	Vegetables and fruit, prepared or preserved by vinegar or acetic acid, with or without sugar, whether or not containing salt, spices or mustard		Manufacture from originating products falling within Chapters 7 and 8
20.02	Vegetables prepared or preserved otherwise than by vinegar or acetic acid		Manufacture from originating products falling within Chapter 7
20.03	Fruits, preserved by freezing, containing added sugar		Manufacture from originating products falling within Chapters 8 and 17
20.04	Fruit, fruit-peel and parts of plants, preserved by sugar (drained, glazed or crystallized)		Manufacture from originating products falling within Chapters 8 and 17
20.05	Jams, fruit jellies, marmalades, fruit purée and fruit pastes, being cooked preparations, whether or not containing added sugar		Manufacture from originating products falling within Chapters 8 and 17
20.06	Fruit otherwise prepared or preserved, whether or not containing added sugar or spirit		Manufacture from originating products falling within Chapters 8, 9, 17 and 22
20.07	Fruit juices (including grape must) and vegetable juices, whether or not containing added sugar, but unfermented and not containing spirit		Manufacture from originating products falling within Chapters 7, 8 and 17
21.04	Sauces, mixed condiments and mixed seasonings		Manufacture from tomato concentrate the value of which does not exceed 50% of the value of the product obtained
21.05	Soups and broths, in liquid, solid or powder form; homogenized composite food preparations	Manufacture from products falling within heading No 20.02	
ex 21.07	Sugar syrups, flavoured or coloured	Manufacture from any product	

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
22.02	Lemonade, flavoured spa waters and flavoured aerated waters, and other non-alcoholic beverages, not including fruit and vegetable juices falling within heading No 20.07	Manufacture from fruit juices	
22.06	Vermouths, and other wines of fresh grapes flavoured with aromatic extracts	Manufacture from products of heading No 08.04, 20.07, 22.04 or 22.05	
22.09	Spirits (other than those falling within heading No 22.08); liqueurs and other spirituous beverages; compound alcoholic preparations (known as "concentrated extracts") for the manufacture of beverages	Manufacture from products falling within heading No 08.04, 20.07, 22.04 or 22.05	
22.10	Vinegar substitutes for vinegar	Manufacture from products of heading No 08.04, 20.07, 22.04 or 22.05	
23.07	Sweetened forage; other preparations of a kind used in animal feeding	Manufacture from cereals and derived products, meat, milk, sugar and molasses	
ex 24.02	Cigarettes, cigars and cigarillos, tobacco for smoking		Manufacture in which at least 70% by quantity of the products falling within heading No 24.01 used are originating products
ex 28.38	Aluminium sulphate	Manufacture from products falling within heading No 28.20	
30.03	Medicaments (including veterinary medicaments)	Manufacture from active substances	
ex 30.04	Wadding, gauze, bandages and similar articles (for example, dressings, adhesive plasters, poultices) impregnated or coated with pharmaceutical substances for medical or surgical purposes		Manufacture from originating pharmaceutical substances
31.05	Other fertilizers; goods of the present Chapter in tablets, lozenges and similar prepared forms or in packings of a gross weight not exceeding 10 kg		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
32.06	Colour lakes	Manufacture from products falling within heading Nos 32.04 and 32.05	
32.07	Other colouring matter; inorganic products of a kind used as luminophores	Mixing of oxides or salts falling within Chapter 28 with extenders such as barium sulphate, chalk, barium carbonate and satin white	
32.10	Artists', students' and signboard painters' colours, modifying tints, amusement colours and the like, in tablets, tubes, jars, bottles, pans or in similar forms of packings, including such colours in sets or outfits, with or without brushes, palettes or other accessories	Manufacture from products falling within heading Nos 32.04 to 32.09 inclusive	

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
74.17	Cooking and heating apparatus of a kind used for domestic purposes, not electrically operated, and parts thereof, of copper		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
74.18	Other articles of a kind commonly used for domestic purposes; sanitary ware for indoor use, and parts of such articles and ware, of copper		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
74.19	Other articles of copper		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
75.02	Wrought bars, rods, angles, shapes and sections, of nickel; nickel wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
75.03	Wrought plates, sheets and strip, of nickel; nickel foil; nickel powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
75.04	Tubes and pipes and blanks thereof, of nickel; hollow bars, and tube and pipe fittings (for example, joints, elbows, sockets and flanges), of nickel		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
75.05	Electro-plating anodes, of nickel, wrought or unwrought, including those produced by electrolysis		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
75.06	Other articles of nickel		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.02	Wrought bars, rods, angles, shapes and sections, of aluminium; aluminium wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.03	Wrought plates, sheets and strip, of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
76.04	Aluminium foil (whether or not embossed, cut to shape, perforated, coated, printed, or backed with paper or other reinforcing material), of a thickness (excluding any backing) not exceeding 0.20 mm		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.05	Aluminium powders or flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.06	Tubes and pipes and blanks therefor, of aluminium; hollow bars of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.07	Tube and pipe fittings (for example, joints, elbows, sockets and flanges), of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.08	Structures, and parts of structures (for example, hangars and other buildings, bridges and bridge-sections, towers, lattice masts, roofs, roofing frameworks, door and window frames, balustrades, pillars and columns), of aluminium; plates, rods, angles, shapes, sections, tubes and the like, prepared for use in structures, of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.09	Reservoirs, tanks, vats and similar containers, for any material (other than compressed or liquefied gas), of aluminium, of a capacity exceeding 300 litres, whether or not lined or heat insulated, but not fitted with mechanical or thermal equipment		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.10	Casks, drums, cans, boxes and similar containers (including rigid and collapsible tubular containers), of aluminium, of a description commonly used for the conveyance or packing of goods		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.11	Containers of aluminium, for compressed or liquefied gas		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
76.12	Stranded wire, cables, cordage, ropes, plaited bands and the like, of aluminium wire, but excluding insulated electric wires and cables		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.15	Articles of a kind commonly used for domestic purposes, sanitary ware for indoor use, and parts of such articles and ware, of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.16	Other articles of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
77.02	Wrought bars, rods, angles, shapes and sections, of magnesium; magnesium wire; wrought plates, sheets and strip, of magnesium; magnesium foil; raspings and shavings of uniform size, powders and flakes, of magnesium; tubes and pipes and blanks therefor, of magnesium; hollow bars of magnesium; other articles of magnesium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.02	Wrought bars, rods, angles, shapes and sections, of lead; lead wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.03	Wrought plates, sheets and strip, of lead		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.04	Lead foil (whether or not embossed, cut to shape, perforated, coated, printed, or backed with paper or other reinforcing material), of a weight (excluding any backing) not exceeding 1.7 kg/m <sup>2</sup> ; lead powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.05	Tubes and pipes and blanks therefor, of lead; hollow bars and tube and pipe fittings (for example, joints, elbows, sockets, flanges and S-bends); of lead		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.06	Other articles of lead		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
79.02	Wrought bars, rods, angles, shapes and sections, of zinc; zinc wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
79.03	Wrought plates, sheets and strip, of zinc; zinc foil; zinc powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
79.04	Tubes and pipes and blanks therefor, of zinc; hollow bars, and tube and pipe fittings (for example, joints, elbows, sockets and flanges), of zinc		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
79.06	Other articles of zinc		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.02	Wrought bars, rods, angles, shapes and sections, of tin; tin wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.03	Wrought plates, sheets and strip, of tin		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.04	Tin foil (whether or not embossed, cut to shape, perforated, coated, printed, or backed with paper or other reinforcing material), of a weight (excluding any backing) not exceeding 1 kg/m <sup>2</sup> ; tin powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.05	Tubes and pipes and blanks therefor, of tin; hollow bars, and tube and pipe fittings (for example, joints, elbows, sockets and flanges), of tin		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
82.05	Interchangeable tools for hand tools, for machine tools or for power-operated hand tools (for example, for pressing, stamping, drilling, tapping, threading, boring, broaching, milling, cutting, turning, dressing morticing or screw-driving), including dies for wire drawing, extrusion dies for metal, and rock drilling bits		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
82.06	Knives and cutting blades, for machines or for mechanical appliances		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
ex Chapter 84	Boilers, machinery and mechanical appliances and parts thereof, excluding refrigerators and refrigerating equipment (electric and other) (heading No 84.15) and sewing machines, including furniture specially designed for sewing machines (heading No ex 84.41)		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
84.15	Refrigerators and refrigerating equipment (electrical and other)		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
ex 84.41	Sewing machines; furniture specially designed for sewing machines		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: <ul style="list-style-type: none"> <li>— at least 50% in value of the materials and parts<sup>(1)</sup> used for the assembly of the head (motor excluded) are originating products, and</li> <li>— the thread tension, crochet and zigzag mechanisms are originating products</li> </ul>
ex Chapter 85	Electrical machinery and equipment and parts thereof, excluding products falling within heading Nos 85.14 and 85.15		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

<sup>(1)</sup> In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
  - the value of imported products,
  - the value of products of undetermined origin.

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
85.14	Microphones and stands therefor; loudspeakers; audio-frequency electric amplifiers		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: <ul style="list-style-type: none"> <li>— at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products, and</li> <li>— all the transistors are originating products</li> </ul>
85.15	Radiotelegraphic and radiotelephonic transmission and reception apparatus; radiobroadcasting and television transmission and reception apparatus (including receivers incorporating sound recorders or reproducers) and television cameras; radio navigational aid apparatus, radar apparatus and radio remote control apparatus		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: <ul style="list-style-type: none"> <li>— at least 50% in value of the materials and parts used <sup>(1)</sup> are originating products, and</li> <li>— all the transistors are originating products</li> </ul>
Chapter 86	Railway and tramway locomotives, rolling-stock and parts thereof; railway and tramway track fixtures and fittings; traffic signalling equipment of all kinds (not electrically powered)		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
ex Chapter 87	Vehicles, other than railway or tramway rolling-stocks, and parts thereof, excluding products of heading No 87.09		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
87.09	Motor-cycles, auto-cycles and cycles fitted with an auxiliary motor, with or without side-cars; side-cars of all kinds		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products

<sup>(1)</sup> In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- the value of imported products,
  - the value of products of undetermined origin.

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
ex Chapter 90	Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus and parts thereof, excluding products falling within heading Nos 90.05, 90.07 (except electrically ignited photographic flashbulbs); 90.08, 90.12 and 90.26		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
90.05	Refracting telescopes (monocular and binocular), prismatic or not		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
ex 90.07	Photographic cameras; photographic flashlight apparatus and flashbulbs other than discharge lamps falling within heading No 85.20, with the exception of electrically ignited photographic flashbulbs		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
90.08	Cinematographic cameras, projectors, sound recorders and sound reproducers but not including recorders of film-editing apparatus; any combination of these articles		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
90.12	Compound optical microscopes, whether or not provided with means for photographing or projecting the image		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products

<sup>(1)</sup> In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- the value of imported products,
  - the value of products of undetermined origin.

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
90.26	Gas, liquid and electricity supply or production meters; calibrating meters therefor		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
ex Chapter 91	Clocks and watches and parts thereof, excluding products falling within heading Nos 91.04 and 91.08		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
91.04	Other clocks		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
91.08	Clock movements, assembled		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts <sup>(1)</sup> used are originating products
ex Chapter 92	Musical instruments; sound recorders or reproducers; television image and sound recorders or reproducers, parts and accessories of such articles, excluding products of heading No 92.11		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

<sup>(1)</sup> In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
  - the value of imported products,
  - the value of products of undetermined origin.

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
92.11	Gramophones, dictating machines and other sound recorders or reproducers, including record-players and tape decks, with or without sound-heads; television image and sound recorders and reproducers		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: <ul style="list-style-type: none"> <li>-- at least 50% in value of the materials and parts<sup>(1)</sup> used are originating products, and</li> <li>-- all the transistors are originating products</li> </ul>
Chapter 93	Arms and ammunition; parts thereof		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
ex 96.01	Other brooms and brushes (including brushes of a kind used as parts of machines); paint rollers; squeegees (other than roller squeegees) and mops		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
97.03	Other toys; working models of a kind used for recreational purposes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
98.01	Buttons and button moulds, studs, cuff-links, and press-fasteners, including snap fasteners and press-studs; blanks and parts of such articles		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
98.08	Typewriter and similar ribbons, whether or not on spools; ink-pads, with or without boxes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

<sup>(1)</sup> In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
  - the value of imported products,
  - the value of products of undetermined origin.

List of working or processing operations which do not result in a change in the nomenclature heading but which do confer the status of originating products on the products undergoing such operations

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 21.03	Prepared mustard	Incorporation of non-originating materials and parts in machinery or mechanical appliances falling within Chapters 84 to 92 does not make such products lose their status of originating products, provided that the value of the non-originating materials and parts used does not exceed 5% of the value of the product obtained
ex 25.15	Marble squared by sawing, of a thickness of 25 cm or less	Manufacture from mustard flour
ex 25.16	Granite, porphyry, basalt, sandstone and other monumental and building stone, squared by sawing, of a thickness of 25 cm or less	Sawing into slabs or sections, polishing, grinding and cleaning of marble, including marble not further worked than roughly split, roughly squared or squared by sawing, more than 25 cm in thickness
ex 25.18	Calcined dolomite; agglomerated dolomite (including tarred dolomite)	Sawing of granite, porphyry, basalt, sandstone and other building stone, including such stone not further worked than roughly split, roughly squared or squared by sawing, more than 25 cm in thickness
ex 25.19	Other magnesium oxide, whether or not chemically pure	Calcination of unworked dolomite
ex 25.32	Earth colours, calcined or powdered	Manufacture from natural magnesium carbonate (magnesite)
ex Chapters 28 to 37	Products of the chemical and allied industries excluding sulphuric anhydride (ex 28.13), tannins (ex 32.01), essential oils, resinoids and terpenic by-products (ex 33.01), preparations used for tenderizing meat, preparations for clarifying beer composed of papain and bentonite and enzymatic preparations for the desizing of textiles (ex 35.07)	Crushing and calcination or powdering of earth colours
ex 28.13	Sulphuric anhydride	Working or processing in which the value of the non-originating products used does not exceed 20% of the value of the product obtained
ex 32.01	Tannins (tannic acids), including water-extracted gall-nut tannin, and their salts, ethers, esters and other derivatives	Manufacture from sulphur dioxide
ex 33.01	Essential oils (terpeneless or not), concretes and absolutes; resinoids; terpenic by-products of the deterpenation of essential oils	Manufacture from tanning extracts of vegetable origin

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 35.07	Preparations used for tenderizing meat, preparations used for clarifying beer, composed of papain and bentonite, enzymatic preparations for the desizing of textiles	Manufacture from enzymes or prepared enzymes of which the value does not exceed 50% of the value of the product obtained
ex Chapter 38	Miscellaneous chemical products, other than refined tall oil (ex 38.05) and wood pitch (wood tar pitch) (ex 38.09)	Working or processing in which the value of the non-originating materials used does not exceed 20% of the value of the product obtained
ex 38.05	Refined tall oil	Refining of crude tall oil
ex 38.09	Wood pitch (wood tar pitch)	Distillation of wood tar
Chapter 39	Artificial resins and plastic materials, cellulose esters and ethers; articles thereof	Working or processing in which the value of the non-originating materials used does not exceed 20% of the value of the product obtained
ex 40.01	Slabs of crepe rubber for soles	Lamination of crepe sheets of natural rubber
ex 40.07	Vulcanized rubber thread and cord, textile-covered	Manufacture from vulcanized rubber thread or cord, not textile-covered
ex 41.01	Sheep's and lambs' skins without the wool	Removing wool from sheep's and lambs' skins in the wool
ex 41.03	Retanned skin leather of crossed Indian sheep	Retanning of crossed Indian sheep skin leather not further prepared than tanned
ex 41.04	Retanned Indian goat or kid skin leather	Retanning of Indian goat or kid skin leather not further prepared than tanned
ex 44.22	Casks, barrels, vats, tubs, buckets and other cooper's products and parts thereof	Manufacture from riven staves of wood, not further prepared than sawn on one principal surface; sawn staves of wood, of which at least one principal surface has been cylindrically sawn, not further prepared than sawn
ex 50.09 ex 51.04 ex 53.11 ex 53.12 ex 54.05 ex 55.07 ex 55.08 ex 55.09 ex 56.07	Printed fabrics	Printing accompanied by finishing operations (bleaching, dressing, drying, steaming, burling, mending, impregnating, sanforizing, mercerizing) of fabrics the value of which does not exceed 47.5% of the value of the product obtained
ex 67.01	Feather dusters	Manufacture from feathers, parts of feathers or down
ex 68.03	Articles of slate, including articles of agglomerated slate	Manufacture of articles of slate

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 68.04	Hand-polishing stones, whetstones, oilstones, hones and the like, of natural stone, of agglomerated natural or artificial abrasives, or of pottery	Cutting, adjusting and gluing of abrasive materials, which, owing to their shape, are not recognizable as being intended for hand use
ex 68.13	Articles of asbestos; articles of mixtures with a basis of asbestos or of mixtures with a basis of asbestos and magnesium carbonate	Manufacture of articles of asbestos or of mixtures with a basis of asbestos, or of mixtures with a basis of asbestos and magnesium carbonate
ex 68.15	Articles of mica, including bonded mica splittings on a support of paper or fabric	Manufacture of articles of mica
ex 70.10	Cut-glass bottles	Cutting of bottles the value of which does not exceed 50% of the value of the product obtained
ex 70.13	Cut glassware (other than articles falling within heading No 70.19) of a kind commonly used for table, kitchen, toilet or office purposes, for indoor decoration, or for similar uses	Cutting of glassware the value of which does not exceed 50% of the value of the product obtained
ex 70.20	Articles made from glass fibre	Manufacture from unworked glass fibre
ex 71.02	Precious and semi-precious stones, cut or otherwise worked, but not mounted, set or strung (except ungraded stones temporarily strung for convenience of transport)	Manufacture from unworked precious and semi-precious stones
ex 71.03	Synthetic or reconstructed precious or semi-precious stones, cut or otherwise worked, but not mounted, set or strung (except ungraded stones temporarily strung for convenience of transport)	Manufacture from unworked synthetic or reconstructed precious or semi-precious stones
ex 71.05	Silver, including silver gilt and platinum-plated silver, semi-manufactured	Rolling, drawing, beating or grinding of unwrought silver and silver alloys
ex 71.06	Rolled silver, semi-manufactured	Rolling, drawing, beating or grinding of unworked rolled silver
ex 71.07	Gold, including platinum-plated gold, semi-manufactured	Rolling, drawing, beating or grinding of unwrought gold, including platinum-plated gold
ex 71.08	Rolled gold on base metal or silver, semi-manufactured	Rolling, drawing, beating or grinding of unwrought rolled gold on base metal or silver
ex 71.09	Platinum and other metals of the platinum group, semi-manufactured	Rolling, drawing, beating or grinding of unwrought platinum and other metals of the platinum group
ex 71.10	Rolled platinum or other platinum group metals, on base metal or precious metal, semi-manufactured	Rolling, drawing, beating or grinding of unworked rolled platinum or other platinum group metals on base metal or precious metal

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 73.15	Alloy steel and high carbon steel: — in the forms mentioned in heading Nos 73.07 to 73.13 — in the forms mentioned in heading No 73.14	Manufacture from products in the forms mentioned in heading No 73.06 Manufacture from products in the forms mentioned in heading No 73.06 or 73.07
ex 74.01	Unrefined copper (blister copper and other)	Smelting of copper matte
ex 74.01	Refined copper	Fire-refining or electrolytic refining of unrefined copper (blister copper and other), copper waste or scrap
ex 74.01	Copper alloy	Fusion and thermal treatment of refined copper, copper waste or scrap
ex 75.01	Unwrought nickel, excluding alloys	Refining by electrolysis, by fusion or chemically of nickel waste and scrap
76.16	Other articles of aluminium	Manufacture in which gauze, cloth, grill, netting, fencing, reinforcing fabric and similar materials (including endless bands) of aluminium wire, or expanded metal of aluminium are used the value of which does not exceed 50% of the value of the product obtained
ex 77.02	Other articles of magnesium	Manufacture from wrought bars, rods, angles, shapes and sections, plates, sheets and strip, wire, foil, raspings and shavings of uniform size, powders and flakes, tubes and pipes and blanks therefor, hollow bars, of magnesium, the value of which does not exceed 50% of the value of the product obtained
ex 77.04	Beryllium, wrought and articles of beryllium	Rolling, drawing or grinding of unwrought beryllium the value of which does not exceed 50% of the value of the product obtained
ex 81.01	Tungsten, wrought and articles of tungsten	Manufacture from unwrought tungsten the value of which does not exceed 50% of the value of the product obtained
ex 81.02	Molybdenum, wrought and articles of molybdenum	Manufacture from unwrought molybdenum the value of which does not exceed 50% of the value of the product obtained
ex 81.03	Tantalum, wrought and articles of tantalum	Manufacture from unwrought tantalum the value of which does not exceed 50% of the value of the product obtained
ex 81.04	Other base metals, wrought and articles of other base metals	Manufacture from other base metals, unwrought, the value of which does not exceed 50% of the value of the product obtained
ex 82.09	Knives with cutting blades, serrated or not (including pruning knives), other than knives falling within heading No 82.06	Manufacture from knife blades

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description

## Partie 2

### 1. Pays qui acceptent ce formulaire aux fins du système généralisé de préférences (SGP):

Autriche	Communauté économique européenne:	Irlande
Finlande	Allemagne, République fédérale d'	Italie
Norvège	Belgique	Luxembourg
Suède	Danemark	Pays-Bas
Suisse	France	Royaume-Uni
	Grèce	

*Des détails complets sur les conditions régissant l'admission au bénéfice du SGP dans ces pays peuvent être obtenus des autorités désignées par les pays exportateurs bénéficiaires ou de l'administration des douanes des pays donneurs qui figurent dans la liste ci-dessus. Une note d'information peut également être obtenue auprès du secrétariat de la CNUCED.*

### 2. Conditions générales

Pour être admis au bénéfice des préférences, les produits doivent:

- a) correspondre à la définition établie des produits pouvant bénéficier du régime de préférences dans le pays de destination. La description figurant sur le formulaire doit être suffisamment détaillée pour que les produits puissent être identifiés par l'agent des douanes qui les examine;
- b) satisfaire aux règles d'origine du pays de destination. Chacun des articles d'une même expédition doit répondre aux conditions prescrites; et
- c) satisfaire aux conditions d'expédition spécifiées par le pays de destination. En général, les produits doivent être expédiés directement du pays d'exportation au pays de destination; toutefois, sous certaines conditions le passage par des pays intermédiaires est accepté.

### 3. Indications à porter dans la case 7

Pour bénéficier des préférences, les produits doivent avoir été, soit entièrement obtenus, soit suffisamment ouvrés ou transformés conformément aux règles d'origine des pays de destination.

- a) Produits entièrement obtenus: il y a lieu d'inscrire la lettre «P» dans la case 7.
- b) Produits suffisamment ouvrés ou transformés; il y a lieu d'inscrire dans la case 7 la lettre «W» suivie de la position tarifaire occupée par le produit exporté dans la Nomenclature du Conseil de coopération douanière. Exemple: «W» 98.02.

(\*) Le contrôle *a posteriori* des formulaires APR est effectué à titre de sondage ou chaque fois que les autorités du pays d'importation ont des doutes fondés en ce qui concerne l'authenticité du formulaire et l'exactitude des renseignements relatifs à l'origine réelle de la marchandise en cause.

### Instructions relatives à l'établissement du formulaire APR

1. Peuvent seules donner lieu à l'établissement d'un formulaire APR les marchandises qui dans le pays d'exportation remplissent les conditions prévues par les dispositions régissant le système généralisé de préférences. Ces dispositions doivent être soigneusement étudiées avant de remplir le formulaire (voir les notes de la partie 2).
2. L'exportateur attache le formulaire au bulletin d'expédition lorsqu'il s'agit d'un envoi par colis postal ou l'insère dans le colis lorsqu'il s'agit d'un envoi par la poste aux lettres. En outre, il porte soit sur l'étiquette verte C 1, soit sur la déclaration en douane C 2/CP 3 la mention APR suivie du numéro de série du formulaire.
3. Ces instructions ne dispensent pas l'exportateur de l'accomplissement des autres formalités prévues dans les règlements douaniers ou postaux.
4. L'usage du formulaire constitue pour l'exportateur l'engagement de présenter aux autorités compétentes toutes justifications que celles-ci jugent nécessaires et d'accepter tout contrôle par lesdites autorités de sa comptabilité et des circonstances de la fabrication des marchandises désignées dans la case 11 du formulaire.

Before completing this form read carefully the instructions on the back of part 1 and the notes on part 2

## NOTES (1982)

## Part 2

### 1. Countries which accept this form for the purposes of the generalized system of preferences (GSP):

Austria	European Economic Community:	Ireland
Finland	Belgium	Italy
Norway	Denmark	Luxembourg
Sweden	France	Netherlands
Switzerland,	Federal Republic of Germany	United Kingdom
	Greece	

*Full details of the conditions covering admission to the GSP in these countries are obtainable from the designated authorities in the exporting preference-receiving countries or from the customs authorities of the preference-giving countries listed above. An information note is also obtainable from the UNCTAD secretariat.*

### 2. General conditions

To qualify for preference, products must:

- (a) fall within a description of products eligible for preference in the country of destination.  
The description entered on the form must be sufficiently detailed to enable the products to be identified by the customs officer examining them;
- (b) comply with the rules of origin of the country of destination.  
Each article in a consignment must qualify separately in its own right; and
- (c) comply with the consignment conditions specified by the country of destination.  
In general, products must be consigned direct from the country of exportation to the country of destination but passage through intermediate countries subject to certain conditions is accepted.

### 3. Entries to be made in box 7

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: enter the letter 'P' in box 7.
- (b) Products sufficiently worked or processed: enter letter 'W' in box 7 followed by the Customs Cooperation Council Nomenclature tariff heading of the exported product (example 'W' 98.02).

(Back)

(\*) Subsequent verifications of forms APR shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubt as to the accuracy of the information regarding the authenticity of the forms and the true origin of the goods in question.

**Instructions for the completion of form APR**

1. A form APR may be made out only for goods which in the exporting country fulfil the conditions specified by provisions governing the generalized system of preferences. These provisions must be studied carefully before the form is completed. (See notes on part 2.)
2. In the case of a consignment by parcel post the exporter attaches the form to the dispatch note. In the case of consignment by letter post he encloses the form in the package. The reference APR and the serial number of the form should be stated on the customs green label declaration C 1 or on the customs declaration C2/CP3, as appropriate.
3. These instructions do not exempt the exporter from complying with any other formalities required by customs or postal regulations.
4. An exporter who uses this form is obliged to submit to the appropriate authorities any supporting evidence which they may require and to agree to any inspection by them of his accounts and of the processes of manufacture of the goods described on box 11 of this form.

Une note d'information peut également être obtenue du secrétariat de la CNUCED.*

### II. Conditions générales

Pour être admis au bénéfice des préférences, les produits doivent:

- correspondre à la définition établie des produits pouvant bénéficier du régime de préférences dans le pays de destination. La description figurant sur la formule doit être suffisamment détaillée pour que les produits puissent être identifiés par l'agent des douanes qui les examine;
- satisfaire aux règles d'origine du pays de destination. Chacun des articles d'une même expédition doit répondre aux conditions prescrites; et
- satisfaire aux conditions d'expédition spécifiées par le pays de destination. En général, les produits doivent être expédiés directement du pays d'exportation au pays de destination; toutefois, la plupart des pays donateurs de préférences acceptent sous certaines conditions le passage par des pays intermédiaires (pour l'Australie, l'expédition directe n'est pas nécessaire).

### III. Indications à porter dans la case 8

Pour bénéficier des préférences, les produits doivent avoir été, soit entièrement obtenus, soit suffisamment ouverts ou transformés conformément aux règles d'origine des pays de destination.

- Produits entièrement obtenus:** pour l'exportation vers tous les pays figurant dans la liste de la section I, il y a lieu d'inscrire la lettre «P» dans la case 8 (pour l'Australie et la Nouvelle-Zélande, la case 8 peut être laissée en blanc).
- Produits suffisamment ouverts ou transformés:** pour l'exportation vers les pays figurant ci-après, les indications à porter dans la case 8 doivent être les suivantes:
  - États-Unis d'Amérique: dans le cas d'expédition provenant d'un seul pays, inscrire la lettre «Y» ou, dans le cas d'expéditions provenant d'un groupe de pays reconnu comme un seul, la lettre «Z», suivie de la somme du coût ou de la valeur des matières et du coût direct de la transformation, exprimée en pourcentage du prix départ usine des marchandises exportées (exemple: «Y» 35% ou «Z» 35%);
  - Canada: il y a lieu d'inscrire dans la case 8 la lettre «G» pour les produits qui satisfont aux critères d'origine après ouvrison ou transformation dans plusieurs des pays les moins avancés; sinon, inscrire la lettre «F»;
  - Autriche, Finlande, Japon, Norvège, Suède, Suisse et Communauté économique européenne: il y a lieu d'inscrire dans la case 8 la lettre «W» suivie de la position tarifaire occupée par le produit exporté dans la Nomenclature du Conseil de coopération douanière (exemple: «W» 98.02);
  - Bulgarie, Pologne, Hongrie, Tchécoslovaquie et URSS: pour les produits avec valeur ajoutée dans le pays exportateur bénéficiaire de préférences, il y a lieu d'inscrire la lettre «Y» dans la case 8, en la faisant suivre de la valeur des matières et des composants importés, exprimée en pourcentage du prix fob des marchandises exportées (exemple: «Y» 45%); pour les produits obtenus dans un pays bénéficiaire de préférences et ouverts ou transformés dans un ou plusieurs autres pays bénéficiaires, il y a lieu d'inscrire les lettres «Pk» dans la case 8.
  - Australie et Nouvelle-Zélande: il n'est pas nécessaire de remplir la case 8. Il suffit de faire une déclaration appropriée dans la case 12.

\* Pour l'Australie, l'exigence de base est une attestation de l'exportateur sur la facture habituelle. La formule A, accompagnée de la facture habituelle, peut être acceptée en remplacement, mais une certification officielle n'est pas exigée.

## NOTES (1982)

### I. Countries which accept Form A for the purposes of the generalized system of preferences (GSP):

Australia*	Norway	European Economic Community:	
Austria	Sweden	Belgium	Ireland
Canada	Switzerland	Denmark	Italy
Finland	United States of America	France	Luxembourg
Japan		Federal Republic of Germany	Netherlands
New Zealand		Greece	United Kingdom
People's Republic of Bulgaria			
Czechoslovak Socialist Republic			
Hungarian People's Republic			
Polish People's Republic			
Union of Soviet Socialist Republics			

*Full details of the conditions covering admission to the GSP in these countries are obtainable from the designated authorities in the exporting preference-receiving countries or from the customs authorities of the preference-giving countries listed above. An information note is also obtainable from the UNCTAD secretariat.*

### II. General conditions

To qualify for preference, products must:

- (a) fall within a description of products eligible for preference in the country of destination. The description entered on the form must be sufficiently detailed to enable the products to be identified by the customs officer examining them;
- (b) comply with the rules of origin of the country of destination. Each article in a consignment must qualify separately in its own right; and
- (c) comply with the consignment conditions specified by the country of destination. In general, products must be consigned direct from the country of exportation to the country of destination but most preference-giving countries accept passage through intermediate countries subject to certain conditions. (For Australia, direct consignment is not necessary.)

### III. Entries to be made in box 8

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: for export to all countries listed in Section I, enter the letter 'P' in box 8 (for Australia and New Zealand box 8 may be left blank).
- (b) Products sufficiently worked or processed: for export to the countries specified below, the entry in box 8 should be as follows:
  - (1) United States of America: for single country shipments enter the letter 'Y' in box 8, for shipments from recognized associations of countries, enter the letter 'Z' followed by the sum of the cost or value of the domestic materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported products (example 'Y' 35% or 'Z' 35%).
  - (2) Canada: for products which meet origin criteria from working or processing in more than one eligible least developed country, enter the letter 'G' in box 8; otherwise 'F'.
  - (3) Austria, Finland, Japan, Norway, Sweden, Switzerland and the European Economic Community: enter the letter 'W' in box 8 followed by the Customs Cooperation Council Nomenclature tariff heading of the exported product (example 'W' 98.02).
  - (4) Bulgaria, Czechoslovakia, Hungary, Poland and the USSR: for products which include value added in the exporting preference-receiving country, enter the letter 'Y' in box 8 followed by the value of imported materials and components expressed as a percentage of the fob price of the exported products (example 'Y' 45%); for products obtained in a preference-receiving country and worked or processed in one or more other such countries, enter 'PK'.
  - (5) Australia and New Zealand: completion of box 8 is not required. It is sufficient that a declaration be properly made in box 12.

\* For Australia, the main requirements is the exporter's declaration on the normal commercial invoice. Form A, accompanied by the normal commercial invoice, is an acceptable alternative, but official certification is not required.

## THE COMMUNITY'S GENERALIZED TARIFF PREFERENCES SCHEME FOR 1983

Because it is arranged systematically, following the classification of the Common Customs Tariff, the Guide enables users to find out straightaway, in respect of a product whose tariff heading is known, the following information:

- the normal tariff arrangements (CCT duties);
- if the product is covered by the 1983 GSP scheme, the tariff arrangements under that scheme, or more precisely:
  - • the implementing regulation covering the product,
  - • the GSP duty applicable for 1983, in the case of an agricultural product,
  - • the beneficiary countries and territories under the GSP,
  - • any limits on preferential treatment

The Guide only reproduces the schedule of customs duties contained in the Common Customs Tariff; it is essential, therefore, to have the Common Customs Tariff to hand in order to be able to refer to all the explanatory notes included in it.<sup>1</sup>

It should be stressed that the Guide is a tool designed to make it easier to consult the basic texts, but it does not replace them. Any reader wishing to keep his Guide absolutely up-to-date should,

therefore, enter in it any change in the Common Customs Tariff or any amendment that might be made during 1983 to the regulations opening preferences.

For the products covered by Chapters 1 to 24 of the CCT, following the principle of case-by-case treatment agreed in UNCTAD, the Guide gives only those headings or subheadings in respect of which preferences are granted under the GSP to the generality of beneficiaries. The complete list of products for which least-developed countries enjoy duty-free entry is set out immediately after the products in Chapters 1 to 24 (p. 277). The comparison with the normal tariff arrangements has been treated in a separate document, available in English or French, on request from the address given on p. 3. However in order to give a more comprehensive view, it also shows products not covered by the GSP which are imported into the Community duty-free, including those in respect of which exemption is granted temporarily or within the limits of a tariff quota. These products are shown for information only and their inclusion does not imply any connection between the duration of the suspension duty and that of the 1983 scheme.

<sup>1</sup> The Common Customs Tariff is published in OJ L 318, 15.11.1982 as the Annex to Council Regulation (EEC) No 3000/82 of 19 October 1982, amending Regulation (EEC) No 950/68 on the Common Customs Tariff.

## PRACTICAL NOTES ON THE SCHEDULES

### Schedule of customs duties (CCT section)

In some cases, the GSP covers only part of a tariff heading or sub-heading; to take this into account, it has been necessary to give a more detailed description of the goods than in the CCT. These are definitions of products for GSP purposes only and they do not imply any change in the CCT itself. This is made quite clear in the schedules since the normal duties under the Common Customs Tariff are always shown opposite the description of the goods appearing in the CCT whereas the duty given alongside the more detailed descriptions is always the GSP duty.

### 1983 Scheme (GSP section)

The products covered by the GSP are marked with an 'x' in the appropriate column. For *agricultural products (Chapters 1 to 24)* the GSP duties have been indicated whereas for *manufactured products* which as a rule enter duty-free, it has been thought preferable not to fill up the tables by repeating 'duty-free' in regard to every single item.

For certain manufactured industrial products other than textiles (Chapters 25 to 29 and 64 to 99) there is no mention of arrangements regarding ceilings or beneficiary countries, whereas the fact that the products are included in the GSP is indicated.

These are products which are already exempt from duty under the Common Customs Tariff. They are included only for the record as in the regulation opening preferential tariffs; no ceiling system is applicable to these products under the GSP since imports from all non-member countries are exempted from duty.

For products falling within Chapters 50 to 62, the new scheme for textiles in force since 1980 takes as its basis the product categories used in the bilateral agreements concluded within the MFA framework (which refer to Nimex codes rather than CCT headings or subheadings). The category corresponding to each tariff subheading and the annex to the regulation where it appears have simply been indicated alongside the entries in the schedules of duties, whereas the GSP arrangements proper for the various categories are set out after the schedules.

Lastly, as regards the developing countries and territories eligible for GSP treatment, letters A and B in the 'Beneficiaries' column (tables, pp. 49 to 276 and 317 to 351) refer to the lists on pages 353, 354 and 355, whereas the letters Ch and R refer to the People's Republic of China and Romania respectively.

## TERMINOLOGY

### Tariff quotas

The tariff quotas (strict limits, expressed in units of value or specific units within which the preferential duty is applied) are allocated among the Member States (the Benelux countries being considered as a single territory for this purpose) according to a key which differs for industrial and agricultural products:

Member States	Agricultural products					Industrial products	
	Tobacco	Soluble coffee	Cocoa butter	Pineapples		Ply-wood	Other
				in slices	other		
Benelux	11.83	7.40	52.52	12.99	9.56	4.44	10.5
Denmark	2.50	0.20	0.16	3.05	3.06	5.99	5
France	1.06	1.37	2.02	0.95	3.09	0.29	19
Germany	16.85	9.95	23.39	38.22	42.31	7.76	27.5
Greece	1.58	1.74	0.20	2.14	1.42	0.19	2
Ireland	3.24	0.19	0.16	0.95	0.59	1.94	0.5
Italy	5.92	0.26	0.16	3.44	2.23	0.87	14.5
United Kingdom	57	78.85	21.33	38.22	37.69	78.52	21

As soon as each Member State has used up its quota share it automatically reintroduces the normal customs duties, unless the tariff quota has a reserve share. In this case, before reintroducing the normal duties, it draws from the reserve certain quantities specified by the regulation until the reserve is used up as a result of successive drawings by Member States. The reserve is replenished during the quota year by transfers from Member States which have not used up their quota shares under the regulation.

The reserve share is administered by the Commission. In the case of agricultural products the quotas are open to all beneficiaries, who

apportion the utilization, whereas for industrial products, the quotas are individual, i.e. each beneficiary country is guaranteed the amount opened.

### Ceilings, allocated ceilings

Sensitive manufactured industrial products which are not subject to tariff quotas are admitted duty-free within tariff ceilings (indicative limits expressed in units of value or specific units up to which the preferential duty is granted). These ceilings are individual. In the case of one agricultural product (unmanufactured tobacco other than the Virginia type), the duty is reduced within a global ceiling open to all beneficiaries.

The ceilings are not allocated among the Member States; they are administered at Community level by the Commission. It can reintroduce the normal customs duties on its own initiative or on that of the Member States where it transpires from information supplied by the latter that the ceiling has been reached.

Sensitive textile products are subject to ceilings which are allocated among the Member States in accordance with a standard key: Benelux 10%, Denmark 3%, France 18%, Germany 28%, Greece 2%, Ireland 1%, Italy 15%, United Kingdom 23%.

Since 1980 the ceilings for products covered by the Multifibre Arrangement (MFA) (distributed ceilings for sensitive products and non-distributed ceilings for the rest) have been worked out individually for each beneficiary, but up to the end of 1982 for non-MFA products there were global ceilings open to all beneficiaries. From 1983 onwards these ceilings have also been allocated to individual beneficiaries.

### **Maximum country amount (*butoir*)**

Inside the global quotas and ceilings for industrial and textile products, GSP imports from each beneficiary country were limited to a maximum amount, known as the *butoir*, which was fixed at a percentage of the quota or ceiling that varied according to the product. The purpose of the maximum country amount was to ensure that all supplier beneficiary countries had the chance to use the quota or ceiling which, if no such limit had existed, might well have been monopolized by a very small number of countries (or even a single beneficiary country) which happened to be more competitive or better organized.

The Commission administered the maximum country amounts and it could reintroduce the duty in respect of a country if it found that the beneficiary country had used up its maximum amount.

Until 1980 for all textile products and 1981 for industrial products 'global' quotas and ceilings were applied and were subject to the *butoir* mechanism.

### **Safeguard clause**

The regulations granting developing countries preferential treatment in respect of agricultural products contain a clause which states that if products are imported under the GSP in such quantities or at such prices as to cause or threaten to cause serious injury to Community producers or create an unfavourable situation in the ACP States, the levying of customs duties may be reintroduced in respect of any country causing the injury.

*N.B.* : The limits on preferential imports in the form of quotas and ceilings are not applicable to the least-developed countries (List B, p. 343), with the exception of the quota and ceiling relating to raw or unmanufactured tobaccos (21.01 ex A and ex B). When the preferential amount for these two products has been used up the normal customs duty is reintroduced in respect of the least-developed countries as well.

## SYMBOLS AND ABBREVIATIONS

adf	additional duty on flour; same type of duty as the variable component (see below) and levied according to the difference between the Community price of flour and the international price for the quantities of flour contained in the product
ads	additional duty on sugar; same type of duty as the variable component (see below) and levied according to the difference between the Community price of sugar and the international price for the quantities of sugar contained in the product
CCT	Common Custom Tariff; the footnotes to the schedules of the 'Community's Generalized Tariff Preferences Scheme for 1983' worded 'see CCT Annex' refer to the Annex to the Common Customs Tariff, OJ L 318, 15.11.1982, p. 377.
EUA	European unit of account: devised in 1975 and phased in use in the various areas of Community activity (replacing the u.a., unit of account) the European unit of account was expressed as the sum of determined amounts of the currencies of the Member States of the European Communities; it has been progressively replaced by the ECU from 1979 on; on 1 January 1981, the EUA was replaced by the ECU in all the Community legal instruments where the former was still in use.
ECU	Devised in 1977 for the purposes of the EMS (European Monetary System) the ECU has been phased into use in the various areas of Community activity before officially replacing the EUA from 1 January 1981; it is a 'basket unit' made up of specific amounts of Member States' currencies, determined mainly by reference to the size of each Member States' economy; unlike the EUA, the ECU provides for a revision clause enabling changes to be made to its composition; its definition, identical to that of the EUA, corresponds to the sum of the following amounts of the currencies of the Member States of the European Communities; DM 0.828, UKL 0.0885, FF 1.15, LIT 109, HFL 0.286, BFR 3.66, LFR 0.14, DKR 0.217, IRL 0.00759; the Act of Accession of Greece to the Communities provides that the drachma is to be effectively included in the ECU before 31 December 1985 if the composition of the basket is changed before then and, in any event, by 31 December 1985 at the latest; the value of the ECU in a national currency is equal to the sum of the equivalents in that currency of the above amounts. It is determined by the Commission on the basis of exchange rates recorded each day on the exchange markets and published each day in the C Series of the <i>Official Journal of the European Communities</i> ; specific conversion rates are fixed for certain special cases, among others for the application of the tariff quotas expressed in value terms within the framework of the generalized tariff preferences (see Article 1 of Regulation (EEC) No 3377/82 and Article 8 of Decision 82/862/ECSC — OJ L 363, 23.12.1982)
l	litre
m <sup>3</sup>	cubic metre
Nil	denotes the fact that no ceiling is applicable
Nimexe	Nomenclature of Goods for External Trade Statistics of the Community and Statistics of Trade between Member States (OJ L 366, 27.12.1982)
sp.p.	species plures (of the genus...)
t	tonne
vc	variable component; duty levied on imports into the Community of certain goods processed from agricultural products; the variable component is designed to cover the difference between the import price and the cost in the Community of the raw materials used in making the product where that cost is higher
