Directorate-General for Agriculture and Rural Development

**AGRICULTURE IN THE EUROPEAN
UNION**

***STATISTICAL AND ECONOMIC
INFORMATION***

2010

March 2011

Foreword

Each year the Commission Directorate- General for Agriculture and Rural Development publishes the "Agriculture in the European Union - Statistical and economic information" A large part of the report is devoted to statistical information on Community agriculture. This is drawn up on the basis of information from Eurostat and data collected by the Directorate-General for Agriculture and Rural Development.

The statistical information presented here covers a wide range of subjects: the economic situation in agriculture, structures, trade, markets, financial aspects and rural development. An introductory chapter gives an overview of the 2010 agricultural year. It includes a wide range of statistical information on agriculture in the 27 Member States and in the accession Countries for EU membership.

Contents

Foreword-----	5
The 2009 agricultural year -----	14
Statistical and economic information -----	27
Codification of the tables -----	28
Key to symbols, names and abbreviations -----	29
Currency units used in this report -----	32
Observations on statistical method -----	34
Remarks -----	38

Table No

1 INTRODUCTION

1.0.1 Exchange rates

2 BASIC DATA

2.0.1.1 Basic data – key general statistics

2.0.1.2 Basic data – key agricultural statistics

3 ECONOMIC DATA

3.1 The agricultural economy

3.1.1 Shares of products in agricultural production

3.1.2 Individual Member States and Candidate Countries' share in agricultural production

3.1.3 Farm inputs: breakdown by Member State and Candidate Countries

3.1.4 Situation of the:

(a) output of the agricultural industry

(b) consumption of inputs

(c) gross added value at basic prices

(d) factor income

3.1.5 Value of agricultural production, crop production and livestock production

3.1.6 Movements in output volume in the agricultural activities sector, in intermediate consumption, in gross added value (at basic prices) and in net added value (at basic prices)

3.1.7 Movement in the implicit index of output prices in the agricultural industry
value/volume (nominal)
value/volume, deflated by GDP implicit price index (real)

3.1.8 Evolution of the implicit price index of intermediate consumption:
value/volume (nominal)
value/volume, deflated by GDP deflator (real)

3.1.9 Movements in productivity of intermediate consumption and terms of trade

3.1.10 Gross fixed capital formation and gross value-added in agriculture at basic prices

3.1.12 Indices of real income from agricultural factors, per annual work unit (AWU)

3.1.13 Volume of agricultural labour in annual work units (AWUs)

3.1.14.1 Changes in intermediate consumption by volume

3.1.14.2 Input (volume) indices

3.1.15 Agriculture by region: major economic indicators and the share of individual products

- 3.2 **FADN**
 - 3.2.1 The farm accountancy data network – Explanatory note
 - 3.2.2 The eight types of farming: shares of each enterprise in total output
 - 3.2.3 Accountancy results by type of farming
 - 3.2.4 Results by economic size of holding in the EU
- 3.3 **Prices and production costs**
 - 3.3.1 Agricultural prices and amounts of Community aid (beginning of marketing year)
 - 3.3.2 Producer prices for agricultural products in the EU (excl. VAT)
 - 3.3.3 Producer price indices (excl. VAT)
 - 3.3.4 Annual rate of change of:
 - (a) consumer prices for foodstuffs and beverages
 - (b) producer prices for agricultural products
 - 3.3.5 Input prices (excl. VAT)
 - 3.3.6 Agricultural input prices and producer prices (excl. VAT)
 - 3.3.7 Price indices for feedingstuffs, fertilizers and soil improvement, fuels and lubricants, and investments in machinery (excl. VAT)
 - 3.3.8 Market value of agricultural land (parcels)
 - 3.3.9 Rents for agricultural land
 - 3.3.10 Trend of purchase prices of agricultural inputs (excl. VAT)
 - 3.3.13.1 Producer prices in the Member States and Candidate Countries
- 3.4 **Financial aspects**
 - 3.4.1 Budgetary expenditure on the common agricultural policy
 - 3.4.2 EAGGF Guarantee and Guidance expenditure (2004 to 2006), EAGF and EAFRD expenditure (2009) by Member State
 - 3.4.3.1 Agricultural and Rural Development' Policy Area expenditure
 - 3.4.4 Breakdown of EAGF expenditures by sector, according to the economic nature of the measures
 - 3.4.5 Quantity and value of products in public intervention stores of the intervention agencies
 - 3.4.9 Implementation of budget (Rural Development)
 - 3.4.10 National expenditures for agriculture
- 3.5 **Structures**
 - 3.5.1 ***Employment in agriculture***
 - 3.5.1.1 Employment in agriculture: statistical sources and applications
 - 3.5.1.2 'Persons employed' in 'agriculture, hunting, forestry and fishing'
 - 3.5.1.3 Employment in agriculture and in the other sectors
 - 3.5.1.4. Employment in agriculture and in the other sectors: structures compared
 - 3.5.1.5.1 Employment in agriculture: persons working on agricultural holdings
 - 3.5.1.5.2 Employment in agriculture: breakdown by type of labour
 - 3.5.1.6 Employment in agriculture: working hours and combined other employment of farmers
 - 3.5.2 ***Land use***
 - 3.5.2.2. Main crops, by Member State and Candidate Countries
 - 3.5.3 ***Livestock numbers***
 - 3.5.3.3 Cattle numbers and number of holders
 - 3.5.3.4 Changing structure of cattle farms, by Member State and Candidate Countries
 - 3.5.3.5 Changing structure of cattle farms, by herd size class
 - 3.5.3.6 Dairy cow numbers and number of holders
 - 3.5.3.7 Changing structure of dairy farms, by Member State and Candidate Countries

- 3.5.3.8 Changing structure of dairy farms, by herd size class
- 3.5.3.9 Pig numbers and number of holders
- 3.5.3.10 Changing structure of pig farms, by Member State and Candidate Countries
- 3.5.3.11 Changing structure of pig farms, by herd size class

- 3.5.4 ***Farm structures***
 - 3.5.4.1 Number and area of holdings

- 3.6 **Implementation of the common agricultural policy (CAP)**
 - 3.6.1 ***Impact of CAP reform***
 - 3.6.1.1 Overview of the implementation of direct payments under the CAP in Member States
 - 3.6.1.2 36121 Budgetary ceilings for Single Payment Schemes in Member States
 - 36122 Budgetary ceilings for direct payments to be granted under Article 70 of regulation (EC) No 1782/2003 and Article 87 of regulation (EC) No 73/2009
 - 3.6.1.3 Single Area Payment Scheme - areas.
 - 3.6.1.4 36141 Annual financial envelopes for the single area payment scheme
 - 36142 Maximal amount of funds available for the Member States for granting the separate sugar payment referred to in article 126 of regulation (EC) No 73/2009.
 - 3.6.1.5 Budgetary ceilings for direct payments to be granted under Articles 66 to 69 of Regulation (EC) N°. 1782/2003
 - 3.6.1.7 Aid for energy crops.
 - 3.6.1.8 Aid for energy crops - Evaluation - Regulation (EC) N° 1973/2004 - Article 3(1)(b)a
 - 3.6.1.10 Suckler cow premium: national ceilings and premiums granted
 - 3.6.1.11 Special premium for male bovine animals: regional ceilings and number of premiums granted
 - 3.6.1.12 Slaughter premium: national ceilings and premiums granted
 - 3.6.1.13 Ewe and goat premium: potential rights and applications for premiums
 - 3.6.1.14 Direct payments to the producers by size class paid by EAGF - Regulation (EC) n°1782/2003
 - 3.6.2 ***Rural development policy results***
 - 3.6.2.1 Measure: Early retirement - Regulation (EC) No 1698/2005 art. 23.
 - 3.6.2.2. Measure: Less Favoured Areas (holdings receiving compensatory allowances by pre-dominant LFA type) - Regulation (EC) N° 1698/2005 art.37
 - 3.6.2.3 Measure: Agri-environment - Regulation (EC) No 1698/2005 art. 39.
 - 3.6.2.4 Measure: Afforestation of agricultural land - Regulation (EC) No 1698/2005 art. 43
 - 3.6.2.5 Measure: Afforestation of non-agricultural land - Regulation (EC) No 1698/2005 art.43

- 3.7 **Trade**
 - 3.7.1 World exports and EU external trade in all products, agricultural products and other products
 - 3.7.2 EU trade by product (CN chapters)
 - 3.7.3 Exports of agricultural products by the EU and some other countries
 - 3.7.4 Imports of agricultural products by the EU and some other countries
 - 3.7.5 World production and trade in the principal agricultural products – The EU share of the world market
 - 3.7.6 EU trade in agricultural products, according to principal customer countries
 - 3.7.7 EU trade in agricultural products, according to principal supplier countries
 - 3.7.8 EU imports and exports (by product and aggregate)

- 3.7.10 EU imports of agricultural products from various groups of countries
- 3.7.11 Agricultural product exports from the EU to various groups of countries
- 3.7.12 EU trade with ACP countries
- 3.7.13 EU trade with Mediterranean countries
- 3.7.14 EU trade in agricultural products
- 3.7.15 Intra-EU trade (by product and aggregate) on the basis of arrivals and dispatches
- 3.7.19 EU trade with Candidate Countries
- 3.7.21 EU trade with the United States of America
- 3.7.23 EU trade with the MERCOSUR countries
- 3.7.24 EU trade with the NAFTA countries

- 3.8 **Consumption and self-sufficiency**
- 3.8.2 Human consumption of certain agricultural products
- 3.8.3 Self-sufficiency in certain agricultural products

4 AGRICULTURAL MARKETS

4.1 Cereals

- 4.1.1.1 Area, yield and production of common and durum wheat
- 4.1.1.2 Area, yield and production of rye and barley
- 4.1.1.3 Area, yield and production of oats and mixed cereals and maize
- 4.1.1.4 Area, yield and production of other cereals and total cereals (excluding rice)
- 4.1.2.1 World production of cereals and production in main exporting countries
- 4.1.3.1 The EU's share in world cereals trade
- 4.1.4.1 Supply balances– durum wheat– common wheat
- 4.1.4.2 Supply balances– barley– rye
- 4.1.4.3 Supply balances – maize– oats
- 4.1.4.4 Supply balances – other cereals– total cereals (excluding rice)
- 4.1.5.1 Producer prices of certain cereals
- 4.1.5.5 Cif Rotterdam prices for cereals
- 4.1.6.2 Market prices for cereals as a percentage of the intervention price
- 4.1.6.3 Intervention stocks in the EU at the end of the marketing year

4.2 Rice

- 4.2.1.1 Area, yield and production of rice (paddy)
- 4.2.4.1 Supply balance – rice
- 4.2.5.1 Cif Rotterdam prices for long-grain rice
- 4.2.6.1 Market prices for Community paddy rice compared with intervention prices

4.3 Sugar

- 4.3.1.1 Area under sugarbeet, yield and production of sugar
- 4.3.2.1 World production of sugar and production of the main producing and/or exporting countries
- 4.3.3.1 World supply balance and international trade in sugar
- 4.3.4.1 Sugar supply balance
- 4.3.5.1 Average world sugar prices
- 4.3.6.1 Sugar and isoglucose production, by quota

4.4 Oilseeds, oils and fats

- 4.4.1.1 Area, yield and production of: rapeseed; sunflower seed; and soya beans in the EU
- 4.4.3.1 Internal and external trade of: rapeseed; sunflower seed; soya beans; and flax seed
- 4.4.4.1 Supplies of rape and colza (seed, oil, cake)
- 4.4.4.2 Supplies of sunflower (seed, oil, cake)
- 4.4.4.3 Supplies of soya (seed, oil, cake)
- 4.4.4.4 Supplies of olive oil
- 4.4.5.1 Fixed prices and average market prices in Greece, Spain and Italy for olive oil
- 4.4.5.3 Average monthly prices for oilseed products

4.5 Fruit and vegetables

- 4.5.1.1 Area, yield and harvested production in the EU and Candidate Countries of: (a) fruit; (b) citrus fruit; (c) vegetables
- 4.5.3.1 Intra-EU trade and external trade in fresh fruit and vegetables
- 4.5.5.1 Producer prices of certain types of fruit and vegetables
- 4.5.6.1 Quantities of fruit and vegetables bought in

- 4.6 **Wine**
 - 4.6.1.1 Area under vines, yield and production of wine and must
 - 4.6.3.1 Trade in wine and share in world trade
 - 4.6.4.1 Supply balance – wine
- 4.7 **Potatoes**
 - 4.7.1.1 Area, yield and production of potatoes
 - 4.7.1.2 Area, yield and production of early potatoes
- 4.8 **Tobacco**
 - 4.8.1.1 Area, yield and production of leaf tobacco, by groups of varieties
 - 4.8.3.1 EU share of world trade in raw tobacco
 - 4.8.3.2 EU tobacco exports to third countries
 - 4.8.3.3 Total imports and exports of unmanufactured tobacco and tobacco refuse
- 4.9 **Seeds**
 - 4.9.1.1 Seed production
 - 4.9.1.2 Seed areas accepted for certification
- 4.10 **Hops**
 - 4.10.1.1 Number of holdings, area, yield and production of hops in the EU
 - 4.10.4.1 Market balance – hops
- 4.11 **Fibre flax, cotton and silkworms**
 - 4.11.1.2 Area, yield and production of fibre flax and hemp
 - 4.11.1.3 Output of silkworm cocoons and number of boxes of silkworm eggs used
 - 4.11.3.2 Intra-EU trade and external trade in cotton fibre
 - 4.11.5.3 Ginned cotton, world prices
- 4.13 **Feedingstuffs – Fodder**
 - 4.13.7.3 Industrial production of compound feedingstuffs, by species and by Member State and Candidate Countries
 - 4.13.7.8 EU supplies of dehydrated and dried fodder
 - 4.13.7.9 Area, yield and production of dry pulses, feed peas and field beans in the EU and Candidate Countries
 - 4.13.7.12 Cif offer price (Rotterdam) for Brazilian soya cake
- 4.14 **Meat in general**
 - 4.14.1.1 Gross internal production and consumption of meat
 - 4.14.3.1 Net balance of external trade in meat and self-sufficiency
- 4.15 **Beef/veal**
 - 4.15.0.1 Cattle numbers (December of previous year)
 - 4.15.1.1 Slaughterings of adult bovine animals, calves and young cattle
 - 4.15.1.2 Net production of beef/veal in the EU (adult bovine animals calve sand youg cattle)
 - 4.15.2.1 World production and production of principal beef/veal producing/exporting countries
 - 4.15.3.1 Beef/veal – EU trade by species
 - 4.15.3.2 Beef/veal – trade with non-member countries
 - 4.15.4.1 Supply balance – beef/veal
 - 4.15.5.1 Market prices for beef/veal

- 4.16 **Pigmeat**
 - 4.16.0.1 Pig numbers (December of previous year)
 - 4.16.1.1 Number of pigs slaughtered
 - 4.16.1.2 Net pigmeat production
 - 4.16.2.1 World production and gross domestic production of main pigmeat-producing or exporting countries
 - 4.16.4.1 Supply balance – pigmeat
 - 4.16.5.1 Market prices for pigmeat

- 4.17 **Sheepmeat and goatmeat**
 - 4.17.0.1 Sheep and goat numbers (preceding December)
 - 4.17.1.1 Sheep and goats slaughtered
 - 4.17.3.1 Sheepmeat and goatmeat – EU trade, by species
 - 4.17.3.2 Sheepmeat and goatmeat – trade with non-member countries
 - 4.17.3.3 Imports of sheepmeat and goatmeat
 - 4.17.4.1 Supply balance – sheepmeat and goatmeat
 - 4.17.5.1 Market prices for sheepmeat

- 4.18 **Poultrymeat**
 - 4.18.0.1 Number of utility chicks of table strains hatched
 - 4.18.1.1 Gross internal production of poultrymeat
 - 4.18.3.1 Trade in poultrymeat with non-member countries
 - 4.18.4.1 Supply balance – poultrymeat
 - 4.18.5.1 Market prices for chickens

- 4.19 **Eggs**
 - 4.19.0.1 Laying hens, numbers
 - 4.19.0.2 Number of utility chicks hatched from laying hens
 - 4.19.1.1 Usable production of eggs (total eggs)
 - 4.19.3.1 Trade in eggs with non-member countries
 - 4.19.4.1 Supply balance – eggs (total eggs)
 - 4.19.5.1 Market prices for eggs

- 4.20 **Milk and milk products**
 - 4.20.0.1 Dairy herds and yield
 - 4.20.1.1 Production of cows' milk and delivery to dairies
 - 4.20.1.2 Deliveries of cows' milk to dairies, as a proportion of cows' milk production
 - 4.20.1.3 Production of fresh milk and fresh milk products by the dairy industry
 - 4.20.1.4 Production in dairies of butter and cheese
 - 4.20.1.5 Production in dairies of milk powder
 - 4.20.1.6 Production in dairies of concentrated milk and casein
 - 4.20.2.1 World exports and production of– butter– cheese– casein
 - 4.20.2.2 World exports and production of– whole-milk powder and skimmed-milk powder – Condensed milk
 - 4.20.3.1 World trade in certain milk products – EU share
 - 4.20.4.2 Detailed supply balance – skimmed-milk powder
 - 4.20.4.3 Detailed supply balance – butter
 - 4.20.5.1 Milk producer price
 - 4.20.6.1 Intervention measures for butter and skimmed-milk powder
 - 4.20.6.2 Application of the quota system (quotas for deliveries)
 - 4.20.6.3 Community butter and skimmed-milk powder stocks

- 4.21 **Honey**
 - 4.21.4.1 Supply balance – honey

- 4.22 **Wood**
 - 4.22.1.1 Basic forest resources
 - 4.22.3.1 EU external trade in forest products
 - 4.22.3.2 EU external and intra-EU trade in timber and timber products by Member State
- 4.23 **Genetically modified organisms (GMOs)**
 - 4.23.1.1 World areas sown to GMOs by country
 - 4.23.1.2 World areas by crop (GMOs)
- 4.24 **Quality policy**
 - 4.24.9.1 Protected designations of origin and protected geographical indications (Regulation (EC) no 510/2006): record of names registered
 - 4.24.9.2 Certified and policy – supported organic and in conversion land area
 - 4.24.9.3 Number of certified and policy – supported organic and in conversion farms

α = New table

Remark: The following tables of *The Agricultural Situation in the European Union – 2009* have not been repeated: 3.6.1.9, 4.20.6.4

The 2010 Agricultural Year

General overview

1. The **2010 agricultural year** in the EU was characterised by a 9.9% increment in the real agricultural income after the remarkable drop occurred in 2009. This rise was the outcome of a slightly decrease in the volume of the agricultural output and the increment in the agricultural output prices. The volume of EU crop production fell by 2.4% whereas the volume of animal production increased by 0.4%.¹

Real agricultural producer prices grew by 4.3% in 2010 as compared to 2009, reflecting 8.9% and 2% higher crop and animal output prices respectively. Within the crop sector, prices rose for all groups of crops, most sharply for oilseeds (+27.1%), cereals (+22.5%), potatoes (+13.1%) and fresh vegetables (9.0%), except for olive oil (-0.4%). For animal production, prices grew for milk (+9.4%), sheep and goats (+7%) and cattle (+0.4%), while decreasing for pigs (-2.6%).²

Agricultural input prices (in nominal terms) showed a moderate increase of 1.1% mainly due to higher prices for energy/lubricants (+6.7%), feedstuffs (3.2%) and maintenance of buildings (+3.3%).

Reflecting the output and input price developments, the estimates depict a remarkable increase in the agricultural income of 12.3% in real terms and per annual labour unit as compared to 2009 in the EU. The actual range by country varies from -8.4% for Romania and the United Kingdom to +54.8% for Denmark.

2. The general **economic situation** is slowly emerging from the deepest recession in decades. The overall pace of the recovery remains gradual and uneven among countries. Total Gross Domestic Product grew by 1.8% in 2010 and this recovery is expected to continue for the years 2011 (+1.7%) and 2012 (+2.0%), while world output would bounce back stronger (+4.2% in 2011 and +4.5% in 2012).

Overall consumer price inflation in 2010 is estimated at 2.1%, a relatively low figure but on an increasing trend, whereas food price inflation would stay at 1.17%. The Euro depreciated vis-à-vis the Dollar during the first half of 2010 when it reached 1.19 \$/€. Then, it appreciated up to November (1.42\$/€), starting the depreciation again until the end of the year when it ended up at 1.33 \$/€.

3. In 2010 **EU agricultural exports** in value terms reached more than 90 billion Euros, of which around 64% are processed final products. The value of EU agricultural exports increased by 21% compared to 2009, the strongest increment being recorded for commodity products (+31%). The increase in export value was also particularly marked for spirits and liquors (+24% or 1.3 billion Euros), reaching 7 billion Euros, wine & vermouth (+25% or 1.4 billion Euros), coming close to 7 billion Euros, and cereal preparations (+14% or 700 million Euros), reaching 5.5 billion Euros in 2010. Wheat (grains) and odoriferous substances rank fourth and fifth in terms of export value, both attaining around 3.8 billion Euros in 2010. These top-5 exported products represent roughly 30% of all EU27 agricultural exports.

The US remains the main destination for agricultural products: EU exports in 2010 reached a value of 13.5 billion Euros (+14%). Exports to Russia recovered in 2010 (+32%), thus going above 9 billion Euros. Switzerland remains the EU's third main destination of agricultural exports with a value of over 6 billion Euros (+9%). The fourth most important destination for EU exports is Japan (close to 4.5 billion Euros), and the fifth is China, for which EU exports have increased by 50% last year to reach 3.2 billion Euros.

The value of **EU agricultural imports** increased by more than 9% in 2010, going beyond 84 billion Euros. Tropical products were the most significant EU imports: Fruits & Spices, Coffee & Tea, and Cocoa imports reached together a value of over 19 billion Euros. Oilcake imports were close to 7 billion Euros and the category "Other animal or vegetable oils" stood at about 6 billion Euros. The five abovementioned product groups combined represented almost 40% of all EU agricultural imports.

¹ Source: Eurostat, Economic Accounts for Agriculture (EAA)

² Source: Eurostat, Economic Accounts for Agriculture (EAA)

In 2010 EU imports from Brazil were roughly at the same level as in 2009 (almost 12 billion Euros) and imports from the US increased from 5.9 billion Euros in 2009 to over 7 billion Euros in 2010 (+25%). For our 3rd main supplier, Argentina, EU imports remained stable at 6 billion Euros. Imports from China and Switzerland, fourth and fifth in the ranking, amounted to 3.9 and 3.7 billion Euros respectively (+21% and +13%).

As exports increased far more than imports, the EU agricultural trade balance greatly improved in 2010: after registering trade deficits between the years 2007 (-4.4 billion Euros) and 2009 (-2.5 billion Euros), the EU displayed last year an agricultural trade surplus of more than 6 billion Euros. While trade flows contracted in 2009 due to the economic crisis and the drop in prices for key commodities, they largely recovered in 2010. The growth in EU exports seems to be driven by the recovery in demand for wine and spirits and the increase in value of exports of dairy, cereals and related products, pork meat and raw hides, skins & fur skins and beef meat.

Overview on agricultural markets

4. The area cultivated under **cereals** in the crop year 2009/2010 would stand at 56.3 million hectares. This would represent a decrease of 2.2 million hectares or 3.8% compared with the 2008/2009 level (-1.2 million hectares in EU-15 and -1.1 million hectares in EU-12).

Average yields of 4.93 tonnes/hectare (2.0% below the yield in 2009/2010, yet comparable to the 5-year average) led to a total cereal harvest estimated at 277.2 million tonnes, which is 5.8 % or about 17 million tonnes lower than in 2009/2010 (294.3 million tonnes) and 2.3% lower than the 5-year average (283.7 million tonnes). All cereals, with the exception of durum wheat, experienced a decline in production.³

5. EU-27 **oilseed** area is estimated at 11 million hectares in the crop year 2009/10. Total oilseed production would stand at 28.3 million tonnes. This would represent a decrease of 2.9% in comparison with the previous year when oilseed production reached 29.1 million tonnes. Average oilseed yields would reach 2.57 tonnes/hectare, 4.4% lower than the 2.669 tonnes/hectare of 2008/2009.
6. **Protein crop and linseed** production would stand at 2.9 million tonnes and 0.13 million tonnes respectively.
7. EU **Rice** production reached the record high of 1.86 million tonnes (milled equivalent) in 2009/2010, 0.36 million tonnes greater than in 2008/2009. Italy and Spain, which represent 80% of the total EU's production, increased their output from 0.79 and 0.38 to 0.98 million tonnes and 0.54 million tonnes respectively. An increase in the area planted and the good weather conditions resulted in higher yields.

Rice consumption increased by 6.2% in 2010 (from some 2.31 to 2.45 million tonnes in milled equivalent).

Rice stocks grew by 29.1% and reached a 0.54 million tonnes in the end of the marketing year, which started and ended without public intervention stocks.

The milled equivalent rice imports increased from 0.84 to 0.9 million tonnes with a parallel export increase from 0.1 to 0.2 million tonnes.

Paddy rice prices were well above the reference price level during the whole marketing year (160-260% of the reference price of September 2009). Prices decreased by 30% during the first half of 2010, reaching the level of 2009 in the following months. Milled rice prices followed the same trend although with some months of delay.

³ Soft wheat, durum wheat and grain maize would experience rather limited cuts. The decrease in production would be larger for sorghum, rye, barley, oats and triticale. The production of other cereals, by contrast, would increase.

8. **Sugar** prices became extremely volatile during 2010. World market prices ranged from 350 €/tonne in March to 620 €/tonne in December 2010. According to the International Sugar Organization (ISO), global sugar production amounted to 160 million tonnes in 2009/2010, 8 million tonnes more than in 2008/2009. Sugar consumption reached 164.3 million tonnes, thus the campaign 2009/10 resulted in a major global sugar deficit of 3.8 million tonnes.

The situation is expected to improve in the campaign 2010/11. Sugar production would reach 169 million tonnes (+8.5 million tonnes), whereas consumption would increase to 167.7 million tonnes. Thus, 2010/11 would bring a small surplus of about 1.3 million tonnes. Adverse weather conditions in the main producing countries (Australia, Brazil) could lead to a reduction of this surplus.

The EU production of sugar and isoglucose under quota reached 13.96 million tonnes plus an additional 4.6 million tonnes of out-of-quota sugar in the 2009/10 campaign, of which 0.561 million tonnes would be carried forward to the 2010/2011 marketing year. On the basis of the Community balance sheet, the overall sugar and isoglucose consumption would be 16.5 million tonnes in the campaign 2009/2010.

According to first forecasts for 2010/2011, the sugar beet area would be similar to that of 2009/2010. The production under quota would reach 13.77 million tonnes. However, unfavourable weather conditions in some Member States could reduce the out-of-quota sugar production from 4.6 million tonnes in 2009/2010 to 3.18 million tonnes in 2010/2011. The total production quota for 2010/2011 is 14.03 million tonnes, of which 13.34 million tonnes are assigned for sugar and 0.69 million tonnes for isoglucose.

Exports of out-of-quota sugar were authorized for the first time in the marketing year 2008/2009, which fixed the quantitative limit at 0.95 million tonnes of sugar and 0.05 million tonnes of isoglucose.⁴ For the 2009/2010 marketing year, the quantitative limit was fixed at 1.35 million tonnes of sugar and 0.05 million tonnes of isoglucose.⁵ In February 2010, the Commission allowed an additional 0.5 million tonnes of out-of-quota exports.

During the 2009/2010 campaign, overall sugar exports under quota reached 1.12 million tonnes, of which 1.02 million tonnes were exported as processed products. Imports of sugar (including both white and raw sugar) amounted to 3 million tonnes of white sugar equivalent, of which 0.5 million tonnes were processed products.

34 944 tonnes of sugar intervention stocks were allocated to the most deprived people scheme in 2010.

On 1 October 2009 the white sugar reference price decreased from 541 to 404 €/tonne as the last step of the sugar reform of 2006.

The average EU market price for sugar fell steadily from September 2009 to February 2010, when it reached 477 €/t. Since then, prices have slowly increased. The last reported figure is 486 €/tonne for November 2010, well below the average world market price.

9. Total **must** production for wine and grape juice was at a low level in 2009/2010. Estimates indicate a production of about 169.2 million hectolitres, of which 163.7 millions hectolitres were devoted to wine.

The market price of **table wines** without geographical indication suffered from high stock levels: In July 2010 Spanish red table wines were marketed at 2.5 €/hectograde (-4% compared to the last year), Italian red table wine at 2.4 €/hectograde (-10%), whereas French red table wine increased at the end of the year up to 3.75 €/hectograde (+6%). Quotations for white table wines are often based on insufficient volumes to be considered truly representative. Due to lower demand, white wine prices decreased by 20% in France and Italy.

Exports in volume increased by 12% reaching 18 million hectolitres, whereas imports slightly decreased (-3%) during the campaign 2009/2010 compared to the previous one. However exports in

⁴ Commission Regulation (EC) No 924/2008.

⁵ Commission Regulation (EC) No 274/2009

value increased by 7% to 6.0 billion Euros. In combination with the decrease of imports in value (-6%), the trade balance shows a positive result of 3.6 billion euros, an increase of 18% compared to 2008/2009.

As result of the low 2009/2010 production level and the increase of the exported volumes, the stock level decreased by 4.3 million hectolitres (-2.5%). However, stock levels remain too high compared to the annual production (104%) and yearly consumption (105%) to influence significantly over the price levels.

10. 2010 was a good year in terms of prices for the **Fruit and Vegetables** sector compared to 2009. Prices in 2010 registered a substantial increase, approaching the levels of 2008. This price increment was the outcome of the fall of production mainly due to bad weather conditions and the poor results of the 2009 campaign, which discouraged investment among farmers. The economic slowdown had an influence on the markets, though smaller than the last year, and retailers play a fundamental role in determining prices.

The production of **peaches** and **nectarines** fell by 7% in 2010 because of bad weather conditions in Italy and Greece. Peach prices increased by 15% in 2010 compared to 2009, but they were still below those of 2008. Prices for nectarines remained stable in 2010, though 20% lower than in 2008. Whereas prices in Italy and Spain increased by 20%, they fell in Greece due to the economic crisis.

The production forecasts for **apples** are set at 9, 36 million tons for the EU in 2010, 15% lower than in 2009 and the second lowest crop in the decade. All Member States, except Greece, Spain and Sweden, expect slimmer harvests. Prices would increase by 23% due to the reduction in the production and to the low level of stocks from 2009. EU production of **pears** is expected to reach 2,155 million tons in 2010, 19% lower than in 2009 and 12% below the average of the last three years. Prices show a remarkable increment especially for the variety "Abate Fetel".

The production forecasts for **citrus fruit** are 9.9 millions tons, 3% lower than in 2009. **Lemons** faced a difficult kick off season due to imports from Turkey and the large stocks in Argentina at very low prices

After the difficult campaign for **tomatoes** in 2009, prices have significantly increased in 2010 and remained stable over the year. Bad weather conditions affected the summer campaign, leading to a decrease in production of 1-2%. Producer's prices increased: France registered an increment of 20% in round tomatoes; in Belgium and the Netherlands prices in 2010 were 20-30% higher than in the previous campaign with peaks of +50% for round tomatoes and +46% for vine tomatoes.

Initial estimates suggest that the production of **potatoes** in 2010 would decrease by 6.5 million tons (-10%) and prices would double compared to 2009.

According to preliminary data, EU **imports** of fresh or dried fruit and nuts decreased by 7% to around 11,5 million tonnes in 2010. As usual, bananas (-8%) and other tropical fruit (-5%) account for about half of the imported volumes. Imports of nuts decreased by 10% compared to 2009. Other imported products, mainly to complement the EU seasonal production, are citrus fruit (+2%) representing 18% of the total fruit import, apples (-11%), table grapes (-9%), pears (-26%) and kiwis (-6.5%).

EU **exports** of fresh or dried fruit and nuts increased to 3.1 million tonnes, 3.5% above the 2009 level. Exports of fresh apples decreased by 2.5%, while pear exports increased by 30% compared to 2009, the main destination being Russia. A negative year was registered for citrus fruit exports (-5.4%) especially for lemon (-24%). A considerable increase is observed in the exports of peaches (+43%) and nectarines (+25%), kiwis (+16.5%) and melons (+14%), while exports of cherries decreased by nearly 35%.

In 2010, the EU imported about 2 million tonnes of fresh vegetables, which represents a decrease of 12% compared to 2009. Main imported products are tomatoes (-21%), potatoes (-14%), onions (+3%), sweet peppers (-14%), beans (-8%), carrots and turnips (-25%) and garlic (-8%). EU exports of fresh vegetables decreased by 2.5%, making up for 2.6 million tonnes in 2010. The main products exported are potatoes (-4,8%, seed and old potatoes), followed by onions (-3.6%), tomatoes (-13%), brassicas (+4%) and sweet peppers -3.7%. Exports of carrots increased by 50%.

11. According to data submitted by producing countries, **olive oil** production in 2010 (marketing year 1 July 2009 to 30 June 2010) is estimated to reach 2.12 million tonnes (1 391 000 tonnes in Spain, 344 000 tonnes in Italy, 320 000 tonnes in Greece, 50 000 tonnes in Portugal, 5 700 tonnes in France, 4 500 tonnes in Cyprus and 600 tonnes in Slovenia). This quantity represents a 16.6% increment compared to 2008/09. During the same period, olive oil prices increased by 2.2% compared to the previous campaign. Regarding trade flows (including inward processing) and in comparison with 2008/09, imports decreased by 13.9% and reached 89 559 tonnes in 2009/10 while exports made up to 435 800 tonnes, 6.7% lower than the previous campaign.

12. As for the EU **beef** sector, the long-term reduction of cattle herds continued in 2010. The number of cows decreased particularly in Italy and Romania. The situation in the dairy market contributed to the drop in the overall cattle herd and cow slaughtering increased. The Blue Tongue disease had a minimal effect on the movement of live animals within the EU, due to comprehensive vaccination programme. According to the more recent forecasts, EU beef and veal production would increase by 2.9% in 2010.

In 2010, EU-27 live cattle trade has largely recovered from the disruption of the Blue Tongue disease. Imports into the EU remained heavily disrupted by ongoing restrictions on Brazilian beef, which limited the volumes of suitable beef for the EU market throughout 2009/2010. Argentina struggled for volumes in 2010 due to the depopulation of its herd during the drought of 2009, meaning that the volumes decreased and will only recover slowly in 2011.

Beef exports have increased due to the low global availability, which led to an increasing demand for relatively high priced EU beef on the global markets. Exports to Turkey increased for both meat and live imports to control high beef prices. China also represented a good market for frozen beef exports.

The overall EU beef and veal consumption in 2010 is expected to remain at the same level of 2009.

Producer prices increased in January and February and fell from March to July, ranging from 327 €/100 kg in February to 302 €/100 kg in July per carcass weight. During the last part of the year, prices increased again and reached its maximum level in December (343 €/100 kg). Also, steer, heifer and cow prices have followed similar patterns over 2010.

13. As far as the EU **pig sector** is concerned, decreasing producer margins characterised the second half of 2010. High cereal prices increased feed costs. The situation became critical as the margins in the previous three years were not high enough to accumulate sufficient capital for most of the producers. The sector is facing a continuing process of concentration to larger production units. Nevertheless the decreasing trend in production had stopped, and the total production increased by 0.8%. The 2010 EU average carcass price at 140.24 Euros/100 kg was 1.98 Euros/100 kg lower than the year before.

A very good export performance compensated a slight decrease in domestic consumption. EU pig meat exports to third countries were at record level and increased by 12.5% in 2010. The good export performance was supported by a relatively weak Euro in spring and by declining domestic prices in autumn. Main export destination was again Russia with nearly one third of all pig meat exports, increasing by 6% in 2010. The EU could in particular increase exports to China (+19%) and recover exports to Japan (+20%). In total the EU exported 2.68 million tonnes of pig meat, which is about 12% of the total production. Pig meat imports into the EU further decreased to 43 000 tonnes in 2010, 16% down compared to 2009. Switzerland and Chile accounted for 60% of all EU imports.

14. **Poultry meat** production grew by 2.3% in 2010. Imports decreased by 9% mainly due to the 12% reduction of imports from Brazil, which accounts for more than 70% of all poultry meat imports. By contrast, imports of cooked chicken from Thailand, the second biggest trader (18% of total imports), increased by 5%. Processed poultry meat and poultry meat preparations continue to gain market share at the expense of poultry carcasses or bone-in cuts, which is also reflected in the increasing unit values of EU poultry meat imports from third countries. EU poultry meat exports grew by 23% in 2010 as compared to 2009, Russia (+8%) Hong Kong (+71%) and Ghana (+43%) experiencing the highest rates of growth. Refunded poultry meat exports (mainly to the Middle East) remained stable.

According to the forecasts, EU poultry meat consumption in 2010 would slightly increase (+0.24%).

15. EU **sheep meat** production would decrease by 4.3% in 2010, mainly resulting from partial decoupling of direct payments, structural change accompanied by production abandonment in Spain and France.

Sheep meat prices decreased in 2010 compared to 2009. The EU average price of light lamb in 2010 was 590 €/100 kg carcass weight (-7.6% as compared to 2009). The average price of heavy lamb amounted to 478 €/100 kg carcass weight (+5.6% as compared to 2009).

Regarding trade, sheep meat imports in 2010 decreased by 12%. The volume of exports considerably increased but just represents 1% of the total production. EU sheep meat consumption would fall by 7%.

16. EU **milk** deliveries followed a mixed pattern in 2010 compared to 2009. In the first quarter deliveries fell by 1.4% driven by a strong contraction in EU-12. The increment in the farm gate milk price from April onwards had a positive impact on milk deliveries over the May-December period. Commodity markets remained fairly firm throughout the year, leading to an estimated increase of 1.3% in milk deliveries in 2010. According to the forecasts, milk deliveries to dairies would reach 135.4 million tonnes. There are, however, large variations among Member States. France, Denmark, Ireland, Germany, the Netherlands and the United Kingdom led the growth in EU-15, while EU-12 deliveries have shrunk (with the exception of the Baltic States and Slovenia).

EU dairy size is estimated at 23.5 million heads in 2010, corresponding to a reduction of 0.8%. The average yield per dairy cow would be 6 260 kg (+1.2%).

With another 1% increase in milk quotas as part of the "soft landing" in view of their abolition in 2015, the rate of quota utilisation declined in the 2009/10 year concluding with a net undershoot of 10 million tonnes (or -7%). Cyprus and the Netherlands have exceeded their respective quotas at an aggregate level of 70 000 tonnes, which are subject to surplus levy payments.

The tight supply situation has kept dairy commodity prices at elevated levels throughout 2010, breaking with the seasonal decline in the EU milk price. While the average EU-15 milk price slightly decreased in the first quarter of 2010, a strong recovery took place in the next months. On the other hand, the average EU-12 milk price steadily grew at the beginning of the year, then eased back over the summer months, and finally picked up again from August onwards.

First estimates for the 2010 EU price depict an increment of 15.5% (30.5€/100kg in 2010 compared to 26.4€/100kg in 2009). The prices decreased from 28.9€/100kg in January to 28€/100kg in March, and from that moment onwards they gradually increased to reach 33€/100kg by the end of the year, the highest price since the end of 2008. The farm-gate milk price has been observed to follow the commodity price trends with a lag of around three months

Cheese production stagnated in 2009 as a direct consequence of the financial crisis and the economic recession through their impact on demand. EU production is estimated at 8.1 million tonnes for 2010, corresponding to an increase of 2%. Demand prospects improved for 2010, driving a growth of 1.8%. EU exports reached 676 300 tonnes (+17%) in 2010, an all time high.

EU **butter** production fell by 2.9% in 2009 and it is estimated an additional 3% drop, or 57 000 tonnes, to reach 1.8 million tonnes in 2010. Continued contraction in butter supply and firm demand has kept butter prices at elevated levels throughout 2010. This has enabled the release of most of the intervention stocks, 1 544 tonnes at the end of 2010 compared with 76 367 in 2009, mainly through the most deprived persons' scheme (51 148 tonnes) but also by open tender (approximately 23 695 tonnes). EU butter exports increased by 6.7% in 2010. EU consumption is expected to decline by a limited 0.2% in 2010.

EU **skimmed milk powder** production is estimated to decrease by 7% in 2010 to 907 000 tonnes, whereas consumption would remain at the same level (644 000 tonnes).

Drinking milk production would fall by 0.7% in 2010, cream by 2%, and fermented milk by 2.5%. Following the 0.2% decline in 2009 explained by the economic crisis, per capita consumption of **fresh dairy products** as a whole would increase by 0.7%

In 2009 the production of **concentrated milk** remained stable, but casein and whey powder fell by 23% and 5% respectively.

Agricultural income

17. The estimates of farm income developments in 2010 provided by Eurostat on the basis of information sent by Member States in March 2010 show an average increase of 12.3% in the income from agricultural activities (measured in real terms, as factor income per annual work unit) compared to 2009 for the EU. The increase in agricultural income results from the reduction in the **agricultural labour input** (-2.2%), and the increase in the **real agricultural income** (+9.9%).⁶

This rise in **real agricultural income** in 2010 is the result of an increase in the **agricultural output value at basic prices** in real value terms (+4.3%) and a slightly rise in the real value of agricultural **intermediate consumption** (+0.8%). The agricultural output value of both crop and animal production improved (+6.3% and +2.4% respectively). As for the increment in intermediate consumption, it is the result of the rise in prices (+1.1%) and the slight decline in volume (-0.4%) The slim increase in **fixed capital consumption** (+0.4%) and the decrease in **taxes paid on production** (-0.6%) led to higher production costs. Finally, the 3.8% increase in **other subsidies** contributed to raise the level of revenues of the agricultural sector in 2010.

Agricultural income per worker in 2010 was below the 2009 levels in six Member States. The largest decreases were observed in Romania and United Kingdom (-8.2%) and Greece (-4.3%) while the largest increases were recorded in Denmark (+54.8%), Estonia (+48.8%) and Ireland (+39.1%).

18. The **agricultural labour force** input fell by 2.2% in 2010 as compared to 2009 for the whole EU. This moderate reduction constitutes a slow down compared to the early 2000s. The highest reduction in the agricultural labour input was recorded in Bulgaria (-10%), Poland (-9%), and Latvia (-6%), whereas increasing in Romania (+4%) and in the United Kingdom (+1.6%).⁷

Statistical and economic

information

Codification of the tables

The choices made for the revision of the tables are reflected in a new codification, established on the basis of the same principle for all the tables. Each of them has been given a code with four digits, the first of which designates the subject to which the table refers (see table of contents following this foreword):

1. Conversion rates,
2. Basic data,
3. Economic tables,
4. Tables on agricultural markets.

The second and third digits refer to specific aspects of the field concerned and their significance varies from one field to another.

For the tables concerning the agricultural markets (Tables 4) a standard codification for all the products has been used for these two digits:

- (i) the second digit of the code designates the agricultural product concerned,
- (ii) the third digit refers to the nature of the statistic presented:
 - .–.0.– livestock numbers,
 - .–.1.– area, yields and production (crop products) or slaughterings and production (livestock products),
 - .–.2.– world production,
 - .–.3.– external trade,
 - .–.4.– supply balance,
 - .–.5.– prices (producer prices, market prices, consumer prices),
 - .–.6.– market management,
 - .–.9.– various.

For certain sectors, all the possibilities are used (e.g. cereals). For other products only some are used (e.g. potatoes), either because the data needed are not available or because the features of these sectors in the EU do not justify such an exhaustive presentation in a general document such as this, which, for considerations of space, can provide only the most important information.

Currency units used in this report

1. European Monetary System (EMS) – ecu

Entry into force of the EMS on 13 March 1979 (Regulations (EEC) No 3180/78 and No 3181/78 of 18 December 1978) brought in the ecu as sole unit of account for the Community. Its definition is identical to that of its predecessor the EUA except for a review clause allowing changes in its composition. The ecu is a currency unit of the 'asket' type made up of specified amounts of currencies of the EMS member countries determined mainly on the basis of the economic size of each. It is defined by Council Regulation (EC) No 3320/94. The central rates used in this system are rates set by the central banks around which the market rates of the EMS currencies may fluctuate within spot margins.

2. The ecu in the common agricultural policy

- Before 9 April 1979, the unit of account used in the agricultural sector was the u.a. defined by Regulation (EEC) No 129/62 and the representative rates (green rates) were fixed by the Council.
- On 9 April, the ecu began to be used in the CAP (Regulation (EEC) No 652/79) and is still being used (Regulation (EEC) No 3813/92).
- On the changeover from the u.a. to the ecu on 9 April 1979 common agricultural prices and amounts expressed in u.a. and converted into ecus were adjusted by the coefficient 1,208953. The green rates were however adjusted by the reciprocal coefficient 1/1,208953, leaving national price levels unchanged. For example, 100 u.a. \square 3,40 = DEM 340 because ECU 121 \square 2,81 = DEM 340.
- For the recording of world market prices, offer prices are converted at the representative market rate, which is an average of the rates recorded on the market. The common agricultural prices and amounts are set in ecus and converted into national currency at the agricultural conversion rates.
- Since 1 January 1993 these have been adjusted by the Commission whenever their divergence from representative market rates exceeds specified margins.
- Between the beginning of the 1984/85 marketing year and 31 January 1995 all conversion rates used for agriculture were multiplied by a correcting factor under the 'switchover' mechanism the effect of which was to express the common agricultural prices and amounts in a unit of account derived from the ecu, the 'green ecu'. This correcting factor, originally 1,033651, was increased in line with the revaluation of the EMS currency appreciating most among those observing all the rules. On abolition it was 1,207509. As on the changeover from the u.a. to the ecu in 1979 common agricultural prices and amounts were increased in ecus by a factor of 1,207509 on 1 February 1995 and all conversion rates used in agriculture reduced by a factor of 1/1,207509 so making the operation neutral in national currency terms.

3. Introduction of the euro

On 1 January 1999, the currencies of the 11 Member States adopting the single currency were replaced by the euro but, during the transitional period until the end of 2001, units of national currency will continue to be used as subdivision of the euro. Series in ecus have been left unchanged as far as the past is concerned but are expressed in euros from 1 January 1999. Series in euro are the statistical continuation of series in ecus.

Fixed conversion rates of the euro

The conversion rates irrevocably fixed between the euro and the currencies of the Member States adopting the euro are:

EUR 1	=	40,3399 Belgian francs	
	=	1,95583 German marks	
	=	166,386 Spanish pesetas	
	=	6,55957 French francs	
	=	0,787564 Irish pounds	
	=	1936,27 Italian lira	
	=	40,3399 Luxembourg francs	
	=	2,20371 Dutch guilders	
	=	13,7603 Austrian schillings	
	=	200,482 Portuguese escudos	
	=	5,94573 Finnish marks	
	=	340,750 Greek drachmas	(On 1 st January 2001)
	=	239,640 Slovenian Tolar	(On 1 st January 2007)
	=	0,58274 Cyprus pound	(On 1 st January 2008)
	=	0,429300 Maltese lira	(On 1 st January 2008)
	=	30,1260 Slovak koruna	(On 1 st January 2009)
	=	15,6466 Estonian kroon	(On 1 st January 2011)

According to context, different currency units have been used in this publication. The statistical series in terms of value are also calculated:

- at constant exchange rates, i.e. at the exchange rates obtaining during a specific period (e.g. 1980). These rates are used to eliminate the influences of exchange-rate changes on a time series;
- at current exchange rates (notably for external trade).

To assist the user of this publication wishing to convert units of account into national currencies and conversely, Table 1.0.1, gives the rates to be used. Fuller information is given in specialized publications of the European Commission.

Observations on statistical method

A – Statistics on external trade – explanatory note

Council Regulation (EEC) No 1736/75, of 24 June 1975, on the external trade statistics of the Community and statistics of trade between Member States, includes provisions to ensure that data are not recorded twice:

- (i) when goods from a non-member country are first brought into a Member State, that Member State must record the import according to the origin of the goods;
- (ii) if the goods are then subject to a legal operation (for example clearance for consumption) and subsequently imported into another Member State, the latter must record the goods according to the Member State from which they were received.

However, to satisfy national requirements, the Member States may, if they wish, operate in parallel with the above system the arrangements they applied previously; this means that a Member State's national data may be substantially different from the data supplied by Community sources.

For the calculation of the intra-Community trade of the Community as a whole in the supply balances, there were two possibilities: the sum of the Member States' intra-Community exports (calculation on the basis of goods leaving) or the sum of the Member States' intra-Community imports (calculation on the basis of entries). Eurostat has chosen the second alternative. Also, exports to non-member countries in the supply balances of the Community as a whole are calculated by deducting intra-Community trade from Member States' total exports.

As a result, there may be discrepancies between the external trade data given in the supply balances and those given in the specific external trade tables.

Users must also allow for a break in the series of Community external trade statistics in 1977, the date on which Regulation (EEC) No 1736/75 entered into force.

A last point is that, while the data relating to the external trade of the Community of Twelve from reference year 1985 use the same source for all the Member States (Community statistics), those which refer to a previous period may have been obtained from the Community statistics for the Community of Ten and from other sources for the new Member States.

B – Definition of Agricultural Products for External Trade Statistics

Agricultural products are defined as follows:

Chapters 1 – 24 of the Combined Nomenclature excluding fish and fish products:

Agricultural products are defined as follows:

Chapters 1 – 24 of the Combined Nomenclature excluding fish and fish products:

- chapter 03 fish and crustaceans, molluscs and other aquatic invertebrates
- 0511 91 90 products of fish and crustaceans,
- 1604 prepared fish; caviar, and caviar substitutes prepared from fish eggs
- 1605 prepared crustaceans, molluscs, and other aquatic invertebrates
- 1902 20 10 stuffed pasta, containing >20% fish, crustaceans,
- 2301 20 flours, meals and pellets of fish or crustaceans,

adding the following products outside the Chapters 1 to 24. (“Other products covered by the Uruguay Round Agreement”):

- 2905 43 mannitol
- 2905 44 D-glucitol (sorbitol)
- 2905 45 glycerol
- 3301 essential oils
- ex 3302 10 preps containing flavouring agents for beverages
- 3301 to 3305 albuminoidal substances, modified starches, glues
- 3809 10 finishing agents
- 3823 11 stearic acid
- 3823 12 oleic acid
- 3823 13 tall oil fatty acids
- 3823 19 other
- 3823 70 industrial fatty acids
- 3824 60 sorbitol n.e.p.
- 4101 to 4103 hides and skins
- 4301 raw furskins
- 5001 to 5003 raw silk and silk waste

- 5101 to 5103 wool and animal hair
- 5201 to 5203 raw cotton, waste and carded or combed cotton
- 5301 raw flax
- 5302 raw hemp

C - Economic Accounts for Agriculture (EAA): implementation of a new methodology

1. The Economic Accounts for Agriculture are drawn up according to a new methodology, which was published in the "Manual on Economic Accounts for Agriculture and Forestry EAA/EAF (Rev.1.1)" (EUROSTAT, 2000, ISBN 92-828-2996-0).
2. The introduction of the new methodology has resulted in a number of changes in the data, as a result both of the change in the methodology itself and of the use of new data sources. Some of the changes have had a direct impact on value added and thus on the measurement of agricultural incomes, whereas others have altered only the level of certain aggregates without, however, affecting value added and the measures of agricultural income.
3. The following methodological revisions affecting the measures of agricultural income can be noted:
 - a. The recording of secondary, non-agricultural activities of agricultural units where these activities cannot be separated from the main agricultural activity. This mainly concerns the processing of agricultural products and agri-tourism.
 - b. The exclusion of the output of units producing solely for own-final consumption (e.g. kitchen gardens).
 - c. The exclusion of upstream and downstream production activity involved in seed multiplication.
 - d. The recording of the output of wine and olive oil (from grapes and olives produced on the holding).
 - e. The recording of various operations according to the principle of rights and obligations, meaning that the amounts are recorded during the year in which the claim or obligation, in the economic sense of the term, is created, transformed or removed. For example, the value of subsidies recorded in the accounts for year n corresponds to aid granted in year n even if all or part of the payment takes place in year n+1 or at a later date.
 - f. The reclassification of certain agricultural aid which used to be classed as "operating subsidies" and which will now be recorded as "capital transfers". The value of this aid will no longer enter into the calculation of income.
4. Revisions which have had no impact on the measurement of income (all things being equal) concern:
 - a. The valuation of output at basic prices. The basic price is defined as the price received by the producer, after deduction of all taxes on products but including all subsidies on products.
 - b. The abandonment of the concept of national farm: besides production sold, stocked or for own-consumption by agricultural units, the production of the agricultural industry will now include a part of output used as intermediate consumption by the same unit (for example, grain or forage used in animal feed).

D – Annual rate of change (% TAV)

1. The annual rate of change (symbol: % TAV) is used throughout this report for the calculation over periods of time of changes in a given aggregate. It measures the compound annual average increase or reduction, as a percentage, of the variable concerned from a base year (T in the following equations).
2. The annual rate of change is calculated as follows:

$$100 \times \text{Anti-Log} \left[\text{Log} \frac{(\text{statistic for year } T + N)}{(\text{statistic for year } T)} : N \right] - 100 = \% \text{ TAV}$$

Where the annual rate of change is calculated over only two successive years, N = 1 and the formula becomes:

$$100 \times \left[\frac{\text{statistic for year } T + 1}{\text{statistic for year } T} \right] - 100 = \% \text{ TAV}$$

3. The following series illustrates the use of this formula:

	1990	1991 ...	1995	1996
Series =	100 000	112 000	161 051	177 156
	1991	1995	1996	
	-----	-----	-----	
	1990	1990	1995	
% TAV	12,0	10,0	10,0	

Remarks

1. From 1991 data for the former German Democratic Republic are included in the figures for the Federal Republic of Germany and accordingly in the figures for the EU as a whole.
2. Present report was based on data available on 28/01/2011.
3. From 1 January 1997 statistics for France and Spain have been amended to include the French overseas departments (Guadeloupe, French Guiana, Martinique and Réunion) and the Canary Islands respectively.
4. Data on the Candidate Countries are gradually included in our tables. These data are mostly based on the figures provided by Eurostat and the Directorate-General for Agriculture and Rural Development. The process of harmonising the national statistics in the candidate countries is under way. The figures provided are therefore not fully comparable with the figures for the European Union and are expected to be revised frequently. We are publishing them for information only. The Commission cannot be held responsible for how the figures given for these countries are used or interpreted.

⁽¹⁾ See notes on methods (C).⁽²⁾ Productivity of intermediate consumption is measured by the ratio between the index of the output volume in the agricultural activities sector and the index of intermediate consumption volume.⁽³⁾ The 'terms of trade' in agriculture are measured by the ratio between the index of nominal output prices in the agricultural industry and the index of nominal intermediate consumption prices.

(¹) See methodological notes (C).

(²) Figures 2006.

(³) Figures 2007

(⁴) Factor income corresponds to the net value added at factor cost of agriculture.

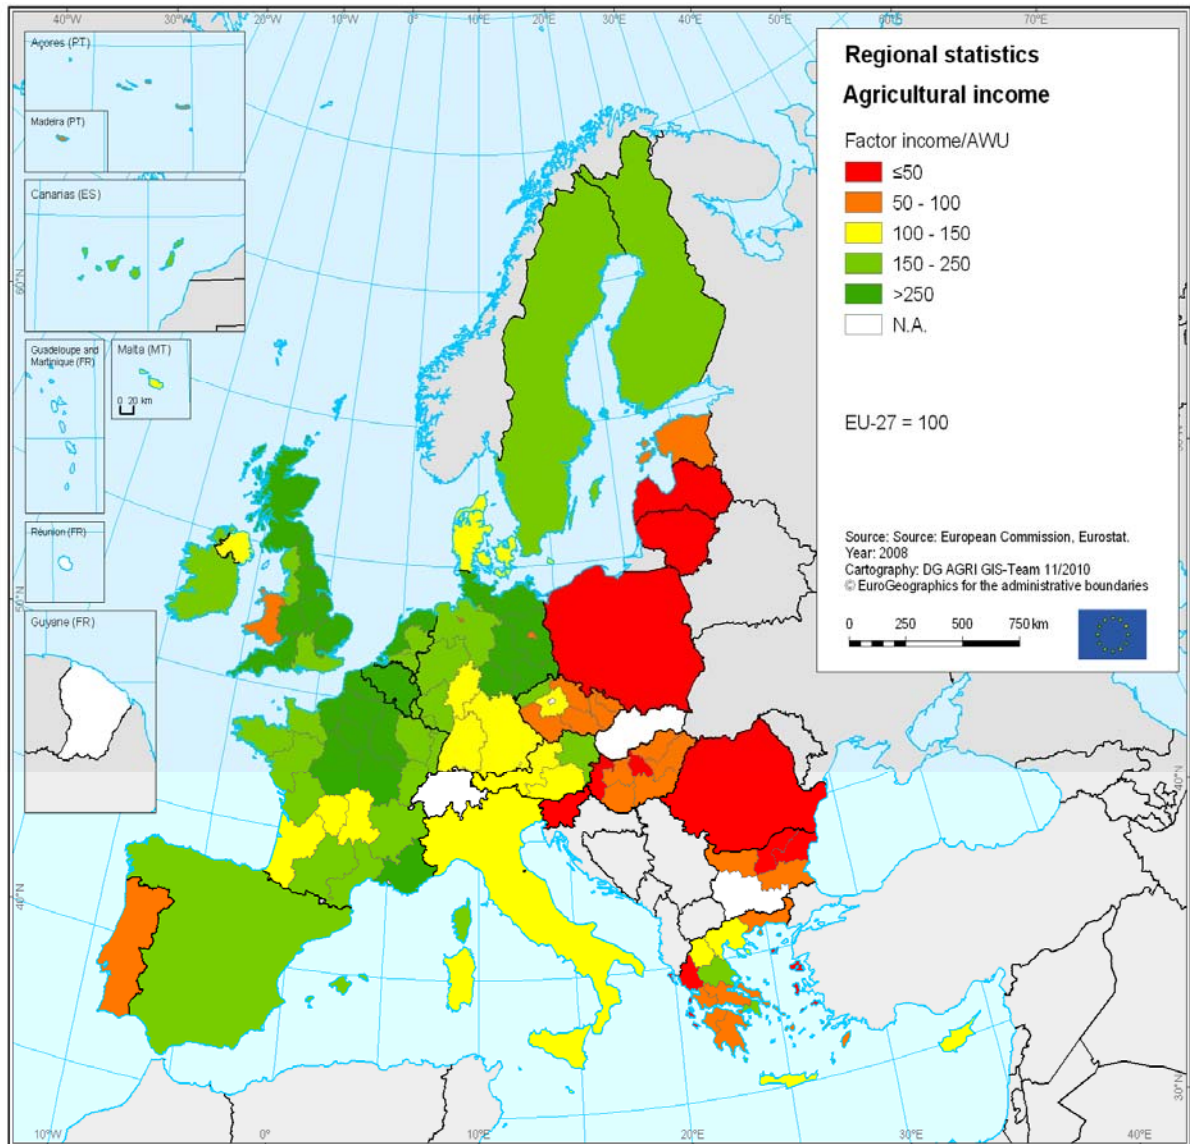

(⁵) Besides the output of agricultural goods and services, the output in agricultural activities sector comprises also the output of certain non-agricultural secondary activities.

(⁶) Other production costs = Fixed capital consumption + compensation of employees + rents and other real estate rental charges to be paid + net interest payments.

(⁷) Berlin, Hamburg and Bremen included.

(⁸) Different dates, depending on the Member State, used to calculate EU-27, EU-25 and EU-15 figures.

3.2.1 The farm accountancy data network – Explanatory note

The farm accountancy data network (FADN) collects accountancy data from a sample of agricultural holdings in the Community. The FADN field of survey relates to 'commercial' farms, i.e. farms which market the bulk of their production and which exceed a minimum level of economic activity defined in terms of economic size (see the definition of the European size unit below).

In the most recent accounting years there were more than 75 000 holdings (Community of 25 Member States) representative of commercial farms in the FADN sample. From **the** accounting year **2007** onwards this number **increased** to **more than** 80 000 holdings due to the further enlargement.

The terms used in the tables relate to the following definitions.

BASIC FADN TERMS

Accounting year

The accounting year is a 12-month period starting between 1 January and 1 July, the exact date varying from one Member State to another.

Economic size and European size unit (ESU)

The European size unit (ESU) is a unit of measurement of the economic size of the agricultural holding. A farm has an economic size of 1 ESU if its total standard gross margin is EURO 1 200 of SGM. The standard gross margin for each enterprise corresponds to the average value, over a three-year period and in a given region, of production minus certain variable costs (Decision 85/377/EEC).

Type of farming (TF)

The type of farming (TF) of a holding is determined by the relative share in the holding's total standard gross margin of each of the enterprises of the holding. A description is given in Table 3.2.2. The results given in the following tables relate to eight groups aggregated from the 17 principal types of farming in the Community farm typology (Decision 85/377/EEC).

Weighting and number of holdings represented

The holdings in the FADN sample are selected in such a way as to be representative, for each division, of the holdings belonging to each cell formed by the combination of TF and economic size class. The populations to be represented are derived from the Community farm structure surveys.

3.2.1S1

The results presented are weighted averages. Each holding in the FADN sample is attributed a weight proportional to the number of holdings belonging to the same type of farming and the same economic size class in the division.

The number of holdings represented is the sum of the weights of the holdings in the sample. Some cells (division – TF – economic size class) may have no holdings in the sample, either because very high selection rates would be necessary or because there are technical difficulties in selecting holdings.

STRUCTURAL DATA

UAA: utilized agricultural area (in hectares).

Annual work unit (AWU and FWU)

This represents the agricultural work done by one full-time worker in one year. Part-time and seasonal work are fractions of an AWU.

An FWU is an AWU of unpaid (family) labour.

AVERAGE RESULTS PER HOLDING

Total output

This is the value of total production during the accounting year. Included are off-farm sales, home-grown feed and seed, farmhouse consumption and benefits in kind, as well as changes in the value of livestock and stocks of crop products.

Intermediate consumption

This corresponds to all the fixed and variable costs that are necessary for agricultural activity and includes home-grown feed and seed but excludes financial charges, labour costs, rent and depreciation.

Depreciation

This is the annual provision designed to replace the fixed components of working capital at the end of their life (buildings, machinery, equipment, etc.). It is calculated on the basis of replacement value.

3.2.1S2

Farm net value-added (FNVA)

Total output less intermediate consumption and depreciation, adjusted to take account of taxes, grants and subsidies linked to production.

This is an indicator of the economic performance of the holding. It remunerates family and hired labour, own and borrowed capital and the management of the holding.

Family farm income (FFI)

This corresponds to farm net value-added, less other real costs in the accounting year: interest and financial charges, wages and social security costs paid and rent.

This indicator represents the return on the labour of farmer and family, and on owned capital.

3.2.2 The eight types of farming: shares of each enterprise in total output

Description of the types of farming in Table 3.2.3

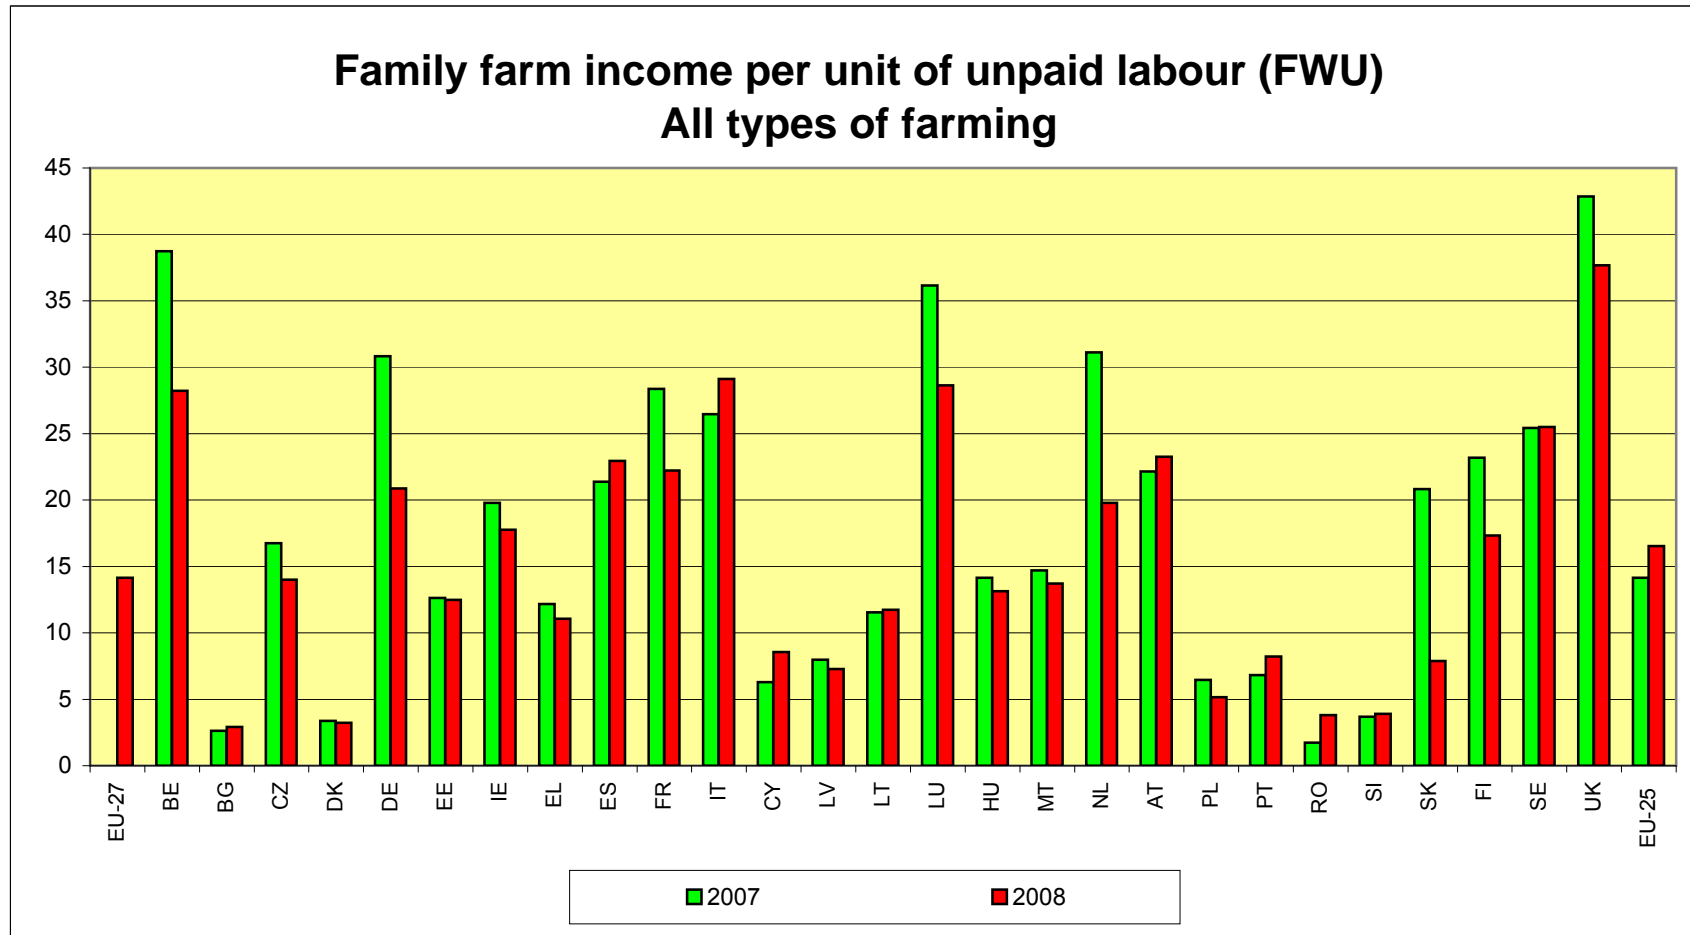

Type of farming (principal types) EU-27	TF codes	Enterprise output as % of total output

⁽¹⁾ New Member States (Bulgaria, Romania) entered FADN from 2007.

⁽²⁾ Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

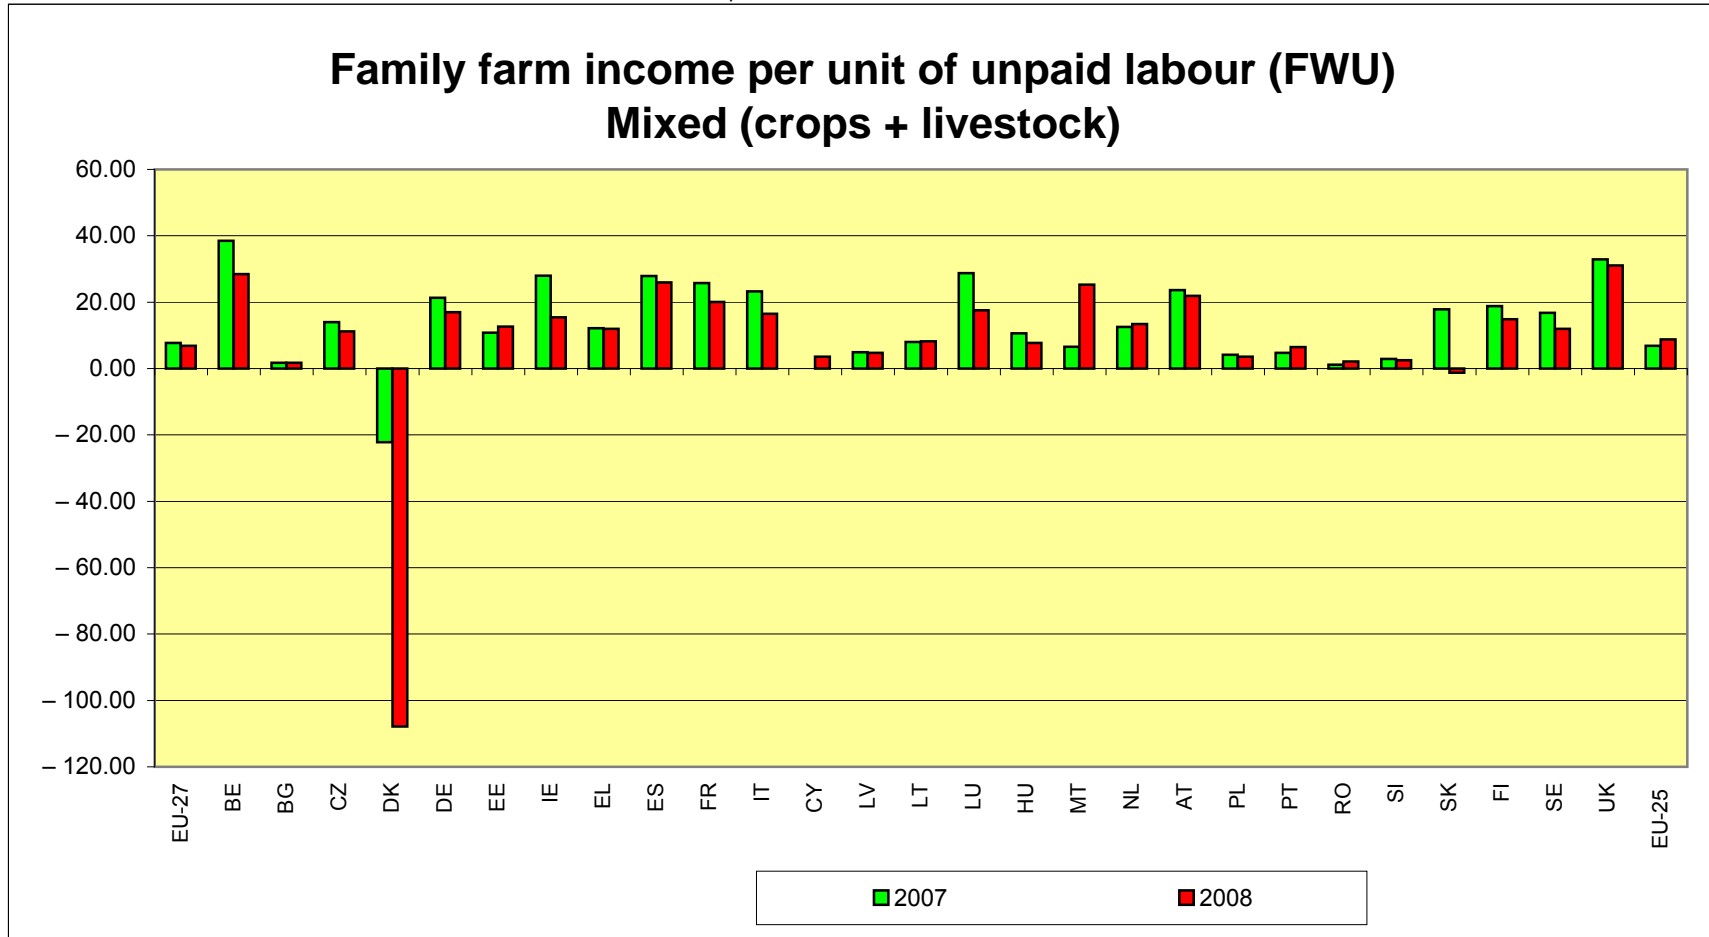

⁽³⁾ Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

⁽⁴⁾ Provisional results for 2008.

⁽⁵⁾ The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, Agriculture and Rural Development DG, FADN (population : 2007 structure survey; classification : standard gross margins « 2004 »).

Graph 3.2.3s8 col 20-21

Note: Average results per holding in (1 000 EUR) (current)

3.2.4 Results by economic size of holding (2007 and 2008) ^{(1) (2)}

Economic size of holding in European size units (ESU)		Number of holdings in the FADN field of observation ⁽⁵⁾		Area (ha UAA)		Average results per holding in (1 000 EUR) (current)											
						Total output		Intermediate consumption		Depreciation		Farm net value-added		Farm net value-added per AWU		Family farm income per unit of unpaid labour ⁽³⁾

⁽¹⁾ New Member States (Bulgaria, Romania) entered FADN from 2007.

⁽²⁾ Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

⁽³⁾ Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

⁽⁴⁾ Provisional results for 2008.

⁽⁵⁾ The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, Agriculture and Rural Development DG, FADN (population : 2007 structure survey; classification : standard gross margins « 2004»).

⁽¹⁾ The EU index of farm input prices is a Laspeyres index, whereas the deflated price series (see Table 3.1.8) is a Paasche index. The discrepancies between the figures in the two tables are mainly a matter of the differing index formulae.

⁽²⁾ Indices of the prices of goods and services of current agricultural consumption.

⁽³⁾ Annual indices include fruit and vegetables.

⁽⁴⁾ Source: SCEES.

Source: European Commission, Eurostat ('Purchase price of inputs' and 'Producer prices for agricultural products' are harmonized indices, whereas 'Farm wages' remain heterogeneous national indices).

**3.3.7 Price indices for feedingstuffs, fertilizers and soil improvement, fuels and lubricants,
and investments in machinery (excluding VAT)**

3.5.1.1 Employment in agriculture: statistical sources and applications

There are several sources of Community statistics enabling employment in agriculture to be measured from various viewpoints, including employment statistics proper (labour force sample survey) and agricultural statistics (structural surveys of agricultural holdings). Methods and concepts vary from one source to another, and the purpose of this introduction is to help the user to choose, among the statistics given in the subsequent tables, those which will provide him with the information he seeks.

EMPLOYMENT IN AGRICULTURE AND IN THE OTHER SECTORS

One approach to the problem of employment in agriculture consists in considering it as a part of overall employment and comparing it with employment in the other economic sectors. The relevant information comes from labour market statistics; in these figures, the persons employed are assigned to that economic sector in which they mainly work, and the characteristics of employment are measured according to identical concepts from one sector to another. Changes over time in numbers employed in the various sectors, and, in particular, in agriculture, as well as detailed information on the structure of employment in agriculture compared with that of other sectors (breakdown by sex, by occupational status, by working time, or by age) are given by the labour force survey, which provides a 'photograph' of employment in any given year (Tables 3.1.5.2 to 3.5.1.4).

EMPLOYMENT IN AGRICULTURAL HOLDINGS

Only the statistics which have just been presented allow a proper comparison of employment in agriculture with employment in the other sectors. However, they do not cover all persons employed in agriculture: an important feature of farming is that so many farmers and farm workers work only part-time and often also have other jobs. In the employment statistics, such persons are not classified as working in agriculture.

A full measure of employment in agriculture is provided by the surveys on the structure of agricultural holdings; it should be noted that the information from this source enables employment in agriculture to be analysed as such but that, as it is established according to specific definitions, it cannot be compared with employment data for other sectors.

These surveys cover all persons employed on holdings, whether farming is their main activity or not; they also record working hours and any other remunerated work outside farming. They thus enable employment on agricultural holdings to be measured fully, and part-time and combined other employment to be analysed. By conversion of the numbers of persons employed into full-time equivalent workers ('annual work units' – AWU), the data on working hours give information on the actual volume of labour devoted to farming, the only valid measure of the labour contribution to agriculture, in view of the scale of part-time working (Tables 3.5.1.5 and 3.5.1.6).

(¹) Sole holders who are also managers. The holder is the person for whom and on whose behalf the holding is farmed; the manager is the person responsible for the current, day-to-day management of the holding. In EU-25 in 2003, 93 % of agricultural holdings were farmed by holders who are also managers.

(²) Holders working their farms for respectively 100 %, 50 to < 100 %, and less than 50 % of the annual working hours of a full-time worker.

Source: European Commission, Eurostat (Surveys of the structure of agricultural holdings).

3.6.1.1 Overview of the implementation of direct payments under the CAP in Member States (Reg (EC) N° 73/2009)(¹)

(Version June 2010)

MS	Start SPS	Regions	Model SPS / SAPS(²)	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 - 72
Belgique/ Belgie	2005	Zone Nord: Flanders + Brussels	SPS historical	100 €	Suckler cow premium: 100% Slaughter premium calves: 100% Protein crops, Flax for Fibre	For a better quality—all sectors 68(1)(a)(ii)
		Zone Sud: Wallonia			Suckler cow premium: 100% Protein crops, Flax for Fibre	Grassland premium – breeding 68(1)(b)
Bulgaria	-	-	SAPS	0,5 ha 100 €	F&V: Transitional soft fruit payments: 100%	In the dairy sector 68(1)(b)
Česká republika	-	-	SAPS	1 ha	Separate sugar payments: 100% F&V: Separate payment for tomatoes intended for processing: 100%	Aid for dairy farmers 68(1)(b)
Danmark	2005	one region	SPS dynamic hybrid	2 ha 300 € Sp	Special male bovine premium: 75% Sheep and goat premium: 50% Starch Potato, Dried fodder, Flax for Fibre	Agri-environment Measures 68(1)(a)(v) Perennial Energy Crops 68(1)(a)(i)
Deutschland	2005	Bundesländer (Berlin included in Brandenburg, Bremen in Lower Saxony and Hamburg in Schleswig-Holstein)	SPS dynamic hybrid moving to a flat rate	1 ha	Protein Crops, Nuts, Starch Potato, Dried fodder, Flax for Fibre	Grassland premium in dairy sector 68(1)(b)
Eesti	-	-	SAPS	1 ha	-	In the dairy sector 68(1)(b)
Éire/Ireland	2005	-	SPS historical	100 €	Protein Crops, Dried Fodder	Grassland Sheep Scheme and Grassland Dairy Efficiency 68(1)(b) Conservation in the Burren 68(1)(a)(i)
Elláda	2006	-	SPS historical	200 €	F&V: - Until end 2010: 30% of the envelope for tomatoes intended for processing - Cotton, Sugar, Dried fodder, - Small Aegan Islands 100 %	Improvement of quality of olive oil, durum wheat 68(1)(a)(ii) LFA producers in meat sectors (beef, sheep and goat) 68(1)(b) Restructuring programmes in LFA Mountainous areas 68(1)(c)

3.6.1.1S1

MS	Start SPS	Regions	Model SPS / SAPS ⁽²⁾	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 - 72
España	2006	-	SPS historical	100 €	<p>Suckler cow premium: 100%</p> <p>Slaughter premium calves: 100%</p> <p>Slaughter premium bovine adults: 40%</p> <p>Seeds, Protein Crops, Rice, Nuts, Cotton 35%, Sugar, Dried fodder, Flax for Fibre, Starch Potato 60%</p> <p>Outermost regions: 100%</p> <p>F&V:</p> <p>- Until end 2010: 50% of the envelope for tomatoes intended for processing</p>	<p>Improving quality of legumes, tobacco sheep and goat farmers and milk products 68(1)(a)(ii)</p> <p>National programme crop rotation 68(1)(a)(v)</p> <p>Aid to sheep and goat producers and milk producers in LFA 68(1)(b)</p> <p>Ex article 69 measures (beef ,cotton, sugar, milk) 72(3)</p>
France	2006	-	SPS historical	100 €	<p>Suckler cow premium 75%</p> <p>Seeds (some species), Protein Crops, Rice, Nuts</p> <p>Starch Potato, Dried fodder, Flax for Fibre</p> <p>Outermost regions 100%</p> <p>F&V: - Until end 2011: 50% for tomatoes intended for processing</p> <p>- Until end 2010: 98% of national envelope for orchards producing prunes, peaches, and pears intended for processing</p> <p>- From 2011 until end 2012: 75% of national envelope for orchards producing prunes, peaches, and pears intended for processing</p>	<p>Additional aid for protein crops 68(1)(a)(i)</p> <p>Aid for quality of durum wheat 68(1)(a)(ii)</p> <p>To maintain organic farming 68(1)(a)(v)</p> <p>Diversification of crop rotation 68(1)(a)(v)</p> <p>Aid for calves from suckling cows and for organic labelled calves; aid for sheep and goat producers; aid for milk producers in mountain areas 68(1)(b)</p> <p>Crop harvest insurance 68(1)(d)</p>

3.6.1.1S2

MS	Start SPS	Regions	Model SPS / SAPS(²)	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 -72
Italia	2005	-	SPS historical	100 €	Seeds, Protein Crops, Rice, Nuts, Sugar Dried Fodder, Flax for Fibre F&V: - Until end 2010: 50% for tomatoes intended for processing - Until end 2010: 100% for pears, peaches and prunes intended for processing. - From 2011 until end 2012: 75% of envelope for prunes	Improvement of quality (beef and veal; sheep and goat meat; olive oil; dairy products; tobacco; sugar; floricultural products) 68(1)(a)(ii) Crops rotation 68(1)(a)(v) Insurance payments for harvests, animals and plants 68(1)(d)
Kýpros	-	-	SAPS	0,3 ha	F&V: - Until end 2010: 100% of national envelope for citrus fruits - Until end 2012: 75% of national envelope for citrus fruits	-
Latvija	-	-	SAPS	1 ha	Separate sugar payments: 75% F&V: Transitional soft fruit payment: 100%	In the dairy sector 68(1)(b)
Lietuva	-	-	SAPS	1 ha	Separate sugar payments: 100% F&V: Transitional soft fruit payment: 100%	-
Luxemburg	2005	one region	SPS static hybrid	100 €	none	-
Magyarország	-	-	SAPS	1 ha 0,3 ha for orchards and vineyards	Separate sugar payments: 100% F&V: - Separate F&V payments (tomatoes and other fruits): 100% - Transitional soft fruit payment: 100%	In the dairy sector 68(1)(b) For tobacco and fresh fruit and vegetables growing areas subject to restructuring and development programmes 68(1)(c)
Malta	2007	one region	SPS regional	0,1 ha 100 € Sp	none	-
Nederland	2006	-	SPS historical	500 €	Seeds for fibre flax Starch Potato, Dried Fodder, Flax for Fibre	For transport over water 68(1)(a)(i) Animal welfare 68(1)(a)(iv) Electronic I&R for sheep 68(1)(b) Weather insurance 68(1)(d)

3.6.1.1S3

MS	Start SPS	Regions	Model SPS / SAPS ⁽²⁾	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 - 72
Österreich	2005	-	SPS historical	100 €	Suckler cow premium: 100% Nuts, Starch Potato, Dried Fodder, Flax for Fibre	Dairy cow premium 68(1)(b)
Polska	-	-	SAPS	1 ha	Separate sugar payments: 100% F&V: - Separate F&V payment for tomatoes: 100% - Transitional soft fruit payment: 100%	For cultivating pulses and herbage legumes 68(1)(a)(i) For keeping cows in South-eastern Poland and sheep in Southern Poland 68(1)(b)
Portugal	2005	-	SPS historical	0,3 ha	Suckler cow premium: 100% Slaughter premium calves: 100% Slaughter premium bovine adults: 40% Sheep and goat premium: 50% Seeds: 100% Protein Crops, Rice, Nuts, Cotton, Sugar, Dried Fodder Outermost regions: 100% F&V: Until end 2011: 50% of envelope for tomatoes intended for processing	Extensive handling systems for autochthonous races (beef, sheep, goats) 68(1)(a)(i) Quality improvement of agricultural products (crops and animals) 68(1)(a)(ii) Agri-environmental measures for protection of olive national patrimony and support to extensive pasturing 68(1)(a)(v) To economic vulnerable types of agriculture in milk and sheep sectors 68(1)(b)
România		-	SAPS	1 ha	Separate sugar payments: 100% F&V: Until end 2011: 50% of envelope for tomatoes intended for processing	For improving quality in the organic farming sector 68(1)(a)(ii) To the milk sector in LFA 68(1)(b)
Slovenija	2007	one region	SPS regional	0,3 ha / 100 € Sp	Special male bovine premium: 65% Protein Crops, Nuts	For extensive rearing of female bovine animals and dairy payment for farmers in mountain areas and on steep hills 68(1)(b) Preserving animal rearing on farms with permanent pastures 68(1)(c)
Slovensko	-	-	SAPS	1 ha	Separate sugar payments: 50% F&V: - Separate F&V payment: 67% (Art.127of Reg. 73/2009) Separate transitional F&V payment: 33% of envelope for tomatoes intended for processing (Art. 128 of Reg. 73/2009)	In the dairy sector 68(1)(b)

3.6.1.1S4

MS	Start SPS	Regions	Model SPS / SAPS ⁽²⁾	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Suppor under Articles 68 - 72
Suomi/Finland	2006	three regions (based on reference yield)	SPS dynamic hybrid moving to a flat rate	200 €	Sheep and goat premium: 50% Seeds (timothy seed), protein Crops, Starch Potato, Dried Fodder; Flax for Fibre	Supporting beef and veal production; dairy cow premium 68(1)(b) Ex-Art 69 measures (arable crops) 72(3)
Sverige	2005	five regions (based on reference yield)	SPS static hybrid	4 ha 100 € Sp	Special male bovine premium 74.55% Starch Potato, Dried Fodder	Ex-Art 69 measures: Improving quality and marketing (all sectors) 72(3)
United Kingdom	2005	England normal	SPS dynamic hybrid moving to a flat rate	1 ha 200 € Sp	Protein Crops, Nuts Dried Fodder, Flax for Fibre	-
		England - moorland	SPS dynamic hybrid moving to a flat rate	1 ha 200 € Sp	Protein Crops, Nuts Dried Fodder, Flax for Fibre	-
		England - SDA minus moorland	SPS dynamic hybrid moving to a flat rate	1 ha 200 € Sp	Protein Crops, Nuts Dried Fodder, Flax for Fibre	-
		Scotland	SPS historical	3 ha 200 € Sp	Dried Fodder, Flax for Fibre	-
		Wales	SPS historical	1 ha 200 € Sp	Dried Fodder, Flax for Fibre	-
		Northern Ireland	SPS static hybrid	100 €	Dried Fodder, Flax for Fibre	-

⁽¹⁾ For the statutory dates and amounts of decoupling please see Annex XI and XII of Regulation (EC) No 73/2009

⁽²⁾ Hybrid model consist of elements from the regional and the historical model

- NB:
- SPS = Single payment scheme
 - SAPS = Single area payment scheme
 - F&V = Fruit and Vegetables
 - Sp = Special entitlements

⁽¹⁾ Regulation (EC) No 1973/2004 - Annex XXI

The agricultural area under the single area payment scheme set out in Annex XXI of Commission Regulation (EC) No 1973/2004 is a regulatory area used to calculate the national aid amount per hectare. The total number of eligible area declared by the farmer in a given calendar year may vary from that area.

⁽²⁾ Provisional figures supplied by the Member States and subject to verification and control by the Commission.

⁽¹⁾ Area planted with sugarbeet exclusive of area planted for distillery supply.

⁽²⁾ In terms of white-sugar value.

⁽³⁾ Including production of molasses.

⁽⁴⁾ Area and yield, metropolitan France only; for production, including the French overseas departments.

⁽⁵⁾ Including production of sugar from sugar cane.

- via EU Bookshop (<http://bookshop.europa.eu>);
- at the European Commission's Representations or the Delegations of the European Union. You can obtain their contact details by linking <http://ec.europa.eu> or by sending a fax to +352 2929-42758.

Publications for sale:

- via EU Bookshop (<http://bookshop.europa.eu>);

Priced subscriptions (Official Journal of the EU, Legal cases of the Court of Justice as well as certain periodicals edited by the European Commission) can be ordered from one of our sales agents.

- You can obtain their contact details by linking <http://bookshop.europa.eu>, or by sending a fax to +352 2929-42758.

Each year the Commission Directorate- General for Agriculture and Rural Development publishes the "Agriculture in the European Union - Statistical and economic information". A large part of the report is devoted to statistical information on Community agriculture. This is drawn up on the basis of information from Eurostat and data collected by the Directorate-General for Agriculture and Rural Development.

The statistical information presented here covers a wide range of subjects: the economic situation in agriculture, structures, trade, markets, financial aspects and rural development. An introductory chapter gives an overview of the 2010 agricultural year. It includes a wide range of statistical information on agriculture in the 27 Member States and in the accession Countries for EU membership.
