In collaboration with the Member States, the Commission of the European Communities publishes a survey of the duties and taxes in force in the Member States of the EC.

The present edition reflects the situation on 1 January 1992 and replaces the previous edition which was based on the situation on 1 January 1990.

This publication aims to provide all those interested in tax law – public servants, university staff, students, businessmen, tax advisers, etc. – with a general view of the tax systems of the Member States.

Directorates-General XXI and XV will be pleased to receive any comments or suggestions with a view to the improvement of this work.

Personal income tax

(Impôts des personnes physiques/Personenbelasting)

Articles 3 to 93a of the Income Taxes Code.

Beneficiary:

The State (plus a possible surcharge on individuals for the benefit of the municipalities and the agglomeration of Brussels).

Tax payable by:

Inhabitants of Belgium, i.e. individuals who have established their domicile or their centre of financial interest in Belgium.

Basis of assessment:

Income subject to personal income tax consists of the total net income, of Belgian or overseas origin, in the following four categories: income from property, income from securities, earned income, miscellaneous.

Benefits or allowances of a social or cultural nature are in certain cases exempt from personal income tax.

The tax paid is not an allowable expense for the purposes of any other tax.

Deductions:

Under certain conditions, the interest on loans contracted with a view to purchasing or retaining ownership of real property is deductible from income derived from property.

Under certain conditions, charges for collection and custody are deductible from declared income from securities¹ taxed as a whole.

Under certain conditions and within certain limits, the following items are deductible from net earned income:

- amounts spent by the taxpayer on purchasing shares or interests in Belgian companies in which they are employed as workers;
- life assurance premiums;
- amortization of mortgage loans contracted with a view to the construction, purchase or conversion of residential accommodation, backed by an insurance policy covering the balance remaining.

Total net income is then reduced, under certain conditions and within certain limits, by the following amounts:

- interest on certain mortgage loans contracted after 1 May 1986 to purchase, construct or renovate residential property, which could not be deducted from income from property;
- 80% of certain maintenance allowances;
- amounts used to purchase new nominative securities not used in the taxpayer's business activity;

¹ In certain cases the declaration of income from securities is optional.

B 1

- fees or similar charges paid on the acquisition of a long lease of land or buildings thereon or on similar rights relating to real estate, whether situated in Belgium or abroad;
- gifts of BFR 1 000 and over to approved bodies or State museums;
- certain expenditure on maintaining and restoring listed buildings and sites;
- sums used to open a savings account or to enter into an insurance-linked savings contract;
- 80 % of the amounts spent on child care for one or more children under the age of three;
- sums payable to the Treasury by civil servants holding multiple jobs;
- special social security contributions;
- remuneration of domestic servants.

Married couples:

A couple's earned income is never aggregated. If the earned income of one of the spouses is very small or nil, that spouse is regarded as having earned a share of the other spouse's income which is transferred from one to the other.

The couple's income from property, investment and other sources, and that of their children where the parents have the legal right to administer it, is aggregated with the earned income of the spouse whose earned income is higher.

Non-residents:

See under Tax on non-residents.

Collection:

By means of assessment books.

Advance payments which count towards the tax due (within certain limits for real estate) are required in the case of income from immovable property and capital and certain types of earned incomes, etc.

The advance payment constitutes full discharge in the case of certain income from immovable property (temporarily) and in the case of income from capital, declaration of which is optional.

The advance payment is 1.25 % (0.8 % in some cases) for immovable property located in the Brussels and Wallonia regions and 2.50 % (1.6 % in some cases) for immovable property located in the Flanders region, plus a surcharge accruing to the local authorities. The advance payment in the case of income from capital is normally 25 %. The rate is reduced to 10 % for investment income (other than income from shares or units and invested capital) allocated or allotted pursuant to agreements concluded from 1 March 1990 onwards. The advance payment for wages, salaries, pensions, etc. is calculated from tax scales.

Rates:

There are seven rate bands:

<i>Rate (%)</i>	<i>Income (BFR)</i>
25	1 to 245 000
30	245 000 to 325 000
40	325 000 to 464 000
45	464 000 to 1 067 000
50	1 067 000 to 1 600 000
52.5	1 600 000 to 2 347 000
55	over 2 347 000

Within each household, these rates apply separately to each spouse for his or her own taxable income.

The schedule of rates does not take account of local taxes, or of personal allowances.

All taxpayers are entitled to a tax-free personal allowance, granted on the lower tax bands (that taxed at 25 %, then that taxed at 30 %, etc.).

Personal allowances are as follows:

single person	BFR 176 000
married couples	BFR 139 000 each.

They are increased by the following amounts for dependent children:

one child	BFR 37 000
two children	BFR 96 000
three children	BFR 216 000
four children	BFR 349 000
five or more children	BFR 349 000

plus BFR 133 000 for the fifth and subsequent children.

The personal allowance is also increased to take account of dependants other than dependent children, and of certain special family situations. A surcharge set by the municipalities and a tax in favour of the agglomeration of Brussels may also be imposed.

The proportion of the tax corresponding to earnings, profits or gains from self-employed business is, as a rule, subject to a surcharge. However, no surcharge is applied in the case of advance payments of a quarter of the amount of annual tax made by 10 April, 10 July, 10 October and 20 December of the year preceding the tax year.

A rebate is allowed on advance overpayments.

Certain tax reductions are granted on pensions, transfer incomes, early retirement pensions, unemployment benefits and statutory sickness or invalidity insurance payments.

Certain incomes are taxed separately at special rates.

Special features:

Income from immovable property situated in Belgium is defined as follows:

- for property which is not rented: normally the income according to the land register;
- for property which is rented to a natural person who uses it for his work; the income according to the land register, plus the fraction of the net rent¹ over and above that income;²
- for property which is rented to Belgian or foreign societies, associations and groups without legal personality, or to legal persons under public or private law: the income according to the land register plus the part of the net rent¹ over and above that income.

Income from immovable property also includes sums obtained on the acquisition or transfer of a long lease of land or buildings thereon or of similar rights relating to real estate, whether situated in Belgium or abroad.

¹ The net amount is taken to be the gross amount of rent and associated charges less maintenance and repair costs not exceeding 10 % for land and 40 % for buildings. The 40 % reduction may not exceed two-thirds of the income according to the land register, adjusted upwards on the basis of a coefficient which is fixed annually (2.80 % for the 1992 tax year – 1991 income).

² Where the rents relating to the private and business parts respectively of a property are recorded in a registered lease, this rule applies only as regards the business part of the property.

B 1

Tax on foreign income from immovable property, foreign earned income and certain other forms of foreign income is reduced by half, sometimes on condition that the income has been effectively taxed abroad.

Carry-over of losses:

There is no time limit for carrying over business losses.

Corporation tax

(Impôt des sociétés/Vennootschapsbelasting)

Articles 94 to 133 of the Income Taxes Code.

Beneficiary:

The State.

Tax payable by:

Companies, associations, establishments or bodies with legal personality which have their registered office or principal establishment in Belgium or are managed or administered from headquarters in Belgium and are engaged in an activity for pecuniary reward. Some, however, are expressly exempt from corporation tax (intercommunal associations, etc., which are liable for the tax on legal persons).

Basis of assessment:

All expenses not allowed for tax purposes, all distributed and undistributed profits. Tax paid is not, in principle, an allowable expense.

Exemptions and allowances:

Ninety-five per cent of certain net distributed profits accruing to companies from their shareholdings, plus the actual advance payment on income from capital. Under certain conditions, distributed profits on new shares or units issued in 1982 and 1983 are exempt. Certain capital gains on shares or units are unconditionally exempt.

Collection:

By means of assessment books, except in the case of advance payments (see under Personal income tax).

Rates:

Standard rate: 39%. (See under Personal income tax for the application of an increase where advance payments are not made or are insufficient).

Except for certain holding companies, companies at least half of whose shares are held by one or more other companies and companies whose income distributed to shareholders exceeds 13% of the capital actually paid up and remaining to be paid back, the tax is as follows where the taxable income does not exceed BFR 13 000 000:

- (i) 28% for the portion from BFR 0 to BFR 1 000 000;
- (ii) 36% for the portion from BFR 1 000 000 to BFR 3 600 000;
- (iii) 41% for the portion from BFR 3 600 000 to BFR 13 000 000.

Special features:

The tax is reduced to a quarter in the case of profits made and taxed abroad, and in the case of income from property situated abroad. In the case of foreign interest and licence fees which have in fact been taxed abroad, the tax is reduced by 15/85 of the amount of these incomes before deduction of any advance payment that may be due in Belgium. Special rules apply to income from claims and loans.

Collection of the advance payment on certain income from shares or units or capital invested is entirely waived in cases where:

- the debtor is a Belgian subsidiary company and the beneficiary is a parent company of another Community Member State;
- the debtor and the beneficiary are subject to corporation tax in Belgium.

Carry-over of losses:

There is no time limit on the carry-over of business losses. There is, however, a limit on the amount that can be deducted in each tax year and the amount that can be carried over in cases of transfer of assets or absorption of companies.

Tax on legal persons

(Impôt des personnes morales/Rechtspersonenbelasting)

Articles 136 to 138 of the Income Taxes Code.

Beneficiaries:

The State (also the local authorities for the part corresponding to the advance payment).

Tax payable by:

- Central government, local authorities and companies, associations, establishments or any other bodies with legal personality which have their registered office or principal establishment in Belgium or are actually managed or administered from headquarters in Belgium and are not engaged in an activity for pecuniary reward.
- Companies, associations, establishments or any other bodies expressly exempt from corporation tax.

Basis of assessment:

Income from immovable property, capital, certain other sources (such as certain capital gains), secret commissions, unjustified payments and awards, non-deductible pensions and pension contributions and certain dividends distributed by intercommunal associations;¹ income from immovable property is sometimes exempt.

Collection:

By advance payment in the case of income from immovable property and capital (see under Personal income tax).

By means of assessment books in the case of the tax on certain income from immovable property (does not apply to central government or the local authorities), certain dividends distributed by the intercommunal associations, certain capital gains, and secret commissions and unjustified payments and awards.

Rates:

- The amount of tax is equivalent to the advance payments in the case of income from immovable property and capital; however, certain income from immovable property is taxed at a rate of 20 %.
- The rates of tax payable on certain capital gains are 33 % and 16.5 % depending on the case in question or the period during which the goods disposed of were held.

¹ The State and the local authorities, public and intermunicipal social assistance centres and public cultural establishments are not liable for the tax payable on capital gains, secret commissions, unjustified payments or awards and non-deductible pensions and pension contributions.

B 3

- The rate of tax on certain capital gains realized on disposals for a consideration of large shareholdings is 16,5%.
- The rate of tax payable on unjustified charges or sums is 200%.
- The rate of tax payable on non-deductible pensions and pension contributions is 39%.
- The rate of tax payable on certain dividends distributed by intercommunal associations is 15% (see under Personal income tax for increases imposed when advance payments are not made in full).

Tax on non-residents

(Impôt des non-résidents/Belasting der niet-verblijfhouders)

Articles 139 to 152 of the Income Taxes Code.

Beneficiary:

The State.

Tax payable by:

Individuals not resident in Belgium, companies, associations, etc., who do not have their registered office or principal establishment in Belgium, nor are actually managed or administrated from headquarters in Belgium, as well as foreign States and their political subdivisions.

Basis of assessment:

All kinds of net income generated or accrued in Belgium. Tax paid is not, in principle, an allowable expense.

Deductions:

For recipients of a Belgian pension and for other natural persons who have maintained a residence in Belgium throughout the taxable period, the same items of expenditure as for personal income tax payers are deductible, with certain limitations, from total net income. For other taxpayers, the following items are deductible from total net income:

- 80 % of certain maintenance allowances, if the recipient is resident in Belgium;
- gifts of at least BFR 1 000 to certain museums and institutions;
- fees or similar charges paid on the acquisition of a long lease of land or buildings thereon or on similar rights relating to real estate situated in Belgium.

Married couples:

For married couples who have maintained a residence in Belgium throughout the taxable period and recipients of a Belgian pension, total income is taxed according to the same rules as those applied to personal income tax. In other cases no share is allowed for the spouse.

Collection:

A return must be made for certain types of income, and tax is then adjusted under a single proportional rule. The tax on other types of income is equal to the tax credit and advance payments made.

B 4

Rates:

Tax on non-residents is based on the personal income tax schedule in force, with no reductions being granted for family situations. However, if the taxpayer has maintained a residence in Belgium, or is the recipient of a Belgian pension, the reductions are granted. A surtax of six additional hundredths is applied.

For non-resident legal persons, the tax rate is a flat 43 %.

A special separate contribution or tax (depending on the case) calculated at the rate of 200 % is payable on unjustified charges or sums.

Special features:

The tax on certain capital gains on land without buildings is subject to a special contribution established and collected by the land registration and estates department.

Carry-over of losses:

Same arrangements as for personal income tax or corporation tax, as appropriate.

State income tax

(Indkomstskat til staten)

Statutory Notice No 735 of 5 November 1991 (Tax Assessment Act), Statutory Notice No 582 of 7 August 1991 (Personal Tax Act) and Statutory Notice No 595 of 15 August 1991 (Act on tax at source).

Beneficiaries:

Tax on individuals: the State.

Tax on estates: the State and local government. The local government share of the tax amounts to one-third.

Tax payable by:

Individuals resident and estates administered in Denmark.

Basis of assessment:

The ordinary taxable income including income from foreign sources.

Exemptions:

Estates which are administered immediately following a person's decease are exempted from income tax, provided the following conditions are fulfilled:

- the value of the estate's assets at the time of decease must not exceed DKR 753 400 (1992);
- the net value of the estate at the time of decease must not exceed DKR 579 500 (1992);
- the value at which assets are paid out to heirs, etc. must not exceed DKR 695 400 (1992).

Deductions:

The tax liability on the net income is reduced by a percentage of a personal allowance. In 1992 the general personal allowance is DKR 31 500. The personal allowance for married pensioners is DKR 31 500. For single pensioners the allowance is DKR 56 000.

Estates

The tax liability is reduced by a monthly allowance of DKR 4 100 (1992).

Married couples:

The wife is taxed separately. Account is however taken of a spouse's income in some respects when assessing tax. Children are liable to tax independently.

DK 1

Non-residents:

Individuals are taxable on their income in Denmark from employment, pensions or grants, etc., according to the same rules as residents, apart from a certain standardization of the rules on personal allowance and certain restrictions as to the allowance on assessment, depending on whether those concerned have been living in the country for more or less than six months.

Collection:

The employer or employing authority is required to withhold from the remuneration paid for personal work of a service nature and from certain other types of income, such as pensions, a provisional tax known as A-Tax.

Distributed dividends are subject to a provisional dividend tax of 30 %. Royalty payments to non-residents are subject to a provisional tax of 30 % or to the tax due under double taxation agreements. Other income, primarily from self-employment and capital normally pays a provisional tax according to a demand note, known as B-Tax.

Tax at source:

A-Tax is withheld from every person who receives a salaried income in Denmark from employment there or who receives a pension or allowance from Denmark.

The basis of assessment of tax is the taxpayer's gross income minus all deductions other than the personal allowance. However, a further deduction is made of a sum equal to the figure which would be obtained if the personal allowance were taxed at the lowest rate.

The provisional taxation of married couples is levied on each of them separately. If one of the spouses has no income or otherwise cannot make full use of his or her allowances (general deductions on assessment + personal allowance), it is transferred to the other spouse.

Rates:

Individuals

Taxable income is split into two components, personal income and investment income.

State income tax of 22 % (and local income taxes) are payable on the whole of the taxable income. An additional 12 % in State income tax is payable on the portion of personal income exceeding DKR 231 800 (1992). A further 6 % in State income tax is payable on the sum of personal income and any positive net investment income, after deduction of a basic allowance of DKR 162 300 (1992).

The thresholds are adjusted in line with a factor laid down annually by law. The adjustment factor for 1992 is 115.9.

If the combined total of a taxpayer's State, county and municipal income taxes exceeds 68 % of a specified proportion of the personal income, the State income tax is reduced by the amount in excess.

If, following that reduction, the combined total of the taxpayer's State, county and municipal income taxes (after deduction of the personal allowance) and any wealth tax due exceeds 68 % of his taxable income, the tax is reduced. The wealth tax is reduced in the first place, and State income tax in the second place, to bring the total to 68 % of the taxable income. The wealth tax may not be reduced by more than 60 %. The total reduction in wealth tax and State income tax may not exceed the total wealth tax.

Estates

On taxable estates income tax is payable at 50 % of the taxable income.

Carry-over of losses:

The value for tax purposes of any shortfall in taxable income is set off against the taxpayer's 12 % and 6 % taxes. If the taxpayer is married and the spouses are cohabiting at the end of the year, any remaining shortfall is deducted from the spouse's taxable income, and thereafter the tax value of any shortfall remaining is deducted from the spouse's 12 % and 6 % taxes. Anything still remaining can be carried forward for the five years following. Where the taxpayer has positive special income for the same year he may choose to set off the shortfall against his own and thereafter his spouse's positive special income, before carrying forward any remainder to later years.

Negative personal income can be set off only against the income which forms the basis of assessment for the 12 % and 6 % taxes, i. e. positive net investment income and personal income. In the year of the shortfall, negative personal income is deducted from the taxpayer's positive net investment income when calculating the 6 % tax. If the taxpayer is married and cohabiting with his spouse at the end of the year, the shortfall is deducted in the first place from the spouse's personal income, and in the second place anything remaining is deducted from the total positive net investment income of the two spouses. Any remaining shortfall in personal income is carried forward for the following five years.

A negative net investment income is not carried forward independently, but is deducted in calculating taxable income.

County income tax

(Amtskommunal indkomstskat)

Law on taxation by county authorities, see Statutory Notice No 534 of 30 October 1974; Law No 217 of 28 April 1976; Law No 500 of 28 October 1983; Law No 315 of 4 June 1986.

Beneficiary:

The county in which the tax municipality of the taxpayer is situated.

Tax payable by:

The same group of people who are liable to municipal income tax.

Basis of assessment:

The taxable income for State income tax.

Deductions:

The tax liability is reduced by a percentage of a personal allowance (tax credit). In 1992 the general personal allowance is DKR 24 600. However, this corresponds to the total allowance for county and municipal income tax and church tax combined.

Collection:

Collection and accounting to the county for county income tax is carried out according to the same rules as those on municipal income tax.

Rates:

The county income tax corresponds to a percentage levy fixed by the County Council for the calendar year in question.

Municipal income tax

(Kommunal indkomstskat)

Statutory Notice No 620 of 25 September 1987; Law No 223 of 13 April 1988; Law No 363 of 1 July 1988; Law No 825 of 19 December 1989; Law No 250 of 25 April 1990; Law No 895 of 21 December 1991.

Beneficiaries:

The income tax of a person fully liable for municipal income tax is normally payable to his tax municipality, i.e. the municipality in which the person in question is resident or – if he has no place of residence – to the municipality in which he was staying on 5 September before the calendar year in question. The same rule applies for married women. However, another municipality can be fully or partly entitled to tax, since a stay of at least three months in a municipality gives that municipality a right to part of the municipal income tax to which the taxpayer is liable, calculated in proportion to the length of the stay.

Persons who are only partly liable to tax usually pay income tax to the municipality in which they receive their income.

Tax payable by:

All persons liable to State income tax.

Basis of assessment:

The taxable income for State income tax with a certain difference in regard to the personal allowance.

Deductions:

The tax liability is reduced by a percentage of a personal allowance (tax credit). In 1992 the general personal allowance is DKR 24 600. However, this corresponds to the total allowance for county and municipal income tax and church tax combined.

Collection:

See under State income tax.

Rates:

The municipal authorities fix the percentage of the levy for one calendar year at a time. Non-residents pay municipal income tax on the limited income.

The levy on this income corresponds to the total average levy for the municipal and county income tax (29 % in 1992).

Dividend tax

(Udbytteskat)

Sections 65 to 67 A of Statutory Notice No 595 of 15 August 1991 (Act on tax at source).
Sections 4a and 8a of Statutory Notice No 582 of 7 August 1991 (Act on tax on persons).
Section 13 of Statutory Notice No 585 of 7 August 1991 (Act on corporation tax).

Beneficiaries:

See under State income tax and Corporation tax.

Tax payable by:

Companies: Dividend received by companies and associations etc. as mentioned under Corporation tax heading l(a), (b) and (d) – (g) from Danish subsidiaries (not less than 25 % holdings) is not included in the statement of the taxable income. Dividend from other Danish companies is included by 66 % of the amount of dividend. Dividend from foreign subsidiaries is not included in the taxable income, if the company income forming the basis of the dividend is taxed according to rules which do not differ essentially from the Danish rules.

Persons: Tax is payable by 30 % on dividend not exceeding DKR 30 000 in 1991. This dividend tax is a definitive tax which is not set off against their finally calculated tax.

Tax on dividend exceeding DKR 30 000 in 1991 is payable by 45 % and is set off against the person's finally calculated tax. Any amount of this tax in excess is repaid.

Dividend includes the amounts of:

- dividend from shares, cooperative shares, etc., securities from Danish joint-ventures stock companies;
- amounts which a shareholder or a member of a cooperative undertaking receives at the time of surrendering the shares, cooperative shares, etc., securities;
- allocation from investment trusts.

Non-residents:

Shareholders residing abroad may be able to claim a refund of the dividend tax in so far as an agreement for the avoidance of double taxation would justify the refund.

The collection is made by the District Inspectorate of Taxes.

Rates:

50% of the amount by which the value of each bond exceeds DKR 200.

Tax payable by:

The members of the Established Church of Denmark.

Rates, basis of assessment and collection:

The tax liability is reduced by a percentage (equal to the tax rate) of a personal allowance. In 1992 the personal allowance is DKR 24 600. This corresponds to the total allowance for county and municipal income tax and church tax combined. Collection takes place jointly with municipal income tax.

Special income tax

(*Særlig indkomstskat*)

Statutory Notice No 674 of 3 October 1990.

Beneficiaries:

The State and municipalities.

One-third of the special income tax devolves to the municipality.

Tax payable by:

(a) Persons and estates who are liable to State income tax;

(b) Companies, associations, corporations and autonomous institutions, etc. which are liable to income tax under the rules of the Corporation Tax Law and the Fund Income Tax Law.

Estates and joint-stock companies, etc. are required to include special income calculated in accordance with the rules on the law on special income tax in their ordinary taxable income, instead of paying special income tax.

Basis of assessment:

- Profit or loss on disposal of machinery, equipment, etc., ships, buildings and building installations used for trading and covered by the law on depreciation.
- Profit or loss on the disposal of patent rights etc., time-limited rights, rights in virtue of dividend contracts and lease or hire contracts.
- Profit or loss on the disposal of shares, on certain conditions only. Gains on the sale of ordinary shares are not taxed provided disposal takes place more than three years after acquisition. Special income tax is chargeable on the disposal of shares held by a principal shareholder only in accordance with special rules which have the effect that gains after seven years' ownership are reduced by half.
- Profit or loss on the distribution of liquidation assets of joint-stock companies and cooperative societies during the calendar year in which the company was finally liquidated.
- Certain compensation and bonuses, received from the taxpayer's employer.
- Some payments pertaining to pension funds.
- *Ex gratia* payments made from public funds, from charities and from cultural funds.
- Profit on the disposal of property. Exceptions to this are one- or two-family houses occupied by the owner, on conditions which are specified in detail.
The tax is not chargeable where assets are sold more than seven years after acquisition.
- Capital goods acquired for purposes of trade or speculation are not covered by the law on special income tax.
- Bankruptcy income.

Exemptions:

Profit realized on the disposal of property is not included under special income, where such disposal attracts disposal tax under the rules of the law on property derestriction tax etc.

DK 10

Profit realized on the receiving of damages or insurance amounts is exempt from special income tax if rebuilding is undertaken.

Compensation for expropriations of real property which have taken place since 15 May 1979.

Deductions:

Certain types of special income are subject to special rules for the calculation of profit and loss.

Married couples:

The wife is taxed separately from the husband.

Non-residents:

Those taxpayers who have limited tax liability are only taxed on special income deriving from personal goods covered by the limited tax liability pertaining to the exercise of a trade or to property transactions.

Collection:

Special income tax is payable in three instalments on 1 September, 1 October and 1 November in the year in which the tax is assessed, the last date for payment being the 20th of the month in which it falls due.

Rates:

Special income tax is calculated at 50 %.

Where real property is sold more than three years after acquisition, the gain is reduced by 20 % for each year. Thus in effect the rate changes, falling from year to year until no tax is due.

In the case of shares held by a principal shareholder the gain is reduced by 10 % for each year after the third. Thus the rate falls here too. But as the basis is simply reduced by half after seven years the effective rate of taxation only drops to 25 %.

Supplementary tax:

If the proper annual declaration is not submitted on time, the tax is increased in accordance with the rules of the law on tax control.

Special circumstances:

When a person's liability to tax in Denmark ceases, because of his departure abroad etc., he is required, before departure, to submit a declaration of special income during the current income year. Persons concerned are required, before departure, to calculate and pay the special income tax.

Regarding merger of joint-stock companies and cooperative societies, etc., special regulations are provided in Statutory Notice No 628 of 27 August 1991.

Special income tax is not levied on disposals of property which are subject to real property disposal tax.

Carry-over of losses:

In certain cases it is permitted to calculate special income so as to produce a negative amount, in so far as the rules of calculation show a loss.

In so far as the special taxable income is negative, an amount equal to the negative special income may be deducted when calculating the ordinary taxable income.

If the ordinary taxable income shows a shortfall the taxpayer may, rather than carrying it forward in accordance with the rules in the Personal Income Tax Law, deduct it from his own and thereafter from his spouse's special income for the same year. If corporate income under the Corporation Tax Law shows a shortfall it may likewise be deducted from special income rather than carried forward under the Corporation Tax Law. Any remaining shortfall can be carried forward under the Personal Income Tax Law or the Corporation Tax Law as the case may be.

Hydrocarbon tax

(Kulbrinteskatt)

Law on hydrocarbon tax, see Statutory Notice No 739 of 20 November 1987, as amended by Law No 59 of 7 February 1990 and Law No 217 of 10 April 1991.

Beneficiary:

The State.

Tax payable by:

- (a) Individuals, estates, corporations, etc. which derive income from the extraction of hydrocarbons in Denmark.
- (b) Individuals, estates, corporations, etc., which do business or earn wages or the like in connection with the extraction of hydrocarbons in Denmark, and which are not liable to tax in Denmark under the Law on the deduction of tax at source or the Law on corporation tax.

Basis of assessment:

Persons or companies which derive income from the extraction of hydrocarbons pay personal income tax or corporation tax to the State, and hydrocarbon tax as a supplement to that tax. Personal income tax or corporation tax are assessed under the general rules of tax legislation. The following special rules apply, however:

- Hydrocarbon income (defined by a 'ring fence') is calculated separately.
- The law allows other prices to be set.
- Production installations and the like are depreciated in accordance with the rules on machinery, equipment and similar assets.
- Expenditure on exploration is always deductible.
- Losses on hydrocarbon extraction activities may be carried forward for up to 15 years.

The basis of assessment for the hydrocarbon tax is calculated separately and is basically independent of the basis of assessment for personal income tax or corporation tax. The same rules are applied as those used in calculating the personal income tax or corporation tax due on hydrocarbon income. The following exceptions are made, however:

- Hydrocarbon income is calculated field by field within the ring fence.
- The rules on allocation to investment reserves, accelerated depreciation and the writing down of stocks do not apply.
- In calculating the hydrocarbon income from a field a special basic 'hydrocarbon allowance' is applied, which varies with the investment put in. The hydrocarbon allowance is equal to 25% of the investment in a field annually, and is granted for 10 years including the year in which depreciation on the asset or assets began.
- In calculating the income subject to hydrocarbon tax there is an allowance for the whole of the personal income tax or corporation tax assessed for the same year on income from hydrocarbon extraction.

Individuals or companies doing business carrying on activities in connection with hydrocarbon extraction calculate their income in accordance with the ordinary rules of tax legislation.

Persons earning wages or salaries in connection with hydrocarbon extraction pay tax on the basis of their wage or salary income, without any deductions.

Deductions:

See 'Basis of assessment'.

Non-residents:

See 'Tax payable by'.

Collection:

The hydrocarbon tax is collected on a provisional basis in two yearly instalments to be paid by 1 October in the income year and 1 June the year following.

- In the case of individuals and companies referred to under: 'Tax payable by' (b); taxes are also collected in accordance with the ordinary procedure, except in the case of wage and salary incomes, where 30 % of income is withheld at source.

Rates:

Hydrocarbon tax is set at 70 %.

- In case of the individuals, companies, etc., referred to under 'Tax payable by' (a) corporation tax is 38 % and personal income tax is 38 %.
 - In the case of the individuals, companies, etc., referred to under 'Tax payable by' (b) corporation tax is 38 % and personal income tax is 38 %.
- Those earning wages and salaries in connection with the extraction of hydrocarbons pay a final State tax of 30 % of their income.

Losses in fields which have been abandoned can be deducted from the total taxable hydrocarbon income from fields making gains before the tax is charged.

Losses recorded in the statement of total taxable hydrocarbon income can be carried forward up to 15 years.

Tax payable by:

Individuals domiciled or ordinarily resident in Germany (unlimited tax liability). Individuals of German nationality, who are neither domiciled nor ordinarily resident in Germany, but who work for domestic bodies governed by public law (unlimited tax liability). Individuals to whom income accrues in Germany, but who are not domiciled or ordinarily resident in Germany (limited tax liability).

Deductions:

Special expenses (maintenance payments to a divorced or permanently separated spouse, certain deductible insurance premiums, payments to building societies and loan associations and gifts up to certain maximum amounts, the cost of consulting tax experts, church tax, etc.) at a flat rate; if heavier expenditure has been incurred, documentary proof is required. Elderly persons' relief, child allowance, household allowance for single parents with one or more children in their household, extraordinary expense.

D 1

Married couples:

Married couples may opt for joint assessment with taxation under the splitting procedure, separate assessment, or special assessment for the tax period in which they were married.

Children's own income:

Tax on such income is assessed individually.

Non-residents (limited tax liability):

Non-resident persons and companies are taxed only on certain income arising in Germany; there are special regulations governing deductions, rates of tax and tax withheld at source.

Collection:

Tax is assessed annually. In the case of income from paid employment, tax is withheld at source by the employer (see under Wages tax); in the case of certain kinds of income from capital assets (in particular dividends), the tax is withheld at source, generally at a rate of 25 % (see under Capital yields tax).

Wages tax, capital yield tax and, in certain cases, corporation tax are credited against assessed income tax.

Rates:

In the standard-rate band up to DM 8 153 (DM 16 306 in the case of married couples assessed jointly), including a basic personal allowance of DM 5 616 (DM 11 232 for married couples), tax is payable at 19 %. The marginal rates, applying between DM 8 154 (DM 16 308) and DM 120 000 (DM 240 000), range from 19 % to 53 %. The top marginal rate above DM 120 000 (DM 240 000) is 53 %.

Special features:

In partnerships (Personengesellschaften), each partner's profits are taxed separately. The partnership itself cannot be a taxpayer.

Deduction of losses:

Losses which are not offset by positive income when the total amount of income is determined may be deducted in the two preceding years, and if a deduction in that period cannot be made, in the succeeding years.

Wages tax

(Lohnsteuer)/Special method of collection of income tax chargeable on income from paid employment

Income Tax Law of 27 February 1987 (BGBl I, p. 657), Articles 38 to 42 F and 59, as last amended by the Law of 25 January 1992 (BGBl I, p. 297); Wages Tax Implementing Regulation of 10 October 1989 (BGBl I, p. 1848), as last amended by Article 2 of the Law of 25 February 1992 (BGBl I, p. 297).

Beneficiaries:

See under Income tax.

Tax payable by:

Persons in employment, domiciled or ordinarily resident in Germany, other persons to whom income accrues from employment which is or was performed or used in Germany, and persons who, in consideration of a past or present employment relationship, are in receipt of income from a German public fund or agency.

Basis of assessment:

Wages less expenses, special expenditure and certain other deductions.

Exemptions:

Certain benefits as in the case of income tax, and especially unemployment pay, lodging allowance, and certain social insurance payments by the employer, where these are a statutory requirement or rank as statutory expenditure.

Deductions:

As for income tax; especially a flat-rate allowance for employed persons in respect of housing costs and a flat-rate allowance for social insurance expenses (provident expenditure).

Married couples:

The combined income of a married couple is taxed according to the 'splitting' system. In some cases, depending on the classification in wages-tax brackets, tax will be deducted at source.

Non-residents:

Taxation of employees by 'PAYE' procedure with special provisions in respect of tax brackets and other allowances.

Collection:

Tax is withheld by the employer on the basis of a wages-tax card and wages-tax tables for daily, weekly or monthly wage payments. These tables incorporate a personal allowance of DM 5 616, the allowance for head of household, the lump sums for income-related expenses and certain special expenses, and the flat-rate allowance for provident expenditure.

The grounds for tax relief in the case of an employed person can be allowed at the outset in the current deduction procedure by recording an individual tax-free amount on his wages-tax card. At the end of the calendar year, the adjustment of wages tax will be made. Any wages tax withheld in excess will thus be refunded on the basis of an income tax assessment; additional tax payments may be required.

Rates:

As for income tax.

Capital yields tax

(Kapitalertragsteuer)/Special method of collection of income tax and corporation tax

Paragraphs 43 to 45 b of the 1987 Income Tax Law.

Beneficiaries:

The Federal Government (50%) and the *Länder* governments (50%).

Basis of assessment and tax deductions:

Gross capital yields from certain equities, other shares and fixed-interest-bearing securities of domestic debtors.

1. Normal capital yield tax (25%)

This comprises: profits from shares in domestic joint-stock companies, cooperative societies, mining associations, sleeping partners' holdings and interest on domestic loans in the form of convertible bonds and participating debentures.

Tax deducted at source is taken into account on assessment. In the case of non-residents, capital yields tax constitutes settlement of income tax/corporation tax. However, it is in part refunded, if there is a tax treaty (double taxation agreement) applicable and provided the capital yields do not constitute operating receipts of a domestic permanent establishment; where they are operating receipts, the tax is set off against income tax/corporation tax.

2. Old-type coupon tax (30%)

This covers: interest on certain fixed-interest-bearing securities (mortgage bonds for social purposes) issued prior to 1 January 1955:

- (a) the amount withheld constitutes settlement of income tax for residents in Germany;
- (b) refund to non-residents, if there is a tax treaty (double taxation agreement) applicable and provided the interest does not constitute operating receipts of a domestic permanent establishment; in the case of operating receipts, the tax is set off against domestic income tax/corporation tax.

Disclaimers/Refunds:

1. In respect of ordinary capital yield tax:

- (a) individuals resident in Germany, where there is no assessment for income tax (certification procedure);
- (b) if the capital yield accrues to bodies whose objects are religious, of public utility or charitable;
- (c) interest from certain fixed-interest-bearing bonds issued before 1 January 1955 on tax-free interest terms.

2. In respect of old-type coupon tax:

Basis of assessment:

In the case of income from agriculture and forestry, industrial or commercial activities and self-employment, the profits, and in the case of other kinds of income the surplus of receipts over operating expenses, are used as a basis. As regards taxpayers who are obliged to keep accounts by the commercial code, all income is to be treated as income from industrial or commercial activities.

Tax is calculated on total income received during the year.

Exemptions:

The bodies exempted include the Federal postal administration; the Federal railway; the Bundesbank, corporations, associations, trusts and funds which, according to their charters, statutes or memoranda of association and their actual management, are conducted for non-profit-making, charitable or religious purposes; housing and settlement associations engaging in specified activities; professional and trade associations not conducted for commercial ends; pension and similar social funds; agricultural cooperative and equivalent associations.

Deductions:

Special features:

If a joint-stock company whose management and head office are in Germany (subsidiary company) undertakes to remit its total profits to another commercial enterprise in Germany by an agreement for the transfer of profits, then, under certain conditions, the income of the subsidiary company must be imputed to the institution responsible for it (parent company).

 - (a) joint-stock companies and other corporations within the meaning of Article 43 of the Corporation Tax Law, i. e. corporations taxable under the imputation system;
 - (b) foundations within the meaning of paragraph 1 (1), points 4 and 5, of the Corporation Tax Law, with the exception of income derived from the commercial business of a foundation exempt from corporation tax.
2. *Reduced rate* 46 %
(Paragraph 23 (2 and 3) of the Corporation Tax Law)

3. *Special rate for the Zweites Deutsches Fernsehen (second German television channel)*
(Paragraph 23 (6) of the Corporation Tax Law)

Tax on distributed profits:

For distributed profits of joint-stock companies with unlimited tax liability and certain other corporations with unlimited tax liability (in particular, trading and business cooperatives), corporation tax amounts to a uniform rate of 36 % of profits calculated before deduction of corporation tax. Where the corporation tax to be calculated according to the tax rate provisions is more than 36 % (e. g. where the abovementioned tax rate of 50 % is applicable), the distribution of profits entails a reduction in corporation tax. Where the corporation tax to be calculated in accordance with the tax rate provisions is lower than 36 % (e. g. in the case of tax-free incomes), the corporation tax is raised in the event of distribution of profits.

In order to determine the tax on the distribution of profits, corporations must give a breakdown of their capital resources which can be used for the distribution of profits, in accordance with the taxation of such capital resources under the tax rate provisions. The breakdown is to be calculated in a continuously adjusted basis separate from the balance sheet.

Tax on the incomes of natural persons

(Φόρος εισοδήματος φυσικών προσώπων)

Legislative Decree No 3323/1955 on the taxation of the incomes of natural persons; Articles 1 to 48 of the Administrative Code.

Beneficiary:

The State.

Tax payable on:

- (a) Incomes arising in Greece, irrespective of the nationality, domicile or residence of the recipient. Income arising abroad when the recipient, irrespective of nationality, is domiciled in Greece. Due consideration is given to bilateral conventions designed to obviate double taxation.
- (b) Income accruing to undistributed estates.

Basis of assessment:

In order to determine the tax to be paid by each taxable person, a first calculation is made of the tax payable on his total income, on the basis of the scale. The scale is then used to determine the tax corresponding to total allowances (with and without supporting documents), which is then deducted from total income tax. The tax to be paid is the remainder.

Allowances:

1. *With supporting documents*

Tax allowances with supporting documents are determined on the taxable person's family situation.

- without spouse, up to DR 228 000;
- with spouse, up to DR 342 000, plus DR 114 000 for each child. The total is divided between the spouses in proportion to the taxable income of each of them. Legal certification is required.

The expenditure which may be offset against tax allowances, in some cases in its entirety, includes the purchase of furniture, electric or solar water-heaters, electric cookers, refrigerators, deep-freezers, washing machines, vacuum cleaners, fans, heaters and radiators, small electrical appliances, gas appliances and gas, oil or solid-fuel heaters for the taxable person's home, footwear, bags and travel goods, linen, made-up garments, fabrics and payment for the making-up of men's/women's/children's garments (not of fur) and books and school equipment of all kinds. Also tax-deductible is expenditure on repair and maintenance work on principal and secondary residences (whether owned or rented), repair and maintenance and spare parts and accessories for privately used passenger cars, motorcycles and mopeds, provided they are not owned, held or used for the exercise of a trade or liberal profession, on the installation, connection, repair and maintenance of electrical or electronic appliances at the taxable person's residence, with accessories (power, aerial and sound cables, sockets and plugs for television aerials, television aerials, cables for connecting video recorders to television, etc.).

Tax allowances also cover expenditure on premiums for life assurance and personal injury or sickness insurance, if such expenditure is supplementary to premiums on life assurance for the

GR 1

taxable person or his/her spouse or their dependent children. An allowance of up to DR 80 000 will be granted on such expenditure.

Also tax-deductible is expenditure on renting a main residence (50 % up to DR 137 000 and 20 % from DR 137 000 to 570 000). These percentages are increased by five percentage points for each dependent child. Relief is also granted for expenditure on renting accommodation for each dependent child studying at a recognized educational establishment in Greece (50 % up to DR 137 000), provided that the accommodation is in the same locality as the educational establishment and that neither the taxable person nor the child owns or rents any accommodation in the same area.

For expenditure on renting a summer residence or accommodation at a holiday centre for the taxable person and his/her family, an allowance of 50 % of amounts up to DR 114 000, plus DR 11 000 per dependent child is granted.

Deductions may also be claimed for expenditure on kindergarten and child-care centres and tuition fees for attending foreign language institutes and courses at any level of State education, music schools, ballet schools and gymnasiums (50 % of amounts up to DR 137 000).

In addition to the above, and whether or not the limit for allowances with supporting documents has been exceeded, tax relief is granted on such personal expenditure as:

- the cost of medical and hospital treatment for the person liable to tax and his/her dependants;
- maintenance awarded by court decision or agreed in a document authenticated by a notary and paid to spouse or child;
- compulsory contributions to social security funds;
- the value of any real estate or sums of money donated to the State, to municipalities, to universities, to State or municipal nursing homes and hospitals which are legal persons governed by private law and are subsidized under the State budget, and to the Archaeological Resources Fund;
- sums of money donated to philanthropic institutions, non-profit-making bodies which provide educational services or grant scholarships, churches, monasteries on Mount Athos, Greek legal persons governed by public law, Greek legal persons governed by private law which have been or are being legally constituted for philanthropic purposes and any legally constituted sports clubs recognized by the Secretariat-General for Sport, provided that such donations are intended to promote the enhancement and development of amateur sections of such clubs. Should such donations exceed DR 80 000 in a year, they are regarded as deductible only if deposited with the Consignments and Loans Fund, while the year the donation is made is considered to be that in which it is so deposited and not that in which it is received by the beneficiary;
- deductions from salary or pension paid to legally constituted trade union organizations and amounts paid to banks operating in Greece, the Post Office Savings Bank and the Consignments and Loans Fund, provided they are made available in Greece, in cooperation with official services, to help earthquake and flood victims or are handed over, in cash or in kind, to the State, to legal persons governed by public law or to churches for the same purpose;

 - (a) mortgages on buildings and land taken out by the person who took the loan or owes the debt and owns the buildings or land,

- subscriptions or membership fees to professional associations or chambers and subscriptions to professional periodicals.

2. *Without supporting documents* (in accordance with family situation)

- (a) up to DR 342 000 for the taxable person;

Family income:

Husband and wife must submit a joint tax return except in certain cases specified in the law. Tax, duties and levies attributable to the income declared in the joint return are calculated without any provision for offsetting losses by one spouse against the income of the other.

The income of one spouse is added to that of the other and the total taxed as if it were the latter's if it accrues from a business that is financially dependent on the other spouse.

The income of one spouse from a civil or commercial partnership, a private limited company or an association or society engaged in a business activity in which the other also participates is added for assessment purposes to the income of the spouse with the larger aggregate income.

If the income of the two spouses is equal, the wife's income from such companies etc. is added for assessment purposes to her husband's income and taxed in his name.

The previous paragraph does not apply to income of the spouses from companies in which they have holdings if:

- the company was set up under Law No 328/1976,
- the holding of either spouse derives from inheritance,
- both spouses had holdings in the company for at least the two years directly preceding the dissolution of their marriage,
- the company was formed by merger of the spouses' individual enterprises, which operated independently for at least the two years preceding the dissolution of their marriage.

In the event of the marriage being dissolved, the income of each spouse from the above types of company etc. shall be declared separately by each of them. Conversely, in the event of separation, i.e. if the couple are living apart, such income shall continue to be added for assessment purposes to that of the spouse with the larger aggregate income even if separate tax returns are submitted.

GR 1

The income of minor children is added to that of the parent with the larger aggregate income before addition of that income and taxed in that parent's name. If the latter does not have custody of the child, the minor's income is added to that of the other parent and taxed in that parent's name.

Where the parent's aggregate income is equal, the income of their minor children is added to the father's income where he has custody.

If the parents have divorced or separated and do not have custody, the children's income from parental contributions or gifts of assets made by the parents is added to the income of the parent who made the contribution or gift of assets.

In certain cases specified in the law, the minor child has a personal tax obligation in respect of any income.

Non-residents:

Non-residents are taxed in the same way as permanent residents subject to provisions of any bilateral conventions between Greece and other countries designed to obviate double taxation.

Carry-over of losses:

The losses of commercial, agricultural and industrial undertakings, provided that the books have been kept in an adequate and accurate fashion, may, if not offset by income from other sources, either because there is no such income or because such income is insufficient, be carried over in full in the first case or alternatively the remainder may be carried over in the second case for the next three years in the case of commercial undertakings. In the case of agricultural, industrial, mining and hotel undertakings the carry-over period is five years, provided that the books have been kept properly and accurately.

Tax on the incomes of legal persons

(Φόρος εισοδήματος νομικών προσώπων)

Legislative Decree No 3843/1958 on the taxation of the incomes of legal persons.

Beneficiary:

The State.

Tax payable by:

Greek companies with share capital, State and municipal undertakings and profit-making enterprises, cooperatives and associations thereof, foreign undertakings operating in Greece in whatever company form, non-profit-making Greek and foreign legal persons governed by public or private law.

Basis of assessment and rates:

Tax is assessed on the taxable income of the legal person liable, at different rates per category of person liable, as follows:

1. 46 % for Greek limited companies, foreign companies and other bodies operating for financial profit and for State and municipal enterprises, including those operating for profit; On dividends from ordinary or preference shares, whether the shareholder is a Greek or foreign, natural or legal person, tax is charged as follows:

- (a) 42 % on dividends from shares quoted on the stock exchange for at least four months before the end of the financial year for which the dividend is paid provided the shares became nominal before the end of the financial year for which the dividend is paid, and 45 % on dividends from bearer shares, to the exclusion of any further charge.

Recipients of dividends as above are granted a tax-free allowance of DR 50 000 per year on dividends from any given company. When dividends are received from more than one company, this allowance may not exceed DR 200 000.

For the purpose of assessing the tax to be paid in accordance with the above, the deduction of the tax-free allowance for dividends from nominal shares is carried out by the company when the dividend is paid or credited to the shareholder, provided the shareholder provides the company with a sworn statement to the effect that he has not been exempted from prepayment of the tax under this provision when receiving dividends on nominal shares from other companies for the same period, for dividends amounting to more than DR 200 000, including the tax-free allowance for which he is submitting the declaration. For dividends on bearer shares, the tax withheld by the company is assessed without any allowance being deducted.

Deduction of the tax-free allowances of DR 50 000 and DR 200 000, as the case may be, is effected by the government financial service responsible when it processes the income tax declaration submitted by the person liable for tax, who is obliged to include in the declaration any dividends he receives for the same period on quoted nominal shares, in order for his tax-free allowance on dividends from bearer shares to be calculated.

The above tax-free allowance is deducted in all cases, regardless of whether the person liable wishes to be taxed under the general rules on taxation of the income of natural and legal persons.

- (b) Dividends from shares not quoted on the stock exchange are taxed at 47 %, without any tax-free allowance, if the shares became nominal before the end of the period for which the dividend is paid, and at 50 % if they are on bearer shares, to the exclusion of any further charge.
- (c) Holders of quoted shares and unquoted nominal shares, as referred to in (a) and (b) above are entitled to request that all their income from dividends on those shares be added to their other income as shown in their income tax declarations and taxed under the general rules on income tax, otherwise they are considered to have fulfilled their obligations as taxpayers once the tax on those dividends has been paid. Recipients of income from unquoted bearer shares have no further tax obligation after the tax due on this income has been withheld at source and may not combine this income with their income from other sources for tax purposes.
- (d) Tax on the fees and percentage share-outs paid to board members and on bonuses on top of salary and percentage share-outs paid to working directors and managers is withheld at source according to the scale for natural persons without any portion being exempt. Subsequently, the recipient is obliged to include this income in his annual tax return so that it can be assessed for income tax in the normal way.

By way of exception, undistributed profits of certain categories of Greek joint-stock company are taxed at lower rates, as follows:

- 2. 40 % for Greek industrial, craft, mining and quarrying enterprises.
- 3. 35 % for Greek industrial, craft, mining and quarrying companies whose shares are quoted on the stock exchange or which, from 1 January 1987, carried out productive investments under the system of State subsidies provided for in Law No 1262/1982 (*Government Gazette 70/A*), amounting to more than DR 50 million, together with those subject to that system up to 31 December 1986, whatever the amount of the investment.

For mixed enterprises covered by points 2 and 3 above, the reduced rates of 40 % and 35 % apply only to such undistributed profits as derive from industrial, craft, mining or quarrying activity.

If it is not possible to distinguish in the accounts between profits from each source, the undistributed profits to be taxed at the reduced rate are determined by breaking down the company's total undistributed profits in proportion to gross income from each source.

- 4. 40 % for other Greek companies which, from 1 January 1987, carried out productive investments under the system of State subsidies provided for in Law No 1262/1982, amounting to more than DR 50 million, together with those subject to that system up to 31 December 1986, whatever the amount of the investment.

For mixed enterprises, the reduced rate applies only to such undistributed profits as derive from the activities concerned by the productive investment.

In order to assess the amount of undistributed profits to be taxed at the reduced rate of 40 %, the rule set out in the last paragraph of point 3 above is followed.

For joint-stock companies as referred to in points 3 and 4 above, embarking from 1 January 1987 on investments under the system of State subsidies provided for in Law No 1262/1982, the first year in which undistributed profits are taxed at the reduced rate is the year in which total investment of at least DR 50 million is made, as demonstrated by the company's record. For companies which were subject to the same rules up to 31 December 1986, the year taken is that in which the investment was completed.

For Greek first-, second- and third-tier cooperatives and associations thereof, the rate is 33 %, and for agricultural and craft cooperatives 28 %.

For Greek and foreign legal persons of a non-profit nature, the rate is 23 %.

- 5. Foreign businesses and organizations not permanently established in Greece are subject to tax on income accruing from the use or granting of the use in Greece of:
 - technical production methods,
 - technical assistance,
 - patent rights,

- trade or industrial marks and patents,
- plans or prototypes in general relating to research findings,
- films,
- intellectual property,
- republication of articles and studies, and
- similar rights.

Tax is withheld at source on the gross amount of the fees received as follows:

- (a) 10% for fees received by foreign undertakings from the projection in Greece of their own film productions, irrespective of whether a flat rate is charged per film.
 - (b) 25% in all other cases, and specifically for fees and charges received by foreign undertakings and organizations which are not permanently established in Greece for the hiring of machinery, installations and movable items in general to third parties in Greece, and for fees received for the repair of machinery and other equipment, the organization of undertakings and the training of personnel in Greece in various artistic presentations. The rate of taxation applicable to the gross amount of the fees referred to above is 25%.
6. Foreign undertakings and bodies carrying out studies or drafting plans or conducting technical, financial or scientific research in Greece or abroad pay income tax on net profits accruing from those services. The tax is withheld at source and handed over to the State.
 7. Foreign companies and bodies undertaking public or private technical construction contracts in Greece pay income tax on net profits accruing from such work as follows:
 - (a) 5% on total gross value of work carried out on behalf of:
 - the State,
 - municipalities,
 - State undertakings,
 - public utility bodies or enterprises and legal persons governed by public law.

Where the contractor does not use his own materials, the abovementioned rate applies to the total net value of the works excluding the value of the materials,

- (b) 6% on total gross value of private works,
- (c) 12% on the total gross value of works excluding the value of materials for private technical works for which the contractor does not use his own materials.

This method of taxation is applied to foreign contracting companies and organizations which have contracts with the State and other persons referred to above.

The tax is withheld at source by the employer and handed over to the State.

In all the above cases, tax obligation ceases once the tax has been withheld by the person responsible for payment of the fees.

Collection:

The tax is collected on an annual basis.

Carry-over of losses:

The rules applying to income tax paid by natural persons also applies to legal persons.

Incentives:

1. The following are exempted from tax:
 - (a) Income of all kinds of the Greek State, including decentralized public services operating as special funds, urban and rural municipalities, municipal foundations and other municipal legal persons, associations of municipalities, purely municipal undertakings, the Central Union of Greek Municipalities, and local unions of municipalities.

 - (c) Presumptive income from property belonging to educational institutions, other than private ones, for their accommodation and operation.
 - (d) Income, from property in general and the renting of land, of Greek legal persons, legally constituted for purposes demonstrated to be in the public interest. By way of exception, Greek public-interest bodies are also free of tax on income from dividends on shares in Greek and foreign limited companies, and from interest on bonds.
 - (e) Presumptive income from immovable property belonging to recognized foreign religions and sects, provided it is used for purposes of worship and the provision of religious services and provided there is reciprocity.
 - (f) Presumptive income from immovable property belonging to foreign States, used to house their embassies and consulates, provided there is reciprocity.
 - (g) Profits from the operation of ships under foreign flags by Greek joint-stock companies, cooperatives or unions of cooperatives, where such profits are subject to the specific taxation on shipowners' profits.
 - (h) Profits made in Greece by foreign enterprises from the operation of ships under foreign flags and aircraft, provided there is reciprocity.
 - (i) Income derived by first-, second- and third-tier cooperatives which are regarded by the law as agricultural cooperatives from activities for the purposes set out in their articles of association. This exemption does not cover:
 - income from the renting of immovable property and from movable assets, apart from interest on bills of exchange and notes, if derived from commercial transactions, and interest on loans and credit to members of the cooperative;
 - profits on the sale of produce after such processing or alteration as to make them industrial products. This does not include sorting, refining, crushing, husking and shell-ing, juice extraction, peeling and pasteurization, the manufacture of dairy products and simple packaging for storing and transporting produce to the point of consumption, whatever the means employed;
 - profits from the retail sale of the cooperative's or its members' agricultural produce from its/their own outlets, or through third parties acting on its/their account;
 - profits on the sales to persons who are not members of the cooperative of goods not produced by the cooperative or its members, and profits on the provision of services to persons who are not members of the cooperative. Any losses from activities in which the cooperative is not liable for tax may be set off against such income.
 - (j) Interest on any deposits with Greek banks or branches of foreign banks operating legally in Greece.
 - (k) Interest on credits and remittances from abroad to banks and other financial institutions. The rate of tax-free interest may not exceed the official discount rate of the country of origin. By way of exception, this restriction does not apply to credits and remittances covered by Decree-Law No 2687/53 (*Government Gazette* 317/A).
 - (l) Income from movable assets, as referred to in Article 6(3), of legal persons subject to taxation herunder.
 - (m) Income exempted from taxation by contract ratified by law.
2. Any unearned increment on building land sold by non-profit-making building cooperatives to their members, if shown in a special reserve account and used on projects which are for the general good only, to meet the needs of the local population, do not constitute income of the cooperative concerned. Should the increment be distributed in any way among the members of the cooperative, it is then taxed in accordance with such rules as apply.

Tax on shipowners' profits:

Since 1983 there has been no payment of income tax on the profits made by shipowners from the operation of Greek-registered ships (Law No 27/1975, Law No 438/1976).

Law No 814/1978 introduced a special tax on the catches of foreign-registered fishing boats with interests in Greece involving payment of 1 % income tax on their gross revenues from the sale in Greece of their catch provided that it is sold at the quayside or at the cold stores on land.

Payment of this tax releases the undertaking and its partners or shareholders from all further tax liability in respect of net profits accrued through the sale of the catches of such vessels in Greece.

Tax on the profit income of owners of Greek-registered ships

(Φόρος εισοδήματος για τα κέρδη του πλοιοκτήτη)

I. For all ships excluding tourist ships and boats (Law No 27/1975)

Νόμος 27/1975 (όλα τα πλοία, πλην των τουριστικών)

Ships are classified into two categories, A and B.

Payment of this tax releases private shipowners and shareholders and partners in Greek or foreign shipowning companies from all further tax liability in respect of profits accrued through the operation of Greek-registered ships.

Basis of assessment:

The tax is calculated on the basis of the ship's gross volume and age.

Method of payment and liable parties:

For ships in Category A the tax is payable in United States dollars or pounds sterling at the official rate of exchange pertaining at the time of payment. For ships in Category B the tax is payable in drachmas.

Parties liable in respect of the tax are:

1. The shipowner (natural or private person) as listed in the register of ships on the first day of each calendar year, irrespective of nationality and domicile.
2. The following parties incur co-liability with the shipowner:
 - (a) any party with delegated responsibility for directing the ongoing trading function of a ship and for levying charges, whether by mandate of the shipowner or for any other reason;
 - (b) the shipowner's attorney, given written acceptance of this appointment;
 - (c) any new owner of a ship, given that ownership is transferred voluntarily, for tax chargeable at the time of transfer.

Reliefs:

If a ship is laid up or otherwise out of functional service the tax is reduced accordingly.

Exemptions:

Full exemption, or partial exemption for a number of years, is granted on the profit income of ships as follows:

1. on ships built in Greece;
2. on ships repaired or rebuilt in Greece if payment is made in foreign exchange;
3. on ships which ply regular services between Greek ports or between Greek ports and foreign ports.

- (a) Privately registered tourist ships and boats on which the tax is five times that calculable for ships in Category B.
- (b) Professionally registered tourist ships and boats on which the tax is 10 times that calculable for ships in Category B.

Professionally registered ships built in Greece are eligible for exemption for a number of years.

Tax on inheritances, gifts and parental provisions including dowries

(Φόρος κληρονομιών, δωρεών και γονικών παροχών, συμπεριλαμβανομένων και των προίκων)

I. Tax on inheritance

(Φορολογία κληρονομιών)

Inheritance is governed by Decree-Law No 118/1973 (*Government Gazette 202/A*), as subsequently amended.

1. Inheritance tax is charged on any acquisition of an asset through:

- (a) bequeathal or inheritance;
- (b) usufruct;
- (c) life assurance policy on the deceased, not specifying the beneficiaries;
- (d) self-insurance by the deceased, when this is not provided for by law.

2. The tax is charged on:

- (a) any asset which is located in Greece at the time of death, whether it is movable or immovable, tangible or intangible, and whatever the nationality of the heir or heirs;
- (b) tangible or intangible movable assets located abroad and belonging to a Greek national, whatever his place of residence, if he was domiciled abroad for less than 10 years continuously before his death;
- (c) tangible or intangible movable assets located abroad and belonging to a foreign national domiciled in Greece at the time of his death.

3. It is the heir or legatee who is liable to the tax, in proportion to the net value of his share in the inheritance and his degree of relatedness to the deceased.

On the basis of their degree of relatedness, heirs are classed in five categories, for each of which there is a specific sliding scale of rates.

4. The time at which tax is charged is normally the time of death (or the time of publication of a final court decision declaring a person as presumed dead).

By way of exception, the time of taxation may be put back until later than the real time of death, either as of right in the cases set out in Article 7 of the Law (suspensive option, dispute as to the right to inherit or the inheritance judicial settlement, combination of usufruct with ownership, fulfilment by the heir of the procedure by which he is being taxed, renunciation of inheritance by one heir who is then replaced by another, inclusion of further assets in the inheritance after death, payment for compulsorily purchased immovable assets, final settlement of obligations under a draft contract being entered into by the deceased, receipt of payments for intellectual property rights, the end of any probate or bankruptcy proceedings, the publication of a court decision approval, the accounts concerning foreign inheritance which is to be taxed in Greece, etc.) or by decision of the local tax office in the cases set out in Article 8.

5. The value of an asset for tax purposes is its market value at the time the liability to tax arises.

6. In the case of immovable assets, the value taken is that given by the objective evaluation system, if that system applies in the region where the assets are located. A special method of assessment is laid down for certain kinds of movable assets, such as furniture and household goods, bonds and shares (depending on whether they are quoted or not), services, jewellery, collections of works of art or stamps, etc.

Where a distinction is made between usufruct (to which use and residence, but not joint use or residence, are regarded as equivalent for tax purposes) and ownership, usufruct (whether for life or a specific period) is taxed directly and taxation of bare ownership is postponed until such time as usufruct is entered into, when tax is paid on full ownership.

By way of exception, bare ownership may be taxed directly when:

- (a) it devolves upon someone who already has usufruct (i.e. when the person with usufruct inherits it from the bare owner);
- (b) through renunciation it devolves upon another heir or legatee;
- (c) the bare owner transfers it for a consideration;
- (d) the bare owner buys the usufruct;
- (e) the bare owner so requests in his tax declaration.

7. In order to determine the net taxable value of an inheritance, the following are deducted:

A. *Debts owed on the inheritance*

- (a) established debts which are cleared, existing at the time of death and certified by:
 - (i) a public document or court decision subsequent to the death;
 - (ii) a private document providing a precise date before the death;
 - (iii) duly kept commercial records of the deceased or of his creditors;
- (b) dowry obligations entered into by the deceased and not yet discharged;
- (c) sums owed by the deceased in the form of taxes, duties and the like to the State, municipalities or legal persons governed by public law;
- (d) debts on medical expenditure for the deceased during the six months preceding death, if outstanding at the time of death;
- (e) such other debts, and the amounts thereof, as the local tax inspector may justifiably accept.

B. *Other charges on the inheritance*

- (a) the costs of publishing the will, of issuing the list of heirs and of establishing the inventory of the inheritance;
- (b) the costs, recognized by court decision, of having a person declared presumed to be dead;
- (c) expenditure incurred abroad on the handling and probate of the inheritance, to the extent paid from an inheritance which is taxed in Greece;
- (d) funeral expenses;
- (e) charitable bequests.

8. The following are not liable to tax:

- (a) the State and municipalities, churches, monasteries, the community of the Holy Sepulchre, the monastery of Mount Sinai, and legal persons governed by public law (nor are they obliged to submit tax declarations);
- (b) foreign legal persons, provided there is reciprocity;
- (c) foreign natural persons where exemption is provided for by international agreement, subject to there being reciprocity;
- (d) Greek political parties, provided they are recognized by Parliament;
- (e) any person expressly exempted by legal provision.

9. The heir or legatee, or if he is not able to do so his legal representative, is obliged to submit a tax declaration concerning the inheritance.

The declaration must be submitted within:

- (a) six months of the time of death, if the deceased died in Greece;
 - (b) one year of the time of death, if the deceased died abroad or the heirs (legatees) resided abroad at the time of death.
10. The time limit for the submission of the tax declaration begins:
- (a) at the time of death in the case of intestacy;
 - (b) upon publication of the will if there is one;
 - (c) at the times referred to in Articles 7 and 8 of the Law (changing the time of taxation);
 - (d) upon publication of a decision declaring a person to be presumed dead;
 - (e) upon legal representatives, guardians of estates, executors of wills and trustees of bankrupt estates learning of their appointment;
 - (f) upon the recognition of heirs to unclaimed estates;
 - (g) upon the death of a person liable to submit a declaration if he has not done so.
11. The six-month and one-year time limits referred to above may be extended by not more than three months by decision of the local tax inspector if there are serious and reasonable grounds.
12. In the event of failure to submit a declaration, or if one is submitted after the time limit, additional tax is charged at a rate of:
- (a) 75 to 150 % of the difference as compared with the tax as assessed by the tax inspector;
 - (b) 5 % for each month by which the declaration is late, up to a maximum of 50 %, of the tax resulting from the declaration.
13. The tax inspector responsible is the one of the place of residence of the deceased, or of the First Division, Athens, if the deceased lived abroad. However, if the deceased lived abroad but died in Greece, the inspector responsible is the one of the place of death.
14. The Revenue Office responsible is informed of the tax, which is paid in 12 monthly instalments, without interest, if it does not exceed DR 240 000, or eight six-monthly instalments, with interest, if it exceeds that sum, the interest rate being that paid on deposits with the Post Office Savings Bank. If all the tax is paid when the first monthly or second six-monthly instalment is due, a reduction of 15 % is made.
- Ownership of an inherited asset may not be transferred unless a certificate is produced to the effect that the asset has been declared and the appropriate tax has been paid.

II. Tax on gifts and parental provision

(Φόρος δωρεών και γονικών παροχών)

Decree-Law No 118/1973 (*Government Gazette* 202/A) as subsequently amended.

1. The tax is charged on all property acquired by way of gift or parental provision, including:
- (a) property of any kind made over as a gift and located in Greece;
 - (b) movable property made over by way of gift, located abroad and belonging to a Greek national;
 - (c) movable property located abroad and belonging to a foreigner, gift of which made to a Greek or to a foreigner residing in Greece;
 - (d) property transferred before the death of the person concerned to descendants, under a contract for usufruct.

The person liable for tax is the recipient, and the tax is calculated on the market value of the property and the degree of relationship between the recipient and the donor.

Both recipients and donors are classified in the same categories on the basis of the degree of relationship.

In the case of gifts or parental provisions in the form of immovable property located in areas where the objective valuation system applies, the value is taken to be that in which that system results.

2. The tax becomes due at the time the gift deed is drawn up.
In the case of movable property for which no formal document is drawn up, tax is regarded as becoming due at the time when the property is handed over.
By way of exception, tax liability may be put back in time:
 - (a) automatically:
 - (i) in the case of suspensive option;
 - (ii) upon the conclusion of any dispute as to the property;
 - (iii) upon the drafting of the document of receipt of the gift, if there is one;
 - (iv) upon the combination of usufruct with ownership;
 - (v) when the price is paid, in the case of compulsory purchase;
 - (vi) when property held by the State as abandoned or sequestrated is handed over;
 - (b) by decision of the local tax inspector, in the cases specifically provided for in Article 40(2) of Decree-Law No 118/73.
3. The following are not liable to the tax:
 - (a) the State, municipalities, churches, monasteries, legal persons governed by public law, the community of the Holy Sepulchre and the monastery of Mount Sinai. Nor are they required to submit tax declarations;
 - (b) non-profit-making legal persons established or to be established in Greece, provided they are shown to be pursuing charitable purposes;
 - (c) foreign legal persons (non-profit-making and charitable), provided there is reciprocity;
 - (d) foreign nationals where exemption is provided for by international agreement, subject to there being reciprocity;
 - (e) transfers by the State, municipalities or legal persons governed by public law, of movable or immovable property;
 - (f) assistance and once-and-for-all compensation paid by insurance organizations or funds to the widow, children or parents of a deceased insured person.
4. The tax inspector to whom the tax declaration is to be made and who is responsible for the whole procedure is the one for the place where the donor lives.
5. Both parties, the donor and the recipient, are responsible for submitting the tax declaration. If there is no formal deed, it is the recipient who is responsible.
6. The tax declaration is submitted before the deed is drawn up, on the basis of a certified copy of the declaration. In the case of informal gifts, the declaration is submitted before the property is transferred.

III. Special exemptions (inheritance and gifts)

(Ειδικές απαλλαγές (ισχύουν στις κληρονομίες και δωρεές))

In addition to the general exemptions applying to inheritance, gifts and parental provisions (see I.7 and II.3 above), the law provides for additional exemptions for certain categories of taxpayer.

1. Transfers of crop and livestock farming land up to DR 20 million in value and 30 stremmata (8 hectares) in area per recipient are completely free of tax if:
 - (a) the heir or recipient is a child, spouse, parent or sibling of the deceased or donor,
 - (b) the heirs or recipients practise crop or livestock farming as their main occupation, and
 - (c) the land is to be used exclusively for farming for 15 years.
 Over and above this exemption, there is a tax-free allowance on each share of the inheritance of:
 - (a) DR 1 500 000 for heirs in Class I (descendants);
 - (b) DR 1 100 000 for heirs in Class II,
 where at least half of the value of the inheritance consists of agricultural assets.
The same exemptions apply to gifts and parental provisions.

GR 4

2. When a house or an apartment is inherited and the heir or his spouse or dependent children (under age, or up to 25 years if students) have no right of full ownership, usufruct or residence in respect of any other house or apartment to meet their family's housing needs, or any building land in a town of over 3 000 inhabitants or in a tourist area, there is a DR 5 000 000 allowance for the heir plus DR 2 000 000 for each dependent member of his family, even if they are also heirs, if only one house or apartment devolves in full ownership. In no case, however, may the allowance be less than that for a house or apartment meeting, in accordance with the law, the family's housing needs.
3. When full ownership of a whole house, apartment or building plot is transferred by way of parental provision and the above conditions are met, then the value of that provision is reduced by DR 500 000 for the recipient himself and by the same amount for each other dependent member of his family.
If the heir or recipient is handicapped (67 % or more), he is entitled to a further allowance of:
 - (a) for Category 1, DR 375 000 (instead of DR 2 000 000)
 - (b) for Category 2, DR 270 000 (instead of DR 1 100 000)
 - (c) for Category 3, DR 120 000 (instead of DR 362 000)
 - (d) for Category 4, DR 90 000 (instead of DR 262 000)
 - (e) for Category 5, DR 60 000 (instead of DR 130 000).

IV. Prescription

(Παραγραφή)

1. The State's right to levy tax on inheritances, gifts and parental provisions lapses after:
 - (a) 10 years, if a tax declaration was submitted;
 - (b) 15 years, if no tax declaration was submitted.The 10 or 15 years begin to run from the end of the year during which the tax declaration was submitted or the time limit for its submission expired.
Should no tax declaration have been submitted, then no inheritance certificate will be issued for the subsequent 15 years after the 15-year limit has passed, unless a declaration is submitted and the inheritance tax is paid.
2. Irrespective of the above, however, the State's right to levy tax has, by express provision, lapsed in all cases in which tax liability arose on or before 31 December 1971. In such cases there is no obligation to submit a tax declaration.

In the case of land adjoining land belonging to the buyer, the area exempted is increased to 80 stremmas.
4. Decree-Law No 1297/1972
 Article 3(1) of Decree-Law No 1297/1972 provides that no tax or duty is to be levied on mergers and transformations of undertakings, the contribution or transfer of the assets of undertakings which are being merged or transformed, or any instrument or agreement concerning the contribution or transfer of assets or liabilities. Subject to certain conditions, the contribution of real estate to undertakings resulting from mergers or transformations is exempted from real estate transfer tax.

Prescription:

The State's right to levy real estate transfer tax lapses after five years have passed from the end of the year in which the tax declaration was made. The State's right to charge the main and the additional tax should liability arise after exemption is granted, lapses after 15 years have passed from the end of the year in which exemption was granted, even if the case has been terminated in accordance with Article 8(2) and (3) of Emergency Law No 1521/1950 (provisional estimate).

Submission of declaration/payment of tax:

In areas where predetermined, objective valuation applies, the person liable to real estate transfer tax is obliged, when submitting his declaration, to enter in it the objective value of the real estate transferred, on which he pays the corresponding tax. If he disputes this predetermined value, he has 20 days from when he submitted his declaration to appeal to the administrative courts, which will give a ruling on the value on the basis of comparative data.

In other areas (where objective evaluation does not apply) the person liable to tax pays, when he submits his declaration, the full amount of tax corresponding to the value he declares. Subsequently, the tax inspector makes a provisional assessment of the market value of the real estate, whereupon the buyer has the right, within a time-limit of two months from the date of reception of that assessment, to submit a supplementary declaration accepting the tax inspector's assessment and to pay, without any increase or fine, one half of the tax corresponding and the other half in the following month. If he does not submit such a supplementary declaration, then the tax inspector carries out a check to ascertain the value of the real estate, without being bound by his provisional assessment, and then issues the appropriate certificate. Upon being informed thereof, the buyer has 20 days to either agree to it or appeal to the administrative courts.

Additional taxes (Article 9 of the Emergency Law No 1521/1950):

When the amount of tax corresponding to the value declared is more than 20 % less than the amount of tax finally assessed, an additional tax for inaccuracy of 75 % is imposed.

If no declaration is submitted, an additional tax of 150 % of the value assessed is levied.

If a declaration is submitted outside the time-limit, an additional 3 % of the tax owed under the declaration is charged for each month by which the declaration is late, up to a maximum of 50 %.

If the tax inspector finds the description of the real estate to be inaccurate, even if the declaration was made in good faith, an additional tax for inaccuracy of 300 % is imposed.

In areas where objective assessment applies, the above additional tax for inaccuracy is 240 %.

Rates:

When real estate is transferred for a consideration, the tax is assessed on the market or objective value, not on the contract price paid by the buyer. The rates are 9 % on that part of the value up to DR 4 000 000 and 11 % for the part in excess. These rates are increased by 2 %, i.e. to 11 % and 13 % respectively, in areas covered by a fire station. A tax in favour of the municipality is also levied, at a rate of 3 %.

When real estate is divided, the rate is reduced to one quarter of the full rate, and to one half on exchange of real estate of equal value.

Tax on real estate

(Φόρος ακίνητης περιουσίας)

Under Articles 19 to 35 of Law No 1249/1982, tax is levied on real estate situated in Greece existing at 1 January of each year.

Beneficiaries:

The State, which passes the tax on in full to the municipalities.

Tax payable on:

The tax is payable by all natural and legal persons, irrespective of their nationality or place of residence or registration.

Tax payable by:

(a) Any natural person whose real estate exceeds DR 55 000 000 in value.
Where both spouses own real estate, then for each of them the first DR 55 000 000 is not taxed. If one spouse has more than that amount and the other has less or none, exemption applies to their joint allowance (DR 110 000 000).

(b) Any legal person whose real estate exceeds DR 50 000 000 in value.

Declaration to be submitted by:

(a) every natural person in possession of real estate the value of which is more than DR 50 000 000. In the case of spouses, when the total value of the two spouses' real estate is more than DR 100 000 000;

(b) every legal person submitting an income tax declaration, regardless of whether he owns real estate and whether any such real estate is taxed. Legal persons not submitting income tax declarations have to do so for tax on real estate if they own real estate of a value which is more than half the taxable minimum;

(c) any natural or legal person designated by the Tax Inspector.

Real estate of under-age unmarried is divided equally between the father and the mother, if they are jointly exercising parental care. By way of exception, real estate of unmarried under-age children is not included with that of the parents if it came to them by inheritance or gift by reason of death.

The total value of the real estate is reduced by any debts existing at 1 January of the year of taxation for which a mortgage or memorandum of mortgage on the real estate has been drawn up, provided the debts are on loans from the Post Office Savings Bank, the Consignment and Loans Fund or banks, and are shown to be used for the construction, extension or repair of buildings belonging to the person concerned.

For natural persons, the scale is as follows:

Bracket	Tax rates per 10 % bracket	Amount of tax per bracket	Total taxable estate	Total tax
40 000 000	0.3	120 000	40 000 000	120 000
40 000 000	0.6	240 000	80 000 000	360 000
40 000 000	0.9	360 000	120 000 000	720 000
Above	1.2			

For legal persons, flat rate of 1.5 %.

Article 21 provides for exemptions for certain categories of real estate and certain categories of persons.

The tax is assessed on the market value of the real estate and on the actual title to them at 1 January of the year of taxation.

The value is assessed by the tax inspector on the basis of comparative figures concerning transfers of similar assets, derived from contracts and estimates made for the purposes of tax on transfers of real estate, inheritance and gifts, and other estimates.

If the real estate is located in areas where the objective system applies, its value is determined by that system.

The declaration form is submitted in one copy to the tax inspector dealing with income tax, by 25 February. The tax is paid in 10 equal monthly instalments, from March to December. If the person liable pays all the tax at once, 10 % is deducted.

If the declaration is submitted late, an additional tax of 5 % per month (but not more than 50 % of the tax) is charged.

If an inaccurate declaration is submitted, an additional tax is charged of 90 % of the tax which would have been avoided.

If no declaration is submitted, then 150 % of the tax assessed by the tax inspector is charged. Revenue from the tax is transferred to (rural and urban) municipalities, by joint decisions of the Ministers for the Interior and for Finance, after the Central Union of Urban and Rural Municipalities has been consulted.

Passenger vehicles manufactured or assembled in Greece, and likewise those imported with the Customs Tariff classification 87.02 A 2 (transport of persons).

In the case of imported vehicles payment is made at the customs.

Basis of assessment:

For vehicles manufactured in Greece the amount of tax payable is assessed on engine cubic capacity and sale price. For imported vehicles it is assessed on engine cubic capacity and the assumed taxable value.

80 % of the selling price (1 000 cc engine) to
400 % of the selling price (2 500 cc and over).

As regards conventional-technology vehicles, the rates given in the inventory of taxes continue to apply.

Beneficiaries:

Central government and certain autonomous communities (Basque Country and Navarre, Law No 12 of 13 May 1981 on the Economic Agreement with the Autonomous Community of the Basque Country, as amended by Law No 27 of 26 December 1990 and Law No 28 of 26 December 1990 approving the Economic Agreement between the central government and the Comunidad Foral of Navarre).

Tax payable by:

All taxpayers with rights and obligations who have legal personality but are not subject to personal income tax.

Liability can arise:

- (a) through obligations *in personam* in the case of taxable persons resident in Spain (entities incorporated under Spanish law, with their domicile or place of management in Spanish territory, or
- (b) through obligations *in rem* in the case of taxable persons not resident in Spanish territory who obtain income or capital gains in that territory or receive income from an entity resident therein.

Basis of assessment:

As a basic principle, net profits earned plus the changes in assets recorded in the financial year. In addition, the difference between equity capital at the beginning and end of the tax period less additional capital contributions, plus sums withdrawn by members.

In certain cases, indexing methods may be used to determine the basis of the charge.

Exemptions:

Essentially, the central government, the autonomous communities, public corporations, the Bank of Spain, social security entities, the Catholic Church and other legally recognized denominational associations, the Spanish Red Cross, charity foundations and associations, political parties, trade unions, etc.

E 1

Also exempt are capital gains arising from the disposal of physical elements of companies' fixed assets if the total proceeds are reinvested in assets of a similar type and certain conditions are fulfilled.

From 1990:

- Earnings of companies not resident in Spain without a permanent establishment, derived from 'matador' bonds.

From 1991:

- Earnings of non-resident companies derived from public debt securities.
- Interest and capital gains received by Community residents in Spain, under certain conditions. Persons residing in 'tax havens' are excluded from these tax concessions.

Deductions:

The law allows various deductions for profits such as those earned by public administrations other than central government and by the autonomous communities in providing municipal or provincial services; profits arising from the export of books; profits and capital gains accruing to entities operating in Ceuta and Melilla; profits arising from loans received from foreign organizations and banks, without a permanent establishment in Spain, for financing physical investment by Spanish firms, etc.

Arrangements for foreign-based companies:

- Permanent establishments are subject to corporation tax in respect of profits earned in Spain but are allowed to deduct part of the company's management and administrative costs which are attributable to the said establishment.
- Legal persons not resident in Spanish territory which, without a permanent establishment therein, earn taxable income will generally be taxed at a rate of 25 %, except for certain sums made over to the parent company by a Spanish subsidiary, taxed at 14 % and reinsurance transactions, which are taxed at 4 %.

Capital gains accruing to non-residents are taxed at 35 %.

From 1 January 1992, any conveyance of real estate by a non-resident, where the said property has been owned for less than 20 years, will be subject to a withholding tax of 10 %.

Similarly, certain non-resident companies owning real estate in Spain or holding real rights to the same will be subject to a special tax of 5 % on the land-register value of property held in Spain.

A supplementary charge of 25 % will be levied on the income of permanent establishments transferred abroad. Establishments of firms resident in Member States are excluded.

Payment:

Payment of 60 % in three instalments of 20 % on account, with final settlement and refund of any excess where appropriate on the filing of the return, due in the first six months of the year following the company's accounting year.

Rates:

Standard rate: 35 %.

There are other, reduced rates for non-profit-making organizations (25 %), cooperatives (20 %), and non-resident legal persons with no permanent establishment (25 %, 14 % and 4 %).

1 % for collective investment undertakings (Ucits).

25 % for exempt entities.

Special features:

- Consolidated profits scheme for subsidiaries which are more than 90 % owned by the parent companies and in some other situations.
- Special scheme for economic interest groupings, in accordance with the Community rules.
- Cooperatives and other entities in the non-profit-making sector.
- Collective investment undertakings.

Tax incentives:

These operate as tax credits against net liability for corporation tax and involve a 5 % deduction for investment in new fixed assets. The deduction is 20 % for certain economic activities related to exports, 15 % for expenditure on R&D intangibles and 30 % for fixed assets intended for R&D activities.

To qualify for these incentives, tax payers must meet certain requirements. All incentives are restricted by reference to the net liability, except for the allowance for the creation of a permanent job of PTA 500 000 per extra person per year or PTA 700 000 if the worker recruited is disabled. The latter job-creation incentive was abolished from 8 April 1992 by Royal Decree-Law No 1 of 3 April 1992.

NB: Further deductions from corporation tax liability are possible in the form of:

- relief for double taxation of dividends;
- relief for international double taxation.
- Companies subject to the imputation system whose profits are imputed to shareholders or partners for income tax purposes are not liable corporation tax, but taxable income is computed applying the corporation tax method.

Carry-over of losses:

Tax losses may be carried forward to the following five financial years.

Personal income tax

(Impuesto sobre la renta de las personas físicas (IRPF))

Law No 18 of 16 June 1991 on personal income tax.

Royal Decree No 1841 of 30 December 1991 approving the regulation on personal income tax.

Beneficiaries:

Central government and certain autonomous communities (Basque Country and Navarre, Law No 12 of 13 May 1981 on the Economic Agreement with the Autonomous Community of the Basque Country, as amended by Law No 27 of 26 December 1990 and Law No 28 of 26 December 1990 approving the Economic Agreement between the central government and the Comunidad Foral of Navarre).

Tax payable by:

Natural persons.

NB: Certain firms (asset-holding firms, partnerships in the professions, and firms set up by artists and sportsmen, etc.) calculate their tax base in accordance with corporation tax rules; subsequently, positive tax bases are imputed to resident members in proportion to their holdings in the firm. The share of non-resident members is taxed in accordance with corporation tax rules.

There are two methods of charging income tax:

- liability *in personam*: in the case of persons resident on Spanish territory for 183 days or more or who have the centre of their economic activities on that territory;
- liability *in rem*: in the case of non-residents who have a permanent establishment on Spanish territory and derive earnings from the same.

The taxpayer is the individual: members of a family unit, however, may voluntarily declare their income jointly which entitles them to certain advantages, e.g. the application of a reduced rate.

Basis of assessment:

Liability *in personam*: all income earned by the person liable, plus changes in assets. Valuable transfers covered by succession and gift duty are not included.

The base is divided, as appropriate, into two parts – 'regular', which is subject to the general rates, and 'irregular'.

Liability *in rem*: permanent establishments are taxed on all the income imputed to them; in other cases, all income and changes in assets arising on Spanish territory are taxed.

Exemptions:

There are no exemptions for particular groups of persons.

The following income is exempt: unemployment benefit, severance pay, prizes in the national lottery, lotteries organized by the autonomous communities, the Red Cross and ONCE, major artistic, scientific and literary prizes, public scholarships and certain other, less important, items.

Deductions:

Certain deductions from either the base or the tax due are allowed:

1. The costs necessarily incurred in earning professional and entrepreneurial income, estimated under the scheme for the direct determination of the tax base, can be deducted. In the case of professional income, a 1 % 'flat-rate' deduction is also available for costs which are difficult to itemize.

As regards investment income, the basic exemption is PTA 25 000 and, in general, only administrative and custody costs are deductible.

In the case of income from property for own use, the interest on loans of up to PTA 800 000 and liability for the tax on immovable property can be deducted. If the property is sold or let, the costs necessarily incurred in earning the income and the deterioration of the property or the rights from which the income is derived can be deducted; however, the deduction of interest may not result in a negative balance.

In the case of employment income, trade-union subscriptions, social security contributions, contributions to similar organizations, and a flat 5 % up to a maximum of PTA 250 000 are deducted. The latter is increased to 15 %, subject to a ceiling of PTA 600 000, in the case of disabled taxpayers.

2. Various kinds of deduction can be made from the tax due, either to allow for a person's family status, number of children, sickness costs, life insurance premiums, etc., or to encourage home-ownership, saving, reduce double taxation of dividends (foreign taxes), allow for income from Ceuta and Melilla and for income from employment, etc.

Married couples:

Only individuals are liable. Married couples may declare all their income jointly, in which case they may enjoy certain advantages, e.g. a reduced rate.

Non-residents:

Income from public debt securities and 'matador' bonds, and interest from and asset changes in movables, obtained by non-residents in Spain, will be exempt, provided they are not obtained by persons resident in tax havens and the recipient is a Community resident.

In other cases, the above income is liable to tax *in rem*. The income of permanent establishments is taxed at 35 %, and other income at 25 %, except changes in assets and other items where special rates apply.

Collection:

Employment, investment and professional income is subject to deduction at source, the first in accordance with a table which takes account of the income received and the family situation of the taxpayer, the second at 25 % and the third at 15 %. Businessmen and professional persons pay tax in instalments.

The taxpayer must declare and settle his personal income tax annually, in May/June, and may divide payment into two parts: 60 and 40 % of the tax due.

Rates:

These are on a progressive scale, with 17 bands from 20 to 53 %, the top rate applying to income in excess of PTA 9 550 000. The first PTA 400 000 is taxed at the rate of zero; liability may not exceed 70 % of the taxable amount when combined with liability under wealth tax.

Where taxpayers pay tax jointly, rates are divided into 16 bands from 20 to 53 %, the top rate applying to income in excess of PTA 11 million. The first PTA 800 000 is taxed at the rate of zero.

Special features:

mechanically-powered vehicles tax;
 - optional establishment taxes: tax on construction, installation and works,

In addition to these tax items there is a new public-law category of non-tax revenue: public charges.

All the items referred to came into force on 1 January 1990, except the economic activities tax, which came into force on 1 January 1992.

Special features:

In the case of farms, whether operated on a private or corporate basis, average receipts, inclusive of all taxes and calculated over two consecutive years, determine the system applicable in the following year. Where such receipts do not exceed FF 500 000 the flat-rate system is applied, where they are between FF 500 000 and 1 000 000 the simplified normal system of taxing actual profits is applied, and where they are over FF 800 000, the normal system is applied.

The profits of industrial and commercial enterprises with a turnover of under FF 70 000 are determined by applying a 50 % deduction to revenue (system applicable to income earned as from 1992). Such enterprises are taxed under the flat-rate system where their turnover is between FF 77 000 and FF 150 000 (supplies of services) or FF 500 000 (buying/selling). For the years prior to 1992, enterprises with a turnover of less than FF 70 000 are also taxed under the flat-rate system. Enterprises are taxed under the simplified normal system where their turnover is between FF 150 000 and FF 1 000 000 (supplies of services) or between FF 500 000 and FF 3 500 000 (buying/selling). They are taxed under the normal system where their turnover exceeds FF 1 000 000 (supplies of services) or FF 3 500 000 (buying/selling).

Taxable income may in certain be determined according to external evidence (life-style). Persons not domiciled in France but owning, in whatever capacity, one or more dwellings there may be taxed on the basis of an income equal to three times the actual rental value of that (those) dwelling(s).

The tax must be paid within one month from when the distributed profits are released for payment.

Rates:

50 % of the net dividend paid to the shareholders in respect of the distributed profits involved (advance payment equal to the amount of 'avoir fiscal' tax credit attached to the distributed profits). In practice the advance payment is equal to one-third of the overall sum (including 'avoir fiscal') which the company decides to count as items which, when distributed, give rise to the advance payment.

Special features:

The 'avoir fiscal' to which shareholders are entitled for dividends distributed by French subsidiaries and the tax credits attached to the proceeds of foreign subsidiaries are counted for the advance payment which might be due when these proceeds are distributed.

(Imposition du tabac)

Articles 564, point 10, to 575 A and 575 B of the General Tax Code; Law No 76-448 of 24 May 1976; Decree No 76-1324 of 31 December 1976; Order of 31 December 1976; Article 25 of the 1979 Finance Law; Decree No 80-262 of 3 April 1980; 1992 Finance Law.

Beneficiary:

The State.

Duty payable on:

Consignment of tobacco to distributors.

The Monopoly Administration of Tobacco and Matches (Seita) has exclusive production, import and wholesale marketing rights for products directly originating from non-Member States (cigars, cigarettes, smoking tobacco, chewing tobacco and snuff). The retail sales monopoly is held by the revenue authorities which exercise it through retailers designated as their agents and required to pay royalties.

The importation and wholesale marketing of manufactured tobacco from Member States of the European Economic Community may be carried out by any natural or legal person who has obtained an identification entitling him to exercise such activities.

Rates and basis of assessment:

Manufactured tobacco is subject to a consumption duty based on the retail sales prices which are fixed by ministerial decree, the rates of which vary according to the category of tobacco. As far as cigarettes are concerned, this duty is calculated in accordance with Article 8 of Council Directive 72/464/EEC of 19 December 1972.

For cigarettes in the most popular price category within the meaning of this directive, the consumption duty is calculated by, applying the standard rate to the retail sales price. The amount obtained in this way is called 'basic duty'.

For other cigarettes the consumption duty is calculated by applying to their retail sales price a rate equal to 95 % of the standard rate and by adding to the amount obtained in this way a specific fixed share equal to 5 % of the basic duty. The total amount calculated in this way may not be lower than a minimum levy fixed per thousand units.

Corporation tax

Corporation Tax Act, 1976 (incorporating, as necessary, various provisions of the Income Tax Act, 1967, as amended by the Finance Act, 1967 and subsequent Finance Acts).

Beneficiary:

The central government.

Tax payable by:

Companies. For this purpose a company is defined as any corporate body but does not include a local authority, health board or vocational education committee.

Basis of assessment:

All profits (including income and chargeable capital gains other than gains from disposals of development land), with the exception of dividends and other distributions received from other resident companies, arising in a company's accounting period.

A company not resident in Ireland is charged corporation tax only if it carries on a trade in Ireland through a branch or agency and then only, broadly speaking, on any income or chargeable gains (other than gains from disposals of development land) attributable to the branch or agency.

Exemptions:

Credit unions, lotteries, the Custom House Docks Development Authority, Bord Gáis, the Housing Finance Agency, the Pension Board and the Voluntary Health Insurance Board are exempt on all of their profits. Charitable companies, companies promoting amateur or athletic games or sports, friendly societies, agricultural and fishery societies, harbour authorities, trade unions, trustee savings banks, agricultural and fishery cooperatives, approved superannuation funds, mutual trading companies, Nitrigin Éireann Teoranta and non trading companies are all exempt from corporation tax on income which fulfils certain statutory requirements.

Special reliefs:

Companies which export certain manufactured goods and provide certain services related to exporting are entitled to relief from corporation tax in respect of the income from such business. Companies which export goods manufactured or packaged or handled at Shannon Airport or which provide certain services connected with the use or development of Shannon Airport are relieved from corporation tax in respect of the income from such operations.

These reliefs ceased to be available after 31 December 1980, on the introduction of the '10% scheme' of relief from corporation tax, except to companies which had established entitlement to the relief before 1 January 1981, and which may accordingly continue to benefit therefrom until their period of entitlement expires.

IRL 2

With effect from 1 January 1981, until 31 December 2010, profits from manufacturing carried on within the State are charged to corporation tax at an effective rate of 10%. This relief (known as the '10% scheme') extends also:

- to profits of certain service activities carried on at Shannon Airport effective up to 31 December 2005;
 - with effect from 13 April 1984, to profits from the provision of certain computer services eligible for a grant from the Industrial Development Authority;
 - with effect from 1 January 1987, to profits from certain shipping activities;
 - with effect from the date specified in the certificate, to profits of companies certified by the Minister for Finance to be providing certain international financial services in the Custom House Docks Area of Dublin effective up to 31 December 2005;
 - with effect from a date to be appointed by the Minister for Finance, to the profits of companies licensed as Special Trading Houses in respect of the export of goods manufactured in the State;
 - with effect from 9 July 1987, to profits from the cultivation of plants by micro-propagation.
- Relief for increases in stock values is available in respect of the trade of farming. The relief consists broadly of allowing a deduction in computing trading profits of 110% of the amount of the increases in value of trading stock and work in progress at the end of an accounting period over and above the opening value.

Deductions:

Expenses incurred for the purpose of the business. Capital allowances on the depreciation of certain assets (for example, certain industrial buildings and items of plant and machinery) are given.

Collection:

Annual assessment of profits arising in a company's accounting period.

Corporation tax is payable in a single instalment six months after the end of the accounting period where such period ends on or after 28 February 1985.

On payment of a dividend on or after 9 February 1983, an Irish resident company is required to pay an amount of corporation tax, known as advance corporation tax, equal to the amount of the tax credit in respect of the dividend. Full advance corporation tax is payable in respect of dividends paid on or after 1 January 1986. A payment of advance corporation tax can be set off against the company's main corporation tax liability on its income.

Rates:

The normal rate is 40%.

A special temporary rate of 10% applies to manufacturing industry in general.

Capital gains (except gains from disposals of development land) are effectively chargeable to corporation tax at the rates appropriate to such gains.

Special features:

A surcharge at the rate of 20% is levied on the undistributed investment or estate income of a close company (broadly a company under the control of not more than five persons or under the control of directors) or on the income from any source of a close company which provides professional services or engages in certain other types of activities.

The losses of a member of a group may be set off against the profits of another member. Where payments of dividends are made between members of a group the company receiving the dividends and the company paying them may jointly elect not to make a payment of advance corporation tax. Subject to certain exceptions a resident shareholder is entitled to a tax credit (representing part of the corporation tax paid by the company). This tax credit may be set against his income tax liability.

Inheritance and gift tax

Capital Acquisitions Tax Act, 1976, and amendments thereto by subsequent Finance Acts.

Beneficiary:

The central government.

Tax payable on:

Gifts and inheritances taken by the same donee/successor from any disponent.

Tax payable by:

Donees, successors, trustees, personal representatives.

Basis of assessment:

Where the disponent, in relation to gifts, is domiciled in Ireland at the date of the disposition, or in certain cases, at the date of the gift, or, in relation to inheritances, was so domiciled at his death, or where, in relation to both, the proper law of the settlement is Irish, the taxable gift or taxable inheritance consists of the whole of the property taken by the donee/successor. In any other case, only the property situated in Ireland is liable to tax.

In general, the taxable value of property comprised in a taxable gift or a taxable inheritance is its market value, after deducting liabilities, costs and expenses. Rules are provided for valuing limited interests, that is, interests less than absolute interests.

The tax chargeable on the taxable value of the latest taxable gift or taxable inheritance taken by a beneficiary is as follows:

- (a) the tax computed under the table of rates on the aggregate of the taxable values of that latest taxable gift or taxable inheritance plus the taxable values of all taxable gifts and taxable inheritances (if any) previously taken by that beneficiary from any source on or after 2 June 1982, less, if any;
- (b) the tax computed under that table on the aggregate of the taxable values of all taxable gifts and taxable inheritances taken by that beneficiary from any source on or after 2 June 1982, but excluding the taxable value of that latest taxable gift or taxable inheritance.

Deductions:

- 55 %, up to a maximum of IRL 200 000, of the market value of agricultural land and buildings taken by a donee/successor who is a farmer.
- 55 %, up to a maximum of IRL 200 000, of the market value of growing trees taken by any donee/successor.
- 50 %, up to a maximum of IRL 50 000 for a shared house inhabited by elderly brothers and sisters.

Exemptions:

These include:

- the first IRL 500 of the taxable value of gifts from any one donor in any one year;
- normal and reasonable expenditure by a disponent on his immediate family;
- property taken by charities;
- heritage property, that is, houses, gardens, articles of national scientific, historic or artistic interest which fulfil certain conditions;
- payments and pensions to retired employees;
- certain government securities and interests in certain unit trusts when taken by foreigners;
- inheritances and gifts taken by one spouse from the other;
- monies payable under a qualifying insurance policy to the extent that such monies are utilized for the payment of inheritance or gift tax.

Collection:

Tax to accompany a mandatory self-assessment of tax made by the taxpayer.

Rates:

The table of rates is as follows:

Portion of aggregate of taxable values	Rate of tax (%)
The threshold amount	Nil
The next IRL 10 000	20
The next IRL 40 000	30
The next IRL 50 000	35
The balance	40

The threshold amounts are determined by the relationship of the beneficiary to each disponent from whom he takes a taxable gift or taxable inheritance included in any aggregate. The three current thresholds are:

- IRL 166 350 – children and parents in certain circumstances;
- IRL 22 180 – brothers, sisters, uncles, aunts, nephews, nieces;
- IRL 11 090 – others.

Discretionary trust tax

Finance Acts, 1984 and 1986.

Beneficiary:

The central government.

Tax payable on:

Property subject to a discretionary trust on 25 January 1984, or becoming subject to such a trust on or after that date. However, the charge to tax will not arise until the disponent is dead and, if the objects of the trust include the disponent's spouse, children and certain grandchildren, until none of these objects is under the age of 25 years.

Tax payable by:

The trustees of the trust.

Basis of assessment:

The property subject to a discretionary trust on 25 January 1984, or becoming subject to such a trust on or after that date, is liable to a one-off charge of 3% on the market value of such property. In addition, there is an annual charge of 1% on the market value of property contained in such a trust on 5 April in each year commencing with the year 1986.

Exemptions:

Discretionary trusts created exclusively, *inter alia*:

- for Irish charitable purposes;
- for the benefit of improvident or incapable individuals;
- for the upkeep of heritage houses or gardens.

Capital gains tax

Capital Gains Tax Act, 1975, as amended by the Corporation Tax Act, 1976, and the Capital Gains Tax (Amendment) Act, 1978, and amendments thereto by the Finance Act, 1977, and subsequent Finance Acts.

Beneficiary:

The central government.

Tax payable by:

Persons, including companies, resident or ordinarily resident in Ireland on chargeable assets wherever situated.

Persons neither resident nor ordinarily resident in respect of chargeable gains accruing from the disposal of the following assets situated in Ireland:

1. land in the State;
2. minerals in the State or rights, interests or other assets related to minerals or to the searching therefor;
3. assets of a business carried on in the State;
4. rights in the Irish part of the Continental Shelf area.

Persons wholly or partially exempted include local authorities and certain other public bodies, charities, superannuation funds, registered trade unions, friendly societies, etc.

Tax payable on:

Gains on the disposal of chargeable assets. Chargeable assets, subject to certain exemptions, comprise all forms of property including incorporeal property such as debts, options, copyright, goodwill and interests in or rights over any property real or incorporeal. 'Disposal' includes part-disposal and also includes a transfer by sale, exchange or gift. 'Disposal' does not include the passing of assets on death.

An individual not domiciled in Ireland is liable on gains on assets situated outside Ireland and the United Kingdom only to the extent that the gains are remitted to Ireland.

Basis of assessment:

Chargeable gains less allowable losses in a year of assessment or in an accounting period in the case of a company.

Exemptions:

The main exemptions are:

- (a) an individual's principal private residence with restricted relief where the gain is inflated due to development potential of the property;

IRL 5

- (b) wasting chattels, that is, tangible movable property, excluding currency, with a predictable life of less than 50 years;
- (c) life assurance policies;
- (d) Irish Government securities;
- (e) securities of local authorities and certain State-sponsored bodies;
- (f) betting, lotteries and sweepstakes.

Special reliefs:

The first IRL 1 000 of an individual's net gains in any year of assessment are not chargeable. In the case of a married couple living together, the first IRL 2 000 of net gains is exempt.

A chattel disposed of by an individual for a consideration not exceeding IRL 2 000 is not chargeable and where the consideration exceeds IRL 2 000 the liability is not to exceed half the difference between the consideration and IRL 2 000.

With respect to an individual aged 55 years or more who disposes of the whole or part of his farm or business:

- (a) if the disposal is to his child it is not chargeable;
- (b) if the disposal is outside his family and the consideration does not exceed IRL 200 000 it is also not chargeable;
- (c) if the disposal is outside the family and the consideration exceeds IRL 200 000 the liability shall not exceed half the difference between the consideration and IRL 200 000.

Where a person disposes of business assets and reinvests the proceeds in other business assets the charge is deferred.

Computation of gains:

In general capital gains or losses are computed on the basis of the consideration received on the disposal or part disposal of the asset (or the market value if there is no consideration or the transaction is not at arm's length) less the base cost of the asset (or a portion thereof if a part-disposal) together with expenses incidental to the disposal. The base cost, that is, the cost of the asset and any incidental acquisition expenses, is adjusted upwards by reference to the increase in the consumer price index between the year of assessment in which the asset was acquired and the year in which it was disposed of. This adjustment will not operate to convert a monetary gain into an allowable loss or to inflate a monetary loss.

Where an asset was already owned on 6 April 1974 (the date of commencement of capital gains tax) the base cost is deemed to be the market value allowable on that date. In the case of disposals of development land the inflation adjustment is subject to certain restrictions. Any part of the consideration which is already chargeable to income tax is excluded and, similarly, the allowable expenditure is reduced by any amount which is or would be allowable as a deduction for income tax.

Where a disposal of an asset which was acquired on death is made by the successor the base cost of the asset is deemed to be its market value as at the date of death.

Collection:

By assessment.

Rates:

Authorized unit trusts and certain collective instrument undertakings are exempt from capital gains tax, the charge being levied on the investors when the gains are distributed to them.

Carry-over of losses:

Normally allowable if a gain on the same transaction would have been chargeable. Losses are set primarily against gains of the same year. The excess, if any, is carried forward and set off against any gains of a future year. Losses cannot be carried back to an earlier year except those accruing to an individual in the year of his death which may be carried back and set off against the gains of the three preceding years.

Special cases:

Special rules apply in the following cases:

- a) disposals to the State, charities and certain other bodies;
- b) disposal of property subject to a lease and the grant of a lease at a premium;
- c) bonus and rights issues and other reorganizations of share capital;
- d) company amalgamations and conversion of securities;
- e) transfer of business to a company;
- f) capital distribution by a company to a shareholder.
- g) certain works of art, which have been loaned for at least six years to a recognized gallery.

Rates:

Progressive by income bracket according to the following table:

<i>Income (in million LIT)</i>	<i>% rate</i>
Up to 6	10
from 6 to 12	22
from 12 to 30	26
from 30 to 60	33
from 60 to 150	40
from 150 to 300	45
from 300	50 ¹

Special features:

The taxpayer's total income also includes 50% of incomes from the property of minor children subject to a legal usufruct on the part of the parents (the other 50% is attributed to the other spouse, where there is one), and incomes fully available to the taxpayer, or which the taxpayer is entitled to administer without rendering accounts.

Income from property is normally assessed according to the cadastral system.

Tax credits are available in respect of:

- tax paid abroad;
- dividends distributed to residents by companies in Italy, to the extent of $\frac{9}{16}$ of the profits taken into account when assessing the member's liability;
- cash registers in the case of traders required to purchase such machines.

System of separate taxation:

(Regime della tassazione separata)

The tax is applied separately to certain categories of income not comprising profits from business (capital gains resulting from the winding-up or sale of businesses; arrears of emoluments; payments of seniority or social insurance allowances due on termination of activity as representative or consultant on a continuing basis, etc.).

In general, the tax is assessed at the rate applicable to half the taxpayer's total net income for the two years preceding that in which it becomes payable.

For separation or redundancy payments, the taxable amount is calculated by deducting from the total amount LIT 500 000 for each year worked. The rate of tax to be applied is the figure obtained from dividing the said net amount by the number of years worked and multiplying the result by 12.²

System of substitutive taxation:

(Regime della tassazione sostitutiva)

For natural persons or partnerships whether resident or not, withholding tax is applied to the following items of income, in relation to which no further liability arises:

¹ DL No 69 of 2 March 1989 (Law No 154 of 27 April 1989).

² Law No 482 of 26 September 1985.

- interest, bonuses and other forms of yield from bonds and similar securities. Rates: 6.25 %, 10 %, 10.8 %, 12.5 %, 20 %, 21.6 % or 25 % according to category. In the case of interest owed by persons resident abroad, withholding tax is applied at the same rate.¹

Withholding tax is not applied to interest, bonuses and other income arising from bonds and similar securities which are exempt from income tax;

- interest, bonuses and other forms of yield arising from bank and post-office deposits and current accounts. Rate: 30 %. In the case of debtors resident abroad, withholding tax is applied at the same rate;²
- proceeds other than from securities; winnings from games of chance or skill, prizes from competitions, winnings from football pools and betting. Rate: 10 %, 20 % or 25 % according to category.

A tax deduction at source of 18 % (in settlement of liability) applies to income accruing from 'atypical securities', which are issued by non-residents and the certificates attaching to which are placed in the territory of the State.

System of deduction at source:

(Regime della ritenuta di acconto)

This system, in fairly general use, is applied to the following items: income from employment and earnings ranking as such; income from self-employment; and income from capital.

Carry-over of losses:

Not permitted for natural persons. However, losses from business, artistic and professional activities can be set off against other items of income within a given financial year.

Beneficiary:

The State.

Tax payable by:

Companies with share capital, private companies (limited liability partnerships), limited liability companies, cooperative societies, mutual insurance societies and all other public or private associations whether or not exclusively or primarily engaged in a commercial activity.

¹ Consolidated income tax code, which has been in force since 1 January 1988.

Basis of assessment:

Total net income, comprising net profits as shown in the profit-and-loss account, or the statement of the company's income. Profits already subject to withholding tax are not included in the base of assessment. Non-commercial resident companies and non-resident companies with a permanent establishment in Italy which carry out commercial activities covered by separate accounts are authorized by law, on certain conditions, to keep simplified accounts.

Exemptions and concessions:

The following items are exempt:

- income from buildings belonging to the Holy See and used for worship;¹
- income from land and buildings belonging to local public bodies and reserved for communal use;
- income arising from commercial activities carried on in connection with party political campaigns;
- incomes of agricultural cooperatives, small-scale fisheries cooperatives, or labour and production cooperatives (*produzione e lavoro*), under certain conditions.

The tax on incomes of legal persons is reduced by half for regions, provinces, municipalities, chambers of commerce and their affiliates, State enterprises, land reclamation syndicates, charity and welfare institutions and educational institutions.

Non-resident companies and associations:

All companies and other associations of whatever kind, whether constituting legal persons or otherwise and not having their registered offices or administrative headquarters or carrying on their principal activities in Italy, are liable to the tax on incomes of legal persons. Total taxable income of companies concerned comprises only those items accruing in Italy, together with capital gains or losses relating to goods used for or in any way connected with commercial activities pursued in Italy, even though such activities are not carried on through permanent establishments.

Collection:

By direct payment to the tax collector's office within the period for filing a return. By the fifth month after the end of the accounting year a payment on account must be made against the tax due for the following year, of an amount equal to 39% of the tax due for the preceding period. By the 11th month, a further payment on account of 59% must be made.² Collection may be by means of assessment books on certain conditions.

Rate:

36% on total taxable income.

¹ Law No 121 of 25 March 1985.

² DL No 69 of 2 March 1989 (Law No 154 of 27 April 1989).

Special features:

A tax credit in respect of income accruing abroad is granted for the purposes of this tax as well.

Carry-over of losses:

Up to five years.

Profits distributed by companies:

Profits distributed by companies are subject to the following deductions at source:

- (a) Profits paid in any form and under any name by limited companies and limited partnerships by shareholding and by limited liability companies, whether or not cooperatives, including mutual insurance companies:

The withholding tax of 10 % constitutes payment on account of personal income tax and corporation tax. Bonus issues, scrip issues and free increases in the nominal value of shares are not subject to withholding tax.¹ The tax deduction at source of 12.50 % applies to profits distributed by cooperative societies (limited guarantee rural and craft cooperatives) to individual shareholders, on whatever date the payment was decided, but there is no deduction at source on profits paid by popular cooperative banks.

In the case of non-residents, withholding tax is charged at a rate of 32.4 % of the profits distributed. However, non-residents are entitled to a refund of up to two-thirds of the withholding tax where tax has been paid abroad on the same profits and no further liability arises.²

- (b) Profits paid on savings shares:

The deduction of 15 % constitutes settlement of liability; however, holders of registered savings shares may opt for deduction of a payment on account of 10 %. This option is open only to resident taxpayers holding savings shares registered in their own names; non-residents are subject to the 15 % deduction in settlement of liability.

- (c) Profits on foreign securities:

A deduction of 10 % constituting a payment on account is applied to profits from foreign securities; the application of the deduction depends on the date when the foreign dividends actually become available to an Italian bank for payment, not on the date when the dividends were agreed, as the company paying the dividends is established abroad.

Members of limited liability companies (companies limited by shares, limited partnerships, limited liability companies, cooperative societies and mutual insurance companies) which have their registered offices or administrative headquarters or their main activities in Italy, may claim a tax credit equal to $\frac{9}{16}$ of the profits taken into account when assessing the liability of the legal person in his capacity as a shareholder.

Local income tax and communal tax on appreciation of immovable property may be deducted when assessing the corporate liability.

Tax payable to:

The financial authorities through the registry offices which are responsible for assessment and collection of the tax.

Beneficiary:

Municipality where immovable property subject to the tax is situated.

Tax payable by:

Persons transferring against consideration or persons to whom is transferred free of charge, *inter vivos* or *mortis causa*, the ownership of or rights *in rem* to immovable property; also, companies, public service and private bodies, associations and organizations, for each period of 10 years from the date on which ownership, or other rights *in rem*, was acquired.

Basis of assessment:

The difference between the value of the property at the time of transfer or at the end of the 10-year period, on the one hand, and its value at the time of purchase or previous periodic taxation plus the costs incurred on purchase and the cost of any construction or conversion arising during the period taken as a basis for calculating the taxable appreciation in value, on the other.

Exemptions and reductions:

The tax is not applicable to appreciation in the value of:

- immovable property transferred free of charge, either *mortis causa* or *inter vivos* to the central government, regions, provinces, municipalities and their associations which possess legal personality;

Rates:¹

Tax is levied on scales of taxable appreciation established with reference to certain parameters. The reference parameter is an amount equal to the initial value of the property multiplied by the number of years in the appreciation period,² plus costs incurred on purchase and any construction costs multiplied by the number of years that have elapsed from the date on which such costs were incurred to the date of sale or transfer of the property, or to the end of the 10-year period.

The actual rates are set by the municipalities within the following limits:

- (a) 3 to 5 % on capital gains of up to 20 % of the reference parameter;
- (b) 5 to 10 % on capital gains between 20 and 50 % of the reference parameter;
- (c) 10 to 15 % on capital gains between 50 and 100 % of the reference parameter;
- (d) 15 to 20 % on capital gains between 100 and 150 % of the reference parameter;
- (e) 20 to 25 % on capital gains between 150 and 200 % of the reference parameter;
- (f) 25 to 30 % on capital gains over 200 % of the reference parameter.

¹ For 1999, the top rate will continue to be applied in all municipalities and for each band in the scale of taxable capital gains.

² Years elapsing between the date of purchase or the reference date and the date of sale or transfer of the property, or the end of the 10-year period; fractions of years in excess of six months count as full years.

Beneficiary:

The State.

Tax payable by:

All individuals whose domicile for tax purposes or usual place of residence is in Luxembourg or who receive taxable income there.

Basis of assessment:

Total net income, less special expenses. Total net income is calculated by taking total net income, determined separately for each of eight categories of income; losses made in one category of income may be set off against net income from other categories. There is a special scheme for capital gains realized in immovable property in the case of an inheritance, and for certain types of extraordinary income.

Exemptions:

These include:

- Payments in cash from legal insurance against sickness and accidents.
- Certain allowances (e.g. family allowances).
- Certain types of pension (e.g. war pensions).
- Interest on certain types of government loan.
- Capital received from payment of a life insurance.
- Income from a savings bank account or from interest on bonds: LFR 60 000 per year.
- Extra payments of wages for overtime, work at nights, on Sundays and public holidays, under the conditions and within the limits prescribed by regulation.
- Gifts offered by employers to employees, under the conditions and within the limits prescribed by law.

Deductions:

- Special expenses:
 - (1) special expenses covered by the flat-rate minimum (mainly interest on debts, insurance premiums); a personal allowance of LFR 18 000 is granted, where special expenses are no higher than this amount;
 - (2) special expenses which may be deducted in addition to the personal allowance (mainly obligatory social insurance contributions, certain donations).
- Reduction for extraordinary costs.
- Reduction for income from farming.
- Reduction for retired persons.
- Reduction for non-business expenses.
- Reduction for a profit made in the transfer or termination of a one-man business.
- Compensatory reduction for wage-earners.
- Reduction for investment in securities (temporary: 1989-92).
- Reduction for income not subject to withholding tax.
- Reduction for audiovisual investment.
- Reduction for venture-capital investment.

Married couples:

Incomes of married couples are treated as a single income for tax purposes and tax due is determined by the 'splitting' system.

Non-residents:

In general the method of assessing and collecting the tax due is the same as for resident taxpayers except that only income accruing in Luxembourg is taxable, and no deduction is made for certain special expenses or for extraordinary costs.

Income tax, for non-residents only, is collected by deduction at source in the case of income from self-employed literary and artistic activities (10% of gross receipts), income derived from the leasing of licences and patents (12% of gross receipts), and company directors' fees (8,2% of gross fees).

Collection:

Tax is payable annually on the basis of tax returns. Tax is paid in quarterly instalments in advance and withheld at source on certain forms of income (income from employment, pensions and annuities, income from capital).

The advance payments and the tax withheld at source are deductible against final income tax liability.

Any overpayment of tax is refunded in some cases. Tax withheld on wages and pensions is adjusted annually, when the tax is not calculated by assessment.

If tax is not paid on time, interest is charged at a rate of 1 % per month.

Rates:

- Taxpayers are divided into three classes according to the number of their dependants.
- There is a graduated scale with 18 income bands, to each of which corresponds a rate of tax ranging from 0 to 50 %; application of the rates varies according to the class to which the taxpayer belongs. For the first band from 0 to LFR 229 200, the rate is 0 %; for the second band from LFR 229 200 to LFR 334 200, the rate is 10 %. The rate then increases by 2 % per band. For income exceeding LFR 1 309 800, there is a uniform rate of 50 %.
- This basic scale is adjusted periodically to variations in the weighted consumer price index.
- As regards extraordinary income, the rates applied range from 10 to 34 %.
- In principle, non-residents, whose tax is calculated by assessment, are taxed under the Class I tariff at a rate not less than 15 %.

To provide resources for the unemployment fund, the liability for personal income tax is increased by 2.5 % of the amount payable under the above rules.

Carry-over of losses:

Losses suffered by business firms, farmers, foresters or persons practising a liberal profession may be carried forward indefinitely, provided the persons running the enterprise or other persons involved keep regular accounts.

The tax is to be withheld by the employer or the pension fund for the account of the worker or the pensioner in accordance with tables of monthly or daily amounts which are drawn up on the basis of the general scale for personal income tax and allow for the standard deductions for flat-rate travelling costs (LFR 15 600 a year) and other costs of acquisition (LFR 21 000 per year for workers in paid employment and LFR 12 000 per year for persons in receipt of pensions), for special expenses (LFR 18 000 per year), the compensatory reduction for wage-earners (LFR 24 000) and the reduction for retired persons (LFR 24 000 per year), and the extra income tax charge for the re-employment fund (2.5 %).

THE NETHERLANDS
Nederland

Personal income tax

(Inkomstenbelasting)

Income Tax Law, 1964 (Stb. 519) as last amended by the Law of 19 December 1991.

Beneficiary:

The State.¹

Tax payable by:

All individuals resident in the Netherlands, and non-residents deriving income from Dutch sources (see under Corporation tax, under 'Non-residents').

Basis of assessment:

For residents:

Total income from all sources (business profits with a number of additions or deductions plus net income from work, from capital or from certain periodical payments, plus capital gains on the sale of securities forming a substantial participation in a limited company) less amounts set aside for the 'old-age reserve' and plus amounts deducted from the 'old-age reserve', less the total amount of relief for the self-employed and any assisting-spouse deduction, personal liabilities, extraordinary expenses, deductible gifts, allowances on interest and on dividends and deductible losses from certain other years, plus negative personal liabilities and rental for the residence inhabited by the owner/taxpayer. Certain costs also with a private aspect are not deductible or are deductible only in part, e.g. food and drink, entertainment.

For non-residents:

Total income from Dutch sources (business profits made in the Netherlands plus net income from an occupation which is or was carried on in the Netherlands, from real estate located in the Netherlands, from mortgages secured on such real estate, from entitlements to profit (other than based on securities or occupation) and in particular from securities issued by limited companies located in the Netherlands in cases where the non-resident concerned has a substantial participation, plus capital gains on the sale of such securities forming a substantial participation, plus the right to periodical payments and allowances made by Dutch public corporation) less the assisting-spouse deduction, allowances on dividends and deductible losses from certain other years, plus negative personal liabilities and rental for the residence inhabited by the owner/taxpayer. Certain costs also with a private aspect are not deductible or are deductible only in part, e.g. food and drink, entertainment.

¹ Through the provincial fund, the provinces received 0.921% of the revenue from almost all taxes in the Netherlands in 1990. Through the municipal fund, the municipalities received 11.46% of the revenue in 1990.

Exemptions:

Income from the following sources is not deemed to form part of the basis of assessment:

- appreciation of farming land unless the appreciation has resulted from farming activities, or where the land will be used for purposes other than farming;
- profits from forestry undertakings;
- reorganization profits resulting from creditors abandoning unsatisfied claims, in so far as these profits exceed total losses incurred in the current year or carried over from preceding years;
- an allowance of HFL 20 000 in cases where businesses are partly or wholly transferred or wound up; an allowance of HFL 45 000 where businesses are wholly wound up by entrepreneurs aged 55 or over;
- benefits from savings premiums resulting from certain laws on savings applying to lower-income groups;
- benefits from certain pensions and certain indemnities arising on the termination of a profession.

Investment:

There is an investment allowance (deduction of profits) in respect of investments in business assets of up to HFL 471 000. For investments of up to HFL 53 000, the allowance is 18 %. For every additional HFL 52 000 in investment, the figure falls by two percentage points. Certain investments may be excluded from the scope of the allowance. If the business assets are disposed of within five years, part of the investment allowance is withdrawn.

There is under certain conditions an accelerated depreciation in respect of investments in business assets, placed on an environment-list (*Milieu lijst*) by the Minister for the Environment.

Equity allowance: in 1992, the equity allowance is equivalent to 1 % of business assets.

Reserve for old age for self-employed persons:

Self-employed resident taxpayers over 18 – under specific circumstances also those under 18 – and under 65 are allowed to deduct a certain percentage of their profits in order to set up an 'old-age reserve'. The contribution to this reserve in 1992 is not more than HFL 17 813 and the reserve may not exceed the book value of business assets. For 1992, 11.5 % of profits up to HFL 62 746 and 10 % of profits over HFL 62 746 may be added to the 'old-age reserve'. During the year when the taxpayer winds up his business, the 'old-age reserve' must be converted into an annuity or tax must be paid on it in general at a proportional rate of 45 %.

Relief for self-employed persons:

In 1992 the amount of the relief is HFL 6 210 for profits up to HFL 80 190 and falls progressively to HFL 4 010 for profits over HFL 90 375.

Individuals starting up in business qualify for extra relief amounting to HFL 2 262 as a rule for the first three years of operation.

Married couples:

Husband and wife are taxed separately on their 'personal income' and 'personal deductions and additions'.

'Personal income' is made up of business profit, income from work (not only present work but also previous work; pension and early-retirement payments) and certain periodic payments in connection with previous work or study. However, income earned by one spouse in assisting the other in the latter's business or activities is attributed to the latter unless both spouses request that the income accruing to the assisting spouse under a written agreement be attributed to the latter and the income amounts to at least HFL 10 450.

'Personal deductions and additions' include amounts set aside for and deducted from the 'old-age reserve', relief for the self-employed, the assisting-spouse deduction, social security premiums, premiums for an annuity and premiums in respect of periodic payments made in connection with invalidity, sickness or accidents as well as the negative personal liabilities associated with the latter. The other components of a married couple's income (such as income from capital, personal liabilities, with the exception of premiums for annuity, and extraordinary expenses) are assessed jointly and attributed to the partner with the higher level of personal income.

Where one spouse assists the other (the entrepreneur) in the latter's business and where no request as referred to above is made, the entrepreneur qualifies for a deduction from income (assisting-spouse deduction) the amount of which is dependent on the extent to which the entrepreneur is assisted in this way.

A husband and wife who live apart permanently or who are not resident taxpayers are assessed quite separately.

Unmarried persons:

Unmarried persons are assessed separately even where they maintain a common household. However, in two cases, one partner in such a household may have income expenditure components attributed to the other:

1. if one partner assists the other in the latter's business, the former's income may, on request, be attributed to the partner being assisted as business profits and the assisting-spouse deduction available for married couples may be claimed;
2. at the request of both partners, their extraordinary expenses may be attributed to one of them.

Children:

The net income of a child under 18 years of age derived from his capital, his personal liabilities and his negative personal liabilities, are added to the income and liabilities of the parent who has authority over the child.

Collection:

1. Personal income tax is levied annually by the tax department. It is assessed on the basis of the taxpayer's declaration. If no such declaration is submitted, taxable income is estimated by the Inspector of Taxes.
2. The following taxes are offset against the final assessment:
 - tax on wages (deducted at source by employer);
 - dividend tax (deducted at source by paying company);
 - tax on games of chance where the winnings form part of income;

NL 1

3. Provisional assessments are also offset against the final assessments.

Rates:

For residents and non-residents whose world income is earned entirely or almost entirely in the Netherlands, there are three income bands over which the taxable amount, i.e. taxable income less the personal allowance, is spread. World income is taxed in 1992 at the following rates: 38.55% (13% tax and 25.55% social security contributions), 50% and 60% (individuals aged 65 or over pay social security contributions totalling 7.3% instead of 38.55%).

For other non-residents the rates are 25%, 50% and 60%. As a rule, every taxpayer qualifies for the tax-free allowance of HFL 5 225, which may be increased by the single-parent allowance of HFL 4 180.

The single-parent allowance may be increased by the supplementary single-parent allowance (ceiling of HFL 3 728) if work (other than housework) is carried out or if there is a child at home who is under 12.

The single-parent allowance is intended for unmarried taxpayers who have lived for more than six months in a household with no one else than a child of their own, a child by marriage or a foster child who is under 27 and is maintained to a substantial extent at their expense.

Married taxpayers or unmarried taxpayers who live with their partners may, on certain conditions, transfer their tax-free allowance of HFL 5 225 to their spouses or partners where they have an income of less than HFL 5 225. The persons to whom the tax-free allowance is transferred then qualify for a tax-free allowance of HFL 10 450, while persons transferring their tax-free allowance qualify for a zero allowance. Married persons living apart permanently are deemed to be single.

Non-resident taxpayers normally qualify for only the general tax-free allowance.

The above amounts are valid for 1992. Indexation takes place each year.

Proportional rates:

45% in the case of certain types of profit and income (e.g. profits made when a business is sold or wound up);

20% in the case of profits deemed to be made on an entrepreneur's death, capital gains on sales of securities forming part of a substantial participation in a limited company;

10% in the case of bonus shares obtained when a limited company issues new capital.

The above proportional rates apply only where income exceeds the first income band.

Carry-over losses:

Losses may be offset against income in the preceding three and following eight calendar years. Under certain circumstances, the period of eight years may be extended indefinitely as regards the losses of an undertaking incurred during the first six years following the setting-up of the undertaking (start-up losses).

- (b) Users of immovable property.

Basis of assessment:

The tax on immovable property can be assessed in two ways:

Corporation tax

(Vennootschapsbelasting)

Corporation Tax Law 1969 (Stb. 469) as last amended by the Law of 12 December 1991 (Stb. 697/698).

Beneficiary:

The State.
(See Note 1, under Personal income tax.)

Tax payable by:

Joint-stock companies, cooperative societies, mutual insurance and credit companies, foundations and other legal persons incorporated under civil law, when they administer an enterprise, funds for common account, and most publicly-controlled industrial and commercial undertakings (in all cases having their headquarters in the Netherlands); foreign legal persons established in the Netherlands or having sources of income analogous to those subject to the income tax applicable to non-residents.

Basis of assessment:

Profits in the widest sense, with a number of additions or deductions. The determination of the taxable profits corresponds largely to the determination of profits taxable under personal income tax, including the deductibility of losses from other years.

Exemptions:

Exempted from corporation tax are:

- legal persons whose activities are of a social or charitable nature or otherwise in the public interest;
- exempted categories of profit are those corresponding to the relevant exemptions under personal income tax; furthermore the participation exemption applies for all dividends, gains and losses related to the holding of at least 5% of the shares in a subsidiary. This rule, preventing economic double taxation, is in general equally applicable to domestic and foreign subsidiaries.

Exception: the loss related to the winding-up of a subsidiary is, under certain conditions, deductible by the parent company.

Investment:

The relevant rules for the corporation tax are largely corresponding to those for the Personal Income Tax Law.

Special features:

- Fiscal unity: if a parent company holds all shares of one or more subsidiaries and certain conditions are met, they may form upon request a fiscal unity: the subsidiaries are considered to be absorbed by the parent. As a result, each year negative results of companies belonging to the unity can be compensated horizontally with positive results of the other ones. Under certain conditions, a fiscal unity may also be formed between a group of cooperative societies or natural insurance companies.
- Regime for investment funds: provided that all current income is distributed to share holders and a number of other conditions are met, an investment company or fund is entitled to add capital gains on securities and real property to a reinvestment reserve and to a rate of nil per cent on the (remaining) profit.

Non-residents:

See under 'Tax payable by' above.

As from 1 January 1990, the Netherlands extended its jurisdiction in tax matters to the Dutch part of the continental shelf with respect to income tax, corporation tax, the tax on wages and insurance tax. Tax on the pollution of surface waters

(Verontreinigingsheffing oppervlaktewateren)

Law on the Pollution of Surface Waters 13 November 1969 (Stb. 1969, 536).

Implementing Decree on the Pollution of State Waters (1970).

Provincial and municipal tax by-laws.

Tax by-laws of provinces/polder-boards/unions of polder-boards/waste water treatment authorities mostly aligned on the Model pollution tax by-law drawn up by the union of polder-boards (1978).

This tax is levied in three forms:

- (a) tax on the pollution of State waters (Article 17 (1) of the Law on the Pollution of Surface Waters) (State waters pollution tax or State tax);
- (b) tax on the pollution of non-State waters (Article 17 (1) of the Law on the Pollution of Surface Waters);
- (c) contribution in respect of direct or indirect connection to a purification plant operated by a public body (Article 17 (2) of the Law on the Pollution of Surface Waters).

The tax under (a) is generally referred to as the State tax while the forms of tax described under (b) and (c) are generally referred to as non-State taxes.

Tax payable on:

Direct or indirect discharging of waste matter, pollutants or noxious matter into surface waters or direct or indirect connection to a purification plant (Article 17 of the Law on the Pollution of Surface Waters).

Tax payable by:

In the case of the tax: anyone discharging waste matter, pollutants or noxious matter directly or indirectly into surface waters (the discharger) (Article 17 (1) of the Law on the Pollution of Surface Waters).

In the case of the contribution: anyone directly or indirectly connected to a purification plant (Article 17 (2) of the Law on the Pollution of Surface Waters).

Basis of assessment:

The quantity and/or the nature of the waste matter pollutants or noxious matter discharged (Article 18 (1) of the Law on the Pollution of Surface Waters). Levies or contributions in respect of dwellings may be collected as a uniform amount per dwelling, as a sum calculated on the basis of the taxable income established or estimated for property tax purposes, or as a sum calculated in some other way notified to the authorities.

Criterion applied in levying the tax:

(a) In the case of matter that combines with oxygen, the criterion is the average quantity of such matter discharged per 24-hour period into surface waters or a purification plant, expressed in inhabitant-equivalents (Article 19 (1) (a) and (2) of the Law on the Pollution of Surface Waters, Article 6 (1) (a) of the Model by-law).

One inhabitant-equivalent is the average quantity of material that combines with oxygen which is discharged into surface water by one inhabitant per 24-hour period.

(b) In the case of other matter that does not combine with oxygen, such as heavy metals, the criterion is the number of units of weight released per unit of time (24-hour period) into surface water or a purification plant, expressed in pollution units (Article 19 (1) (b) of the Law on the Pollution of Surface Waters, Article 6 (1) (b) of the Model by-law).

1. No tax is imposed in respect of the discharge into State waters of matter that does not combine with oxygen.
2. In the case of dwellings or small industrial premises with a pollution value of less than 20 inhabitant-equivalents, a flat-rate pollution value of 3 or 3.5 inhabitant-equivalent applies. In the case of dwellings occupied by one person (single), the pollution value is set at one inhabitant-equivalent (Article 18 (2) of the Law on the Pollution of Surface Waters and Article 12 of the Implementing Decree on the Pollution of State Waters).
3. In the case of industrial firms, the pollution value is in principle established by measuring and sampling the effluent discharged (Articles 13 and 14 of the Implementing Decree on the Pollution of State Waters).

In certain circumstances, the pollution value may be calculated using the table of effluent coefficients (Article 15 of the Implementing Decree on the Pollution of State Waters).

Rates:

The rate is determined by the cost of measures to counter and prevent pollution of surface waters (Article 17 (1) and Article 23 of the Law on the Pollution of Surface Waters).

In the case of the State tax, the rate is as follows:

- discharge into fresh water: HFL 39.50 per inhabitant-equivalent;
- discharge into salt water: HFL 35.00 per inhabitant-equivalent.

In the case of the non-State tax, there are different rates for different administrative areas. The rates are higher than those of the State tax.

The difference in rate between the State tax and the non-State tax is due to the fact that the State exercises only passive water-quality control, while the provinces and polder-boards pursue an active and passive form of management.

Method of collection:

(a) State tax: by means of assessment established by the Office for the Tax on the Pollution of State Waters, The Hague (Article 20 (1) of the Law on the Pollution of Surface Waters and Articles 18 and 20 of the Implementing Decree).

(b) Non-State tax: in the case of industrial firms by means of assessment. In the case of dwellings by means of assessment or on the basis of consumption bills from the public utilities (Article 17 of the Model by-law).

The non-State tax is generally levied by polder-boards, unions of polder-boards and waste water treatment authorities. In three provinces (Groningen, Friesland and Utrecht), the provincial authorities levy the tax themselves.

Collection:

- (a) State tax: by the Ministry of Transport and Waterways (Article 19 of the Implementing Decree).
- (b) Non-State tax: by the relevant public body in accordance with the provisions on collection laid down in the Law on the Provinces and the Law on Competency (Article 21 of the Law on the Pollution of Surface Waters.)

The factor (F) to be applied in calculating the tax due is established annually in the light of these costs (Article 26 (3) of the Law and Article 12 of the Taxation Decree).

Method of collection:

Collection:

By the municipal tax authorities.

Notes:

1. Where municipalities have not yet implemented Article 61-al of the Law setting out general provisions on environmental health (WABM), the tax in respect of the periodic collection of household refuse is still based on Article 277 of the Law on Municipalities. In the near future, all the municipalities will introduce the tax on refuse.

2. In addition to the aforementioned tax, a refuse-collection charge is levied by the municipalities in respect of the periodic disposal of industrial waste of limited proportions and the disposal on request of waste (household waste, bulky household refuse or bulky industrial waste). The periodic disposal of industrial waste is levied on the basis of assessments (Article 13 (1) of the Model by-law). - (ix) 50% of the income from paid employment (Category A) earned by handicapped persons with 60% or more disability.

Carry-over of losses:

Losses sustained in income categories B, C and (in certain cases) F may not be deducted from income in other categories, but may be carried over for up to five years and deducted from income in the same category. Capital losses are also governed by special rules.

Threshold:

Persons whose sole income is from pensions (Category H) and does not exceed ESC 1 250 000 (for married taxpayers) or ESC 1 000 000 (in other cases) are exempt.

There are no thresholds for the other income categories. However, application of the tax rates to persons whose income derives chiefly from paid employment (Category A) may not result in a disposable income after tax of less than the national minimum annual wage.

Deductions:

Deductions are specific to each income category:

- Category A: 65% of income up to a ceiling of ESC 340 000, or total social security contributions, whichever is greater;
- Category B: expenses incurred in the exercise of the activity engaged in, subject to the specified limits;
- Categories C and D: actual costs incurred in the exercise of the activity;
- Category F: 35% of income, to allow for the cost of maintaining or restoring the buildings, or the actual expenditure incurred, if greater, in which case documentary evidence must be produced (documentary evidence of expenditure is always required for land without buildings);
- Category G: capital losses incurred and 50% of capital gains other than from the sale of shares or other transferable securities;
- Category H: not less than ESC 560 000 and not more than ESC 1 400 000.

Allowances:

In addition to the specific deductions, the following are also deducted from the total net income: health expenses (unlimited); education expenses, interest on loans taken out for the purchase, construction or improvement of residential property; and life assurance and sickness or personal accident insurance premiums up to a ceiling of ESC 240 000 for married couples and ESC

120 000 for unmarried taxpayers. The latter amounts may be increased to ESC 280 000 and ESC 140 000 respectively where the difference results from payment of life assurance or sickness or personal accident insurance premiums.

Married couples:

Aggregation of the couple's taxable income and that of their children where the parents have the legal right to administer it.

Tax is calculated according to the splitting system (division by 2, except where the income of one spouse accounts for 95% or more of the aggregate income, in which case division is by 1.85).

Rates:

Rates vary between 16 and 40%.

Fixed rates are deducted at source, in full discharge of tax, on certain types of income, namely:

- interest on sight or term deposits: 20%
- income from registered or bearer securities: 25%
- winnings from betting and gaming, lotteries and totalizator bets: 25%

Taxpayers may opt to include such items as interest on sight or term deposits and income from registered or bearer securities in their taxable income. In such cases, the tax deducted at source is credited against the final amount of tax due, and any overpayments are reimbursed.

Capital gains minus capital losses from the sale of shares and other transferable securities are taxable at a special rate of 10%. (Capital gains tax is not deducted at source.) Taxpayers may opt to include capital gains or any capital losses in their taxable income (see 'Carry-over of losses').

Tax credits:

The following are deducted from the amount of tax due:

- ESC 25 500 per single taxpayer;
- ESC 19 000 per married taxpayer;
- ESC 14 000 per dependant.

Shareholders resident on Portuguese territory are entitled to a tax credit of 35% of the corporation tax corresponding to dividends on shares and other interest held in resident companies.

Non-residents:

Non-residents are liable to tax only in respect of income earned on Portuguese territory. Definitive deduction at source affects only income in Categories A, B, H and I (rate of 25%), income from commissions on the signing of a contract (rate of 15%) and investment income (rate variable according to the type of income).

Collection:

The tax is collected annually and determined on the basis of the tax return.

Advance payments are made against tax due on income in Category B (self-employment) and Categories C and D (income from commercial and industrial activities and agriculture).

Deduction at source:

Deductions are made at source from income falling into Category A (paid employment), Category H (pensions) and, in certain cases provided for by law, Categories B, E and F (income from self-employment, investment income and income from real estate), as well as income from commissions on the signing of a contract.

Tax deducted at source and advance payments count towards the tax due, and any overpayments are reimbursed.

Special features:

- The taxable proportion of Category C income of taxpayers whose main activity is intensive livestock farming shall be 40 % in 1989, 60 % in 1990 and 80 % in 1991.

The legal basis for this tax is to be found in two instruments: DL No 12700 of 20 November 1926 approving the Regulation on stamp duty, and DL No 21916 of 28 November 1932 approving the General Table for stamp duty. Consequently, stamp duty is payable on a wide variety of items including records of movements of wealth, goods or securities, particularly when such taxable capacity is not taxed under any other provision.

The wide variety of items subject to stamp duty is a specific feature of the General Table, in which all deeds subject to the tax are listed in alphabetical order, rather than on the basis of a logical classification.

(c) Premiums and interest on bills drawn, and bills to be received on another party's account, national drafts or any transfers and in general on all commission charged	9 0/00

A large number of other documents, books, papers, deeds or products are subject to stamp duty, notably lines of credit, announcements, insurance policies, leases, certificates, deeds, cheques, contracts in general, contracts for out-working, wills, invoices, guarantees, mortgages, financial leasing, power of attorney, official papers, acceptance of signatures, registers, establishment of associations, and government securities.

UNITED KINGDOM

Income tax

Income and Corporation Taxes Act 1988; Finance Acts 1988 to 1989.

Beneficiary:

The central government.

Tax payable by:

Persons resident or ordinarily resident in the United Kingdom and persons to whom income arises in the United Kingdom.

Basis of assessment:

Total income from all sources less allowable deductions. Certain losses and necessary work expenses may be offset against income, and allowances are granted for expenditure on certain capital equipment.

Exemptions:

Among others, certain social security benefits, wound and disability pensions of members of the armed forces, war widows' pensions, income from educational scholarships in the hands of the recipient. Dividends from investment in personal equity plans, interest on National Savings Certificates, the first UKL 70 interest on ordinary accounts with the National Savings Bank and gambling winnings. Charitable bodies are also generally exempt.

Deductions:

Tax allowances for single people and married couples. Higher allowances for people aged over 65 with modest incomes. Additional allowances for single parents, recently widowed women and registered blind people. Relief for interest paid on loans to purchase a main residence and on purchase of shares under Business Expansion Scheme. Also for premiums on insurance to provide a retirement annuity, contributions to approved pension schemes and private medical insurance schemes and vocational training.

Independent taxation:

From April 1990 married couples' incomes are no longer aggregated. Everyone is entitled to an individual personal allowance to set against any kind of income. A husband is also entitled to an additional married couples' allowance: he can transfer any unused part of this allowance to his wife.

UK 1

Non-residents:

Non-residents are subject to tax on income arising in the United Kingdom, with certain exceptions. There are special provisions regarding deductions for personal allowances for non-resident individuals.

Collection:

Tax is assessed annually. In the case of income from employment and occupational pensions, tax is deducted at source by the employer (see 'Income tax – Employment income'). Tax is deducted at source from some income from abroad paid through an agent in the United Kingdom, and from certain annual payments.

The tax year is from 6 April to the following 5 April, but for some sources income is computed by reference to the income of the previous year, and business profits of an accounting year are treated as being those of the tax year.

Rates:

Basic rate: 25%. Higher rate (charged on taxable income over a certain amount): 40%.

Special features:

Tax on partnership profits is assessed on the partnership, but the liability takes account of the shares and personal circumstances of the individual partners.

Income tax – Employment income

Income and Corporation Taxes Act 1988, Part V

Beneficiary:

The central government.

Tax payable by:

United Kingdom residents receiving payment for employment in the United Kingdom. Non-residents paid for work done in the United Kingdom.

From 6 April 1974 a person who is both resident and ordinarily resident in the United Kingdom is, in general, liable to income tax on the whole of his earnings wherever they arise. Over the period from 6 April 1974 special deductions have been available in certain circumstances when employment is carried out wholly or partly abroad. Currently there is a deduction of 100% available where there is a qualifying absence abroad of at least 365 days. A person who is not resident in the United Kingdom is liable to income tax on his earnings for duties performed in the United Kingdom (unless exempt under a double taxation agreement).

A person who is resident but not ordinarily resident in the United Kingdom is liable to tax on earnings outside the United Kingdom only to the extent that they are remitted to the United Kingdom. A person who is resident and ordinarily resident in the United Kingdom but domiciled outside the United Kingdom and employed by a non-resident concern is liable to tax on emoluments for duties performed abroad unless the duties are performed wholly outside the United Kingdom, in which case only those emoluments which are remitted to the United Kingdom are taxable.

Basis of assessment:

All earnings including most benefits in kind, less personal allowances and allowable deductions.

Exemptions:

Employees earning less than UKL 8500 a year are not generally taxable on benefits in kind. In addition there are limited exemptions which apply to certain specific payments and benefits.

Deductions:

Expenses incurred wholly, exclusively and necessarily in performing the duties of the employment. Subscriptions to professional bodies and learned societies relevant to the employment. Relief available in certain circumstances for some travel and subsistence expenses incurred while working abroad.

Collection:

Deducted at source by the employer on the basis of a tax code reflecting the allowances and reliefs due, and tax tables. Where appropriate an assessment is made.

Corporation tax

Income and Corporation Taxes Act 1988, as amended by the Finance Acts of 1988, 1989, 1990 and 1991.

Beneficiary:

The central government.

Tax payable by:

Companies, corporate bodies and unincorporated associations including members' clubs and trade associations, but not partnerships of individuals, health service bodies, local authorities or local authority associations. Non-resident companies with profits arising from operations in the United Kingdom.

Special provisions apply to authorized unit and investment trusts, investment companies, life assurance companies, trusts, building societies, industrial and provident societies and mutual companies.

Basis of assessment:

All profits, (including income and capital gains) with the exception of dividends and other distributions received from resident companies.

Exemptions:

Charitable bodies are generally exempt from corporation tax on their income.

Deductions:

Expenses incurred for the purpose of the business. Depreciation allowances are allowed on certain types of capital expenditure (e.g. plant and machinery).

Charges in/on income.

Collection:

Annual assessment of profits arising in a financial year (1 April to 31 March). An apportionment is made where an accounting period spans two financial years and tax rates differ. Tax is payable nine months after the end of the accounting period. On payment of a dividend a company is required to make an advance payment of corporation tax proportionate to the amount of the dividend. This advance payment of corporation tax can be offset against the company's main corporation tax liability.

Rates:

The main rate is 33% for 1991-92. Single companies with profits of less than UKL 1.25 million receive some relief from corporation tax and those with profits not exceeding UKL 250 000 are taxed at the small companies' rate of 25%.

The small companies rate does not apply to certain investment companies under the control of five or fewer individuals.

Carry-over of losses:

Trading losses may be offset against future income from the same trade or against other profits of the same or previous accounting period. Trading losses may also be set against any profits of the previous three years provided the trade was carried on at that time.

Special features:

The current losses of a member of a group of companies may be set against the current profits of other members. Where payments of dividends are made between members of a group, the group member paying the dividend may elect not to make payment of advance corporation tax. A resident shareholder is entitled to a tax credit (representing part of the corporation tax paid by the company) in respect of the dividends he receives. This tax credit is paid to the shareholder if he is exempt from, or not liable to, income tax.

Special rules for North Sea oil:

Under the Oil Taxation Act 1975, profits from oil extraction activities in the UK may not be reduced by losses from other activities. Any petroleum revenue tax liability arising in an accounting period is a deduction for corporation tax purposes.

Capital gains tax

Capital Gains Tax Act 1979 (with effect from 6 April 1979, this consolidated existing provisions); Income and Corporation Taxes Acts 1970 and 1988, as amended by Finance Acts 1980 to 1991.

Beneficiary:

The central government.

Tax payable by:

Persons, including companies, resident or ordinarily resident in the United Kingdom. Persons not resident or not ordinarily resident but carrying on a trade in the United Kingdom through a branch or agency on gains on the disposal of chargeable assets situated in the United Kingdom and used for the purpose of that trade branch or agency.

Tax payable on:

Gains on the disposal of chargeable assets¹ wherever situated. Disposal includes any occasion when the ownership of an asset is transferred in whole or in part (except on death), for example by sale, exchange or gift; or when the owner of an asset derives a capital sum from it. Disposal also includes certain deemed disposals, for example on a company ceasing to be resident in the United Kingdom or on a non-resident person ceasing to carry on a trade in the United Kingdom through a branch or agency. An individual not of United Kingdom domicile is liable on gains on assets situated abroad only to the extent that the gains are remitted to the United Kingdom.

Basis of assessment:

Chargeable gains less allowable losses in a year of assessment or accounting period in the case of a company.

Exemptions:

- Persons wholly or partially exempted include local authorities, charities, approved pension schemes, friendly societies, registered trade unions, authorized unit and investment trusts and other persons qualifying for exemption from income tax.

¹ With certain exceptions all forms of property or interests or rights in or over property.

The main exceptions are an individual's principal private residence; chattels worth UKL 6 000 or less; normal life insurance policies; British Government and certain other securities; private motor cars; and important works of art and other objects of national, scientific, historic or artistic interest (subject to certain undertakings by the recipient). Other exceptions include gifts of assets to charities and other bodies concerned with the national heritage, gifts of land and buildings for public benefit and disposals of shares qualifying for business expansion scheme relief and of shares held in personal equity plans.

- The first UKL 5 500 of an individual's gains in a year are exempt. This figure is index-linked.
- Subject to certain conditions and limits, gains accruing to an individual who retires for reasons of ill health or over the age of 55 on the disposal of a business or of shares in a family trading company or group are exempt.

Reliefs:

- When the sale proceeds are reinvested in new business assets, gains on certain classes of business assets may be deducted from the cost of the new assets instead of being charged to tax.
- The tax on gains arising on gifts and transfers out of trust may in certain circumstances be deferred.
- Capital losses which arise to the original shareholder on disposals of new issues of unquoted shares in trading companies may, subject to certain conditions, be set against income.
- Transfers of assets between members of a group of companies are treated as giving rise to neither gain nor loss. A group of companies for this purpose comprises a principal company and its 75 % subsidiaries all of which are resident in the United Kingdom.
- Special provisions apply where companies are amalgamated or acquired by an exchange of share capital or where a company acquires part of the business of another company by issuing shares or securities.
- Transfers of assets between spouses are treated as giving rise to neither a gain nor a loss.

Computation of gains:

In general, the consideration received for disposal (or the market value if there is no consideration or the transaction is not at arm's length) less the cost of acquisition together with expenses of acquisition and disposal and certain other allowable expenditure on the asset. Any amount charged to income tax or corporation tax as income or taken into account as a receipt in calculating income is excluded from the consideration.

In the case of assets owned on 31 March 1982 there are special rules to limit the tax charge to the gain arising since that date. In calculating gains, relief is generally given for the effects of inflation since 1982.

Collection:

By assessment.

Rates:

Individuals' gains are taxed at rates equivalent to income tax rates (25 % to 40 %).

Companies' gains are charged at normal corporation tax rates (25 % and 33 % as appropriate).

Trusts' gains are charged at 25 % or 35 %.

Carry-over of losses:

Usually allowable if a gain in the same transaction would have been chargeable. Losses are set primarily against gains of the same year and any excess may be carried forward without time limit and set against gains of later years.

Inheritance tax in the United Kingdom

Inheritance Tax Act 1984 (formerly Capital Transfer Tax Act 1984); Finance Acts 1986, 1987, 1988, 1989 and 1990.

Beneficiary:

The central government.

Tax payable on:

The cumulative total of transfers of value (broadly, transfers which reduce the value of the transferor's estate) within the previous seven years, other than exempt transfers. The main charge arises on transfers made by an individual, by will or intestacy, or lifetime gifts made within seven years of death. Outright gifts between individuals (and gifts into accumulation and maintenance trusts, trusts for the disabled and most interest-in-possession trusts) become exempt from tax provided the transferor survives seven years from the date of the gift. During the seven-year period these gifts are known as potentially exempt transfers (PETs). Property given subject to a reservation (i.e. where the transferee does not enjoy it to the entire exclusion of the transferor) is given special treatment. If the reservation ceases during the transferor's lifetime the gift is treated as a PET made by that person at that date. If the reservation continues until the transferor's death the property is then treated as having remained a part of the transferor's estate. The tax applies mainly to transfers by individuals or close companies. There are also special provisions covering the taxation of property held in settlement, mainly where there is no interest in possession in the property.

All property in the United Kingdom is within the scope of inheritance tax, regardless of the domicile of the transferor; property outside the United Kingdom is liable to the tax if the transferor is domiciled within the United Kingdom at the time of the transfer or if certain statutory rules impose a deemed domicile in the United Kingdom on the taxpayer. Settled property situated outside the United Kingdom is chargeable to tax if the settlor was domiciled in the United Kingdom at the time when the settlement was made.

Tax payable by:

The transferor is primarily liable for the tax on lifetime transfers which are chargeable when made.

The trustees of a settlement are liable for any tax arising from the transfer of settled property. The transferee is primarily liable for any tax arising from a PET which becomes chargeable by reason of the death of the transferor.

The legal personal representatives are liable for the tax attributable to property in the deceased's estate transferred by his will or intestacy.

Note:

Liability for tax on a transfer may rest with more than one person – for example, if tax payable on a transfer is not paid by the due date, it may be recovered from the transferee.

Basis of assessment:

The loss to the transferor is the difference between the value of all the transferor's property immediately before the transfer and its value immediately after the transfer. Thus, if the transferor pays the tax, it is charged on the total of the gift and tax together.

Exemptions:

These include:

- (i) The first UKL 55 000 of transfers from a spouse domiciled in the United Kingdom to a spouse domiciled abroad;
- (ii) Full exemption for transfers between other spouses;
- (iii) The first UKL 3 000 of a transferor's total of gifts in a tax year;
- (iv) Gifts a transferor makes to any transferee which in any tax year do not exceed UKL 250;
- (v) Gifts out of income, provided certain conditions are fulfilled;
- (vi) Certain dispositions for the maintenance of the family;
- (vii) Certain government securities if the holder is neither domiciled nor ordinarily resident in the United Kingdom;
- (viii) Transfers to charities, political parties and of land to Registered Housing Associations.

There are also heritage exemptions for historic properties, together with surrounding land essential for the protection of the character and amenities of such buildings and their historically associated contents, land of historic, scenic or scientific interest, and objects and collections of national artistic, historic or scientific interest conditional on certain undertakings being secured to maintain, preserve and provide public access to the property or objects in question and maintenance funds established to maintain and preserve such property; and all property given or bequeathed to certain institutions concerned with preservation of the national heritage.

Reliefs

These include:

- (i) Reliefs from the inheritance tax charge on agriculture, businesses, woodlands and trusts for the benefit of employees;
- (ii) Reliefs from the inheritance tax charge on death for quoted securities and immovable property, where the value has fallen since the date of death;
- (iii) Relief for transfers occurring in quick succession;
- (iv) There is a measure of unilateral relief for tax paid in other countries in respect of the same transfer of property situated in that other country.

Note:

The double taxation agreements referred to in the entry for capital transfer tax will need some modification to take account of inheritance tax. By a Protocol signed in 1989, the agreement with Sweden was extended to cover inheritance tax.

Collection:

Tax is, in most circumstances, due six months after the end of the month in which the taxable event occurred. However, tax on certain types of property (including, for example, houses, land, business assets and certain holdings of unquoted securities) may be paid by instalments over 10 years, in some cases, free of interest.

UK 6

In other cases, interest is chargeable after the due date at a rate, currently 8%, which may be varied from time to time.

Rates:

There is a zero-rate band below which no tax is payable; thereafter tax is charged at a single rate of 40% on transfers on death or within seven years before death. A degressive relief applies (to the amount of tax charged) for transfers made more than three years but less than seven years before death. Lifetime transfers chargeable when made are taxable at half the rate. No tax is charged in any event on the first UKL 140 000 (in 1991/92) of a person's cumulative total of chargeable transfers.

Excise duty on hydrocarbon oil

Hydrocarbon Oil Duties Act 1979, as amended by Finance (No 2) Act 1979 and subsequent Finance Acts.

Beneficiary:

The central government.

Duty payable on:

Imported and indigenous petroleum oils, coal tar, oils produced from coal, shale, peat and most other bituminous and liquid hydrocarbons. Duties are also payable on petrol substitutes and gas used as fuel for the propulsion of road vehicles, but these have at present little fiscal significance.

Duty payable when:

The oil is delivered for home use in the United Kingdom, subject to arrangements for deferment.

Exemptions and reliefs:

Kerosene other than that intended for use in road vehicles, is relieved of all duty. Most lubricating oils are also relieved of duty. Gas oil not intended for use in road vehicles is liable at less than full rate of duty.

Both light and heavy oil are relieved of duty when used in lifeboats or fishing vessels, as refinery fuel, as raw material for gas-making or chemical synthesis or as ingredients, solvents or the like, in industrial processes. Heavy oil used for such horticultural purposes as heating greenhouses or used by coasting vessels (except pleasure-yachts) is also relieved of duty.

Where refinery use of energy from heavy oil fuel for the treatment or production of oil falls between one-sixth and one-third of the total energy so produced, relief is limited to one-third of the heavy oil duty, while light oil burned in approved furnaces pays duty only at the rate for heavy oil not for use in road vehicles.

Collection:

If, at import, oil is delivered for home use, excise duty is paid to the collector's office at the port. If delivered for home use from a refinery, other production premises or warehouse, payment is normally made centrally. On provision of suitable financial security, duty at import on deliveries for home use made between the 15th of one month and the 14th of the next month may be deferred until the 29th of that next month, with payment centrally by direct debit (with special arrangements for February and Bank Holidays). Similar deferment arrangements are available for duty on deliveries for home use from a refinery, other production premises or warehouse.

² The distinction between light and heavy oil is based on definitions of physical properties.

³ The 1989 Finance Act introduced a rate of Duty on leaded petrol other than four star of UKL 0.2122 per litre.

Excise duty on tobacco products

Tobacco Products Duty Act 1979, as amended by the Finance Acts 1981 and 1988.

Beneficiary:

The central government.

Excise duty payable on:

Delivery of United Kingdom manufactured and imported tobacco products for home use.

Basis of assessment:

Cigarettes are chargeable with an *ad valorem* duty calculated on their retail price and a specific duty per 1 000 cigarettes. For the purpose of the *ad valorem* duty, the retail price is normally the price recommended by the importer or manufacturer for the retail sale of the cigarettes; where no price has been recommended, the highest price at which cigarettes of that description are normally sold by retail is used. For the purpose of the specific duty, cigarettes exceeding 9 cm in length excluding any filter or mouthpiece are treated as if each 9 cm or part thereof were a separate cigarette.

The duty on other chargeable tobacco products is based on their weight as determined before delivery for home use.

Collection:

United Kingdom manufacturers are required to keep a production account and make a return of all chargeable products manufactured each day. The products are normally deposited in an approved secure store and duty is chargeable on any removed for home use. Imported manufactured tobacco may be placed in a warehouse or approved secure store or charged at the port of importation. If satisfactory security is given, payment of the excise duty on both home-produced and imported products may be made on a monthly basis, 15 days after the end of each delivery period.

Rates:

Cigarettes	21 % of the retail price plus UKL 40.15 per 1 000
Cigars	UKL 61.72 per kg
Hand-rolling tobacco	UKL 65.12 per kg
Other smoking tobacco and chewing tobacco	UKL 28.69 per kg

Relief from duty:

Provision has been made for the remission or repayment of the duty on products exported or shipped as stores, and products used solely for the purposes of research or experiment. Certain other minor reliefs have been allowed by regulation, including products manufactured from tobacco grown in the United Kingdom by a person for his own consumption.

Excise duty on matches and mechanical lighters

Matches and Mechanical Lighters Duties Act 1979, as amended by the Finance Act 1981.

Beneficiary:

The central government.

Excise duty payable on:

The number of matches or portable mechanical lighters, including incomplete mechanical lighters, (other than those constructed solely for the purpose of igniting gas for domestic or industrial use) sent out from the premises of licensed manufacturers or imported.

Collection:

Each factory where matches or mechanical lighters are manufactured in the United Kingdom must hold a licence to manufacture. The excise duty on goods produced in the United Kingdom becomes payable when the goods are dispatched from the factory. The duty is paid to the local collector's office not later than the 15th day of the month following the month in which the goods were sent out. Imported matches or mechanical lighters are charged duty at the port of importation, or if they are delivered to a warehouse, or licensed premises in the case of mechanical lighters, on their removal for sale on the home market. Payment is made at the local collector's office, with arrangements for deferment similar to those for payment of duty on home-produced goods.

Rates:

Matches	UKL 1.1500 per 7 200 matches
Mechanical lighters	UKL 0.500 per lighter

Excise duty on spirits

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts and the Alcoholic Liquors (Amendment of Enactments Relating to Strength and to Units of Measurement) Order 1979 and the Isle of Man Act 1979 and the Customs and Excise Management Act 1979.

Beneficiary:

The central government.

Excise duty payable on:

Spirits made in the United Kingdom and imported spirits and goods containing spirits, delivered for home use.

Basis of assessment:

Duty is charged on spirits in accordance with their alcoholic strength. The strength of spirits is expressed in terms of percentage volume at 20°C. This represents the ratio of the volume of ethyl alcohol, measured at 20°C, contained in the mixture, to the total volume of the mixture measured at the same temperature.

Similarly, duty is charged on the volume of ethyl alcohol, measured at 20°C, contained in other goods.

Exemptions:

Spirits produced in the United Kingdom are generally relieved of excise duty if they are converted to methylated spirits to make them non-potable or if they are used for medical or scientific purposes. Similarly, spirits contained in imported products which are not for human consumption or which are used for medical purposes may generally be relieved from excise duty, subject to certain conditions. Spirits for industrial use may be generally relieved of duty without undergoing methylation provided they are denatured on receipt by the user and are not contained in goods produced for sale.

Collection:

All distillers, rectifiers and compounders are required to possess an excise licence. Excise duty becomes payable on clearance to home use at importation or on delivery from an excise warehouse; but a period of deferment of the duty is allowable. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

Rate:

Spirits, per litre of alcohol in the spirit: UKL 18.96
(UKL 19.81 as from 10. 3. 1992)

Excise duty on wines and made-wines

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts and the Alcoholic Liquors (Amendment of Enactments Relating to Strength and to Units of Measurements) Order 1979 and the Isle of Man Act 1979.

Beneficiary:

The central government.

Excise duty payable on:

Wine and made-wine imported into the United Kingdom or produced for sale in the United Kingdom.

'Wine' means any liquor obtained from the alcoholic fermentation of fresh grapes or the must of fresh grapes, whether or not the liquor is fortified with spirits or flavoured with aromatic extracts; 'made-wine' means any liquor obtained from the alcoholic fermentation of any substance, or by mixing a liquor so obtained or derived from a liquor so obtained with any other liquor, but does not include wine, beer, black beer, spirits or cider.

Basis of assessment:

The rates of excise duty chargeable on wine and made-wine on their strength measured by reference to the percentage of alcohol by volume at 20°C.

For excise duty purposes, there are four strength categories, although for wines and made-wines of a strength not exceeding 15 % there are two rates of duty depending on whether the product is still or sparkling. Five rate bands apply to low alcohol strength drinks not exceeding 5.5 %.

Collection:

Producers of wine and made-wine in the United Kingdom are required to possess an excise licence. Wine and made-wine become liable to excise duty when they are produced but the duty is charged when the wine or made-wine is delivered from the winery and is paid to the local collector's office by the 15th day of the month following that in which the duty is incurred. In certain circumstances, wine and made-wine produced in the United Kingdom may alternatively be removed from the winery free of duty to a bonded warehouse. The duty on imported wine and made-wine becomes chargeable on importation or, if the wine or made-wine is warehoused, on delivery for home use from the excise warehouse. However, a period of deferment of the duty is allowed on all imported wine and made-wine, whether from the EC or third countries. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

Excise duty on cider and perry

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts, and the Alcoholic Liquors (Amendment of Enactments Relating to Strength and to Units of Measurement) Order 1979.

Beneficiary:

The central government.

Excise duty payable on:

Cider (or perry) made in the United Kingdom by a person required to be registered as a maker of cider, or imported into the United Kingdom.

Basis of assessment:

The excise duty is payable on cider (or perry) of a strength less than 8.5% of alcohol by volume (at a temperature of 20°C) obtained from the fermentation of apple or pear juice without the addition at any time of any alcoholic liquor or of any liquor or substance which communicates colour or flavour other than such as the Commissioners of Customs and Excise may allow as appearing to them to be necessary to make cider (or perry).

Collection:

Any person who, on premises in the United Kingdom, makes cider or perry for sale in excess of a certain limit must be registered in respect of his premises. Excise duty becomes chargeable on the production of the cider or perry: it is not, however, charged until the cider or perry is delivered from the producer's premises and payment is made to the local collector's office by the 15th of each month following that in which the duty is incurred. Excise duty on imported cider becomes chargeable on importation or, if it is warehoused, on delivery for home use from the excise warehouse. However, a period of deferment of the duty is allowed on imported cider, whether from the EC or third countries. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

Excise duty on beer

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts and the Alcoholic Liquors (Amendment of Enactments Relating to Strength and to Units of Measurement) Order 1979 and the Isle of Man Act 1979.

Beneficiary:

The central government.

Excise duty payable on:

Beer, ale, porter, stout and any other liquor manufactured for sale that is described as beer or a beer substitute and which is of an alcoholic strength exceeding 1.2% by volume.

Basis of assessment:

The excise duty on beer is assessed by reference to the quantity and original gravity of the unfermented infusion from which the beer is produced (the worts).

Collection:

Brewers in the United Kingdom are required to possess an excise licence. The duty becomes due on production of the wort but the brewer may be allowed a period of credit, the aggregate net charge on all the brewings for each calendar month being payable by the 25th day of the following month; a longer period of credit may be allowed in respect of strong beer and lager. Excise duty on imported beer is chargeable either at importation (if the beer is entered for home use) or on delivery from a bonded warehouse, but again a period of credit is allowable. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

Rates:

For each degree of original gravity in excess of 1 000° UKL 1.06

Deductions:

In respect of beer produced in the United Kingdom a statutory deduction of 6% is made from the monthly assessment of the quantity of worts on which the excise duty is payable to allow for wastage and loss during the preparation of the beer for consumption. For beer imported in containers of a capacity of more than 10 litres, a 2% deduction is made from the quantity imported.

Special feature:

Where beer liable to excise duty is brewed solely for the purposes of research or of experiments in brewing, under certain conditions, the duty may be repaid or remitted and a licence to brew is not required.

Repayment of duty:

(a) Drawback:

Excise duty is repaid if the duty-paid beer is exported as merchandise removed to the Isle of Man, shipped as stores or deposited in a warehouse for exportation as merchandise, removal to the Isle of Man or shipment as stores.

(b) Spoilt beer:

Subject to certain conditions, excise duty may be repaid or remitted on any worts or beers which have been destroyed or become spoilt or otherwise unfit for use by unavoidable accident while on the premises of a brewer for sale, whether or not they were manufactured by that brewer. Excise duty may be repaid on beer which has become spoilt or unfit for use after it has been delivered by the brewer and which has been returned to the brewer subsequently.

(c) Beer used as an ingredient:

Subject to certain conditions, excise duty may be repaid on beer used in the production or manufacture of beverages and other articles of a low alcohol content.

Petroleum revenue tax (PRT)

Oil Taxation Act 1975, Petroleum Revenue Tax Act 1980 and Oil Taxation Act 1983, as amended by annual Finance Acts.

Beneficiary:

The central government.

Tax payable by:

Persons ('participators') including companies, whether resident or non-resident, holding or participating in the holding of licences granted under the Petroleum (Production) Act 1934 or the Petroleum (Production) Act (Northern Ireland) 1964.

Tax payable on:

Profits from winning any substance under the authority of the abovementioned licences (except methane drained from mines for safety reasons). It is also charged on tariff receipts (less an allowance) for use of shared assets, and on disposal receipts.

Basis of assessment:

The participator's share of the assessable profit or allowable loss for the field in each chargeable period: each chargeable period being a period of six months ending at the end of June or December. Subject to the exceptions in point 4 below, each field is assessed in isolation.

Special reliefs:

The following reliefs are available to set against participators' profits in a field:

1. The 'uplift' – a supplement of 35 % of, broadly, exploration and development expenditure incurred in exploring and developing the field – designed to compensate for the non-allowance of interest payments and to increase net of tax returns to companies early in field life.
2. The 'oil allowance' provides PRT exemption of up to (currently) $\frac{1}{4}$ million tonnes for each chargeable period, to a fixed maximum amount (now 5 million tonnes) of production per field. This allowance has been doubled for offshore fields outside the Southern Basin of the North Sea approved after 1 April 1982, and halved for fields inside the Southern Basin or on shore approved after that date.
3. 'Safeguard' limits the PRT charge each chargeable period to not more than 80 % of the amount (if any) by which profit field (without deduction of 'upliftable' expenditure) exceeds 15 % of the cumulative 'upliftable' (broadly capital) expenditure at the end of that period. 'Safeguard' applies up to break-even point and for half as many periods again.
4. Subject to various restrictions, relief can also be given for certain exploration and appraisal expenditure, unrelieved field losses, limited oilfield development and general research expenditure incurred in different United Kingdom or United Kingdom Continental Shelf fields.

Computation of liability:

For PRT, revenues are, broadly, the price receivable for oil disposed of at arm's length, plus the market value of oil kept for refining or disposed of other than at arm's length plus half the increase in stock values. PRT is calculated on the revenues of the participator less:

- (i) royalty (12¹/₂ %), where appropriate;
- (ii) field expenditure (including any 'uplift');
- (iii) operating costs for the field (but *not* interest payments);
- (iv) the value of the oil allowance.

This figure is subject to any relief under the 'safeguard'.

Collection:

By assessment and a system of instalments and advance payments.

Rate:

75%.

Carry-over of losses:

Where a field shows a PRT loss for any period (as calculated from the paragraphs above) that loss may be carried forward and offset against PRT profits in later periods, or carried back against PRT profits in earlier years. However, if a field is eventually abandoned with unrelieved PRT losses, then any participator may set his share of those losses against his PRT profits on other fields.

(Scotland) Act 1987; Local Government Finance Act 1988; Local Government and Housing Act 1989; Caravans Act 1991.

Beneficiary:

Local government.

Tax payable by:

Occupiers of non-domestic property with the exception of agricultural land and buildings.

Tax payable on:

Occupied non-domestic property with the exception of agricultural land and buildings.

Basis of assessment:

The rateable value of property, and the rate poundage determined by the Secretary of State for Scotland. The rateable value which in most cases is related to a property's annual rental value is determined by assessors appointed by valuation authorities (regional and islands councils). Each rate poundage, which is the number of pence in the pound which occupiers of property have to pay on the rateable value of their property, is calculated by dividing the total sum to be raised by the estimated yield of a penny rate. In an islands area a general rate is determined and levied by the islands council, while in other areas separate rates are determined in respect of district councils and regional councils and the district rate and regional rate are levied together by the regional council.

Exemptions:

Agricultural land and buildings, offshore oil installations, properties occupied by religious bodies and, partly, charities. Industrial and freight transport property is derated to the extent of 25% (1992/93) of its annual value. Static leisure caravans and caravan sites are derated to the extent of 60% of their net annual value.

Collection:

Rate poundages are fixed by the Secretary of State before the end of the calendar year preceding the local authority financial year (commencing on 1 April) and are payable in 10 monthly instalments from May to February, or in a single sum on or before 30 September as the ratepayer prefers. Other *ad hoc* payment arrangements may be made with the agreement of the rating authority.

Rates:

The yield from rates in 1991–92 will finance around 24 % of local government expenditure and amount to, at the latest estimate, UKL 1 347 million at outturn prices. In the financial year beginning in 1991, the combined district/region or general rate poundages range from 36.8 pence to 67.7 pence.

Rates – Northern Ireland

The Rates (Northern Ireland) Order 1977; the Rates Amendment (Northern Ireland) Order 1979; the Local Government, Planning and Land (Northern Ireland) Order 1981; the Enterprise Zones (Northern Ireland) Order 1981; the Rates Amendment (Northern Ireland) Order 1982; the Departments (Northern Ireland) Order 1982; the Rates (Amendment) (Northern Ireland) Order 1983; the Rates (Amendment No 2) (Northern Ireland) Order 1983; the Housing Benefits (Northern Ireland) Order 1983; Rates (Amendment) (Northern Ireland) Order 1986.

Beneficiaries:

Local and central government – on 1 October 1973 major functions formerly carried out by local government were transferred to central government. A proportion of the rates collected is therefore retained by central government as a contribution towards the cost of those services which have been transferred.

Tax payable by:

Occupiers of non-industrial premises and occupiers of non-agricultural land and buildings.

Tax payable on:

Occupied non-industrial premises and occupied non-agricultural land and buildings.

Basis of assessment:

District rate:

The rateable value of the property occupied and the rate poundage for the area. The rateable value is related to the annual rental value of the property and is assessed by central government valuation officers. The rate poundage (which is calculated separately in each district) is the number of pence per pound of rateable value to be paid by the occupiers of property. It is calculated by dividing the total revenue required by each district council by the total rateable valuation of the district. The rateable value is related to the level of rental values at the last general revaluation in 1976.

Regional rate:

The rateable value of the property and regional rate poundage for Northern Ireland. The rateable value is related to the annual rental value of the property and is assessed by central government valuation officers. The regional rate poundage which applies throughout Northern Ireland is the number of pence in the pound of rateable value to be paid by the occupiers of property. It is calculated by dividing the total revenue required by the total net annual valuation of Northern Ireland. The regional rate is a contribution towards the cost of those local authority type services which are now the responsibility of central government departments.

Exemptions:

- Agricultural land and buildings, industrial premises, places of religious worship and charitable hereditaments used for charitable purposes are totally exempt.
- All non-domestic properties in 'Enterprise zones' are totally exempt.
- Freight transport premises are exempted from 75 % of the rate charge and certain sports and recreation facilities are exempted from 65 % of the rate charge.
- Housing benefit is available to domestic ratepayers so as to adjust payments in accordance with income and needs.

Collection:

The district rate and the regional rate are combined and collected as one charge by the Rate Collection Agency, an agency within the Department of the Environment for Northern Ireland, a department of central government, and the product of each district rate passed on to each respective district council. Rate poundages are fixed in February in each financial year. The rate becomes due on 1 April and is payable in one single amount. Domestic rates can be paid by 10 monthly instalments. Enforcement for non-payment is by normal debt proceedings at the courts.

Yield:

The net collectable rate in Northern Ireland for the year ending 31 March 1991 was UKL 341.4 million, of which approximately 69 % is retained by central government.

Community charge – Great Britain

England and Wales: Local Government Finance Act 1988; Local Government and Housing Act 1989.

Scotland: Abolition of Domestic Rates etc. (Scotland) Act 1987; Local Government Finance Act 1988; Local Government and Housing Act 1989.

Beneficiary:

Local government.

Payable by:

All people aged 18 years or over who are solely or mainly resident in Great Britain.

Basis of assessment:

Personal and collective community charges

The level is set by each charging (or levying, in Scotland) authority (district councils, London boroughs, the Common Council of the City of London, the Council of the Isles of Scilly, regional and islands councils), based on the level of services it intends to provide for its area.

Standard community charge

Set by the charging (or levying) authority, it is paid by the owner of empty domestic property, as a multiple of the personal community charge. Certain classes of property are either exempted from the charge (in Scotland only), or have a zero multiplier (i.e. no charge is levied).

Exemptions:

Certain groups within the community have been exempted from the personal charge. There are no exemptions from the standard and collective charges.

The main exemptions are:

- Persons in detention;
- Visiting forces;
- International Headquarters and defence organizations;
- The severely mentally impaired;
- Young adults in full-time further education or for whom someone is in receipt of child benefit;
- Members of religious communities;
- Hospital patients;
- Patients in homes;
- Care workers;
- Residents of certain Crown buildings;
- Residents of some short-stay hostels;
- Persons without fixed abode.

UK 30

Collection:

The community charge is collected by charging authorities. All chargepayers have the right to pay in 10 (12 in Scotland) monthly instalments.

The council tax:

Legislation is presently before Parliament to replace the community charge with the council tax with effect from 1 April 1993.

Business rates – England and Wales

Local Government Finance Act 1988; Local Government and Housing Act 1989.

Beneficiary:

Local government.

Tax payable by:

Occupiers of land and buildings used for commercial, industrial and business purposes.

Tax payable on:

Occupied or unoccupied non-domestic land and buildings, other than those given exemption.

Basis of assessment:

The rateable value of the property (derived from its annual rental value which is assessed by the valuation officers of the Board of Inland Revenue) and the national non-domestic rates multiplier set by the government. A rating revaluation took place in 1990. The multiplier is adjusted annually by no more than the rate of inflation over the previous year. Special phasing arrangements are in place from 1990 to 1995 to smooth the effects of the revaluation and the introduction of the uniform business rate.

Exemptions:

The main exemptions are all domestic property, agricultural land and buildings, places of public worship, public parks and property in enterprise zones. Charities enjoy mandatory rate relief of 80% and other non-profit-making bodies may be granted relief at the discretion of their local authorities. Government property (i. e. the Crown) makes an equivalent contribution in lieu of rates.

Collection:

Most business rates are collected by local authorities but some by the Secretary of State. The revenue is pooled and then distributed to individual authorities on a per capita basis. All ratepayers have the right to pay in 10 instalments in a year.

UK 7 Development land tax

The tax was abolished by Finance Act 1985 for disposals on or after 19 March 1985.

UK 18 Rates – England and Wales

Replaced on 1 April 1990 by the community charge in Great Britain (Poll tax) (UK 30).

UK 19 Community charge – Scotland

Replaced by the community charge in Great Britain (UK 30).

UK 28 Supplementary petroleum duty (SPD)

SPD applied for two years – 1981 and 1982. It was abolished in favour of a system of advance payments of petroleum revenue tax which was considered more responsive than SPD to oil-price changes. The advance payment system also has been subsequently abolished.
