**BELGIUM**

*Belgique/België*

## Personal income tax

*(Impôts des personnes physiques/Personenbelasting)*

Articles 3 to 93 of the Income Taxes Code.

### **Beneficiary:**

The State (plus a possible surcharge on individuals for the benefit of the municipalities and the agglomerations).

### **Tax payable by:**

Inhabitants of Belgium, i.e. individuals who have established their domicile or their centre of financial interest in Belgium.

### **Basis of assessment:**

All net income, irrespective of origin and nature. However, certain capital gains and certain benefits and allowances of a social or cultural nature are exempt.

The tax paid is not an allowable expense for the purposes of any other tax.

### **Deductions:**

The following are deductible, under certain conditions, from total net income: charges for collection and custody in connection with income from capital; interest on certain debts; 80% of certain maintenance allowances; gifts to certain bodies; fees or similar charges paid on the acquisition of a long lease of land or buildings thereon, whether situated in Belgium or abroad; certain expenditure on the thermal insulation of the taxpayer's dwelling; sums used to purchase certain shares in Belgian companies or units of certain Belgian unit trusts.

### **Married couples:**

Aggregation of the couple's taxable income and that of their children where the parents have the legal right to administer it; however, in the case of households whose income does not exceed BFR 1 500 000, aggregation is moderated when the tax is calculated by the application of specific corrective factors based on the principles of splitting or separate taxation.

### **Non-residents:**

See tax on non-residents (B 01.5/02.4).

### **Collection:**

By means of assessment books.

Advance payments which count towards the tax due (within certain limits for real estate) are required in the case of income from immovable property and capital and certain types of

earned incomes, etc. The advance payment is usually 1.25%, in the case of immovable property, (0.8% in some cases) plus a surcharge due to the local authorities. The advance payment in the case of income from capital is normally 20%. The advance payment for wages, salaries, pensions, etc. is calculated from tax scales.

**Rates:**

Taxpayers without dependants whose total taxable income is less than BFR 100 000 are exempt; over and above this amount, progressive rates are applied, reaching a maximum of 72% for that part of income exceeding BFR 4 million. That part of the tax which is applicable to earned income other than employees' wages and pensions is generally increased by an amount which varies from year to year. However, no increase is applied in the case of advance payments of up to a quarter of the amount of the tax made, at the latest, on 10 April, 10 July, 10 October and 10 December of the year preceding the tax year. A rebate is allowed on advance over-payments. The tax may not exceed 67.5% of the taxable income. A surcharge which the municipalities are free to set and which is fixed at 1% for the agglomerations may also be imposed. Reductions for dependants are fixed, except for those in respect of dependent children; these are fixed as a percentage of the tax which varies with the number of children within lower and upper limits.

**Special features:**

Income from immovable property situated in Belgium is defined as follows:

- for property which is not rented: normally the income according to the land register;
- for property which is rented to a natural person who uses it for his work; the income according to the land register, plus the fraction of the net rent over and above that income;<sup>1</sup>
- for property which is rented to Belgian or foreign societies, associations and groups without legal personality, or to legal persons under public or private law: the income according to the land register plus the part of the net rent over and above that income.

Tax on income from a foreign source (sometimes on condition that it has been effectively taxed abroad) is reduced by half (for income from immovable property, earned income and certain other forms of income) or reduced by 15% (for income from capital received, before any advance payment on dividends and interest has been deducted).

**Carry-over of losses:**

Five years; no limit for losses resulting from *force majeure* or fortuitous circumstances since 1 January 1960.

---

<sup>1</sup> Where the rents relating to the private and business parts respectively of a property are recorded in a registered lease, this rule applies only as regards the business part of the property.

## Corporation tax

*(Impôt des sociétés/Vennootschapsbelasting)*

Articles 94 to 135 of the Income Taxes Code.

### **Beneficiary:**

The State.

### **Tax payable by:**

Companies, associations, establishments or bodies with legal personality which have their registered office or principal establishment in Belgium or are managed or administered from headquarters in Belgium and are engaged in an activity for pecuniary reward. Some, however, are expressly exempt from corporation tax (intercommunal associations, etc., which are liable for the tax on legal persons).

Subject to certain conditions, some partnerships may opt to have their profits taxed under the personal income tax regime, the tax being payable by the participants.

### **Basis of assessment:**

All expenses not allowed for tax purposes, all distributed and undistributed profits and certain percentages of profits and remunerations paid to directors and officials of companies. Tax paid is not an allowable expense for the purposes of any other tax.

### **Exemptions and allowances:**

Either 95 or 90% of the amount of the net dividends plus the real or fictitious advance payment on income from capital, accruing to companies from permanent shareholdings (i.e. those owned by the taxpayer during the whole of the taxable period) are exempt from tax. Under certain conditions, distributed profits on new shares issued in 1982 and 1983 are exempt.

### **Collection:**

By means of assessment books, except in the case of advance payments (see under B 01).

### **Rates:**

Standard rate: 45%. (See personal income tax B 01 for the application of an increase where advance payments are not made or are insufficient.)

Except for certain holding companies and companies at least half of whose shares are held by one or more other companies the tax is reduced to 33% (when the taxable income does not exceed BFR 1 000 000); for taxable income of between BFR 1 000 000 and BFR 14 000 000, the tax is fixed at a rate ranging from 31% to 45%.

**Special features:**

- The tax is reduced to a quarter in the case of profits made and taxed abroad, and in the case of income from property situated abroad. In the case of foreign interest and licence fees, which have in fact been taxed abroad, the tax is reduced by 15% of the amount of these incomes, before the advance payments on income from capital, possibly due in Belgium, have been deducted.
- If the profits are distributed, the shareholder receives a tax credit (51% of the dividend after the advance payment is made), which may be set off against personal income tax, but is not refundable.

**Carry-over of losses:**

Five years; no time-limit for losses resulting from *force majeure* or fortuitous circumstances since 1 January 1960, nor for losses suffered in the first five accounting years for companies set up between 1 January 1967 and 30 June 1970, from 1 January 1972 and from 1 January 1977.

## State income tax

*(Indkomstskat til staten)*

Statutory Notice No 399 of 11 September 1979, No 446 of 16 October 1980 and No 27 of 17 July 1980.

### **Beneficiaries:**

Tax on individuals: the State.

Tax on estates: the State and local government. The local government share of the tax amounts to one-third.

### **Tax payable by:**

Individuals resident and estates administered in Denmark.

### **Basis of assessment:**

The ordinary taxable income including income from foreign sources.

### **Exemptions:**

Estates which are administered immediately following a person's decease are exempted from income tax, provided the following conditions are fulfilled:

- the value of the estate's assets at the time of decease must not exceed DKR 400 000;
- the net value of the estate at the time of decease must not exceed DKR 300 000;
- the value at which assets are paid out to heirs, etc. must not exceed DKR 350 000.

### **Deductions:**

The taxes calculated on the net income are reduced by a percentage of a personal allowance. In 1983 the general personal allowance was DKR 19 200. The personal allowance for married pensioners was DKR 20 900. For single pensioners the allowance was DKR 38 300.

Estates:

The income is reduced by an annual deduction of DKR 48 000.

### **Married couples:**

The wife is taxed separately. Account is however taken of a spouse's income in some respects when assessing tax. Children are liable to tax independently.

### **Non-residents:**

Individuals are taxable on their income in Denmark from employment, pensions or grants, etc., according to the same rules as residents, apart from a certain standardization of the rules on personal allowance and certain restrictions as to the allowance on assessment, depending on whether those concerned have been living in the country for more or less than six months.

**Collection:**

The employer or employing authority is required to withhold from the remuneration paid for personal work of a service nature and from certain other types of income, such as pensions, a provisional tax known as A-Tax.

Distributed dividends are subject to a provisional dividend tax of 30%. Other income, primarily from self-employment and capital normally pays a provisional tax according to a demand note, known as B-Tax.

**Tax at source:**

A-Tax is withheld from every person who receives a salaried income in Denmark from employment there or who receives a pension or allowance from Denmark.

The basis of assessment of tax is the taxpayer's gross income minus all deductions other than the personal allowance. However, a further deduction is made of a sum equal to the figure which would be obtained if the personal allowance were taxed at the lowest rate.

The provisional taxation of married couples is levied on each of them separately. If one of the spouses has no income or otherwise cannot make full use of his or her allowances (general deductions on assessment + personal allowance) it is transferred to the other spouse.

**Rates:****Individuals:**

In 1983 the basic amount of tax was calculated according to the following scale of income less personal allowances etc.:

– on the first DKR 103 200. . . . .	16 %
– on the next DKR 68 800 . . . . .	32 %
– on the remainder . . . . .	44 %

The percentage rate of tax to be levied on the basic amount is laid down by law every calendar year; the percentage for 1983 was 90%.

Should the combined total of a person's State income tax, contributions to old-age pension, contributions to the sickness *per diem* fund, and county and local income tax exceed 73% of his taxable income for the year in question, the State income tax is reduced to bring the combined total down to 73%.

Should the combined total of a person's State income tax, contributions to old-age pension, contributions to the sickness *per diem* fund, county and local income tax and wealth tax, after any reduction that may apply under the rule given in the previous paragraph, exceed 78 % of his taxable income, the wealth tax is reduced by 60 % and, if necessary, the State income tax is reduced by the amount still in excess.

**Estates:**

The tax amounts to 40% of the income after deducting the estate allowance.

**Carry-over of losses:**

If the total ordinary taxable income for any income year shows a loss, this loss may be deducted from the special taxable income for the same income year. If the loss exceeds the special income, this loss may be deducted from the taxable income in the five immediately succeeding income years.

The loss of a jointly taxed spouse has to be deducted from the taxable income of the other spouse before any carrying forward.

During the five-year period, the deduction in question may not be carried forward to the second income year, if it can be deducted in full from the taxable income for the first year.

## **Municipal income tax**

*(Kommunal indkomstskat)*

Statutory Notice No 370 of 13 August 1979.

The income tax of a person fully liable for municipal income tax is normally payable to his tax municipality, i.e. the municipality in which the person in question is resident or – if he has no place of residence – to the municipality in which he was staying on 5 September before the calendar year in question. The same rule applies for married women. However, another municipality can be fully or partly entitled to tax, since a stay of at least three months in a municipality gives that municipality a right to part of the municipal income tax to which the taxpayer is liable, calculated in proportion to the length of the stay.

Persons who are only partly liable to tax usually pay income tax to the municipality in which they receive their income.

### **Tax payable by:**

All persons liable to State income tax.

### **Basis of assessment:**

The taxable income for State income tax.

### **Collection:**

See State income tax (DK 01).

### **Non-residents:**

The dividend tax withheld is a definitive tax. Shareholders residing abroad may be able to claim a refund of the dividend tax in so far as an agreement for the avoidance of double taxation would justify the refund.

### **Collection:**

Whenever a decision is taken to pay out or credit dividends, the dividend tax becomes due and is paid to the State by the company which distributes the dividends.

### **Rate:**

30%.

### **Collection:**

The tax must be paid before the expiry of a term laid down in the approval from the State tax directorate.

The collection is made by the District Inspectorate of Taxes.

### **Rate:**

50% of the amount by which the value of each share exceeds DKR 200.

### **Special circumstances:**

## Special income tax

(*Særlig indkomstskat*)

Statutory Notice No 355 of 24 June 1982.

### Beneficiaries:

The State and municipalities.

One-third of the special income tax devolves to the municipality.

### Tax payable by:

(a) Persons and estates who are liable to State income tax;

(b) Companies, associations, corporations and autonomous institutions, etc. which are liable to income tax under the rules of Corporation Tax Law.

Estates and joint-stock companies etc. are required to include special income calculated in accordance with the rules on the law on special income tax in their ordinary taxable income, instead of paying special income tax.

### Basis of assessment:

- Profit or loss on disposal of machinery, equipment etc., ships, buildings and buildings installations used for trading and covered by the law on depreciation.
- Profit or loss on the disposal of patent rights etc., time-limited rights, rights in virtue of dividend contracts and lease or hire contracts.
- Profit or loss on the disposal of shares, on certain conditions only. Gains on the sale of ordinary shares are not taxed provided disposal takes place more than three years after acquisition. Special income tax is chargeable on the disposal of shares held by a principal shareholder only in accordance with special rules which have the effect that gains after seven years' ownership are reduced by half.
- Profit or loss on the distribution of liquidation assets of joint-stock companies and cooperative societies during the calendar year in which the company was finally liquidated. The tax is not chargeable where assets are sold more than seven years after acquisition.
- Certain compensation and bonuses, received from the taxpayer's employer.
- Some payments pertaining to pension funds.
- *Ex gratia* payments made from public funds, from charities and from cultural funds.
- Profit on the disposal of property. Exceptions to this are one or two family houses occupied by the owner, on conditions which are specified in detail.
- Capital goods acquired for purposes of trade or speculation are not covered by the law on special income tax.

### Exemptions:

Profit realized on the disposal of property is not included under special income, where such disposal attracts disposal tax under the rules of the law on property derestriction tax etc.

Profit realized on the receiving of damages or insurance amounts is exempt from special income tax, if rebuilding is undertaken.

Compensation for expropriations of real property which have taken place since 15 May 1979.

**Deductions:**

Certain types of special income are subject to special rules for the calculation of profit and loss.

**Married couples:**

The wife is taxed separately from the husband.

**Non-residents:**

Those taxpayers who have limited tax liability, are only taxed on special income deriving from personal goods covered by the limited tax liability pertaining to the exercise of a trade or to property transactions.

**Collection:**

Special income tax is payable in three instalments on 1 September, 1 October and 1 November in the year in which the tax is assessed, the last date for payment being the 20th of the month in which it falls due.

**Rates:**

Before calculating special income tax, the special income is reduced by DKR 6000. On the income thus reduced, tax is calculated at 50%.

Where real property is sold more than three years after acquisition, the gain is reduced by 20% for each year. Thus in effect the rate changes, falling from year to year until no tax is due.

In the case of shares held by a principal shareholder the gain is reduced by 10% for each year after the third. Thus the rate falls here too. But as the basis is simply reduced by half after seven years the effective rate of taxation only drops to 25%.

**Supplementary tax:**

If the proper annual declaration is not submitted on time, the tax is increased in accordance with the rules of the law on tax control.

**Special circumstances:**

When a person's liability to tax in Denmark ceases, because of his departure abroad etc., he is required, before the end of the month following the date on which his tax liability ceases, to submit a declaration of special income during the current income year. Persons concerned are required, before the end of the month following the date on which their tax liability ceases, to calculate and pay the special income tax.

Regarding merger of joint-stock companies and cooperative societies etc., special regulations are provided in Law No 143 of 2 May 1967 as amended by Law No 586 of 13 December 1972 and Law No 647 of 19 December 1975 and the Ministry of Finance's Decree No 126 of 1 April 1966.

Special income tax is not levied on disposals of property which are subject to real property disposal tax (DK 39 – see p. 187).

**Carry-over of losses:**

In certain cases it is permitted to calculate special income so as to produce a negative amount, in so far as the rules of calculation show a loss.

In so far as the special taxable income is negative, an amount equal to the negative special income may be deducted when calculating the ordinary taxable income.

In so far as the ordinary taxable income calculated for any income year shows a loss, this loss may be deducted from the special taxable income for the same income year. If this loss is in excess of the special income, the excess amount may be carried forward to the five immediately succeeding income years.

- (b) Those institutions etc. mentioned under heading I (e) above are only liable to tax in their trading income and special income pertaining to trading. Expenses may only be deducted when they relate to sources of income, which are included in the taxable income.
- (c) In the case of buying associations etc. which are liable for tax as mentioned in heading I (c) above, the taxable income is calculated as a percentage of the associations' capital at the end of the income year. The capital is calculated according to the same rules as apply to personal capital tax. When calculating the association's capital, any profit distributed for the income year is disregarded.  
The income is calculated as 6% of that part of the capital corresponding to the ratio between turnover with non-members and members, plus 4% of the balance.

**Exemptions:**

If the taxable income of joint-stock companies etc. included under heading I (a) above comprises dividends from other companies or if a joint-stock company's sole activity is to own shares in another company, permission may be given for the tax to be reduced. This credit is set off against personal income tax, any excess being paid to the shareholder.

The credit can be obtained by foreigners where there is a double taxation agreement with their country and that country also grants tax credits. The tax credit is then taxed in the same way as a dividend, i.e. at 30%.

## Hydrocarbon tax

*(Kulbrinteskatt)*

Laws No 175 and No 176, both of 28 April 1982.

### **Beneficiary:**

The State.

### **Tax payable by:**

- (a) individuals, estates, corporations, etc. which derive income from the extraction of hydrocarbons in Denmark;
- (b) individuals, estates, corporations, etc. which do business or earn wages or the like in connection with the extraction of hydrocarbons in Denmark, and which are not liable to tax in Denmark under the Law on the deduction of tax at source or the Law on corporation tax.

### **Basis of assessment:**

Persons or companies which derive income from the extraction of hydrocarbons pay personal income tax or corporation tax to the State, and hydrocarbon tax as a supplement to that tax.

Personal income tax or corporation tax are assessed under the general rules of tax legislation. The following special rules apply however:

- Hydrocarbon income (defined by a 'ring fence') is calculated separately.
- The law allows standard prices to be set.
- Production installations and the like are depreciated in accordance with the rules on machinery, equipment and similar assets.
- Expenditure on exploration is always deductible.
- Losses on hydrocarbon extraction activities may be carried forward for up to 15 years.

The basis of assessment for the hydrocarbon tax is calculated separately and is basically independent of the basis of assessment for personal income tax or corporation tax. The same rules are applied as those used in calculating the personal income tax or corporation tax due on hydrocarbon income. The following exceptions are made, however:

- Hydrocarbon income is calculated field by field within the ring fence.
- The rules on allocation to investment reserves, investment allowances, accelerated depreciation and the writing down of stocks do not apply.
- In calculating the hydrocarbon income from a field a special basic 'hydrocarbon allowance' is applied, which varies with the investment put in. The hydrocarbon allowance is equal to 25% of the investment in a field annually, and is granted for 10 years including the year in which depreciation on the asset or assets began.
- In calculating the income subject to hydrocarbon tax there is an allowance for the whole of the personal income tax or corporation tax paid in the same year on income from hydrocarbon extraction.

Individuals or companies doing business carrying on activities in connection with hydrocarbon extraction calculate their income in accordance with the ordinary rules of tax legislation.

## **DK 10.2**

Persons earning wages or salaries in connection with hydrocarbon extraction pay tax on the basis of their wage or salary income, without any deductions.

### **Deductions:**

See 'Basis of assessment' above.

### **Non-residents:**

See 'Tax payable by' above.

### **Collection:**

The tax is collected on a provisional basis in two yearly instalments to be paid by 1 October in the income year and 1 June the year following.

In the case of the individuals, companies, etc. referred to under 'Tax payable by' (a), it is collected in accordance with the ordinary rules of tax legislation.

In the case of the individuals and companies referred to under 'Tax payable by' (b), it is also collected in accordance with the ordinary procedure, except in the case of wage and salary incomes, where 30% of income is withheld at source.

### **Rates:**

Hydrocarbon tax is set at 70%. In the case of the individuals, companies, etc. referred to under 'Tax payable by' (a) corporation tax is 40% and personal income tax is at the rate set in the State income tax scale.

In the case of the individuals, companies, etc. referred to under 'Tax payable by' (b) corporation tax is 40% and personal income tax is at the rate set in the State income tax scale with the addition of a supplementary tax of 25%.

Those earning wages and salaries in connection with the extraction of hydrocarbons pay a final State tax of 30% of their income.

### **Carry-over losses:**

Losses in fields which have been abandoned can be deducted from the total taxable hydrocarbon income from fields making gains before the tax is charged. For a given year the amount deducted may not be greater than the taxable hydrocarbon income of that year. Any remaining loss can be brought forward so as to deduct it from the hydrocarbon income made in later years, having regard to the rule allowing carry-forward of single field deficits for 15 years.

Losses recorded in the statement of total taxable hydrocarbon income can be carried forward up to 15 years.

Non-resident persons and companies are taxed only on certain income arising in Germany; there are special regulations governing deductions, rates of tax and tax withheld at source.

In certain cases, an income tax assessment may be found necessary after the end of the year, and additional tax payments may be required.

## Capital yields tax

*(Kapitalertragsteuer)/Special method of collection of income tax and corporation tax*

The Federal Government (50%) and the *Länder* governments (a total of 50%).

### Basis of assessment and tax deductions:

Gross capital yields from certain equities, other shares and fixed-interest-bearing securities of domestic debtors.

#### 1. *Normal capital yield tax* (25%)

This comprises: profits from shares in domestic joint stock companies, cooperative societies, mining associations, sleeping partners' holdings and interest on domestic loans in the form of convertible bonds and participating debentures.

Tax deducted at source is taken into account on assessment. In the case of non-residents, capital yields tax constitutes settlement of income tax/corporation tax. However, if tax is in part refunded, if there is a tax treaty applicable and provided the capital yields do not constitute operating receipts of a domestic permanent establishment; in the latter case, the tax is set off against income tax/corporation tax.

#### 2. *Old-type coupon tax* (30%)

This covers: interest on certain fixed-interest-bearing securities (mortgage bonds for social purposes) issued prior to 1 January 1955:

(a) the amount withheld constitutes settlement of income tax for residents in Germany: inclusion in income tax assessment on request;

(b) refund to non-residents, if there is a tax treaty applicable and provided the interest does not constitute operating receipts of a domestic permanent establishment; in the latter case, offsetting against domestic income tax/corporation tax.

#### 3. *New-type coupon tax* (25%)

This covers: interest on bonds or debt register claims of domestic debtors, if the capital yield accrues to a non-resident, and, in certain cases, interest for broken periods as well.

The amount withheld constitutes settlement of income tax, unless the interest constitutes the operating receipts of a domestic permanent establishment or complete or partial refund is claimable under a double taxation agreement.

In the case of a domestic permanent establishment, the coupon tax withheld is deducted from or refunded on income tax/corporation tax.

**Disclaimers/Refunds:**

1. In respect of ordinary capital yield tax:
  - (a) individuals resident in Germany, where there is no assessment for income tax (certification procedure);
  - (b) if the capital yield accrues to bodies whose objects are religious, of public utility or charitable;
  - (c) interest from certain fixed-interest-bearing bonds issued before 1 January 1955 on tax-free interest terms.
2. In respect of old-type coupon tax:
  - (a) interest from certain fixed-interest-bearing bonds issued before 1 January 1955 on tax-free interest terms;
  - (b) capital yield accruing to non-residents (except for loans in the form of convertible bonds, and participating debentures).
3. In respect of new-type tax on coupons:
  - (a) certain cases of interest on tax-free terms;
  - (b) capital yield which is subject to ordinary capital yield tax or the old-type tax on coupons;
  - (c) capital yield accruing to certain international organizations.

### Basis of assessment:

In the case of income from agriculture and forestry, industrial or commercial activities and self-employment, the profits, and in the case of other kinds of income the surplus of receipts over operating expenses, are used as a basis. As regards taxpayers who are obliged to keep accounts by the commercial code, all income is to be treated as income from industrial or commercial activities.

Tax is calculated on total income received during the year.

### Exemptions:

The bodies exempted include the Federal postal administration; the Federal railway; the Bundesbank; corporations, associations, trusts and funds which, according to their charters, statutes or memoranda of association and their actual management, are conducted for non-profit-making, charitable or religious purposes; housing and settlement associations recognized as working for the public good; professional and trade associations not conducted for commercial ends; pension and similar social funds; agricultural cooperative and equivalent associations.

- expenses, up to a certain maximum sum, incurred for the promotion of charitable, ecclesiastical, religious and scientific objects, objects of national policy, and other objects which are recognized as being ventures of general benefit to the community and worth promoting;

For corporations taxable under the imputation system the right to carry back losses to the two preceding assessment periods is limited in certain cases.

**Collection:**

By annual assessment.

Assessment is not made in the case of corporations, associations, trusts and funds for which the corporation tax liability is considered to be settled by deduction at source.

**Rates:**

1. *Standard rate* ..... 56%  
(Article 23 paragraph 1 of the Corporation Tax Law)
  - (a) joint-stock companies and other corporations within the meaning of Article 43 of the Corporation Tax Law, i.e. corporations taxable under the imputation system;
  - (b) foundations within the meaning of Article 1, paragraph 1, points 4 and 5 of the Corporation Tax Law, with the exception of income derived from the commercial business of a foundation exempt from corporation tax;
2. *Reduced rate* ..... 50%  
(Article 23, paragraphs 2 and 3 of the Corporation Tax Law)

**Tax on distributed profits:**

For distributed profits of joint-stock companies with unlimited tax liability and certain other corporations with unlimited tax liability (in particular, trading and business cooperatives), corporation tax amounts to a uniform rate of 36% of profits calculated before deduction of corporation tax. Where the corporation tax to be calculated according to the tax rate provisions is more than 36% (e.g. where the above-mentioned tax rate of 56% is applicable), the distribution of profits entails a reduction in corporation tax. Where the corporation tax to be calculated in accordance with the tax rate provisions is lower than 36% (e.g. in the case of tax-free incomes), the corporation tax is raised in the event of distribution of profits.

In order to determine the tax on the distribution of profits, corporations must give a breakdown of their capital resources which can be used for the distribution of profits, in accordance with the taxation of such capital resources under the tax rate provisions. The breakdown is to be calculated in a continuously adjusted basis separate from the balance sheet.

The State.

### Tax payable by:

Greek companies with share capital, State, municipal and community undertakings and profit-making enterprises, cooperatives and associations thereof, foreign undertakings operating in Greece in whatever company form, non-profit-making Greek and foreign legal persons governed by public or private law.

### Basis of assessment and rates:

Tax is payable on profits in the broadest sense and is assessed as follows:

1. On the net incomes and profits of Greek companies from operations in Greece and abroad, less that portion paid out as dividends to shareholders, as fees and percentage share-outs to board members and as bonuses on top of salary and percentage share-outs to working directors and managers.

The tax is payable only on non-distributed profits. The rate is 45%, but for publicly quoted Greek industrial and mining companies it is reduced to 40%. Pursuant to Article 4, paragraph 4, of Law 1262/1982, companies with share capital which carry through productive investments with State subsidization (as provided for in that law) will continue to have their profits taxed at the old rates of 40% or 35% which pertained before Law 1249/1982 came into force.

That portion of profits which is distributed to shareholders and board members, etc., is taxed in the names of the recipients. Tax is deducted at source by the paying-out company when the monies due are paid or credited to the recipient. The rates of tax are as follows:

- (a) For dividends on unquoted shares:
  - 53% for ordinary shares;
  - 47% for nominal shares.
- (b) For dividends on shares which have been publicly quoted for at least four months prior to the end of the period for which the dividend is payable:
  - 45% for ordinary shares;
  - 42% for nominal shares.
- (b) The first 25 000 drachmas of dividend payment are tax free when the recipient receives such payments from only one company. When dividend payments are received from more than one company the tax free amount is 100 000 drachmas. Recipients of dividends on quoted and unquoted nominal shares and on quoted ordinary shares have the option of either having such income assessed together with their annual taxable income from all sources or of having it taxed separately.

Recipients of dividend income from unquoted ordinary shares have no further tax obligation after the tax due on this income has been withheld at source and are not allowed to combine this income with their income from other sources for tax purposes.

- (c) Tax on the fees and percentage share-outs paid to board members and on bonuses on top of salary and percentage share-outs paid to working directors and managers is withheld at source according to the tax scale for natural persons without any portion being exempt. Subsequently, the recipient is obliged to include this income in his annual tax statement so that it can be assessed for income tax in the normal way.
2. For the total net incomes or profits of State, municipal and community undertakings and profit-making enterprises the rate of tax is 45%.
  3. In the case of cooperatives and associations thereof the net income or profit remaining after payments have been made to their members is taxed at the rate of 30% except for agricultural and craft cooperatives where the rate is 25%. The payments made to members are taxable as for normal income tax in line with the provisions for natural persons.
  4. The net incomes and profits of foreign undertakings operating in Greece in whatever company form, of foreign organizations, and likewise profits accruing from operations conducted in Greece on a permanent basis, are taxed at the rate of 45%.
  5. For Greek and foreign non-profit-making legal persons the rate of tax is 20% on net income or profit from all sources excluding income or profit acquired in the fulfilment of their functions.

**Collection:**

The tax is collected on an annual basis.

**Carry-over of losses:**

As per the tax on the incomes of natural persons.

**Reliefs:**

Greek and foreign industrial, craft, mining and hotel undertakings may, given certain conditions, deduct a percentage of their investment outlay in various regions of the country from their net profits. The percentage deductible in this way is determined on a sliding scale according to the region where the investment takes place.

Export undertakings are permitted to 1% of their gross revenues from exports from their income to cover undocumented special exporting costs.

## Personal income tax

(*Impôt sur le revenu*)

Article 1 of Law No 59–1472 of 28 December 1959; Law No 76–660 of 19 July 1976; Law No 76–1234 of 29 December 1976; Law No 78–688 of 5 July 1978; Law No 78–741 of 13 July 1978; 1982 and 1983 Finance Laws.

### Beneficiary:

The State.

### Tax payable by:

Individuals.

In the case of partnerships (*sociétés de personnes*) which have not opted to pay corporation tax, tax is payable by each partner.

### Basis of assessment:

Total net income, determined according to the arrangements applicable to each type of income (including income from foreign sources in cases where taxpayers are resident in France), less any legally deductible expenses (e.g. interest on money borrowed to purchase a principal residence, expenditure on energy saving).

### Exemptions:

- Individuals whose income net of expenses did not exceed FF 27 000 in 1982 or FF 29 500 where the individuals are over 65 years of age.
- Interest on certain government loans.
- Certain pensions, benefits and allowances (war pensions, family allowances, for example).
- Capital gains.

However, Law No 76–660 of 19 July 1976 makes capital gains realized by individuals from 1 January 1977 subject to personal income tax, where assets or rights of any kind are transferred for valuable consideration (this law provides for numerous exemptions). The same law also creates a flat-rate tax on sales of precious metals and objects. Finally Law No 78–688 of 5 July 1978 provides for the taxation of net capital gains realized from the transfer of securities for consideration.

### Deductions:

- All expenses involved in earning or maintaining income. For natural or legal persons subject to the tax on industrial and commercial income as well as persons subject to corporation tax, representation expenses are limited to 90%. In the case of employed persons, expenses of employment are fixed, as a general rule, at 10% of the wage or salary.
- An allowance of 10% is granted for pensions and free life annuities; this allowance may be neither less than FF 1800 nor more than FF 9800 for each retired person or pensioner in a household in respect of 1982 income.

- In the case of salaries, wages, pensions and free life annuities, a general allowance of 20% is granted. This allowance is, however, limited to 10% for the fraction of wages net of employment expenses which exceeds FF 165 000 where this remuneration is paid to persons who, directly or indirectly, hold over 35% of the shares in the firm which employs them. Lastly, it is no longer granted where wages and pensions are more than one and a half times the limit of the last band of the tax scale, i.e. FF 460 000 in respect of 1982 income.
- Craftsmen, tradesmen, industrialists and farmers who have joined approved management centres and persons who have joined approved associations open to members of the professions (including in particular certain legal professions) are entitled, on certain conditions, to an allowance on their taxable profit (20% for the fraction of profit which does not exceed FF 165 000; 10% for the fraction between FF 165 000 and FF 460 000).
- In the case of individuals of more than 65 years of age or the disabled whose total net income is less than FF 36 600, an allowance of FF 5 920 is granted. This allowance is FF 2 960 for individuals of more than 65 years of age or disabled persons with a total net income of between FF 36 600 and FF 59 200 in 1982.
- An allowance of FF 2 720 is granted to single taxpayers with no dependent children, provided that at least half of their income is made up of wages or salaries and their total net income was less than FF 20 680 in 1980.

#### **Married couples:**

Family incomes are aggregated, but the aggregate income is divided into a number of parts, according to the taxpayer's family responsibilities; family quotient (*quotient familial*). The advantage gained is subject to an upper limit.

#### **Persons not resident in France for tax purposes:**

Tax is payable on income derived from French sources, subject to the provisions of the relevant international conventions.

#### **Collection:**

As a general rule, by means of assessment books. Certain types of investment income, however, are compulsorily subject to a withholding tax of 10%, 12% or 25%<sup>1)</sup>, which is deductible from personal income tax or may be refunded in the case of resident persons. Alternatively persons to whom income accrues in France from fixed-interest investments (interest on negotiable bonds, interest on deposit certificates and miscellaneous claims) may opt to be subject to a final levy of:

- 25% on the interest on negotiable bonds;
- 33⅓% on the interest on certain securities issued before 1 June 1978;
- 38% on the interest on claims, deposits, indemnity bonds and current accounts accrued as from 1 January 1980 and on the interest on certificates and securities issued as from 21 January 1980 where the recipients state their name and place of residence for tax purposes at the time of payment. If this condition is not fulfilled, the rate is increased, first to 42%, and then to 50%. This levy is, under certain conditions, in full discharge of personal income tax. It is applied automatically to income accruing to persons resident outside France and to interest on certain claims, even when paid to residents.

<sup>1)</sup> 10 or 12%: rates applicable to interest on negotiable loans issued by French companies or other bodies, according to the date of issue;  
25%: rate applicable to dividends of French companies paid to non-residents and to distributions of profits made by foreign companies operating in France.

Tax amounting to 33⅓% is also withheld at source in the case of non-commercial and similar income accruing to persons not maintaining permanent business premises in France.

Wages, pensions and life annuities derived from French sources and paid to persons not resident in France for tax purposes are, as from 1 January 1977, subject to a withholding tax with a maximum rate of 25%.

On certain profits made on the construction and sale of buildings a levy is charged when the property is transferred, the rate being 25% (building permit issued between 1 January 1966 and 31 December 1971), 30% (building permit issued between 1 January 1972 and 31 December 1973) or 33⅓% (building permit issued after 31 December 1973). In certain circumstances this levy is in full discharge of personal income tax. For profits made between 1 January 1982 and 31 December 1986 the rate has been fixed at 50%.

**Rates:**

0–60%, graduated. The scale is applicable to gross income divided by the number of parts (see under Married couples). The resulting figure is then multiplied by the total number of parts. Special relief has been introduced for small incomes.

As regards shares, a fraction (50%) of the tax already charged on distributed profits as corporation tax is taken into account in calculating personal income tax. This fraction (tax already paid to the Treasury or tax credit) is deducted from the amount of personal income tax or is refunded.

**Special features:**

Agricultural profits are determined on a flat-rate basis, provided receipts from the farm concerned have not exceeded FF 500000 on average for two consecutive years, unless the taxpayer opts to be taxed under the simplified system of taxation of actual profits. Unless they opt for the normal system, farmers whose average annual receipts calculated over two consecutive years are between FF 500000 and FF 1000000 are fully entitled to apply the simplified system. Farmers whose receipts average more than FF 1000000 must be taxed under the normal system of taxing actual profits.

Generally, small industrial or commercial enterprises are taxed under a flat-rate system when their turnover does not exceed FF 500000 (or FF 150000 for suppliers of services). They may opt for a simplified form of taxation on actual profits when their receipts do not exceed an amount that is double that of the limits for the flat-rate system.

Non-commercial profits may be assessed administratively, if annual receipts do not exceed FF 175000.

In some cases, the amount of income liable to tax may be determined by external criteria (mode of living) or on the basis of personal expenses which are obvious or well known.

Persons who are not resident in France but who own, in whatever capacity or manner, one or more residences these may be taxed on an income equal to three times the actual rental value of such residences.

Personal income tax is not deductible.

**Carry-over of losses:**

Five years.

## Duty on tobacco

*(Imposition du tabac)*

Articles 565 to 575 M of the General Tax Code; Law No 76-448 of 24 May 1976; Decree No 76-1 324 of 31 December 1976; Order of 31 December 1976; Article 25 of the 1979 Finance Law; Decree No 80-262 of 3 April 1980; 1983 Finance Law.

### Beneficiary:

The State.

### Duty payable on:

Consignment of tobacco to distributors.

The Monopoly Administration of Tobacco and Matches (SEITA) has exclusive production, import and wholesale marketing rights for products directly originating from non-Member States (cigars, cigarettes, smoking tobacco, chewing tobacco and snuff). The retail sales monopoly is held by the revenue authorities which exercise it through retailers designated as their agents and required to pay royalties.

The importation and wholesale marketing of manufactured tobacco from Member States of the European Economic Community may be carried out by any natural or legal person who has obtained an identification entitling him to exercise such activities.

### Rates and basis of assessment:

Manufactured tobacco is subject to a consumption duty based on the retail sales prices which are fixed by ministerial decree, the rates of which vary according to the category of tobacco. As far as cigarettes are concerned, this duty is calculated in accordance with Article 8 of Council Directive 72/464/EEC of 19 December 1972.

For cigarettes in the most popular price category within the meaning of this directive, the consumption duty is calculated by applying the standard rate to the retail sales price. The amount obtained in this way is called 'basic duty'.

For other cigarettes the consumption duty is calculated by applying to their retail sales price a rate equal to 95% of the standard rate and by adding to the amount obtained in this way a specific fixed share equal to 5% of the basic duty. The total amount calculated in this way may not be lower than a minimum levy fixed per thousand units.

Manufactured tobacco other than cigarettes is subject to a standard rate applicable to its retail sales price, subject to a minimum levy fixed per thousand units or per thousand grams. Where the duty calculated in this way, for cigars and smoking tobacco, exceeds an amount called the 'threshold duty', the part of the retail price exceeding the part corresponding to the threshold duty is taxed at a reduced rate and the amount determined in this way is added to the threshold duty.

For the different groups of products set out in Article 575, the standard rate, the minimum levy, the threshold duty and the reduced rate are fixed in accordance with the following table:

Groups of products	Standard rate	Minimum levy	Amount of threshold duty	Reduced rate
	%	per thousand units or per thousand grams		%
Cigarettes	50.50	30	–	–
Cigars wrapped in natural tobacco	26.50	34	112	14.70
Cigars wrapped in reconstituted tobacco	29.50	39	130	17
Smoking tobacco	40.80	12	35	27.80
Snuff	34.70	8	–	–

Slice of the taxable net value of assets:

Up to and including FF 3 200 000 . . . . .	= 0%
Between FF 3 200 000 and FF 5 300 000 . . . . .	= 0.5%

- bonds held anonymously are automatically subject to a levy under the wealth tax scheme. This levy is applied at the maximum rate to the bond's nominal value and is charged by the paying institution when paying the interest if the owner does not wish to declare his identity.

The tax is calculated by attributing each amount of excess provision (after deduction of the allowance) and each addition to a provision, to the financial year in which the original provision was created.

### **Rates:**

1% for each month which has passed since the provision was created.

## Corporation tax

Corporation Tax Act, 1976 (incorporating, as necessary, various provisions of the Income Tax Act, 1976 as amended by the Finance Acts 1967 and subsequent Finance Acts).

### **Beneficiary:**

The central government.

### **Tax payable by:**

Companies. For this purpose a company is defined as any corporate body but does not include a local authority, health board, vocational education committee or committee of agriculture.

### **Basis of assessment:**

All profits (including income and chargeable capital gains other than gains from disposals of development land), with the exception of dividends and other distributions received from other resident companies, arising in a company's accounting period.

A company not resident in Ireland is charged corporation tax only if it carries on a trade in Ireland through a branch or agency and then only, broadly speaking on any income or chargeable gains (other than gains from disposals of development land) attributable to the branch or agency.

### **Exemptions:**

Credit unions, lotteries and the voluntary health insurance board are exempt on all of their profits. Charitable companies, companies promoting amateur or athletic games or sports, friendly societies, agricultural societies, harbour authorities, trade unions, trustee savings banks, agricultural and fishery cooperatives, approved superannuation funds, mutual trading companies and non-trading companies are all exempt from corporation tax on income which fulfils certain statutory requirements.

### **Special reliefs:**

Companies which export certain manufactured goods and provide certain services related to exporting are entitled to relief from corporation tax in respect of the income from such business.

Companies which export goods manufactured or packaged or handled at Shannon Airport or which provide certain services connected with the use or development of Shannon Airport are relieved from corporation tax in respect of the income from such operations.

These reliefs ceased to be available after 31 December 1980, on the introduction of the '10% scheme' of relief from corporation tax, except to companies which had established entitlement to the relief before 1 January 1981, and which may accordingly continue to benefit therefrom until their period of entitlement expires.

With effect from 1 January 1981, until 31 December 2000 profits from manufacturing carried on within the State, are charged to corporation tax at an effective rate of 10%. This relief (known as the '10% scheme') extends also to profits of certain service activities carried on at Shannon Airport.

A temporary relief for increases in stock value is available to Irish resident companies engaged wholly or mainly in specified trades (manufacturing, constructing and farming) or in the sale of plant and machinery (excluding passenger vehicles) or goods to persons engaged in those trades. The relief consists, broadly, of allowing a deduction in computing trading profits of three-quarters of the amount by which the increase in trading stock (including work in progress) exceeds 20% of the trading profits (before deducting capital allowances and losses). Building societies and life assurance companies are the subject of special provisions.

### **Deductions:**

Expenses incurred for the purpose of the business. Capital allowances on the depreciation of certain assets (for example, certain industrial buildings and items of plant and machinery) are given.

### **Collection:**

Annual assessment of profits arising in a company's accounting period. Corporation tax is payable in two equal instalments, the first six months after the end of the accounting period, and the second, generally, after a further three months. On payment of a dividend on or after 9 February 1983, an Irish resident company is required to pay an amount of corporation tax, known as advance corporation tax, equal to the amount of the tax credit in respect of the dividend. However, in relation to dividends paid after 8 February 1983 but before 9 February 1984, the amount of advance corporation tax payable is 50%. A payment of advance corporation tax can be set off against the company's main corporation tax liability on its income.

### **Rates:**

The normal rate is 50% but reduced rates apply from 1 January 1982, as follows: Companies with profits not exceeding IRL 25 000 are chargeable at 40% and those whose profits lie between IRL 25 000 and IRL 35 000 at effective rates of between 40% and 50% to be determined by reference to the amount of the profits.

A rate of 35% applies to public utility and certain other companies providing public services and to companies prohibited by law from distributing their profits.

A special temporary rate of 10% applies to manufacturing industry in general.

Capital gains (except gains from disposals of development land) are effectively chargeable to corporation tax at the rates appropriate to such gains.

### **Special features:**

A surcharge at the rate of 20% is levied on the undistributed investment or estate income of a close company (broadly a company under the control of not more than five persons or under the control of directors) or on the income from any source of a close company which provides professional services or engages in certain other types of activities.

The losses of a member of a group may be set off against the profits of another member. Where payments of dividends are made between members of a group the company receiving the dividends and the company paying them may jointly elect not to make a payment of advance corporation tax. Subject to certain exceptions a resident shareholder is entitled to a tax credit (representing part of the corporation tax paid by the company). This tax credit may be set against his income tax liability.

## Inheritance and gift tax

Capital Acquisitions Tax Act, 1976, and amendments thereto by the Finance Act, 1977, and subsequent Finance Acts.

### **Beneficiary:**

The central government.

### **Tax payable on:**

Gifts and inheritances taken by the same donee/successor from any disponent to whom the same table of rates applies.

### **Tax payable by:**

Donees, successors, trustees, personal representatives.

### **Basis of assessment:**

Where the disponent, in relation to gifts, is domiciled in Ireland at the date of the disposition, or in certain cases, at the date of the gift, or, in relation to inheritances, was so domiciled at his death, or where, in relation to both, the proper law of the settlement is Irish, the taxable gift or inheritance consists of the whole of the property taken by the donee/successor. In any other case, only the property situated in Ireland is liable to tax.

In general, the value of property comprised in a gift or an inheritance is its market value, after deducting liabilities, costs and expenses. Rules are provided for valuing limited interests, that is, interests less than absolute interests.

The rate of tax on any one gift/inheritance taken after 2 June 1982, is determined by reference to the cumulative total of the value of gifts and inheritances taken by the donee/successor after that date up to the date of that gift/inheritance from any disponent to whom the same table of rates applies.

### **Deductions:**

50%, up to a maximum of IRL 200 000, of the value of agricultural land and buildings taken by a donee/successor who is a farmer.

50%, up to a maximum of IRL 200 000, of the value of growing trees taken by any donee/successor.

### **Exemptions:**

These include:

- the first IRL 500 of the value of gifts in any one year;
- normal and reasonable expenditure by a disponent on his immediate family;
- property taken by Irish charities;
- houses, gardens, articles of national, scientific, historic or artistic interest which fulfil certain conditions;
- payments and pensions to retired employees;
- certain government securities taken by foreigners.

**Collection:**

On the basis of declarations made by the taxpayer.

**Rates:**

There are four tables of rates, varying according to the relationship existing or deemed to exist between the disponer and the donee/successor.

- Table I (spouse, child, minor child of a deceased child):  
After an initial exclusion of IRL 150 000, tax is payable at progressive rates from 25 % to 50 % on successive portions;
- Table II (lineal ancestor or descendant other than as at Table I):  
After an initial exclusion of IRL 30 000, tax is payable at progressive rates from 5 % to 50 % on successive portions;
- Table III (brother, sister, nephew, niece):  
After an initial exclusion of IRL 20 000, tax is payable at progressive rates from 10 % to 50 % on successive portions;
- Table IV (all other):  
After an initial exclusion of IRL 10 000, tax is payable at progressive rates from 20 % to 60 % on successive portions.

In the case of gifts made more than two years before the death of the disponer tax is reduced by 25 %.

## Capital gains tax

Capital Gains Tax Act, 1975, (as amended by the Corporation Tax Act, 1976 and the Capital Gains Tax, (Amendment) Act, 1978) and amendments thereto by the Finance Act, 1977 and subsequent Finance Acts.

### Beneficiary:

The central government.

### Tax payable by:

Persons, including companies, resident or ordinarily resident in Ireland on chargeable assets wherever situated.

Persons neither resident nor ordinarily resident in respect of chargeable gains accruing from the disposal of the following assets situated in Ireland:

- (i) land in the State;
- (ii) minerals in the State or rights, interests or other assets related to minerals or to the searching therefor;
- (iii) assets of a business carried on in the State;
- (iv) rights in the Irish part of the Continental Shelf area.

Persons wholly or partially exempted include local authorities and certain other public bodies, charities, superannuation funds, registered trade unions, friendly societies, etc.

### Tax payable on:

Gains on the disposal of chargeable assets. Chargeable assets, subject to certain exceptions, comprise all forms of property including incorporeal property such as debts, options, copyright, goodwill and interests in or rights over any property real or incorporeal. 'Disposal' includes part-disposal and also includes a transfer by sale, exchange or gift. 'Disposal' does not include the passing of assets on death.

An individual not domiciled in Ireland is liable on gains on assets situated abroad only to the extent that the gains are remitted to Ireland.

### Basis of assessment:

Chargeable gains less allowable losses in a year assessment or in an accounting period in the case of a company.

### Exemptions:

The main exemptions are:

- (a) an individual's principal private residence;
- (b) wasting chattels, that is, tangible movable property, excluding currency, with a predictable life of less than 50 years;
- (c) life assurance policies;

- (d) Irish government securities;
- (e) securities of local authorities and certain State-sponsored bodies;
- (f) betting, lotteries and sweepstakes.

**Special reliefs:**

The first IRL 2 000 of an individual's net gains in any year of assessment are not chargeable. In the case of a married couple living together, the first IRL 4 000 of net gains is exempt.

A chattel disposed of by an individual for a consideration not exceeding IRL 2 000 is not chargeable and where the consideration exceeds IRL 2 000 the liability is not to exceed half the difference between the consideration and IRL 2 000.

With respect to an individual aged 55 years or more who disposes of the whole or part of his farm or business:

- (a) if the disposal is to his child it is not chargeable;
- (b) if the disposal is outside his family and the consideration does not exceed IRL 50 000 it is also not chargeable;
- (c) if the disposal is outside the family and the consideration exceeds IRL 50 000 the liability shall not exceed half the difference between the consideration and IRL 50 000.

Where a person disposes of business assets and reinvests the proceeds in other business assets the charge is deferred.

**Computation of gains:**

In general capital gains or losses are computed on the basis of the consideration received on the disposal or part disposal of the asset (or the market value if there is no consideration or the transaction is not at arm's length) less the base cost of the asset (or a portion thereof if a part disposal) together with expenses incidental to the disposal. The base cost, that is, the cost of the asset and any incidental acquisition expenses, is adjusted upwards by reference to the increase in the consumer price index between the year of assessment in which the asset was acquired and the year in which it was disposed of. This adjustment will not operate to convert a monetary gain into an allowable loss or to inflate a monetary loss. Where an asset was already owned on 6 April 1974 (the date of commencement of capital gains tax) the base cost is deemed to be the market value be allowable on that date. In the case of disposals of development land the inflation adjustment is subject to certain restrictions.

Any part of the consideration which is already chargeable to income tax is excluded and, similarly, the allowable expenditure is reduced by any amount which is or would be allowable as a deduction for income tax.

Where a disposal of an asset which was acquired on death is made by the successor the base cost of the asset is deemed to be its market value as at the date of death.

**Collection:**

By assessment.

**Rates:**

The basic rate of tax is 40%. Gains realized on the disposal of assets within one year of acquisition are charged at 60% and gains realized within two or three years of acquisition at 50%. Gains from the disposal of development land are chargeable at 50% and the 60% rate

applies to gains from disposals of development land made within one year of acquisition. Companies are charged to corporation tax on their capital gains effectively at the rates appropriate to the gains. However, gains by companies from disposals of development land are chargeable to capital gains tax and not to corporation tax.

A unit trust is not liable to capital gains tax if all the units are held by exempt persons (excluding persons exempt by reason of non-residence only) or all the investments held by the trust are exempt assets. Provided certain conditions are fulfilled a unit trust is chargeable at a reduced rate on its capital gains.

**Carry-over of losses:**

Normally allowable if a gain on the same transaction would have been chargeable. Losses are set primarily against gains of the same year. The excess, if any, is carried forward for set off against any gains of a future year. Losses cannot be carried back to an earlier year except those accruing to an individual in the year of his death which may be carried back and set off against the gains of the three preceding years.

**Special cases:**

Special rules apply in the following cases:

- (a) disposals to the State, charities and certain other bodies;
- (b) disposal of property subject to a lease and the grant of a lease at a premium;
- (c) bonus and rights issues and other reorganizations of share capital;
- (d) company amalgamations and conversion of securities;
- (e) transfer of business to a company;
- (f) capital distributions by a company to a shareholder.

### Basis of assessment:

Property assessed for rates is immovable property such as land, buildings, factories, shops, railways, canals, woods, rights of fishery and rights and easements over land. Rates are levied on a rateable valuation placed on each rateable property. **Special features:**

The taxpayer's total income also includes 50% of incomes from the property of minor children subject to a legal usufruct on the part of the parents (the other 50% is attributed to

the other spouse, where there is one), and incomes fully available to the taxpayer, or which the taxpayer is entitled to administer without rendering accounts.

Income from property is assessed according to the cadastral system. A tax credit is accorded in respect of income accruing abroad.

#### **System of separate taxation:**

The tax is applied separately to certain categories of income not comprising profits from business (capital gains resulting from the winding-up or sale of businesses; arrears of emoluments; payments of seniority or social insurance allowances due on termination of activity as representative or consultant on a continuing basis, etc.).

In general, the tax is assessed at the rate applicable to half the taxpayer's total net income for the two years preceding that in which it becomes payable.

For separation or redundancy payments, an allowance of 50% is granted where the sum involved does not exceed LIT 10 000 000, of 30% for sums between LIT 10 000 000 and 20 000 000 and of 20% for sums between LIT 20 000 000 and LIT 50 000 000; in any case, an allowance of LIT 100 000 is given for every year or part of a year taken as a basis for assessing the entitlement.

No allowance is granted where the sum involved exceeds LIT 50 000 000.

#### **System of substitutive taxation:**

For natural persons or partnerships whether resident or not, withholding tax is applied to the following items of income, in relation to which no further liability arises:

- interest, bonuses and other forms of yield from bonds and similar securities other than government securities. Rates: 10% for bonds and similar securities issued by credit institutions providing long and medium-term credit; 20% for those issued by other persons accountable for taxes. The rate is reduced to 10% on convertible bonds for the period, not to exceed five years, until the date of their conversion into shares.

Where the interest referred to above is owed by persons resident abroad, the withholding tax must be applied by the resident person responsible for payment, at the rate of 30%.

Withholding tax is not applied to interest, bonuses and other income arising from bonds and similar securities which are exempt from income tax;

- interest, bonuses and other forms of yield arising from bank and post-office deposits and current accounts. Rate: 20%. In the case of debtors resident abroad, withholding tax is applied at the rate of 15%;
- proceeds other than from securities; winnings from games of chance or skill, prizes from competitions, winnings from football pools and betting. Rate: 10, 20 or 25% according to category.

#### **System of deduction at source:**

This system, in fairly general use, is applied to the following items: income from employment and earnings ranking as such; income from self-employment; and income from capital.

#### **Carry-over of losses:**

Not permitted for natural persons and partnerships. However, losses from business, artistic and professional activities can be set off against other items of income within a given financial year.

No 321 of 4 December 1975), Law No 904 of 16 December 1977 (G.U. No 343 of 17 December 1977) and by DL No 936 of 23 December 1977 (G.U. No 354 of 30 December 1977), which became Law No 38 of 23 February 1978 (G.U. No 57 of 27 February 1978).

### **Beneficiary:**

The State.

### **Tax payable by:**

Companies with share capital, private companies (limited liability partnerships), limited liability companies, cooperative societies, mutual insurance societies and all other public or private associations whether or not exclusively or primarily engaged in a commercial activity.

### **Basis of assessment:**

Total net income, comprising net profits as shown in the profit and loss account, or the statement of the company's income. Profits already subject to withholding tax are not included in the base of assessment. Non-commercial resident companies and non-resident companies with a permanent establishment in Italy which carry out commercial activities covered by separate accounts are authorized by law on certain conditions, to keep simplified accounts.

### **Exemptions and concessions:**

The following items are exempt:

- income from buildings belonging to the Holy See;
- income from land and buildings belonging to local public bodies and reserved for communal use;
- income arising from commercial activities carried on in connection with party political campaigns;
- incomes of agricultural cooperatives, small-scale fisheries cooperatives, or labour and production cooperatives (*produzione e lavoro*), under certain conditions.

The tax on incomes of legal persons is reduced by half for regions, provinces, municipalities, chambers of commerce and their affiliates, State enterprises, land reclamation syndicates, charity and welfare institutions and educational institutions.

### **Non-resident companies and associations:**

All companies and other associations of whatsoever kind, whether constituting legal persons or otherwise and not having their registered offices or administrative headquarters or carrying

on their principal activities in Italy, are liable to the tax on incomes of legal persons. Total taxable income of companies concerned comprises only those items accruing in Italy, together with capital gains or losses relating to goods used for or in any way connected with commercial activities pursued in Italy, even though such activities are not carried on through permanent establishments.

**Collection:**

By direct payment to the tax collector's office within the period for filing a return. By November of every year (or by the 11th month after the end of the accounting year if it does not fall on 31 December) a payment on account must be made against the tax due for the following year, of an amount equal to 75% of the tax due for the preceding period.

Collection may be by means of assessment books on certain conditions. By direct payment to the tax collector's office by means of assessment books.

**Rate:**

25% on total taxable income.

**Special features:**

A tax credit in respect of income accruing abroad is granted for the purposes of this tax as well.

**Carry-over of losses:**

Up to five years.

**Profits distributed by companies:**

Profits distributed by companies are subject to the following deductions at source:

- (a) Profits paid in any form and under any name by limited companies and limited partnerships by shareholding and by limited liability companies whether or not cooperatives including mutual insurance companies:

The withholding tax of 10% constitutes payment on account of personal income tax and corporation tax. Bonus issues, scrip issues and free increases in the nominal value of shares are subject to the same withholding tax, if they were decided before 18 December 1977, irrespective of the tax year during which the shareholder receives them. The tax deduction at source of 10% applies to profits distributed by cooperative societies (limited guarantee rural and craft cooperatives) to individual shareholders, on whatever date the payment was decided, but there is no deduction at source on profits paid by popular cooperative banks.

- (b) Profits paid on savings shares:

The deduction of 15% constitutes settlement of liability; however, holders of registered savings shares may opt for deduction of a payment on account of 10%. This option is open only to resident taxpayers holding savings shares registered in their own names; non residents are subject to the 15% deduction in settlement of liability.

- (c) Profits on foreign securities:

A deduction of 10% constituting a payment on account is applied to profits from foreign

securities; the application of the deduction depends on the date when the foreign dividends actually become available to an Italian bank for payment, not on the date when the dividends were agreed, as the company paying the dividends is established abroad.

From the tax periods current at 18 December 1977, members of limited liability companies (companies with share capital, private companies (limited partnerships by shareholding), limited liability companies, cooperative societies and mutual insurance societies) which have their registered offices or administrative headquarters or their main activities in Italy, may claim a tax credit of one-third of the dividend distributed, which is added to the dividend itself for the purposes of determining the member's taxable income and may be deducted from the liability, any excess being recoverable.

From the same date local income tax and communal tax on appreciation of immovable property may be deducted when assessing the corporate liability.

The arrangement whereby taxpayers could opt for a deduction in actual settlement of liability were discontinued from 1 January 1979 in cases where express arrangements exist for a deduction constituting payment in advance.

## Communal tax on appreciation of immovable property

*(Imposta comunale sull'incremento di valore degli immobili)*

DPR No 643 of 26 October 1972 (ordinary supplement No 3 to G.U. No 292 of 11 November 1972), supplemented and corrected by DPR No 688 of 23 December 1974 (G.U. No 338 of 28 December 1974) by Law No 694 of 22 December 1975 (G.U. No 343 of 31 December 1975), by Law No 904 of 16 December 1977 (G.U. No 343 of 17 December 1977) and by DPR No 959 of 13 December 1977 (G.U. No 1 of 2 January 1978); DL No 571 of 12 November 1979 which became, with amendments, Law No 2 of 12 January 1980 (G.U. No 11 of 12 January 1980), Law No 146 of 24 April 1980 (G.U. No 115 of 28 April 1980), Law No 512 of 2 August 1982 (G.U. No 216 of 7 August 1982).

### Tax payable to:

The financial authorities through the registry offices which are responsible for assessment and collection of the tax.

### Beneficiary:

Municipality where immovable property subject to the tax is situated.

### Tax payable by:

Persons transferring against consideration or persons to whom is transferred free of charge, *inter vivos* or *mortis causa*, the ownership of or rights *in rem* to immovable property; also, companies, public service and private bodies, associations and organizations, for each period of 10 years from the date on which ownership, or other rights *in rem*, was acquired.

### Basis of assessment:

The difference between the value of the property at the time of transfer or at the end of the 10 year period and its value at the time of purchase or previous taxation.

The reference values applied are those assessed or declared for the purposes of registration tax or succession duty, or payments subject to value-added tax or the values assessed by the municipality for the purpose of applying the tax on appreciation of building sites.

In the case of farmland, the initial value is the market value at the time of purchase when the value has been determined, for the purposes of registration tax or succession duty, by the application of automatic coefficients, as provided for in Laws No 1044 of 20 October 1954 and No 355 of 27 May 1959.

For all transfers not subject to proportional registration tax, or to succession duty on VAT, the initial and final values established for the purposes of registration tax are applied.

In the case of immovable property purchased prior to 1 January 1963, the initial value is the market value at the date of purchase or previous taxation, while the final value is taken to be the market value at the end of the 10-year period. For buildings belonging to companies for more than 10 years on 1 January 1976, the initial and final values are taken to be the market values on 1 January 1965 and 1 January 1975.

Special criteria are laid down by the law for determining the taxable appreciation in transfers of immovable property, where buildings have been erected on a building site, in transfers of immovable property belonging to companies that have merged or been taken over, and in transfers against consideration or free of charge made by members of building cooperatives under the provisions of the law on low-cost housing.

#### **Cost and deductions:**

The cost of purchase and construction and conversions arising during the period taken as a basis for calculating the taxable appreciation in value, may be claimed as part of the initial value. 10% of the initial value is deducted from the appreciation for each year or part of a year exceeding six months. This deduction, which had been 4%, was increased to 10% for each year or part of a year exceeding six months after 31 December 1972 and up to 31 December 1979 (Article 8 of Law No 904/1977).

A similar deduction is made on the basis of total costs. The tax on improvements to property, or similar compulsory duties paid by the liable person or body during the period taken as the basis for calculating the taxable appreciation, is also deductible from the tax.

#### **Exemptions and reductions:**

The tax is not applicable to appreciation in the value of:

The surtax is reduced by 50% for hired cars and taxis and for vans of a net capacity of not less than 600 kg owned by firms and registered for goods transport.

Motor cars and vehicles of up to 15 hp used for mixed passenger and goods transport are not subject to the surtax of LIT 18 000 for each hp: for such vehicles the minimum surtax is set at LIT 300 000.

### **Beneficiary:**

The State.

### **Tax payable by:**

All individuals whose domicile for tax purposes or usual place of residence is in Luxembourg or who receive taxable income there.

### **Basis of assessment:**

Total net income, less special expenses. Total net income is calculated by taking total net income, determined separately for each of eight categories of income; losses made in one category of income may be set off against net income from other categories. There is a special scheme for capital gains realized in immovable property in the case of an inheritance, and for certain types of extraordinary income.

### **Exemptions:**

- Payments in cash from legal insurance against sickness and accidents.
- Certain allowances (e.g. family allowances).
- Certain types of pension (e.g. war pensions).
- Interest on certain types of government loan.
- Capital received from payment of a life insurance.
- Income from a savings bank account or from interest on bonds: LFR 60 000 per year.
- Extra payments of wages for overtime, work at nights, on Sundays and public holidays, under the conditions and within the limits prescribed by regulation.
- Gifts offered by employers to employees, under the conditions and within the limits prescribed by law.

**Deductions:**

- Special expenses:
  - (1) special expenses covered by the flat-rate minimum (mainly interest on debts, insurance premiums); a personal allowance of LFR 18 000 is granted, where special expenses are no higher than this amount;
  - (2) special expenses which may be deducted in addition to the personal allowance (mainly obligatory social insurance contributions, certain donations).
- Reduction for extraordinary costs.
- Reduction for income from farming.
- Reduction for retired persons.
- Reduction for a profit made in the transfer or termination of a one-man business.
- Compensatory reduction for wage-earners.

**Married couples:**

Incomes of married couples are treated as a single income for tax purposes and tax due is determined by the 'splitting' system.

**Non-residents:**

In general the method of assessing and collecting the tax due is the same as for resident taxpayers except that only income accruing in Luxembourg is taxable, and no deduction is made for special expenses. Income tax, for non-residents only, is collected by deduction at source in the case of income from self-employed literary and artistic activities (10% of gross receipts), income derived from the leasing of licences and patents (12% of gross receipts), and company directors' fees (8.52% of gross fees).

**Collection:**

Tax is payable annually on the basis of tax returns. Tax is paid in quarterly instalments in advance and withheld at source on certain forms of income (income from employment, pensions and annuities, income from capital).

The advance payments and the tax withheld at source are deductible against final income tax liability.

Any overpayment of tax is refunded. Tax withheld on wages and pensions is adjusted annually, when the tax is not calculated by assessment.

If tax is not paid on time, interest is charged at a rate of 1% per month.

**Rates:**

- Taxpayers are divided into three classes according to the number of their dependants.
- There is a graduated scale with 22 income bands, to each of which corresponds a rate of tax ranging from 0% to 57%; application of the rates varies according to the class to which the taxpayer belongs. For the first band from 0 to LFR 108 000, the rate is 0%; for the second band from LFR 108 000 to LFR 120 000, the rate is 12%. The rate then increases by 2% or 3% per band. For income exceeding LFR 1 160 400, there is a uniform rate of 57%.

This basic scale is adjusted periodically to variations in the weighted consumer price index.

- As regards extraordinary income, the rates applied range from 12% to 34%.
- Non-residents, whose tax is calculated by assessment, are taxed under the Class II tariff (as married taxpayers without dependants) at a rate not less than 15%.
- To provide resources for the unemployment fund, the liability for personal income tax has been raised for 1983 to 108.25% and for 1984 to 110% of the amount payable under the above rules.

**Carry-over of losses:**

Losses suffered by business forms, farmers, foresters or persons practising a liberal profession may be carried forward for a period of five years, provided the persons running the enterprise or other persons involved keep regular accounts. Firms belonging to an industry declared to be undergoing structural crisis may carry forward for an indefinite period 50% of the depreciation charged in respect of deficit years which end during a period of crisis, but the amount carried forward must not exceed the loss incurred in the trading year in question.

The reduction for retired persons is fixed at LFR 24 000, if the taxable income does not exceed LFR 240 000; at LFR 18 000, increased by an eighth of the difference between LFR 288 000 and the taxable income, if the latter is more than LFR 240 000; at LFR 18 000 if the taxable income exceeds LFR 288 000.

## Personal income tax

*(Inkomstenbelasting)*

Income Tax Law 1964/Stb. 519, as amended most recently by the Law of 6 July 1983 (Stb. 324).

### **Beneficiary:**

The State.<sup>1</sup>

### **Tax payable by:**

All individuals resident in the Netherlands, and non-residents deriving income from Dutch sources.

### **Basis of assessment:**

#### **For residents:**

Total income from all sources (business profits plus net income from work, from capital or from certain periodical payments, plus capital gains on the sale of securities forming a substantial participation in a joint-stock company) less amounts set aside for the 'old-age reserve' and plus amounts deducted from the 'old-age reserve', less the total amount of personal liabilities, extraordinary expenses, deductible gifts, allowances on interest and on dividends and deductible losses from certain other years.

#### **For non-residents:**

Total income from Dutch sources (business profits made in the Netherlands plus net income from an occupation which is or was carried on in the Netherlands, from real estate located in the Netherlands, from mortgages secured on such real estate, from entitlements to profit (other than based on securities or occupation) and in particular from securities issued by joint-stock companies located in the Netherlands in cases where the non-resident concerned has a substantial participation, plus capital gains on the sale of such securities forming a substantial participation, plus the right to periodical payments and allowances made by a Dutch public corporation) less certain personal liabilities, allowances on interest and on dividends and deductible losses from certain other years.

### **Exemptions:**

Income from the following sources is not deemed to form part of the basis of assessment:

- appreciation of farming land unless the appreciation has resulted from farming activities;
- profits from forestry undertakings;

---

<sup>1</sup> Through the provincial fund, the provinces received 1.22% in 1982 of the revenue from almost all taxes in the Netherlands; through the municipal fund the municipalities received 15.64% of this revenue in 1982.

- reorganization profits resulting from creditors abandoning unsatisfied claims, in so far as these profits exceed total losses incurred in the current year or carried over from preceding years;
- an allowance of HFL 20 000 in cases where businesses are, partly or wholly transferred or wound up;
- benefits from savings premiums resulting from certain laws on savings applying to lower-income groups;
- benefits from certain pensions and certain indemnities arising on the termination of a profession.

#### **Investment:**

The rules concerning investment allowances and accelerated depreciation have been replaced by the Investment Account Act (WIR). This act is designed to encourage business investment generally through financial incentive and to direct these incentives to investments deemed to be important in terms of employment, geographical pattern and environmental or energy policy.

Unlike accelerated depreciation and investment allowances, which are deducted from profits and thus (may) indirectly reduce the tax payable, the WIR scheme grants investment relief in the form of a direct deduction from the amount of tax chargeable on income. If this deduction exceeds the amount of tax due (e.g. where a firm incurs losses), the balance is paid to the firm in the form of a so-called negative assessment.

The tax deductions (the 'WIR premiums') fall into two categories 'basic premiums' and 'additional premiums'. Basic premiums are granted in respect of investments made by any undertaking; the amount is related to the nature and the size of the investment. Additional premiums are available, provided a number of special conditions are met.

Since 10 July 1982, the following basic premiums are granted for:

- |                                |     |
|--------------------------------|-----|
| – new buildings: .....         | 14% |
| – existing buildings: .....    | 8%  |
| – other business assets: ..... | 12% |

Since 1 January 1983, the supplement for small business rates:

from nil to 1 041 380 guilders: from 6% to ¼%.

#### **Reserve for old age for self-employed persons:**

Since 1 January 1973, self-employed resident taxpayers over 18 and under 65, are allowed to deduct a certain percentage of their profits, in order to set up a 'reserve for old age'. The contribution to this reserve must be no less than 964 and no more than 15 195 guilders, and the reserve may not exceed the book value of the business's assets.

For 1983 11.5% of profits up to HFL 53 532 and 10% of profits over HFL 53 532 may be added to the 'reserve for old age'.

In principle a married woman can set up a 'reserve for old age' independently, if she receives business profits.

During the year when the taxpayer reaches the age of 65, the 'reserve for old age' must be transferred into an annuity or other form of regular payments or tax must be paid on it at a proportional rate, from 20 to 54% (see under Rates below).

#### **Married couples:**

Married couples are assessed jointly unless they live apart permanently. The wife's income from a job which she herself momentarily performs, including the running of a firm, the exercise of a profession and the lump-sum profit for labour in her husband's firm, is taxed separately.

**Children:**

The net income of a child under 18 years of age derived from his capital, and his personal liabilities (except national insurance premiums), are added to the income and liabilities of the parent who has the authority over the child.

**Collection:**

1. Personal income tax is levied annually by the tax department. It is assessed on the basis of the taxpayer's declaration. If no such declaration is submitted, the amount due is estimated by the Inspector of Taxes.
2. The following taxes are offset against the final assessment:
  - tax on wages (deducted at source by employer);
  - dividend tax (deducted at source by paying company);
  - tax on games of chance where the winnings form part of the income;
  - provisional assessments.

**Rates:**

**(A) Standard rates:**

The standard rates take the form of 10 tax rate bands with percentages ranging from 17 to 72. These percentages are applied to the various bands over which the taxable amount, which is the taxable income less the personal allowance, is distributed.

The personal allowances (1983) are:

married woman .....	HFL 2549
single person under 35 .....	HFL 7381
single person aged 35 and over, as well as single persons under 35 in the case of widowed or divorced persons or persons who are entitled to child allowance or a deduction for exceptional expenses for a child under the age of 27 .....	HFL 9921
married man .....	HFL 12716

These personal allowances may be increased by:

- HFL 2795 in the case of a single parent who is entitled to child allowance or a deduction for exceptional expenses to support a child below the age of 27;
- a maximum of HFL 4076 in the case of families with one parent if the parent is employed outside the household and is entitled to child allowance or a deduction for exceptional expenses for a child in his household below the age of 16.

Married persons living apart permanently are deemed to be single. Non-residents do not in general qualify for a personal allowance.

**(B) Proportional rates:**

20 to 54%: in the case of certain types of profits and income (e.g. profits made when a business is sold or wound up); the rate depends on the average income in the four preceding years and the size of the proportion of income eligible for taxation by this special rate.

20%: in the case of profits deemed to be made on an entrepreneur's death, capital gains on sales of securities forming part of a substantial participation in a joint-stock company, bonus shares obtained when a joint-stock company issues new capital.

**Carry-over of losses:**

Losses may be offset against the income in the two preceding calendar years and eight following calendar years. Under certain circumstances, the period of eight years may be extended indefinitely as regards the losses of an undertaking incurred during the first six years following the setting-up of the undertaking (initial losses).

## Municipal tax on immovable property

(*Gemeentelijke belasting op onroerend goed*)

Municipal by-laws based on Articles 272 (a) 273 and 302 of the Law in Municipalities.

### Beneficiaries:

The municipalities.

### Tax payable by:

- (a) Persons holding rights *in rem* over immovable property.
- (b) Users of immovable property.

### Basis of assessment:

The tax in immovable property can be assessed in two ways:

- (a) on the basis of the value which can be put on the immovable property in economic transactions; for unmarketable immovable properties the basis is the replacement value;
- (b) on the basis of the surface area of the immovable property, adjusted by coefficients for type of property, location, quality and usage.

The municipalities are free to choose which basis of assessment to apply.

### Exemptions:

The following are automatically exempt:

- (a) church buildings;
- (b) land which forms part of property listed in the Nature Conservation Act;
- (c) tracts of land managed by legal persons whose aim is the conservation of nature;
- (d) public roads, waterways and railroads;
- (e) water defense and water control works managed by public legal persons;

The municipalities are free to grant other exemptions.

### Collection:

The tax is collected by way of assessment by the central government after it has received the necessary information from the municipalities.

### Rates:

The rates differ according to whether the value or the surface area is taken as the basis of assessment and also from municipality to municipality.

For each municipality, the total yield from the tax is limited to 12% (for users) and 15% (for persons holding rights *in rem*) of the grant (less certain costs) which the municipality in question receives from the municipal fund.

## Corporation tax

*(Vennootschapsbelasting)*

Corporation Tax Law 1969/Stb. 469 as most recently amended by the Law of 30 June 1982/Stb. 423.

### **Beneficiary:**

The State.  
(See Note 1, NL 01.)

### **Tax payable by:**

Joint-stock companies, cooperative societies, mutual insurance and credit companies, foundations and other legal persons incorporated under civil law, when they administer an enterprise, funds for common account, and most publicly controlled industrial and commercial undertakings (in all cases having their headquarters in the Netherlands); foreign legal persons established in the Netherlands or having sources of income analogous to those subject to the income tax applicable to non-residents.

### **Bases of assessment:**

Profits in the widest sense, with a number of additions or deductions. The determination of the taxable profits corresponds largely to the determination of profits taxable under personal income tax (see NL 01), including the deductibility of a stock allowance and an equity allowance (both 4%) and of losses from other years.

### **Exemptions:**

Exempted from being subject to corporation tax are:

- legal persons whose activities are of a social or charitable nature or otherwise in the public interest;
- exempted categories of profit are those corresponding to the relevant exemptions under personal income tax; furthermore applies the participation exemption for all dividends, gains and losses related to the holding of at least 5% of the shares in a subsidiary. This rule, preventing economic double taxation, is in general equally applicable to domestic and foreign subsidiaries.

Exception: the loss related to the winding up of a subsidiary is deductible by the parent.

### **Investment:**

Investment allowances do not exist and anticipated depreciation is not allowed. Instead of these and similar indirect incentives, tax paying entities may claim 'WIR premiums'. The relevant rules for the corporation tax are largely corresponding to those in the Personal Income Tax Law (see NL 01).

**Special features:**

- Fiscal unity: if a parent company holds all shares of one or more subsidiaries and certain conditions are met, they may form upon request a fiscal unity: the subsidiaries are considered to be absorbed by the parent. As a result each year negative results of companies belonging to the unity can be compensated horizontally with positive results of the other ones.
- Regime for investment funds: provided that all current income is distributed to shareholders and a number of other conditions is met, an investment company or fund is entitled to add capital gains on securities and real property to a reinvestment reserve and to a rate of nil percent on the (remaining) profit.

## Environmental taxes

### Tax on the pollution of surface waters

*(Verontreinigingsheffing oppervlaktewateren)*

This tax is levied in three forms:

- (a) tax on the pollution of State waters (Article 17 (1) of the Law on the Pollution of Surface Waters) (State waters pollution tax or State tax);
- (b) tax on the pollution of non-State waters (Article 17 (1) of the Law on the Pollution of Surface Waters);
- (c) contribution in respect of direct or indirect connection to a purification plant operated by a public body (Article 17 (2) of the Law on the Pollution of Surface Waters).

The tax under (a) is generally referred to as the State tax while the forms of tax described under (b) and (c) are generally referred to as non-State taxes.

#### Law:

Law on the Pollution of Surface Waters (1969).

Implementing Decree on the Pollution of State Waters (1970).

Provincial and municipal tax by-laws.

Tax by-laws of provinces/polder-boards/unions of polder-boards/waste water treatment authorities mostly aligned on the Model pollution tax by-law drawn up by the union of polder-boards (1978).

#### Tax payable on:

Direct or indirect discharging of waste matter, pollutants or noxious matter into surface waters, or direct or indirect connection to a purification plant (Article 17 of the Law on the Pollution of Surface Waters).

#### Tax payable by:

In the case of the tax: anyone discharging waste matter, pollutants or noxious matter directly or indirectly into surface waters (the discharger) (Article 17 (1) of the Law on the Pollution of Surface Waters).

In the case of the contribution: anyone directly or indirectly connected to a purification plant (Article 17 (2) of the Law on the Pollution of Surface Waters).

#### Basis of assessment:

The quantity and/or the nature of the waste matter, pollutants or noxious matter, and the manner in which they are discharged (Article 18 (1) of the Law on the Pollution of Surface Waters).

**Criterion applied in levying the tax:**

(a) In the case of matter that combines with oxygen, the criterion is the average quantity of such matter discharged per 24-hour period into surface waters or a purification plant, expressed in inhabitant-equivalents (Article 19 (1) (a) and (2) of the Law on the Pollution of Surface Waters, Article 6 (1) (a) of the Model by-law).

One inhabitant-equivalent is the average quantity of material that combines with oxygen which is discharged into surface water by one inhabitant per 24-hour period.

(b) In the case of other matter that does not combine with oxygen, such as heavy metals, the criterion is the number of units of weight released per unit of time (24-hour period) into surface water or a purification plant, expressed in pollution units (Article 19 (1) (b) of the Law on the Pollution of Surface Waters, Article 6 (1) (b) of the Model by-law).

1. No tax is imposed in respect of the discharge into State waters of matter that does not combine with oxygen.
2. In the case of dwellings or small industrial premises with a pollution value of less than 20 inhabitant-equivalents, a flat-rate pollution value of 3 or 3.5 inhabitant-equivalent applies. In the case of dwellings occupied by one person (single), the pollution value is set at one inhabitant-equivalent (Article 18 (2) of the Law on the Pollution of Surface Waters and Article 12 of the Implementing Decree on the Pollution of State Waters).
3. In the case of industrial firms, the pollution value is in principle established by measuring and sampling the effluent discharged (Articles 13 and 14 of the Implementing Decree on the Pollution of State Waters).

In certain circumstances, the pollution value may be calculated using the table of effluent coefficients (Article 15 of the Implementing Decree on the Pollution of State Waters).

**Rates:**

The rate is determined by the cost of measures to counter and prevent pollution of surface waters (Article 17 (1) and Article 23 of the Law on the Pollution of Surface Waters).

In the case of the State tax, the rate is as follows:

- discharge into fresh water: HFL 26.50 per inhabitant-equivalent;
- discharge into salt water: HFL 20.50 per inhabitant-equivalent.

In the case of the non-State tax, there are different rates for different administrative areas. The rates vary from HFL 33.12 to HFL 78 per inhabitant-equivalent/pollution unit.

The difference in rate between the State tax and the non-State tax is due to the fact that the State exercises only passive water-quality control, while the provinces and polder-boards pursue an active and passive form of management.

**Method of collection:**

- (a) *State tax*: by means of assessment established by the Office for the Tax on the Pollution of State Waters, The Hague (Article 20 (1) of the Law on the Pollution of Surface Waters and Articles 18 and 20 of the Implementing Decree);
- (b) *Non-State tax*: in the case of industrial firms by means of assessment. In the case of dwelling by means of assessment or on the basis of consumption bills from the public utilities (Article 17 of the Model by-law).

The non-State tax is generally levied by polder-boards, unions of polder-boards and waste water treatment authorities. In three provinces (Groningen, Friesland and Utrecht), the provincial authorities levy the tax themselves.

**Collection:**

## Tax on waste

(Afvalstoffenheffing)

### Law:

These by-laws are generally aligned on the Model by-law on cleansing taxes drawn up by the Association of Dutch Municipalities.

### Tax payable on:

The actual use of premises in respect of which the municipality is obliged to provide periodical collection of household waste (Article 62 of the Law and Article 4 of the Model by-law).

### Tax payable by:

The premises (Article 5 of the Model by-law).

### Rate:

A fixed amount per premises, irrespective of the number of inhabitants or the quantity of waste produced (Article 5 of the Model by-law).

### Method of collection:

By means of assessment established by the Municipal Executive (Article 6 (2) of the Model by-law).

### Collection:

By the Municipal Treasurer.

### Notes:

1. Where municipalities have not yet put into effect Article 62 of the Law on Waste, the tax in respect of the periodical collection of household waste is still based on the Law on Municipalities, the general police regulations and the municipal taxation by-laws. In the near future, all the municipalities will introduce the abovementioned tax on waste.  
The tax is at present applied in some 150 to 200 municipalities.

2. In addition to the abovementioned tax, cleansing duties are levied by the municipalities in respect of the periodic disposal of industrial waste of limited proportions and the disposal on request of waste (household waste, bulky household refuse or bulky industrial waste). The cleansing duty is payable in respect of waste disposal services provided by or on behalf of the municipality. The duty in respect of the periodic disposal of industrial waste is levied on the basis of assessments (Article 13 (1) of the Model by-law). The other duties are levied by means of a dated voucher, bill or other document or by means of giro payment forms issued by the postal cheque and giro service (Article 13 (1) and (2) of the Model by-law).

**UNITED KINGDOM**

## Income tax

Income and Corporation Taxes Act 1970, Income and Corporation Taxes (No 2) Act 1970, Finance Acts 1970-81.

### **Beneficiary:**

The central government.

### **Tax payable by:**

Persons resident or ordinarily resident in the United Kingdom and persons to whom income arises in the United Kingdom.

### **Basis of assessment:**

Total income from all sources less allowable deductions. Certain losses may be offset against income, and allowances are granted for expenditure on certain capital equipment.

### **Exemptions:**

Among others, certain social security benefits, wound and disability pensions of members of the armed forces, war widows' pensions, income from educational scholarships in the hands of the recipient, interest on national savings certificates, the first UKL 70 interest on ordinary accounts with the National Savings Bank and gambling winnings. Charitable bodies are also generally exempt.

### **Deductions:**

Tax allowances for single people, married couples, lone parents, recently widowed women, for other dependents, and for registered blind people. Special reliefs for taxpayers over a certain age with modest incomes. Relief for premiums on insurance to provide a retirement annuity, contributions to approved pension schemes and interest paid on buying the main residence.

### **Married couples:**

The income of married couples is aggregated and taxed as one income, but a higher tax allowance is given than for a single person and there is a separate allowance against the wife's earned income. A husband and wife may jointly elect that the wife shall be taxed on her earnings as if she were not married. In such cases each receives a single person's allowance. Children's own income: tax is assessed separately on such income.

**Non-residents:**

Non-residents are subject to tax on income arising in the United Kingdom, with certain exceptions. There are special provisions regarding deductions for personal allowances for non-resident individuals.

**Collection:**

Tax is assessed annually. In the case of income from employment and occupational pensions, tax is deducted at source by the employer (see 'Income Tax – Employment Income'). Tax is deducted at source from some income from abroad paid through an agent in the United Kingdom, and from certain annual payments.

The tax year is from 6 April to the following 5 April, but for some sources income is computed by reference to the income of the previous year, and business profits of an accounting year are treated as being those of the tax year.

**Rates:**

Personal tax rates range from 30% (basic) to 60%. There is also a 15% surcharge on investment incomes in excess of UKL 7 100.

**Special features:**

Tax on partnership profits is assessed on the partnership, but the liability takes account of the shares and personal circumstances of the individual partners.

## Income tax – employment income

Income and Corporation Taxes Act 1970, Part VIII;  
Finance Acts 1974 and 1976–81.

### **Beneficiary:**

The central government.

### **Tax payable by:**

United Kingdom residents receiving payment for employment in the United Kingdom. Non-residents paid for work done in the United Kingdom.

From 6 April 1974 a person who is both resident and ordinarily resident in the United Kingdom is, in general, liable to income tax on the whole of his earnings wherever they arise. However, from 6 April 1977 where the employment is carried on wholly or partly outside the United Kingdom special deductions may be given. (Between 6 April 1974 and 5 April 1977 it was necessary for the employment to be carried on wholly outside the United Kingdom to qualify for a special deduction.) A deduction may also be given where the employee is not domiciled in the United Kingdom and is employed by a foreign concern. A person who is not resident in the United Kingdom is liable to income tax on his earnings for duties performed in the United Kingdom (unless exempt under a double taxation agreement).

A person who is resident but not ordinarily resident in the United Kingdom is liable to tax on earnings outside the United Kingdom only to the extent that they are remitted to the United Kingdom. A person who is resident and ordinarily resident in the United Kingdom but domiciled outside the United Kingdom and employed by a non-resident concern is liable to tax on emoluments for duties performed abroad unless the duties are performed wholly outside the United Kingdom, in which case only those emoluments which are remitted to the United Kingdom are taxable.

### **Basis of assessment:**

All earnings less personal allowances and allowable deductions.

### **Exemptions:**

In general, benefits in kind which cannot be converted into cash by the recipient or meet a pecuniary liability of the recipient apart from provided accommodation and benefits or expenses paid by means of vouchers. However, benefits received by directors, and employees whose salaries are above a certain level are taxable.

### **Deductions:**

Expenses incurred wholly exclusively and necessarily in performing the duties of the employment. Subscriptions to professional bodies and learned societies relevant to the employment.

### **Collection:**

Deducted at source by the employer on the basis of a tax code reflecting the allowances and reliefs due, and tax tables. Where appropriate an assessment is made.

## Corporation tax

Income and Corporation Taxes Act 1970, Parts XI and XII as amended by the Finance Acts of 1971 up to and including 1983.

### **Beneficiary:**

The central government.

### **Tax payable by:**

Companies, corporate bodies and unincorporated associations including members' clubs and trade associations, but not partnerships of individuals, local authorities or local authority associations. Non-resident companies with profits arising from operations in the United Kingdom.

Special provisions apply to authorized unit and investment trusts, investment companies, life assurance companies, trusts, building societies, industrial and provident societies and mutual companies.

### **Basis of assessment:**

All profits, (including income and capital gains) with the exception of dividends and other distributions received from resident companies.

### **Exemptions:**

Charitable bodies are generally exempt from corporation tax on their income.

### **Deductions:**

Expenses incurred for the purpose of the business. Depreciation allowances are allowed on certain types of capital expenditure (e.g. plant and machinery). Special relief for increase in the value of trading stock.

### **Collection:**

Annual assessment of profits arising in a financial year (1 April to 31 March) at a rate fixed in the budget at about the end of that year. An apportionment is made where an accounting period spans two financial years and tax rates differ. Tax is generally payable either nine months after the end of the accounting period or (depending on the circumstances) on 1 January in the fiscal year for which it is due. On payment of a dividend a company is required to make an advance payment of corporation tax proportionate to the amount of the dividend. This advance payment of corporation tax can be set-off against the company's main corporation tax liability.

**Rates:**

Financial year 1973 to 1982: 52% but 38% for small companies, 40% for industrial and provident societies, housing associations and building societies.

**Carry-over of losses:**

Trading losses may be off-set against future income from the same trade or against other profits of the same or previous accounting period.

**Special features:**

Where certain income of a close company (broadly, one which is under the control of five or fewer individuals) exceeds the distribution to its shareholders, the amount of the excess may be apportioned among the shareholders, treated as part of their personal taxable income.

The current losses of a member of a group of companies may be set against the current profits of other members. Where payments of dividends are made between members of a group, the group member paying the dividend may elect not to make an advance payment of corporation tax.

A resident shareholder is entitled to a tax credit (representing part of the corporation tax paid by the company) in respect of the dividends he receives. This tax credit may be set against his income tax liability.

**Special rules for North Sea oil:**

Under the Oil Taxation Act 1975, profits from oil extraction activities in the UK may not be reduced by losses from other activities. Any petroleum revenue tax liability arising in an accounting period is a deduction for corporation tax purposes.

## Capital gains tax

Capital Gains Tax Act 1979 (with effect from 6 April 1979 this consolidated existing provisions), and Income and Corporation Taxes Act 1970 as amended by Finance Acts 1980–83.

### Beneficiary:

The central government.

### Tax payable by:

Persons, including companies, resident or ordinarily resident in the United Kingdom.

Persons not resident or not ordinarily resident but carrying on a trade in the United Kingdom through a branch or agency on gains on the disposal of chargeable assets situated in the United Kingdom and used for the purpose of that trade branch or agency.

### Tax payable on:

Gains on the disposal of chargeable assets<sup>1</sup> wherever situated. Disposal includes any occasion when the ownership of an asset is transferred in whole or in part (except on death), for example by sale, exchange or gift; or when the owner of an asset derives a capital sum from it.

An individual not of United Kingdom domicile is liable on gains on assets situated abroad only to the extent that the gains are remitted to the United Kingdom.

### Basis of assessment:

Chargeable gains less allowable losses in a year of assessment or accounting period in the case of a company.

### Exemptions:

- Persons wholly or partially exempted include local authorities, charities, approved superannuation funds, friendly societies, registered trade unions, authorized unit investment trusts and other persons qualifying for exemption from income tax.
- The first UKL 5300 of an individual's gains in a year are exempt. This figure is index-linked.
- Subject to certain conditions and limits gains accruing to an individual over the age of 60 on the disposal of a business or of shares in a family trading company are exempt.

<sup>1</sup> With certain exceptions all forms of property or interests or rights in or over property.

The main exceptions are an individual's principal private residence; chattels worth UKL 3000 or less; normal life insurance policies; British government securities (unless sold within one year of acquisition); private motor cars; and important works of art and other objects of national, scientific, historic or artistic interest (subject to certain undertakings by the recipient). Other exceptions include gifts of assets to charities and other bodies concerned with the national heritage; gifts of land and buildings for public benefit; and gifts of assets by individuals provided their total value does not exceed UKL 100 in the year.

**Reliefs:**

- When the sale proceeds are reinvested in new business assets, gains on certain classes of business assets may be deducted from the cost of the new assets instead of being charged to tax.
- The tax on gains arising on gifts and transfers out of trust may in certain circumstances be deferred.
- Capital losses which arise on disposals of unquoted shares in trading companies may subject to certain conditions be set against income.
- Transfers of assets between members of a group of companies are treated as giving rise to neither gain nor loss. A group of companies for this purpose comprises a principal company and its 75% subsidiaries all of which are resident in the United Kingdom.
- Special provisions apply where companies are amalgamated or acquired by an exchange of share capital or where a company acquires part of the business of another company by issuing shares or securities.
- Transfers of assets between spouses are treated as giving rise to neither a gain nor a loss.

**Computation of gains:**

In general, the consideration received for disposal (or the market value if there is no consideration or the transaction is not at arm's length) less the cost of acquisition together with expenses of acquisition and disposal and certain other allowable expenditure on the asset. Any amount charged to income tax or corporation tax as income or taken into account as a receipt in calculating income is excluded from the consideration.

In the case of assets owned on 6 April 1965 only the gain attributable to the period after that date is chargeable.

The Finance Act 1982 introduced provisions to take account, in the calculation of gains, of inflation after March 1982.

**Collection:**

By assessment.

**Rates:**

The basic rate is 30% for persons other than companies.

Companies gains are charged to corporation tax at an effective rate of 30%.

**Carry-over of losses:**

Usually allowable if a gain in the same transaction would have been chargeable. Losses are set primarily against gains of the same year and any excess may be carried forward without time-limit and set against gains of later years.

## Capital transfer tax in the United Kingdom

Finance Act 1975 (as amended).

### Beneficiary:

The central government.

### Tax payable on:

The cumulative total of a donor's chargeable transfers made since 26 March 1974 but within 10 years of the transfer in question whether is made during life or at death; this includes:

(i) *inter vivos* gifts;

(ii) sales for less than full consideration;

(iii) property passing on death by will or intestacy;

and there are special provisions for the taxation of property held in settlement, both where there is an interest in possession in the property and where there is not.

All property situated in the United Kingdom is within the scope of capital transfer tax regardless of the domicile of the transferor; property outside the United Kingdom is liable to the tax if the transferor is domiciled within the United Kingdom at the time of the transfer or if certain statutory rules impose a deemed domicile in the United Kingdom on the taxpayer. Settled property situated outside the United Kingdom is chargeable to tax if the settlor was domiciled in the United Kingdom at the time when the settlement was made.

### Tax payable by:

In respect of (i) above by the donor; in respect of (ii) above by the vendor; in respect of (iii) above, the legal personal representatives of the deceased; and, in respect of settled property, the trustees of the settled property, except where property is transferred into settlement, where the settlor is accountable.

*Note:* Liability for tax on a transfer may rest with more than one person – for example, if tax on a gift is not paid by the due date, it may be recovered from the transferee.

### Basis of assessment:

The loss to the transferor is the difference between the value of all the transferor's property immediately before the transfer and its value immediately after the transfer. Thus, if the transferor pays the tax, it is charged on the total of the gift and tax together.

### Exemptions:

These include: the first UKL 55 000 of transfers from a spouse domiciled in the UK to a spouse domiciled abroad; full exemption for transfers between other spouses, the first UKL 3 000 of a donor's total of gifts in a tax year; the first UKL 250 of a donor's total of gifts to any one donee in a tax year; gifts out of income, provided certain conditions are fulfilled; certain dispositions for the maintenance of the family; transfers to charities or political parties (with a limit of UKL 100 000 on the total of gifts made to political parties on death or within one year of death);

historic properties, land of historic, scenic or scientific interest, and objects and collections of natural artistic, historic or scientific interest conditional on certain undertakings being secured and maintenance funds established to maintain and preserve such property; certain government securities if the holder is neither domiciled nor ordinarily resident in the United Kingdom; and all property given or bequeathed to certain institutions concerned with preservation of the national heritage.

**Reliefs:**

These include reliefs from the capital transfer tax charge on agriculture, businesses, woodlands and trusts for the benefit of employees; reliefs from the capital transfer charge on death for quoted securities and immovable property, where the value has fallen since the date of death; and relief for transfers occurring in quick succession. There is a measure of relief for tax paid in other countries in respect of the same transfer. There are double taxation agreements with Ireland, USA, South Africa, the Netherlands, Sweden, France, India, Italy, Pakistan, and Switzerland.

**Deductions:**

Reasonable funeral expenses and *bona fide* debts and encumbrances.

**Collection:**

Tax is, in most circumstances, due six months after the end of the month in which the taxable event occurred. However, tax on certain types of property (including, for example, houses, land, business assets and certain holdings of unquoted securities) may be paid by instalments over 10 years, in some cases, free of interest. In other cases, interest is chargeable after the due date at 6% (for transfers on death) or 8% (for other transfers).

**Rates:**

There are two scales of rates of tax charged on successive slices of the cumulative total of chargeable transfers: one for lifetime transfers and the other for transfers on death or within three years before the death. No tax is charged in any event on the first UKL 60 000 of a person's cumulative total of chargeable transfers.

The rates on lifetime transfers are appreciably lower than the death rates at the lower end of the scale, rising from 15% on the tranche from UKL 60 000 to UKL 80 000 through 35% on the tranche from UKL 270 000 to UKL 700 000 to 50% on the tranche over UKL 2 650 000. The scale of rates for transfers on death and within three years before the death rises from 30% on the tranche from UKL 60 000 to UKL 80 000 through 50% on the tranche from UKL 175 000 to UKL 220 000 to 75% on the tranche over UKL 2 650 000.

## Development land tax

Development Land Tax Act 1976 as amended by Finance Acts 1977–83.

### Beneficiaries:

The central government.

### Tax payable by:

Persons not resident in the United Kingdom, as well as those who are resident.

The term 'persons' includes individuals, companies, trustees and personal representatives acting in that capacity.

### Tax payable on:

Development value realized on the disposal of an interest in land on or after 1 August 1976. Disposal includes any occasion when the ownership of an interest in land is transferred in whole or in part (except on death), for example by sale, grant of a lease, exchange, or gift; or when the owner of an interest in land receives any sum by virtue of his ownership even though the person paying that sum does not acquire any interest in the land.

The commencement of a project of material development is a deemed disposal. Immediately before such a project is begun, every major interest in the land is treated as having been disposed of and immediately reacquired at its market value.

### Basis of charge:

The development value on which the tax is charged, is the difference between the disposal price (or market value where tax is chargeable on the carrying out of development) less any incidental expenses and, whichever is the highest of three base values. The base values are:

Base A: the cost of acquiring the interest, together with any increase in its current use value over the period of ownership, and any expenditure on relevant improvements;

Base B: 115% of the current use value of the interest at the date of disposal, together with any expenditure on relevant improvements;

Base C: 115% of the sum of the cost of acquisition and expenditure on improvements.

Where Base A applies and the interest being disposed of was acquired before 1 May 1977, the acquisition cost together with any relevant improvements may be increased by a special addition. The Base C uplift can in some circumstances be 150% where a residential development project is commenced after 9 March 1981.

### Exemptions:

- Local authorities and other similar bodies are totally exempt from the tax.
- Urban development corporations established under the Local Government Planning and Land Act 1980.
- The first UKL 50 000 of development value realized in a financial year is exempt.

- An individual's private residence is exempt and so also is not more than one residence occupied by a dependent relative; the building of a house on land owned at 12 September 1974 for occupation by the owner or a member of his family is also exempt.
- Development authorized by planning permission to win or work minerals is exempt.
- A project of material development started within three years of the acquisition of the interest in land on which the development takes place, is exempt, if it can be shown that no significant amount of development value would have been realized had the project commenced immediately after the acquisition.
- The disposal of land by a charity after 25 March 1980 is exempt.
- Land held as stock in trade at 12 September 1974 is also exempt if planning permission was also held at that date.
- Liability to the tax on the commencement of a project of material development may in certain circumstances be deferred where, for example, the project is being carried out by an industrialist for his own use; a similar concession applies to statutory undertakers.

**Interaction with other taxes:**

Provision is made to ensure that development value realized is not effectively charged both to development land tax and other taxes, for example capital gains tax, capital transfer tax or corporation tax.

**Collection:**

By assessment.

Special provisions apply where a person acquires an interest in development and from a person who is not resident or ordinarily resident in the United Kingdom.

**Rate:**

The rate of tax is 60%.

## Excise duty on hydrocarbon oil

Hydrocarbon Oil Duties Act 1979, as amended by the Finance (No 2) Act 1979 and the Finance Act 1983 and the amendment of Units of Measurement (hydrocarbon oil, etc.) Order 1977.

### Beneficiary:

The central government.

### Duty payable on:

Imported and indigenous petroleum oils, coal tar, oils produced from coal, shale, peat and most other bituminous and liquid hydrocarbons. Duties are also payable on petrol substitutes and gas used as fuel for the propulsion of road vehicles, but these have at present little fiscal significance.

### Duty payable when:

The oil is delivered for home use in the United Kingdom.

### Exemptions and reliefs:

Both light and heavy oil are relieved of duty when used in lifeboats or fishing vessels, as refinery fuel, as raw material for gas-making or chemical synthesis or as ingredients, solvents or the like, in industrial processes. In addition, heavy oil used for such horticultural purposes as heating glass-houses or used by coasting vessels (except pleasure yachts) is relieved of duty. Light oil burned in approved furnaces pays duty only at the higher rate of heavy oil not for use in road vehicles.

### Collection:

If, at import, oil is delivered for home use, excise duty is paid to the collector's office at the port. If delivered for home use from refinery, other production premises or warehouse, payment is normally made either centrally (in the case of the larger companies) or to the local collector.

### Rates:<sup>1</sup>

	<i>per litre (UKL)</i>
Light oil (mainly motor spirit and petrol substitutes) <sup>2</sup> .....	0.1630
Light oil used in approved furnaces .....	0.0077
Heavy oil for use in road vehicles (mainly diesel oil) <sup>2</sup> .....	0.1382
Kerosene, other than aviation turbine fuel .....	0.0022
Other heavy oil (including aviation turbine fuel) delivered other than for use in road vehicles .....	0.0077

<sup>1</sup> In law the duty applies to all oil whether refined or crude; but in practice it is paid only on refined oil. The rates are the same whether the oil is imported in a refined state or is refined in the UK from imported oil or other material.

<sup>2</sup> The distinction between light and heavy oils is based on definitions of physical properties.

### Excise duty payable on:

Delivery of United Kingdom manufactured and imported tobacco products for home use.

### Basis of assessment:

Cigarettes are chargeable with an *ad valorem* duty calculated on their retail price and a specific duty per 1 000 cigarettes. For the purpose of the *ad valorem* duty the retail price is normally the price recommended by the importer or manufacturer for the retail sale of the cigarettes; where no price has been recommended, the highest price at which cigarettes of that description are normally sold by retail is used. For the purpose of the specific duty cigarettes exceeding 9 cm in length excluding any filter or mouthpiece are treated as if each 9 cm or part thereof were a separate cigarette.

The duty on other chargeable tobacco products is based on their weight as determined before delivery for home use.

### Collection:

United Kingdom manufacturers are required to keep a production account and make a return of all chargeable products manufactured each day. The products are normally deposited in an approved secure store and duty is chargeable on any removed for home use. Imported manufactured tobacco may be placed in warehouse or approved secure store or charged at the port of importation. If satisfactory security is given, payment of the excise duty on both home produced and imported products may be made on a monthly basis, 15 days after the end of each delivery period.

### Rates:

Cigarettes .....	21 % of the retail price plus UKL 21.67 per 1 000
Cigars .....	UKL 40.85 per kg
Hand-rolling tobacco .....	UKL 35.40 per kg
Other smoking tobacco and chewing tobacco .....	UKL 24.95 per kg

### Relief from duty:

Provision has been made for the remission or repayment of the duty on products exported or shipped as stores, and products used solely for the purposes of research or experiment. Certain other minor reliefs have been allowed by regulation, including products manufactured from tobacco grown in the United Kingdom by a person for his own consumption.

Imported matches or mechanical lighters are charged duty at the port of importation, or if they are delivered to warehouse, or licensed premises in the case of mechanical lighters, on their removal for sale on the home market. ## Excise duty on spirits

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts and the Alcoholic Liquors (amendment of enactments relating to strength and to units of measurement) Order 1979 and the Isle of Man Act 1979 and the Immature Spirits (Rum) Order 1982.

### Beneficiary:

The central government.

### Excise duty payable on:

Spirits made in the United Kingdom and imported spirits.

### Basis of assessment:

Duty is charged on spirits in accordance with their alcoholic strength. The strength of spirits is expressed in terms of percentage volume at 20°C. This represents the ratio of the volume of ethyl alcohol, measured at 20°C, contained in the mixture of ethyl alcohol, and water, to the total volume of the mixture measured at the same temperature.

### Exemptions:

Spirits produced in the United Kingdom are generally relieved of excise duty if they are converted to methylated spirits to make them non-potable or if they are used for medical or scientific purposes. Similarly, spirits contained in imported products which are not for human consumption may be relieved from excise duty, subject to certain conditions. Spirits for industrial use may be relieved of duty without undergoing methylation provided they are denatured on receipt by the user and are not contained in the goods produced for sale.

### Collection:

All distillers, rectifiers, compounders and certain other traders who sell spirits are required to possess an annual excise licence. Some spirits may not be delivered for home use (for beverage purposes) unless they have been warehoused for at least three years. Excise duty becomes payable on clearance to home use at importation or on delivery from an excise warehouse; but a period of deferment of the duty is allowable. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

## Excise duty on wines and made-wines

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts and the Alcoholic Liquors (amendment of enactments relating to strength and to units of measurements) Order 1979 and the Isle of Man Act 1979.

### **Beneficiary:**

The central government.

### **Excise duty payable on:**

Wine and made-wine imported into the United Kingdom or produced for sale in the United Kingdom. 'Wine' means any liquor obtained from the alcoholic fermentation of fresh grapes or the must of fresh grapes, whether or not the liquor is fortified with spirits or flavoured with aromatic extracts; 'made-wine' means any liquor obtained from the alcoholic fermentation of any substance, or by mixing a liquor so obtained or derived from a liquor so obtained with any other liquor, but does not include wine, beer, black beer, spirits or cider.

### **Basis of assessment:**

The rates of excise duty chargeable on wine and made-wine depend on their strength measured by reference to the percentage of alcohol by volume at 20°C. There are four strength bands for duty purposes in each case.

### **Collection:**

Producers of wine and made-wine in the United Kingdom are required to possess an annual excise licence. Wine and made-wine become liable to excise duty when they are produced but the duty is charged when the wine or made-wine is delivered from the winery and is paid weekly or monthly to the local collector's office. Wine and made-wine produced in the United Kingdom may alternatively be removed from the winery free of duty to bonded warehouse, but only for fortification or for rendering sparkling thereof. The duty on imported wine and made-wine becomes chargeable on importation or, if the wine or made-wine is warehoused, on delivery to home use from the excise warehouse. However, a period of deferment of the duty is allowed on all imported wine and made-wine, whether from the EC or third countries. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

**Rates:**

<sup>1</sup> Strengths are measured by reference to the percentage of alcohol by volume at a temperature of 20° C.

**Special cases:**

Imported wine or made-wine which is rendered sparkling or effervescent whilst in bonded warehouse is liable to the same duties as imported sparkling wine or made-wine.

## Excise duty on cider

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts, and the Alcoholic Liquors (amendment of enactments relating to strength and to units of measurement) Order 1979.

### Beneficiary:

The central government.

### Excise duty payable on:

Cider (or perry) made in the United Kingdom by a person required to be registered as a maker of cider, or imported into the United Kingdom.

### Basis of assessment:

The excise duty is payable on cider (or perry) of a strength less than 8.7% of alcohol by volume (at a temperature of 20°C) obtained from the fermentation of apple or pear juice without the addition at any time of any alcoholic liquor or of any liquor or substance which communicates colour of flavour other than such as the Commissioners of Customs and Excise may allow as appearing to them to be necessary to make cider (or perry).

### Collection:

Any person who, on premises in the United Kingdom, makes cider or perry for sale in excess of a certain limit must be registered in respect of his premises. Excise duty becomes chargeable on the production of the cider or perry: it is not however charged until the cider or perry is delivered from the premises and payment is made weekly or monthly to the local collector's office. Excise duty on imported cider becomes chargeable on importation or, if it is warehoused, on delivery to home use from the excise warehouse. However, a period of deferment of the duty is allowed on imported cider, whether from the EC or third countries. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

## Excise duty on beer

Alcoholic Liquor Duties Act 1979, as amended by subsequent Finance Acts, and the Alcoholic Liquors (amendment of enactments relating to strength and to units of measurement) Order 1979 and the Isle of Man Act 1979.

### Beneficiary:

The central government.

### Excise duty payable on:

Beer, ale, porter, stout and any other liquor manufactured for sale that is described as beer or a beer substitute.

### Basis of assessment:

The excise duty on beer is assessed by reference to the quantity and specific gravity of the unfermented infusion from which the beer is produced (the worts).

### Collection:

Brewers in the United Kingdom are required to possess an annual excise licence. The duty becomes due on production of the wort but the brewer may be allowed a period of credit, the aggregate net charge on all the brewings for each calendar month being payable by the 25th day of the following month; a longer period of credit may be allowed in respect of strong beer and lager. Excise duty on imported beer is chargeable either at importation (if the beer is entered for home use) or on delivery from bonded warehouse, but again a period of credit is allowable. Duty chargeable on or after the 15th day of one month and not later than the 14th day of the next month becomes payable on the 29th day of that next month.

### Rates:

Where the worts before fermentation were of a specific gravity:	
– of 1 030° or less .....	UKL 21.60
– exceeding 1 030°	
– for the first 1 030° .....	UKL 21.60
– for every additional degree (in excess of 1 030°) .....	UKL 0.72

### Deductions:

In respect of beer produced in the United Kingdom a statutory deduction of 6% is made from the monthly assessment of the quantity of worts on which the excise duty is payable to allow for wastage and loss during the preparation of the beer for consumption. For beer imported in containers of a capacity of more than 10 litres, a 2% deduction is made from the quantity imported.

**Special feature:**

Where beer liable to excise duty is brewed solely for the purposes of research or of experiments in brewing, under certain conditions, the duty may be repaid or remitted and a licence to brew is not required.

**Repayment of duty:****(a) Drawback**

Excise duty is repaid, if the duty-paid beer is exported as merchandise removed to the Isle of Man, shipped as stores or deposited in warehouse for exportation as merchandise, removal to the Isle of Man or shipment as stores.

**(b) Spoilt beer**

Subject to certain conditions, excise duty may be repaid or remitted on any worts or beers which have been destroyed or become spoilt or otherwise unfit for use by unavoidable accident while on the premises of a brewer for sale, whether or not they were manufactured by that brewer. Excise duty may be repaid on beer which has accidentally become spoilt or unfit for use after it has been delivered by the brewer and which has been returned to the brewer subsequently.

**(c) Beer used as an ingredient**

Subject to certain conditions, excise duty may be repaid on beer used in the production or manufacture of beverages and other articles of a low alcohol content.

## Petroleum revenue tax

Oil Taxation Act 1975, as amended by Finance (No 2) Act 1979, Petroleum Revenue Tax Act 1980, Finance (No 2) Act 1980 and Finance Act 1981.

### **Beneficiary:**

The central government.

### **Tax payable by:**

Persons including companies, whether resident or non-resident, holding or participating in the holding of licences granted under the Petroleum (Production) Act 1934 or the Petroleum (Production) Act (Northern Ireland) 1964.

### **Tax payable on:**

Profits from substances won or capable of being won under the authority of the above-mentioned licences (except methane drained from mines for safety reasons).

### **Basis of assessment:**

The participator's share of the assessable profit or allowable loss for the field in each chargeable period: each chargeable period being a period of six months ending at the end of June or December. Subject to the exceptions below, each field is assessed in isolation.

### **Special reliefs:**

1. The 'uplift' – a supplement of 35% of, broadly, exploration and development expenditure – designed to compensate for the non-allowance of interest payments and to increase net of tax returns to companies early in the life of a field.
2. The 'oil allowance' provides PRT exemption of up to (currently) ¼ million tonnes for each chargeable period, to a fixed maximum amount (now 5 million tonnes) of production per field.
3. 'Safeguard' limits the PRT charge each calendar year to not more than 80% of the amount (if any) by which the profit (without deduction of 'upliftable' expenditure) exceeds 15% of the cumulative 'upliftable' (broadly capital) expenditure on historical cost basis.

### **Computation of liability:**

For PRT, revenues are, broadly; the price receivable for oil disposed of at arm's length, plus the market value of oil kept for refining or disposed of other than at arm's length plus half the increase in stock values. PRT is calculated on the revenues of the participator less:

- (i) royalty (12 ½ %);
- (ii) field expenditure (including any 'uplift');
- (iii) oil allowance.

This figure is subject to any relief under the 'safeguard'.

**Collection:**

By assessment and a system of advance payments.

**Rate:**

70%.

**Carry-over of losses:**

Where a field shows a PRT loss for any period (as calculated from the paragraphs above) that loss may be carried forward and offset against PRT profits in later periods, or carried back against PRT profits in earlier years. However, if a field is eventually abandoned with unrelieved PRT losses, then any participator may set his share of those losses against his PRT profits on other fields.

A participator in a field may deduct from his PRT liability abortive exploration expenditure on other acreage where a commercial find is unlikely.

## Supplementary petroleum duty

Finance Act 1981.

**Beneficiary:**

The central government.

Every participator in an oil-field.

**Tax payable on:**

## Rates – England and Wales

General Rate Acts 1967 and 1970; Local Government Act 1974; Rating Caravan Sites Act 1976; Rating Charity Shops Act 1976; Local Government Planning and Land Act 1980; Local Government Finance Act 1982; Social Security and Housing Benefit Act 1982.

### **Beneficiary:**

Local government.

### **Tax payable by:**

Occupiers of non-agricultural land and buildings.

### **Tax payable on:**

Occupied non-agricultural land and buildings, and at the discretion of individual local authorities, unoccupied non-agricultural land and buildings.

### **Basis of assessment:**

The rateable value of property (related to its annual rental value which is assessed by the valuation officers of the Board of Inland Revenue) and the rate poundage fixed by the rating authority. The rateable values were last reassessed in 1973. The rate poundage, which is the number of pence in the pound which occupiers of property have to pay on the rateable value of their property, is calculated by dividing the total sum to be raised by the estimated yield of a penny rate in the area of the rating authority.

### **Exemptions:**

Agricultural land and buildings, places of public religious worship and partly charities, industrial and commercial premises in small areas known as 'enterprise zones' are also exempt from rates for a 10-year experimental period. Under the Housing Benefit scheme, rate rebates, largely funded by central government are available to domestic ratepayers so as to adjust payments in accordance with income and needs.

### **Collection:**

A single rate is fixed for each local government financial year (April to March) and becomes payable in advance within seven days of demand. Rates can be paid on domestic and certain business properties by instalment arrangements of between 10 or 12 monthly payments. Otherwise payment is usually demanded in two half-yearly instalments.

**Rates:**

The rate poundages are fixed by rating/precepting authorities after making allowance for their estimated entitlement to central government grants and any other income for the year in question. The yield from rates currently finances about a third of local authorities' total revenue expenditure and amounted to UKL 10 740 million in 1982/83 at outturn prices exclusive of rate rebates. In the financial year beginning on April 1983, the general rate poundages fixed by the 403 rating authorities in England and Wales ranged from 127 pence to 275 pence in the pound.

## Rates – Scotland

Lands Valuation (Scotland) Act 1854; Local Government (Scotland) Act 1947; Valuation and Rating (Scotland) Act 1956; Local Government (Financial Provisions etc.) (Scotland) Act 1962; Local Government (Financial Provisions) (Scotland) Act 1963; Local Government (Scotland) Act 1966; Valuation for Rating (Scotland) Act 1970; Rating Act 1971; Local Government (Scotland) Act 1973; Local Government (Scotland) Act 1975; Rating (Caravan Sites) Act 1976; Rating (Charity Shops) Act 1976; Valuation and Rating (Exempted Classes) (Scotland) Act 1976; Local Government (Scotland) Act 1978; Rating (Disabled Persons) Act 1978; Water (Scotland) Act 1980; Local Government Planning and Land Act 1980; Local Government (Miscellaneous Provisions) (Scotland) Act 1981; Local Government and Planning (Scotland) Act 1982; Lands Valuation Amendment (Scotland) Act 1982.

### **Beneficiary:**

Local government.

### **Tax payable by:**

Occupiers of non-agricultural land and buildings.

### **Tax payable on:**

Occupied non-agricultural land and buildings.

### **Basis of assessment:**

The rateable value of property, and the rate poundage fixed by the local authorities. The rateable value which in most cases is related to a property's annual rental value is determined by assessors appointed by valuation authorities (regional and islands councils). Each rate poundage, which is the number of pence in the pound which occupiers of property have to pay on the rateable value of their property, is calculated by dividing the total sum to be raised by the estimated yield of a penny rate in the area of the rating authority. In an islands area a general rate is fixed and levied by the islands council, while in other areas separate rates are fixed by district councils and regional councils and the district rate and regional rate are levied together by the regional council.

### **Exemptions:**

Agricultural land and buildings, offshore oil installations, places of religious worship and, partly, charities. Industrial and freight transport property is derated to the extent of 50% of its annual value. Rate rebates are available to domestic ratepayers so as to adjust payments in accordance with income and needs.

**Collection:**

Rate poundages are fixed by 5 March preceding the local authority financial year (commencing on 1 April) and are payable in 10 monthly instalments from May to February, or in a single sum by 1 October as the ratepayer prefers. Other *ad hoc* payment arrangements may be made with the agreement of the rating authority.

**Rates:**

The yield from rates in 1980–81 financed about one-third of local government expenditure and amounted to, at the latest estimate UKL 230 million at outturn prices exclusive of rate rebates. In the financial year beginning in 1980, the combined district/region or general rate poundages ranged from 62 pence to 94 pence.

## Rates – Northern Ireland

The Rates (Northern Ireland) Order 1977; The Rates (Amendment No 2 (Northern Ireland) Order 1983.

### **Beneficiaries:**

Local and central government – on 1 October 1973 major functions formerly carried out by local government were transferred to central government. A proportion of the rate collected is therefore retained by central government as a contribution towards the cost of those services which have been transferred.

### **Tax payable by:**

Occupiers of non-industrial premises and occupiers of non-agricultural land and buildings.

### **Tax payable on:**

Occupied non-industrial premises and occupied non-agricultural land and buildings.

### **Basis of assessment:**

#### **District rate:**

The rateable value of the property occupied and the rate poundage for the area. The rateable value is related to the annual rental value of the property and is assessed by central government valuation officers. The rate poundage (which is calculated separately in each district) is the number of pence per pound of rateable value to be paid by the occupiers of property. It is calculated by dividing the total revenue required by each district council by the total rateable valuation of the district. The rateable value is related to the level of values at the last General Revaluation in 1976.

#### **Regional rate:**

The rateable value of the property and regional rate poundage for Northern Ireland. The rateable value is related for the annual rental value of the property and is assessed by central government valuation officers. The regional rate poundage which applies throughout Northern Ireland is the number of pence in the pound of rateable value to be paid by the occupiers of property. It is calculated by dividing the total revenue required by the total rateable valuation of Northern Ireland. The regional rate is a contribution towards the cost of those local authority type services which are now the responsibility of central government departments.

**Exemptions:**

- Agricultural land and buildings, industrial premises, places of religious worship and charitable hereditaments used for charitable purposes are totally exempt.
- All non-domestic properties in 'Enterprise zones' are totally exempt.
- Freight transport premises are exempted from 75% of the rate charge and certain sports and recreation facilities are exempted from 75% of the rate charge.
- Rate rebates are available to domestic ratepayers so as to adjust payments in accordance with income and needs.

**Collection:**

The district rate and the regional rate are combined and collected as one charge by the Department of the Environment for Northern Ireland, a department of central government, and the product of each district rate passed on to each respective district council. Rate poundages are fixed in February in each financial year. The rate becomes due on 1 April and is payable in one single amount or two part payments. Domestic rates can be paid by 10 monthly instalments. Enforcement for non-payment is by normal debt proceedings at the courts.

**Yield:**

The total yield for rates in Northern Ireland for the year ending 31 March 1983 was UKL 171.2 million, of which approximately 68% is retained by central government.

Vehicle excise duty is collected by the sale of vehicle licences to the persons keeping the vehicles. Licences are issued by post offices, and by local offices of the Department of Transport, who administer the tax. The proceeds are paid direct to the exchequer.

---

<sup>1</sup> In Northern Ireland, vehicle excise duty is charged under the Vehicles (Excise) Act (Northern Ireland) 1972 (as amended variously by the Finance Acts) and, with certain exceptions, mainly in respect of haulage vehicles, is levied at the same rate as in Great Britain.

**Rates:**

For a private car, the cost of a licence in Great Britain is UKL 85 a year. Motor cycles and three-wheelers, etc. pay UKL 8.50, UKL 17 and UKL 34 a year according to engine capacity. Rates of duty on goods vehicles rise on a scale which for an unladen weight of up to 1 525 kgs is UKL 85 and for one of 38 tonnes<sup>1</sup> gross weight is UKL 2940 a year. Goods vehicles exceeding 12 tonnes drawing a trailer exceeding 4 tonnes pay extra duty on a scale from UKL 70 to UKL 300. Certain vehicles including agricultural machines, digging machines, mobile cranes, works trucks and mowing machines, which make limited use of public roads, are charged a concessionary rate of UKL 14 per year. There are also concessionary rates of duty for farmers' and showmen's goods vehicles.

**Rates for the half year:**

## Gaming machine licence duty

Betting and Gaming Duties Act 1981, as amended by the Finance Acts 1982 and 1983.

### Beneficiary:

The central government.

### Duty payable on:

Whole year, half-year or quarter year licences for each machine, the whole year licences being valid from 1 October, the half-year licences from 1 April or 1 October and the quarter year licences from 1 January, 1 April, 1 July and 1 October.

### Basis of assessment:

The charge depends on the type of premises, the duration of the licence, the number of machines it covers and the categories into which they fall. A machine is chargeable at the lower rate if the cost per play does not exceed 5p and otherwise at the higher rate. (When the cost per play does not exceed 2p no licence is required.)

### Collection:

Payment must be made to the local collector's office prior to the licensing period.

### Rates:

#### A. Premises with local authority approval:

- Lower rate           UKL 120 per machine
- Higher rate         UKL 300 per machine

#### B. Premises without local authority approval:

- Lower rate           UKL 300 per machine
- Higher rate         UKL 750 per machine

Half-year licences are dutiable at 11/20 and quarter year licences at 6/20 of these rates.
