Brussels, 31 May 1989

Reexamined proposal for a

## COUNCIL DECISION

instituting a specific multi-annual programme  
for the research and development of  
statistical expert systems (DOSES)

---

(presented by the Commission pursuant to Article 149.2(d)  
of the EEC Treaty)

Con 249f.

Part I

Reexamined proposal for a Council decision  
instituting a specific multiannual programme  
for the research and development of  
statistical expert systems (DOSES)

COUNCIL DECISION

of

instituting a specific  
programme for the Research and Development  
of Statistical Expert Systems (DOSES)

---

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 130 q(2) thereof,

Having regard to the proposal from the Commission <sup>(1)</sup>,

In co-operation with the European Parliament <sup>(2)</sup>,

Having regard to the opinion of the Economic and Social Committee <sup>(3)</sup>,

---

(1) OJ No C 203, 4.8.1988, p. 5.

(2) Opinion delivered on 18 January 1989 (not yet published in the Official Journal) and Decision of ..... (not yet published in the Official Journal).

(3) Opinion delivered on 14 December 1988 (not yet published in the Official Journal).

Whereas the Scientific and Technical Research Committee (CREST) has been consulted,

HAS ADOPTED THIS DECISION:

Article 1

A specific programme on research into and the development of statistical expert systems (DOSES) for the European Economic Community as defined in Annex I is hereby adopted for a period of four years starting on ..... (x)

Article 2

The funds estimated as necessary for the Community contribution to the execution of the programme amount to ECU 4 million, including expenditure on a staff of one.

An indicative allocation of these funds is set out in Annex II.

Article 3

Detailed rules for the implementation of the programme are set out in Annex I.

---

(x) Insert date of adoption.

Whereas it is desirable to further exchanges and transfers of knowledge on statistical expert systems between the Member States.

Whereas, in the present state of development of information systems and in particular statistical systems, the development of statistical tools appears a useful and indeed essential aid to the optimum use of information;

Whereas the enhancement of statistical tools will enable work productivity to be increased;

Whereas it is desirable for statistical information to become more widely used by making access to it easier;

Whereas Decision 87/516/Euratom/EEC stipulates that a particular aim of Community research must be to strengthen the scientific and technological basis of European industry, particularly in strategic sectors of advanced technology, and to encourage industry by making it more competitive at the international level, and whereas the same Decision also lays down that Community action is justified if it contributes, among other things, to the strengthening of the Community's economic and social cohesion and the promotion of its overall harmonious development, while at the same time being consistent with the pursuit of scientific and technical excellence; whereas the DOSES programme is planned to contribute to the pursuit of these objectives;

#### Article 6

1. The representative of the Commission shall submit to the Committee a draft of the measures to be taken. The Committee shall deliver its opinion within a time limit which the Chairman may lay down according to urgency of the matter, if necessary by taking a vote.

2. The opinion shall be recorded in the minutes of the Committee; in addition, each Member State shall have the right to have its opinion recorded in the minutes.

3. The Commission shall take the utmost account of the opinion delivered by the Committee. It shall inform the Committee of the manner in which its opinion has been taken into account.

#### Article 7

1. The Commission is hereby authorized to negotiate, in accordance with Article 130 n of the Treaty, agreements with European third countries and international organizations, in particular the OECD and its member countries and countries participating in European Co-operation in the field of Scientific and Technical Research (COST), as well as those having concluded framework agreements in scientific and technical co-operation with the Community with a view to associating them wholly or partly with the programme.

2. Where framework agreements for scientific and technical co-operation between European third countries and the European Communities have been concluded, organizations and enterprises established in those countries may, under conditions to be laid down in accordance with the procedures set out in Article 6 and on the basis of the criterion of mutual advantage, become partners in a project undertaken within the programme.

#### Article 8

This Decision is addressed to the Member States.

Done at Brussels,

For the Council  
The President

#### Article 4

During the second year of implementation, the Commission shall review the programme and send a report on the results of its review to the European Parliament and the Council. This report shall be accompanied where necessary by proposals for the amendment or extension of the programme.

At the end of the programme, an evaluation of the results achieved shall be conducted by the Commission which shall report thereon to the European Parliament and the Council.

The abovementioned reports shall be established having regard to the objectives set out in Annex I to this Decision and in accordance with Article 2(2) of Decision 87/516/Euratom/EEC.

#### Article 5

The Commission shall be responsible for the execution of the programme.

The Commission shall be assisted by a committee of an advisory nature, hereinafter referred to as "the Committee" composed of the representatives of the Member States and chaired by the Representative of the Commission.

Contracts concluded by the Commission shall govern the rights and obligations of each party, in particular arrangements for the dissemination, protection and exploitation of research results.

The following are suitable for co-ordinated projects:

- subjects which are intrinsically international in character;
- problems arising in a similar manner in the various Member States (and possibly within the Commission) which may therefore benefit from a co-ordinated approach;
- problems which have to be solved for purposes of harmonization;
- problems arising in connection with the processing of confidential data;

The main feature of these projects is that a minimum number of participants co-ordinate their work in fields of common interest and exchange their findings.

The emphasis will be on projects able to produce results in a relatively short time (2-3 years).

#### Part II: Shared-cost projects

The research will be carried out by means of shared-cost research contracts to be awarded to research bodies, companies and other organisations in the Community. Community financial participation will in principle not exceed 50% of total expenditure, the rest normally being borne by the contractors. Alternatively, in the case of universities and research institutes carrying out projects, the Community may bear up to 100% of the additional expenditure involved. Work will be carried out in the following areas:

PROGRAMME OBJECTIVES AND  
SUMMARY OF THE WORK PROGRAMME

The actions concern the exploitation of advanced information technologies in the field of statistics: in particular, the application of expert systems technology to the whole chain of statistical data processing.

The actions are oriented to meet Member States' needs for the development of knowledge and expert systems rules, which can constitute the base for the development of expert systems with a Community dimension in the various domains of the statistics field.

The programme shall consist of two parts: Part I comprises the organisation of co-ordinated projects; Part II comprises research and development projects regarded as meriting priority in the field of official statistics and is sub-divided into four themes.

Part I: Co-ordinated projects

This part of the programme deals with the co-ordination at Community level of activities which are of general interest to the Member States and satisfy the criteria set out below. The Commission shall provide a framework within which projects can be selected on the basis of proposals submitted by the interested parties and financial assistance can be provided for the organisation of these projects.

ANNEX II

INDICATIVE ALLOCATION OF FUNDS

millions of ecus

Part I : Co-ordinated projects	0,5
Part II: Shared-cost projects	3,0
Staff and administrative costs	<u>0,5</u>
TOTAL	<u>4,0</u>

Theme 1: Vertical study: Preparation of a complete system for automated information processing, from collection to dissemination, in a specific field (as a prototype for other fields and a reference framework for the other themes);

Theme 2: Documentation of data and statistical methods;

Theme 3: Access to statistical information;

Theme 4: Forecasting.

#### Implementation procedures

Contracts under Part I shall be awarded by means of restricted invitations to tender. Participants will fund their own share of the work to be done and will be informed of all the results.

Contracts under Part II shall be awarded by means of public invitations to tender. They shall involve the participation of at least two partners, who are independent of each other and who may not be established in the same Member State. Public invitation to tender shall be published in the Official Journal of the European Communities, and summaries shall be published in the scientific journals specialising in the subject.

Part II - Annex

Amendment of the European Parliament  
not accepted by the Commission

Article 2 paragraphs 1 and 2 unchanged

New paragraph 3

Each year, within the framework of the annual budgetary procedure, the Commission shall propose to the budgetary authority that the appropriations for the programme be entered with due regard for the actual requirements of the financial year concerned and financial forecasts as provided for in the Interinstitutional Agreement.

## Part II

### The Commission's position with regard to the European Parliament's amendment which it has not accepted

1. At its part-session of 24 May 1989, while giving a second reading to the common position on a decision instituting a specific multiannual programme for the research and development of statistical expert systems (DOSES), the European Parliament adopted an amendment which the Commission cannot accept. The amendment is attached.
2. The Commission cannot accept the amendment. It is of the opinion that the amendment is not necessary because it is covered by Article 130 P of the Treaty.
