Proposal for  
COUNCIL REGULATION (EC)

amending Regulation (EEC) No 3763/91 introducing specific measures  
in respect of certain agricultural products for the benefit  
of the French overseas departments

-----  
  
(presented by the Commission)

## EXPLANATORY MEMORANDUM

Pursuant to Title V of Decision 89/687/EEC setting up a programme of options specific to the remote and insular nature of the French overseas departments (Poseidom) and Article 23 of the framework Regulation (EEC) No 3763/91 introducing specific measures for certain agricultural products, the Commission on 30 May 1994 forwarded to the Council and the European Parliament the Report for 1992-93 on progress made in implementing Poseidom.

The assessment set out in the report, the difficulties encountered in implementing the agricultural measures and new applications made to the Commission by the French authorities under the partnership procedure in force make certain changes to the agricultural framework regulation necessary. It is the aim of this proposal from the Commission to the Council to make the changes.

This revision should also make it possible to harmonize technical aspects and texts, as made necessary by the adoption and entry into force since July 1992 of the Poseican programme for the Canaries and the Poseima programme for the Azores and Madeira.

The changes mainly involve the following:

- an extension to certain other products of the specific supply arrangements to offset the additional costs caused by the distance and insularity of the FOD so as to meet the needs of processing industries located in these most remote regions and enable them to satisfy local demand;
- measures aimed at improving the effectiveness of existing mechanisms for developing local production in the essential sectors of beef production and milk production; these measures include, firstly, the replacement of the consumption aid for fresh dairy products, which has proved to be inappropriate to the situation, by a production aid and, secondly, derogations from certain provisions for the common market organizations in question relating to the limitation of production to make up for the insufficient supply and take account of specific production conditions quite different from in the rest of the Community;
- improved production support arrangements in the fruit and vegetables and flower growing sectors consisting of replacing a production aid, which was not differentiated according to product and did not provide a sufficient incentive, by a mechanism designed to promote local marketing of quality products under annual contract; the improvement also includes support for processing and marketing tropical fruit and vegetables harvested and processed in the FOD.

Proposal for  
**COUNCIL REGULATION (EC)**

amending Regulation (EEC) No 3763/91 introducing specific measures  
in respect of certain agricultural products for the benefit  
of the French overseas departments  
-----

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 43 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament,

Having regard to the opinion of the Economic and Social Committee,

Whereas, in accordance with Title V of Council Decision 89/687/EEC of 22 December 1989 establishing a programme of options specific to the remote and insular nature of the French overseas departments (Poseidom)<sup>(1)</sup> and Article 23 of Council Regulation (EEC) No 3763/91<sup>(2)</sup>, as amended by Regulation (EEC) No 3714/92<sup>(3)</sup>, the Commission has produced a 1992-93 progress report on the measures undertaken to implement the Poseidom programme and the measures laid down in the said Regulation;

Whereas, on the basis of both the assessment in the Commission report, particularly as regards the difficulties observed in 1992 and 1993, and of the applications submitted by the French authorities under the current partnership procedure, some adjustments to Regulation (EEC) No 3763/91 must be made;

Whereas the arrangements must be revised in such a way as to achieve the technical and drafting alignments required as a result of the subsequent adoption and implementation of the Poseican programme for the Canary Islands and the Poseima programme for the Azores and Madeira;

<sup>(1)</sup> OJ No L 399, 30.12.1989, p. 39.

<sup>(2)</sup> OJ No L 356, 24.12.1991, p. 1.

<sup>(3)</sup> OJ No L 378, 23.12.1992, p. 23.

Whereas in the case of the specific supply arrangements, the period of applicability of the measures for meeting the needs of the department of French Guiana as regards compound feedingstuffs should, given the delay in implementation, be extended until the plants manufacturing such products actually commence operations in that department;

Whereas the volume of rice production in French Guiana attracting aid for disposal and marketing in Guadeloupe and Martinique must be increased to take account of profitability requirements; whereas it must also be possible for a limited quantity of this production to be marketed in the rest of the Community;

Whereas the specific supply arrangements must be extended to certain other products to meet the needs of the processing industries located in the French overseas departments, hereinafter referred to as FOD, in order to supply local demand;

Whereas, in the case of the measures to encourage livestock production, the period in which the specific supply arrangements relating to bovine animals for fattening and consumption in the FOD apply should be extended so as to take account of the delay in their implementation; whereas the goal of increasing the currently very low local self-sufficiency rates in adult bovine animals and suckler cows justifies waiving the provisions of the common organization of the market under Poseidom, particularly the criteria regarding stocking density which were established to restrict intensive livestock rearing in the rest of the Community; whereas, for a transitional period, provision should be made to contribute funds to the regional programmes to support the production and marketing of local products in the livestock and milk products sectors in Martinique and Réunion, which have been drawn up and carried out in close collaboration with the most representative inter-branch organizations currently operating;

Whereas the poor conditions under which the local FOD market is supplied with fresh milk products, most of which are currently imported, should be remedied; whereas this aim can be achieved by replacing the consumption aid scheme, which has proved inadequate, by an aid scheme to develop the production of cow's milk within the limits of local consumption requirements as assessed on a regular basis in a supply balance, and by waiving the additional levy scheme applicable to producers of cow's milk provided for in Council Regulation (EEC) No 3950/92<sup>(4)</sup>, as last amended by Regulation (EC) No 1883/94<sup>(5)</sup>; whereas the adverse supply conditions which characterize those remote regions, thereby differing fundamentally from the conditions in the rest of the Community, together with the need to stimulate the development of local production, justify this exception;

<sup>(5)</sup> OJ No L 197, 30.7.1994, p. 25.

Whereas, as regards the measures to support local production, the aid scheme per hectare for fruit and vegetables has proved unsuitable, especially because of the insufficient amounts granted and the lack of any differentiation of these amounts according to the crops involved; whereas aid for marketing these products for the exclusive supply of the FOD market, granted for quality products covered by medium-term supply contracts concluded with distributors, restaurants and the like and local authorities, the amount of which would be fixed on the basis of the average value of the products involved, appears to be the most suitable approach in the FOD;

Whereas measures must also be taken within the limit of set quantities, to support certain traditional products such as vanilla, geraniums or vetiver, to develop the processing of certain fruits and vegetables from products harvested locally, and to stimulate the marketing of these products using existing mechanisms,

**HAS ADOPTED THIS REGULATION:**

### Article 1
