

COMMISSION OF THE EUROPEAN COMMUNITIES

COM(92) 143 final

Brussels, 9 April 1992

Proposal for a

COUNCIL REGULATION (EEC)

**Introducing specific measures for the Azores and Madeira
concerning certain agricultural products**

(presented by the Commission)

EXPLANATORY MEMORANDUM

On 26 June 1991 the Council adopted a programme of options specific to the remote and insular nature of Madeira and the Azores (Poseima) (Decision 91/315/EEC).

This proposal constitutes the initial implementation of Poseima and establishes a framework regulation for agricultural measures financed by the EAGGF Guarantee Section.

The purpose of Poseima is to reduce the cost of supplies and encourage the economic and social development of Madeira and the Azores, which have an exceptional geographic situation and are structurally very backward in relation to other regions in the Community.

In view of the specific problems of these islands and the imminent completion of the internal market, the proposal provides for a series of multiannual, multisectoral measures to facilitate supply and help to improve the production and marketing of the agricultural produce of the regions.

Proposal for a
COUNCIL REGULATION (EEC)

**Introducing specific measures for the Azores and Madeira
concerning certain agricultural products**

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

**Having regard to the Treaty establishing the European Economic Community,
and in particular Article 43 thereof,**

**Having regard to the Treaty of Accession of Spain and Portugal, and in
particular Article 234(3) thereof,**

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament,

Having regard to the opinion of the Economic and Social Committee,

**Whereas Council Decision 91/315/EEC of 26 June 1991 setting up a programme
of options specific to the remote and insular nature of Madeira and the
Azores (Poseima)¹ outlines the options to be implemented to take account
of the specific problems and constraints faced by these very remote
regions;**

**Whereas the exceptional geographical situation of these regions in relation
to the sources of supply of products used as inputs for the everyday
consumption or manufacture of certain essential foodstuffs in the islands
imposes costs which constitute a severe handicap to the sectors concerned;
whereas this natural handicap can be remedied by exemption from levies
and/or customs duties on the products in question imported directly from
third countries;**

¹ OJ No L 171, 29.6.1991, p. 10.

Whereas, to maintain the competitiveness of the above products of Community origin in the islands, both in order to achieve the Poseima objective of reducing prices by promoting competition between sources of supply and to prevent disruption of traditional trade flows, provision should be made for the supply to these regions of products originating in the rest of the Community on terms equivalent for the end user to exemption from the levy and/or customs duties on products originating in third countries, based on the prices applied to exports to third countries;

Whereas the quantities of products benefiting from the specific supply arrangements must be determined within the framework of periodic forecast supply balances, which may be adjusted during the year on the basis of the essential requirements of the local market and taking account of local production and traditional trade flows;

Whereas the arrangements in question are intended to reduce production costs and consumer prices; whereas their actual impact should therefore be monitored;

Whereas, to avoid any deflection of trade, products covered by the specific supply arrangements may not be redispached to other parts of the Community or re-exported to third countries; whereas, however, an exception to this principle should be made for products traditionally processed in the islands and redispached or re-exported, within the limits of usual trade flows;

Whereas the specific conditions of agriculture in the Azores and Madeira require special attention and whereas measures are necessary both for stockfarming and animal products and for crop products;

Whereas, to promote the development of traditional stockfarming in the islands, assistance should be given for genetic improvement through the purchase of pure-bred breeding animals and supplementary premiums should be granted for the fattening of adult male bovine animals and for the maintenance of suckler herds, and the consumption of locally produced fresh milk products should be promoted; whereas, with regard to the Azores, the major role played by cattle farming and milk production in the economy of the islands should be taken into account and the above-mentioned measures should be supplemented with aid for the maintenance of the dairy herd and private storage aid for cheeses traditionally manufactured in the region;

Whereas, in the fruit, vegetables, plants and floricultural sector, measures should be taken to increase production and to improve farm productivity and product quality; whereas measures should also be taken to improve the marketing of tropical products from these regions;

Whereas the creation and promotion of a graphic symbol can also facilitate the marketing of specific quality products;

Whereas, in order to help support local production and satisfy consumer habits, provision should be made for aid for certain crops and specific products;

Whereas, in the case of Madeira, such measures must, in particular, concern the production of potatoes for human consumption and sugar cane and the processing of sugar cane into sugar syrup and agricultural rum; whereas assistance should also be given to the manufacture of the island's liqueur wines using traditional methods by facilitating the purchase of concentrated must and vinous alcohol from the rest of the Community and by granting aid for the ageing of these wines;

Whereas, in the case of the Azores, such measures must, in particular, help to improve the conditions in which sugarbeet is produced and the competitiveness of local sugar manufacturing, within the limit of determined quantities; whereas they must also concern specific crops such as seed potatoes, endives and pineapple;

Whereas, with the same objectives in mind, intervention measures under the market organization for wine and grubbing premiums should not be applied in these regions and aid should be granted for vines producing quality wines psr which meet the requirements laid down in the Community rules;

Whereas the plant health of agricultural crops in these islands is subject to particular problems associated with the climate and the inadequacy of the control measures hitherto applied there; whereas programmes should be implemented to combat harmful organisms and the Community's financial contribution towards such programmes should be specified;

Whereas farms in the Azores and Madeira present major structural weaknesses from which specific difficulties derive; whereas a derogation is therefore necessary from the rules which restrict or prohibit the grant of certain forms of structural aid;

Whereas certain structural measures essential for the development of agriculture in these regions are financed under Community support frameworks to promote the development and structural adjustment of regions whose development is lagging behind (Objective 1) pursuant to Articles 130a and 130c of the Treaty; whereas the Commission has approved an initiative (Regis) to encourage the economic development of the remotest regions, providing for the diversification of agricultural production, the upgrading of traditional products and measures to reduce the risks associated with natural disasters;

Whereas banana cultivation is of fundamental importance to the economy of Madeira; whereas all the problems relating to banana production are the subject of a Community study under way and appropriate measures will be taken on conclusion of the study,

HAS ADOPTED THIS REGULATION:

Article 1

This Regulation lays down specific measures to remedy, in respect of certain agricultural products, the difficulties caused by the remote and insular nature of the Azores and Madeira.

TITLE I

SPECIFIC SUPPLY ARRANGEMENTS

Article 2

For each marketing year, forecast supply balances shall be established for the agricultural products necessary for human consumption and processing listed in Annex I for the Azores and Annex II for Madeira. These balances may be revised during the year on the basis of trends in the regions' requirements. Separate forecasts may be made to assess the requirements of the processing and packaging industries regarding products for the local market or traditionally dispatched to the rest of the Community.

Article 3

1. Levies and/or customs duties shall not apply to direct imports into the Azores and Madeira from third countries of products covered by the specific supply arrangements, within the limit of the quantities determined in the supply balances.

2. To ensure coverage of the requirements referred to in Article 2 in terms of quantity, price and quality, with a view to ensure that the proportion of products supplied by the Community is preserved, supplies to these regions shall also be effected through the mobilization of Community products held in intervention storage or available on the Community market, on terms equivalent, for the end user, to the advantage resulting from exemption from import duties on imports of products from third countries.

The terms of supply shall be fixed with reference to the costs of various sources of supply and the prices applied to exports to third countries.

3. The arrangements provided for in this Article shall be implemented in such a way as to take account, without prejudice to paragraph 4, in particular, of:
 - the specific requirements of the regions concerned and, in the case of products intended for processing, the specific quality requirements;

Article 9 of Regulation (EEC) No 1785/81 shall not apply to the Azores with regard to raw sugar.

The aid shall be paid for the delivery of animals and products which fulfil the requirements specified in Community rules.

3. The aid shall be determined having regard to the following factors:

- (a) the conditions of supply to the Azores and Madeira resulting from their geographical situation;
