

COMMISSION OF THE EUROPEAN COMMUNITIES

Brussels, 05.12.1995
COM(95) 615 final

Proposal for a

COUNCIL REGULATION (EC)

fixing, for certain fish stocks and groups of fish stocks, the total allowable catches for 1996 and certain conditions under which they may be fished

(presented by the Commission)

EXPLANATORY MEMORANDUM

This proposal for a Council Regulation fixes the Total Allowable Catches (TAC's) for 1996, the Community share of them, the distribution of those shares as quotas among Member States and the conditions under which the quotas may be fished. The fixing and the sharing of possibilities for fishing falls exclusively within the competence of the Community and arises from obligations set out in Article 8(4) of Regulation (EEC) No 3760/92 of the Council of 20 December 1992.

It should be noted that, in accordance with a declaration of the Council and the Commission of 4 January 1995 (SN 355/1/94 (PECHE) REV 1), three new stocks of horse mackerel in the vicinity of the Azores, Madeira and the Canary Islands are referred to in this proposal.

In the case of autonomous stocks where the Advisory Committee on Fishery Management (ACFM) based its advice on analytical assessments and where the EC Scientific Technical and Economic Committee for Fisheries (STECF) has further reviewed the advice of ACFM, the TAC's proposed are based on the advice of these committees.

In the case of autonomous stocks for which no analytical assessments are available, TAC's (precautionary TAC's) have been proposed. In such cases, the Commission has based its proposal on advice either from ACFM or from STECF wherever these bodies give an explicit value for the TAC. Where no explicit value is given, the proposed value is equal to that adopted last year by the Council.

Consultations between the Community and Norway to agree on reciprocal fisheries arrangements for 1996 are currently in progress. When concluded, these arrangements will imply, *inter alia*, certain catch quotas for Norwegian vessels in Community waters.

The most recent report of ACFM, endorsed by STECF, indicates that in Regions 1 and 2, many of the stocks of demersal fish, particularly cod, haddock, saithe, whiting, hake and plaice are too heavily exploited and are considered to be in a state which is actually or potentially outside safe biological limits. Analytical assessments of the state of a number of demersal stocks in Region 3 are also available. Depending on the stock in question, ACFM have recommended management action implying the imposition of restrictive TAC's and such recommendations are reflected in this proposal.

As regards pelagic fish, ACFM and STECF also point to grave concern over the state of stocks of herring in the North Sea and of mackerel. The TAC's for both of these stocks are included in the annual consultations with Norway which are still in progress.

Given that certain technical measures should be implemented as from 1 January 1996, they are included in the proposal, in the form of temporary derogations to the main rules, while waiting for the corresponding regulations to be amended accordingly. In particular:

- The prohibition for beam trawling in the Southern North Sea, established in Article 9(3) of Regulation (EEC) No3094/86 (Plaice box), is extended to the whole year 1996.
- The economical effectiveness of the fishery for horse mackerel in zones VIIIc and IX may be improved by the landing of small horse mackerel within limits compatible with the sustainability of the resource. This is dealt with by a footnote attached to the corresponding quotas.

COUNCIL REGULATION (EC) No. 195
of 1995
fixing, for certain fish stocks and groups of fish stocks, the total
allowable catches for 1996 and certain conditions under which
they may be fished

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No. 3760/92 of 20 December 1992 establishing a Community system for fisheries and aquaculture¹, and in particular Article 8(4) thereof,

Having regard to the 1985 Act of Accession, and in particular Articles 157, 161 and 348 thereof,

Having regard to the 1994 Act of Accession, and in particular Articles 121. and 122 thereof.

Having regard to the proposal from the Commission,

Whereas Article 4 of Regulation (EEC) No. 3760/92 requires the Council to formulate, in the light of the available scientific advice and, in particular, of the report prepared by the Scientific, Technical and Economic Committee for Fisheries, the measures necessary to ensure the rational and responsible exploitation of resources on a sustainable basis;

Whereas a management regime making full use of the new management possibilities given by Regulation (EEC) No. 3760/92, and in particular the management of catch limitations on a pluriannual and multispecies basis, cannot yet be achieved, due to the need to put into force certain measures for the control of fisheries, to further develop the appropriate administrative framework for a system of limitation of fishing effort, and to enhance scientific knowledge;

¹ O.J. No L389, 31.12.1992, p.1

whereas, until such a management regime is consolidated, limitation of exploitation rates should be guaranteed by the current TAC system;

Whereas under the terms of Article 8(4) of Regulation (EEC) No 3760/92, it is incumbent upon the Council, in accordance with Article 4, to establish the total allowable catches (TAC) by fishery or group of fisheries; whereas fishing opportunities should be allocated to Member States in accordance with the second subparagraph of Article 8(4)(ii);

Whereas it is necessary to establish the principles and certain procedures of fishery management at the Community level, so that Member States can ensure the management of the fleets under their flag or jurisdiction;

Whereas, in accordance with the procedure provided for in Article 2 of the Agreement on fisheries between the European Community and the Government of Denmark and the Home Government of the Faroe Islands of the other part², the parties have consulted on their reciprocal fishing rights for 1996; whereas these consultations have been successfully concluded: whereas, as a result, it is possible to fix the TACs, the Community shares and the quotas for certain joint and autonomous stocks, of which part is allocated to the Faroe Islands;

Whereas, in accordance with the procedure provided in Articles 2 and 7 of the Fisheries Agreement between the European Economic Community and the Kingdom of Norway³, the Community and Norway have held consultations concerning mutual fishing rights for 1996; whereas these consultations have not yet been successfully concluded and therefore it is not possible to fix the TACs, the Community shares and the quotas for joint stocks and where necessary, for other stocks;

Whereas the Community has signed the United Nations Convention on the Law of the Sea, which contains principles and rules relating to the conservation and management of the living resources of the sea:

² O.J. No L226, 29.08.1980, p.12

³ OJ No L226, 29.08.1980, p.48

Whereas, in the framework of its wider international obligations, the Community participates in efforts to conserve fish stocks arising in international waters; whereas the extent to which such stocks are fished by vessels of the Community should be viewed in the light of overall fishing activity and the contribution made hitherto by the Community towards their conservation should be taken into account;

Whereas the International Baltic Sea Fishery Commission has recommended TACs for the stocks of cod, salmon, herring and sprat occurring in the waters of the Baltic Sea and the shares thereof for each contracting party;

Whereas, in the case of certain stocks fished mainly for reduction to meal and oil, it does not appear necessary to make quota allocations;

Whereas Article 161 of the 1985 Act of Accession fixes the share of the TACs allocated to Spain for certain stocks in certain zones and allocates flat-rate amounts of horse mackerel and blue whiting to Spain;

Whereas those flat-rate amounts of blue whiting must be divided among ICES sub-areas and divisions Vb (EC zone), VI, VII and VIIIa, b and d;

Whereas, pursuant to Article 158 of the 1985 Act of Accession, a distinction must be made between fishing for demersal species and fishing for species other than demersal; whereas the group to which blue whiting, anchovy and horse mackerel belong must therefore be defined;

Whereas, in order to ensure effective management of these TAC's, the specific conditions under which fishing operations occur should be established;

Whereas, in order to ensure a better exploitation of the quotas of herring, anchovy, hake, blue whiting, mackerel and megrim, transfers of a part of the quotas from the zone of allocation to adjacent zones should be allowed;

Whereas, in order to ensure a better exploitation of the haddock stocks in zones Vb (EC zone), VI, XII and XIV, catches in zones Vb and VIa should be limited;

Whereas massive catches of young flatfish are being taken in the Southern North sea in Autumn: whereas protection should be given to these fish, in order to achieve a better exploitation:

Whereas the International Baltic Sea Fisheries Commission has recommended certain technical measures for resource conservation to be implemented by its Contracting Parties with effect from 1 January 1996:

Whereas, pursuant to Article 122 of the 1994 Act of Accession, the conditions under which allocations made in the framework of the Accession can be fished will remain identical to those applicable immediately prior to the entry in force of the 1994 Treaty of Accession:

Whereas improved economical utilization of certain stocks of herring requires them to be used for purposes other than direct human consumption; whereas the state of these stocks is such that, under appropriate management, there is no danger in implementing such a measure:

Whereas the management regime set out by Council Regulation (EC) No 2027/95 establishing a system for the management of fishing effort relating to certain Community fishing areas and resources⁴ requires the maintenance of the existing balances in fishing activities; whereas, in the case of certain stocks of horse mackerel, these balances can be kept by setting appropriate TACs and allocating them to the Member States concerned;

Whereas the economical effectiveness of the fishery for horse mackerel in zones VIIIc and IX may be improved by the landing of small horse mackerel within limits compatible with the sustainability of the resource.

HAS ADOPTED THIS REGULATION:

⁴ O.J. L 199, 24.08.95, p.1

Article 1

This Regulation fixes for 1996, for certain fish stocks and groups of fish stocks, total allowable catches (TACs) per stock or group of stocks, the share of these catches available to the Community, the allocation of that share among Member States and the specific conditions under which these stocks may be fished⁵.

For the purposes of this Regulation, the Skagerrak is bounded on the west by a line drawn from the Hanstholm lighthouse to the Lindesnes lighthouse and on the south by a line drawn from the Skagen lighthouse to the Tislarna lighthouse and from this point to the nearest point on the Swedish coast.

For the purposes of this Regulation, the Kattegat is bounded on the north by a line drawn from the Skagen lighthouse to the Tislarna lighthouse and from this point to the nearest point on the Swedish coast and on the south by a line drawn from Hasenøre to Gnibens Spids, from Korshage to Spodsbjerg and from Gilbjerg Hoved to Kullen.

For the purposes of this Regulation, the North Sea shall comprise ICES Sub-area IV and that part of ICES division IIIa which is not covered by the definition of the Skagerrak given in this article.

Article 2

TACs for stocks or groups of stocks to which Community rules apply and the share of these catches available to the Community are hereby fixed for 1996 as set out in Annex I

⁵ The definition of the ICES and CECAF areas referred to in this Regulation is given in Commission Communications 85/C 347/05 (O.J. No. C 347, 31.12.1985, p. 14) and 85/C 335/02 (O.J. No. C 335, 24.12.1985, p. 2) respectively.

Article 3

The allocation among the Member States of the share available to the Community of the TACs mentioned in Article 2 is fixed for 1996, in the form of fish quotas, in Annex I.

This allocation shall be without prejudice to exchanges made pursuant to Article 9 (1) of Regulation (EEC) No. 3760/92 and re-allocations made pursuant to Articles 21(4), 23(1) and 32(2) of Regulation (EEC) No. 2847/93⁶.

Article 4

As regards the herring stock of the North Sea and of the eastern English Channel, transfers of up to 50 % of the quotas may be effected from ICES divisions IV c and VII d to ICES division IV b.

As regards the hake stock in zones IIa (EC zone) and IV (EC zone), Member States having a quota in this zone may, on exhaustion of this quota, make transfers from zones Vb (EC zone), VI, VII, XII and XIV and from zones VIIIa, b and d to zone IIa (EC zone) and IV (EC zone).

However, such transfers must be notified in advance to the Commission.

Article 5

1. It shall be prohibited to retain on board or to land catches from stocks for which TACs or quotas are fixed unless:
 - (i) the catches have been taken by vessels of a Member State having a quota and that quota is not exhausted; or

⁶ O.J. No. L 261, 20.10.1993, p. 1

- (ii) the share of the TAC available to the Community (Community share) has not been allocated by quota among Member States and the Community share has not been exhausted; or
- (iii) for all species other than herring and mackerel, they are mixed with other species and have been taken with nets whose mesh size is 32 millimetres or less in Regions 1 and 2 or 40 millimetres or less in Region 3 in accordance with Article 2 paragraph 1 of Regulation (EEC) No. 3094/86⁷, and are not sorted either on board or on landing; or
- (iv) for herring, they are within the limits of paragraph 2; or
- (v) for mackerel, they are mixed with horse-mackerel or pilchard and the mackerel does not exceed 10% of the total weight of mackerel, horse-mackerel and pilchard on board and the catches are not sorted, or
- (vi) they are caught during the course of scientific investigations carried out under Regulation (EEC) No. 3094/86.

All landings shall count against the quota, or, if the Community share has not been allocated between Member States by quotas, against the Community share, except for catches made under the provisions of (iii), (iv), (v) and (vi).

2. When fishing with nets whose mesh size is less than 32 millimetres in Regions 1 and 2 other than the Skagerrak and the Kattegat and with nets whose mesh size is less than 40 millimetres in Region 3, it shall be prohibited to retain on board catches of herring mixed with other species unless such catches are not sorted and unless the herring, if mixed with sprat only, does not exceed 10% by weight of the total weight of herring and sprat combined.

When fishing with nets whose mesh size is less than 32 millimetres in Regions 1 and 2 and with nets whose mesh size is less than 40 millimetres in Region 3, it shall be prohibited to retain on board catches of herring mixed with other species unless such catches are not sorted and unless the herring, if mixed with other species whether or not

⁷ OJ. N° L288, 11.10.1986, p.1

including sprat, does not exceed 5% by weight of the total weight of the herring and other species combined.

3. The determination of the percentage of by-caiches and their disposal shall be made in accordance with Article 2 of Regulation (EEC) No. 3094/86.

Article 6

Blue whiting, anchovy and horse mackerel shall be considered to be species other than demersal.

Article 7

By way of derogation from Regulation (EEC) No 2115/77⁸, directed fishing and landing of herring for purposes other than human consumption can be conducted, until 31 December 1996, by vessels flying the flag of Sweden or Finland and, in the Baltic Sea, on a pilot basis, by vessels flying the flag of other Member State, within the rules provided in Regulation (EEC) No 1866/86.

Article 8

By way of derogation from the second sub-paragraph of paragraph a) of Article 9(3) of Regulation (EEC) No. 3094/86, the period of enlargement of the area in which beam trawling is banned shall be from 1 January to 31 December 1996.

⁸ OJ. No L247, 28.09.1977, p. 2

Article 9

By way of derogation from Article 5 of Council Regulation No 1866/86 of 12 June 1986⁹, the area in which fishing for flatfish is permitted with mesh sizes equal to or greater than 90 mm is extended to the whole of sub-divisions 22 and 24.

Article 10

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Communities.

It shall apply with effect from 1 January 1996.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 1995

For the Council
The President

⁹ O.J. No L162, 18.06.86. p. 1

ANNEX

TACs by stock and by area for 1996 and the allocation among the Member States of the share available to the Community (in tonnes live weight, except where otherwise specified). All catch limitations set out in this annex are considered as quotas for the purposes of Article 5 of this Regulation, and shall, therefore, be submitted to the rules set out by Council Regulation (EC) No 2847/93, in particular by Articles 14 and 15 thereto.
