I. EIC ACTIVITIES

FR-275 Poitou-Charentes

The Poitou-Charentes Regional Council, with the assistance of the Euro Info Centre, organized on 13 February an information day at the palais des Congrès of the Futuroscope in Poitiers. The theme of the event was the European Union's contribution through the Structural Funds (Objectives 2, 5b, 3 and 4) to regional development in Poitou-Charentes for the period 1994-1999. The day was organized around training workshops and representative stands of the European Union, the Atlantic Arc and the Poitou-Charentes Region.

ES-225 Saragossa

The European newsletter published each month by the EIC in Saragossa may now be consulted by Minitel or using a PC equipped for this purpose with an integrated modem. Through an agreement signed with the Spanish telecommunications company, ANATEL, business heads interested in any of the many different sectors covered in this newsletter (court decisions, trade cooperation, technological cooperation, legislation, competitions, etc...) may call the number of the EIC in Aragon. The aim of this initiative is to facilitate the access of SMEs to Community information).

DE-133 Leipzig

A SPRINT event organized by the Leipzig Euro Info Centre was held in the course of the Innovation Trade Fair in Leipzig/Germany from 2 to 3 march. Ten Saxon cooperation-seeking enterprises showed and explained their new products and technologies to the participating consultants from France, Greece, Italy and Germany. The firms were interested in common R&D projects, technology transfer, joint ventures, services, license and distribution agreements. They belong to the following sectors : energy, transport, chemical industry, environmental and mechanical engineering. Besides, several new company profiles were introduced by the French colleague.

II. EU NEWS

1. OVERVIEW OF SOME OF THE ACTIVITIES UNDERTAKEN BY THE EU IN 1994 IN FAVOUR OF SMES

a). Improving the administrative and legal environment for enterprises:

i). Assessment of the impact of Community legislation: Over 30 legislative proposals on the Commission's work programme for 1994 were the subject of an assessment form to establish the consequences for enterprises. In addition, the Commission has continued working on improving the assessment form system in response to the provisions of the Treaty on European Union.

ii). European Economic Interest Grouping Network- REGIE: This initiative by the Commission aims to encourage exchanges of experience and a better use of EEIGs by enterprises. The Commission is currently gathering the requisite information to create an updated database to illustrate the situation with regard to EEIG creation.

iii). Payment periods in commercial transactions: On 30 November 1994, the European Commission adopted a Recommendation on payment periods in commercial transactions (COM (94) 221 final). The recommendation has two principle aims: firstly, to combat late payments by providing for a legal framework which will serve as a sufficient deterrent to bad payers and hence ensure that contractual payment periods are adhered to; and secondly, to ensure that reasonable payment periods are maintained in transactions where the contracting parties are not on an equal footing (in particular public procurement contracts).

iv). Improving the fiscal environment of SMEs: In its communication of 25 May 1994 (COM (94) 206 final), on improving the fiscal environment of SMEs, the Commission identified three priority problems which affected SMEs and which had fiscal implications. It indicated guidelines in several areas with

regard to: improving the fiscal treatment of self-financing for businesses not set up as incorporated enterprises; eliminating fiscal barriers to the use of venture capital funds; reducing the problems arising with regard to the transfers of enterprises by limiting the tax burden and, in international cases, by ensuring that there is no double taxation.

v). Transfer of enterprises: In the Recommendation addressed to the Member States on 7 December 1994, the Member States were asked to introduce measures aimed at: increasing owners' awareness of the problems involved in transfers and encouraging them to prepare for this operation while still alive; creating a fiscal environment suited to successful transfers; enabling businessmen to prepare for transfers by offering them suitable instruments; providing for successful transfers within families by ensuring that inheritance and gift taxes do not jeopardise the survival of the enterprise.

vi). Regular consultation with organisations representing SMEs: Monthly meetings with professional organisations representing the specific interests of SMEs, the craft sector, the distributive trades and the social economy has made it possible to take into account the opinions of these groups in the Commission's activities.

B. European Observatory for SMEs

With a view to encouraging improved monitoring of the economic development of enterprises against the background of the effective implementation of the Internal Market, the European Observatory for SMEs submitted to the Commission a second independent report on the situation and prospects for small and medium sized enterprises in the European Union. To stimulate the debate and to spread information on subjects relating to small and medium-sized enterprises, the Commission decided to make public its own comments on the Observatory's report (COM (94) 352 final) and to forward it of the Council, the European Parliament and the Economic and Social Committee.

2. EUROPEAN COMMISSION PRESS RELEASE: IP/95/141 DOCUMENT DATE: FEBRUARY 15, 1995 COMPETITIVENESS ADVISORY GROUP

The Commission agreed today with President Santer's proposal to invite 13 distinguished high level experts on European competitiveness to participate in the new Competitiveness Advisory Group. Welcoming the Commission's agreement, President Santer said "...The Commission will be expecting to obtain clear, unambiguous political advice from this Group on the major policy priorities that must be carried out in order to improve the European Union's competitiveness. This is not an easy task," continued the President, "but I am sure the Commission and the Heads of State and Prime Ministers of the 15 will be looking to the Group to identify perhaps 3 or 4 key issues to improve our competitiveness, and not a voluminous shopping list. We must concentrate on the essentials, and quickly...". President Santer then said that "...I very much hope that all of these outstanding individuals will be able to participate in this important new advisory group which I have deliberately ensured is as independent as possible from the work of the institutions of the European Union...". The President indicated that he is expecting a first report from the Group in time for the Cannes European Council in June.

BACKGROUND

At the European Council in Essen in December last year, the European Council welcomed the Commission's intention of setting up a high level group to deal with the competitiveness of the European economy. The Commission decided today to constitute this group on the basis of President Santer's proposal and has selected the people it will invite to be its first members. The role of the group is to make an independent report every 6 months to the President of the Commission, the Prime Ministers and Heads of State of the 15, prior to each European Council, on the state of the European Union's competitiveness and to

advise on appropriate political priorities and policy changes to enhance European competitiveness. The Competitiveness Advisory Group will be independent of the Commission and its members have been selected on the basis of their outstanding experience and expertise. Each member will be requested to act on a personal basis and not as representatives of companies, trade unions or other organizations. The Commission will indicate to the Competitiveness Advisory Group the general questions it would like to see addressed without prejudice to the Group's own decisions, and will also suggest that the Group adopts an integrated, multi policy, multi-sectoral approach to competitiveness linked to the White Paper process. The following will be invited to participate in the Group :

C.A. Ciampi, former PM Italy, former Governor of the Bank of Italy as Chairman.

Prof. F. Maljers, former Chairman Unilever, Chairman Philips Supervisory Board as Vice-Chairman.

P. Barnevik, President and CEO of ABB.

D. Simon, Chairman BP.

J. Gandois, President CNPF, former Chairman Pechiney, Cockerill-Sambre.

C. Solchaga, former Minister of Finance.

P. Cassels, General Secretary of the Irish Congress of Trade Unions.

Prof. Maria J. Rodrigues, Instituto Superior de Ciencias do Trabalho e da Empresa, Lisboa.

J. Ollila, President Nokia Telecom.

Birgit Breuel, former President Treuhand.

G. Sapountzoglou, President Ionian Investments, former member Conseil d'Administration EIB.

W. Peirens, President ACV, Membre du Comite de Direction de la CES.

K. Zwickel, President IG Metall.

Commission Permanent Representative :
Professor Alexis Jacquemin, Conseiller Principal.

3. **EUROPEAN COMMISSION PRESS
RELEASE: IP/95/153
DOCUMENT DATE: FEBRUARY 21,
1995
COUNCIL ADOPTS COMMON**

POSITION ON PROTECTION OF PERSONAL DATA DIRECTIVE

A Common Position on a Directive on the protection of personal data was formally adopted today by the Council of Ministers. The proposal was put forward by the Commission on 18 July 1990 and amended in 1992, following the opinion of the European Parliament. "This decision represents welcome progress towards making the Community a reality for citizens, by ensuring a high level of protection for the privacy of individuals in all Member States" commented Single Market Commissioner Mario Monti. "The Directive will also bring major advantages for business, particularly as it constitutes an essential element for the free flow of services in the Information Society by fostering consumer confidence. And besides the development of these new markets, business competitiveness stands to gain considerably from the efficiency gains made possible by the application of these services" he added. Once adopted, the Directive will establish a clear and stable regulatory framework necessary to guarantee free movement of personal data, while leaving individual EU countries room for manoeuvre in the way the Directive is implemented. Free movement of data is particularly important for all services with a large customer base and depending on processing personal data, such as distance selling and financial services. In practice, banks and insurance companies process large quantities of personal data inter alia on such highly sensitive issues as credit ratings and credit-worthiness. If each Member State had its own set of rules on data protection, for example on how data subjects could verify the information held on them, cross-border provision of services, notably over the information superhighways, would be virtually impossible and this extremely valuable new market opportunity would be lost. Political agreement on the proposal was reached at the 8 December Internal Market Council after nearly five years of negotiations. Formal adoption of the Common Position in advance of the G7 summit on the Information Society gives

a signal to the EU's trading partners, such as Canada, Japan and the United States, of the importance the EU gives to the protection of the individuals' rights in the application of new technological developments. The legislative text aims to narrow divergences between national data protection laws to the extent necessary to remove obstacles to the free movement of personal data within the EU. As a result, any person whose data are processed in the Community will be afforded an equivalent level of protection of his rights, in particular his right to privacy, irrespective of the Member State where the processing is carried out. Until now, differences between national data protection laws have resulted in obstacles to transfers of personal data between Member States, even when these States have ratified the 1981 Council of Europe Convention on personal data protection. This has been a particular problem, for example, for multinational companies wishing to transfer data concerning their employees between their operations in different Member States. Such obstacles to data transfers could seriously impede the future growth of Information Society services. As the Bangemann Group report to the Corfu European Council remarked: "Without the legal security of a Union-wide approach, lack of consumer confidence will certainly undermine the rapid development of the Information Society". As a result, the Corfu European Council called for the rapid adoption of the data protection Directive. To prevent abuses of personal data and ensure that data subjects are informed of the existence of processing operations, the Directive will lay down common rules, to be observed by those who collect, hold or transmit personal data as part of their economic or administrative activities or in the course of the activities of their association. In particular, there will be an obligation to collect data only for specified, explicit and legitimate purposes, and to be held only if it is relevant, accurate and up-to-date. The Directive will also establish the principle of fairness, so that collection of data should be as transparent as possible, giving individuals the option of whether they provide the information or not. Moreover, individuals will be entitled to be informed at least about the identity of the organisation intending to

process data about them and the main purposes of such processing. That said, the Directive will apply different rules according to whether information can be easily provided in the normal course of business activities or whether the data has been collected by third parties. In the latter case, there will be an exemption where the obligation to provide information is impossible or involves disproportionate effort. The Directive will require all data processing to have a proper legal basis. The six legal grounds defined in the Directive will be consent, contract, legal obligation, vital interest of the data subject or the balance between the legitimate interests of the people controlling the data and the people on whom data is held (i.e. data subjects). This balance will give Member States room for manoeuvre in their implementation and application of the Directive. Data subjects will be granted a number of important rights including the right of access to that data, the right to know where the data originated (if such information is available), the right to have inaccurate data rectified, a right of recourse in the event of unlawful processing and the right to withhold permission to use their data in certain circumstances (for example, individuals will have the right to opt-out free of charge from being sent direct marketing material, without providing any specific reason). In the case of sensitive data, such as an individual's ethnic or racial origin, political or religious beliefs, trade union membership or data concerning health or sexual life, the Directive will establish that it can only be processed with the explicit consent of the individual, except in specific cases such as where there is an important public interest (e.g. for medical or scientific research), where alternative safeguards will have to be established. As the flexibility of the Directive will mean that some differences between national data protection regimes persist, the Directive will lay down the principle that the law of the Member State where a data processor is established applies in cases where data is transferred between Member States. The Directive will also establish arrangements for monitoring by independent data supervisory authorities, where necessary acting in tandem with each other. For cases where data is

transferred to non-EU countries, the Directive will include provisions to prevent the EU rules from being circumvented. In the specific case of personal data used exclusively for journalistic, artistic or literary purposes, the Directive will require Member States to ensure appropriate exemptions and derogations exist which strike a balance between guaranteeing freedom of expression while protecting the individual's right to privacy. The Common Position will be sent by the Council to Parliament for a second reading and adoption under the co-decision procedure.

4. THE SCHENGEN AGREEMENT

Belgium will ensure that the seven countries which have signed up to the Schengen agreement end border controls by March 26, Belgian European Affairs Minister Robert Urbain said on Tuesday. Belgium will hold the presidency of the Schengen executive committee for the next six months. Urbain said the Schengen Information System would be up and running by that date, leaving France, Germany, Spain, Portugal and the Benelux countries no excuse for not scrapping border controls. Problems with the system, a computer link-up allowing states to pool information on stolen cars, arms dealers and other international criminals, have held up the practical application of the Schengen agreement which abolishes border checks between the seven countries and establishes a common visa policy. Belgium will do everything in its power during its presidency to prod Austria, Greece and Italy to join the group, he said. It would also tackle the problems created by Norway not joining the European Union. "It would be paradoxical and contradictory if because of Norway's non-entry (into the European Union), the border between it and Sweden were to become the external border of the EU," Urbain said. "It goes without saying that the presidency will be pursuing contacts with the UK and Ireland, above all relating to article 7A...since it is a difference of opinion over that article which is blocking the free movement of people in the Single Market," he said. Article 7a of the EU treaty provides for an internal market in which the free movement

of goods, persons, services and capital is guaranteed.

5. INFORMATION-ADVICE

The European Commission is expected to agree on Wednesday to set up two new groups to offer advice on policy toward the "information society", Commission officials said on Tuesday. One will be a Forum on the Information Society made up of 100 to 150 people representing groups such as users, trade unions, programme providers and hardware suppliers. The members -- half of whom will be named by the Commission, the other half by EU member states -- will hold a general assembly twice a year to debate a wide range of issues related to the growth of electronic communications, they said. The Commission will also appoint a high-level group of experts to address social issues related to the information society, officials said. They will issue reports on topics such as as job creation, work organisation, cohesion of Europe's regions and towns, education and health care. Members will be chosen by Social Affairs Commissioner Pdraig Flynn, in coordination with Commission President Jacques Santer, Industry Commissioner Martin Bangemann, Research Commissioner Edith Cresson and Regional Commissioner Monika Wulf-Mathies.

6. SINGLE-MARKET-EASTERN EUROPE

Eastern European countries --all keen on EU membership -- lack the basic institutions and infrastructure to take part in the single market, according of the European Commission. "In the countries of central and eastern Europe these institutional infrastructures are often lacking," an information note prepared by the directorates responsible for external relations and the internal market says. "There need to be regulatory or supervisory bodies, standards, testing and certification bodies without which the legislation itself will not be effective," it added. "...The taking over into domestic legislation of the texts of the Community

instruments would be an empty exercise if the organisational and institutional structures which must underpin the measures are absent," it said. The note was prepared to brief the Commission as a whole on plans for a white paper setting out how eastern Europe can adapt to the single market as a step towards eventual EU membership. Internal market ministers will next discuss eastern Europe's challenge when they meet informally in the French town of Bayonne on March 10-11. The Commission intends to give an oral presentation of the paper to the April 11 General Affairs Council before finalising the white paper in May in time for the June meetings of the General Affairs and Internal Market Councils. The paper will eventually be discussed at the Cannes European Council on June 26-27. The Commission says in the note it will propose a two-tier approach to adapting the eastern European countries to the single market. Under that approach the eastern European countries would first be adapted to basic EU laws which underpin other laws -- for example basic company law and financial reporting. The Commission will also carry out an examination of the countries' competition policies. Earlier this year Competition Commissioner Karel Van Miert said that the central and eastern European countries' backward competition rules were one of the biggest hurdles to their eventual membership. The paper will set out sector by sector the challenges facing the eastern European countries as regards both legislation and infrastructure.

7. ENLARGEMENT-ROMANIA

Romania will officially apply for full European Union membership by June, according to a senior official. Gheorghe Prisacaru, head of the government's European integration department, told a news conference that Romania would lodge an application to join the EU in June, after drafting an economic integration strategy. "By June, we plan to elaborate a new economic programme in keeping with the EU strategy outlined in Essen, Germany, so that we can officially apply to join the EU," Prisacaru said. Two years ago, Romania signed an association agreement which took effect this month,

providing for greater political and economic links with the EU -- the first step on the long road towards becoming a full EU member. "On our part, the membership bid is a political move aimed at assuring EU members over our readiness to start negotiations over Romania's full integration," Prisacaru said, adding: "We hope to join the EU as a full member by the year 2000." Bucharest has defined EU integration as a strategic option for the Balkan country. Last week President Ion Iliescu met leaders of parties represented in parliament to agree on a deadline for the EU membership bid. But Romania still has to clear major market-economy reform hurdles and seal a key treaty with neighbouring Hungary, which has been stalled over the status of its 1.6-million-strong ethnic Hungarian minority and over mutual recognition of borders.

III. QUESTIONS AND ANSWERS

QUESTION 1:

Could you tell us what a company has to do to register foodstuffs in the European register?

ANSWER 1:

The creation of a system based on Council Regulation 2082/92/EEC to favour the development of specific products, by registering the name of products in a Community register, enables producers of agri-food products to increase the visibility of their products among consumers throughout the European Union.

To be registered, a product must be specific within the meaning of the Regulation, that is to say that it must clearly be different from other products of the same category and it must have a traditional feature. This can either be in the form of traditional matter, traditional ingredients or a production and/or processing method of the traditional kind.

Community registration adds the name of a product to a recognized specifications sheet in which the specificity is defined. Inspections organized by Member States ensure consumer protection with a view to guaranteeing compliance with and consistency of the specific characteristics listed.

This system provides producers with a marketing tool that is offered to them in the form of a distinctive logo which allows them to differentiate their products from the others on the market. This logo may be placed on the label or on the packaging of the products or be included in advertising, thereby reinforcing the traditional specific nature.

The presence of the logo on a product is a real assurance for the consumer, since it is a "guaranteed traditional specialty".

We recommend that you consult the following Regulations:

-Basic Council Regulation 2082/92 of 14 July 1992 on certifications of specificity of agricultural products and foodstuffs (OJ L 208,

24.07.1992, p.9) which lays down the rules according to which a Community certificate of specificity can be obtained.

Article 7 of this Regulation deals with the procedure: the registration application is filed with the competent authority of the Member State in which the grouping is established. It is the competent authority which forwards the application to the Commission when it is of the view that the requirements have been fulfilled.

Our expert at DG VI (Agriculture) confirms that in Germany this application must be filed with the Ministry of Agriculture (person in charge of the matter: Mr Stofist; 49/228.58.43.05);

- Commission Regulation 1848/93 of 9 July 1993 laying down the detailed rules of application of Council Regulation 2082/92 relating to certificates of specificity of agricultural products and foodstuffs (OJ L 1168/1993);
- Commission Regulation 2515/94 which contains the graphic manual of the logo (OJ L 275/94).

QUESTION 2:

Could you please provide us with information on the application of the Machinery Directive to second-hand machinery ?

ANSWER 2:

Council Directive 89/392 only applies when machinery is first placed on the market or put into service in the Union; second-hand machinery imported from outside the Union must accordingly comply with the requirements of Directive 89/392/EEC.

Second-hand machinery which has already been used in the Union falls within the scope of Directive 89/655/EEC for trade purchasers and within that of Directive 92/59/EEC on general product safety for private purchasers.

Concerning machines in stock, we would like to refer you to our VANS message of 04.01.1995

on the implementation of the machinery Directive on 01.01.1995.

Directive 89/392 modified by Directive 91/368 took full effect as of 01.01.1995.

For machines in stock, an agreement has been concluded between the Commission and the Member States (a letter has been sent by the General Director of DG III to the Permanent Representatives) which states the following :

The Member States will permit the placing on the market and into service of machines without the CE marking for a certain period of time only if they comply with the two following conditions :

- be physically in stock at the distributors' and wholesalers' as of 01.01.1995 (the placing on the market must be effective);
- have a sufficient safety level regarding either the essential requirements of the Directive, or the existing national legislation of the given country on 31.12.1992.

This period of time can vary from one Member State to another and the Commission's services have proposed a period of one year.

Should you wish to receive more information on this aspect of the application of the Directive, we would suggest you contact your Permanent Representation.

QUESTION 3:

Could you please provide us with information on the MED-Campus and MED-Invest programmes ?

ANSWER 3:

I am attaching, for your information, a copy of the brochure describing the 4 MED Programmes - MED-Invest, MED-Campus, MED-Urbs and MED-Media. As you will see from the brochure, Technical Assistance Offices (TAOs) have been created in order to assure

the day to day running of these networks, and it is to these TAOs that queries should be addressed. The contact persons and addresses for the TAOs are listed in the annex to the brochure.

QUESTION 4:

Could you provide us with information on calculating the origin of a product which contains a component that is the subject of a temporary suspension of customs duties upon entry in the EC.

ANSWER 4:

1. In the first case mentioned in your fax, that is to say an electronic component from the United States which is installed in a computer in Ireland, calculating the origin of this computer is not affected if this component is the subject of a temporary suspension of customs duties upon entry in the EC. The origin is calculated according to the rules defining the origin of a product established by the EC (see OJ L 253 of 11.10.93).

2. In the case where the component is installed in a computer in Switzerland and then exported to the EC, the calculation of the origin of this product is not affected if the American component is the subject of a temporary suspension of customs duties upon entry into the EC. Its origin is established according to the Swiss rules concerning the origin of products.

3. Regarding the calculation of customs duties on a product which contains an electronic component which is the subject of a temporary suspension of customs duties, please note that the calculation of the customs duty on this product when it is imported into the EC does not take into account the fact that one of the product's components benefits from a suspension of customs duties. A product exempt of customs duties must be exported as such and may not benefit from the suspension of duties if it is part of another product.

QUESTION 5:

Could you provide us with information about

the scope of application of Directive 89/106 concerning construction products (OJ L 40/1989) ?

ANSWER 5:

Our expert at DG III (Industry) confirmed the following information to us:

1. The work that you describe to us in your fax is indeed considered to be a construction product within the meaning of the Directive, but we remind you that this Directive is at present an empty framework. The harmonized standards that will make this Directive operative have not yet been adopted. There are 1589 standards in preparation, the first series of which will be adopted in the course of 1995.

As a consequence, either national regulations or national standards still apply at present.

2. There is no list containing all the products subject to the Directive. This Directive only applies to products for which there exist harmonized standards. The references of these standards will be published in the OJ C. By consulting the OJ regularly, you will obtain the list of products which are the subject of the harmonized standards within the meaning of the Directive.

3. The interpretative documents of the Directive were published in Official Journal C 62 of 28 February 1994.

4. The list of products of less importance for health and safety has not been established. This will be done when the harmonized standards exist. As for the committee provided for by the Directive, it has been appointed and convenes regularly.

For additional information on this Directive, we recommend that you send your questions to the Information Officers of the EIC network who are in permanent contact with the experts at DG III responsible for this dossier.

The "New Approach Guide" whose first part you have already received will be completed, and the final version will be available by the

end of 1995.

Finally, there are already several fact sheets on the New Approach Directives. Two of these deal with the "Machines" Directive and the "Construction Products" Directive. They will be updated shortly.

There will be no general fact sheet on EC labelling, because the Commission's competent services are finalizing the "New Approach Guide" which will contain all this information.

IV. PUBLICATIONS OFFICE FOR PUBLICATIONS OF THE EUROPEAN COMMUNITY

1. "Provisions implementing the Community customs code/Disposition d'application du code des douanes communautaires". 1994. 232 p.

Compilation of provisions implementing the Community customs code, EEC regulation No 2454/93. The text is presented in a coordinated form and incorporates all the amendments made to the initial act. Situation as of 1 November 1994.

2. "Annuaire interinstitutionnel. Union européenne". 1994. 332 p.

As part of its transparency policy, this publication provides information on Community institutions and bodies, the names of officials, addresses, telephone, fax numbers, etc. This information comes from the IDEA database which will be open to the public shortly.

3. "Competition policy newsletter" CEC-DG IV (CEC-DGIV, Competition, Information Unit, rue de la Loi 200, Office C150, 0/170, 1040 Brussels Tel: 3202-2957620 Fax: 295 54 37)

Bilingual English-French periodical with information on competition policy in the form of speeches, press releases, Court of Justice reports, summaries, etc.

4. "Europe and Latin America: a partnership for action. Basic document on the relations of the European Union with Latin America and the Caribbean". CEC-DG I and Instituto de Relaciones Europeo-Latinoamericanas, IRELA. 1994. 26 p. (Pedro e Valdivia. 10, E - 28006 Madrid Tel: 34-1-561 72 00 Fax: 562 64 99)

Brochure that develops in 3 chapters the EU's policy with the Latin American countries: I. Basic document; II. Europe and Latin America. Cooperation for action; III. Statistics profile of economic relations between the EU, Latin America and the Caribbean. Available in English, Spanish and Portuguese.

MISCELLANEOUS

1. "Euro revue sur la recherche de la santé et la sécurité au travail" European Foundation for the Improvement of Living and Working Conditions (Loughlinstown House, Shankill, Co. Dublin, Ireland Tel: 353-1-282 68 88 Fax: 282 64 56.

Periodical available in English and French whose aim is to divulge the most recent discoveries on living and working conditions and to contribute to the establishment of action programmes to prevent work-related accidents and illnesses.

2. "PM193. Les comportements stratégiques des entreprises industrielles de taille moyenne, en France and en Allemagne, face aux espaces de concurrence européens et mondiaux" Ministry of Industry, Posts and Telecommunications and Foreign Trade. Commissariat Général du Plan. Ministry of Higher Education and Research. Ministry of Agriculture and Fisheries. 527 p. Summary report. 63 p. ISSN: 0767-5380 (Ministère de l'Industrie, des Postes et Télécommunications et du Commerce Extérieur: 20 avenue de Ségur - 75353 Paris 07 SP Tel: 33-1-45 64 44 44) FF 400.

This publication is based on the analysis of answers from 500 French business leaders and 500 German business leaders, providing a representative sample of medium-sized industrial enterprises in the two countries (from 100 to 2000 people). It attempts to understand the common factors of success and presents in a single context a coherent reading of the areas of convergence and existing differences.

3. "La nouvelle réglementation Européenne sur les emballages et déchets d'emballages", Club de Bruxelles. 226 p. (10 rue du Collège Saint Michel - 1150 Brussels Tel: 32-2-771 98 90 Fax: 770 66 71) 250 Ecu.

4. "Business guide to the 1995 budget of the European Union" Société Générale de développement S.A. (rue de Stassart 57, 1050 Brussels Fax: 32-2-512 46 53) BF 7 500.

Brussels Fax: 32-2-512 46 53) BF 7 500.

This guide, available in English and French, analyzes the budget of the European Union for 1995, with the reference number and the title of each budget heading as well as the name and address of the officials responsible for the different programmes.

5. Publications of the European Committee for Standardization, CEN (rue de Stassart, 36 - 1050 Brussels or from officials in your country):

"R & D Workshop" Documentation on the CEN R&D Workshop organized in Brussels on 9-10 March 1994. BF 1200.

"Setting Europe's New Standards". 1994. 6p. (1 free copy, plus BF 45)

"European Standardization"
CEN/CENELEC/ETSI

Brochure on CEN work, CENELEC and ETSI
(1 free copy, plus BF 45)

"CEN Newsletter" BF 2 665 (bimonthly)

V. CALLS FOR PROPOSALS OFFICIAL JOURNAL DEADLINES

This publication has been shortened in order to enable it to be sent to EICs in one single VANS electronic mail file. It now focuses purely on calls for tenders and proposals for EU programmes published by the Commission and Commission study and service contracts related to EU affairs. For information on other EC-related calls for tenders (e.g. supply contracts for the institutions of the European Union), please consult TED.

Please note that in so far as calls for proposals on research and development are concerned, this publication only contains the main deadlines. Many RTD calls for proposals also have continuously open measures for SMEs, accompanying measures, etc. please refer to the texts of these calls and the information packages published by the Commission for further details on this matter.
