SEE INSTRUCTIONS TO APPLICANTS OVERLEAF

INSTRUCTIONS

This form must be completed in accordance with the instructions given below and in the information package.

The general instructions are numbered from 1 to 14.

The specific instructions are preceded by a number in parentheses, which is quoted at the relevant place on the form.

GENERAL INSTRUCTIONS

When the form is sent to the Commission, by post, **you must include the name of the programme** in the address written on the envelope.

It is absolutely essential that any page or document sent later on be accompanied by a copy of the original cover page (Page 0).

Every proposal must be sent by the coordinator of the proposal, who is responsible for the internal administration of the proposal and for keeping in touch with the Services of the Commission.

The form is divided in two parts:

Page 0 (heading) and pages A and B:

General description to be completed by the coordinator of the proposed research.

Page C and D:

Information about individual participants, to be repeated for each participant, including the coordinator.

The coordinator must prepare a list giving the number assigned to each participant. This list must be given to each participant so he can complete the box 'Role' of page C and answer question D3 of page D.

The pages A, B, C and D shall be used for automatic optical reading.

The following points are therefore essential for accurate data processing.

1. Absolute cleanliness.
2. Use exclusively a typewriter with a black ribbon.
3. Set the typewriter to print 10 characters per inch (2,54 cm) and do not use proportional spacing.
4. Set the line spacing at 6 lines per inch (single spacing).
5. Take care to type only within the preprinted boxes, and well within their boundaries.
6. Do not write anything within the boxes reserved for the Commission's use.
7. Do not fold or staple the forms.
8. Use only original forms: no photocopies may be used. Extra forms may be obtained from the Commission's Services. You may, if necessary; use forms from an identical information set, for instance from one of your partners.
9. Do not correct typed information. Use a replacement original page. **Only in exceptional cases**, if you cannot obtain a replacement page in time and essential typed information needs to be corrected:
 - whiten out completely the errors using correcting type. Do not use Tipp-ex fluid or any other means of correction;

- retype the information correctly;
- do not redraw the boxes, lines or pre-printed text;
- do not glue anything onto the form.

10. Do not type anything in boxes for which you have no information. Leave them empty.

11. Use capital letters in all boxes. Only the section 'Short description of the proposal' (page B) may contain upper and lower case letters.

12. For single character boxes, type X in the appropriate box.

13. If you complete the form in Danish, please replace the special characters listed below by the corresponding double characters:

Ø	OE
ø	oe
Æ	AE
æ	ae
Å	AA
å	aa

14. For numbers (amount, durations, percentages, man/months), round to the nearest whole number. Do not use any character or even spaces to separate the digits in a single number.

O APPLICANTS

SPECIFIC INSTRUCTIONS

THE INFORMATION ON PAGES '0' AND 'A' WILL BE THE SAME AS IT WAS IN THE INITIAL PROPOSAL. ONLY THE BOX 'NUMBER OF PARTICIPANTS' WILL CHANGE. THE INFORMATION ON PAGES 'B', 'C' AND 'D' WILL CORRESPOND TO THE ADDITIONAL PROPOSAL.

(1) The categories of participants are:

- **The coordinator:**
He is the participant responsible for assembling the proposal and who must make sure that it is submitted in **one single batch**. If for any reason part of the application must be mailed separately, each part of the proposal must be accompanied by a copy of page 0 of the form in order to identify them.
- **The proposers:**
if the proposal is accepted, they will sign the contract with the Commission and will assume responsibility for cooperation and the commitment to undertake the proposed research.
- **The associated proposers:**
If the proposal is accepted, they will not sign the contract with the Commission. This is particularly suited to proposals involving a large number of participants making small contributions to the research.

(2) The address used for letters and envelopes which will be sent to you, will be generated automatically, using in the correct order the information contained in the following boxes:

Denomination

Street or post box, Number (street or PB)

Postal code Town Cedex

Country (Name)

Type the information in such a way that the address made up in this way is correct, taking care not to cut word when you come to the end of a line of the box 'Full legal name'.

If the name of the Legal Organization must appear under the name of the Laboratory in the address used for the mail, mark with an X the box 'For mail, insert of the name of the Organization (legal entity: see next page)'. Do not, therefore recopy the name of the Organization in the box 'Full legal name' provided for the Laboratory.

(3) The LOGO is

- a normal abbreviation;
- otherwise a code built up by taking the first letter of each significant word according to the order in which these words appear in the zone 'Full legal name'.

For participants involved in several proposals, this LOGO must remain the same, across all calls for proposals.

(4) Do not include the country code letter before the postal code.

(5) The CEDEX should be completed only in the case of addresses in France and Portugal.

(6) Use the following country codes:

Belgium	BE	Italy	IT
Denmark	DK	Luxembourg	LU
France	FR	Netherlands	NL
Germany	DE	Portugal	PT
Greece	GR	Spain	ES
Ireland	IE	United Kingdom	GB

Albania	AL	Lithuania	LT
Bulgaria	BG	Poland	PL
Czech Republic	CZ	Romania	RO
Estonia	EE	Slovak Republic	SK
Hungary	HU	Slovenia	SI
Latvia	LV		

Armenia	AM	Moldova	MD
Azerbaijan	AZ	Russia	RU
Belarus	BY	Tajikistan	TJ
Georgia	GE	Turkmenistan	TM
Kazakhstan	KZ	Ukraine	UA
Kyrgyzstan	KG	Uzbekistan	UZ

For other countries, use the code: **OT**.

(7) When filling the boxes for phone or telefax numbers:

- Type only your main number.
- Type each number in the following way:
Country code Town code Local number
Examples:
33130472281 for a number in Paris
3222362079 for a number in Brussels
44714051179 for a number in central London.

(8) In the box of profile types, write one of the following codes:

- **SME** Industry: small/medium size organizations
- **BIG** Industry: large ventures (over 500 employers)
- **EDU** University, higher education
- **RPR** Private research organization
- **RPU** Public research organization
- **RMX** Mixed research organization (private and public)
- **INO** International organization
- **OTH** Other.

(9) Basis of cost calculation: See Information Package.

(10) An Organization A is 'affiliated' to an Organization B, if

- A controls B, directly or indirectly, or
 - A and B are controlled by the same (parent) organisation, or
 - A is controlled directly or indirectly by B.
- A company A is considered as controlling a company B, if
- A holds directly or indirectly more than 50 % of the capital of B, or
 - A holds directly or indirectly more than 50 % of the voting rights of the shareholders or of the associates of B, or
 - A holds in fact; directly or indirectly, the decisional power within company B.

COMMISSION OF THE EUROPEAN COMMUNITIES

Cooperation in Science and Technology, with Central and Eastern European countries
and with New Independent States of the former Soviet Union

(PECO)

1994

***Participation in five specific Community
programmes of research and
technological development***

INFORMATION PACKAGE

2. HOW TO SUBMIT PROPOSALS	4
3. GUIDELINES FOR PREPARING PROPOSALS	6
4. SELECTION OF PROPOSALS	7
5. CONTRACTS: PROCEDURES AND PRINCIPLES	8

GENERAL INFORMATION

The European Community has opened a number of its Research and Technological Development programmes to research organisations and enterprises in Central and Eastern Europe and in the new independent states of the former Soviet Union. These programmes are: "Environment", "Non Nuclear Energy", "Nuclear Fission Safety", "Biomedical and Health Research" and "Human Capital and Mobility".

In 1994 the Commission of the European Community will provide funding so that organisations in Central and Eastern Europe and in the new independent states of the former Soviet Union can participate in projects supported by these programmes.

At present the eligible countries are: Albania, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia and Slovenia, and for the first time, Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Since the objective of this form of cooperation is to enable scientists and researchers from Central and Eastern Europe and from the new independent states of the former Soviet Union to collaborate with partners from the Community in existing projects, they are invited to get in touch with the Coordinators of these projects. It will not be possible to set up independent projects.

In order to help interested scientist and researchers to make these contacts and to develop joint proposals the list of the projects which are open is given in annex.

HOW TO SUBMIT PROPOSALS

1. Proposals can only refer to participation in the specific projects listed in annex and have to be submitted by the relevant project coordinator.
2. Proposals must be presented using the appropriate forms, countersigned by each Central or East European participant or from the new independent states of the former Soviet Union. (In order to avoid mailing delays the signatures can appear on separate copies of the form, provided they are included in the same package.)

Proposals may be submitted in any official language of the European Community. However, it would be welcome to supply a summary in English.

3. One original proposal and five copies must be transmitted to the Commission in one package.

It is the responsibility of the project coordinator that proposals are delivered to the Commission in Brussels by 17.00 hours at the latest on June 6, 1994 at the following address:

Commission of the European Communities
PECO 1994
75, rue Montoyer
B-1040 Brussels

Please do not send proposals by telex, telefax or electronic mail, not even to announce that a proposal is in the mail. We will not acknowledge telexes, telefaxes or electronic mail.

The Commission reserves the right not to evaluate proposals received after the closing deadline.

Inside the package, a second envelope should contain the proposal which will be marked as follows:

Confidential
Proposal for S&T cooperation PECO 1994
Participation in project number:
of programme

4. When a proposal is received, the Commission will acknowledge receipt by means of the corresponding form, to be completed and attached to the dossier by the author of the proposal.

The Commission will treat the proposals as confidential.

G

UIDELINES FOR PREPARING PROPOSALS

A description of the intended contribution should be attached to the form. It should be structured as follows, with words in bold taken as headings:

1. **Description** (maximum four pages) of the proposed contribution including: the scientific or technical context; the state of the art; timing and milestones of the proposed activity and the existing proprietary results.
2. **Objectives**, outline of the proposal and the contribution to the objectives of the programme.
3. Scientific **qualification** of the proposers.
4. Indication of **funding needs**, and description of existing research capacity.
5. Expected **achievements** and the policy to disseminate and exploit results.

The duration of the additional project cannot exceed the duration of the original contract.

Based on past experience and solely as a guide, the share of Community funding of the total additional cost of the additional project typically lies in the range 10.000 to 200.000 ECU.

S ***ELECTION OF PROPOSALS***

The Commission will establish a selection procedure following an evaluation based on the quality of the proposals and on the common interest.

Account will be taken of, inter alia, the conformity of the proposals with the objectives of the original project, quality of cooperation activities, their scientific and technical excellence, the feasibility and the potential for exploitation of results.

Proposals must contain additional contributions which extend the scope of the original project and not a mere re-distribution of tasks among the participants.

The successful applicants may be invited to supply at a later stage additional administrative and financial details with a view to negotiating the contracts. Some changes may be sought for, including amendments to the scientific and technical content of the proposal, according to the recommendations resulting from the above evaluation.

C

ONTRACTS :

PROCEDURES AND PRINCIPLES

GENERAL PROCEDURES

1. Form of contract

Successful proposers shall be given the opportunity to be added to a Community standard contract for science and technological development.

The Commission shall prepare a contract supplementary to the initial one setting out the conditions of Community support for projects selected.

The main principles of this contract and the general conditions are outlined in the following pages.

The standard contract forms a flexible mechanism for participating in projects. However, participants may conclude cooperation agreements amongst themselves to complement the conditions of the standard contract (but in doing so, they must respect competition rules under the EEC Treaty and the principles concerning the ownership, exploitation and dissemination of results).

2. The role of project coordinator

All projects have a "project coordinator" who is responsible for the management of the project. The coordinator's responsibilities also include administrative responsibilities, such as general liaison with the Commission, the submission of all documents -including technical reports giving an overview of the project- and the distribution of the financial support paid by the Commission.

3. Two types of contractor

Participants who carry out the work and contribute to the costs may be:

- contractors, in which case they will sign the contract with the Commission and assume joint and several liability for completing the work envisaged

or

- associated contractors, in which case they will not sign a contract with the Commission. The coordinator of the ongoing contract will sign the supplementary contract. This is particularly appropriate for projects involving a large number of participants or for organisations making small contributions to the project.

Contractors should grant fair and reasonable rights to the associated contractors for their contribution to the project. Contractors should conclude appropriate arrangements with the associated contractors; these arrangements can be a simple exchange of letters or a more formal written agreement, but they must conform with principles specified in the standard contract and be submitted to the Commission for approval.

Participants who will be fully reimbursed by the coordinator for their work will be treated as subcontractors.

4. Affiliated companies

Affiliated companies of a contractor (whether controlling, controlled by, or under the same control as, the contractor) are only entitled to have access to the results generated by the project in circumstances specified in the model contract. They must comply with the framework for the exploitation of results, and the criteria defining affiliated companies.

Arrangements involving associated contracts and subcontracts between affiliated companies do not generally require the approval of the Commission (although such arrangements must be notified).

STANDARD CONTRACT: MAIN PRINCIPLES AND SPECIFIC CONDITIONS

1. Procedures

- Two copies of the (supplementary) contract will be sent to the coordinator and contractors for signature; the Commission will only sign after the return of the signed documents.

- Only one language version of the (supplementary) contract will be prepared for signature - the language and applicable law will usually be that of the project coordinator.
- The operative commencement date of the activity covered by the (supplementary) contract will normally be the first day of the month following the signature of the (supplementary) contract by the Commission.

2. Payments

- All payments will be made in ECU through the project coordinator.
- A first payment will only be made after the signature of the (supplementary) contract by the Commission.
- Further periodic payments, normally at 12 monthly intervals, will depend on the submission and approval of progress reports, and appropriate cost claims. For smaller projects, the Community support will be reimbursed in accordance with a payment profile setting out fixed percentage instalments; for larger projects, cost statements setting out some specified details of actual costs incurred are required.
- A retention (normally 10 % of the Community contribution or 500,000 ECU, whichever is the lower) is withheld until all the final documents (technical and financial) for the project as a whole have been received and approved by the Commission. For larger projects where cost statements are required, a consolidated cost statement must be submitted within three months of the end of the project.

3. Costs

- The allowable costs to which the Community support will be given are the full costs of the project (the Community contribution will not normally exceed 50 %), or up to 100 % of the additional (marginal) costs (i.e. not paid from any other income) for universities, and similar institutions, whose primary functions are not related to research activities.

- Allowable costs may include:
 - labour (for those using additional (marginal) costs, only additional research staff, not permanent teaching staff)
 - capital equipment
 - other direct running costs (travel, consumable materials, computing, external assistance, etc., including the cost of subscription to relevant scientific periodicals for participants in Central and Eastern Europe or in the new independent states of the former Soviet Union.)
 - indirect overhead costs (necessary to support the research activities - for those using additional (marginal) costs, a maximum of 20 % of costs excluding associated contracts and VAT).
- No profit may be included in any costs charged to the Commission. Costs should also exclude interest or return on capital employed; notional or opportunity costs or reevaluations (use historic costs); distribution, marketing and advertising costs for products and activities; and patent protection costs.
- VAT and customs duties paid in connection with the project should be reclaimed from national authorities. Those organisations unable to reclaim the VAT may include the costs separately in cost statements. However, no VAT should be included in proposals in the estimated costs.

4. Reports

- The project coordinator must provide technical progress reports giving an overview on the project to assist the Commission to monitor the work and results; individual contributions by other contractors to be appended to these global reports must be submitted through the project coordinator.
- During the project these reports must be submitted normally at 6 or 12 monthly intervals.
- At the end of the project, a final report covering all the work, objectives achieved and conclusions, together with a confidential report on the intentions and potential for protecting and exploiting results, must be submitted.

- All reports will be treated as confidential, but reports suitable for publication, excluding any commercially sensitive information, must be provided with the 12 monthly and final reports. These are intended to inform the industrial and scientific community of the progress of Community funded research to avoid unnecessary duplication of effort and to enable contact to be established directly with the participants concerning exploitation arrangements or additional research, inside or outside the framework of the Community funding.

5. Ownership and exploitation of results

- All intellectual property rights generated under the research project will be owned by the relevant contractors who must:
 - exploit or commercialise them in conformity with the contract (this includes the need to grant licences on commercial conditions to other organisations established in the Community where the necessary exploitation or commercialisation cannot be undertaken or arranged by the participants themselves - results cannot be locked away)
 - freely grant licences and user rights amongst themselves for carrying out the research project, and any subsequent exploitation and commercialisation. Non commercial organisations may be paid royalties in certain circumstances, but any final negotiations must not hinder or prejudice such exploitation or commercialisation
 - grant licences and user rights to others needing access to the results in specified circumstances. In limited circumstances, and against payment, background results developed without Community support must also be made available to facilitate the use of the foreground results.
- Participants must inform the Commission in the proposal of any interests which could affect their obligations concerning the exploitation and dissemination of results.
- In certain circumstances, the Commission may protect the foreground results where the contractors do not wish to take out patents, etc. Researchers, particularly those in non commercial organisations are advised to consult experts in their organisations or their partners on the commercial potential of results before unrestricted disclosure of information which could subsequently prejudice patent applications.

UK- LONDON W2 1PG
Tel : 44-71-723 12 52 Fax : 44-71-706 32 72

GENE-CT930076

A transgenic rat model for Alzheimer's Disease

Prof. Dr. D. Ganten
Max-Delbrück-Centrum für Molekulare Medizin (MDC)
Robert-Rössle Strasse 10
D-13125 BERLIN-BUCH
Tel : 49-30-94 06 32 78 Fax : 49-30-94 97 008

GENE-CT930067

A new method for the construction of a high resolution map of the whole human genome

Prof. P. Goodfellow
University of Cambridge
Department of Genetics
Downing Street
UK- CAMBRIDGE CB2 3EH
Tel : 44-223 33 39 99 Fax : 44-223 33 39 92

GENE-CT930081

The significance of allelic variation for the phenotypic diversity of phenylketonuria examined by application of a new and fast mutation detection assay and by the development of a European data base

Dr. F. Güttler
Department of Inherited Metabolic Disorders and Molecular Genetics
The J.F. Kennedy Institute
DK-2600 GLOSTRUP
Tel : 45-43 96 86 12 Fax : 45-43 43 11 30

GENE-CT930082

Mass spectrometry of polynucleotides by matrix-assisted laser desorption/ionisation (maldi-ms)

Prof. Dr. F. Hillenkamp

Institut für Medizinische Physik und Biophysik
Universität Münster
Robert-Koch Strasse 31
D-48149 MÜNSTER
Tel : 49-251-83 51 03 Fax : 49-251-83 51 21

GENE-CT930066
