

STATEMENT OF THE SPOKESMAN OF THE EEC COMMISSION, Brussels, September 16, 1965

During its weekly meeting yesterday, the EEC Commission examined all aspects of the present situation of the Community. The Commission discussed and adopted its working schedule for the coming months, particularly for the agricultural sector.

In the accomplishment of the duties assigned to it by the Treaty of Rome, the Commission will make to the Council those proposals that it considers useful. Where a working schedule has been set, the time limits agreed upon will be observed.

The Commission does not underestimate the risks, resulting from the present situation, of a delay in completing various programs, especially those of an urgent nature. It has decided to do all within its power to ensure that the work for which it is responsible progresses normally, in such a manner that when the time comes the institution responsible for decisions can take them.
