NEW COMMON MARKET PUBLICATION

WASHINGTON, August 18 -- The European Community has begun publication of a new series of periodicals devoted to a statistical analysis, by products, of international trade of the six Community countries. The first volume under the title Tableaux Analytiques is now available for distribution in the official French and German versions only.

Each volume will contain two sections, one devoted to imports and the other to exports. Tables are broken down to show trade activity of each of the six member countries individually and of the Community as a whole, both within the Community boundaries and with third countries.

The first volume includes statistics for 1958. The second volume, scheduled for publication in September, will cover 1959, and the third volume, to appear in November, will carry statistics for the first quarter of 1960. Subsequently, Tableaux Analytiques will be published quarterly.

Data provided by these tables are more detailed than any previously available. Each table includes information on unit value, quantity, and total value.

Tableaux Analytiques is available at \$4.00 per copy from the European Community Information Service, 236 Southern Building, Washington 5, D. C.
