EUROPEAN REGIONAL DEVELOPMENT FUND - COMMISSION APPROVES SECOND 1975
ALLOCATION OF GRANTS OF 139 MILLION u.a. (£ 58 MILLION)
UK RECEIVES 64.9 MILLION u.a. (£27 MILLION)

The Commission today announced its decision on the second and final 1975 allocation of grants from the European Regional Development Fund. It has decided to commit a further 139.3 mua (£ 58 million) in respect of 528 investment projects representing a total investment of 1,172.0 mua (£ 488 million). The United Kingdom government's share of the money allocated from the fund in this second allocation amounts to 69.4 mua (£27 million), in respect of 298 projects, whose total investment cost amounts to 1536 mua (£640 million).

Including the first allocation, made in October, the Commission has therefore now committed the whole of the 300mua (£125 million) available during 1975 in order to aid 1,183 projects whose total investment cost amounts to 2.426 mua (£ 1011 million). The UK government's total 1975 share amounts to 86.2 mua (£36.8 million) in respect of 534 projects, whose total investment cost amounts to 1706 mua (£ 711 million).

Of this second allocation, 79.4 mua (£33 million) go for infrastructure projects, including 4.2 mua (£1.75 million) for 11 rural infrastructure projects in less-favoured agricultural areas. In the industrial, handicraft and service sectors grants total 59.8 mua (£25 million) for 238 separate projects.

The attached tables give a national and regional breakdown of the aids granted. It is stressed however that the Fund is still in its very early days and it would be premature to try to make any final judgement of the impact it is making on the regions at the end of its first year of operation.

The Regional Fund was finally agreed by the Council of Ministers in May 1975, with resources fixed for the three years 1975-1977. Apart from the 300 mua (£ 125 million) for this year, it has 500 mua (£208 million) available for each of 1976 and 1977, making 1,300 mua (£ 540 million) in total. Applications for aid are made by the member governments to the Commission, which, after checking them, submits them to the Regional Fund Management Committee (of national officials) which has to give an opinion before the Commission can take its decision.

Thanks to the excellent cooperation with the national administrations, it has been possible to have an initial selection between projects, done in the national capitals, which takes account of the priorities the Commission wishes to see observed. A second selection has of course been made at Community level based on the characteristics of the different project. In this respect, the Commission points out that, in accordance with its wishes, most Member States submitted applications exceeding their agreed share of the Fund, thus making it easier for the Community to select those projects which are of particular interest.

Payment is made to the governments as expenditure is incurred on the projects and on receipt of the appropriate bills. Consequently they may be in some cases a delay between the money being committed and actually paid over. The Commission expects to have approved about 100 mua (£42 million) for payment by the end of this year. The Fund regulation also provides for supervision measures, including on-the-spot checks, to ensure that the projects aided and the administrative practices used are in conformity with the regulation. The first on-the-spot checks are currently being carried out by Commission and national officials working together.

The following table shows the 1975 allocations to all the member countries, including the UK

Table 1		ERDF Total for the Member Countries	
		*	
:Belgium	4.04 mua (36) (£1.68m)	:Ireland	19.91 (105) (£8.3m)
:Denmark	3.87 (34) (£1.61m)	:Italy	124.03 (174) (£51.68m)
:Germany	9.51 (64) (£3.96m)	:Luxembourg	0.75 (1) (£312,500)
:France	46.02 (232) (£19.18m)	:Netherlands	5.58 (3) (£2.33m)
		:U.K.	86.15 (534) (£35.8m)

* Number of projects

The UK received £8.8 m in the first allocation of grants from the Regional Fund in October. The two sets of grants together thus give a total of £35.8m for the U.K. Table 2 gives a breakdown by type of grant and by planning region of the Regional Fund allocations to the UK. (see page 3).

Regional Fund Allocations by type of Grant and by Regions in the UK

* Indicates number of projects in respect of which aid is given

Details of UK Projects

Table 3 provides a comprehensive list of the projects in respect of which grants have been made. The money will be paid to the UK Government in step with the Government's own expenditure on the projects concerned.

Applications for grant in respect of projects with a total investment exceeding 10 million units of account (approx. £4.1m) are dealt with individually. Smaller projects are grouped in a global application and a grant is made in respect of the whole group. It is not therefore possible to give a figure for the aid granted to individual projects in this category.

SCOTLAND

	aid granted
Total aid (all projects)	£ 8 147 533
