Press Release

EMBARGO: Not for publication or broadcast
before 14.00 HOURS GMT, MONDAY, 30 NOVEMBER 1987.

£29.64 MILLION REGIONAL FUND GRANTS TO THE UNITED KINGDOM

The Commission of the European Communities has approved grants from the European Regional Development Fund amounting to £29.64m in respect of 163 investments in industry and infrastructure throughout the United Kingdom.

This is the sixth round of allocations from the European Regional Development Fund this year in which a total of £170 million is being disbursed. Main features of the latest allocation are as follows:

The North region receives grants totalling £5.5m for 23 investments. In Gateshead £2m has been granted to 4 tourist infrastructure projects expected to attract about 450,000 visitors each year. The projects will initially form part of the Gateshead Garden Festival programmed for 1990 and are being developed on a large derelict site. In the long term they will contribute substantially to the tourism potential of the area. Northumberland College of Art and Technology has received a grant of £68,000 towards the provision of a training kitchen for use by students on catering courses run in collaboration with local industry. In Sunderland a grant of £228,000 has been made towards the conversion of a four storey, former industrial building into an advanced telecommunications training and business development centre. It is envisaged that up to 8 new businesses per year will be produced from the scheme.

The North West region gets grants totalling £510,000 for 6 projects. Chester has received two grants for schemes intended to enhance the tourist potential of the City, namely the pedestrianisation of Northgate Street and an improvement scheme along the banks of the River Dee.

In Yorkshire and Humberside grants totalling £1.58m have been made to 16 projects. A grant of £147,950 has gone towards the development of industrial units and site infrastructure at the Attercliffe Common Industrial Estate. A grant of £200,000 has been made to an industrial investment by Microvitec Plc of Bradford for the expansion of the production of visual display units thereby creating 220 jobs.

The West Midlands region receives £2.13m towards 17 projects. The University of Warwick Science Park Company Ltd have received a grant of £84,000 towards an extension of the Science Park distributor road opening up land for the development of 11 industrial units capable of providing jobs in high technology industries for up to 200 people. Units for new enterprises in South Staffordshire have received aid of £362,250 permitting the creation of a potential 170 jobs.

In the South West region grants totalling £1.57m have been made to 12 projects. Seven of these represent investments in industry and 5 infrastructure investments. The 7 industrial investments are expected to create 292 new jobs and to maintain 109.

.... /

Northern Ireland will benefit from grants to 18 projects totalling almost £1.5m. 13 of these investments concern the provision of infrastructure to assist the economic development of the Province. Of particular interest are 2 grants totalling £207,000 to the Industrial Therapy Organisation in Bangor and Newry to provide vocational training facilities for psychiatric patients in locally required skills.

In Wales, grants totalling over £6m have been awarded to 30 projects, all aimed at infrastructure which will help promote regional development. A grant of £1.4m was made towards the construction of a new road bridge at Haverfordwest, and a further £1.4m grant will facilitate the construction of a new sea wall to protect the tourism industry of the Prestatyn Coast.

Scotland has received grants totalling £9.72m for 41 infrastructure investment projects. These projects represent total investments of more than £20m. The largest single investment supported in Scotland is in Renfrew, Strathclyde, where £1.3m was granted to Ferguslie Park Sewer. Seven road and electricity schemes on Shetland have been granted more than £1.8m.
