Le numéro spécial «Marchés agricoles – Prix» qui paraît annuellement au cours du mois de juin, donne un aperçu des prix reçus par les producteurs (valeurs unitaires) pour les produits agricoles qui occupent une place très importante dans l'ensemble des revenus des agriculteurs. La présente publication contient les séries de prix pour la période 1959/60 – 1977/78.

Ces prix, exprimés en monnaie nationale et en unités de compte, concernent les céréales les plus importantes, les pommes de terre, les betteraves sucrières, le bétail d'abattage, les porcs d'abattage, le lait et les œufs de poules pour les neuf pays Communautaires, certains Pays tiers européens et les Etats-Unis.

Comme source la plus importante figure la publication du «ECE/FAO, Agricultural Division of the Economic Commission for Europe» et en ce qui concerne les États-Unis les publications du Ministère de l'Agriculture américain ont été consultées.

I. EXPOSE SUR LES PRIX PUBLIES DANS LA PRESENTE PUBLICATION.

A. Généralités

En mars 1962 dans "Bilans et Etudes" (Informations internes sur les marchés agricoles) - Série B - a paru une publication, qui donne pour les différents pays de la C.E., United Kingdom, Danmark et les U.S.A., pour les années 1949/50 - 1960/61, un aperçu de la moyenne des prix reçus par les producteurs pour un certain nombre de produits agricoles importants.

La présente publication contient une série de prix analogues pour les années 1959/60 - 1977/78 et est, en fait, la suite de la publication citée ci-dessus. Le nombre de pays pour lesquels les séries de prix sont données a été complété par les pays suivants : Ireland, Norge, Sverige, Österreich, Suisse et Hellas. En outre, des corrections nécessaires ont été apportées aux séries de prix déjà publiées.

B. Nature des prix

1. Dans la plupart des cas, il s'agit de prix moyens pondérés, départ ferme, reçus par les producteurs pour les quantités vendues des différents produits.

En principe, ce prix est donc égal au quotient obtenu en divisant, par produit, la valeur totale de toutes les quantités vendues, - indépendamment de la quantité - par le total de toutes les quantités vendues.

(Pour subventions voir le point suivant B 2.)

En conséquence, la valeur moyenne du prix de recette se rapporte à toutes les qualités et non pas à une qualité déterminée. L'assortiment des qualités, qui varie pour chaque produit d'une année à l'autre, joue donc également un rôle lors de la détermination de la valeur unitaire.

2. Subventions qui influencent directement la valeur unitaire perçue par le producteur.

Toutes les subventions, comme subventions par hectare, subventions en faveur du prix, deficiency payments, primes à la culture, qui influencent le montant final encaissé par le producteur pour ses produits, converties par unité du produit, sont comprises dans les valeurs unitaires.

C. Conversions des prix pour les betteraves sucrières et le lait.

Etant donné que la teneur en sucre des betteraves sucrières et la teneur en matières grasses du lait varient d'une année à l'autre et de pays à pays, on a calculé, lorsque c'était possible, pour ces deux produits à côté de la valeur unitaire, également des prix sur la base d'une teneur en sucre ou en graisse uniforme. Pour les betteraves sucrières sur base de 16 % de sucre et pour le lait sur base de 3,7 % de matières grasses.

D. Conversion des prix.

Pour tous les produits, les prix sont exprimés en monnaie nationale ainsi qu'en unités de compte (UC).

Lors des conversions il a été tenu compte des taux de change réellement en vigueur durant les années respectives.

Pour la période 1959/60 - 1977/78 voir pages 31 et 32.

F. Sources.

- La principale source pour la composition de cette publication était l'édition annuelle de la Division de l'Agriculture ECE/FAO de la Commission économique pour l'Europe. L'ECE/FAO reçoit les prix directement des pays (entre autre Ministères de l'Agriculture).

- Les prix des U.S.A. et les prix des betteraves sucrières dans les pays de la C.E. constituent une exception par rapport à ce qui précède.

Les données pour les U.S.A. ont été recueillies dans les publications de l'U.S.D.A. (United States Department of Agriculture) à savoir: Agricultural Statistics - Wheat Situation - Feed Situation - Poultry and Egg Situation - Livestock and Meat Situation - Dairy Situation.

I. ERLÄUTERUNGEN ZU DEN IN DIESER VERÖFFENTLICHUNG ENTHALTENEN PREISEN.

A. Allgemeines

Im März 1962 ist in der Serie B in der Reihe "Bilanzen und Studien" (Hausmittelungen über die Agrarmärkte) eine Veröffentlichung erschienen über die von den Erzeugern in den Ländern der EG, im United Kingdom, in Danmark und in den U.S.A. erzielten Preise für einige wichtige Landbauerzeugnisse (Erlöspreise). Es handelt sich dabei um Durchschnitte für die Jahre 1949/50 - 1960/61.

Die hier vorliegende Veröffentlichung enthält : Erlöspreise -Durchschnitte für die Jahre 1959/60 - 1977/78 Sie ist also eine Weiterführung der obenerwähnten Publikation der Serie B, wobei jedoch ausser Erlöspreisen für die Länder der E.G., das United Kingdom, Danmark und die U.S.A., Preise für Irland, Norge, Sverige, Österreich, Suisse und Hellas aufgenommen sind. Ausserdem sind die in der Serie B veröffentlichten Preise, soweit notwendig, berichtigt worden.

B. Art der Preise

1. In der Mehrzahl aller Fälle sind die genannten Erlöspreise ab- Hof-Preise, die die Erzeuger für die von ihnen verkauften Mengen für die verschiedenen Erzeugnisse empfangen haben.

Im Prinzip ist dieser Erlöspreis also gleich dem Quotienten, der sich bei einer Division des Wertes aller verkauften Mengen eines Produktes (ohne Berücksichtigung der Qualität) durch die insgesamt verkaufte Menge ergibt.

(wegen etwaiger Zuschläge siehe B.2.)

Mit anderen Worten : Der Erlöspreis bezieht sich auf alle Qualitäten und nicht auf eine bestimmte Qualität. Das möglicherweise für jedes Produkt von Jahr zu Jahr wechselnde Qualitätssortiment kann sich also auf die Erlöspreise auswirken.

2. Zuschläge, die die Erlöspreise direkt beeinflussen.

Alle Zuschläge wie Flächensubventionen, Preissubsidien, deficiency payments, Anbauprämien und dergleichen, die Einfluss auf die vom Erzeuger für seine Erzeugnisse empfangenen Beträge haben, sind - umgerechnet per Produkt und Mengeneinheit - in den Erlöspreisen enthalten.

C. Umrechnungen von Preisen für Zuckerrüben und Milch.

Da der Zuckergehalt der Rüben und der Fettgehalt der Milch von Jahr zu Jahr und von Land zu Land schwanken, werden für diese Erzeugnisse die Erlöspreise auf Basis eines einheitlichen Zucker- bzw. Fettgehaltes berechnet, und zwar 16 % Zucker für Zuckerrüben und 3,7 % Fett für Milch.

D. Umrechnung der Preise.

Die vorliegende Veröffentlichung enthält für alle Produkte Erlöspreise in nationaler Währung und in Rechnungseinheiten (RE).

Für die Umrechnung wurden die in den einzelnen Jahren gültigen Wechselkurse verwendet.

Für die Periode 1959/60 - 1977/78 siehe Seiten 31 und 32.

E. Amerikanische Gewichtseinheiten.

Die ECE/FAO erfährt die Erlöspreise direkt von den Ländern (im allgemeinen von den Landwirtschaftsministerien).

- Ausnahmen hiervon sind die Erlöspreise in den USA und die Erlöspreise für Zuckerrüben in den Ländern der E.G.

Die Angaben für die USA wurden entnommen aus Veröffentlichungen des USDA (United States Department of Agriculture), im einzelnen aus Agricultural Statistics - Wheat Situation - Feed Situation - Poultry and Egg Situation - Livestock and Meat Situation - Dairy Situation.

I. NOTA IN MERITO AI PREZZI DI CUI ALLA PRESENTE PUBBLICAZIONE.

A. Generalità

Nel marzo 1962 e apparsa in "Bilanci e studi" (Informazioni interne sui mercati agricoli) - Serie B - una pubblicazione contenente, per i diversi paesi della C.E., il United Kingdom, la Danimarca e gli U.S.A., una sintesi per gli anni 1949/50 - 1960/61 della media dei prezzi ottenuti dai produttori per un certo numero di importanti prodotti agricoli.

La presente pubblicazione contiene una serie di prezzi analoghi per gli anni 1959/60 - 1977/78 e costituisce, in effetti, il seguito della summenzionata pubblicazione. Il numero dei paesi di cui si fornisce la serie dei prezzi è stato completato con i prezzi seguenti: Ireland, Norvegia, Svezia, Austria, Svizzera e Grecia. Inoltre alla serie di prezzi già pubblicate sono stati apportati gli emendamenti resi necessari.

B. Natura dei prezzi

1. Nella maggior parte dei casi si tratta di prezzi medi ponderati, partenza fattoria, ottenuti dai produttori per la quantità dei diversi prodotti vendute.

In linea di massima, dunque, questo prezzo è pari al quoziente ottenuto dividendo, per ciascun prodotto, il valore di tutte le quantità vendute - indipendentemente dalla qualità - per il totale di tutte le quantità vendute.

(Per le sovvenzioni vedere il seguente punto B 2)

Il valore medio del prezzo di ricavo si riferisce pertanto a tutte le qualità e non ad una qualità determinata. Anche l'assortimento delle qualità, che varia per ciascun prodotto da un anno all'altro, influisce sulla determinazione del valore unitario.

2. Sovvenzioni che influiscono direttamente sul valore unitario ottenuto dal produttore.

Tutte le sovvenzioni, come le sovvenzioni per ettaro, le sovvenzioni sul prezzo, i "deficiency payments", ed i premi alla coltivazione, che influiscono sull'importo finale incassato dal produttore per i propri prodotti convertiti per unità di prodotto, sono comprese nei valori unitari.

C. Conversione dei prezzi delle barbabietole da zucchero e per il latte.

Poiché il tenore in zucchero delle barbabietole da zucchero ed il tenore in materie grasse del latte cambiano da un anno all'altro e da paese a paese, per questi due prodotti si è calcolato, quando ciò è stato possibile, oltre al prezzo medio ottenuto - e relativo quindi all'effettivo tenore, rispettivamente, in zucchero ed in materie grasse - anche taluni prezzi in base ad un tenore in zucchero ed in materie grasse uniforme. Per le barbabietole da zucchero ciò è stato fatto sulla base del 16 % di zucchero e per il latte in base al 3,7 % di materie grasse.

D. Conversione dei prezzi.

Per tutti i prodotti i prezzi sono espressi in moneta nazionale nonché in unità di conto (UC).

Nell'effettuare le conversioni si è tenuto conto dei tassi di cambio effettivamente in vigore negli anni considerati.

I. TOELICHTING OP DE IN DEZE PUBLICATIE VOORKOMENDE PRIJZEN.

A. Algemeen

In maart 1962 verscheen in "Balansen en Studies" (Interne informatie over de landbouwmakten) in haar serie B een publicatie, waarin voor de jaren 1949/50 - 1960/61 voor de onderscheidene landen van de E.G., United Kingdom, Danmark en de U.S.A een overzicht werd gegeven van de gemiddeld door de boeren ontvangen prijzen voor een aantal belangrijke landbouwprodukten.

De onderhavige publicatie bevat soortgelijk cijfermateriaal voor de jaren 1959/60 -1977/78 'en is in feite een voortzetting van de hierboven bedoelde publicatie met dien verstande echter dat het aantal landen waarvoor prijsseries worden gegeven uitgebreid is met Ireland, Norge, Sverige, Österreich, Suisse en Hellas en dat noodzakelijke correcties in reeds gepubliceerde cijfers werden aangebracht.

B. Aard van de prijzen

1. In de meeste gevallen betreffen het de gewogen gemiddelde prijzen af boerderij, die de producenten voor de verkochte hoeveelheden van de onderscheidene produkten hebben ontvangen.

In principe is deze prijs dus gelijk aan het quotiënt, dat verkregen wordt door per produkt de waarde van alle verkochte hoeveelheden, onafhankelijk van de kwaliteit, te delen door de totaal verkochte hoeveelheden.

(Voor toeslagen zie volgend punt B 2)

De gemiddelde opbrengstprijs heeft dus betrekking op alle kwaliteiten en dus niet op een bepaalde kwaliteit. Het kwaliteits-assortiment dat voor elk produkt van jaar tot jaar varieert speelt dus bij de bepaling van de gemiddelde opbrengstprijs ook een rol.

2. Toeslagen, die de opbrengstprijs voor de producent direct beïnvloeden.

Alle toeslagen e.d. zoals areaaltoeslagen, prijssubsidies, deficiency payments, teeltpremies, die van invloed zijn op het bedrag dat de producent uiteindelijk voor zijn produkt ontvangt, zijn, omgerekend per eenheid produkt, in de gemiddelde opbrengstprijzen begrepen.

C. Omrekening prijzen van suikerbieten en van melk.

Daar het suikergehalte van de suikerbieten en het vetgehalte van de geproduceerde melk van jaar tot jaar en van land tot land uiteenlopen, werd voor deze twee produkten, waar mogelijk, naast de gemiddelde opbrengstprijs bij respectievelijk het werkelijk suikergehalte en het werkelijk vetgehalte, prijzen berekend bij achtereenvolgens een uniform suiker- en vetgehalte. Voor suikerbieten bij 16 % suiker en voor melk bij 3,7 % vet.

D. Omrekening prijzen.

Voor alle produkten zijn de prijzen uitgedrukt in nationale valuta alsmede omgerekend in rekeneenheden (RE).

Bij de omrekeningen werd rekening gehouden met de in de onderscheidene jaren werkelijk van kracht geweest zijnde wisselkoersen.

Voor de periode 1959/60 - 1977/78 zie bladzijden 31,32.

F. Bronnen.

- Als belangrijkste bron voor de samenstelling van deze publicatie dienden de jaarlijkse uitgaven van de ECE/FAO Agriculture Division of the Economic Commission for Europe. De ECE/FAO ontvangt de prijzen rechtstreeks van de landen (o.a. Ministeries van Landbouw).

- Uitzonderingen op bovenstaande vormen de prijzen van de U.S.A. en de suikerbietenprijzen in de landen van de E.G.

De gegevens voor de U.S.A. werden ontleend aan publicaties van het U.S.D.A. (United States Department of Agriculture) t.w. Agricultural Statistics - Wheat Situation - Feed Situation - Poultry and Egg Situation - Livestock and Meat Situation - Dairy Situation.

I. EXPLANATORY NOTE ON THE PRICES GIVEN IN THIS PUBLICATION.

A. General

In March 1962 there appeared in Series B of "Balance-sheets and Studies" (internal communiqués on the agricultural markets) a publication on the prices received for various key agricultural products by agricultural producers in the E.C. countries, the United Kingdom, Denmark and the U.S.A. (unit values). These were average figures for the years 1949/50 - 1960/61.

The following publication gives a similar list of unit values for the years 1959/60 - 1977/78. It is accordingly a continuation of the above-mentioned publication, supplementing the prices for the E.C. countries, the United Kingdom, Denmark and the U.S.A. with those for Ireland, Norge, Sverige, Österreich, Suisse and Hellas. In addition corrections have been made where necessary to the prices already published.

B. Types of prices.

1. In the majority of cases the unit values listed are ex-farm prices, those the producers received for the quantities they sold of the various products.

This unit value is in principle equal to the quotient resulting from dividing the value of all the quantities sold of a product (irrespective of quality) by the total quantity sold.

(Re-subsidies see B 2 below)

The unit values refer therefore to all qualities, and not to a particular quality. The possible variation in the range of quality of any product from year to year may thus affect the unit values.

2. Subsidies directly influencing the unit values.

All subsidies such as acreage subsidies, price subsidies, deficiency payments, cultivation bonuses and others, which have some influence on the sums the producer raises on his produce, are included in the unit values converted as per product and unit of quantity.

C. Conversion of prices for sugar beet and milk.

As the sugar content of beet and the fat content of milk vary from one year to the next and from country to country the unit values for these products are calculated on the basis of a uniform sugar and fat content, viz. 16 % sugar for sugar beet and 3,7 % fat for milk.

D. Conversion of prices.

The following publication shows unit prices for all produce in the currency of the country concerned and in units of account (UA).

The exchange rates current in the respective years were used for the conversion. For the periode 1959/60 - 1977/78 see pages 31,32

E. American measures of weight.

| 1 USA Hundredweight (cwt) = 100 lb | = | 45,3592 | kg |

| 1 bushel maize = 56 lb | = | 25,401 | kg |

Eggs (hen's) 17,4 eggs = 1 kg.

F. Sources.

The main source for the compilation of the following publication was the volumes of the ECE/FAO Agriculture Division of the Economic Commission for Europe, published annually. The ECE/FAO receives the prices straight from the countries concerned (generally from the Ministries of Agriculture).

Exceptions to this are the U.S.A. prices and the prices for sugar beet in the E.C. countries.

The data for the U.S.A. was taken from publications of the USDA (United States Department of Agriculture), i.e. from Agricultural Statistics - Wheat Situation - Feed Situation - Poultry and Egg Situation - Livestock and Meat Situation - Dairy Situation.

I. REDEGØRELSE FOR DE I DENNE PUBLIKATION FOREKOMMENDE PRISER.

A. Almindelige bemærkninger.

I marts 1962 fremkom "Status og Undersøgelser" (Interne meddelelser vedrørende landbrugsmarkedene) - Serie B - med en offentliggørelse af en oversigt der, for de forskellige lande i EF, United Kingdom, Danmark og U.S.A., for årene 1949/50 - 1960/61, angiver gennemsnittet af de priser, som producenterne har modtaget for en række vigtige landbrugsprodukter.

Denne publikation indeholder en lignende række priser for årene 1959/60 - 1977/78 og den er faktisk en fortsættelse af ovennævnte skrift. Antallet af lande for hvilke priserne angives, er udvidet til at omfatte følgende: Ireland, Norge, Sverige, Østerreich, Suisse og Hellas. Man har endvidere foretaget de nødvendige rettelser af de allerede offentliggjorte priser.

B. Prisernes art.

1. I de fleste tilfælde drejer det sig om vede gennemsnitspriser af gård, som producenterne har modtaget for de solgte mængder af de forskellige produkter.

I princippet er denne pris lig med den kvotient, man får ved at dividere værdien af alle de solgte mængder af et produkt uanset kvalitet med den solgte totalmængde. (Vedrørende tilskud, se punkt B 2 herunder).

Gennemsnitssalgsprisen henfører således til alle kvalitetene og ikke kun til en bestemt kvalitet. Udvalget af kvaliteter, som for hvert produkt varierer fra år til år, spiller derfor ligeledes en rolle ved beregningen af enhedsprisen.

2. Tilskud, som direkte påvirker den af producenten modtagne enhedspris.

Al støtte, såsom arealtilskud, prissubsidier, deficiency payments, dyrkningspræmier, som påvirker det endelige beløb, som producenten modtager for sine produkter, er - omregnet pr. enhed af produktet - inkluderet i enhedsprisen.

C. Omregning af priserne for sukkerroer og mælk.

Da roernes sukkerindhold og mælkens fedtindhold svinger fra år til år og fra land til land, har man for disse produkter, hvor muligt, foruden enhedsprisen ligeledes beregnet prisen på basis af et ensartet sukkereller fedtindhold. For sukkerroer på basis af et sukkerindhold på 16 % og for mælk på basis af et fedtindhold på 3,7 %.

D. Omregning af priserne.

For alle produkter er priserne angivet i den nationale møntsort, såvel som i regningsenheder (RE).

Ved omregningerne har man benyttet de i de pågældende år gældende kurser. For perioden 1959/60 - 1977/78 se side 31,32

F. Kilder.

Som hovedkilde ved udarbejdelsen af denne publikation er anvendt den årlige publikation fra ECE/FAO Agriculture Division of the Economic Commission for Europe. ECE/FAO får priserne direkte fra vedkommende lande (bl. a. fra landbrugsministerier).

Dog udgår USA-priserne og sukkerroerpriserne i EF-landene en undtagelse fra det foregående.

For U.S.A. er oplysningerne taget fra skrifter udgivet af USDA (United States Department of Agriculture), nemlig Agricultural Statistics - Wheat Situation - Feed Situation - Poultry and Egg Situation - Livestock and Meat Situation - Dairy Situation.
