## PREFACE

The European Union is the world's largest donor of public development aid. Every year the European Commission manages a budget of over ECU 3 billion for development cooperation with non-member countries. The EU strives to promote peace, democracy and social progress through political and economic dialogue with its partners.

Cooperation is implemented via a range of international agreements with an increasing movement towards associations of a regional nature. Almost all the developing countries, containing 80% of the world's population, have concluded bilateral agreements with the EU. These agreements in some cases provide for trade preferences and financial assistance while others cover economic cooperation of a more general nature.

Development cooperation was given a legal basis in the Treaty on European Union at Maastricht in 1991, with Article 130u of the Treaty stating 'Community policy in the sphere of development cooperation ... shall foster sustainable economic and social development of the developing countries, and more particularly the most disadvantaged among them ...'.

Eurostat, recognizing that timely and accurate information is vital for fuelling policies and programmes, has contributed to the development continuum. The statistical programme for 1993-97 outlines Eurostat's aims in the development of statistical systems in developing countries: 'The aim of statistical cooperation with developing countries is to aid the development of statistical information systems in those countries to provide them with the necessary instruments to support analysis and the formulation of economic and social development policies'.

Information, however, is also required by the concerned and/or casual reader to monitor countries' progress across a number of fronts – economic, social, demographic, etc.

This publication, the third in an irregular series dating back to 1988, strives to provide that information. Expanding on the 1994 publication *ACP basic statistics* it now also includes countries from the Asian, Latin American and Mediterranean regions. All these countries have signed far-reaching cooperation agreements with the European Community. The publication provides data on short and long-term macroeconomic indicators under the standard groupings and offers the reader a snapshot view of almost 120 developing countries.

**Yves Franchet**

## METHODOLOGICAL NOTES AND SOURCES

The methodology and detailed sources used for the data contained in this publication may be obtained from:

Mr B. Langevin

Eurostat A5

Jean Monnet Building

L-2920 Luxembourg

Tel. (352) 4301-33203

Fax (352) 4301-32769

The most important aspects are outlined below.

### *1. Demographic indicators*

The demographic data are taken from the mean variant of the estimates and forecasts of the total world population (1950–2050) produced by the population division of the United Nations in 1994.

Certain of these indicators produced by the United Nations (age structure, life expectancy at birth, fertility rate, infant mortality rate) have been estimated only for the larger countries (with a population size of 150 000 or more in 1990). For this reason, no forecasts are available for the following countries: Antigua and Barbuda, Dominica, Grenada, Kiribati, São Tomé and Príncipe, Seychelles, St Christopher and Nevis, St Lucia, St Vincent, Tonga, Tuvalu.

### *2. Labour force*

The labour force indicators are taken from the 'Economically active population estimates and projections 1950–2025', produced by the International Labour Organization in 1995.

### *3. Health and education*

The illiteracy rate, number of inhabitants per doctor, number of inhabitants per nurse and number of inhabitants per hospital bed are taken from the 'Social indicators of development', produced by the World Bank in 1995.

The illiteracy rate is defined as the proportion of the population aged 15 years or over who cannot, with understanding, both read and write a short simple statement on everyday life.

'Doctor' includes the total number of registered medical practitioners in the country. Note that the definition of recognized medical practitioners differs between countries.

'Nurse' includes graduate, practical, assistant and auxiliary nurses, as well as para-professional personnel such as traditional birth attendants. Inclusion of auxiliary and para-professional personnel provides a more realistic estimate of available nursing/health care overall.

'Number of inhabitants per hospital bed' uses the number of hospital beds available in public, private, general and specialized hospitals, and rehabilitation centres. Hospitals are establishments permanently staffed by at least one physician.

The rates of enrolment in education are taken from the 'Enrolment estimates and projections', produced by the United Nations Educational, Scientific and Cultural Organization (Unesco) in 1993.

The gross rate of enrolment used is defined as a ratio between the number of young people enrolled for a given level of education (regardless of whether or not they are of the usual age to attend) and the number of young people who belong, according to the national system, to the age group for which the level is designed. This rate is expressed in percentages and may be over 100% because of late admissions, pupils repeating a year or inconsistencies in the data.

#### 4. Foreign debt

The debt indicators are taken from the 'World debt tables 1994-95', produced by the World Bank in 1995.

'Total foreign debt' consists of public and publicly guaranteed long-term debt, private non-guaranteed long-term debt, the use of IMF credit and estimated short-term debt.

'Debt service payments' are the sum of principal repayments and interest payments for the year specified.

The debt service to exports ratio is the ratio of total debt service to the export of goods and services (including workers' remittances); this ratio is also called the debt service ratio.

#### 5. Economic indicators

The economic indicators (GNP, demand structure and origin of GDP) are taken from the 'World tables', produced by the World Bank in 1995.

The GNP per capita at current purchaser values (market prices), is calculated according to the World Bank atlas methodology.

The GDP calculated at market prices is broken down into:

- (i) private sector consumption: the market value of all goods and services purchased or received as income in kind by individuals and non-profit institutions;
- (ii) public sector consumption which is the sum of the following:
  - purchases, less sales, of consumer goods and services,
  - compensation of employees,
  - consumption of fixed assets,
  - payments of indirect taxes;
- (iii) investment: the sum of gross fixed domestic investment and the change in stocks;
- (iv) net exports: exports of goods and nonfactor services less imports of goods and non-factor services.

The per capita energy consumption is taken from the *Social indicators of development*, produced by the World Bank in 1995.

#### 6. Monetary and financial indicators

The current account balance, balance of goods and services, balance of the unilateral transfers and long-term capital are taken from the *Balance of payments statistics* produced by the International Monetary Fund (IMF) in January 1996.

Long-term capital is the sum of direct investment, portfolio investment and other long-term capital.

The inflation rate, dollar exchange rate, general government deficit, direct investment from abroad and gross international reserves are taken from the *International financial statistics* produced by the International Monetary Fund (IMF) in January 1996.

The price index used as a reference for measuring inflation was calculated according to the Laspeyres formula: the weightings used in calculating the index were taken from the observation of consumption by households during the base year (1985).

The dollar exchange rate used is the one calculated as the average for the year.

The general government deficit is calculated as the difference between revenue and grants received on the one hand and expenditure and lending less repayments on the other.

The term 'international reserve' refers to SDR (Special Drawing Rights) resources of the monetary authority, the reserves with the IMF and foreign currency transactions.

#### *7. Public development aid*

These indicators have been taken from the *Geographical distribution of financial flows to developing countries* produced by the Organization for Economic Cooperation and Development (OECD) in 1995.

The figures for bilateral aid from the EU cover only aid from the individual Member States. Aid from the Community as such is included under multilateral aid.

#### *8. Foreign trade*

The foreign trade indicators are taken from the *Direction of trade statistics* produced by the International Monetary Fund (IMF) in 1996.

#### *9. Encyclopaedic data*

The indicators for the year of independence, capital, major cities, official languages, currency, productions, exports, and imports are from the *Europa World Yearbook*, produced by Europa Publications Ltd in 1995.

## ACP REGION

The European Union is the largest trading block and integrated economic zone in the world. The EU's trade, aid and development cooperation policies are, therefore, crucial to developing countries, particularly those with historic links to the Member States of the European Union.

The Lomé Convention, linking 70 countries in the ACP region to the 15 European Union Member States remains the largest collective cooperation agreement in the history of relations between the countries of the North and those of the South.

The Convention is wide-ranging, providing for ACP-EU cooperation in the development of all economic sectors, and in matters of cultural, social and regional cooperation and also the protection of the environment.

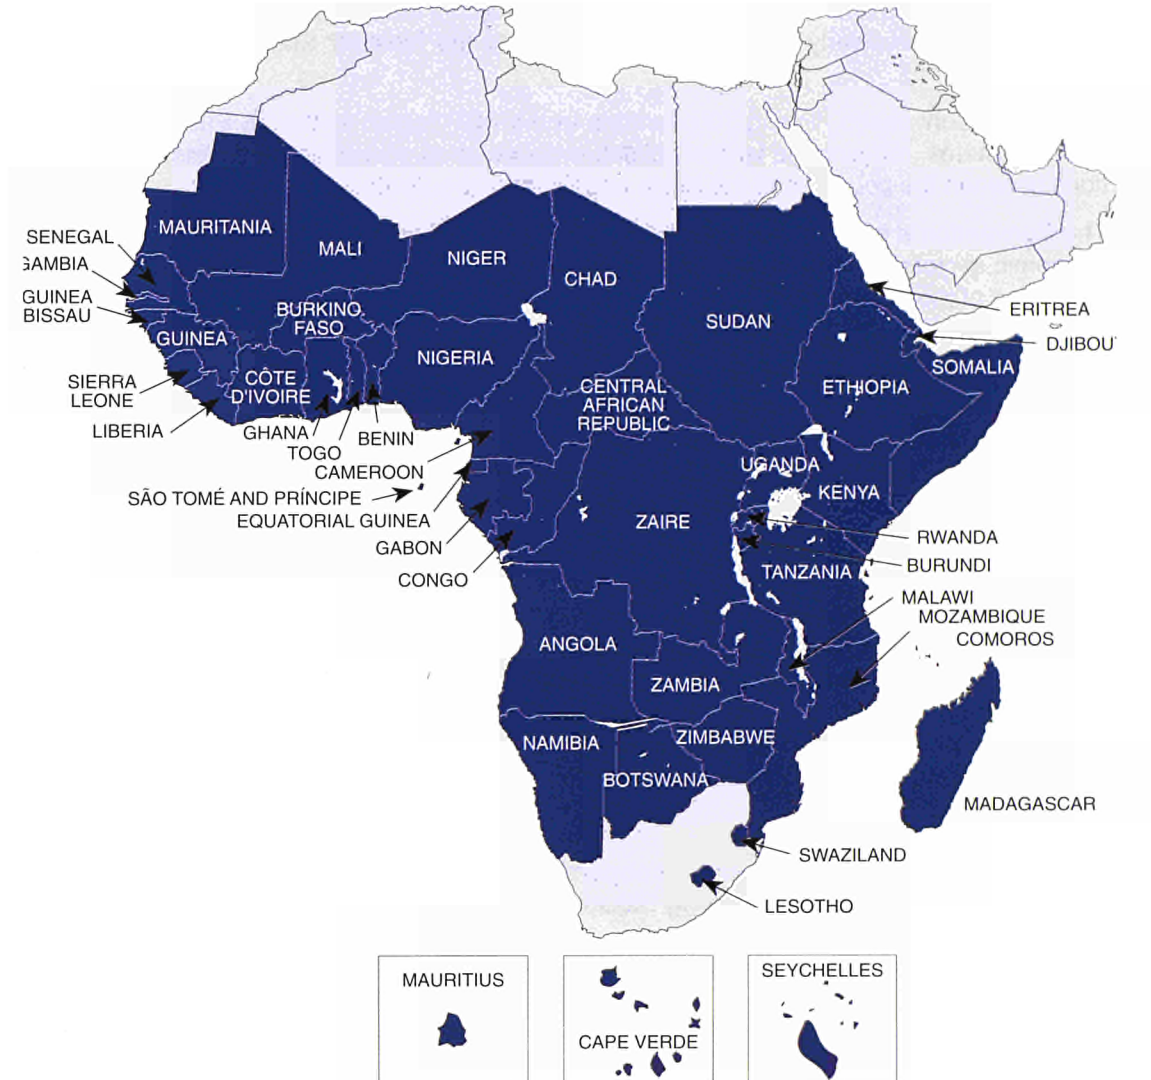

The EU's main objective, however is the reduction of the foreign trade imbalance of developing countries, endeavouring to regulate trade through a system of international cooperation. Between 1975 and 1990 there have been four conventions renewed every five years. The current and fourth Lomé Convention effective from 1990, is the first convention to last 10 years. There was, however, a fundamental review during its mid-term in June 1995, and the revised fourth Lomé Convention was signed in Mauritius on the 4th of November 1995.

The European Development Fund (EDF) is the main financing instrument of the Lomé Convention and provides grants for aid programmes for the 70 ACP signatories to the convention. EDF funds are made up from ad hoc contributions by the Member States and are not included in the European Community's budget. The EDF was established in 1958 and is the Community's oldest financial instrument. It has financed each of the Yaoundé (precursor to Lomé) conventions. From its inception in 1958 and up to the revision of Lomé IV the EDF has spent a total of ECU 41.9 billion in eight five-year financial protocols. In addition to the EDF, finance in the form of loans has been provided to the ACP countries under the Lomé Conventions.

## Asia

### Countries:

Bangladesh, Bhutan, Brunei, China, India, Indonesia, Laos, Malaysia, Maldives, Myanmar, Nepal, Pakistan, Philippines, Singapore, Sri Lanka, Thailand, Vietnam.

## INTRODUCTION

The rise of Asia is radically altering the balance of world economic power. The World Bank has estimated that by the year 2000 East and South-East Asia alone will account for half of the growth in the world economy. This growth will result in one billion Asians having significant consumer purchasing power, and 400 million of them will have an average disposable income which is just as high as, if not higher than, that of Europeans or Americans.

The European Union should, therefore, accord greater priority to Asia than it does at present.

As an inevitable result of its growing economic weight, Asia is becoming increasingly determined to play a more important role on the world stage. The European Union should, therefore, make an effort to develop its political dialogue with Asia and seek ways of involving the continent more closely in the management of international affairs, with a view to setting up a partnership of equal powers capable of playing a constructive and stabilising role in the world.

The first meeting of European and Asian heads of State held in Bangkok on 1 and 2 March 1996 is the most important political event to be held between the two regions.

## Latin America

### Countries:

Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay, Venezuela.

## INTRODUCTION

Although Latin America lies at the outer limits of the Communities' development reach, strong historical and cultural ties link the two regions. Relative to that of Sub-Saharan Africa and the Mediterranean regions the scale of development cooperation policies pursued by the Community with Latin America is not as large by comparison. However, as the Community globalized its cooperation policies with developing countries, relations with Latin America have expanded considerably from the conclusion of its first (first generation) agreements with Brazil and Uruguay.

Today Europe is one of Latin America's main trading partners accounting for 20% of its imports and 20% of its exports. The Community system of generalized preferences (GSP) offers easier access to the European market.

While earlier framework cooperation agreements with individual countries laid the basis for bilateral relationships, today multilateral agreements have been concluded with regional organizations. These include the Andean Pact (Bolivia, Colombia, Ecuador, Peru and Venezuela); the Central American isthmus (Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua and Panama) and most recently the Mercosur (Argentina, Brazil, Paraguay, and Uruguay).

## Mediterranean

### Countries:

Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey.

## INTRODUCTION

The European Union's relations with non-member Mediterranean countries has been strongly influenced by such factors as geographical proximity, a tradition of economic interdependence and finally close historic and cultural ties. Early phases of a 'Mediterranean' policy of the European Union were characterized using a case-by-case approach towards the countries of the region. This led to the establishment of a variety of limited bilateral agreements. However, with an increasing tendency towards regional associations, also witnessed in the European Union's other global cooperation agreements, new policies were developed.

Cooperation agreements reached by the European Union with the Mediterranean countries in 1976 led to the implementation of five-year financial protocols, the fourth generation of which expires in 1996. This is financed from the European Union budget and European Investment Bank (EIB) loans from its own resources. Concerning the fourth protocol (period 1991-96), there is an allocation of ECU 2 375 million (EU + EIB) to cover financial cooperation by country (bilateral cooperation). An important additional aid is also allocated for regional and horizontal cooperation.

The year 1994, however, was a watershed in EU-Mediterranean cooperation. In October of that year the European Commission called on the European Union for the creation of a Euro-Mediterranean partnership with its North African and Middle Eastern neighbours. This initiative would establish the biggest free trade zone in the world and help stabilize the Union's southern and eastern flanks.

Just over a year later the Barcelona Declaration, adopted at the Euro-Mediterranean Ministerial Conference in November 1995, brought that objective closer. The signatories agreed to establish a comprehensive partnership among the participants, the Euro-Mediterranean partnership, through strengthened political dialogue on a regular basis, the development of economic and financial cooperation and greater emphasis on the social, cultural and human dimension.

## Algeria

Independence: 1962  
 Capital: Algiers (el-Djezaïr)  
 Area: 2 381 741 km<sup>2</sup>  
 Major cities (Population 1987):  
 • Algiers [el-Djezaïr] (1 507 241)  
 • Oran (609 823)  
 • Constantine (440 842)  
 • Annaba (222 518)  
 • Batna (181 601)

### Demographic data

	1960	1970	1980	1990	2000	2025
Total population (1 000 inhabitants)	10800	13746	18740	24935	31158	45475
• Males (%)	50.3	48.9	49.6	50.6	50.6	50.5
• Females (%)	49.7	51.1	50.4	49.4	49.4	49.5
Average rate of population growth (%)	2.0	3.1	3.1	2.3	2.0	1.1
Population density (per km <sup>2</sup> )	5	6	8	10	13	19
Urbanization rate (%)	30.4	39.5	43.4	51.7	59.6	74.0
Age structure (%):						
• 0-14 years	43.8	48.4	46.5	42.0	35.5	23.6
• 15-64 years	52.4	47.5	49.6	54.5	60.6	69.8
• Over 65 years	3.9	4.1	3.9	3.6	3.8	6.6
Life expectancy at birth (years)	48.3	54.5	60.5	67.1	70.2	75.6
Fertility rate (births per woman)	7.4	7.4	6.3	3.9	3.0	2.1
Infant mortality rate (per 1 000 live births)	160	132	88	55	37	15

### Labour force data

	1960	1970	1980	1990	2000	2025
Labour force (1 000)	2855	2945	4051	5819	8378	17308
• Males (%)	96.1	94.0	91.8	90.4	88.9	84.0

## Algeria

Official language: Arabic  
 Region: Mediterranean  
 Currency: Algerian dinar

Imports:  
 • Machinery and transport equipment  
 • Iron and steel  
 • Food, cereals and cereal preparations

Productions:  
 • Wheat, barley, potatoes, sheep, fishing  
 • Crude petroleum, natural gas  
 • Food processing, machinery and transport equipment, textiles  
 • Fossil fuel electricity

Exports:  
 • Petroleum and petroleum products  
 • Gas (natural and manufactured)

### Economic data

**ACP ALA MED – Basic statistics 1996**

Luxembourg: Office for Official Publications of the European Communities

1996 — X, 269 pp. — 17 x 24 cm

ISBN 92-827-6197-5

Price (excluding VAT) in Luxembourg: ECU 45

This publication regroups and synthesizes, for the ACP, Asian, Latin American and Mediterranean States, the main statistical indicators supplied by the major international organizations. The socioeconomic indicators are presented by decades from 1960 to 2025 if the information is available. The economic and financial indicators cover the years 1980 and 1990 to 1994.
