AVERTISSEMENT

Le présent fascicule forme le premier livret d'une publication rétrospective sur le commerce extérieur des Etats africains et malgache associés aux Communautés européennes. Il sera suivi d'une quinzaine d'autres livrets analogues consacrés aux importations et exportations de chacun de ces pays; l'ensemble constituera le Tome I de l'ouvrage. Le second Tome présentera le commerce de tous les E.A.M.A. relativement à chacun des produits de la Nomenclature Statistique et Tarifaire; il ne pourra être diffusé qu'après l'achèvement de la première série puisqu'il reprendra la totalité des informations qui y auront été enregistrées.

La publication d'un tel Annuaire soulève des problèmes de conscience en même temps que d'énormes difficultés techniques.

Les premiers naissent de la qualité des données et tiennent surtout à la valeur des comparaisons qu'elles suscitent. D'une année à la suivante, les modifications de structure n'affectent pas de façon trop notable les rapprochements, mais quand on établit des rapports couvrant dix ans, on a tout lieu de craindre que les transformations intervenues au cours de cette période dans le processus des relevés douaniers réduisent à peu de chose la signification tirée des résultats d'un calcul quelconque. Il suffit pour s'en persuader de songer que pendant cette décennie la plupart des pays ont accédé à l'indépendance, ont subi des bouleversements intérieurs affectant fortement leurs échanges, sont entrés dans des unions douanières où s'évanouit une large part du commerce extérieur, puis s'en sont parfois détachés. De plus, ces phénomènes politiques ou administratifs ont été, de tout temps, accompagnés de faits plus ou moins liés à la marche des services douaniers; l'incidence de ces modifications n'est pas moins profonde sur les données : de nombreux changements de nomenclature, les franchissements frontaliers clandestins de cacao, diamants..., les migrations incontrôlables de troupeaux, la pratique de certaines importations hors douanes pour raisons politiques ou militaires, les frais de transfert d'un port étranger à la frontière nationale, l'usage de barèmes d'évaluation pour le change ou pour l'estimation ad valorem, comptent parmi les éléments perturbateurs les plus connus et les plus décisifs.

Il n'est donc pas surprenant que dans les travaux de comptabilité économique, où la cohérence des informations est primordiale, on se trouve devant la nécessité de réestimer les résultats des déclarations douanières en y ajoutant, pour tout au partie des causes ci-dessus énumérées, des compléments de l'ordre de 30 % pour les exportations et de 20 % pour les importations; ces taux expriment une moyenne parmi les rectifications nationales qui s'étagent de 0 à 105 % pour les années récentes. A plus forte raison

serait-il illusoire de présenter le commerce extérieur avec un grand détail pour les années antérieures à 1962. C'est pourquoi on a choisi le parti d'éliminer toute information portant sur des groupes de marchandises plus fins que la nomenclature à 3 chiffres pour cette période ancienne. On espère que les renseignements globaux qui subsistent gardent une certaine signification et que les détails donnés à partir de 1962 peuvent se prêter à une analyse, sinon précise, du moins valable, malgré les approximations qu'elle implique encore.

Cela ne veut pas dire que, malgré des difficultés techniques considérables, on n'a pas tenté d'améliorer les données présentées ici. D'abord, il a fallu reconstituer les données de base touchant certaines périodes anciennes, retrouver les dessins d'enregistrement utilisés autrefois, établir la correspondance de tous les codes nationaux employés au cours des différentes années avec les positions à 5 chiffres du code C.S.T. actuel, puis déceler les résultats aberrants, procéder à leur analyse individuelle et à leur redressement. On conçoit que cette phase fut la plus pénible puisqu'elle portait sur une documentation dont le volume correspond à 2 000 000 de cartes environ; elle n'allait pas sans aléa, mais il était indispensable de s'y consacrer dans le dessein de supprimer les erreurs manifestes les plus grossières. On y est parvenu par l'examen de séries chronologiques des valeurs unitaires relatives à chaque produit et on a redressé les résultats anormaux par comparaison avec les autres rapports de la même série ou par comparaison avec les valeurs unitaires issues d'autres pays. Lorsqu'il s'agissait de produits importants, l'examen séparé des quantités et des valeurs globales permettait de déterminer laquelle de ces deux informations avait le plus de chance d'être erronée, le risque étant accepté de procéder parfois à des redressements superflus. Dans les autres cas, on transférait le produit en cause sous une rubrique résiduelle.

On a ainsi apporté des améliorations substantielles à l'ensemble des renseignements diffusés et ils constituent dorénavant un parti plus utilisable des déclarations douanières disponibles.

On ne peut mieux clore cet avertissement qu'en reproduisant le paragraphe final d'une préface à un document semblable publié par un service statistique africain : « Placés devant l'alternative de fournir des données médiocres, sinon mauvaises, ou de ne rien faire, nous avons choisi la première solution. Les pressantes sollicitations des utilisateurs ne sont pas étrangères à cette décision quelque peu hardie. Aussi, nous espérons que toute imparfaite qu'elle soit, et faute de mieux, la présente publication sera de quelque utilité ».

Observations

Les valeurs d'importation comprennent les coûts d'assurance et de transport jusqu'à la frontière du pays importateur (valeur c.a.f.) mais ne comprennent pas les droits de douane, impôts ou taxes perçus dans ce pays; les valeurs d'exportation ne comprennent pas les coûts d'assurance et de transport au-delà de la frontière du pays déclarant (valeur f.o.b.).

Les valeurs ont été uniformément exprimées en milliers d'unité de compte (1.000 \$) et les quantités en tonnes, sauf exceptions signalées par MT (soit : 1.000 tonnes) dans la colonne appropriée. Les produits sont codifiés selon la Classification statistique et tarifaire (C.S.T.) dont les rubriques à 5 chiffres correspondent à un poste de la Nomenclature de Bruxelles. Toutefois, la division « 67, Fonte, fer et acier » a été recodifiée pour l'adapter aux statistiques africaines et malgaches beaucoup moins détaillées sur ce point que les données nécessaires à l'exécution du Traité de la C.E.C.A. Les groupes à 3 chiffres demeurent inchangés sous réserve des exceptions suivantes :

- 673 — Y compris CST — 672.32/33/52/53/72/73
674.12/13/22/23/32/33/82/83
675.02/03
677.02/03
- 678 — Y compris CST — 672.90
- 679 — Y compris CST — 698.91

Hormis la division 67, les groupes à 3 chiffres de la CST ont subi quelques distorsions signalées, le cas échéant, sous la dénomination des postes à 5 chiffres dans les tableaux.

Certains codes statistiques nationaux des E.A.M.A. ont été modifiés au cours de la période 1962-1966 et il n'a pas toujours été possible de rétablir, dans les périodes anciennes, des séries correspondant aux définitions des années récentes. On a noté ce manque de cohérence par une remarque figurant sous le nom du produit. Exemple :

- 011.10 Viande de bovins
(y compris CST 011.20/30/50 en 1962 et 1963)

Il est bon de garder en mémoire que le commerce intra-UDE n'étant pas relevé, les échanges du Tchad avec les autres Etats de l'Union ne figurent pas ici; la même remarque s'étend au commerce avec le Cameroun en 1966.

ANKÜNDIGUNG

Das vorliegende Heft ist der erste Teil einer Veröffentlichung, die rückschauend den Außenhandel der mit den Europäischen Gemeinschaften assoziierten afrikanischen Staaten und Madagaskar darstellt. In der Folge sollen noch etwa fünfzehn weitere solche Hefte über die Einfuhren und Ausfuhren jedes dieser Länder veröffentlicht werden; alle zusammen werden den Band I des Werkes bilden. Der zweite Band wird den Handel aller AASM-Staaten nach jedem Erzeugnis des einheitlichen Güterverzeichnis für die Verkehrsstatistik (NST) darstellen; seine Verteilung ist jedoch erst nach Abschluß der ersten Reihe möglich, da er sämtliche Informationen enthält, die in dieser verzeichnet werden sollen.

Die Veröffentlichung eines solchen Jahrbuchs bringt neben Gewissensfragen auch ungeheure technische Schwierigkeiten mit sich.

Erstere erwachsen aus der Art der Angaben und rühren insbesondere von dem Wert der Vergleiche her, zu denen sie Anlaß geben. Von einem Jahr zum anderen beeinflussen die Strukturveränderungen diese Vergleiche nicht zu stark; hingegen besteht bei Berichten über einen Zeitraum von 10 Jahren aller Anlaß zu der Befürchtung, daß durch die in diesem Zeitraum erfolgten Änderungen bei der Aufstellung der Zollstatistiken die aus irgendwelchen Berechnungsergebnissen gefolgerte Bedeutung auf ein geringes vermindert wird. Um sich davon zu überzeugen, braucht man nur daran zu denken, daß in diesem Jahrzehnt die meisten Länder die Unabhängigkeit erworben haben, daß sie innere Umwälzungen durchgemacht haben, die ihren Handel stark beeinflussen, daß sie Zollunionen beigetreten sind, in denen der Außenhandel großteils schrumpft, und in der Folge zuweilen auch wieder aus diesen ausgetreten sind. Außerdem sind diese Vorgänge im Bereich der Politik und Verwaltung immer von Umständen begleitet gewesen, die mehr oder weniger mit der Arbeitsweise der Zollstellen zusammenhängen; und nicht minder tiefgreifend ist die Auswirkung dieser Veränderungen auf die Angaben: Zahlreiche Zolltarifänderungen, der Schmuggel mit Kakao, Diamanten..., die unkontrollierbaren Wanderungen von Herden, bestimmte Einfuhren ohne Zollgestellung aus politischen oder militärischen Gründen, die Kosten der Verbringung von einem ausländischen Hafen zur Grenze, die Verwendung von Schätztabellen für den Wechselverkehr oder für die „ad valorem“-Schätzung gehören zu den bekanntesten und entscheidendsten Störelementen.

Es ist also nicht überraschend, daß es sich bei den Arbeiten der volkswirtschaftlichen Gesamtrechnung, bei denen die Konsistenz der Informationen wesentlich ist, als notwendig erweist, die Ergebnisse der Zollerklärungen neu zu schätzen, indem aus allen oder einem Teil der vorgenannten Gründen Ergänzungen von 30 % für die Ausfuhren und von 20 % für die Einfuhren vorgenommen werden; diese Sätze stellen einen Durchschnitt der nationalen

Berichtigungen dar, die sich in den letzten Jahren von 0 bis 105 % stufen. Erst recht illusorisch wäre es, den Außenhandel mit einem eingehenden Bericht für die Jahre vor 1962 darzustellen. Man entschied sich deshalb dafür, alle Informationen über Warengruppen, die ausführlicher als die 3-stellige Nomenklatur unterteilt sind, für diesen früheren Zeitraum auszuklammern. Man hofft, daß die noch vorhandenen globalen Angaben auch weiterhin einigen Bestand haben, und daß die Einzelangaben ab 1962 für eine, wenn auch nicht genaue, so doch gültige Analyse geeignet sind, obwohl auch diese noch Annäherungen beinhaltet.

Das will nicht heißen, daß trotz erheblicher technischer Schwierigkeiten nicht doch der Versuch gemacht worden wäre, die vorliegenden Angaben zu verbessern. Zunächst galt es, die grundlegenden Angaben für bestimmte frühere Zeitabschnitte zu rekonstituieren, die seinerzeit verwendeten Kartenmuster wieder aufzufinden, die Beziehung aller im Laufe der Jahre verwendeten nationalen Schlüssel zu den fünfstelligen Positionen des jetzigen CST-Schlüssels herauszustellen und diese im einzelnen zu prüfen und zu berichtigen. Begreiflicherweise war diese Phase am heikelsten, da sie eine Dokumentation von etwa 2 Millionen Lochkarten umfaßte. Das Unternehmen verlief nicht ohne Wagnis, aber es war unerlässlich, mit der Absicht daranzugehen, die größten offenkundigen Irrtümer auszumerzen. Dies gelang durch die Prüfung chronologischer Reihen der Einheitswerte für jedes Erzeugnis, und die anormalen Ergebnisse wurden im Verhältnis zu den anderen Berichten der gleichen Reihe oder durch Vergleiche mit den aus anderen Ländern stammenden Einheitswerten berichtigt. Wenn es sich um bedeutsame Erzeugnisse handelte, konnte anhand der gesonderten Prüfung der Gesamtmengen und der Gesamtwerte bestimmt werden, welche von beiden Informationen mit größerer Wahrscheinlichkeit falsch war, wobei das Risiko zuweilen überflüssiger Berichtigungen in Kauf genommen wurde. In anderen Fällen wurde das betreffende Erzeugnis in eine Sammelposition eingetragen.

So wurden die Angaben insgesamt wesentlich verbessert und stellen nunmehr einen leichter verwertbaren Teil der verfügbaren Zollerklärungen dar.

Es läßt sich kaum ein besseres Ende für diese Ankündigung finden als der Schlußabsatz eines Vorworts für ein ähnliches Dokument, das von einem afrikanischen statistischen Amt veröffentlicht wurde: „Angesichts der Alternative, mittelmäßige, wenn nicht schlechte Angaben zu liefern oder gar nichts zu unternehmen, haben wir die erste Lösung gewählt. Die dringenden Bitten der Verbraucher sind an dieser kühnen Entscheidung nicht unbeteiligt. Deshalb hoffen wir, daß diese Veröffentlichung — trotz ihrer Unvollständigkeit und mangels eines besseren — von einem Nutzen sein möge“.

Bemerkungen

Die Einfuhrwerte umfassen die Versicherungs- und Transportkosten bis zur Grenze des Einfuhrlandes (cif-Wert), nicht hingegen die Zollsätze, Steuern oder Abgaben, die in diesem Land erhoben werden; die Ausfuhrwerte umfassen nicht die Versicherungs- und Transportkosten jenseits der Grenze des Ausfuhrlandes (fob-Wert).

Die Werte sind einheitlich in Tausend Rechnungseinheiten (1 000 \$) und die Mengen in Tonnen ausgedrückt, die von Ausnahmen abgesehen in der entsprechenden Spalte durch MT (gleich : 1 000 t) aufgeführt sind. Die Erzeugnisse sind nach dem internationalen Warenverzeichnis für den Außenhandel (CST) kodifiziert, dessen fünfstelligen Rubriken einer Tarifposition des Brüsseler Zolltarifs entsprechen. Allerdings wurde der Abschnitt „67, Eisen, Gußeisen und Stahl“ neu kodifiziert, um ihm der AASM-Statistik anzupassen, die in diesem Punkt sehr viel weniger detailliert als die für die Durchführung des EGKS-Vertrags notwendigen Daten ist. Die 3-stelligen Gruppen bleiben unverändert abgesehen von folgenden Ausnahmen :

- 673 — einschließlich CST — 672.32/33/52/53/72/73
674.12/13/22/23/32/33/82/83
675.02/03
677.02/03
- 678 — einschließlich CST — 672.90
- 679 — einschließlich CST — 698.91

Außer dem Abschnitt 67 haben die 3-stelligen CST-Gruppen einige Änderungen erfahren, die gegebenenfalls unter der Bezeichnung der 5-stelligen Rubriken in den Tabellen angegeben sind.

Einige nationale statistische Schlüssel der AASM wurden im Zeitraum 1962-1966 geändert, und es war nicht immer möglich, für die vorausgehenden Zeiten Reihen aufzustellen, die den letztjährigen Definitionen entsprechen. Der mangelnde Zusammenhang wurde durch eine Anmerkung unter dem Namen des Erzeugnisses aufgezeigt. Beispiel :

- 011.10 Rindfleisch
(einschließlich CST 011.20/30/50 1962 und 1963)

Es sei darauf hingewiesen, daß der Handel innerhalb der Äquatorial-Zollunion nicht festgestellt wurde und somit der Warenverkehr des Tschad mit den übrigen Staaten der Union hier nicht aufgeführt ist; dieselbe Feststellung gilt für den Handel mit Kamerun 1966.

AVVERTENZA

Il presente fascicolo costituisce la prima parte di una pubblicazione retrospettiva sul commercio con l'estero degli Stati africani e malgascio associati alle Comunità europee. Esso sarà seguito da altri quindici analoghi volumetti, riguardanti le importazioni e le esportazioni di ciascuno di tali Stati; l'insieme costituirà il I° volume dell'Annuario. Il II° volume sarà dedicato al commercio di tutti i SAMA per singolo prodotto della Nomenclatura Statistica e Tariffaria (CST). Esso potrà essere pubblicato solo quando sarà ultimata la prima serie, poiché riprenderà la totalità delle informazioni in questa contenute.

La pubblicazione di un tale Annuario suscita problemi di coscienza oltre che enormi difficoltà tecniche.

I primi sono motivati dalla qualità dei dati e, soprattutto, dal valore dei loro raffronti. Quest'ultimi, effettuati da un anno all'altro, non rivelano modificazioni strutturali troppo accentuate; ma se si estendono ad un intervallo di 10 anni, è ben possibile che le trasformazioni intervenute durante questo periodo nel sistema di rilevazione doganale riducano il valore dei risultati di un qualsivoglia calcolo. Per persuadersene, basta pensare che durante questo decennio la maggior parte dei paesi sono divenuti indipendenti, hanno subito sconvolgimenti interni che hanno notevolmente influito sui loro scambi, hanno contratto unioni doganali (dove si dissolve una gran parte del commercio estero) e dalle quali, in seguito, si sono a volte distaccati. Inoltre, tali fenomeni politici o amministrativi hanno sempre avuto delle ripercussioni sul funzionamento dei servizi doganali, dando luogo a cambiamenti non indifferenti dei dati. Gli elementi perturbatori più noti e più decisivi, che più frequentemente si riscontrano sono: le numerose modificazioni di nomenclatura, i trasporti clandestini oltre frontiera di cacao, diamanti, ecc., i passaggi incontrollabili di mandrie, la pratica di talune importazioni extra-doganali per ragioni politiche o militari, le spese di trasporto da un porto straniero alla frontiera nazionale, l'uso di scale di valutazione per il cambio o per la stima ad valorem.

Non deve, quindi, stupire se nella contabilità economica, dove la coerenza delle informazioni è di primaria importanza, ci si trova di fronte alla necessità di rivalutare i risultati delle dichiarazioni doganali, aggiungendovi, per tutte o parte delle cause sopra elencate, complementi dell'ordine del 30 % per le esportazioni e del 20 % per le importazioni. Detti tassi rappresentano una media delle rettifiche nazionali, che variano dallo 0 al 105 % per gli anni più recenti. A maggior ragione sarebbe illusorio

presentare il commercio estero con un maggiore dettaglio per gli anni precedenti al 1962. Per tale periodo, quindi, si sono prese in considerazione solamente quelle informazioni riguardanti gruppi di prodotti ripresi a 3 cifre. In tal modo si spera che l'insieme delle informazioni conservino un certo significato e che i dettagli forniti a partire dal 1962 permettano un'analisi se non precisa, per lo meno valida, nonostante le approssimazioni che essa ancora implica.

Ciò non significa che, malgrado le notevoli difficoltà tecniche, non si sia cercato di migliorare i dati raccolti. Si è dovuto, anzitutto, ricercare i dati di base relativi ad alcuni periodi anteriori, ritrovare i tracciati schede utilizzati un tempo, stabilire la corrispondenza di tutti i codici nazionali adottati nel corso dei vari anni con le posizioni a 5 cifre dell'attuale codice CST; in seguito, individuare i risultati aberranti, analizzarli singolarmente e rettificarli. Ci si può rendere facilmente conto che questa è stata la fase più gravosa, dato che si è dovuto esaminare una documentazione di un volume pari a 2.000.000 di schede circa. Tale fase non mancava di rischi, ma era indispensabile affrontarla se si voleva raggiungere l'intento di eliminare gli errori manifestamente più grossolani. A ciò si è giunti, esaminando le serie cronologiche dei valori unitari relativi a ciascun prodotto e rettificando i risultati anomali. Tali risultati sono stati, in seguito, raffrontati agli altri rapporti della medesima serie e ai valori unitari ottenuti per altri paesi. Nel caso di prodotti importanti, un esame distinto delle quantità e dei valori globali ha permesso di stabilire quale di questi due dati aveva maggiore probabilità di inesattezza, accettando sempre il rischio di procedere a volte a rettifiche superflue. Negli altri casi, il prodotto considerato è stato trasferito in una rubrica « residuo ».

In tal modo, all'insieme delle informazioni pubblicate sono stati apportati miglioramenti sostanziali tali da poter permettere d'ora in poi una migliore utilizzazione delle dichiarazioni doganali disponibili.

Non potremmo meglio concludere questa avvertenza che citando l'ultimo paragrafo della prefazione a un documento analogo, pubblicato da un servizio statistico africano: « Posti di fronte all'alternativa di fornire dati mediocri, se non di cattiva qualità o di non far nulla, abbiamo scelto la prima soluzione. Le pressanti sollecitazioni degli utilizzatori non sono estranee a tale nostra decisione piuttosto ardua. Ci auguriamo, quindi, che la presente pubblicazione, per quanto imperfetta, possa essere — in mancanza di meglio — di una certa utilità ».

Osservazioni

I valori d'importazione comprendono i costi d'assicurazione e di trasporto fino alla frontiera del paese importatore (valore c.i.f.), ma non comprendono i diritti doganali imposte o tasse percepiti in questo paese; mentre i valori d'esportazione non comprendono i costi d'assicurazione e di trasporto al di là della frontiera del paese dichiarante (valore f.o.b.).

I valori sono uniformemente espressi in migliaia di unità di conto (1 000 \$) e le quantità in tonnellate, salvo eccezioni indicate in MT (ossia : 1 000 tonnellate) nella colonna apposta. I prodotti sono codificati secondo la Classificazione Statistica e Tariffaria (C.S.T.), le cui rubriche a 5 cifre corrispondono ad una voce della Nomenclatura di Bruxelles. Per la suddivisione della rubrica «67, Ferro, ghisa e acciaio» si è proceduto a una nuova codificazione per meglio adattarla alle statistiche africane e malgascce che, a questo riguardo, sono molto meno dettagliate dei dati necessari per all'attuazione del Trattato della CECA.

I gruppi a 3 cifre restano invariati, salvo le seguenti eccezioni :

| | |
|------------------------|-----------------------------|
| 673 — lvi compr. CST — | 672.32/33/52/53/72/73 |
| | 674.12/13/22/23/32/33/82/83 |
| | 675.02/03 |
| | 677.02/03 |
| 678 — lvi compr. CST — | 672.90 |
| 679 — lvi compr. CST — | 698.91 |

Ad esclusione della suddivisione 67, i gruppi a 3 cifre della CST hanno subito talune distorsioni. Esse vengono segnalate, se del caso, nelle tabelle sotto la denominazione delle rubriche a 5 cifre.

Alcuni codici statistici nazionali dei SAMA sono stati modificati durante il periodo 1962-1966 e non è stato sempre possibile ristabilire, per i periodi antecedenti, le serie corrispondenti alle definizioni degli anni recenti. Questa mancanza di coerenza è stata fatta rilevare con una osservazione, ripresa sotto il nome del prodotto. Esempio :

| |
|--|
| 011.10 Carne bovina |
| (lvi compr. CST 011.20/30/50 per gli anni 1962/63) |

È opportuno tener presente che il commercio intra-UDE non è ripreso e quindi non figura tra gli scambi del Ciad con gli altri Stati dell'Unione; la stessa osservazione è applicabile al commercio con il Camerun per l'anno 1966.

Dit is het eerste boekje van een publikatie, welke een retrospectief overzicht geeft van de buitenlandse handel van de met de Europese Gemeenschappen geassocieerde Afrikaanse Staten en Madagaskar. Deze aflevering zal worden gevolgd door een vijftiental soortgelijke boekjes, gewijd aan de in- en uitvoer van ieder van deze landen; tezamen zullen deze Deel I van de publikatie vormen. In het tweede deel zal het handelsverkeer van alle geassocieerde Afrikaanse Staten en Madagaskar voor ieder produkt van de Nomenclatuur voor Statistiek en Tarief worden weergegeven. Dit deel zal echter eerst kunnen worden gepubliceerd na voltooiing van de eerste reeks, omdat hierin alle in deze boekjes vervatte gegevens zullen worden overgenomen.

De publikatie van een dergelijk Jaarboek stelt ons voor gewetensproblemen en daarnaast voor enorme technische moeilijkheden.

Deze eerste vloeien voort uit de kwaliteit van de gegevens en houden vooral verband met de waarde van de vergelijkingen, waartoe zij aanleiding geven. Van het ene jaar op het andere kunnen structuurveranderingen dergelijke vergelijkingen niet al te sterk beïnvloeden, maar wanneer men verslagen over een periode van 10 jaar opstelt, moet er toch worden gevreesd dat de in de loop van deze periode opgetreden wijzigingen in het opstellen van de douanestatistieken de betekenis van de resultaten van de een of andere berekening tot weinig of niets reduceren. Om zich dit te realiseren heeft men slechts te bedenken dat in de loop van deze tien jaren de meeste landen de onafhankelijkheid hebben verworven, dat zij interne omwentelingen hebben doorgemaakt die hun handelsverkeer sterk hebben beïnvloed, dat zij lid zijn geworden van douane-unies, waarin een groot deel van de buitenlandse handel opgaat, en zich hiervan nadien soms weer hebben losgemaakt. Bovendien gingen deze politieke of administratieve gebeurtenissen altijd gepaard met feiten welke min of meer met de werkwijze van de douanediensten samenhangen en de invloed van deze veranderingen is niet minder ingrijpend op de gegevens: talrijke wijzigingen in de douanetarieven, clandestien grensverkeer van cacao, diamanten ..., oncontroleerbare verplaatsingen van kudden, invoer zonder douaneaangifte om politieke of militaire redenen, de vervoerkosten van een buitenlandse haven tot aan de landsgrens, het gebruik van ramingstabellen voor de deviezenhandel of voor de raming volgens de waarde, zijn enige van de meest bekende en meest beslissende versturende elementen.

Het behoeft dan ook geen verbazing te wekken dat men zich bij de werkzaamheden op het gebied van de economische rekeningen, waarbij de samenhang van de gegevens van het grootste belang is, genoodzaakt ziet de resultaten van de douaneaangiften te herwaarderen, door deze om alle of een deel van de bovengenoemde redenen, met 30 % voor de uitvoer en 20 % voor de invoer te verhogen; deze percentages vormen een gemiddelde van de

nationale rectificaties welke in de laatste jaren van 0 tot 105 % liepen. Het zou dan ook volstrekt illusoir zijn de buitenlandse handel in bijzonderehden weer te geven voor de jaren vóór 1962. Daarom heeft men er de voorkeur aan gegeven alle gegevens over groepen van goederen, welke verder zijn onderverdeeld dan de nomenclatuur met 3 cijfers voor deze periode te laten vervallen. Men hoopt dat de overblijvende globale gegevens enige betekenis zullen behouden en dat de bijzonderheden welke vanaf 1962 worden gegeven geschikt zullen zijn voor een analyse, wanneer dan ook niet nauwkeurig dan toch tenminste aanvaardbaar, ondanks de benaderingen welke deze nog inhoudt.

Dit wil niet zeggen dat men ondanks de grote technische moeilijkheden niet getracht heeft de hier opgenomen gegevens te verbeteren. Eerst moesten de basisgegevens voor bepaalde vroegere periodes worden gereconstitueerd, de vroeger gebruikte registratietekeningen worden teruggevonden, de samenhang tussen alle in de loop van de verschillende jaren gebruikte nationale codes en de posten met 5 cijfers van de huidige CST-code worden vastgesteld en vervolgens de afwijkende resultaten worden opgespoord, individueel geanalyseerd en verbeterd. Het is wel duidelijk dat dit de moeilijkste fase was, omdat het hier ging om een documentatie van ongeveer 2.000.000 kaarten; natuurlijk was hieraan een zeker risico verbonden, maar het moest geschieden om de grofste en meest in het oog lopende fouten te elimineren. Men is hierin geslaagd door het bestuderen van chronologische reeksen van eenheidswaarden voor ieder produkt en men heeft de abnormale resultaten kunnen verbeteren door deze met de andere rapporten van dezelfde reeks of met de in andere landen verkregen eenheidswaarden te vergelijken. Wanneer het om belangrijke produkten ging, kon door een afzonderlijk onderzoek van de globale hoeveelheden en de globale waarden worden vastgesteld welke van de beide gegevens de meeste kans had foutief te zijn, waarbij het gevaar natuurlijk bestond dat er soms overbodige verbeteringen werden aangebracht. In andere gevallen werd het betrokken produkt onder een verzamelpost ondergebracht.

Zo heeft men wezenlijke verbeteringen kunnen aanbrengen in de gepubliceerde gegevens en zij vormen thans een beter bruikbaar instrument van de beschikbare douaneaangiften.

Dit voorwoord kan niet beter worden besloten dan met de laatste paragraaf van een voorwoord bij een soortgelijk document, dat door een Afrikaanse statistische dienst werd gepubliceerd: „Gesteld voor de keuze om ofwel middelmatige en soms zelfs slechte gegevens te verschaffen, ofwel in het geheel niets te doen, hebben wij de eerste oplossing gekozen. De dringende verzoeken van de gebruikers hebben zeker bijgedragen tot het nemen van dit besluit, dat enigszins gewaagd mag worden genoemd. Wij hopen dan ook dat deze publikatie — hoe onvolmaakt ook en bij gebrek aan beter — van enig nut zal zijn”.

Opmerkingen

De invoerwaarden omvatten de kosten van verzekering en vervoer tot de grens van het invoerende land (waarde cif), maar niet de in dit land geheven douanerechten, belastingen of accijnzen, terwijl de uitvoerwaarden de verzekerings- en vervoerkosten tot over de grens van het declarerende land niet omvatten (waarde fob).

De waarden werden uniform uitgedrukt in 1.000 rekeneenheden (1.000 \$) en de hoeveelheden in tonnen, behoudens uitzonderingen welke zijn aangeduid met MT (1.000 ton) in de daartoe bestemde kolom. De produkten zijn gecodeerd volgens de Classificatie voor Statistiek en Tarief (C.S.T.), waarvan de rubrieken met 5 cijfers overeenstemmen met een post van de Naamlijst van Brussel. De post „67, Gietijzer, ijzer en staal” is echter opnieuw gecodeerd om deze aan te passen aan de op dit punt veel minder gedetailleerde statistieken van de Afrikaanse staten en Madagaskar dan de voor de uitvoering van het EGKS-Verdrag nodige gegevens.

De groepen van 3 cijfers blijven onveranderd, behoudens de volgende uitzonderingen :

- 673 — Met inbegrip van CST — 672.32/33/52/53/72/73
 674.12/13/22/23/32/33/82/83
 675.02/03
 677.02/03
- 678 — Met inbegrip van CST — 672.90
 679 — Met inbegrip van CST — 698.91

Buiten post 67 hebben de groepen van 3 cijfers van de CST enige wijzigingen ondergaan, welke onder de benaming van de posten met 5 cijfers in de tabellen zijn vermeld.

Sommige statistische codecijfers van de geassocieerde Afrikaanse staten en Madagaskar zijn in de loop van de periode 1962-1966 gewijzigd en het was niet altijd mogelijk voor de vroegere periodes reeksen op te stellen welke overeenkomen met de definities van de meer recente jaren. Dit gebrek aan overeenstemming is aangeduid met een opmerking onder de naam van het produkt, b.v. :

- 011.10 Rundvlees
 (m.i.v. CST 011.20/30/50 in 1962 en 1963)

Men dient zich voor ogen te houden dat aangezien de intra-UDE handel niet is opgenomen, het handelsverkeer van Tsjad met de andere staten van de Unie hier niet is vermeld; dezelfde opmerking geldt ten aanzien van het handelsverkeer met Kameroen in 1966.

NOTICE

The present booklet is the first part of a retrospective publication on the foreign trade of Madagascar and the African States (AASM) associated with the European Communities. It will be followed by about fifteen similar booklets dealing with the imports and exports of each of these countries; these booklets will together make up Volume I of the work. The second volume will set out the trade of all the AASM in each of the products shown in the Statistical and Tariff Classification for International Trade (CST); it will not be possible to publish this second volume until the first has been completed, since it will be a presentation of the same information viewed from another angle.

The publication of a Yearbook of this kind raises problems of conscience as well as immense technical difficulties.

The former spring from the nature of the data and concern first and foremost the value of the comparisons to which they give rise. From one year to the next, the alterations in structure do not greatly affect such comparisons, but in relationships covering ten years it may well be that the changes which occur in the compilation of customs returns rob any particular calculation of almost all meaning. To be convinced of this, one has only to bear in mind that, during the past decade, most of the countries in question gained their independence, underwent internal upheavals that had a serious effect on their trade, joined customs unions in which most of their foreign trade disappeared, and in some cases left these unions again. Moreover, these political or administrative occurrences have always been accompanied by events more or less closely connected with the way customs departments are run, and changes of this kind have an equally far-reaching effect on the data produced: numerous changes of nomenclature, clandestine cross-frontier traffic in cocoa, diamonds, etc., movements of herds which cannot be checked, the importation of certain goods to which, for political or military reasons, the normal customs procedures do not apply, transfer costs from a foreign port to the national frontier, the various scales applied for calculating the value of foreign currencies or for estimating ad valorem duties — these are among the best known and most influential of the factors that upset the results given by customs returns.

It is therefore not surprising that in economic accounting, where it is of prime importance that the various items of information need to be coherent, it is necessary to re-assess the results shown in customs declarations by adding to them, for some or all of the above-mentioned reasons, further amounts of the order of 30 % for exports and 20 % for imports; these percentages represent

the average of the national corrections, which extend from 0 to 105 % for recent years. For the years before 1962, it would be even more unreliable to present foreign trade in great detail; for this earlier period, then, the Statistical Office has preferred to eliminate all information relating to groups of goods smaller than the 3-figure nomenclature. It is hoped that the general information that remains is nevertheless of some value, and that the details given from 1962 onwards are such as to lend themselves if not to a precise at least to a valid analysis, despite the approximations still involved in such an analysis.

This does not mean that, despite considerable technical difficulties, no attempt has been made to improve the data presented here. To begin with, the basic data for certain earlier periods had to be reconstituted, the registration schemes used in former times had to be found, the correlation between all the national codes used in the different years and the 5-figure headings of the present CST code had to be worked out, and inconsistent results had then to be detected, analysed individually and corrected. Understandably, this was the most difficult stage, since the documents concerned ran to about 2 million items; this task did of course involve some risk but had to be undertaken in order to eliminate the largest and most glaring errors. This was done by examining chronological series of the unit values relating to each product, and abnormal results were rectified by comparison with the other relationships in the same series or by comparison with the unit values produced by other countries. For important products it was possible, by making a separate examination of the overall quantities and values, to determine which of the two items of information was more likely to be incorrect, subject to the risk that unnecessary corrections would sometimes be made. In the other cases, the product in question was transferred to a residual heading.

In this way, all the information put out was improved substantially, so that it now constitutes a more useable part of the available customs returns.

There is perhaps no better way of concluding this notice than by reproducing the final paragraph of the preface to a similar document published by an African statistical office: „Faced with the alternative of providing data of mediocre if not poor quality or else doing nothing, we have opted for the first solution. The urgent requests made by users have played their part in this rather audacious decision. We therefore hope that, imperfect as it may be, and for want of something better, the present publication will be of some use”.

Remarks

The import values include the costs of insurance and transport to the frontier of the importing country (cif value) but not the customs duties, taxes or other charges levied in that country; the export values do not include the costs of insurance or transport beyond the frontier of the country which makes the declaration (fob value).

The values have been uniformly expressed in thousands of units of account (1 u.a. = \$ 1) and the quantities in metric tons, except where MT (= 1 000 metric tons) appears at the head of the column concerned. The products are arranged according to the Statistical and Tariff Classification for International Trade (CST), whose 5-digit items correspond to one item in the Brussels Nomenclature. Division 67, "Iron, pig iron and steel", has however been re-arranged in order to adapt it to the African and Malagasy statistics, which are much more detailed on this point than the data needed for implementation of the ECSC Treaty.

The 3-digit groups remain unchanged, except in the following cases :

| |
|---|
| 678 — including CST 672.90 |
| 679 — including CST 698.91 |
| 673 — including CST 672.32/33/52/53/72/73 |
| 674.12/13/22/23/32/33/82/83 |
| 675.02/03 |
| 677.02/03 |

Apart from heading 67, the 3-digit CST groups have undergone some changes which are pointed out, where necessary, under the description of the 5-digit items in the tables.

Certain of the AASM's national statistical codes were amended during the period 1962-1966, and it has not always been possible, for earlier periods, to re-establish series corresponding to the definitions used in recent years. Attention is drawn to this lack of coherence by a note which appears under the name of the product in question. For example :

| |
|---|
| 011.10 Meat of animals of the bovine species (including CST 011.20/30/50 in 1962 and 1963) |
|---|

It is well to remember that, since trade within the Central African Economic and Customs Union (UDEAC) is not recorded, Chad's trade with the other States of the Union does not figure here; the same applies to trade with Cameroon in 1966.
