

EC TRADE WITH THE ACP STATES AND THE SOUTH MEDITERRANEAN STATES

LES ECHANGES DE LA CE AVEC LES ETATS ACP ET LES ETATS DE LA MEDITERRANEE SUD

EC-ACP TRADE (*)

TRENDS IN THE FIRST HALF OF 1980

Although the growth in imports from third countries slowed down somewhat in value terms for May and June as compared with the corresponding months of last year, the total of 135.8 bn ECU for the Community as a whole for the first six months of the year represented a disturbing increase of 35.6 %. The substantial rise in exports (+ 19 % : 109.5 bn ECU) was therefore insufficient to prevent a sudden deterioration in the trade balance : whilst a deficit of 8.1 bn ECU was recorded for the same period last year, the negative balance amounted to 26.3 bn ECU this year. The deficit for the first six months therefore already exceeds the deficit for the whole of last year (24.0 bn ECU), which was nevertheless considered a record in the Community's history. This development is due not only to the rapid deterioration in the energy balance but also, partly, to the declining rate of exports in May and June.

At the same time the Community's imports from developing countries grew by 44.7 % to reach 57.5 bn ECU. This rise was mainly caused by several increases in the oil price during the last 12 months. As against this, EC imports from the ACP States showed a growth of only 32.7 % and amounted to 9.5 bn EUC, although it must be noted that Nigeria, an important source of oil, is an ACP member. The latter figure represents 16.6 % of all imports from developing countries and 7 % of all extra-EC imports.

TENDANCES POUR LE PREMIER TRIMESTRE 1980

Bien que la croissance des importations en provenance des pays tiers se soit quelque peu ralentie en valeur pour les mois de mai et de juin par rapport aux mois correspondants de l'année dernière, elles ont, pour la Communauté, accusé, au cours des six premiers mois de l'année, une augmentation inquiétante de 35,6 % en atteignant 135,8 Mrds ECU. Aussi la croissance appréciable des exportations (+ 19 % : 109,5 Mrds ECU) n'a-t-elle pu empêcher la soudaine détérioration de la balance commerciale : alors qu'on enregistrait pour la même période de l'année dernière un déficit de 8,1 Mrds ECU, le solde négatif s'élevait cette année à 26,3 Mrds ECU. Le déficit du premier semestre dépasse donc déjà le déficit de l'ensemble de l'année dernière (24,0 Mrds ECU), pourtant considéré comme un record dans l'histoire de la Communauté. Cette évolution est due non seulement à la rapide détérioration de la balance énergétique, mais aussi, entre autres, à la dynamique déclinante des exportations en mai et juin.

En même temps, les importations de la CE en provenance des PVD ont augmenté de 44,7 % pour atteindre 57,5 Mrds ECU. Cette forte augmentation a été principalement provoquée par les accroissements successifs du prix du pétrole durant les douze derniers mois. Par contre, les importations de la CE en provenance des ACP ont progressé de 32,7 % seulement pour atteindre 9,5 Mrds ECU, bien que les ACP ont parmi eux -avec le Nigeria- un des grands exportateurs de pétrole. Les importations en provenance des ACP représentent ainsi 16,6 % des importations en provenance des PVD et 7 % des importations de l'extra-EUR 9.

(*) Données estimées par l'EUROSTAT pour l'UEBL pour laquelle les données nationales ne sont pas encore disponibles pour le mois de juin.

As with imports, EC exports to developing countries (+ 21.5 %) grew faster than the average for all third countries and reached a level of 39.6 bn ECU. As against this, Community's sales to ACP States showed a considerable increase of 40.3 % and amounted to 7.5 bn ECU. The ACP group now accounts for 18.9 % of total sales to developing countries and 6.8 % of total exports to non-EC States.

As a result of the above, the trade balance of the Community with developing countries showed a marked deterioration, from - 7.2 bn ECU for Jan.-June 1979 to - 17.9 bn ECU for the same period in 1980, whereas the balance with the ACP States only worsened by 0.2 to 2.0 bn ECU over the same period.

De même les exportations de la CE vers les PVD ont augmenté plus vite (+ 21,5 %) que l'ensemble des exportations vers les pays tiers et elles s'élèvent à 39,6 Mrds ECU. D'autre part, les ventes de la CE aux ACP ont connu un accroissement considérable de 40,3 % et s'élèvent à 7,5 Mrds ECU. Les ACP comptent maintenant pour 18,9 % des ventes de la Communauté aux PVD et pour 6,8 % des ventes vers l'extra-EUR 9.

En conséquence, la balance commerciale de la Communauté avec les PVD a montré une nette détérioration de - 7,2 Mrds ECU pour janvier-juin 1979 à - 17,9 Mrds ECU pour la même période de 1980, tandis que la balance commerciale avec les ACP est passée de 0,2 à - 2,0 Mrds ECU.
