Foreword

Introduction

Trade statistics - both detailed and global results - have now proved their worth. They are an instrument of prime importance for both public and private users. For instance, they enable Community authorities to prepare multilateral and bilateral negotiations on common trade policy; they help European businesses to carry out market surveys and thus improve their competitiveness; they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with non-member countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

The latest accessions of ten member states in May 2004 and two member states in January 2007 led Eurostat to recalculate its historical series for the European Union to include Bulgaria, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovakia and Slovenia in the EU27 aggregate.

The yearbook on external and intra-European Union trade sets out to provide data on long-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on one hand and between the Member States on the other.

In view of the future enlargements of the European Union and taking into account the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the Union, a description of trade with the candidate countries (chapter 7) and the EFTA countries (chapter 8) is provided.

Statistics on external trade and intra-EU trade at the most detailed classification level are published monthly on DVD-ROM's. They are also available on-line on the Eurostat website.

A code (such as 'TET00018') has been inserted under some tables. This code allows the reader to easily access the most recent data on the Eurostat website by using the "search" function and typing the code. The data on the website is regularly updated and may also be more detailed or have a different measurement unit.

1. Intra-EU trade

Statistics on trade between the Member States are based on Regulation (EC) No 638/2004 of the European Parliament and of the Council (consolidated version) and Commission Regulation (EC) No 1982/2004 (consolidated version). The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Intrastat. Its main features are:

- Monthly statistical declarations sent directly by businesses to the competent national authorities;
- A system of thresholds abolishing all statistical formalities for almost two thirds of businesses;
- A close link with the tax system.

With the introduction of this new system, the comparability of Intra-EU results before and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This is because of some businesses' failure to respond and the introduction of thresholds which exclude the smallest businesses. To correct this under-estimation, which varies

6 according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of Intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- The system of thresholds;
- Late or non-response by certain companies;
- Statistical confidentiality;
- Misapplication of the rules and delays;
- Valuation of transactions – different methods; for calculating dispatches (FOB value) and arrivals (CIF value);
- Triangular trade.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

2. Extra-EU trade

Statistics relating to the trading of goods by the Community and its Member States with non-member countries are based on Regulation (EC) No 471/2009 of the European Parliament and of the Council, Commission Regulation (EC) No 92/2010 and Commission Regulation (EC) No 113/2010.

External trade statistics are usually recorded on the basis of customs declarations submitted by the trader when clearing customs. The Single Administrative Document is used for this purpose. Several Member States use simplified collection procedures (for example, electronic declarations), which do not generally affect the content of the information forwarded to Eurostat.

Methodological notes and sources

1. Data sources

The tables in this publication were compiled by Eurostat using the detailed data forwarded by the Member States, the Candidate Countries and the members of EFTA. Eurostat would like to take the opportunity to thank the departments concerned in those States for their cooperation, which makes it possible to compile these harmonized statistics and guarantee their quality.

Some of the tables of the first chapter describe the development of external trade as declared by the EU's most important trading partners. These tables were compiled from data transmitted each month by the International Monetary Fund.

2. Coverage

2.1. Statistical territory

The statistical territory of the European Union corresponds to the customs territory of the European Union. From 1 January 1997 the statistical territories of France and Spain were modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Reunion) and the Canary Islands.

That modification has led to a growth in intra-EU trade and a reduction in extra-EU trade that amounted to 10.6 billion ecu for exports and 1.6 billion ecu for imports in 1995. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost 9 billion ecu.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories that are not part of the EU customs territory.

2.2. Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable goods recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control are also regarded as arrivals or dispatches. Consequently, statistics on trade between the Member States do not cover goods in transit. Maintenance and repair trade was included up to December 2004.

2.3. Extra-EU trade

Statistics on trade with third countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *Imports* are goods which enter the statistical territory of the European Union from a third country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), inward processing or processing under customs control immediately or after bonded warehousing;
- *Exports* are goods which leave the statistical territory of the European Union for a third country after being placed under the customs procedure for exports (definitive export) or outward processing or following inward processing.

Statistics on trade with third countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures. Maintenance and repair trade was included up to December 2005.

The field covered by statistics on trade with third countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception of goods in transit. Goods placed in bonded warehouses and exports of goods after bonded warehousing are included in the definition of general trade.

3. Statistical data

3.1. Trading partners: countries and economic areas

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), *the country* (or Member State) of *final destination* of the goods is the partner country.

The trading partner in the case of an Intra-European Union arrival is always the *country of consignment* of the goods, even when the goods originate in third countries and have been placed in free circulation in the country of consignment. For imports (Extra-EU trade) the statistics show, except in certain cases (returned goods, works of art, etc.), *the country of origin*. Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

3.2. *Goods classification*

The most detailed results published by Eurostat are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonized System (HS) and comprises around 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 4 since 2007) by means of conversion tables drawn up by Eurostat on the basis of the CN.

3.3. *Estimate of the statistical value*

Although the data are collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in euros. The Annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only. Annual values are equal to the sum of monthly values expressed in euros.

3.3.1. *Intra-European Union trade*

The statistical value is based on the assessment basis for taxation purposes or the transaction value of the goods. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and insurance) which relate, for dispatches, to the journey within the territory of the Member State from which the goods are dispatched and, for arrivals, to the journey outside the territory of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for outside processing, it is always the total value of the goods that is recorded and not simply the added value.

3.3.2. *Extra-European Union trade*

The statistical value is based on the customs value or, failing that, the transaction value of the goods. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for outside processing, it is always the total value of the goods that is recorded and not simply the added value.

3.4. *Statistical secrecy*

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimize the effect of these headings on the results; therefore trade data under these headings are included at higher levels of aggregation and in totals. In particular, the TOTAL trade with a specific partner includes the confidential trade with that partner, while the breakdown by product is available only for the non-confidential trade with that partner, the difference being attributed to a "not specified" partner (codes QY and QZ of the Geonomenclature); this remark applies in particular to table 2C.

4. Indices

4.1. Introduction

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis.

4.2. Methodology

The data transmitted for external trade and Intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators.

The computer programs contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices.

Three rules are applied to exclude unlikely price behavior. The first one consists in excluding the products for which historical data have not shown a significant correlation between the trade values and the quantities. The second rule is based on the hypothesis that, given the general level of inflation, the price of a product can not vary significantly from one year to another. The third rule - which is more restrictive - is that the change in the price of a product compared with the closest month available will not differ significantly from the average change in the price of similar products. The application of these rules prevents extreme changes due to factors unrelated to prices which, otherwise, would lead to a distortion of the unit value index. For products whose unit values are rejected, the changes are drawn up according to those of similar products.

TET00018

Source : IMF, EUROSTAT-COMEXT (EU)

(*) From 1958 to 1970 included, the convention is 1 ECU = 1 US\$.

(1) World trade is the sum of EU (evolutive) trade with extra-EU countries and extra-EU trade with the world.

(2) Evolutive EU trade with extra-evolutive EU countries

Evolutive EU is : EU6 (1958-1972), EU9 (1973-1980), EU10 (1981-1985), EU12 (1986-1994), EU15 (1995-2003), EU25 (2004-2006), EU27 (2007-...)

(3) Relates to the external trade of the USSR until 1991 and from 1992 to the external trade of Russia.

TRENDS IN WORLD TRADE

TET00018

Source : IMF, EUROSTAT-COMEXT (EU)

(*) From 1958 to 1970 included, the convention is 1 ECU = 1 US\$.

(1) World trade is the sum of EU (evolutive) trade with extra-EU countries and extra-EU trade with the world.

(2) Evolutive EU trade with extra-evolutive EU countries

Evolutive EU is : EU6 (1958-1972), EU9 (1973-1980), EU10 (1981-1985), EU12 (1986-1994), EU15 (1995-2003), EU25(2004-2006), EU27 (2007-...)

(3) Relates to the external trade of the USSR until 1991 and from 1992 to the external trade of Russia.

TRENDS IN WORLD TRADE

1A

IMPORTS

| Main countries in 2010 sorted on the basis of their total trade (exports + imports) | | | | | | | | | | | | | Year |

TET00001 - TET00028

(1) Cover rate is the export value index divided by the import value index.

(2) Volume ratio is the export volume index divided by the import volume index.

(3) Terms of trade is the unit value export index divided by the unit value import index.

3

Extra-EU trade by product

(*) The exchange rates of the euro area are fixed since 1999, for Greece since 2001, for Slovenia since 2007, for Cyprus and Malta since 2008, for Slovakia since 2009, for Estonia since 2011.

(1) Montenegro adopted the euro as its official currency since 2002.

PRODUCT LIST : SITC REV. 4

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and furskins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool) and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

- 61 Leather, leather manufacture, n.e.s, and dressed furskins
- 62 Rubber manufactures, n.e.s
- 63 Cork and wood manufactures (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

PRODUCT LIST : SITC REV.4

7 Machinery and transport equipment

- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metalworking machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound-recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s, and electrical parts thereof (including non-electrical counterparts n.e.s, of electrical household-type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 96 Coin (other than gold coin), not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
