Preface

This publication contains a brief analysis of Community trade with third countries from 1963 to 1979.

The study is divided into four parts. The first places the Community within the context of world trade and gives a general outline of the development of its share of the market in relation to its major partners and competitors.

The second part presents a more detailed analysis of the development and structure of the Community's foreign trade since 1963. Trade is analysed by broad economic categories (BEC), the composition of which is explained in Annex I and by main partners, consisting either of individual countries or groups of countries.

The third part outlines the major trends in the trade of each Member State, and the fourth part compares the development of exports to third countries both by Member State and between the Community, the United States, Japan and the other industrialized countries. In this final part, partner countries are grouped into homogeneous geographical zones representing export markets for Community products.

The study is supplemented by a comprehensive statistical annex comprising the following statistics. Firstly, a series of tables shows the development of overall Community trade for each of the 30 BECs and by main countries or groups of countries (Table A).

Next, a second series of tables shows the trade developments of the EC, the Member States, the USA, Japan and all the industrialized countries for 16 BECs (Tables B and C).

A third series of tables shows the comparative trade development of the Member States of the EC for each of the main partner countries or groups of countries and the 30 BECs (Table D).

A fourth series of tables shows the comparative trade development of the EC, the USA, Japan and all the industrialized countries for each of the main partner countries or groups of countries and the 30 BECs (Table E).

Préface

Cette publication présente une brève analyse des échanges de la Communauté avec les pays tiers de 1963 à 1979.

L'étude est divisée en quatre parties. La première a pour but de situer la Communauté dans le cadre des échanges mondiaux et de fournir un aperçu général de l'évolution de sa part de marché par rapport notamment à ses grands partenaires/concurrents.

La deuxième partie présente une analyse plus approfondie de l'évolution et de la structure du commerce extérieur de la Communauté depuis 1963. Les échanges sont analysés par grandes catégories économiques (GCE) dont la composition est expliquée dans l'annexe, et par principaux partenaires, qu'il s'agisse de pays ou de regroupements de pays.

Un aperçu des principales tendances des échanges par pays membres est fourni dans la troisième partie. La quatrième partie présente une comparaison de l'évolution des exportations vers les pays tiers d'une part, par État membre et, d'autre part, entre la Communauté, les États-Unis, le Japon et les autres pays industrialisés. Dans cette dernière partie, les pays partenaires sont regroupés en zones géographiques homogènes qui représentent des marchés d'exportation pour les produits communautaires.

L'étude est complétée par une importante annexe statistique qui comporte les statistiques suivantes. En premier lieu, une série de tableaux présente l'évolution des échanges de la Communauté dans son ensemble pour chacune des 30 GCE et par principaux pays ou regroupements de pays (tableau A).

Ensuite, une deuxième série de tableaux montre l'évolution des échanges de la CE, des pays membres, des États-Unis, du Japon et de l'ensemble des pays industrialisés pour 16 GCE et par marché d'approvisionnement et de vente (tableaux B et C).

Une troisième série de tableaux analyse l'évolution comparée par grandes catégories économiques des échanges des pays membres de la CE sur les principaux marchés (tableau D).

Une quatrième série de tableaux présente l'évolution comparée des échanges de la CE, des États-Unis, du Japon et de l'ensemble des pays industrialisés pour chacun des principaux pays ou regroupements de pays et les 30 GCE (tableau E).

A final series of tables shows, for the Community, Japan, the USA and other industrialized countries the distribution of trade, by broad economic category, with each principal market (Table F).

This study was prepared by Mr Jensen and Mr Wittenberg under the direction of Mr De Michelis, the Head of the 'Analyses and developments' service.

Une dernière série de tableaux montre pour la Communauté, le Japon, les États-Unis et les autres pays industrialisés, la distribution du commerce, par grandes catégories économiques, avec chaque partenaire principal (tableau F).

Cette étude a été préparée par MM. Jensen et Wittenberg, sous la direction de M. De Michelis, chef du service «Analyses et Développements».

SOURCES AND GENERAL REMARKS

The user's attention is drawn to a number of points intended to ensure a more accurate interpretation of the results and statistics published in this study.

1. The *first* point concerns the source of the statistics. Unless otherwise stated at the foot of the tables, the statistics are those contained in the data-bank established in Geneva by the GATT on the basis of the UNO statistics and amended by Eurostat.

For the 'Community' the statistics are not therefore the trade statistics, harmonized as regards concepts and methods, regularly published by Eurostat, but the sum of the foreign trade data compiled by the statistical institutes of the Member States in accordance with national concepts and regularly transmitted to international organizations. The main differences lie in the determination of the origin or source of the products.

In addition, for three Member States (United Kingdom, Ireland and Denmark), the statistics contained in the data-bank at Geneva relate to general trade, whereas the statistics of the other Member States relate to special trade⁽¹⁾.

These factors result in differences between the statistics presented in this publication and those drawn up by Eurostat and published in the form of foreign trade microfiches, bulletins or yearbooks (red series).

The reasons for presenting non-harmonized statistics in this study are threefold; the first concerns the length of the series: the use of harmonized concepts in drawing up trade statistics is a recent development, particularly for the new Member States. In this publication we have studied the developments in Community trade since 1963. To ensure consistency in chronological analysis it was deemed preferable to adopt the series drawn up by the Member States in accordance with the same concepts from the first reference year until 1979.

SOURCES ET OBSERVATIONS GÉNÉRALES

L'attention de l'utilisateur est attirée sur un certain nombre de points destinés à une meilleure interprétation des résultats et des statistiques publiées dans cette étude.

1. Le *premier* point concerne la source des statistiques utilisée dans l'étude. Sauf exception expressément signalée au bas des tableaux, il s'agit des statistiques contenues dans la banque de données mise en place à Genève par le GATT sur la base des statistiques ONU et modifiée par l'Eurostat.

Pour la «Communauté», il ne s'agit donc pas des statistiques des échanges harmonisées sur le plan des concepts et des méthodes habituellement publiées par l'Eurostat, mais par la somme des données du commerce extérieur que les instituts des États membres élaborent suivant des concepts nationaux et qu'ils communiquent habituellement aux organisations internationales. Les principales différences portent sur la détermination de l'origine ou de la provenance des produits.

En outre, pour trois pays membres (Royaume-Uni, Irlande et Danemark), les statistiques reprises dans la banque de données de Genève se réfèrent au commerce général, alors que celles des autres pays membres se rapportent au commerce spécial⁽¹⁾.

Tout ceci conduit à des différences entre les statistiques présentées dans cette publication et celles élaborées par l'Eurostat et publiées sous forme de microfiches, bulletins ou annuaires du commerce extérieur (série rouge).

Les raisons pour lesquelles nous présentons dans cette étude des statistiques non harmonisées sont de trois ordres; la première se rapporte à la longueur des séries: les élaborations de statistiques commerciales suivant des concepts harmonisés est un fait récent, notamment pour les nouveaux pays membres. Dans cette publication, nous avons étudié l'évolution du commerce de la Communauté pendant un certain nombre d'années depuis 1963. Pour assurer une cohérence dans l'analyse temporelle, il a été préférable de reprendre les séries élaborées par les États membres suivant les mêmes concepts depuis la première année de référence jusqu'en 1979.

⁽¹⁾ This is true for the statistics published by all international organizations (UNO, OECD, IMF, etc.) apart from the Community

⁽¹⁾ Ceci est vrai pour les statistiques publiées par toutes les organisations internationales (ONU, OCDE, FMI, etc.) à l'exception de la Communauté

The second reason also concerns the length of the series, but from the point of view of consistency of nomenclatures. The Geneva data-bank was the only one available which enabled us to follow all products identified by the same code number (SITC Rev. 1) from 1963 to 1979. Harmonized Community statistics are available for certain Member States in the SITC Rev. 1 up to 1976 and in the SITC Rev. 2 from 1977. The two nomenclatures are not directly interchangeable. We were thus able to group the products in BEC on the basis of a consistent nomenclature since 1963.

The third reason concerns the availability of data for international comparison. The study presents statistics comparing the trade of the EC, the United States, Japan and the other industrialized countries of the OECD. Such comparison can be made only on the basis of a common unit of currency, in this case the dollar. Despite some gaps, the Geneva data-bank contains the information which allowed us to make these comparisons.

2. The *second* point concerns comparisons between countries or zones and the type of trade covered by the statistics used. As we said earlier, the study presents series comparing the trade developments of the EC, the United States, Japan and the other industrialized countries of the OECD. The problems relating to the Community were mentioned earlier. However, it must be pointed out that the tables showing Community trade with the world do not include trade between the Member States. The tables therefore cover only trade with third countries, which is normally called 'extra-EC trade'.

Moreover, when comparing zones or countries the following facts should be borne in mind:

(1) The data for the United States and Japan relate to general trade, whereas those for the zone 'Other industrialized countries' relate to general trade for certain countries (Australia, Norway, Canada, Finland, New Zealand) and to special trade for others (Austria, Iceland, Sweden, Switzerland, Turkey, Greece, Spain and Portugal).

(2) Imports are valued on a cif basis for the following countries: the EC, Greece, Spain, Portugal, Austria, Iceland, New Zealand, Sweden, Switzerland, Finland, Norway and Turkey; and on an fob basis for Australia, Canada and the USA.⁽¹⁾ This may result in distortions in comparative analyses.

(3) Comparisons are in current US dollars,⁽²⁾ since it was not possible to compile statistics at constant prices by zones from 1963. Consequently, certain trends are the result of a devaluation or revaluation in

La deuxième raison concerne toujours la longueur des séries mais du point de vue de la cohérence des nomenclatures. La banque de données de Genève était la seule disponible par l'Office à nous permettre de suivre tous les produits identifiés par un même numéro de code (la CTCl rév. 1) depuis 1963 à 1979. En effet, les statistiques communautaires harmonisées sont disponibles pour certains pays membres en CTCl rév. 1 jusqu'en 1976 et en CTCl rév. 2 depuis 1977. Les deux nomenclatures ne sont pas directement transposables. Ceci nous a permis d'agréger les produits en grandes catégories économiques à partir d'une nomenclature cohérente depuis 1963.

La troisième raison tient à la disponibilité des données pour les comparaisons internationales. L'étude présente des statistiques comparant les échanges de la CE, des États-Unis, du Japon et des autres pays industrialisés de l'OCDE. Cette comparaison ne peut s'effectuer que sur la base d'une unité monétaire commune, dans ce cas le dollar. Or la banque de données de Genève, malgré quelques lacunes, contient les informations qui nous ont permis de procéder à ces comparaisons.

2. Le *deuxième* point concerne les comparaisons entre pays ou zones et le type de commerce couvert par les statistiques utilisées. Comme nous l'avons dit précédemment, l'étude présente des séries comparant l'évolution des échanges entre la CE, les États-Unis, le Japon et les autres pays industrialisés de l'OCDE. Les problèmes relatifs à la Communauté ont été mentionnés précédemment. Il faut toutefois préciser que dans les tableaux lorsqu'on considère le commerce communautaire avec le monde, les échanges entre les États membres sont exclus. Il ne s'agit donc que du commerce avec les pays tiers, qui est normalement appelé «commerce extra-CE».

Par ailleurs, lorsqu'on compare les zones ou pays, il faut tenir compte des faits suivants:

1) Les données des États-Unis et du Japon concernent le commerce général, alors que pour la zone «autres pays industrialisés», il s'agit pour certains pays du commerce général (Australie, Norvège, Canada, Finlande, Nouvelle-Zélande), et pour d'autres du commerce spécial (Autriche, Islande, Suède, Suisse, Turquie, Grèce, Espagne et Portugal).

2) Les importations sont évaluées caf pour les pays suivants: la CE, la Grèce, l'Espagne, le Portugal, l'Autriche, l'Islande, la Nouvelle-Zélande, la Suède, la Suisse, la Finlande, la Norvège, la Turquie, et fob pour l'Australie, le Canada, les États-Unis,⁽¹⁾ ce qui peut provoquer une distorsion dans l'analyse comparée.

3) Comme il n'était pas possible d'élaborer des statistiques à prix constants par zones depuis 1965, les comparaisons s'effectuant en US dollars courants⁽²⁾, certaines évolutions sont plutôt le fait d'une dévalua-

⁽¹⁾ For the USA, cif from 1978.

⁽²⁾ The exchange rates used for conversion from national currency units are those calculated by the UN Statistical Office, published in the *Monthly Bulletin of Statistics*.

⁽¹⁾ Pour les États-Unis, caf à partir de 1978.

⁽²⁾ Le taux de change utilisé pour la conversion des unités monétaires nationales est celui calculé par le bureau statistique des Nations unies, publié dans leur Bulletin mensuel de statistique.

relation to the dollar rather than of a decrease or increase in trade.

In view of all these (unfortunately avoidable) methodological differences any comparisons of data should be treated with caution. One country's trade may be over-estimated in relation to that of another, or trade may be shown to have increased in value without having increased correspondingly in volume. A more detailed study will be conducted at a later date.

3. The *third* point concerns aggregation of reporter countries and partner countries. In this study we have adopted the following criteria for grouping countries:

(1) *Reporting countries*: the only groupings relating to reporting countries are those of the Community countries and the other industrialized countries, with the exclusion of the USA, Japan and EC. This latter zone therefore comprises Australia, New Zealand, Canada, Spain, Greece, Portugal, Norway, Finland, Iceland, Sweden, Austria, Switzerland and Turkey. Finally, the zone 'Total industrialized countries' includes the data of the EC, the USA, Japan and the other above-mentioned countries.

(2) *Partner countries*: when the zones involved are classic economic zones as used in the foreign trade statistics of the Community, such as 'Western industrialized countries', 'Developing countries' and 'State-trading countries' we have adhered strictly to the composition given in the Eurostat Géonomenclature. This definition differs from that used by other international organizations such as the UNO, the OECD, the World Bank, etc., which, moreover, also differ among themselves.

(3) When the zones involved are geographical and economic zones not appearing in the foreign trade statistics of the Community, we have chosen those which seem to us to meet our analytical objectives best and which are usually used in studies of international trade. Thus, in certain tables we have selected, from within the zones normally used, a number of countries or groups of countries which play an important part in world trade, and in particular Community trade. In other tables we have chosen to group countries into geographic zones representing relatively homogeneous penetration and supply markets which enable comparative analyses to be made between the Community and its main competitors: the United States and Japan.

The different groupings are listed in Annexes II, III and IV.

4. The *fourth* and final point concerns the grouping of products in this study. We have followed the Classification by Broad Economic Categories, which was established by the Statistical Office of the United Nations

ou d'une réévaluation par rapport à la monnaie américaine que d'une diminution ou d'un accroissement des échanges.

Toutes ces différences méthodologiques, malheureusement inévitables, doivent inciter à la prudence lorsqu'on compare les données. Le commerce d'un pays peut être surévalué par rapport à un autre ou présenter des évolutions en valeurs qui ne correspondent pas à des évolutions en volume. Une étude plus approfondie sera conduite ultérieurement.

3. Le *troisième* point concerne les agrégations des pays déclarants et des pays partenaires. Dans cette étude, nous avons suivi, pour le regroupement des pays, les critères suivants:

1) *Pays déclarants*: les seules agrégations relatives aux pays déclarants sont celles des pays de la Communauté et des autres pays industrialisés, à l'exclusion des États-Unis, du Japon et de la CE. Cette dernière zone regroupe donc l'Australie, la Nouvelle-Zélande, le Canada, l'Espagne, la Grèce, le Portugal, la Norvège, la Finlande, l'Islande, la Suède, l'Autriche, la Suisse et la Turquie. Enfin, la zone «Total pays industrialisés» reprend les données de la CE, des États-Unis, du Japon et des autres pays cités précédemment.

2) *Pays partenaires*: lorsqu'il s'agissait de zones économiques classiques figurant dans les statistiques du commerce extérieur de la Communauté comme «pays industrialisés occidentaux», «pays en voie de développement» et «pays à commerce d'État», nous nous sommes tenus strictement à la composition donnée par la Géonomenclature de l'Eurostat. Cette définition diffère de celle utilisée par d'autres organisations internationales comme l'ONU, l'OCDE, la Banque mondiale, etc., qui d'ailleurs diffèrent également entre elles.

3) Lorsqu'il s'agissait de zones géographiques et économiques ne figurant pas dans les statistiques du commerce extérieur de la Communauté, nous avons choisi celles qui nous paraissaient répondre le mieux aux objectifs de l'analyse que nous nous étions proposés et qui sont, le plus souvent, utilisés dans le cadre des études sur le commerce international. C'est ainsi que, dans certains tableaux, nous avons sélectionné à l'intérieur des zones habituellement utilisées un certain nombre de pays ou regroupements de pays qui jouent un rôle important dans le commerce mondial, et en particulier dans celui de la Communauté. Dans d'autres tableaux, nous avons choisi de regrouper les pays en zones géographiques représentant des marchés de pénétration et d'approvisionnement relativement homogènes qui permettent des analyses comparatives entre la Communauté et ses principaux concurrents: les États-Unis et le Japon.

Les différents regroupements sont fournis aux annexes II, III et IV.

4. Un *quatrième* et dernier point concerne les regroupements de produits repris dans l'étude. Il s'agit de la Classification par grandes catégories économiques, établie par le bureau statistique des Nations unies,

to enable trade to be studied in terms of 'meaningful aggregates for the purpose of economic analysis of the uses to which goods are put, based on the SNA concepts'. A fuller understanding of this Classification can be obtained by reading the document 'Classification by Broad Economic Categories', Statistical Papers — Series M 53 and 53 rev. published by the Statistical Office of the United Nations. These publications provide a methodological description of the Classification and its connection with the headings of SITC Rev. 1 (Series M 53) and SITC Rev. 2 (Series M 53 Rev.). The correspondence between the BEC classification and the SITC Rev. 1 is given in Annex I, p. 637.

Section 1 — The position of the Community in world trade

Section 1 — La Communauté dans le cadre du commerce mondial

1.1 COMPARATIVE DEVELOPMENT OF COMMUNITY TRADE

In terms of exports and disregarding intra-Community trade, world trade increased almost tenfold, at current values, from \$133 800 million to \$1 323 400 million over the period 1963-79. In the case of the other Western industrialized countries⁽¹⁾, the expansion factor was slightly lower (9.2) as a result of the relatively weak development of the USA's share in world trade, which expanded by a factor of only 7.9. The expansion in Community trade (9.4) was slightly above the average for the Western industrialized countries, but nevertheless noticeably lower than the overall world average. Japan achieved a remarkable degree of expansion (18.7). However, it must be borne in mind that the volume of Japanese exports at the beginning of the reference period was very small, as can clearly be seen from the figures for the two sub-periods 1963-70 and 1970-79. While Japan's growth rate was almost double that of the Community and the USA or the average of all the Western industrialized countries during the first sub-period, during the second sub-period the expansion factor admittedly remained one point and half a point above that of the USA and the Community, but was nevertheless only slightly higher than the average for the Western industrialized countries. Increasing industrialization and integration into the world market has made it more difficult for Japan too to maintain its relatively high growth-rate in international trade:

1.1 ÉTUDE COMPARATIVE DE L'ÉVOLUTION DU COMMERCE DE LA CE

Sur la base des exportations et sans tenir compte du commerce intracommunautaire, les échanges mondiaux ont presque décuplé en valeurs courantes, entre 1963 et 1979, passant de 133,8 à 1 323,4 milliards de dollars. L'expansion du commerce des pays industrialisés occidentaux⁽¹⁾ a été moins importante (9,2) en raison de l'évolution relativement faible du commerce mondial des États-Unis dont le facteur de multiplication n'a été que de 7,9. Par rapport à la moyenne des pays industrialisés occidentaux, le facteur d'expansion de la Communauté est légèrement plus élevé (9,4) mais il reste sensiblement inférieur à la moyenne globale mondiale. Le Japon a atteint un résultat remarquable (18,7) mais il ne faut pas oublier que le niveau de départ était relativement faible. Ce phénomène ressort très clairement de l'analyse des deux périodes 1963-70 et 1970-79. Au cours de la première période, le Japon enregistrait un taux de croissance presque deux fois supérieur à celui de la CE, des États-Unis et à la moyenne de tous les pays industrialisés occidentaux. Au cours de la deuxième période, ce facteur était encore d'un point et d'un demi-point supérieur à celui des États-Unis et de la CE mais tout juste supérieur à la moyenne des pays industrialisés occidentaux. Avec une industrialisation croissante et une intégration de plus en plus forte dans le marché mondial, il a été plus difficile au Japon également de maintenir son rythme de croissance relativement élevé dans le commerce international:

Tab. 1.1.1 Growth factors in world trade
Facteurs de croissance dans le commerce mondial

| Period Période | World Monde | Other industrialized countries Autres pays industr. | EC CE | USA États-Unis | Japan Japon |
|-------------------|----------------|--|----------|-------------------|----------------|
| 1979/1963 | 9,9 | 9,2 | 9,4 | 7,9 | 18,7 |
| 1979/1970 | 5,2 | 4,6 | 4,8 | 4,2 | 5,3 |
| 1970/1963 | 1,9 | 2,0 | 2,0 | 1,9 | 3,5 |

⁽¹⁾ See Table 1.3.1 for the absolute trade figures.

⁽¹⁾ Pour les données absolues du commerce, voir tableau 1.3.1.

If we consider only the three main competitors, i.e. the European Community, the USA and Japan, we see that their high growth-rates result primarily from their trade with the OPEC countries and the State-trading countries. This is true for both periods in the case of the latter group, whereas in the case of the OPEC countries, the increase over the period 1963-70 was certainly higher than for the other developing countries but did not exceed the total average for any of the three competitors, and remained considerably lower than the factors for trade with the Western industrialized countries as a whole. Trade integration between the major industrialized nations emerged as a powerful economic driving force around this time. The period 1970-79 shows a completely different picture. The increase in trade with the developing countries was more or less average, whereas the increase with the Western industrialized countries remained substantially below the average figure and, in the case of trade with OPEC countries, the factors were sometimes more than twice those relating to trade with the world as a whole. In this period too, there was an exceptionally rapid increase in exports to State-trading countries, although this lagged far behind the increase in trade with the industrialized countries:

Si l'on observe seulement les trois concurrents principaux: CE, États-Unis et Japon, on remarque que les taux de croissance sont élevés, surtout pour les échanges avec les pays de l'OPEP et les pays à commerce d'État. Pour le dernier groupe nommé, cette remarque vaut pour les deux périodes. En ce qui concerne les pays de l'OPEP, la progression 1963-70 est certes restée supérieure à celle des pays en voie de développement mais n'a dépassé, chez aucun des trois concurrents, la moyenne globale et est restée sensiblement inférieure aux facteurs des échanges avec les pays industrialisés occidentaux dans leur ensemble. Pour cette période, l'intégration commerciale entre les grandes nations industrialisées s'est révélée être un moteur économique puissant. Le tableau est tout autre pour la période 1970-79. Les échanges avec les pays en voie de développement ont en moyenne plus ou moins augmenté; ceux avec les pays industrialisés occidentaux sont restés nettement inférieurs à la moyenne; quant aux échanges avec les pays de l'OPEP, les facteurs de progression ont été parfois plus du double de ceux des échanges avec l'ensemble du monde. Au cours de cette période également, les exportations vers les pays à commerce d'État se sont développées extraordinairement vite, bien qu'elles soient restées largement en deçà de la croissance des exportations vers les pays industrialisés:

1.2 THE SHARE OF THE EUROPEAN COMMUNITY AND MAJOR TRADING COMPETITORS IN WORLD TRADE⁽¹⁾

In terms of current export values, the European Community's share in world trade has been steadily decreasing since the beginning of the 1960s. This can be seen from the fact that in 1963 the nine Member States accounted for some 24% of world trade, whereas by 1970 this figure had fallen to 21.9% and by 1979 to 20.1%. The USA's share of the market has dropped even more sharply, particularly in the 1970s, i.e. from 1963 to 1970 it fell by only 0.6 points, but subsequently dropped by a further 3 points to 13.7% by 1979 (see Table 1.2.1).

⁽¹⁾ Extra-EC.

1.2 PART DE LA CE ET DES PRINCIPAUX CONCURRENTS DANS LE COMMERCE MONDIAL⁽¹⁾

Depuis le début des années 60, la part de la CE dans le commerce mondial — sur la base des valeurs courantes des exportations — a constamment régressé. Ainsi, les neuf États membres de la Communauté représentaient 24 % environ du commerce mondial en 1963. En 1970, cette part n'était déjà plus que de 21,9 % et de 20,1 % en 1979. La part des États-Unis a plus fortement régressé encore, en particulier au cours des années 70: de 1963 à 1970, elle n'avait diminué que de 0,6 %, mais de 1970 à 1979, elle a encore diminué de 3 % tombant à 13,7 % (voir tableau 1.2.1).

⁽¹⁾ Extra-CE.

The other Western industrialized countries (excluding Japan and South Africa) succeeded in increasing their share from 16.9% to 19.4% between 1963 and 1970, but by 1979 this figure had fallen to 15.2%, i.e. even less than the figure for 1963.

As a result of its rapid general industrialization and its tenacious construction and expansion of export industries, an active export policy and various competitive advantages, Japan was able to achieve a noticeable improvement in its position on the world market, particularly during the 1960s. Between 1963 and 1970, its share of the market rose by 3.5 points to 7.6%, which represented a virtual doubling. Up to 1978 it increased further to 9.2% but then dropped back to 7.8% in 1979.

Les autres pays industrialisés de l'Ouest (Japon et Afrique du Sud non compris) ont pu accroître leur part de 16,9 à 19,4% entre 1963 et 1970, mais en 1979, avec 15,2% celle-ci était encore inférieure au chiffre de 1963.

Grâce à son industrialisation générale rapide, à l'organisation et au développement rationnels des industries exportatrices, à une politique d'exportation active et à différents avantages dans le domaine de la concurrence, le Japon a pu, surtout dans les années 60, améliorer sensiblement sa position sur le marché mondial. De 1963 à 1970, sa part a augmenté de 3,5 points pour atteindre 7,6% et a donc ainsi pratiquement doublé. En 1978, elle atteignait 9,2% pour retomber à 7,8% en 1979.

Tab. 1.2.1 Development of the shares of major exporters in World trade⁽¹⁾
Évolution de la part des principaux exportateurs dans le commerce mondial⁽¹⁾

| Origin | 1963 | 1970 | 1973 | 1974 | 1978 | 1979 | Origine |

⁽¹⁾ Excluding intra-Community trade.
Non compris les échanges intracommunautaires.

The overall picture as regards developments in the share of trade is that the industrialized countries steadily increased their share from 1963 to 1970 particularly as a result of increased exports on the part of Japan and other OECD countries. This trend continued until 1972 after which, with the rise in oil prices, the share of the industrialized countries began to fall in most cases. In 1973, only the USA managed to improve its position, compared with the previous year by 0.5 points. In 1974, the year of the sharpest increase in oil prices, the industrialized countries' share in world trade fell to a minimum since, although there had been a nominal 51% increase in the total volume of world trade compared with 1973, only 57.7% of the goods in question came from the Western industrialized countries as against 64% in 1973. Over the same period, the share of the developing countries rose from 23.7% to 32.2%. However, it was exclusively the OPEC countries which were responsible for this increase by doubling their quota from 9% to 18%. This was accompanied by a drop in the share of the other developing countries from 14.7% to 14.2% in spite of the fact that some of them are also oil exporters (e.g. Mexico, Oman, Bahrain, Colombia, Brunei, etc.).

The share of the Eastern bloc also fell from 12.4% to 10.2% at this time.

Ce qui caractérise l'évolution des échanges est l'augmentation constante de la part des pays industrialisés de 1963 à 1970, en particulier du fait des exportations accrues du Japon et d'autres pays de l'OCDE. Cette tendance s'est encore poursuivie jusqu'en 1972. Puis, la part des États industrialisés a commencé à diminuer du fait de l'augmentation des prix du pétrole. En 1973, seuls les États-Unis ont amélioré leur position de 0,5 point par rapport à l'année précédente. En 1974, année où les prix du pétrole ont le plus fortement progressé, la part des États industrialisés est tombée au plus bas: on enregistre certes une progression nominale du commerce mondial de 51% par rapport à 1973, mais les États industrialisés occidentaux ne fournissent plus ensemble que 57,7% des produits commercialisés contre 64% en 1973. Pendant la même période, la part des pays en voie de développement est passée de 23,7 à 32,2%, mais cet accroissement est exclusivement le fait des pays de l'OPEP qui ont doublé leur part (de 9 à 18%). Ainsi, la part des autres pays en voie de développement est passée de 14,7 à 14,2% bien qu'il se trouve également parmi eux des pays exportateurs de pétrole (Mexique, Oman, Bahreïn, Colombie, Brunei, etc.).

Simultanément, la part du bloc oriental est tombée de 12,4 à 10,2%.

These developments reached a turning-point as early as 1975. Increased revenue from oil exports enabled the OPEC countries to increase their imports from the Western industrialized countries, which led to an increase in the Western countries' share in world trade and to a swift rise in the share of the OPEC countries in the exports of the Western industrialized countries to developing countries, which reached a peak in 1977 of 39.2% and in the case of the European Community, 47.5%.

Dès 1975, un tournant s'est opéré dans cette évolution. Grâce aux recettes croissantes provenant des exportations de pétrole, les pays de l'OPEP ont intensifié leurs achats auprès des États industrialisés occidentaux. Il en est résulté, d'une part, une augmentation de la part de ces derniers dans le commerce mondial et, d'autre part, un accroissement rapide de la part des pays de l'OPEP dans les exportations des États industrialisés occidentaux vers les pays en voie de développement, part qui a atteint en 1977 (année record) 39,2% et 47,5% pour la CE.

Tab. 1.2.2 Development of the share of the OPEC countries in exports from other industrialized countries and the European Community to all developing countries

Évolution de la part des pays de l'OPEP dans les exportations des pays industrialisés, dont la CE, vers tous les pays en voie de développement

| | Exports from Exportations | | | |

| | Developing countries in \$ million Pays en voie de développement en millions de \$ | OPEC share in % Part des pays de l'OPEP en % | Developing countries in \$ million Pays en voie de développement en millions de \$ | OPEC share in % Part des pays de l'OPEP en % |
| 1963 | 23 030 | 16,5 | 9 596 | 21,9 |
| 1970 | 41 940 | 18,4 | 15 832 | 24,3 |
| 1973 | 73 744 | 22,0 | 27 357 | 29,4 |
| 1974 | 113 802 | 25,5 | 41 516 | 32,4 |
| 1978 | 208 457 | 38,4 | 84 681 | 46,8 |
| 1979 | 236 119 | 32,9 | 95 148 | 41,1 |

1979 saw the beginning of a consolidation of the purchasing pattern of the OPEC countries. This trend was further emphasized by the reduction in trade with Iran resulting from the political situation in that country. This development particularly affected Japan, which not only failed to achieve more than a slight increase in its trade with developing countries but was also encountering problems with its sales to North America. On the other hand, there was an above-average increase in its exports to the European Community. Overall, however, its share in world trade dropped back to 7.8% from the record level of 9.2% which it had reached in 1978.

The Community's share in world trade also fell, albeit only slightly. This too resulted largely from the low level of imports into the USA and Canada, the OPEC countries and, in particular, Iran and the ACP countries. Exports to the ACP countries, for example, fell by 7% and exports to Iran by a full 62%, from a relatively high starting level of approximately \$7 600 million or 3.4% of the total exports to third countries in 1978.

The USA managed to increase their share of world trade slightly in 1979, not least as a result of the exceptional expansion of imports from the USA by the

En 1979, les pays de l'OPEP ont confirmé cette stratégie d'achat qui a, en outre, été renforcée par la régression — pour des raisons politiques — des échanges avec l'Iran. Cette évolution a particulièrement touché le Japon dont non seulement le commerce avec les pays en voie de développement, n'a que faiblement progressé, mais qui s'est également heurté à des problèmes de débouchés sur le marché nord-américain. Par contre, ses exportations vers la CE ont connu une forte augmentation. Mais au total, sa part dans les échanges mondiaux est passée de 9,2% (taux record en 1978) à 7,8%.

La Communauté a dû accepter une diminution — faible, il est vrai — de sa part, en raison de la limitation des importations des États-Unis et du Canada, des États de l'OPEP et en particulier de l'Iran, mais aussi des pays ACP. Les exportations vers les pays ACP ont par exemple diminué de 7% et celles vers l'Iran de 62% pour un niveau de départ relativement élevé d'environ 7,6 milliards de dollars, soit 3,4% des exportations vers les pays non-CE dans les années 1978.

En 1979, les États-Unis ont légèrement accru leur part dans le commerce mondial grâce, en particulier, à l'expansion exceptionnelle des importations de leurs

Western industrialized countries. In the case of the United States too, however, the basically very bright picture was darkened a little by low growth figures for exports to the OPEC countries and a drop in sales to Iran of over 70%.

1.3 SHARE OF THE EUROPEAN COMMUNITY AND MAJOR COMPETITORS IN THE TOTAL TRADE OF THE WESTERN INDUSTRIALIZED COUNTRIES

As in the case of world trade, the European Community's share of the total trade of the Western industrialized countries declined, particularly over the period 1963-70. During the 1970s, however, the situation has to a great extent stabilized in the case of both imports and exports, although the Community's export situation has developed somewhat more favourably. The European Community's share in the imports of the Western industrialized countries dropped from 40.6% in 1963 to 34.4% in 1970 and reached the same level again in 1979 (see Table 1.3.1). The shares of the two main competitors, on the hand, rose steadily.

An analysis by region of origin is interesting in this connection. From this point of view the Community succeeded to a considerable extent in maintaining its position in trade with other Western industrialized countries and the State-trading countries. The Community's share admittedly decreased considerably in the first period (1963/70), but managed during the second period to recuperate approximately 50% of this loss, at least as regards imports from Western industrialized countries.

The reverse is true in the case of the United States where the share in imports increased first of all by 4.3 points only to drop again by 1 point. Japan, on the other hand, managed to increase its share of imports considerably over the first period and more or less maintained this position. An analysis of the shares in imports from OPEC countries and other developing countries, however, presents a completely different picture.

The Community's share of imports from other developing countries dropped sharply and consistently from 50.9% in 1963 to 41.9% in 1970 and further to 37.3% in 1979. The share of the United States and Japan increased considerably over the same period, nearly doubling in the case of Japan. This was no doubt due to the fact that the Community's old ties with the developing countries and other traditional partners have weakened and the latter countries have increased their trade with each other and with other industrialized countries. In addition, rapid industrial expansion in Japan and also in some developing countries, such as Brazil, Mexico, South Korea, Taiwan, etc., and in the State-trading countries, resulted in in-

partenaires industrialisés occidentaux. En ce qui concerne les États-Unis également, le tableau en soi très positif de l'évolution des exportations est obscurci par les faibles taux de croissance des échanges avec les pays de l'OPEP et le fléchissement de plus de 70% des ventes à l'Iran.

1.3 PART DE LA CE ET DES PRINCIPAUX CONCURRENTS DANS LE COMMERCE DES PAYS INDUSTRIALISÉS OCCIDENTAUX

S'il y a eu diminution de la part de la CE dans le commerce mondial, il y a eu également diminution de sa part dans les échanges des pays industrialisés occidentaux, en particulier entre 1963 et 1970. Toutefois, la situation s'est largement stabilisée au cours des années 70. Cette affirmation est valable à la fois pour les importations et pour les exportations bien que l'évolution des exportations se soit plus favorablement développée pour la Communauté: la part de la CE dans les importations des pays industrialisés occidentaux est passée de 40,6 à 34,4% entre 1963 et 1970, de dernier pourcentage est aussi celui de 1979 (voir tableau 1.3.1). Par contre, la part des deux principaux concurrents n'a cessé de progresser.

Dans ce contexte, une analyse par région d'origine est intéressante. Ainsi, la Communauté a pu dans une large mesure maintenir sa position dans les échanges avec les autres États industrialisés occidentaux et les pays à commerce d'État. Certes, au cours de la première période (1963-70), sa part a considérablement diminué mais au cours de la seconde période, elle a pu rattraper environ 50% de ce qu'elle avait perdu, tout au moins en ce qui concerne les importations en provenance des pays industrialisés occidentaux.

Pour les États-Unis, l'évolution a été inverse avec d'abord une augmentation de 4,3 points puis diminution d'un point. Par contre, le Japon a considérablement renforcé ses importations au cours de la première période et a maintenu sa position dans l'essentiel. L'analyse des importations en provenance des pays de l'OPEP et des autres pays en voie de développement donne une image tout à fait différente.

En ce qui concerne les importations en provenance des autres pays en voie de développement, la part de la CE a constamment diminué par bonds importants: si elle était encore égale à 50,9% en 1963, elle est tombée à 41,9% en 1970 et à 37,3% en 1979. Pendant cette même période, la part des États-Unis et du Japon s'est accrue considérablement, avec presque un doublement pour le Japon. Il faut certainement chercher la raison de cette évolution dans le relâchement des liens traditionnels de la Communauté avec les pays en voie de développement et autres partenaires traditionnels, ceux-ci ayant développé leurs échanges entre eux et avec les autres États industrialisés. En outre, l'expansion industrielle rapide du

creased imports of raw materials and finished and semi-finished products.

The Community's share of imports from OPEC States rose slightly from 58.5% to 59.5% over the period 1963-70. At the same time, Japan's share rose from 11% to 17%. This increase particularly affected the United States where the picture was exactly the opposite. The situation in 1979, however, is rather different. Oil price increases and the increased demand of Japan and the USA, where oil production has stagnated in recent years, meant that the shares of these countries rose rapidly whereas that of the European Community fell by 30%. The relevant figures were as follows: 39.3% for the European Community, 26.7% for the USA and 21.6% for Japan.

Japon mais également de certains pays en voie de développement, comme le Brésil, le Mexique, la Corée du Sud, T'ai-wan, etc. et des pays à commerce d'État, oblige ces pays à accroître leurs importations de matières premières ainsi que des produits finis et semi-finis.

Au cours de la période 1963-70, la part de la Communauté dans les importations en provenance des pays de l'OPEP s'est légèrement accrue de 58,5 à 59,5%. Simultanément, la part du Japon est passée de 11 à 17%. Cette augmentation a surtout concerné les États-Unis dont les parts ont enregistré une évolution exactement inverse. En 1979, la situation est toute différente: les hausses des prix du pétrole et les besoins accrus du Japon et des États-Unis dont la production de pétrole a stagné au cours des dernières années, ont fait augmenter la part de ces derniers de façon vertigineuse et tomber celle de la CE de 30%. Les quotes-parts correspondantes étaient de 39,3% pour la CE, 26,7% pour les États-Unis et 21,6% pour le Japon.

Tab. 1.3.1 Trend in imports of the EC, USA and Japan
Évolution des importations de la CE, des USA et du Japon

| OPEC OPEP | Mrd \$ % | 4,8 58,5 | 1,4 17,1 | 0,9 11,0 | 9,1 59,5 | 1,7 11,1 | 2,6 17,0 | 66,1 39,3 | 45,2 26,7 | 36,3 21,6 | 8,2 100,0 | 15,3 100,0 | 168,1 100,0 |
| Other LDC Autres PVD | Mrd \$ % | 8,3 50,9 | 4,5 27,6 | 1,4 8,6 | 12,5 41,9 | 8,8 29,5 | 4,3 14,4 | 55,8 37,3 | 53,6 35,8 | 22,5 15,0 | 16,3 100,0 | 29,8 100,0 | 149,7 100,0 |
| CPE PCE | Mrd \$ % | 2,2 57,9 | 0,1 2,6 | 0,3 7,9 | 4,0 51,9 | 0,2 2,6 | 1,0 13,0 | 24,3 50,9 | 2,7 5,7 | 5,5 11,5 | 3,8 100,0 | 7,7 100,0 | 47,7 100,0 |

It is worthy of note that the proportion of imports into the European Community, originating in the developing countries has remained more or less constant, whereas in the case of the USA and Japan it has risen sharply, particularly during the second period under consideration:

Il convient de remarquer que la part des pays en voie de développement dans les importations de la CE est restée plus ou moins constante tandis que celle des États-Unis et du Japon a considérablement augmenté en particulier au cours de la deuxième période:

Tab. 1.3.2 Share of the developing countries in imports of the European Community, the USA and Japan in %
Part des pays en voie de développement dans les importations de la CE, des États-Unis et du Japon en %

| Reporter | 1963 | 1970 | 1979 | Déclarant |
|----------|------|------|------|------------|
| EC | 39 | 36 | 41 | CE |
| USA | 35 | 26 | 45 | États-Unis |
| Japan | 34 | 37 | 53 | Japon |

The position of the Community on the export markets remained fairly stable over the reference period. Increasing competition from Japan resulted mainly in a reduction of the USA's share of the various markets.

Sur les marchés d'exportations, la position de la Communauté est demeurée relativement stable au cours de la période de référence. Sur ces marchés, ce sont surtout les États-Unis qui ont reculé face à la concurrence croissante du Japon.

As mentioned above, the European Community succeeded during the period 1970-79 in regaining part of the share in exports which it had lost in the first period, and by 1979 accounted for approximately 35% of the total exports from Western industrialized countries (1963: 36.5%, 1970: 33.6%). The USA's share on the other hand continued to fall from almost 30% in 1963 to 26% in 1970 and 24% in 1979. The Japanese, however, succeeded in almost doubling their share from 7.1% in 1963 to 13.6% in 1979. Exports to other industrialized countries and State-trading countries were relatively stable in the case of the Community and the United States and Japan.

The major success of this period, however, was that of Japan in its trade with OPEC countries, where sales increased from 7.9% in 1963 to 13% in 1970 and to 17.2% by 1979. The USA on the other hand lost a considerable proportion of the market, i.e. its share dropped from 28.9% to 19.4% over the period 1963 to 1979. Over the same period, Community exports dropped only 5 points to 50.3%.

Relatively speaking, the position of the USA has deteriorated more seriously and that of the Community been better maintained than might have appeared at first sight, as may be seen from the growth-rates on the one hand and the export/import coverage ratios on the other:

Comme déjà indiqué plus haut, la CE a compensé, au cours des années 1970-79, le ralentissement de ses exportations pendant la première période en atteignant environ 35% des exportations des pays industrialisés occidentaux en 1979 (1963: 36,5%, 1970: 33,6%). Par contre, la part des États-Unis n'a cessé de diminuer. Si, en 1963, elle était encore pratiquement de 30%, elle était tombée à 26% en 1970 et à 24% en 1979. Les grands bénéficiaires ont été les Japonais qui ont presque doublé leur part (de 7,1 en 1963 à 13,6% en 1979). Les exportations vers les autres pays industrialisés et les pays à commerce d'État sont restées relativement stables. Cela concerne tant la Communauté que les États-Unis et le Japon.

Dans les échanges avec les pays de l'OPEP, c'est le Japon qui a obtenu les meilleurs résultats: le pourcentage de ses ventes est passé de 7,9% en 1963, à 13,0% en 1970 et à 17,2% en 1979. Par contre, les États-Unis ont enregistré des pertes sensibles sur le marché: de 1963 à 1979, leur part est tombée de 28,9 à 19,4%. Pendant cette même période, la Communauté n'a enregistré qu'un recul de 5 points, passant à 50,3%.

En termes relatifs, la position des États-Unis s'est plus fortement détériorée et celle de la Communauté s'est mieux maintenue qu'il n'apparaît à première vue. On le voit si l'on considère les taux de croissance d'une part et les pourcentages de couverture d'autre part (exportations sur importations):

Tab. 1.3.4 Growth factors, trade balance and coverage ratios of the European Community, the USA and Japan in trade with OPEC countries

Facteurs de croissance, balance commerciale et taux de couverture de la CE, des États-Unis et du Japon dans leurs échanges avec les pays de l'OPEP

| Reporting country | Growth factors for 1979 1963 = 1 Facteur de croissance pour 1979 1963 = 1 | | Trade balance in 000 mio \$ Balance commerciale en Mrd \$ | | | Cover ratios (exp.: imp.) in % Pourcentage de couverture (exp.: imp.) en % | | | Pays déclarants |
|-------------------|--|-------------------------|--|-------|--------|---|------|------|-----------------|
| | Imports Importations | Exports Exportations | 1969 | 1970 | 1979 | 1963 | 1970 | 1979 | |
| EC | 14 | 19 | - 2,7 | - 5,3 | - 26,9 | 44 | 42 | 60 | CE |
| USA | 32 | 14 | - 0,3 | + 0,4 | - 30,1 | 78 | 124 | 33 | États-Unis |
| Japan | 40 | 45 | - 0,6 | - 1,6 | - 22,9 | 33 | 38 | 37 | Japon |

Since then, the relatively faster growth in exports as compared with imports has substantially improved the coverage ratio of the Community. The ratio has also improved slightly in the case of Japan. In the case of the USA, on the other hand, the coverage ratio changed dramatically to from 78% in 1963 to 124% in 1970 to 33% in 1979. This is also reflected in the deficit total trade ratio. Whereas in 1970 the USA still had a slight surplus, by 1979 its deficit was greater than that of the Community in spite of a substantially smaller volume of trade.

In trade with other developing countries, the Community, like the USA, lost a significant part of its share of traditional markets to Japan, which virtually doubled its share in this area too. However, this loss occurred largely in the period 1963-70, i.e. the time when Japan's growth-rate was at its highest. During the 1970s, on the other hand, the European Community in particular was able to maintain its position.

1.4 DEVELOPMENT OF TRADE WITH THE MAJOR PARTNERS

The development described in 1.2 and 1.3 is confirmed by an analysis of trade with the five major partners of the Western industrialized countries (see Table 1.4.1).

Firstly, both imports and exports are clearly influenced significantly by regional or traditional relations. Thus, generally speaking, European Community and other Western industrialized countries trade with the countries of Europe and North America. Thus, the USA trades with Canada, the Community, Japan and the Latin-America countries, and Japan trades with North America, the Community, Australia and the Asian countries. There have, nevertheless, been a number of changes resulting mainly from the developments in

Par la suite, la croissance relativement plus rapide des exportations par rapport aux importations a considérablement amélioré les pourcentages de couverture de la Communauté. Le Japon a également enregistré un pourcentage légèrement plus favorable. Pour les États-Unis en revanche le taux de couverture révèle le recul inquiétant. De 78% en 1963 il a progressé jusqu'à 124% en 1970 pour tomber à 33% en 1979. Ce recul est mis en lumière également avec le rapport entre le déficit et le volume des échanges. Tandis qu'en 1970 les États-Unis avaient encore enregistré un léger excédent, en 1979, leur déficit était presque aussi important que celui de la Communauté bien que le volume de leurs échanges ait été considérablement plus faible.

Dans ses échanges avec d'autres pays en voie de développement, la Communauté a perdu, tout comme les États-Unis, des parts importantes de ses marchés traditionnels au profit du Japon dont la part, là encore, a presque doublé. Il est vrai que cette perte de marchés a eu lieu surtout au cours de la période 1963-70, qui est celle où l'économie du Japon a connu sa phase de croissance la plus forte. Au cours des années 70, par contre, la CE a pu maintenir sa position.

1.4 ÉVOLUTION DES ÉCHANGES AVEC LES PRINCIPAUX PARTENAIRES

L'évolution décrite dans les chapitres 1.2 et 1.3 se confirme également si l'on analyse les échanges avec les cinq principaux partenaires des pays industrialisés occidentaux (voir tableau 1.4.1).

On peut constater tout d'abord que les importations et les exportations sont largement influencées par des relations régionales ou traditionnelles. Ainsi, les États de l'Amérique du Nord et les États européens sont, en général, les principaux partenaires commerciaux de la CE et des autres pays industrialisés occidentaux. Pour les États-Unis, il s'agit du Canada, de la Communauté, du Japon et des États d'Amérique latine et pour le Japon, de l'Amérique du Nord, de la CE, des États d'Asie et d'Australie. Toutefois, on a constaté

oil prices. Nowadays certain OPEC countries, in particular Saudi Arabia, figure as main trading partners of the Western industrialized countries as regards both imports and exports.

The hypothesis that the emergence of Japan, the OPEC countries and the newly industrialized countries would lead to an easing off in the trend towards greater concentration⁽¹⁾ in world trade cannot be supported by the present evidence. In the case of the Community, which has a traditionally low degree of concentration, there was a slight increase as regards concentration of imports between 1963 and 1979, while the export coefficient remained practically unchanged. In the case of the USA and Japan, concentration decreased in the case of imports and increased in the case of exports. As regards the other Western industrialized countries, whose degree of concentration is exceptionally high, it decreased substantially in the case of both imports and exports.

We also get an interesting picture if, instead of considering the entire period, we return to our subdivision into the periods 1963-70 and 1970-79. Whereas in the case of the other Western industrialized countries the degrees of concentration remained constant during the first sub-period, they increased considerably for the Community, Japan and, in particular, the USA. In 1970, for example, 71.1% of total USA imports came from the five most important supplying countries, 50.9% coming from Canada and the European Community together and a further 14.7% from Japan, together making a good two-thirds of total American imports. On the export side, the structure was very similar and the partners were practically the same except for Hong Kong which was replaced by Brazil in the group of five major partners which together accounted for 63.8% of the total. The picture for the Community was similar, although the change in concentration was less pronounced than in the case of the United States. Overall, links with the traditional partners were strengthened, particularly with the USA as regards exports. Japan superseded the USSR as a new major supplier, and Spain took over from South Africa as a purchaser.

The degree of concentration of Japanese imports remained more or less unchanged during the first period in spite of considerable shifts in the composition of the five major partners. The first three (USA, European Community and Australia), whose share remained unchanged at 45%, stayed the same, but Iran made its way up to fourth place (5.3%), thereby pushing Canada into fifth place.

On the export side, where the degree of concentration increased appreciably, the shares of the two main

quelques décalages essentiellement dus à l'évolution des prix du pétrole: tant en matière d'importations que d'exportations, quelques pays de l'OPEP, en particulier l'Arabie Saoudite, sont aujourd'hui les partenaires commerciaux principaux des pays industrialisés occidentaux.

L'hypothèse selon laquelle l'entrée du Japon, des pays de l'OPEP et des nouveaux pays industrialisés dans le commerce mondial aurait entraîné une diminution de la concentration des échanges⁽¹⁾ n'est pas confirmée. En ce qui concerne la CE qui, traditionnellement, présente un degré de concentration faible, il y a eu, de 1963 à 1979, une légère augmentation de la concentration côté importations tandis que, pour les exportations, ce coefficient est resté pratiquement inchangé. Pour les États-Unis et le Japon, on constate pour les importations une diminution de la concentration, mais une augmentation de celle-ci pour les exportations. Pour les autres pays industrialisés occidentaux caractérisés par un degré de concentration exceptionnellement élevé, les deux coefficients ont nettement diminué.

La tableau est également intéressant si au lieu de considérer l'ensemble de la période, nous en revenons à la distinction 1963-70 et 1970-79. En ce qui concerne les autres pays industrialisés occidentaux, les degrés de concentration sont restés constants au cours de la première période. Par contre pour la CE, le Japon et en particulier les États-Unis, le coefficient de concentration fait apparaître une augmentation très forte. Ainsi, en 1970, 71,1% des importations des États-Unis provenaient des cinq principaux pays fournisseurs; 50,9% du Canada et de la CE et 14,7% du Japon, c'est-à-dire environ les deux tiers des importations américaines. La structure des exportations n'était pas très différente: 63,8% des ventes se dirigeaient sur les mêmes cinq principaux clients, seul Hong-Kong était remplacé par le Brésil. La situation était identique pour la Communauté même si la modification de la concentration était plus faible que pour les États-Unis. Dans l'ensemble, les liens se sont renforcés avec les partenaires traditionnels et, en particulier, avec les États-Unis pour ce qui est des exportations. Le Japon s'est imposé en tant que nouveau fournisseur particulièrement entreprenant en se substituant à l'URSS tandis que l'Afrique du Sud a été dépassée par l'Espagne en tant qu'acheteur.

Au cours de la première période, le degré de concentration des importations japonaises est resté pratiquement le même. Néanmoins, on a remarqué des modifications importantes dans la composition des cinq premiers partenaires. Le groupe des trois premiers (États-Unis, CE, Australie) dont la part (45%) ne s'est pas modifiée, est resté inchangé, tandis que l'Iran a pris la quatrième place (5,3%) reléguant le Canada au cinquième rang.

En ce qui concerne les exportations caractérisées par un net accroissement de concentration, la part des

⁽¹⁾ Here measured in terms of the share of the five major trading partners in total imports or exports.

⁽¹⁾ Mesurée ici d'après la part des cinq principaux partenaires commerciaux dans les importations et les exportations totales.

partners, i.e. the USA and the European Community, increased. Taiwan emerged as a new partner replacing Thailand; Hong Kong's share decreased in both absolute and relative terms, and South Korea climbed to third position.

For the other Western industrialized countries, the European Community and the USA were the absolute leaders among their trading partners. In all cases, they accounted between them for well over 60% of the imports and exports of this group of countries. The other major partners were Sweden, Japan, Switzerland and Norway, whereas the USSR lost its position as one of the leading suppliers and purchasers.

In the second period, i.e. 1970-79, the degree of concentration began to weaken in all Western industrialized countries, as regards both imports and exports, as had been expected. This particularly affected the composition of the main suppliers. Thus, in 1979 Saudi Arabia moved into second place among Community import partners, ousting Canada. The USA and Sweden also lost a considerable share of their markets, however. On the other hand, Switzerland and Japan succeeded in increasing their share by more than 50%. On the export side, the order of importance of the major partners remained the same as it had been in 1970, although the USA and Sweden lost part of their share to Switzerland, Austria and Spain.

In the case of USA imports, the share of the three leading suppliers fell from 65.6% in 1970 to 47.4% in 1979. On the other hand, Mexico, which is nowadays one of the USA's major oil suppliers, managed to increase its share. Increased imports of oil also led to Nigeria replacing Hong Kong in the top five. On the export side, the significance of the three major purchasers was not so drastically reduced as in the case of imports, their share dropping from 57.9% to 51.6%. Here too, Mexico strengthened its position and Brazil was ousted by the OPEC member, Saudi Arabia.

The most striking changes were in the structure of Japan's trading partners. On the import side, the USA's share fell from 29.5% to 18.6% and the Community was pushed into fourth place by the OPEC countries, Saudi Arabia and Indonesia. While Australia managed to maintain its position, Iran and Canada disappeared from the list. As regards the main purchasers of Japanese products, the structure remained somewhat more stable. The top four remained the same, although the USA lost ground to the newly industrialized countries, South Korea and Taiwan. Hong Kong, however, had to give way to Saudi Arabia.

deux premiers partenaires États-Unis et CE s'est accrue. T'ai-wan est entré dans ce groupe en tant que nouveau partenaire. Tant en valeurs absolues qu'en valeurs relatives, la part de Hong-Kong a diminué et la Corée du Sud s'est imposée à la troisième place.

Pour les autres pays industrialisés occidentaux, la CE et les États-Unis étaient sans conteste les premiers partenaires commerciaux. Ensemble, ils représentaient largement plus de 60% des importations et des exportations de ce groupe de pays. Ils étaient suivis par la Suède, le Japon, la Suisse et la Norvège, constituant le groupe des partenaires principaux, tandis que l'URSS a perdu sa place parmi les principaux fournisseurs et acheteurs.

La deuxième période 1970-79 a été marquée par l'affaiblissement prévu de la concentration dans tous les pays industrialisés occidentaux tant sur le plan des importations que sur celui des exportations. Cette évolution a surtout eu une incidence sur la composition du groupe des principaux fournisseurs. Ainsi, en 1979, l'Arabie Saoudite a pris la deuxième place parmi les importateurs de la Communauté en se substituant au Canada. Les États-Unis et la Suède ont également perdu des parts considérables du marché. Par contre, la Suisse et le Japon ont pu accroître leur quote-part de plus de 50%. Par rapport à 1970, l'ordre des principaux clients s'est maintenu, même si les États-Unis et la Suède ont perdu une certaine importance au profit de la Suisse, de l'Autriche et de l'Espagne.

En ce qui concerne les importations des États-Unis, la part des trois principaux fournisseurs est tombée de 65,6% en 1970 à 47,4% en 1979. Par contre, le Mexique, qui compte aujourd'hui parmi les principaux fournisseurs de pétrole des États-Unis a pu accroître son pourcentage. C'est aussi le pétrole qui a porté le Nigeria à la place de Hong-Kong comme cinquième fournisseur. Pour ce qui est des exportations, l'importance des trois principaux acheteurs ne s'est pas réduite aussi fortement que pour les importations: leur part est passée de 57,9 à 51,6%. Le Mexique a renforcé sa position et le Brésil a été remplacé par l'Arabie Saoudite, membre de l'OPEP.

Les modifications les plus frappantes sont intervenues dans les partenaires du Japon. En matière d'importations, la part des États-Unis est tombée de 29,5 à 18,5% et la Communauté dont la part a diminué a été reléguée à la quatrième place, par l'Arabie Saoudite et l'Indonésie. L'Australie a encore pu se maintenir dans ce groupe, tandis que l'Iran et le Canada en ont disparu. La structure du groupe des principaux acheteurs de produits japonais est restée un peu plus stable. Le groupe des quatre premiers n'a pas changé, mais les États-Unis ont perdu des points au profit de la Corée du Sud et T'ai-wan, pays nouvellement industrialisés en plein essor. Hong-Kong, en revanche, a dû céder sa place à l'Arabie Saoudite.

The partner structure of the other Western industrialized countries was very stable over the period 1970-79. Their order of importance remained the same with only small losses in their shares of imports. Switzerland was the only exception, being replaced by Saudi Arabia which emerged overall as by far the most important trading partner of the Western industrialized countries, not only among the OPEC countries, but also in the Third World as a whole. On the export side, the Europe Community, like Japan, strengthened its position as buyer to a certain extent, while the USA dropped back. Also on the export side, the USSR managed to regain its position as one of the major partners, replacing Norway.

La structure du groupe des partenaires des autres pays industrialisés occidentaux est restée très stable au cours de la période 1970-79. Leur ordre est resté le même avec seulement de faibles pertes de leurs parts d'importations. Seule la Suisse a été remplacée par l'Arabie Saoudite qui, dans l'ensemble, est apparue, et de loin, comme le principal partenaire des pays industrialisés occidentaux, non seulement parmi les États de l'OPEP mais également parmi ceux de l'ensemble du tiers monde. Pour ce qui est des exportations, la position de la CE et du Japon en tant qu'acheteurs s'est renforcée quelque peu tandis que celle des États-Unis s'est affaiblie. L'URSS a repris sa place dans le groupe des principaux partenaires où elle a remplacé la Norvège.

| 6 | Consumer goods | 1 332 | 4 | 3 460 | 6 | 29 981 | 10 | Biens de consommation | 6 |
| 1-7 | Total | 33 428 | 100,0 | 59 548 | 100,0 | 294 885 | 100,0 | Total | 1-7 |

Considering *imports* first of all (see Table 2.1.1), it can be seen that there was a sharp drop in the proportion of food and beverages (BEC 1) imported, falling from 23% in 1963 to 17% in 1970 and 11% in 1979. In the period 1963-79 the growth factor for imports of this category was 4.2, compared with a factor of 8.8 for imports as a whole (see Table 2.1.2).

One of the reasons for this relative decline is the fact that purchases from traditional trading partners decreased, being replaced by intra-Community trade, and expenditure for certain tropical and Mediterranean products rose sharply. Thus, the share of the Community import market held by Canada, Australia, New Zealand and South Africa fell from 17.3% to 9.5%, while that of the Latin-American and ASEAN countries went up from 12.2% to 20.7% and from 2.1% to 6.8% respectively.

There was a similar decline in the proportion of imports accounted for by industrial supplies n.e.s. (BEC 2), which fell from 45% to 34%, while in value terms have increased more than sixfold since 1963. Although the growth factor was thus considerably higher than that of the food and beverages category, it was still well below average. In this case the main losses were sustained by the developing countries, whose share of the market fell from 30% in 1963 to 23.1% in

Si nous considérons tout d'abord les *importations* (voir tableau 2.1.1), nous constatons une baisse spectaculaire des importations de produits alimentaires et boissons (GCE 1), qui sont passées de 23% en 1963 à 17% en 1970 et à 11% en 1979. Au cours de cette période, les importations des produits appartenant à cette catégorie ont été multipliées par 4,2 contre 8,8 pour les importations totales (voir tableau 2.1.2).

Cette baisse relative est due notamment au fait que les achats auprès des partenaires traditionnels ont diminué au profit des échanges entre les États membres et que les importations de certains produits tropicaux et méditerranéens ont fortement augmenté. C'est ainsi que la part des importations en provenance du Canada, de l'Australie, de la Nouvelle-Zélande et de l'Afrique du Sud est tombée de 17,3% à 9,5%. En revanche, celle des importations provenant des États d'Amérique latine est passée de 12,2 à 20,7% et celle des pays de l'ANASE de 2,1 à 6,8%.

La part des approvisionnements industriels (GCE 2) importés a fortement baissé, de 45% à 34%, bien que multipliée par 6,5 par rapport à 1963. Leur croissance a donc été nettement supérieure à celle de la catégorie produits alimentaires et boissons, mais elle est restée néanmoins bien en dessous de la moyenne. Ce sont les pays en voie de développement qui ont le plus souffert de ces pertes, puisque la part de leurs exportations vers la Communauté est tombée

1979. These losses affected mainly primary products, where the developing countries lost a good 25% of their market share.

de 30 % en 1963 à 23,1% en 1979. Ces pertes ont essentiellement concerné les produits de base, secteur dans lequel les pays en développement ont perdu au moins 25 % de leur part du marché.

Tab. 2.1.2 Development of Community trade by broad economic categories (BEC)
Évolution des échanges commerciaux de la CE par grandes catégories économiques (GCE)

| BEC | Title | 1979/1963 1963 = 100 | | 1970/1963 1963 = 100 | | 1979/1970 1970 = 100 | | Titre | GCE |
|-----|----------------------|-------------------------|------------|-------------------------|------------|-------------------------|------------|-----------------------------|------------|
| | | Import | Export | Import | Export | Import | Export | | |
| 1 | Food and beverages | 419 | 742 | 127 | 161 | 329 | 461 | Prod. alim. et boissons | 1 |
| 2 | Industrial supplies | 654 | 908 | 181 | 192 | 362 | 472 | Approvisionnements indust. | 2 |
| 3 | Fuels and lubricants | 1 642 | 1 448 | 188 | 160 | 874 | 903 | Combustibles et lubrifiants | 3 |
| 4 | Machinery | 1 208 | 1 038 | 253 | 222 | 476 | 468 | Biens d'équipement | 4 |
| 5 | Transport equipment | 2 590 | 884 | 306 | 196 | 845 | 451 | Matériel de transport | 5 |
| 6 | Consumer goods | 2 250 | 907 | 260 | 205 | 866 | 441 | Biens de consommation | 6 |
| 1-7 | Total | 882 | 936 | 178 | 197 | 495 | 475 | Total | 1-7 |

The relative importance of all of the other BECs increased over the period. As expected, the biggest growth was recorded by fuels and lubricants, the proportion of which remained constant at 16% between 1963 and 1970 but went up to 29% by 1979. The growth factor for the whole period was 16.4.

L'importance relative de toutes les autres grandes catégories a augmenté. Comme on pouvait s'y attendre, c'est la part des importations de combustibles et lubrifiants qui a connu l'accroissement le plus important en effet, bien qu'étant resté constant, avec 16 %, de 1963 à 1970, il a progressé entre 1970 et 1979 pour atteindre 29 %, soit une multiplication par 16,4 sur cette période.

The most noticeable change in this category was an increase in the market share of the African countries, due to Nigeria's joining the group of major oil exporters.

Ce sont essentiellement les importations de combustibles et lubrifiants en provenance des pays d'Afrique qui ont augmenté, en raison de l'entrée du Nigeria dans le groupe des gros exportateurs de pétrole.

There has been an increase of similar proportions in the share of other Western European countries (e.g. Norway) since the development of North Sea oil resources. Asia's share remained constant during the period under review, although there were considerable changes within this continent, such as the trebling of Saudi Arabia's share. At the same time, the USA and Latin America in particular saw a decline in their share of the European oil market.

La part des importations en provenance d'autres pays d'Europe occidentale (comme par exemple la Norvège) ont également beaucoup augmenté depuis l'exploitation des gisements de pétrole de la mer du Nord. Le pourcentage des importations en provenance d'Asie est resté constant pendant la période de référence, encore qu'il y ait eu des mutations importantes à l'intérieur du continent, puisque les importations en provenance d'Arabie Saoudite ont par exemple triplé. Dans le même temps, les importations communautaires de pétrole en provenance des États-Unis et d'Amérique latine ont perdu de leur importance.

There was also a striking increase in imports of consumer goods (BEC 6). In 1963 they accounted for 4% of imports, rising to 6% in 1970 and 10% in 1979, giving a growth factor of 22.5 compared to 1963.

Les importations de biens de consommation (GCE 6) ont aussi considérablement augmenté. Elles ne représentaient que 4% des importations totales en 1963, puis elles sont passées à 6% en 1970 et à 10% en 1979.

The countries which gained most from this trend were those in the Asiatic group such as South Korea, Taiwan and the ASEAN group, as well as Japan. Of the Western European countries, the three Applicant States in particular increased their share (1963: 2.4%, 1979: 9.9%). The USA, Switzerland and Hong Kong,

Cette évolution a essentiellement profité aux pays asiatiques tels que la Corée du Sud, T'ai-wan, les pays de l'ANASE et également le Japon. Parmi les pays d'Europe occidentale, ce sont essentiellement les trois candidats à l'adhésion qui ont vu leur part s'accroître dans ces importations (1963: 2,4 %, 1979:

on the other hand, lost a considerable proportion of their market share.

The highest relative growth rate was for imports of transport equipment (BEC 5) with a factor of 26. This BEC's share of total imports went up from 2% to 4% and then to 6% in the three years considered. By comparison, imports of machinery and other capital equipment showed a low rate of growth. Although the multiplication factor (16) was almost double the average, the share of total imports accounted for by this BEC went up by only 3 percentage points to 10% between 1963 and 1970, remaining at the same level in 1979.

In this category, the USA, Switzerland, Sweden and Canada in particular lost an appreciable proportion of their market share to Japan, Spain and a number of other Asiatic countries (ASEAN, Taiwan, Hong Kong). Even more pronounced were the changes in imports of transport equipment and parts: the USA and Canada's share fell dramatically, while Japan and Spain increased theirs tenfold. In addition, losses were recorded by Sweden, Norway, Switzerland and the African countries, and significant gains by Latin America and the Soviet Union:

9,9%). En revanche, l'importance des États-Unis, de la Suisse et de Hong-Kong a considérablement diminué.

Ce sont les importations de matériel de transport (GCE 5) qui ont connu la croissance relativement la plus importante, étant multipliées par près de 26 fois. Leur part est passée de 2 à 4, puis 6% des importations totales. En revanche, les importations de biens d'équipement ont connu une évolution comparative-ment moins forte. Leur facteur de multiplication (16 fois) était presque le double de la moyenne, mais leur part n'a augmenté que de 3 points entre 1963 et 1970, quand elle atteignait 10%, niveau auquel elle se situait encore en 1979.

En l'occurrence, ce sont surtout les États-Unis, la Suisse, la Suède et le Canada qui ont subi les pertes les plus lourdes, au profit du Japon, de l'Espagne et de quelques autres États asiatiques (ANASE, Taiwan, Hong-Kong). L'évolution a été encore plus nette pour les importations de véhicules et de pièces détachées: la part des États-Unis et du Canada a baissé de façon spectaculaire, alors que celle du Japon et de l'Espagne a décuplé. La Suède, la Norvège, la Suisse et l'Afrique enregistraient également des pertes, tandis que l'Amérique latine et l'Union soviétique présentaient des gains importants.

Tab. 2.1.3 Main trading partners' shares of Community imports of transport equipment and accessories (BEC 5) (World = 100)

Part des principaux partenaires dans les importations de matériel de transport et de pièces détachées (GCE 5) de la CE (Monde = 100)

| Origin | 1963 | 1970 | 1979 | Origine |
|------------------|------|------|------|------------------------|
| USA | 59,4 | 50,3 | 25,6 | États-Unis |
| Japan | 2,1 | 5,6 | 21,5 | Japon |
| Applicant States | 1,2 | 4,3 | 11,6 | Candidats à l'adhésion |
| Switzerland | 4,3 | 3,4 | 2,0 | Suisse |
| Sweden | 14,1 | 14,7 | 11,3 | Suède |
| Norway | 1,9 | 6,2 | 1,2 | Norvège |
| Canada | 3,2 | 4,4 | 0,7 | Canada |
| Latin America | 0,6 | 0,6 | 2,5 | Amérique latine |
| Brazil | 0,1 | 0,3 | 1,2 | Brésil |
| USSR | 0,2 | 0,7 | 1,3 | URSS |

2.2 COMMUNITY EXPORTS

Although the rate of growth of Community exports was higher than that of imports (see Table 2.1.2), especially in the first period under review (1963-70), the structure by BEC was comparatively stable. The only major changes were in the shares of food and beverages, fuels and lubricants and machinery and other capital equipment.

2.2 EXPORTATIONS COMMUNAUTAIRES

Bien que la croissance des exportations de la Communauté ait été supérieure à celle de ses importations (voir tableau 2.1.2), notamment au cours de la première période (1963-70), leur structure par GCE est restée relativement stable. Des écarts importants entre parts n'ont été enregistrés que pour les produits alimentaires, les combustibles et lubrifiants, ainsi que les biens d'équipement.

Tab. 2.2.1 Community exports by broad economic categories (BEC) in Mio \$ and as a % of the total
Exportations de la CE par grandes catégories économiques (CGE) en millions de \$ et en % du total

| BEC | Title | 1963 | | 1970 | | 1979 | | Titre | CGE |
|-----|----------------------|---------------|--------------|---------------|--------------|----------------|--------------|-----------------------------|------------|
| | | Mio \$ | % | Mio \$ | % | Mio \$ | % | | |
| 1 | Food and beverages | 2 325 | 8,2 | 3 747 | 6,7 | 17 258 | 6,5 | Prod. alim. et boissons | 1 |
| 2 | Industrial supplies | 9 813 | 34,6 | 18 866 | 33,7 | 89 102 | 33,5 | Approvisionnements indust. | 2 |
| 3 | Fuels and lubricants | 984 | 3,5 | 1 579 | 2,8 | 14 252 | 5,4 | Combustibles et lubrifiants | 3 |
| 4 | Machinery | 6 472 | 22,8 | 14 362 | 25,7 | 67 157 | 25,3 | Biens d'équipement | 4 |
| 5 | Transport equipment | 4 656 | 16,4 | 9 129 | 16,3 | 41 156 | 15,5 | Matériel de transport | 5 |
| 6 | Consumer goods | 3 518 | 12,4 | 7 226 | 12,9 | 31 897 | 12,0 | Biens de consommation | 6 |
| 1-7 | Total | 28 392 | 100,0 | 55 930 | 100,0 | 265 654 | 100,0 | Total | 1-7 |

As with imports, the growth in exports of food and beverages (factor 7.4) also remained appreciably below average. As a result, this category's share fell from 8.2% in 1963 to 6.5% in 1979. The main losses were in exports to the USA and EFTA, while there was a substantial increase in the shares of Japan (from 0.9 to 4.3%), the USSR (from 0.9 to 3.1%) and the OPEC countries (from 10.7 to 17.1%).

La croissance des exportations des produits alimentaires et boissons (facteur 7,4) est restée, comme celle des importations, nettement en dessous de la moyenne. La part de ces exportations, qui était de 8,2% en 1963, est ainsi tombée à 6,5% en 1979. Les acheteurs dont l'importance a le plus diminué sont avant tout les États-Unis et l'AELE, alors que la part du Japon s'accroissait considérablement (de 0,9 à 4,3%), de même que celle de l'URSS (de 0,9 à 3,1%) et des pays de l'OPEP (de 10,7 à 17,1%).

The growth in exports of transport equipment and parts, the proportion of which fell from 16.4 to 15.5%, was also well below average. This was due to increased competition on the markets of the Western industrialized countries, as a result of which Sweden's share fell from 7.9 to 5.3% and Norway's from 4.4 to 1.6%. There was also a decline, however, in the proportion of exports sent to South Africa and Australia. Japan increased its share by only a relatively modest amount from 0.6 to 1.5%. On the other hand, the OPEC countries' share went up from 6.6% in 1963 to 14.8% in 1979. Even the USA's share went up by 4 points in this period to reach 20.1%, although it should be noted that it was over 28% in 1973.

L'accroissement des exportations de matériel de transport et de pièces détachées est également resté très inférieur à la moyenne; leur part a été ramenée de 16,4 à 15,5%. Le renforcement de la concurrence sur les marchés des pays industrialisés occidentaux se reflète dans cette baisse. La part de la Suède est ainsi tombée de 7,9 à 5,3% et celle de la Norvège de 4,4 à 1,6%. Mais l'Afrique du Sud et l'Australie ont également perdu de l'importance en tant qu'acheteurs. La part du Japon n'a augmenté qu'assez modestement, passant de 0,6 à 1,5%. En revanche, la part des pays de l'OPEP est passée de 6,6% en 1963 à 14,8% en 1979. Même la part des États-Unis a augmenté de quatre points au cours de cette période pour atteindre 20,1%; il faut toutefois remarquer qu'elle s'élevait à plus de 28% en 1973.

Exports of consumer goods and industrial supplies n.e.s. followed an identical pattern. Sales increased ninefold at current prices, so that these categories' shares of total exports remained virtually the same at 12% and 33.5% respectively. There were, however, notable changes in their regional structure. Thus, there was an above-average increase in sales to the Eastern European, EFTA and OPEC countries and Japan, matched by a relative decline in those to the USA, other Western industrialized countries, Africa and Central and South America.

L'évolution a été concordante dans le cas des biens de consommation et des approvisionnements industriels. Leurs ventes ont été multipliées par neuf en valeur courante, de sorte que leur part dans les exportations totales (respectivement 12 et 33,5%) a pu dans l'ensemble se maintenir. Des écarts importants sont cependant apparus dans leur répartition par région. C'est ainsi que les pays de l'Est européen, les pays de l'AELE, les pays de l'OPEP et le Japon ont augmenté leurs achats dans une proportion très supérieure à la moyenne, tandis que ceux des États-Unis, des autres pays industrialisés occidentaux, de l'Afrique, de l'Amérique centrale et de l'Amérique du Sud ont plutôt baissé.

Exports of machinery and other capital goods (factor 10.4) and fuels and lubricants (factor 14.5) showed an outstanding rate of growth. Their share of total exports went up from 22.8 to 25.3% and from 3.5 to 5.4% respectively. The main increases in sales of the former category were, above all, to the OPEC countries and to the People's Republic of China. On the other hand, there was a decline in the shares of the other Western industrialized countries and Central and South America.

Les exportations de biens d'équipement, multipliées par 10,4 ainsi que celles de combustibles et lubrifiants multipliées par 14,5 ont connu une croissance exceptionnelle. Leur part est ainsi passée de 22,8 à 25,3% pour les uns et de 3,5 à 5,4% pour les autres. Pour le premier groupe de produits, ce sont les achats des pays de l'OPEP et de la république populaire de Chine qui ont surtout augmenté. En revanche, les achats des autres pays industrialisés occidentaux, de l'Amérique du Sud ont diminué.

Tab. 2.2.2 Main trading partner's shares of Community exports of machinery and other capital equipment (BEC 4) (World = 100)

Part des principaux partenaires dans les exportations de biens d'équipement (GCE 4) de la CE (Monde = 100)

| Destination | 1963 | 1970 | 1979 | Destination |
|----------------------------------|------|------|------|--------------------------------------|
| USA | 6,5 | 9,9 | 9,6 | États-Unis |
| Japan | 2,9 | 3,1 | 1,9 | Japon |
| Applicant States | 7,7 | 8,1 | 6,4 | Candidats à l'adhésion |
| Other Western European countries | 22,8 | 23,2 | 20,9 | Autres pays d'Europe occidentale |
| Other industrialized countries | 12,3 | 10,5 | 6,2 | Autres pays industrialisés |
| Africa | 9,1 | 8,2 | 13,2 | Afrique |
| Asia | 15,4 | 12,9 | 20,5 | Asie |
| Central and South America | 10,6 | 9,7 | 7,8 | Amérique centrale et Amérique du Sud |
| Eastern European countries | 7,9 | 9,3 | 9,8 | Pays de l'Est européen |
| People's Republic of China | 0,1 | 0,3 | 1,6 | République populaire de Chine |
| OPEC | 5,8 | 7,7 | 17,4 | OPEP |

The proportion of fuel and lubricant exports taken by the USA increased markedly from 1.1 to 12.2%, mainly as a result of the United Kingdom's exports. At the same time there was a sharp drop in sales to the EFTA countries, with Switzerland and Austria halving their shares to 11.6 and 3.1% respectively (1963: 23.7 and 6% respectively).

En ce qui concerne les combustibles et lubrifiants, c'est essentiellement la part des États-Unis qui a progressé (de 1,1 à 12,2%), notamment en raison des exportations du Royaume-Uni. Dans le même temps, les ventes aux pays de l'AELE baissaient d'une façon spectaculaire, la part de la Suisse et de l'Autriche étant réduite de moitié, tombant de 23,7% en 1963 à 11,6% pour la première et de 6% en 1963 à 3,1% pour la seconde.

2.3 TRADE WITH PRINCIPAL PARTNERS

The aim of this part is to examine the trade of the European Community with a selection of its major trading partners in each continent over the period 1963-79.

For each selected partner, a table is presented showing the percentage of trade accounted for by each broad economic category in the years 1963, 1970, 1974 and 1979. A glance at this table shows how the *structure* of trade has changed over the period, i.e. how the total amounts of imports and exports have been allocated between the BEC groups for each of these years.

2.3 ÉCHANGES PAR PRINCIPAUX PARTENAIRES

Cette section présente une analyse des échanges entre la Communauté européenne et certains de ses principaux partenaires commerciaux des cinq continents au cours de la période 1963-79.

Pour chaque partenaire choisi, un tableau indique le pourcentage du volume total des échanges que représente chaque grande catégorie économique, pour les années 1963, 1970, 1974 et 1979. Ce tableau permet d'apprécier comment *la structure* de ces échanges a évolué par CGE au cours de cette période.

So as to add a perspective to these relative comparisons, the absolute level of trade (in \$ '000 millions) is also given at the head of each table. Full details of the trade by BEC, including comparative tables for the USA, Japan and other industrialized countries, can be found in Annex F.

Pour permettre de mieux apprécier ces comparaisons portant sur des valeurs relatives, la valeur absolue des échanges est également indiquée en tête de chaque tableau (en milliards de dollars). Des détails exhaustifs sur les échanges par GCE, y compris des tableaux comparatifs pour les États-Unis, le Japon et d'autres pays industrialisés, sont présentés à l'annexe F.

2.3.1 Trade with the rest of the world

The overall structure of Community trade has change somewhat during the period under consideration. As shown in the table, the most important product group in 1963, for both imports and exports, was BEC 2, industrial supplies not elsewhere specified. This was still the case in 1979 although the relative importance of this group in total imports had fallen as purchases from BEC 3, fuels and lubricants, increased in importance (particularly up to 1974).

The only other movement of note over the period is shown in the imports of BEC 1, food and beverages, which showed a considerable drop between 1963 and 1970, followed by a slow decline over the remainder of the period.

2.3.1 Échanges commerciaux avec le reste du monde

La structure générale des échanges commerciaux de la Communauté a quelque peu évolué au cours de la période considérée. Ainsi que le montre le tableau, le groupe de produits qui venait en tête en 1963, tant pour les importations que pour les exportations, était la CGE 2, approvisionnements industriels non désignés ailleurs. Cela restait vrai en 1979, bien que l'importance relative de ce groupe par rapport aux importations totales ait décliné à mesure qu'augmentaient les achats de produits de la GCE 3, combustibles et lubrifiants (particulièrement jusqu'en 1974).

La seule autre évolution d'importance au cours de cette période concerne les importations de produits de la GCE 1, aliments et boissons, qui ont considérablement diminué entre 1963 et 1970, puis ont continué à décliner légèrement jusqu'en 1979.

Tab. 2.3.1 Distribution, by broad economic category (BEC), of EC trade with the world
Distribution, par grandes catégories économiques (CGE), du commerce de la CE avec le monde

(%)

| 6. Consumer goods, n.e.s. | 4,0 | 5,8 | 7,0 | 10,2 | 12,4 | 12,9 | 10,7 | 12,0 | 6. Biens de consommation, n.d.a. |

2.3.2 Trade with the USA

The distribution of Community trade with this country, although showing no dramatic changes over the period, has experienced some notable fluctuations. EC exports of fuel, almost non-existent in 1963, ac-

2.3.2 Échanges commerciaux avec les États-Unis

Bien qu'elle ne se soit pas radicalement modifiée au cours de la période de référence, la répartition des échanges commerciaux entre la Communauté européenne et les États-Unis a néanmoins connu d'import-

counted for 5% of the total in 1979, while imports of this product declined in relative importance over the period.

BEC 2, industrial supplies not elsewhere specified, remained the most important group over the entire period (for both imports and exports) although its relative importance declined as BEC 4, machinery and other capital equipment, gained in importance.

Exports of BEC 5, transport equipment, showed positive gains between 1963 and 1974, but then fell back in relative terms by 1979.

tantes fluctuations. Les exportations de pétrole de la Communauté européenne, quasiment inexistantes en 1963, représentaient 5% des exportations totales en 1979, tandis que l'importance relative des importations de ce même produit diminuait au cours de cette période.

La GCE 2, approvisionnements industriels n.d.a., est demeurée le groupe le plus important pendant toute la période de référence (tant pour les importations que pour les exportations), bien que son importance relative ait diminué à mesure que croissait celle de la GCE 4, biens d'équipement.

Les exportations de produits de la GCE 5, matériel de transport, ont augmenté entre 1963 et 1974, mais leur importance relative a ensuite diminué.

Tab. 2.3.2 Distribution, by broad economic category (BEC) of EC trade with the USA
Distribution, par grandes catégories économiques (GCE), du commerce de la CE avec les USA

(%)

2.3.3 Trade with Japan

The most notable feature of the structure of EC trade with Japan is the leap in the relative importance of imports of transport equipment (BEC 5) over the latter part of the period, taking over from BEC 4 (machinery and other capital equipment) as the Community's principal purchase from this country.

On the export side, relative growth was shown in sales of food and consumer goods (BECs 1 and 6) while sales of machinery (BEC 4) and other industrial supplies (BEC 2) fell in importance.

2.3.3 Échanges commerciaux avec le Japon

La caractéristique la plus marquante de la structure des échanges commerciaux entre la Communauté européenne et le Japon est l'accroissement considérable de l'importance relative des importations de matériel de transport (GCE 5) qui devient le premier groupe de produits importés du Japon par la Communauté européenne, place autrefois occupée par la GCE 4, biens d'équipement.

En ce qui concerne les exportations, les ventes d'aliments et boissons (GCE 1) et de biens de consommation (GCE 6) ont connu un accroissement relatif, alors que les ventes de biens d'équipement (GCE 4) et autres approvisionnements industriels (GCE 2) diminuaient.

2.3.4 Trade with Switzerland

Most of the fluctuations in the structure of EC trade with Switzerland have occurred between BECs 2 (industrial supplies not elsewhere specified) and 4 (machinery and capital equipment). While exports of the former have grown in importance, imports have declined in relative terms after peaking in 1974. In BEC 4, both imports and exports have shown a relative decline over the period.

Of lesser absolute importance is BEC 1 (food and beverages) but it is worth while noting that this group, too, has become relatively less significant over the period.

2.3.4 Échanges commerciaux avec la Suisse

Les variations structurelles des échanges commerciaux entre la Communauté européenne et la Suisse ont essentiellement affecté la GCE 2 (approvisionnements industriels n.d.a.) et la GCE 4 (biens d'équipement). Les exportations de produits de la première catégorie ont augmenté, tandis que l'importance relative des importations diminuait après avoir atteint son maximum en 1974. Pour ce qui est de GCE 4, ce sont à la fois les importations et les exportations qui ont connu un déclin relatif au cours de la période de référence.

L'importance absolue de la GCE 1 (aliments et boissons) est moindre, mais il convient de noter que cette catégorie a également quelque peu régressé au cours de cette période.

| 6. Consumer goods, n.e.s. | 16,8 | 15,8 | 16,3 | 12,9 | 15,2 | 18,2 | 18,2 | 17,4 | 6. Biens de consommation, n.d.a. |

2.3.5 Trade with Sweden

EC imports from Sweden are very heavily concentrated in BEC 2 (industrial supplies not elsewhere specified) although this concentration has declined over the years so that in 1979 this product group accounted for just over half of Community purchases from Sweden. This was partly compensated for by an increase in imports of transport equipment (BEC 5) which grew most rapidly in the latter part of the period.

Exports to Sweden are more evenly distributed than imports with BECs 2 (industrial supplies) and 4 (machinery and capital equipment) being the most important.

2.3.5 Échanges commerciaux avec la Suède

La Communauté européenne importe essentiellement de Suède des produits de la GCE 2 (approvisionnements industriels n.d.a.), bien que l'importance de ce groupe ait décliné au fil des années; en 1979, il ne représentait qu'un peu plus de la moitié des importations communautaires en provenance de Suède. Cette diminution a été partiellement compensée par un accroissement, très rapide au cours de la deuxième moitié de la période de référence, des importations de matériel de transport (GCE 5).

Les exportations vers la Suède sont plus équilibrées que les importations, les GCE 2 (approvisionnements industriels) et 4 (biens d'équipement) étant les plus importantes.

2.3.6 Trade with Austria

Community imports from Austria are dominated by BEC 2, industrial supplies not elsewhere specified, although the importance of this category has decreased steadily since 1963. In exports too, BEC 2 exhibits the highest percentage share of the total, but not to the same extent as imports.

EC exports of consumer goods (BEC 6) have grown in importance over the period, as have purchases of this product from Austria.

2.3.6 Échanges commerciaux avec l'Autriche

Les importations communautaires en provenance d'Autriche portent essentiellement sur les produits de la GCE 2, approvisionnements industriels n.d.a., bien que l'importance de cette catégorie n'ait cessé de diminuer depuis 1963. Ce sont également les produits de la GCE 2 qui dominent les exportations, mais à un degré moindre que pour les importations.

Les exportations communautaires de biens de consommation (GCE 6) ont augmenté au cours de la période de référence, ainsi d'ailleurs que les achats de ces mêmes produits à l'Autriche.

2.3.7 Trade with Norway

Up to 1974, the Community's major import from Norway was BEC 2, industrial supplies not elsewhere specified. The exploitation of North Sea oil and gas, however, has resulted in a dramatic change, with BEC 3, fuels, now accounting for 34% of the total, almost equal to the level of BEC 2 imports. The latter is still the predominant export group followed by BEC 4, machinery and capital equipment, which has maintained its steady share of total trade since 1970.

A steady decline has been seen in the importance of transport equipment sales to Norway over the period.

2.3.7 Échanges commerciaux avec la Norvège

Jusqu'en 1974, ce sont les produits de la GCE 2, approvisionnements industriels n.d.a., qui ont constitué l'essentiel des importations communautaires en provenance de Norvège. L'exploitation du pétrole et du gaz de la mer du Nord a cependant provoqué un changement radical, et les produits de la GCE 3, c'est-à-dire les combustibles et lubrifiants, représentent aujourd'hui 34% des importations totales, soit presque autant que la GCE 2. Cette dernière constitue toujours le groupe prédominant pour les exportations, suivie de la GCE 4, biens d'équipement, dont le pourcentage est resté stable depuis 1970.

Le volume des ventes de matériel de transport à la Norvège n'a cessé de décliner au cours de la période de référence.

2.3.8 Trade with Yugoslavia

The structure of Community trade with Yugoslavia has shown dramatic changes over the period under consideration. On the import side, EC purchases of BEC 1 (food and beverages) have, in relative terms, declined considerably, as have those of BEC 2 (industrial supplies) although here the decline was seen only in the latter part of the period. These falls were compensated for to some extent by growth in BEC 6 (consumer goods) and BEC 3 (fuels).

Community exports showed a more stable picture, although considerable growth was shown in BEC 4 (machinery and capital equipment) while exports of industrial supplies not elsewhere specified (BEC 2) declined.

2.3.8 Échanges commerciaux avec la Yougoslavie

La structure des échanges commerciaux entre la Communauté européenne et la Yougoslavie a subi un changement radical au cours de la période de référence. En ce qui concerne les importations, les achats communautaires de produits de la GCE 1 (aliments et boissons) ont considérablement diminué en valeur relative; le même phénomène s'est produit pour la GCE 2 (approvisionnements industriels), bien que dans ce cas, le déclin ne se soit amorcé qu'au cours de la deuxième partie de la période de référence. Ces baisses ont été partiellement compensées par un accroissement des importations de produits de la GCE 6 (biens de consommation) et de la GCE 3 (combustibles).

Les exportations communautaires sont restées plus stables, bien qu'elles aient considérablement augmenté dans la GCE 4 (biens d'équipement) et diminué dans la GCE 2.

2.3.9 Trade with Canada

Trade with Canada is heavily concentrated in BEC 2 (industrial supplies not elsewhere specified) both in terms of imports and exports, with imports of these products accounting for more than two-thirds of all Community purchases from Canada in recent years.

The overall structure of trade has changed very little over the period, with exports to Canada being considerably more diversified than imports from this partner.

2.3.9 Échanges commerciaux avec le Canada

Les échanges commerciaux avec le Canada portent essentiellement sur la GCE 2 (approvisionnements industriels n.d.a.), tant pour les importations que pour les exportations; les importations de ces produits représentent en effet plus des deux tiers de la totalité des achats de la Communauté au Canada au cours des dernières années.

La structure générale des échanges commerciaux s'est très peu modifiée au cours de la période de référence, les exportations vers le Canada étant beaucoup plus diversifiées que les importations en provenance de ce pays.

2.3.10 Trade with the South African Customs Union

Apart from the Republic of South Africa, this grouping embraces Community trade with Botswana, Lesotho and Swaziland.

Imports from this group are heavily concentrated in the first two BECs while exports are mostly accounted for by BECs 2 (industrial supplies not elsewhere specified), 4 (machinery and capital equipment) and 5 (transport equipment) with the first of these showing a relative decline at the end of the period.

It should also be noted that since 1974, imports of fuel products from Southern Africa have increased substantially in importance.

2.3.10 Échanges commerciaux avec l'union douanière sud-africaine

Cette union comprend, outre la république d'Afrique du Sud, le Botswana, le Lesotho et le Swaziland.

Les importations en provenance de ces pays appartiennent avant tout aux deux premières GCE, tandis que les exportations concernent essentiellement les GCE 2 (approvisionnements industriels n.d.a.), 4 (biens d'équipement) et 5 (matériel de transport), la première ayant subi un déclin relatif vers la fin de la période de référence.

Il convient également de noter que depuis 1974, les importations de produits pétroliers en provenance du sud de l'Afrique ont considérablement augmenté.

2.3.11 Trade with Nigeria

While fuels accounted for less than one-fifth of Community imports from Nigeria in 1963, this figure had risen to 91% by 1979, piling all other BECs into insignificance.

On the export side, Community sales of BEC 2, industrial supplies not elsewhere specified, increased in importance up to 1974 but then fell back.

Also notable is the fact that EC exports of fuel products exhibited a very high growth rate between 1974 and 1979 while sales of consumer goods (BEC 6) declined in relative terms.

2.3.11 Échanges commerciaux avec le Nigeria

Alors que les importations de pétrole représentaient, en 1963, moins de 20% des importations totales de la Communauté en provenance du Nigeria, elles avaient atteint 91 % en 1979, reléguant au second plan toutes les autres GCE.

En ce qui concerne les exportations, les ventes de produits de la GCE 2, approvisionnements industriels n.d.a., ont augmenté jusqu'en 1974, puis sont retombées.

Il convient également de noter que les exportations communautaires de produits pétroliers ont fortement augmenté entre 1974 et 1979, tandis que les ventes de biens de consommation (GCE 6) déclinaient en valeur relative.

2.3.12 Trade with Hong Kong

It is perhaps surprising that the pattern of EC trade with Hong Kong has remained quite stable since 1963.

On the import side, a slight relative decline was seen in purchases of BEC 2, industrial supplies not elsewhere specified, compensated for by an increase in purchases of BEC 4 products (machinery and capital equipment). The import picture is, however, dominated by BEC 6, consumer goods, accounting for a steady 80% of all Community purchases.

Sales to Hong Kong are concentrated in BEC 2, industrial supplies, with BECs 4, machinery, and 6, consumer goods, also maintaining their importance.

2.3.12 Échanges commerciaux avec Hong-Kong

Il est sans doute étonnant que la structure des échanges commerciaux entre la Communauté européenne et Hong-Kong soit demeurée très stable depuis 1963.

En ce qui concerne les importations, un léger déclin, en valeur relative, a été constaté dans les achats de produits de la GCE 2 (approvisionnement industriels n.d.a.), déclin compensé par l'accroissement des achats de produits de la GCE 4 (biens d'équipement). Les importations sont cependant dominées par la GCE 6 (biens de consommation) qui se maintient à 80% de l'ensemble des achats communautaires.

Les exportations vers Hong-Kong concernent essentiellement la GCE 2 (approvisionnement industriels); les GCE 4 (équipement) et 6 (biens de consommation) qui sont restées stables.

Tab. 2.3.12 Distribution, by broad economic category (BEC), of EC trade with Hong Kong

2.3.13 Trade with South Korea

In 1963, 91% of all Community imports from this country were included in BEC 2, industrial supplies not elsewhere specified, but by 1979 this had declined to 22%. The counterpart to this was a rapid rise in imports of consumer goods (BEC 6) which accounted for almost 70% of the total in 1979.

Exports to South Korea are predominantly accounted for by BEC 4 (machinery and capital equipment) which is in relative decline, BEC 2 (industrial supplies) also in decline since 1974, and BEC 5 (transport equipment) which has grown in importance in recent years.

2.3.13 Échanges commerciaux avec la Corée du Sud

En 1963, les produits de la GCE 2 (approvisionnement industriels n.d.a.) représentaient 91% des achats communautaires en Corée du Sud; en 1979, ce chiffre était tombé à 22%. Cette baisse a été compensée par l'accroissement rapide des importations des biens de consommation (GCE 6), qui représentaient presque 70% des importations totales en 1979.

Les exportations vers la Corée du Sud concernent essentiellement la GCE 4 (biens d'équipement), qui connaît un déclin relatif, la GCE 2 (approvisionnement industriels), également en déclin depuis 1974, et la GCE 5 (matériel de transport), qui a pris de l'importance ces dernières années.

2.3.14 Trade with Taiwan

In 1963, Community purchases from Taiwan were wholly concentrated in BECs 1 (food and beverages) and 2 (industrial supplies not elsewhere specified). By 1979, this distribution has changed dramatically so that BEC 6 (consumer goods) now accounts for over one half of all purchases with BEC 4 (machinery and capital equipment) also growing in importance.

Sales to Taiwan by the Community are concentrated in BECs 2 (industrial supplies) and 4 (machinery) with the latter in relative decline since 1970. BEC 5 (transport equipment), which was an important category in 1973 in relative terms, fell in importance in subsequent years but has now increased again to account for 13% of total sales to this country.

2.3.14 Échanges commerciaux avec T'ai-wan

En 1963, les importations communautaires en provenance de T'ai-wan concernaient uniquement la GCE 1 (aliments et boissons) et la GCE 2 (approvisionnement industriels n.d.a.). Entre 1963 et 1979, ce schéma s'est profondément modifié et les produits de la GCE 6 (biens de consommation) représentent aujourd'hui plus de la moitié des importations totales, tandis que la GCE 4 (biens d'équipement) prend aussi de l'importance.

Les exportations communautaires vers T'ai-wan concernent principalement les produits des GCE 2 (approvisionnements industriels) et 4 (équipements), ces derniers connaissant un déclin relatif depuis 1970. La GCE 5 (matériel de transport) qui était en 1963 une catégorie importante en valeur relative, a perdu de son importance dans les années suivantes, pour en regagner ensuite. Elle représente actuellement 13% des ventes totales à ce pays.

2.3.15 Trade with Iran

Community imports from Iran are, of course, centred on BEC 3, fuels, although the importance of this group has declined since 1974. The only other BEC of note, in terms of imports, is consumer goods, which accounted for 8% of total Community purchases in 1979.

EC sales to Iran are concentrated on the high technology BECs, with one-third of exports included in each of BEC 2, industrial supplies not elsewhere specified and BEC 4, machinery and capital equipment. BEC 5, transport equipment, has declined in importance in recent years.

2.3.15 Échanges commerciaux avec l'Iran

Les importations communautaires en provenance d'Iran sont bien sûr axées sur la GCE 3 (combustibles), bien que l'importance de ce groupe ait diminué depuis 1974. Les biens de consommation, qui représentaient 8% de l'ensemble des achats communautaires en 1979, constituent la seule autre GCE de quelque importance en matière d'importations.

Les ventes de la Communauté européenne à l'Iran sont concentrées sur les GCE à technologie avancée, la GCE 2 (approvisionnement industriels n.d.a.) et la GCE 4 (biens d'équipement) représentant chacune un tiers des exportations totales. La GCE 5 (matériel de transport) a perdu de l'importance au cours des dernières années.

2.3.16 Trade with Saudi Arabia

Not surprisingly, virtually, all EC imports from Saudi Arabia fall into BEC 3, fuels, with all other groups being minuscule in comparison.

Sales from the Community embrace all of the other BECs excepts fuels, with predominance in industrial supplies not elsewhere specified (BEC 2) and machinery and capital equipment (BEC 6). Exports of transport equipment (BEC 5) are also important although the proportion of exports in this category has fallen recently.

2.3.16 Échanges commerciaux avec l'Arabie Saoudite

La majeure partie des importations en provenance d'Arabie Saoudite appartiennent bien évidemment à la GCE 3 (combustibles), les autres catégories étant comparativement négligeables.

Les exportations de la Communauté européenne concernent toutes les GCE, autres que les combustibles, les catégories prédominantes étant la GCE 2 (approvisionnement industriels n.d.a.) et la GCE 6 (biens d'équipement). Les exportations de matériel de transport (GCE 5) sont également importantes, bien qu'elles aient récemment diminué.

2.3.17 Trade with Brazil

Imports from Brazil are almost wholly grouped into the first two BECs, food and beverages and industrial supplies not elsewhere specified, with the latter accounting for over half of all purchases in 1979.

Exports of BEC 2 (industrial supplies) are also important for the Community, as are sales of machinery and capital equipment. These two BECs covered almost 80% of EC sales to Brazil in 1979.

2.3.17 Échanges commerciaux avec le Brésil

Les importations en provenance du Brésil se concentrent presque exclusivement sur les deux premières GCE, aliments et boissons et approvisionnements industriels n.d.a.; cette dernière représentait en 1979 plus de la moitié de ces importations.

Les exportations des produits de la GCE 2 (approvisionnement industriels n.d.a.) sont également importantes pour la Communauté, de même que les ventes des biens d'équipement. Ces deux GCE représentaient près de 80% des ventes de la Communauté européenne au Brésil en 1979.

Tab. 2.3.17 Distribution, by broad economic category (BEC), of EC trade with Brazil

2.3.18 Trade with Mexico

The principal product group imported by the EC from Mexico is BEC 2, industrial supplies not elsewhere specified, although the relative importance of this category has declined by half since 1963 as other BECs (notably food and beverages and transport equipment) have gained in importance. In fact, purchases of transport equipment (BEC 5), which were practically non-existent in 1963, accounted for almost 17% of total imports in 1979.

The most important export category is BEC 4, machinery and capital equipment, although sales of BEC 2, industrial supplies, and BEC 5, transport equipment, are almost as significant.

2.3.18 Échanges commerciaux avec le Mexique

Les produits importés du Mexique par la CE appartiennent essentiellement à la GCE 2 (approvisionnement industriels n.d.a.), mais l'importance relative de cette catégorie a diminué de moitié depuis 1963, alors que d'autres GCE (notamment les produits alimentaires et boissons et le matériel de transport) gagnaient de l'importance. En effet, les achats de matériel de transport (GCE 5), pratiquement nuls en 1963, représentaient en 1979 près de 17% des importations totales.

En ce qui concerne les exportations, la catégorie la plus importante est la GCE 4 (biens d'équipement), bien que les ventes des produits de la GCE 2 (approvisionnement industriels) et de la GCE 5 (matériel de transport) soient presque aussi élevées.

2.3.19 Trade with the USSR

The structure of imports from the USSR has changed considerably since 1963 with a steep decline in the importance of EC purchases of BEC 2 (industrial supplies not elsewhere specified) and a corresponding increase in purchases of fuels (BEC 3).

On the export side the structure has not changed markedly over the period with most sales being concentrated in BEC 2 (industrial supplies) and BEC 4 (machinery and capital equipment).

2.3.19 Échanges commerciaux avec l'URSS

La structure des importations en provenance d'URSS a considérablement changé depuis 1963; les achats de produits de la GCE 2 (approvisionnements industriels n.d.a.) ont fortement baissé, tandis que les importations de combustibles (GCE 3) augmentaient de façon correspondante.

La structure des exportations, quant à elle, n'a pas beaucoup changé au cours de cette période; la plus grande partie des ventes s'est concentrée sur les GCE 2 (approvisionnements industriels) et GCE 4 (biens d'équipement).

2.3.20 Trade with China

EC imports from China are mainly covered by three BEC groups, although the relative importance of each has varied over the period. While, in 1963, BEC 2, industrial supplies not elsewhere specified, accounted for over three-quarters of all Community purchases, this figure had fallen to one-half by 1979. This decline was mainly compensated for by an increase in imports of consumer goods (BEC 6) which, in 1979, accounted for one-quarter of total purchases. The balance of imports is made up by BEC 1, food and beverages. Also worthy of note is the fact that imports of fuel entered the picture for the first time in 1979.

The structure of Community exports to China has changed considerably over the period under study with the importance of food exports (BEC 1) dropping dramatically, while exports of machinery and capital equipment (BEC 4) have shown enormous relative gains. Exports of industrial supplies (BEC 2) have remained relatively important throughout the period.

2.3.20 Échanges commerciaux avec la Chine

Les importations communautaires en provenance de Chine appartiennent principalement à trois GCE, mais l'importance relative de chacune d'elles a varié au cours de la période de référence. Les produits de la GCE 2 (approvisionnements industriels n.d.a.), qui représentaient plus des trois quarts des importations communautaires en 1963, n'en constituaient plus que la moitié en 1979. Ce déclin a essentiellement été compensé par l'accroissement des importations de biens de consommation (GCE 6) qui constituaient, en 1979, un quart du total des achats. Le reste des importations appartenait à la GCE 1 (produits alimentaires et boissons). Il convient également de noter la première apparition des importations de pétrole en 1979.

La structure des exportations de la Communauté européenne vers la Chine s'est considérablement modifiée au cours de la période de référence; les exportations de produits alimentaires (GCE 1) ont baissé de façon spectaculaire, tandis que les ventes de biens d'équipement (GCE 4) ont beaucoup augmenté en valeur relative. Les exportations d'approvisionnements industriels (GCE 2) sont restées relativement importantes tout au long de cette période.

Section 3 — Principal trends in trade of Member States

3.1 INTRODUCTION

The aim of this section is to analyse briefly trends and structure of each Member State's trade with non-Community countries by broad economic categories (BEC) and principal geographical areas of origin and destination of the goods. Two types of tables are given for each country: the five main BEC and the five main trading-partner areas in decreasing order in selected years. The range of products comprises the following categories:

- 11 Primary foodstuffs and beverages
- 12 Processed foodstuffs and beverages

- 21 Primary industrial supplies
- 22 Processed industrial supplies
- 31 Primary fuels and lubricants
- 32 Processed fuels and lubricants

- 4 Machinery, other capital equipment (except transport)
- 51 Passenger motor-cars
- 52 Transport equipment other than motor-cars
- 53 Parts and accessories

- 6 Consumer goods, n.e.s.

The geographical areas comprise the following groupings (Annex IV, p. 646):

- 1 World
- 2 EUR 9
- 3 Western Europe excluding EUR 9
- 4 Eastern Europe
- 5 North America
- 6 Central and South America
- 7 North Africa
- 8 Africa south of the Sahara

Section 3 — Principales tendances du commerce des pays membres

3.1 INTRODUCTION

Ce chapitre se propose d'étudier brièvement l'évolution et la structure des échanges de chaque État membre avec l'extérieur de la Communauté par grandes catégories de produits et grandes zones géographiques d'origine et destination des marchandises. Pour chaque pays, on présente deux types de tableaux: les cinq principales catégories économiques et les cinq principales zones partenaires en ordre décroissant à des années différentes. Pour les produits, la base de choix est représentée par les catégories suivantes:

- 11 Produits alimentaires et boissons non transformés
- 12 Produits alimentaires et boissons ayant subi une transformation

- 21 Produits industriels de base
- 22 Produits industriels ayant subi une transformation
- 31 Combustibles et lubrifiants de base
- 32 Produits combustibles et lubrifiants ayant subi une transformation

- 4 Biens d'équipement (sauf matériel de transport et leurs parties, pièces détachées et accessoires)
- 51 Automobiles pour le transport des personnes
- 52 Matériel de transport sauf automobiles
- 53 Parties, pièces détachées, accessoires du matériel de transport

- 6 Biens de consommation, n.d.a.

Quant aux zones géographiques, il s'agit des regroupements suivants (Annexe IV, p. 646):

- 1 Monde
- 2 EUR 9
- 3 Europe occidentale non CE
- 4 Europe de l'Est
- 5 Amérique du Nord
- 6 Amérique centrale et du Sud
- 7 Afrique du Nord
- 8 Afrique sub-saharienne

- 9 Middle East
- 10 Central Asia
- 11 South-East Asia
- 12 Japan
- 13 Asia: Centrally-planned economies
- 14 Australia, New Zealand, South Africa
- 15 Secret and rest of the world

- 9 Moyen-Orient
- 10 Asie centrale
- 11 Asie du Sud-Est
- 12 Japon
- 13 Asie: pays à commerce d'État
- 14 Australie, Nouvelle-Zélande, Afrique du Sud
- 15 Secret et reste du monde

3.2 FRANCE'S TRADE WITH NON-COMMUNITY COUNTRIES

3.2.1 Exports

The structure of French exports by BEC shows only one notable change between 1963 and 1979, namely the substantial increase in the proportion of capital goods (excluding transport equipment), which, in 1979, accounted for roughly a quarter of France's sales to non-Community countries, compared with only 15% in 1963. First place is still held, however, by processed industrial supplies, with 29% of total exports.

3.2 LES ÉCHANGES DE LA FRANCE AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.2.1 Exportations

La structure des exportations françaises par grandes catégories économiques présente un seul changement notable entre 1963 et 1979: il s'agit de l'accroissement assez important de la part des biens d'équipement (sans matériel de transport) qui ont atteint en 1979 environ le quart du total des ventes de la France à l'extérieur de la Communauté, alors qu'elles ne représentaient que 15% en 1963. La première place est toutefois toujours tenue par les biens d'approvisionnement industriels transformés avec 29% des exportations totales.

| Total | 100 | Total | 100 |

As for the geographical breakdown, the non-Community countries of Western Europe are still the prime market for French exports. This means that France sells over 65% of its goods to Western Europe (13% + 52% to the EC). On the other hand, North Africa's share, which had been fairly large in 1963 (19%), fell to 12% in 1979. Otherwise there were no very great changes, apart from the increase in the Middle East's share (represented mainly by the petroleum-producing countries), which went up from 4% in 1963 to 10% in 1979.

Du point de vue de la répartition géographique on remarque d'une part que les pays d'Europe occidentale non communautaires demeurent le débouché privilégié des exportations françaises. Ceci signifie que plus de 65% des ventes de la France s'effectuent dans l'Europe occidentale (13% + 52% vers la CEE). Par contre la part de l'Afrique du Nord qui était relativement importante en 1963 (19%) est descendue à 12% en 1979. Pour le reste on ne remarque pas de très grands changements, si l'on excepte l'accroissement de la part du Moyen-Orient, représenté essentiellement par les pays producteurs de pétrole, qui est passée de 4% en 1963 à 10% en 1979.

3.2.2 Imports

There were substantial changes in the structure of French imports as a result of the increasing significance of oil from 1974 onwards. The proportion of primary fuels (BEC 31), which had remained virtually constant at one-fifth of France's purchases from non-Community countries in the ten-year period 1963-73, went up abruptly to 38% between 1974 and 1976, only to fall back to 34% in 1979. Equally substantial, but at a steadier pace, was the increase in imports of processed industrial supplies and capital goods, the value of which went up more than tenfold (at current prices) between 1963 and 1979.

3.2.2 Importations

La structure des importations françaises a été profondément modifiée par l'importance prise par le pétrole depuis 1974. Les produits combustibles non transformés (GCE 31) qui ont représenté presque constamment dans la décennie 1963-1973 le cinquième des achats de la France à l'extérieur de la Communauté, sont passés brutalement à 38% de 1974 à 1976 pour redescendre à 34% en 1979. Également importante mais plus progressive a été l'augmentation des importations des biens d'approvisionnement industriels transformés et des biens d'équipement qui ont plus que décuplé en valeur courante de 1963 à 1979.

**France: Total imports
by BEC**

| 1963 | % |

| Total | 100 | Total | 100 |

As regards the areas of origin of the imports, the table below shows the leading position occupied by the Middle East, which accounts for more than a quarter of France's purchases outside the Community. Similarly, note should also be made of the ever-increasing share held by the rest of Western Europe, which supplies 20% of French imports, whereas North Africa's share fell steadily from 18% in 1963 to 14% in 1970 and 5% in 1979.

Pour ce qui concerne les zones d'origine des importations, il faut remarquer la place très importante prise par le Moyen-Orient d'où proviennent plus du quart des achats de la France en dehors de la Communauté. Dans le même sens on remarque la part toujours plus grande prise par le reste de l'Europe occidentale d'où proviennent 20% des importations alors que la part de l'Afrique du Nord a baissé progressivement de 18% en 1963 à 14% en 1970 et à 5% en 1979.

**3.3 THE FEDERAL REPUBLIC OF GERMANY'S
TRADE WITH NON-COMMUNITY COUNTRIES**

3.3.1 Exports

The structure of German exports by BEC has remained practically unchanged since 1963. There is a very high degree of concentration on capital goods and processed industrial supplies, which together account for approximately two-thirds of the Federal Republic of Germany's sales to non-Community countries. The table below also shows the substantial proportion accounted for by transport equipment, in particular motor-cars (BEC 51), which amounted to 8% of total exports in 1979.

**3.3 LES ÉCHANGES DE LA RF D'ALLEMAGNE
AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ**

3.3.1 Exportations

La structure des exportations allemandes par grandes catégories économiques n'a pratiquement pas varié depuis 1963. Elle présente une très forte concentration sur les biens d'équipement et les biens d'approvisionnement industriels transformés qui représentent ensemble environ les deux tiers des ventes de la RF d'Allemagne à l'extérieur de la Communauté. On peut remarquer également la très grande importance des moyens de transport et en particulier des voitures automobiles (GCE 51) qui ont constitué, en 1979, 8% des exportations totales.

**FR of Germany: Total exports
by BEC**

| Total | 100 |

The geographical breakdown of exports shows a significant expansion of German trade towards the markets of the Middle East and Eastern Europe, whose share went up from 4% to 8% and from 5% to 10% respectively during the period under review. However, the non-Community countries of Western Europe are still the best customers for German products, taking a share of 40%, followed by North America which took

La répartition géographique des exportations montre que le commerce de la RF d'Allemagne s'est développé de façon significative vers les marchés du Moyen-Orient et de l'Europe de l'Est dont la part est passée respectivement de 4% à 8% et de 5% à 10%. On remarque toutefois que les pays d'Europe occidentale en dehors de la Communauté demeurent les meilleurs clients des produits allemands avec

14% of the Federal Republic's exports in 1979. As for the other areas, the table shows a steady decline in the share of Central and South America, which fell from 9% in 1963 to 6% in 1979, while German penetration of all the other markets in developing and State-trading countries was more rapid.

40%, suivis de l'Amérique du Nord qui a absorbé 14% des exportations de la République fédérale. Pour le reste on remarque une perte progressive de l'importance de l'Amérique centrale et du Sud dont la part est passée de 9% en 1963 à 6% en 1979 alors que sur tous les autres marchés des pays en voie de développement et des pays à commerce d'État la pénétration allemande s'est effectuée plus rapidement.

3.3.2 Imports

The structure of German imports has changed somewhat since 1963. Processed industrial supplies are still the most important category with more than 23% of total imports from outside the Community. On the other hand, primary industrial supplies, which made up 20% of the total in 1963 and 16% in 1970, accounted for only 8% in 1979. Apart from the ever-increasing importance of petroleum and other primary energy-generating products, the main feature of the table below is the almost twofold increase, from 8% to 15%, in the proportion of consumer goods between 1970 and 1979.

3.3.2 Importations

La structure des importations de la République fédérale a quelque peu varié depuis 1963. Les biens d'approvisionnement industriels transformés demeurent la catégorie de produits la plus importante avec plus de 23% des importations totales hors CE. Par contre, les mêmes produits non transformés qui représentaient en 1963, 20% du total et en 1970, 16%, ne représentent plus que 8% en 1979. Outre la place de plus en plus importante du pétrole et des autres produits énergétiques non transformés, il faut remarquer qu'entre 1970 et 1979 la part des biens de consommation a presque doublé, pour passer de 8 à 15%.

As regards the origin of the imports, the table below shows the steady decline in North America's share since 1963. This area supplied 28% of the Federal Republic of Germany's goods in 1963, compared with only 25% in 1970 and 15% in 1979. On the other hand, the share of the non-Community countries of Western Europe has remained steady at between 27% and 29% for more than 15 years. The Far East's share is on the increase: imports from Japan currently account for 6% (2% in 1963) and those from the other countries of South-East Asia for 7% (3% in 1963).

Du point de vue de l'origine des importations on remarque la baisse progressive mais constante depuis 1963 de la part de l'Amérique du Nord. Cette zone fournissait en 1963, 28% des marchandises à l'Allemagne; elle n'en fournissait que 25% en 1970 pour atteindre 15% en 1979. Par contre, la part des pays de l'Europe de l'Ouest autres que communautaires est demeurée constante entre 27 et 29% depuis plus de 15 ans. En hausse, la part de l'Extrême-Orient: les importations en provenance du Japon représentent actuellement 6% (2% en 1963) et celles des autres pays du Sud-Est asiatique 7% (3% en 1963).

3.4 ITALY'S TRADE WITH NON-COMMUNITY COUNTRIES

3.4 LES ÉCHANGES DE L'ITALIE AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.4.1 Exports

3.4.1 Exportations

The structure of Italian exports remained practically unchanged between 1963 and 1979. Three categories of products, namely industrial supplies, capital goods and consumer goods, together make up—in that order—between 70% and 75% of Italy's total sales outside the Community, and refined petroleum products have always accounted for between 6% and 7%. The only significant change is the steady decline in the proportion of processed foodstuffs, which still accounted for 6% of exports in 1963 but only 2% in 1979.

La structure des exportations italiennes n'a pratiquement pas varié de 1963 à 1979. Trois catégories de produits, les approvisionnements industriels, les biens d'équipement et les biens de consommation se partagent dans l'ordre entre 70 et 75% du total des ventes de l'Italie à l'extérieur de la Communauté, et les produits pétroliers raffinés ont toujours représenté entre 6 et 8%. La seule modification qu'on peut mettre en évidence est la baisse constante de la part des produits de l'industrie agro-alimentaire qui représentent encore 6% des exportations en 1963 et qui ne représentent plus que 2% en 1979.

| Total | 100 | Total | 100 |

As for the destination of Italian exports, disregarding the rest of non-Community Western Europe which is still the largest market (30% in 1979), particular mention must be made of the very high degree of penetration in the Middle East, whose share went up from 5% in 1963 and 1970 to almost 15% in 1979. In addition, Italy still has a high degree of penetration in North Africa and Eastern Europe, while Central and South America's share fell steadily from 11% in 1963 to 7% in 1979. It should also be noted that Italian products are not found to any extent on the markets of Central and Eastern Asia (including Japan), which account for a total of 6% of Italian exports.

Pour ce qui est de la destination des exportations italiennes, mis à part le reste de l'Europe occidentale non communautaire qui demeure la zone de débouchés la plus importante (30% en 1979), il faut remarquer la très forte pénétration dans la zone du Moyen-Orient, dont la part est passée de 5% en 1963 et 1970 à presque 15% en 1979. L'Italie maintient par ailleurs une importante zone de pénétration en Afrique du Nord et aussi en Europe de l'Est, alors que la part de l'Amérique centrale et de l'Amérique du Sud a baissé progressivement de 11% en 1963 à 7% en 1979. Il faut par ailleurs remarquer que l'Italie est très peu présente sur les marchés d'Asie centre-Est (Japon compris) qui représentent au total 6% des exportations italiennes.

3.4.2 Imports

As a result of Italy's dependence on outside energy supplies, approximately 38% of its imports comprise primary energy products, which as long ago as 1963

3.4.2 Importations

La dépendance énergétique extérieure de l'Italie fait que 38% des importations sont représentées par des produits énergétiques non transformés, qui consti-

made up 18% of Italian purchases from non-Community countries. It should be pointed out, however, that some of the crude petroleum is processed in Italy and then re-exported either to the other Member States or to non-Community countries. The remainder of Italy's purchases comprise mainly processed (23%) and primary (11%) industrial supplies, not forgetting the share of primary foodstuffs which, although falling slightly, is still quite substantial at around 8% of the total.

tuaiet déjà en 1963, 18% des achats italiens à l'extérieur de la Communauté. Il faut toutefois remarquer qu'une partie du pétrole brut est transformée en Italie et ensuite réexportée soit vers les autres États membres, soit à l'extérieur de la CE. Pour le reste, les achats de l'Italie s'adressent principalement aux biens d'approvisionnement industriel transformés (23%) et non transformés (11%) sans oublier la part des produits alimentaires de base qui, bien qu'en légère baisse, demeure assez importante avec environ 8% du total.

| Other products Autres produits | 13 |
| Total | 100 |

As regards the areas of origin of Italian imports, the table below shows, in keeping with the above remarks about the importance of energy products, a concentration on the areas supplying these products. The Middle East is now Italy's largest supplier outside the Community with 24% of the total, and substantial shares of Italian imports are being won by North Africa (11%) and Eastern Europe (9%), where Italy buys a considerable quantity of gas and refined petroleum products. The share of the other countries of Western Europe remained constant at around 20%, while that of North America fell steadily from 25% in 1963 to 22% in 1970 and 14% in 1979.

Pour ce qui concerne les zones d'origine des importations italiennes on remarque, en rapport à ce qui vient d'être dit sur l'importance des produits énergétiques, une concentration sur les zones d'approvisionnement de ces produits. Le Moyen-Orient devient le premier fournisseur de l'Italie en dehors de la Communauté avec 24% du total et également importants deviennent l'Afrique du Nord (11%) et l'Europe de l'Est (9%) où l'Italie achète une grande partie de gaz et de produits pétroliers raffinés. La part des autres pays d'Europe occidentale s'est maintenue stable autour de 20% alors que celle de l'Amérique du Nord a baissé progressivement de 25% en 1963 à 22% en 1970 et à 14% en 1979.

3.5 THE NETHERLANDS' TRADE WITH NON-COMMUNITY COUNTRIES

3.5.1 Exports

The structure of Dutch exports by BEC has remained practically unchanged since 1963. Processed industrial supplies still account for between 30% and 33% of the total, and capital goods for around 20% to 25%. Of the other categories, processed foodstuffs still make up a fairly substantial proportion of the Netherlands' sales to non-Community countries (13%), as do consumer goods (12%) and processed energy-generating products (13%).

Netherlands: Total exports by BEC

| 1963 | % |
|---|-----|
| Ind. Supplies, processed Approv. indust. transf. | 30 |

| Processed food Industrie agro-alimentaire | 18 |
| Consumer goods Biens de consommation | 15 |
| Processed fuels Combustibles transformés | 8 |
| Other products Autres produits | 8 |
| Total | 100 |

About one-third of Dutch exports to non-Community countries go to the other countries of Western Europe, whose share, although substantial, is declining slightly after reaching 37% of the total in 1973. The Netherlands' penetration of the Middle East markets is increasing all the time. This area's share, which amounted to 5% between 1963 and 1973, went up steadily, to reach 12% in 1979. On the other hand, Central and South America's share is declining (11% in 1963 and 7% in 1979), while that of Africa south of Sahara is steady at around 8%.

3.5 LES ÉCHANGES DES PAYS-BAS AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.5.1 Exportations

La structure des exportations néerlandaises par grandes catégories économiques ne présente pratiquement aucun changement depuis 1963. Les biens d'approvisionnement industriels transformés représentent toujours entre 30 et 33% du total et les biens d'équipement autour de 20-25%. Pour le reste il faut noter que les produits de l'industrie agro-alimentaire maintiennent une place assez importante dans les ventes des Pays-Bas à l'extérieur de la Communauté (13%) ainsi que les produits de consommation (12%) et les produits combustibles transformés (13%).

Pays-Bas: Exportations totales par GCE

| Total | 100 | Total | 100 |

Environ le tiers des exportations néerlandaises, en dehors de la Communauté, se dirige vers les autres pays d'Europe occidentale, la part de cette zone, bien qu'importante, est en légère baisse après avoir atteint en 1973, 37% du total. En hausse constante on notera la pénétration commerciale des Pays-Bas sur les marchés du Moyen-Orient. Ceux-ci qui représentaient 5-6% entre 1963 et 1973 pour passer à 12% en 1979. En baisse par contre la part de l'Amérique centrale et de l'Amérique du Sud (11% en 1963 et 7% en 1979) et stable la part de l'Afrique sub-Sahara, autour de 8%.

3.5.2 Imports

As was the case with nearly all the Member States, Dutch imports were influenced by the rise in the price of petroleum products, although to a lesser extent; firstly because the Netherlands is itself a producer and exporter of energy-generating products, and secondly because it has always imported considerable quantities of crude petroleum for its refineries. In fact, this category of products accounted for 17% of total imports as long ago as 1967, rising to 23% in 1970 and 35% in 1974, then falling steadily to 26% in 1978. Following the second sharp rise in petroleum prices in 1979, this category's share went up again to 29% of the total. Of the other categories primary foodstuffs (12%) and, as with most of the other countries, processed industrial supplies (17%) account for a substantial proportion of total imports.

3.5.2 Importations

Comme la plupart des pays membres les importations néerlandaises ont été influencées par la hausse du prix des produits pétroliers, bien que d'une manière moins importante; d'une part, parce que les Pays-Bas sont eux-mêmes producteurs et exportateurs de produits énergétiques et, d'autre part, parce que les Pays-Bas ont toujours été des gros importateurs de pétrole brut destiné à leurs raffineries. En effet, cette catégorie de produits représentait déjà en 1967 17% du total; elle est passée à 23% en 1970, à 35% en 1974 pour redescendre progressivement à 26% en 1978. Suite à la deuxième poussée des prix du pétrole en 1979, la part de cette catégorie de produits est à nouveau passée à 29% du total. Parmi les autres marchandises, on remarque la place importante des produits alimentaires non transformés 12% et, comme pour la plupart des autres pays, celle des biens d'approvisionnements industriels transformés qui représentent 17% du total.

| Total | 100 | Total | 100 |

A good proportion of Dutch imports comes from North America, which accounts for almost as large a share of purchases from non-Community countries as the Middle East (21%). Africa's share is also rising (10%), again as a result of substantial purchases of petroleum from the Gulf of Guinea. The share of other areas, such as non-Community Western Europe and above all South America, shows a relative decline, while the proportion of imports from the Far East (including Japan) is rising steadily (12% in 1979).

Les importations néerlandaises sont orientées de façon assez importante vers l'Amérique du Nord qui représente autant que le Moyen-Orient (21%) dans les achats en dehors de la Communauté. En hausse également la part de l'Afrique sub-Sahara (10%), toujours en raison des importants achats de pétrole provenant du golfe de Guinée. La part d'autres zones telles que l'Europe occidentale non CE et surtout l'Amérique du Sud est relativement en baisse, alors que la part des importations provenant de l'Extrême-Orient, Japon compris, est en baisse progressive (12% en 1979).

**3.6 BELGIUM-LUXEMBOURG'S (BLEU) TRADE
WITH NON-COMMUNITY COUNTRIES**

3.6.1 Exports

Although their share is declining, primary and processed industrial supplies accounted for more than half of the BLEU's exports to non-Community countries throughout the period under review: processed industrial supplies fell from 55% in 1963 to 47% in 1970 and 35% in 1979, while primary industrial supplies maintained an average of around 14%. The proportion of capital goods went up quite considerably: 9% of sales in 1963, 12% in 1970 and 13% in 1979.

3.6 LES ÉCHANGES DE LA BELGIQUE-LUXEMBOURG (UEBL) AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.6.1 Exportations

Bien qu'en baisse la part des biens d'approvisionnement industriels transformés et non transformés a représenté pendant toute la période considérée plus de la moitié des exportations de l'UEBL vers l'extérieur de la Communauté: les produits transformés sont descendus de 55% en 1963, à 47% en 1970 et à 35% en 1979, alors que les produits industriels non transformés se sont maintenus autour d'une moyenne de 14%. La part des biens d'équipement est en hausse: 9% des ventes en 1963, 12% en 1970 et 13% en 1979.

The non-Community countries of Western Europe are by far the biggest market for the BLEU, accounting for around 32% of its sales throughout the reference period. On the other hand, North America's share fell steadily from 29% in 1963 to 15% in 1979. As in the case of the other Member States, penetration of the petroleum-exporting countries' markets was more

Les pays d'Europe occidentale non CE constituent de loin le plus important débouché des ventes de l'UEBL, 32% environ sur toute la période. Par contre, la part de l'Amérique du Nord a baissé progressivement de 29% en 1963 à 15% en 1979. Comme pour les autres pays membres, la pénétration commerciale s'est effectuée de manière plus rapide vers les mar-

rapid, especially in the Middle East which took 11% of total exports in 1979. A substantial increase was recorded at the beginning of the 1970s in sales to Eastern Europe, which took 10% of total exports in 1974-75. Since then, this area's share has fallen to 7%.

chés des pays exportateurs de pétrole et en particulier du Moyen-Orient qui représente, en 1979, 11% des exportations totales. Une progression assez importante avait été enregistrée au début des années 70 par les ventes vers l'Europe de l'Est, cette zone absorbant en 1974-1975, 10% du total. Depuis ces années la part de cette zone a légèrement baissé jusqu'à 7%.

3.6.2 Imports

The structure of the BLEU's imports has changed in the last few years as a result of the ever-increasing share taken by primary energy products, which went up from 13% in 1963 to 15% in 1970, and 24% in 1979. The proportions of the other categories of products therefore declined somewhat overall: processed industrial supplies fell from 26% to 22% between 1963 and 1979, primary industrial supplies from 26% to 19% and capital goods from 8% to 7%.

3.6.2 Importations

La structure des importations de l'UEBL a été modifiée ces dernières années par la place de plus en plus importante qui a été prise par les produits énergétiques non transformés qui sont passés de 13% en 1963 à 15% en 1970, à 24% en 1979. L'importance des autres catégories de produits est, de ce fait, en baisse relative sur l'ensemble: les biens d'approvisionnement industriels transformés passent de 26 à 22% entre 1963 et 1979, les mêmes produits non transformés, de 26 à 19% et les biens d'équipement de 8 à 7%.

As regards the areas of origin of the BLEU's imports, the table below shows, as for all the other Member States, a very substantial increase in the Middle East's share (19% in 1979) and a fall, especially in the last few years, in North America's share, which went from 29% in 1970 to 23% in 1979. The other non-Community countries of Western Europe maintained their position on the BLEU import market (around 19%), while Central and South America's share fell quite appreciably from the 10-11% of the 1960s to 5% to 6% at the end of the 1970s.

Pour ce qui concerne les zones d'origine des importations de l'UEBL, on remarque comme pour tous les autres pays membres, une très forte hausse de la part du Moyen-Orient (19% en 1979) et une baisse, surtout ces dernières années, de la part de l'Amérique du Nord qui est passée de 29% en 1970 à 23% en 1979. Les autres pays d'Europe occidentale hors CE, maintiennent leur part de marché comme source des achats de l'UEBL ($\pm 19\%$) alors que la part de l'Amérique centrale et de l'Amérique du Sud est en baisse assez sensible: des 10-11% des années soixante, on est passé à 5-6% à la fin des années soixante-dix.

3.7 THE UNITED KINGDOM'S TRADE WITH NON-COMMUNITY COUNTRIES

3.7 LES ÉCHANGES DU ROYAUME-UNI AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.7.1 Exports

3.7.1 Exportations

The structure of the United Kingdom's exports did not undergo any substantial modifications during the period under review. In fact, the only change was the slight decline in the proportion of processed industrial supplies, which fell in recent years from 29% in 1975 to 24% in 1979. On the other hand, the proportion of primary supplies went up from 5% to 6% at the beginning of the 1970s to 10% in 1979. The proportions of the other major categories of products remained virtually unchanged: around 24% for capital goods, around 11% for consumer goods and 9% for motor vehicle parts and accessories.

La structure des exportations du Royaume-Uni n'a pas subi de modifications de relief au cours de la période considérée. Le seul changement concerne la légère baisse de la part des biens d'approvisionnement industriel transformés, qui est passée au cours des dernières années de 29% en 1975 à 24% en 1979. Par contre la part des biens d'approvisionnement non transformés a progressé de 5-6% au début des années soixante-dix à 10% en 1979. La part des autres grandes catégories de produits n'a pratiquement pas varié: $\pm 24\%$ pour les biens d'équipement, $\pm 11\%$ pour les biens de consommation et 9% pour les parties et pièces détachées de voitures automobiles.

The destination of the United Kingdom's exports outside the Community has changed quite considerably over the last 15 years. The main feature is a decline on the traditional markets such as the countries of Central and Southern Asia (7% in 1963 and 3% in 1979) or the industrialized countries of the southern hemisphere (Australia, New Zealand and South Africa), whose share of British exports fell from 18% to 8% between 1963 and 1979. While the other markets kept more or less the same percentage of total exports, the Middle East's share rose steadily to 12% in 1979.

La destination des produits exportés par le Royaume-Uni en dehors de la CE a relativement changé au cours de ces quinze dernières années. On remarque avant tout une baisse assez importante de la part de marchés traditionnels comme les pays d'Asie centre-Sud (7% en 1963 et 3% en 1979), ou les pays industrialisés de l'hémisphère sud (Australie, Nouvelle-Zélande et Afrique du Sud) dont la part dans les exportations britanniques est descendue de 18 à 8% entre 1963 et 1979. Alors que pour les autres débouchés l'orientation géographique des exportations n'a pas beaucoup varié en pourcentage du total, la part du Moyen-Orient a constamment progressé pour atteindre 12% en 1979.

3.7.2 Imports

The rise in the price of petroleum products after 1973 had significant repercussions on the structure of British imports in the first two or three years of the crisis only. With the development of North Sea oil resources, the value of the UK's imports of this category of products fell steadily from 1974 onwards, when it accounted for 23% of total imports. In 1979 it made

3.7.2 Importations

La hausse du prix des produits pétroliers après 1973 n'a eu pour la Grande-Bretagne de répercussions importantes sur la structure des importations que pendant les premières années de la crise. Le Royaume-Uni ayant mis en exploitation ses ressources pétrolières de la mer du Nord, la valeur des importations de cette catégorie de produits a baissé progressivement

up only 13% of the total. The only major change in the structure of UK purchases concerned foodstuffs: the two categories (processed and primary), which together accounted for over 30% of purchases from non-Community countries in 1963 and still as much as 20% in 1970, fell to 12% in 1979. In view of the concurrent increase in intra-Community trade in these categories of products, there has been a significant shift in the geographical pattern of UK imports since the Community was enlarged.

depuis 1974 année, pendant laquelle elle avait représenté 23% des importations totales. Elle ne représentait plus en 1979 que 13% du total. Le seul changement important dans la structure des achats du Royaume-Uni concerne les produits alimentaires: les deux catégories (base et industriels) qui représentaient ensemble plus de 30% des achats hors CE en 1963, et encore 20% en 1970 sont tombées à 12% en 1979. Constatant en même temps un accroissement des échanges intra-communautaires de ces catégories de produits, on peut remarquer que depuis l'élargissement de la Communauté il y a eu pour ces catégories de produits un changement dans l'orientation géographique des importations britanniques.

In trade with non-Community countries, there was an appreciable shift in the pattern of UK imports during the period under review. The proportion of purchases from the other countries of Western Europe doubled (15% in 1963, 30% in 1979) and that of North America, after a substantial rise around 1970, came back to the 1963 share: 22%. On the other hand, the proportion of imports from Central and South America as well as from certain countries in Central Asia and the industrialized countries of the southern hemisphere is falling. It should also be noted that, bearing in mind the above remarks about oil imports, the Middle East's share went up but not by as much as in the case of the other Member States (9% in 1963, 12% in 1979).

Dans les échanges hors CE, les importations britanniques ont subi une certaine réorientation pendant la période considérée. La part des achats aux autres pays d'Europe occidentale a doublé (15% en 1963, 30% en 1979). La part de l'Amérique du Nord, après une augmentation autour de 1970 est revenue au même % qu'en 1963 (22%). Par contre, la part des importations provenant d'Amérique centrale et d'Amérique du Sud, ainsi que celle des importations provenant de certains partenaires d'Asie centrale et des pays industrialisés de l'hémisphère austral sont en baisse. Il est également à noter que compte tenu de ce qui a été dit ci-dessus à propos des importations de pétrole, la part du Moyen-Orient a progressé mais moins fortement que pour les autres pays membres (9% en 1963 et 12% en 1979).

3.8 IRELAND'S TRADE WITH NON-COMMUNITY COUNTRIES

3.8.1 Exports

The structure of Irish exports by broad economic categories shows a fairly substantial change during the period under review. Whereas in 1963, and to a certain extent even in 1970, processed and primary foodstuffs made up a very large proportion of the total, during the 1970s sales of industrial products such as processed food supplies, processed industrial supplies and capital goods were stepped up, with the result that in 1979 these categories accounted for 23%, 24% and 16% respectively of Ireland's exports to non-Community countries.

3.8 LES ÉCHANGES DE L'IRLANDE AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.8.1 Exportations

La structure des exportations irlandaises par grandes catégories de produits montre un changement assez substantiel pendant la période considérée. Alors qu'en 1963 et encore en 1970, les produits alimentaires de base représentaient les principales exportations de l'Irlande, il s'est produit, au cours des années 70, une accélération des ventes de produits à caractère industriel y compris ceux de l'industrie agro-alimentaire, des biens d'approvisionnements industriels et des biens d'équipement qui a porté en 1979 ces catégories de produits à représenter respectivement 23%, 24% et 16% des exportations de l'Irlande à l'extérieur de la CE.

3.8.2 Imports

There were considerable changes in the structure of Ireland's imports from non-Community countries during the period under review, in particular during the 1970s. Disregarding processed industrial supplies, which have been the main category imported by Ireland since 1963, the table below shows that up to the beginning of the 1970s a large proportion of purchases was accounted for by non-processed products such as primary foodstuffs or certain primary industrial supplies. Since then the proportion of these products has fallen, giving way to capital goods and industrial consumer products.

3.8.2 Importations

Les importations de l'Irlande en provenance de l'extérieur de la Communauté ont changé profondément de structure pendant la période considérée et en particulier au cours des années 70. Mis à part les biens d'approvisionnements industriels qui ont constitué depuis 1963 la principale catégorie de produits importés par l'Irlande, on peut remarquer que jusqu'au début des années 70, une grande partie des achats était représentée par des produits non transformés comme les produits alimentaires ou certains biens d'approvisionnements industriels de base. Par la suite, la part de ces produits a baissé pour laisser place à des biens d'équipement et à des produits de consommation à caractère industriel.

3.9 DENMARK'S TRADE WITH NON-COMMUNITY COUNTRIES

3.9 LES ÉCHANGES DU DANEMARK AVEC L'EXTÉRIEUR DE LA COMMUNAUTÉ

3.9.1 Exports

The structure of Danish exports by broad economic categories changed very little during the period under review. Capital goods still make up 22% to 23% of the total, while the proportion of processed industrial supplies has stood at 19% to 20% since the beginning of the 1970s, as has that of consumer goods. On the other hand, the proportions of processed and primary foodstuffs fell slightly between 1963 and 1979, from 18% to 13% and from 11% to 8% respectively.

3.9.1 Exportations

La structure des exportations danoises par grandes catégories de produits n'a varié que très peu au cours de la période considérée. Les biens d'équipement représentent toujours 22-23% du total, alors que la part des biens d'approvisionnements industriels transformés se situe depuis le début des années 70 à 19-20%, comme c'est également le cas pour les produits de consommation. Par contre, la part des produits de l'industrie agro-alimentaire et des produits alimentaires de base a légèrement diminué entre 1963 et 1979 respectivement de 18 à 13% pour les transformés et de 11 à 8% pour les non transformés.

**Denmark: Total exports

| Total | 100 | Total | 100 |

Similarly, there have been no major changes in Denmark's export markets since 1963. More than half of its exports go to the non-Community countries of Western Europe, while sales to Eastern Europe and the whole of the American continent have fallen as a percentage of the total. On the other hand, the proportion of exports to the Middle East and South-East Asia more than doubled between 1970 and 1979, going from 7% to 14%.

Du point de vue des débouchés également, on ne remarque pas de grands changements depuis 1963. Plus de la moitié des exportations du Danemark sont dirigées vers les pays d'Europe occidentale, alors que les ventes de l'Europe de l'Est et de l'ensemble du continent américain ont pris moins d'importance dans le total. En échange la part des exportations vers le Moyen-Orient et les pays de l'Asie du Sud-Est a plus que doublé entre 1970 et 1979 passant de 7 à 14%.

3.9.2 Imports

The structure of Danish imports has not changed greatly, especially since the beginning of the 1970s. Processed industrial supplies account for about a third of total purchases from non-Community countries. The proportion of both capital and consumer goods has likewise remained unchanged for almost ten years at 12% to 13%. On the other hand, the proportion of foodstuffs fell to 5% to 6% in the period 1973-75 as a result of the increase in the total value of imports following the leap in oil prices, and subsequently went up again to around 8%.

3.9.2 Importations

La structure des importations danoises n'a pas beaucoup varié surtout depuis le début des années 70. Les biens d'approvisionnement industriels transformés représentent environ le tiers du total des achats hors CE. Sans changement depuis près de dix ans également, la part des biens d'équipement et des biens de consommation 12-13%. En baisse par contre la part des produits alimentaires, dont la part dans les années 1973-1975 à la suite du gonflement de la valeur totale des importations, suite à la poussée du prix du pétrole, était descendue jusqu'à 5-6% du total pour remonter ensuite à environ 8%.

| Total | 100 | Total | 100 |

As with exports, Denmark's purchases are very highly concentrated in the non-Community countries of Western Europe, which supply more than half of its total imports from outside the Community. In addition, the table below shows that North America's share is declining, as is—paradoxically—that of the Middle East, since Denmark imports a lot of primary energy-generating products from Eastern Europe and refined products from the rest of Western Europe and again from Eastern Europe.

Finally, it may be noted that all the countries of South-East Asia, and Japan in particular, occupy a position which is almost as important as that of North America (11%).

Comme pour les exportations, les achats du Danemark sont très concentrés dans les pays d'Europe occidentale qui fournissent plus de la moitié du total des importations hors CE. Par ailleurs, on note que la part de l'Amérique du Nord est en baisse, ainsi que paradoxalement celle du Moyen-Orient, car le Danemark importe beaucoup de produits énergétiques de base d'Europe de l'Est et de produits raffinés du reste de l'Europe et de la même Europe de l'Est.

On remarque enfin que l'ensemble des pays de l'Asie du Sud-Est et le Japon en particulier occupent une place presque aussi importante que l'Amérique du Nord dans les importations du Danemark (11 %).

Section 4 — Comparative analysis of the exports of the EC, the USA and Japan

Section 4 — Analyse comparative des exportations de la CE, des États-Unis et du Japon

4.1 INTRODUCTION

The aim of this section is to analyse briefly the comparative trends in exports to various areas of the world (Annex IV, p. 646) firstly between the main Member States of the Community, (in the following tables, the four principal exporters for 1979 have been selected for each market) and secondly between the Community as a whole and two of its leading worldwide trading competitors, namely Japan and the United States. The comparison will thus cover, on an area-by-area basis, the exporting countries' share of industrialized countries' total exports at different times which are as far apart as possible: 1963-70-79. This comparison will refer to both total exports and a selection of major categories of products, namely the most important ones for Community trade.

4.2 EXPORTS TO NON-COMMUNITY WESTERN EUROPE

4.2.1 Comparisons between Member States

On the markets of Western Europe (\$89 000 million-worth of Community exports in 1979) there have been no appreciable changes in the Member States' relative degree of penetration. Since 1970, in respect of total exports, the only country which has increased its market share by 2% is France. On the other hand, analysis of the main categories of products shows a number of changes. For processed industrial supplies (\$ 26 900 million-worth of Community exports in 1979), capital goods (\$20 000 million) and consumer goods (\$ 12 000 million) the trend shows a slight increase by the Federal Republic of Germany, France and Italy and a moderate fall-off by the United Kingdom. This fall-off is even more marked for the 'motor-cars' category (\$ 4 200 million), where the United Kingdom's share fell from 16% to 3% in nine years, mainly to the benefit of the Federal Republic of Germany and the other Community countries, in particular Belgium, whose market shares went up from 47% to 55% and from 6% to 11% respectively. On the other hand, the trend is the reverse in the case of primary industrial supplies (\$ 6 000 million), where the United

4.1 INTRODUCTION

Cette section se propose d'analyser brièvement l'évolution comparée des exportations vers différentes zones du monde (Annexe IV, p. 646) entre, d'une part, les principaux pays membres de la Communauté — dans les tableaux ci-après on a sélectionné pour chaque marché de destination les quatre principaux exportateurs de la CE en 1979 — et, d'autre part, entre la Communauté dans son ensemble et deux de ses principaux concurrents mondiaux: le Japon et les États-Unis. On sera donc amené à comparer, zone par zone, la part de pays exportateurs considérés dans l'ensemble des exportations des pays industrialisés à des époques différentes et aussi éloignées que possible: 1963-70-79. Cette comparaison sera effectuée pour le total des exportateurs et pour quelques grandes catégories de produits, les plus importantes dans le cadre des échanges de la Communauté.

4.2 EXPORTATIONS VERS L'EUROPE OCCIDENTALE NON COMMUNAUTAIRE

4.2.1 Comparaisons entre pays membres

Sur les marchés de l'Europe occidentale (89 Mrd de dollars d'exportations de la CE en 1979), on n'enregistre pas de grands changements dans le degré relatif de pénétration commerciale des pays membres. Depuis 1970, sur le total des exportations, le seul pays qui a gagné 2% du marché est la France. Quelques changements par contre, lorsqu'on analyse les plus importantes catégories de produits. Pour les biens d'approvisionnements industriels transformés (26,9 Mrd de dollars d'exportations de la CE en 1979), pour les biens d'équipement (20 Mrd de dollars) et pour les biens de consommation (12 Mrd de dollars) la tendance consiste en une légère amélioration de la part de la France et de l'Italie et en une certaine flexion de la part du Royaume-Uni. Cette flexion est encore plus accentuée pour la catégorie «automobiles» (4,2 Mrd de dollars) où la part du Royaume-Uni est descendue, en neuf ans, de 16% à 3%, à l'avantage surtout de la RF d'Allemagne et des autres pays de la Communauté, en particulier la Belgique qui ont vu passer leur part de marché respectivement de 47% à 55% et de 6% à 11%. Par contre, une ten-

Kingdom accounts for almost two-thirds of exports to the other countries of Western Europe.

dance inverse se produit pour les biens d'approvisionnements industriels non transformés (6,0 Mrd de dollars) où presque les deux tiers des exportations vers les autres pays d'Europe occidentale sont assurés par le Royaume-Uni.

4.2.2 Comparison between the Community, the USA and Japan

The countries of Western Europe bought \$125 000 million-worth of goods from the industrialized countries in 1979; the Community's share of this market has not changed since the beginning of the 1960s, apart from the period around 1970 when it fell slightly. The Community accounts for an average of 70% of the industrialized countries' total exports to these countries, while the United States' share fell from 11-12% in the 1960s to 8-9% in recent years. On the other hand, Japan's share is still relatively small, standing at 3%

4.2.2 Comparaisons CE, États-Unis, Japon

Les pays d'Europe occidentale ont acheté pour 125 Mrd de dollars aux pays industrialisés en 1979 et représentent pour la Communauté un marché sur lequel les positions ne varient pas depuis le début des années 60. Si l'on excepte en effet la période autour de 1970 au cours de laquelle sa part avait légèrement baissé, on remarque que la Communauté dirige vers ces pays en moyenne 70% des exportations totales des pays industrialisés, alors que la part des États-Unis a baissé de 11-12% au cours des années 60, à

to 4% since 1975, the remaining 16% to 17% being accounted for by the other industrialized countries' exports, including interzonal trade.

4.3 EXPORTS TO EASTERN EUROPEAN COUNTRIES

4.3.1 Comparisons between Member States

In 1979 Community countries' exports to Eastern European countries totalled approximately \$ 20 000 million, i.e. around five times more than in 1970 and 13 times more than in 1963. The Federal Republic of Germany expanded its activity on this market quite considerably and much more rapidly than the other Member States, its share of Community exports going up from 29% in 1963 to 35% in 1970 and 44% in 1979. On the other hand, the shares of Italy and above all the United Kingdom fell from 18-19% to 13% and from 23% to 16% and 10% respectively in 1963, 1970 and 1979. The Federal Republic of Germany's share of the Eastern European markets is even more pronounced for certain categories of products such as capital goods (\$6 600 million-worth of Community exports in 1979), where it accounts for more than 50% of the total.

8-9% dans les dernières années. Par contre, la part du Japon demeure relativement faible: 3-4% depuis 1975, le restant 16-17% étant représenté par les exportations des autres pays industrialisés, dont les échanges interzones.

4.3 EXPORTATIONS VERS LES PAYS DE L'EUROPE DE L'EST

4.3.1 Comparaisons entre pays membres

Les exportations des pays de la CE vers les pays d'Europe de l'Est ont représenté, en 1979, 20 milliards de dollars, soit cinq fois plus qu'en 1970, et treize fois plus qu'en 1963. Sur ce marché la RF d'Allemagne a progressé de façon très importante et beaucoup plus rapidement que les autres pays membres. La part dans les exportations communautaires est passée de 29% en 1963 à 35% en 1970 et à 44% en 1979. Par contre, la part de l'Italie et surtout du Royaume-Uni est descendue respectivement de 18% à 19% et à 13% et de 23% à 16% et à 10% en 1963, 1970 et 1979. L'importance de la RF d'Allemagne sur les marchés de l'Europe de l'Est est encore plus accentué pour certaines catégories de produits comme les biens d'équipement (6,6 Mrd de dollars d'exportations CE en 1979) pour lesquelles elle assure presque la moitié des exportations totales de la Communauté vers ce marché.

4.3.2 Comparison between the Community, the USA and Japan

In 1979 this market bought almost \$38 000 million-worth of goods from the industrialized countries, more than half of which (53%) came from the Community. The Community's share of the industrialized countries' total exports has not changed since the beginning of the 1960s, whereas over this period the USA stepped up its penetration considerably, trebling its market share (15%) which had been 6% in 1963 and 5% in 1970. Japan likewise stepped up its penetration of the

4.3.2 Comparaisons CE, États-Unis, Japon

En 1979, ce marché a acheté pour près de 38 Mrd de dollars de marchandises aux pays industrialisés, dont plus de la moitié (53%) provenait de la Communauté. La part de celle-ci sur l'ensemble des exportations des pays industrialisés n'a pas varié depuis le début des années 60, alors que depuis cette époque, les États-Unis ont considérablement intensifié leur effort de pénétration, triplant (15%) leur part de marché qui était de 6% en 1963, et encore de 5% en 1970. La

Eastern European countries, accounting for around 10% of total exports in 1979.

4.4 EXPORTS TO NORTH AMERICA (USA-CANADA)

4.4.1 Comparisons between Member States

This market is the second largest for Community exports after the other Western European countries.

In 1979 Community sales to this market totalled approximately \$39 000 million. During the 1960s, the Federal Republic of Germany's and Italy's share of total exports went up from 26% to 33% and from 11% to 14% respectively; France's share remained stable, while during the same period the United Kingdom's fell from 33% to 27% and that of the other Community countries together from 19% to 16%. Between 1970 and 1979, France's share of the North American market rose from 10% to 14%, while there was a stabilization in the United Kingdom's share around 26%. Although its share has declined very appreciably, the United Kingdom is still the largest Community exporter of processed foodstuffs to North America. On the other hand, in respect of all the other categories of products (in particular industrial products), the United Kingdom, which was the leading exporter in 1963, subsequently saw its share plummet, sometimes—as in the case of motor-cars—by more than half. On the other side of the coin, especially as regards processed industrial supplies (\$9 000 million-worth of Community exports in 1979), capital goods (\$8 000 million) and above all motor-cars (\$4 000 million), it was the Federal Republic of Germany which won an ever-increasing share of the markets, accounting for 31%, 43% and 77% respectively in 1979.

Japon a également accentué sa pénétration dans les pays de l'Europe de l'Est et a exporté environ 10% du total en 1979.

4.4 EXPORTATIONS VERS L'AMÉRIQUE DU NORD (ÉTATS-UNIS-CANADA)

4.4.1 Comparaisons entre pays membres

En ordre d'importance le marché est le deuxième pour les exportations communautaires après celui des autres pays d'Europe occidentale.

En 1979, les ventes CE sur ce marché avaient atteint environ 39 Mrd de dollars. Pour l'ensemble des exportations on observe qu'au cours des années 60, les parts de la RF d'Allemagne et de l'Italie ont progressé respectivement de 26 à 33% et de 11 à 14%; la part de la France demeurant stable alors qu'à la même période celle du Royaume-Uni passait de 33 à 27% et celle de l'ensemble des autres pays de la CE de 19 à 16%. Entre 1970 et 1979, c'est la France qui a vu progresser sa part sur le marché d'Amérique du Nord de 10 à 14% pendant que la part du Royaume-Uni se stabilisait autour de 26%. Bien qu'en très forte baisse, le Royaume-Uni est encore le plus important exportateur communautaire de produits des industries agro-alimentaires vers l'Amérique du Nord. Par contre, sur presque toutes les autres catégories de produits et notamment les produits industriels, le Royaume-Uni qui était le premier exportateur en 1963 a vu depuis lors sa part descendre considérablement, parfois comme dans le cas des voitures automobiles, de plus de la moitié. Par contre, surtout sur les produits d'approvisionnements industriels transformés (9 Mrd de dollars d'exportations de la CE en 1979), les biens d'équipement (8 Mrd de dollars) et surtout les voitures automobiles (4 Mrd de dollars) c'est la RF d'Allemagne qui a conquis des parts de marché de plus en plus importantes avec respectivement 31%, 43% et 77% en 1979.

(¹) Exportations vers le Canada.

4.4.2. Comparison between the Community and Japan

The two major countries in this area are the USA and Canada; in 1979 the industrialized countries' exports to this area (including trade between these two countries) amounted to approximately \$150 000 million, including \$73 000 million-worth of interzonal trade.

After falling during the 1960s (from around 30% to around 27%), the Community's share, has remained steady over the last ten years or so at about 25%. Following a substantial increase in its market share in the period around 1970 (1972, 18%), Japan saw its exports slow down in the second half of the 1970s and currently accounts for approximately 12% to 13% of the industrialized countries' total exports. It should be pointed out, however, that this period of decline coincided with a spectacular increase in American imports from South-East Asia, which almost trebled between 1975 and 1979.

4.5 EXPORTS TO CENTRAL AND SOUTH AMERICA

4.5.1 Comparisons between Member States

In 1979, Community exports to this market totalled \$17 000 million, i.e. four times their 1970 and seven times their 1963 value. The changes in the Member States' degree of penetration were not very great. Between 1970 and 1979, France and Italy each increased their share of total Community exports from 17% to 22% and from 13% to 15% respectively. The United Kingdom's share fell, while that of Germany and the other Member States remained stable. Among the major categories of products, it is in the capital goods sector (\$5 400 million worth of Community ex-

4.4.2 Comparaisons CE-Japon

Les deux grands pays qui représentent cette zone sont les États-Unis et le Canada vers lesquels les exportations des pays industrialisés (y compris les échanges entre ces deux pays) ont atteint en 1979 environ 150 Mrd de dollars dont 73 Mrd d'échanges interzones.

La part de la Communauté, après avoir baissé au cours des années 60 (de ± 30 à $\pm 27\%$) s'est stabilisée depuis une dizaine d'années autour de 25%. Le Japon, après avoir connu une très forte hausse de sa part de marché dans la période autour de 1970 (en 1972 = 18%), a vu ses exportations s'accroître moins rapidement dans la deuxième moitié des années 70 et couvre actuellement environ 12-13% des exportations totales des pays industrialisés. Il faut toutefois remarquer que cette période de baisse a coïncidé avec une très forte hausse des importations américaines en provenance de pays de l'Asie du Sud-Est qui ont presque triplé entre 1975 et 1979.

4.5 EXPORTATIONS VERS L'AMÉRIQUE CENTRALE ET L'AMÉRIQUE DU SUD

4.5.1 Comparaisons entre pays membres

En 1979, les exportations communautaires vers ce marché ont été de 17 Mrd de dollars, soit quatre fois la valeur de 1970 et sept fois celle de 1963. Vis-à-vis de cette zone, les changements de niveau de pénétration des pays membres n'ont pas été très importants. La France et l'Italie ont gagné chacune, entre 1970 et 1979, une partie du marché dans l'ensemble des exportations communautaires, passant respectivement de 17 à 22% et de 13 à 15%. La part du Royaume-Uni a baissé alors que celle de la RF d'Allemagne et des autres pays membres sont restées

ports in 1979) that the Federal Republic of Germany has consolidated its position of leading supplier, accounting for 41% of total exports.

stables. Parmi les catégories de produits les plus importantes c'est dans les biens d'équipement (5,4 Mrd de dollars d'exportations CE en 1979) que la RF d'Allemagne a renforcé sa place de fournisseur privilégié avec 41% du total des exportations.

4.5.2 Comparison between the Community, the USA and Japan

In 1979 the industrialized countries' exports to this market amounted to some \$60 000 million, with the United States accounting for half. From 1963 onwards Japan stepped up its penetration quite considerably (5% in 1963, 8% in 1970, 15% in 1978), although in recent years the increase has not been as rapid, with the result that the Japanese share of the market has gone back down to 11% in 1979.

The Community's exports to South America accounted for 34% of the industrialized countries' total exports in 1963; they have not kept pace with the other countries', accounting for some 30% to 31% of the total at the end of the 1970s.

4.6 EXPORTS TO NORTH AFRICA

4.6.1 Comparisons between Member States

Temporal comparisons must obviously take account of much of this area's long-standing close ties with France to explain the considerable shifts which have taken place since the beginning of the 1960s. In 1963, France accounted for around 60% of total Community exports to this area, which amounted to some \$1 500 million. Although maintaining a leading position, France's share fell steadily in comparison with that of the other Community countries, accounting for a third

4.5.2 Comparaisons CE, États-Unis, Japon

En 1979, les exportations des pays industrialisés vers ce marché ont été d'environ 60 Mrd de dollars, dont la moitié est représentée par des ventes des États-Unis. Depuis 1963, on constate une pénétration assez forte du Japon (5% en 1963, 8% en 1970, 15% en 1978), bien qu'au cours des dernières années, la hausse ait progressé moins rapidement et que de ce fait la part des exportations japonaises soit redescendue à 11% en 1979.

Pour ce qui concerne la Communauté, les exportations vers l'Amérique du Sud représentaient 34% des exportations totales des pays industrialisés en 1963, elles ont progressé moins rapidement que celles des autres pays et couvrent à la fin des années 70 environ 30-31% du total.

4.6 EXPORTATIONS VERS L'AFRIQUE DU NORD

4.6.1 Comparaisons entre pays membres

Compte tenu d'anciens liens étroits avec la France d'une grande partie de cette région, il est évident que les comparaisons temporelles doivent en tenir compte pour expliquer les profondes mutations intervenues depuis le début des années 60. En effet, en 1963, la France couvrait environ 60% de l'ensemble des exportations communautaires vers cette région, exportations qui étaient de l'ordre de 1,5 Mrd de dollars. Tout en gardant une situation prééminente, la place

of total Community sales to this area in 1979, i.e. \$17 000 million. Two countries in particular, namely the Federal Republic of Germany and Italy took advantage of this to increase their market shares, which went up from 12% in 1963 to 24% and 22% respectively in 1979. On the other hand, the United Kingdom did not maintain the share it held in 1963 (12%), accounting for 9% of Community exports in 1979, less than the other five Member States together, whose share went up from 5% to 12% in the same period. The policy of industrialization followed by some countries in this area over the last ten years or so and the financial resources created by petroleum and gas led to a very sharp increase in purchases of capital goods, of which the Federal Republic of Germany in particular took advantage to increase its share of the Community export market (\$5 300 million) from 20% in 1970 to 31% in 1979. On the other hand, Italy's share of total Community sales of processed industrial supplies (\$4 600 million) was almost as large (31%) as that of France (28%).

de la France comparée à celle des autres pays de la Communauté a baissé progressivement pour atteindre en 1979 le tiers du total des ventes de la CE à cette région soit 17,0 Mrd de dollars. Deux pays en ont surtout bénéficié en prenant des parts de marché: la RF d'Allemagne et l'Italie, qui de 12% en 1963 sont montées respectivement à 24% et à 22% en 1979. Par contre, le Royaume-Uni n'a pas gardé la place qu'il détenait en 1963 (12%) et a couvert, en 1979, 9% des exportations de la CE, moins que l'ensemble des cinq autres pays membres qui sont passés pendant la même époque de 5 à 12%. La politique d'industrialisation menée par certains pays de la région depuis une dizaine d'années et les ressources financières du pétrole et du gaz ont provoqué une augmentation très rapide des achats des biens d'équipement dont a bénéficié surtout la RF d'Allemagne qui a vu passer sa part du marché d'exportation CE (5,3 Mrd de dollars) de 20% en 1970 à 31% en 1979. Par contre, sur les produits d'approvisionnements industriels transformés, c'est l'Italie qui a occupé une place (31%) plus importante que celle de la France (28%) sur l'ensemble des ventes communautaires (4,6 Mrd de dollars).

4.6.2 Comparison between the Community, the USA and Japan

In 1979 the industrialized countries exported \$24 000 million-worth of goods to North Africa, with the Community accounting for approximately three-quarters. The Community's share of this market remained virtually unchanged at between 72% and 75% since the beginning of the 1960s. Despite a slight decline, the United States is still in second place with 12%, and Japan increased its share from 2% to 6-7% in 15 years.

4.6.2 Comparaisons CE, États-Unis, Japon

En 1979, les pays industrialisés ont exporté pour 24 Mrd de dollars de marchandises vers les pays d'Afrique du Nord dont environ les trois-quarts ont été vendus par les pays de la Communauté. La position des pays de la CE sur ce marché n'a pratiquement pas varié depuis le début des années 60: entre 72 et 75%. Les États-Unis demeurent, malgré une certaine décélération, le deuxième partenaire avec 12% et le Japon a porté sa part de marché de 2 à 6-7% en quinze ans.

4.7 EXPORTS TO AFRICA SOUTH OF THE SAHARA

4.7.1 Comparisons between Member States

A little more than 20 years ago, almost all the countries in this area were colonies or protectorates of one or other of the Member States of the Community, in particular France, the United Kingdom and Belgium. This explains why these countries had—and still have, although to a lesser extent—a privileged position in the trade of the former colonies. During the 1960s there was the first change in the structure of imports into this area. The United Kingdom and France, which at the beginning of the decade accounted for about 70% of Community exports to Africa south of the Sahara, saw their share fall to 60% in 1970 and approximately 57% in 1979. The United Kingdom in particular lost about 14% of the Community export market in 17 years. For some products such as capital goods the decrease was even greater: in 1963 the United Kingdom accounted for 43% of Community sales to Africa south of the Sahara, whereas in 1979 this proportion had fallen to 25%. The main countries which stepped up their trade penetration in this area were the Federal Republic of Germany, Italy and the Netherlands.

4.7 EXPORTATIONS VERS L'AFRIQUE SUB-SAHARA

4.7.1 Comparaisons entre pays membres

La presque totalité des pays de cette région était encore, il y a un peu plus de vingt ans des colonies ou protectorats de quelques pays membres de la Communauté et en particulier de la France, du Royaume-Uni et de la Belgique. Cela explique que ces pays aient eu et gardent encore bien que moins fortement qu'auparavant, une place privilégiée dans les échanges commerciaux des anciennes colonies. Au cours des années 60, on constate un premier changement dans la structure des importations des pays de la zone. Le Royaume-Uni et la France qui couvraient au début de la décennie environ 70% des exportations de la CE vers l'Afrique sub-Sahara ont vu leur part descendre à 60% en 1970 et à environ 57% en 1979. C'est surtout le Royaume-Uni qui a perdu en dix-sept ans environ 14% du marché d'exportation de la Communauté. Pour certains produits comme les biens d'équipement la baisse a été encore plus importante: en 1963 le Royaume-Uni couvrait 43% des ventes communautaires à l'Afrique sub-Sahara, en 1979 cette part est passée à 25%. Ce sont surtout la France, la RF d'Allemagne et les Pays-Bas qui ont réalisé dans cette région une pénétration commerciale importante.

4.7.2 Comparison between the Community, the USA and Japan

The countries of Africa south of the Sahara bought \$23 000 million-worth of goods from the industrialized countries in 1979. The Community is still by far their biggest trading partner, accounting for some 70% of this total and thus having regained the market share it had held at the beginning of the 1960s, which had been in decline up to the mid-1970s. During this

4.7.2 Comparaisons CE, États-Unis, Japon

Les pays de l'Afrique sub-Sahara ont acheté pour 23 Mrd de dollars de marchandises aux pays industrialisés en 1979. La Communauté demeure de loin leur plus important partenaire avec environ 70% de ce total ayant ainsi repris sur ce marché la part qui était la sienne au début des années 60 et qui avait eu tendance à baisser jusqu'au milieu des années 70. En

period Japan made a major breakthrough, winning around 25% of the market in 1974.

effet, pendant cette période, on avait assisté à une forte percée du Japon qui avait, en 1974, conquis environ 25 % de ce marché.

4.8 EXPORTS TO THE MIDDLE EAST

4.8.1 Comparisons between Member States

Among the markets analysed in this part of the study, the Middle East is noteworthy for two reasons: first, it has become the largest market after the industrialized countries of Europe and America, having bought over \$28 000 million-worth of goods in 1979. Secondly, the rise in the value of its purchases went hand in hand with the increase in its financial resources due to the leap in petroleum prices. The Federal Republic of Germany and Italy stepped up their penetration of these markets the most, their respective shares going from 25% and 10% in 1963 to 27% and 19% in 1979. On the other hand, the United Kingdom's share fell during the same period from 37% to 23% of total Community exports. The decline was particularly appreciable in the capital goods sector, where the United Kingdom's share fell from almost a half of Community exports in 1963 to less than a quarter in 1979. In this category of products the Federal Republic of Germany increased its market share from 30 to 33%, France from 10 to 16% and Italy from 8 to 14%. In the processed industrial supplies sector, the main changes in market structure affected Italy and the United Kingdom, which accounted respectively for 10 and 31% of Community sales in 1963 and 24 and 19% in 1978.

4.8 EXPORTATIONS VERS LE MOYEN-ORIENT

4.8.1 Comparaisons entre pays membres

Parmi les marchés analysés dans cette partie de l'étude, celui du Moyen-Orient présente une double caractéristique. D'une part il est devenu après les pays industrialisés d'Europe et d'Amérique le marché le plus important ayant acheté pour plus de 28 Mrd de dollars de marchandises à la Communauté en 1979. D'autre part, l'accélération de la valeur de ses achats est allée de pair avec l'accroissement de ses ressources financières dues à la hausse du prix du pétrole. Sur ces marchés, ce sont la RF d'Allemagne et l'Italie qui ont accentué le plus leur pénétration commerciale passant respectivement de 25% et 10% en 1963 à 27% et 19% en 1979. Par contre, la part du Royaume-Uni est descendue entre ces deux années de 37% à 23% de l'ensemble des exportations communautaires. La baisse a été surtout sensible dans les biens d'équipement pour lesquels le Royaume-Uni qui couvrait en 1963 près de la moitié des exportations communautaires a vu sa part descendre à moins d'un quart en 1979. Sur cette catégorie de produits, la RF d'Allemagne a augmenté sa part de marché de 30 à 33%, la France de 10 à 16% et l'Italie de 8 à 14%. Pour ce qui concerne les biens d'approvisionnements industriels transformés, les changements de structure du marché sont intervenus essentiellement entre l'Italie et le Royaume-Uni qui détenaient respectivement 10% et 31% des ventes communautaires en 1963 et 24% et 19% en 1979.

4.8.2 Comparison between the Community, the USA and Japan

The industrialized countries sold over \$55 000 million-worth of goods on this market in 1979, ten times more than in 1970. Trade is expanding rapidly as a result of the fact that this geographical area includes the majority of the petroleum-exporting countries with their large financial resources. In 1979 the industrialized countries' imports from this area exceeded \$102 000 million, of which \$96 000 million were accounted for by oil and oil products. Despite a very slight drop, the Community's share was still over 50% of the industrialized countries' total exports in 1979. Japan's share, which was three times smaller than the United States' in the 1960s, went up steadily from 1963 onwards from 8% to 10% and 17%. On the other hand, the United States' share fell from just under 25% of the total in 1970 to 20% in 1979.

4.9 EXPORTS TO CENTRAL AND SOUTHERN ASIA

4.9.1 Comparisons between Member States

Central and Southern Asia is one of the Community markets which has developed the least with sales of almost \$1 000 million-worth of goods to this area in 1963 increasing only fivefold in 16 years to \$4 700 million in 1979, whereas during the same period the value of total exports went up almost ninefold. The main structural features are the fall in the United Kingdom's share (over half of community exports in 1963, one-third in 1979) and the increase in that of France, which doubled (6% in 1963, 7% in 1970 and 12% in 1979), and of Belgium, which was the same as France's in 1979 (12%). After rising between 1967 and 1970 (from 27 to 34%), the Federal Republic of Germany's share went back down to 25% in 1979.

4.8.2 Comparaisons CE, États-Unis, Japon

Les pays industrialisés ont vendu sur ce marché pour plus de 55 Mrd de dollars en 1979, dix fois plus qu'en 1970. Il s'agit d'un marché en pleine expansion, du fait que la plupart des pays exportateurs de pétrole sont compris dans cette zone géographique et qu'ils disposent de ressources financières extrêmement importantes. En 1979, les importations des pays industrialisés en provenance de cette zone ont dépassé les 102 Mrd de dollars, dont 96 Mrd sont représentés par le pétrole et ses dérivés. Malgré une très légère baisse, la part de la CE est encore en 1979 supérieure à 50% des exportations totales des pays industrialisés. La part du Japon qui était, au cours des années 60, encore trois fois moins importante que celle des États-Unis est passée progressivement de 8 à 10 et à 17% depuis 1963. Par contre, les États-Unis ont vu leur part baisser de près de 25% du total en 1970 à 20% en 1979.

4.9 EXPORTATIONS VERS L'ASIE DU CENTRE-SUD

4.9.1 Comparaisons entre pays membres

L'Asie du Centre-Sud est un des marchés qui a le moins évolué pour la Communauté. Celle-ci qui vendait en 1963 pour près d'un Mrd de dollars de marchandises à cette zone n'a vu augmenter que de cinq fois la valeur de ses ventes après 16 ans (4,7 Mrd en 1979) alors que pendant la même période, la valeur des exportations totales augmentait de près de neuf fois. Quant à la structure d'approvisionnement, on remarque la baisse de la part du Royaume-Uni (plus de la moitié des exportations communautaires en 1963, le tiers en 1979) et la hausse de celle de la France, qui a doublé sa part sur ce marché (6% en 1963, 7% en 1970 et 12% en 1979), et de la Belgique qui détenait en 1979 les mêmes parts de marché que la France (12%). Quant à l'Allemagne, sa part après avoir progressé entre 1967 et 1970 (de 27 à 34%) est redescendue à 25% en 1979.

4.9.2 Comparison between the Community, the USA and Japan

Although this market is of little more than marginal importance in terms of absolute value—the industrialized countries' exports totalled \$10 000 million in 1979—the Community has maintained a substantial share for a number of years (47% in 1979). The United States, which dominated this market during the 1960s, saw its share plummet to 20% in the latter years of the period under review. After a major breakthrough towards the end of the 1960s, Japan's market share stabilized at 18% to 19%.

4.10 EXPORTS TO SOUTH-EAST ASIA

4.10.1 Comparisons between Member States

The main Community countries' shares of this market, which was worth \$11 600 million in 1979, were as follows: the Federal Republic of Germany 33% compared with 26% in 1963, the United Kingdom 27% (42%) and France 14% (7%). Thus, here as almost everywhere in the world, the Federal Republic of Germany and, to a lesser extent, France increased their exports at a faster pace than other countries, in particular the United Kingdom which still accounts for slightly more than a quarter of Community sales to the area. Italy's share has not gone up much for 16 years. The trend is more or less the same for all the categories of products, although in the capital goods sector particular mention must be made of the substantial share held by the Benelux countries, which accounted for almost 11% of total Community exports in 1979.

4.9.2 Comparaisons CE, États-Unis, Japon

Il s'agit d'un marché relativement marginal en valeur absolue—les exportations totales des pays industrialisés en 1979 ont été de 10 Mrd de dollars — mais sur lequel la Communauté continue d'assurer depuis quelques années une présence importante (47% en 1979). Les États-Unis qui détenaient la majorité de ce marché au cours des années 60 ont vu leur part baisser rapidement à 20% ces dernières années. Le Japon, après une forte percée vers la fin des années 60, a stabilisé sa part de marché à 18-19%.

4.10 EXPORTATIONS VERS L'ASIE DU SUD-EST

4.10.1 Comparaisons entre pays membres

Sur ce marché qui a représenté 11,6 Mrd de dollars en 1979, la part des exportations des principaux pays de la CE se répartissait ainsi: RF d'Allemagne 33% contre 26% en 1963, Royaume-Uni 27% (42%), France 14% (7%). On voit ainsi que sur ce marché, comme presque partout au niveau mondial, la RF d'Allemagne et, en moindre mesure, la France ont accru leurs exportations plus rapidement que d'autres pays et en particulier le Royaume-Uni qui conserve toutefois un peu plus du quart des ventes communautaires à la zone. La part de l'Italie n'a pas beaucoup progressé depuis 16 ans. La tendance est plus ou moins la même pour l'ensemble des catégories de produits, bien que sur les biens d'équipements il faille mettre en relief la part importante du Benelux qui a couvert en 1979 presque 11% des exportations de l'ensemble des pays membres.

4.10.2 Comparison between the Community, the USA and Japan

As a result of the rapid expansion of their exports, the countries of South-East Asia have a very positive trade balance with the industrialized countries. In 1979 the latter's import from this area amounted to approximately \$70 000 million, while their exports totalled \$57 000 million. The Community has been losing

4.10.2 Comparaisons CE, États-Unis, Japon

Grâce au développement rapide de leurs exportations, les pays du Sud-Est asiatique présentent une balance commerciale très positive avec les pays industrialisés. En 1979, les importations de ces derniers en provenance de cette zone ont été d'environ 70 Mrd de dollars, alors que leurs exportations ont été de 57 Mrd de

ground on this market since the beginning of the 1960s, during which period the United States, Japan and the Community each accounted for 30% of the industrialized countries' total exports, whereas in the 1970s the USA maintained its share but the Community lost 10% to Japan. In 1979, therefore, the Community held 20%, the USA 30% and Japan 40% of this market.

4.11 EXPORTS TO JAPAN

4.11.1 Comparisons between Member States

This country bought more than \$ 6 300 million-worth of goods from the Community in 1979. In the same year, Community imports from Japan totalled more than \$13 400 million, a deficit of almost \$7 000 million for Europe. Since 1963 there have been no appreciable changes in each Member State's share of exports to this market. The Federal Republic of Germany was still the main supplier (36%) in 1979 despite a very slight decline since 1963, followed by the United Kingdom, whose share fell from 28% to 20%. The other countries recorded varying increases: France's share went up from 9% to 15%, Italy's from 8% to 12% and that of the other countries together from 16% to 17%. The trend is not the same for all the categories of products. The major changes in the processed industrial supplies category (\$1 900 million, 30% of Community exports in 1979) were in the shares of Italy, which went up from 7% to 13%, and the United Kingdom, which fell from 32% to 23%, those of the other Member States remaining stable. In the capital goods category, the biggest increases were recorded by France and the Benelux countries, whose shares went up from 5% to 9% and from 8% to 11% respectively, while Italy and the Federal Republic of Germany saw their shares of Community sales fall from 12% to 9% and from 54% to 50% respectively.

dollars. Il s'agit d'un marché sur lequel la Communauté perd du terrain depuis le début des années 60, période au cours de laquelle les États-Unis, le Japon et la CE couvraient chacun 30% des exportations totales des pays industrialisés. Au cours des années 70, les États-Unis maintenaient leur position, alors que le Japon enlevait à la Communauté 10% de ce marché. En 1979, en effet, la part de la CE a été de 20%, celle des États-Unis 30% et celle du Japon 40%.

4.11 EXPORTATIONS VERS LE JAPON

4.11.1 Comparaisons entre pays membres

Ce pays a acheté à la Communauté pour plus de 6,3 Mrd de dollars en 1979. On rappelle que pendant la même année les importations communautaires en provenance du Japon ont été de plus de 13,4 Mrd de dollars avec un déficit de près de 7 Mrd de dollars pour l'Europe. Les modifications dans les parts relatives des exportations de chaque pays membre vers ce marché n'ont pas été très importantes depuis 1963. La RF d'Allemagne demeure en 1979 le principal fournisseur (36%) malgré un très léger tassement depuis 1963, suivie du Royaume-Uni qui a vu sa part baisser de 28 à 20%. Pour les autres pays, on enregistre une certaine progression: la part de la France est passée de 9 à 15%, celle de l'Italie de 8 à 12% et celle de l'ensemble des autres pays de 16 à 17%. La tendance n'est pas la même pour toutes les catégories de produits. Pour les biens d'approvisionnements industriels transformés (1,9 Mrd de dollars et 30% des exportations CE en 1979), les modifications les plus importantes concernent la part de l'Italie qui est passée de 7 à 13% et celle du Royaume-Uni qui est descendue de 32 à 23%, la part des autres pays membres demeurant stable. Pour ce qui concerne les biens d'équipement, la plus forte progression touche la France et le Benelux dont la part passe respectivement de 5 à 9% et de 8 à 11% alors que l'Italie et la RF d'Allemagne ont vu leur part dans les ventes communautaires descendre respectivement de 12 à 9% et de 54 à 50%.

4.11.2 Comparison between the Community and the USA

In 1979 the industrialized countries exported \$35 000 million-worth of goods to Japan, with the United States supplying half. For more than 15 years the United States accounted for between 50% and 55% of the industrialized countries' total exports, while the Community's share fluctuated between 16% and 18%. Among the other industrialized countries, which accounted for 32% of total exports to Japan in 1979, particular mention should be made of the substantial shares held by Australia (15%) and Canada (10%).

4.11.2 Comparaisons CE et États-Unis

En 1979, les pays industrialisés ont exporté vers le Japon pour 35 Mrd de dollars, dont la moitié est représentée par des ventes américaines. Pendant plus de quinze ans, les États-Unis ont couvert entre 50 et 55% des exportations totales des pays industrialisés, alors que la part de la Communauté oscillait entre 16 et 18%. Parmi les autres pays industrialisés qui ont représenté en 1979, 32% du total des exportations vers le Japon, on doit noter la part importante couverte par l'Australie (15%) et le Canada (10%).

4.12 EXPORTS TO THE PLANNED-ECONOMY COUNTRIES OF ASIA

4.12.1 Comparisons between Member States

Although this market bought only \$3 200 million-worth of goods from the Community in 1979, it includes such an important country as China, which has only just begun to open its frontiers to international trade. The major changes in the geographical distribution of Community exports must be analysed with caution, bearing in mind the political and economic upheavals in this area over the past 20 years. In the 1960s the main market for Community exports was the Indochina peninsula, where France held a privileged position. From the beginning of the 1970s the Chinese market began to open up and the Federal Republic of Germany was the first to gain a foothold, with the result that in 1979 it accounted for almost a half (49%) of the Community's exports to this market as a whole, while France's share fell to 14%, as did that of the United Kingdom.

4.12 EXPORTATIONS VERS LES PAYS D'ASIE A ÉCONOMIE PLANIFIÉE

4.12.1 Comparaisons entre pays membres

Bien que ce marché n'ait acheté à la Communauté que pour 3,2 Mrd de dollars en 1979, il comprend un pays aussi important que la Chine dont l'ouverture vers le commerce international ne fait que commencer. Les grands changements dans la répartition géographique des exportations de la Communauté doivent être analysés avec précaution, compte tenu des bouleversements politiques et économiques qui ont affecté cette région depuis vingt ans. Dans les années 60, les exportations de la CE se dirigeaient surtout vers la péninsule indochinoise où la France gardait une position de privilège. A partir du début des années 70, le marché chinois a commencé à s'ouvrir et la RF d'Allemagne a été la plus rapide à assurer sa présence. Ainsi en 1979 sur l'ensemble de ce marché, la RF d'Allemagne détenait près de la moitié (49%) des exportations de la CE alors que la part de la France descendait à 14% comme celle du Royaume-Uni.

4.12.2 Comparison between the Community, the USA and Japan

The composition of this area calls for a number of explanatory remarks: throughout the period under review Vietnam is regarded as an integral part, even though prior to 1974 the bulk of its trade was carried on by South Vietnam, which was not a State-trading country. The political and economic changes in the area had repercussions on bilateral trade flows (France-Vietnam, USA-China, etc.), leading to differences in the structure of the industrialized countries' exports between 1963 and 1979.

Thus, for example, Canada's and Australia's shares of the area's total imports, which had been substantial in 1963 (11% and 16% respectively), fell considerably in subsequent years as a result of greater penetration by other countries, in particular Japan (15% in 1963 and 37% in 1979). The United States' share remained apparently stable, although it must be borne in mind that, whereas in 1963 its trade was concentrated solely on (South) Vietnam, in 1979 trade with China occupied first place by a wide margin. The Community's share remained stable, although there were the internal changes noted above. In 1979 the State-trading countries of Asia bought \$11 000 million-worth of goods from the industrialized countries, with China accounting for approximately 88%.

4.13 EXPORTS TO THE INDUSTRIALIZED COUNTRIES OF THE SOUTHERN HEMISPHERE (AUSTRALIA, NEW ZEALAND, SOUTH AFRICA)

4.13.2 Comparisons between Member States

These markets were relatively more important for the Community at the beginning of the 1960s than they are now. Together, however, they represent a market worth around \$10 000 million for Community goods. Although well down on 1963, the United Kingdom's share of European exports (42% in 1979) is still by far the greatest. All the other Member States saw their share double since the beginning of the 1960s, with France's going up from 4% to 9%, the Federal Republic of Germany's from 15% to 31%, Italy's from 4% to 8% and that of the other countries from 6% to 10%. More or less the same trend is discernible for all the categories of products apart from capital goods, where the Federal Republic of Germany's share went up very quickly and even outstripped the United Kingdom's (36% as against 37%).

4.12.2 Comparaisons CE, États-Unis, Japon

La composition de cette zone appelle quelques remarques: sur l'ensemble de la période considérée, le Vietnam est compris dans cette zone, même si avant 1974 la plus grande partie du commerce était effectuée par le Vietnam du Sud qui n'était pas un pays à commerce d'État. Les changements politiques et économiques intervenus dans la région ont eu des effets sur les courants d'échanges bilatéraux (France-Vietnam, USA-Chine, etc.), ce qui comporte une structure différente dans les exportations des pays industrialisés entre 1963 et 1979.

C'est ainsi, par exemple, que la part du Canada, de l'Australie dans le total des importations de la région était très importante en 1963 (11% et 16%), alors qu'elle a baissé considérablement par la suite en raison de la plus forte pénétration d'autres pays et en particulier du Japon (15% en 1963 et 37% en 1979). La part des États-Unis est restée apparemment stable encore qu'il faille considérer que, si en 1963 les échanges étaient concentrés uniquement sur le Vietnam (sud), en 1979, ce sont les échanges avec la Chine qui détiennent largement la première place. La part de la CE est demeurée stable avec toutefois les changements internes commentés ci-dessus. En 1979, les pays asiatiques à commerce d'État ont acheté aux pays industrialisés pour 11 Mrd de dollars, dont environ 88% par la Chine.

4.13 EXPORTATIONS VERS LES PAYS INDUSTRIALISÉS DE L'HÉMISPHERE AUSTRAL (AUSTRALIE, NOUVELLE-ZÉLANDE, AFRIQUE DU SUD)

4.13.1 Comparaisons entre pays membres

Ces marchés étaient relativement plus importants pour la Communauté au début des années 60 qu'ils ne le sont actuellement. Ils représentent toutefois un débouché d'environ 10 Mrd de dollars pour les marchandises communautaires. Bien qu'en forte baisse par rapport à 1963, la part du Royaume-Uni demeure prépondérante dans les exportations européennes (42% en 1979). Tous les autres pays membres ont vu leur part doubler depuis le début des années 60: ainsi la part de la France est passée de 4 à 9%, celle de la RF d'Allemagne de 15 à 31%, celle de l'Italie de 4 à 8% et celle des autres pays de 6 à 10%. On retrouve plus ou moins la même tendance pour l'ensemble des catégories de produits à l'exception des biens d'équipement où la part de la RF d'Allemagne a progressé très rapidement égalant presque celle du Royaume-Uni (36 contre 37%).

4.13.2 Comparison between the Community, the USA and Japan

In 1979 the industrialized countries of the southern hemisphere represented an export market worth approximately \$21 000 million to the industrialized countries as a whole. Between 1963 and 1979 the Community's share fell from 57% to 42%, this slice of the market being picked up by the USA (20% and 24%) and above all Japan (7% and 18%).

4.13.2 Comparaisons CE, États-Unis, Japon

Les pays industrialisés de l'hémisphère sud ont représenté pour les pays industrialisés un marché d'exportation d'environ 21 Mrd de dollars en 1979. Par rapport à 1963, on constate une baisse de la part de la Communauté qui est passée de 57% à 42% en 1979, cette tranche de marché ayant été récupérée par les États-Unis (20% et 24%) et surtout par le Japon (7% et 18%).

EUROSTAT-PUBLIKATIONER

De europæiske Fællesskabers statistiske Kontors program vedrørende de publikationer, der udgives i løbet af året, offentliggøres, inddelt efter emner, i årets første nummer af brochuren »Eurostat News« (»Informations de l'Eurostat«), der udkommer hvert kvartal.

De publikationer, der netop er udkommet, eller som er under forberedelse, er nævnt i en meddelelse, der er indhæftet i »Eurostat News« under overskrifterne »Published« (»Vient de Paraître«) og »To be published« (»Va paraître«).

EUROSTAT-VERÖFFENTLICHUNGEN

Das Veröffentlichungsprogramm des Statistischen Amtes der Europäischen Gemeinschaften für das jeweilige Kalenderjahr ist, nach Themenkreisen gegliedert, im ersten Heft jedes Jahrgangs der vierteljährlich erscheinenden Broschüre „Eurostat-Mitteilungen“ enthalten.

Auf die neuerschienenen oder in Vorbereitung befindlichen Veröffentlichungen wird in den „Eurostat-Mitteilungen“ unter den Rubriken „Erschienen“ und „In Vorbereitung“ hingewiesen.

EUROSTAT PUBLICATIONS

The programme of publications by the Statistical Office of the European Communities to appear during the year is published, using the classification based on themes, in the first number each year of the quarterly booklet 'Eurostat News'.

'Eurostat News' also lists the latest publications and publications being prepared under the headings 'Published' and 'To be published'.

PUBLICATIONS DE L'EUROSTAT

Le programme de l'Office statistique des Communautés européennes relatif aux publications qui seront éditées en cours d'année est publié, selon le classement par thèmes traités, dans le premier numéro de l'année de la brochure trimestrielle intitulée « Informations de l'Eurostat ».

Les publications nouvellement sorties de presse ou celles qui sont en préparation font l'objet d'une annonce insérée dans ces mêmes « Informations de l'Eurostat » sous les rubriques « Vient de paraître » ou « Va paraître ».

PUBBLICAZIONI DELL'EUROSTAT

L'Istituto statistico delle Comunità europee pubblica ogni anno, nel primo numero del fascicolo trimestrale «Informations de l'Eurostat» («Eurostat News»), il programma delle pubblicazioni previste nel corso dell'anno, classificate per argomenti.

Inoltre, in ogni numero delle «Informations de l'Eurostat» le rubriche «Vient de paraître» («Published») e «Va paraître» («To be published») annunciano rispettivamente le ultime pubblicazioni uscite e quelle in preparazione.

PUBLIKATIES VAN EUROSTAT

Het programma van het Bureau voor de Statistiek van de Europese Gemeenschappen met de publikaties die in de loop van het jaar worden uitgegeven, is, ingedeeld naar onderwerp, opgenomen in het eerste nummer van de driemaandelijks brochure „Eurostat News“ („Eurostat Mitteilungen“).

De zojuist verschenen publikaties en de in voorbereiding zijnde publikaties worden in deze brochure aangekondigd in de rubrieken „Published“ („Erschienen“) of „To be published“ („In Vorbereitung“).
