Foreword

1. Introduction

The monthly bulletin on external trade, published by Eurostat in the B series, Short-term trends, sets out to provide within the shortest possible deadlines data on short-term trends in the Community's external trade. In particular, it contains data on the Community's trade flows with its trading partners and the various economic areas and a breakdown of this data by major product group. The bulletin also provides an overview, based on data from various international sources, of the place occupied by the Community in the external trade of its main trading partners and of third countries. Trade flows between Member States are recorded under the Intrastat system and will be published at a later date.

The Community's external trade statistics at the most detailed classification level are published monthly on CD-ROM (B series: Monthly external trade of the EEC).

Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External Trade Statistical Yearbook (Series A)*".

External trade statistics are also available on line via the Eurostat data banks (Comext).

The catalogue of Eurostat publications and a detailed methodological description can be found in "*External Trade Statistics User's Guide*" published in all the Community languages.

2. Sources

Since 1978, the Member States have transmitted Community external trade statistics according to a uniform methodology laid down by Council Regulation (EEC) No 1736/75. This regulation was amended to take account of the new developments in 1988, i.e. the introduction of the new external trade classification entitled "Combined Nomenclature" (CN) and the new "Single Administrative Document".

The tables in this bulletin are compiled by Eurostat from the detailed data transmitted on magnetic tape by the Member States; these data are broken down according to the eight-digit subheadings of the Combined Nomenclature.

Eurostat wishes to take this opportunity of thanking the relevant departments in the Member States for their cooperation, which enables it to compile these harmonized Community statistics and to ensure their quality.

3. Coverage

The results of the Community statistics relate to special trade. This comprises:

- 1) imports of goods placed in free circulation on their arrival at or on leaving warehouses, imports for inward processing and imports after outward processing (customs procedures);
- 2) exports of Community goods, exports after inward processing and exports for outward processing (customs procedures).

Transit and warehousing traffic are not covered by Community statistics.

4. Statistical territory

The statistical territory of the Community comprises the customs territory of the Community excluding the French overseas departments. Thus Greenland, the Canary Islands and Ceuta and Melilla are not covered, while the Azores and Madeira for Portugal and the Balearics for Spain are.

From October 1990, the external trade data of the Federal Republic of Germany, the other Member States and EUR 12 relate to the Federal Republic of Germany in its borders after 3 October 1990.

5. *Goods classification*

In this publication the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of correspondence tables drawn up by Eurostat on the basis of the Combined Nomenclature (CN).

6. *Trading partners: countries and economic areas*

The Community results are broken down by country of origin, country of consignment and country of destination in accordance with the "Country nomenclature for statistics on Community external trade and trade between its Member States", referred to as the Geonomenclature (Geonom).

When goods that originate in third countries and are not in free circulation in the Community are imported, Community statistics state the country of origin. When such goods are exported, the country of destination is specified.

7. *Units*

Values

The statistical value of goods on import is equal to the customs valuation or to a value determined by reference to the concept of customs valuation (in the case, for example, of imports from other Member States). It is the CIF value (cost, insurance, and freight).

The statistical value of goods on export is equal to their value at the place and time at which they leave the statistical territory of the exporting Member State. It is the FOB value (free on board).

The value is expressed in European units of account (ecus). The ecu is a "basket" currency unit based on the market exchange rates of a certain quantity of each Community currency according to a weighting system involving the five-year average of each Member State's gross national product and intra-Community trade balance. The rates used in this bulletin are averages of daily rates. The bulletin contains a table showing the conversion rates used.

Quantity

The statistics give the net weight of the goods.

8. *Confidentiality*

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The relevant legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data; it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, statistical procedure, quantities, country, partner, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of these headings on the results for the Community as a whole; in particular, trade data on these headings are included at higher levels of aggregation and in the totals.

On the other hand, the statistics are supplied on the strength of customs documents and do not take account of any amendments made by some Member States at the end of the year in drawing up accounts on intergovernmental trade. In view of this, drawing up a trade balance may produce figures that vary sometimes considerably from the official national figures.

9. *Corrections*

Every month the Member States send Eurostat a magnetic tape containing the results for the current month.

In order to correct these results, the Member States also send every month a magnetic tape containing monthly corrections covering the previous 24-month period.

Indices

1. Introduction

Changes over time in the value of trade are influenced by variations in prices and the quantities marketed. Indices are used to measure these two effects. In general, a system of indices is chosen so that the product of the volume index and the price index expresses the value index. Several systems of indices meeting this requirement may be regularly used. The results obtained by using one system will generally be different from those obtained by using another. For various reasons the Member States do not use a common system, and the level of breakdown of their indices by product group and by partner area also varies. Eurostat has therefore devised its own external trade indices which enable it to calculate, for each Member State, Community indices on a strictly comparable basis. These indices may be consulted on the Trend database developed by Eurostat.

2. Sources of data

There are basically two ways of obtaining information on prices: conducting price surveys by directly approaching importers and exporters and using data collected by the customs authorities. At present only customs data are available in all the Member States. Eurostat therefore calculates indices of unit values (values divided by quantities) and uses them as price variation indicators. The computing programs contain a system for automatically identifying extreme unit values pointing to unlikely price movements.

3. Extreme values

To avoid a number of restrictions involved in using customs data, Eurostat decided to adopt two basic principles in calculating unit value indices: using the most detailed data possible and always bearing in mind that the object of the exercise is to break down variations in value into a "price" component and a "volume" component. Two rules are applied in order to exclude unlikely price movements. The first is that, given the general level of inflation, the price of a product should not be very different from its level a year ago. Any variation of five or more points is regarded as suspect. The second – more restrictive – rule is that the variation in the price of a product in relation to the most recent month for which data are available should not be very different from the average price variation for similar products. Applying these rules prevents extreme variations due to factors that are unconnected with prices and would otherwise distort the unit value index. For products whose unit values are rejected, the variations are taken to be the same as those for similar products.

4. Classification used

The United Nations Standard International Trade Classification (SITC), revised for the third time in 1988, was drawn up on the basis of the Harmonized Commodity Description and Coding System (HS). Using tables of correspondence between the various classifications (Nimexe, Combined Nomenclature and SITC), Eurostat has been able to publish an uninterrupted time series of external trade indices from 1979 to the present.

From 1994 onwards, external trade publications will give indices calculated from 1989 on the basis of the following SITC Rev. 3 aggregates:

TOTAL: all commodities;
0+1: foods, beverages and tobacco;
2+4: crude materials, except fuels;
3: fuels
5+6+7+8: manufactured goods.

By compiling other correspondence tables, Eurostat is able to supply complete time series based on other classifications.

5. *Types of indices and rebasing*

Eurostat calculates Fisher's "ideal" annual chain indices. Since the "basket of goods" marketed at international level varies rapidly over time, the annual chain permits the updating of the index weightings. Each month the changes in unit values in the product groups at detailed level are weighted in order to obtain the changes in unit values in the various major product categories. Since these changes are based on the previous year, a chain of unit values is obtained. The corresponding volume index chain is the ratio of the unit value variation to the variation in value for the month in question compared with the monthly average for the previous year. The indices published each month are calculated by multiplying the above-mentioned chains by the annual indices for the previous year, a fixed reference period having been chosen (at present 1990). The annual unit value chains are obtained by weighting the monthly chains by the volumes, while the annual volume chains are calculated by dividing the annual value variations by the unit value chains.

6. *General comments*

- Only data on normal trade (statistical procedure 1) are used to calculate the unit value indices; however, data on total trade (covering all the statistical procedures) are used to calculate the value indices from which the volume indices are obtained.
- The unit value indices are calculated on the basis of values expressed in ecus.
- For any further information on the methods used to calculate the indices, please refer to Eurostat's specialised publications.

Trends in Community trade

Seasonal Adjustments: Results

Following a period of relative stability after mid-1991, from the beginning of 1993 seasonally-adjusted exports from the European Community to the rest of the world experienced a sharp upturn (+7.7% for the first eight months of the year compared with the same months of the previous year). Since June 1993, exports appear to have stabilised at a high level. The figure for August 1993 is up 0.6% on July 1993.

After a period of great instability at the beginning of 1993, since May the seasonally-adjusted data for European Community imports from the rest of the world appear to be indicative of an upturn. The sharp increase recorded for August 1993 (+6.0%

compared to July 1993) should be interpreted with caution, however, given the traditional strong seasonal component to this month.

The seasonally-adjusted trade balance of the European Community, which had been improving since the beginning of 1992, recorded a perceptible decline in August 1993 (-ECU 2.1 billion). Following three successive surpluses, a definitive interpretation of the August result is not yet possible: is the rise in imports merely the result of a change in the seasonality attributed to this month or does it, rather, prefigure a lasting upturn in imports?

(1) As from October 1990, the territory of the Federal Republic of Germany includes the territory of the former German Democratic Republic, including East Berlin. Community results are drawn up accordingly.

(2) Seasonal Adjustment via X11/ARIMA procedure.

GLOBAL TRENDS IN EXTERNAL TRADE

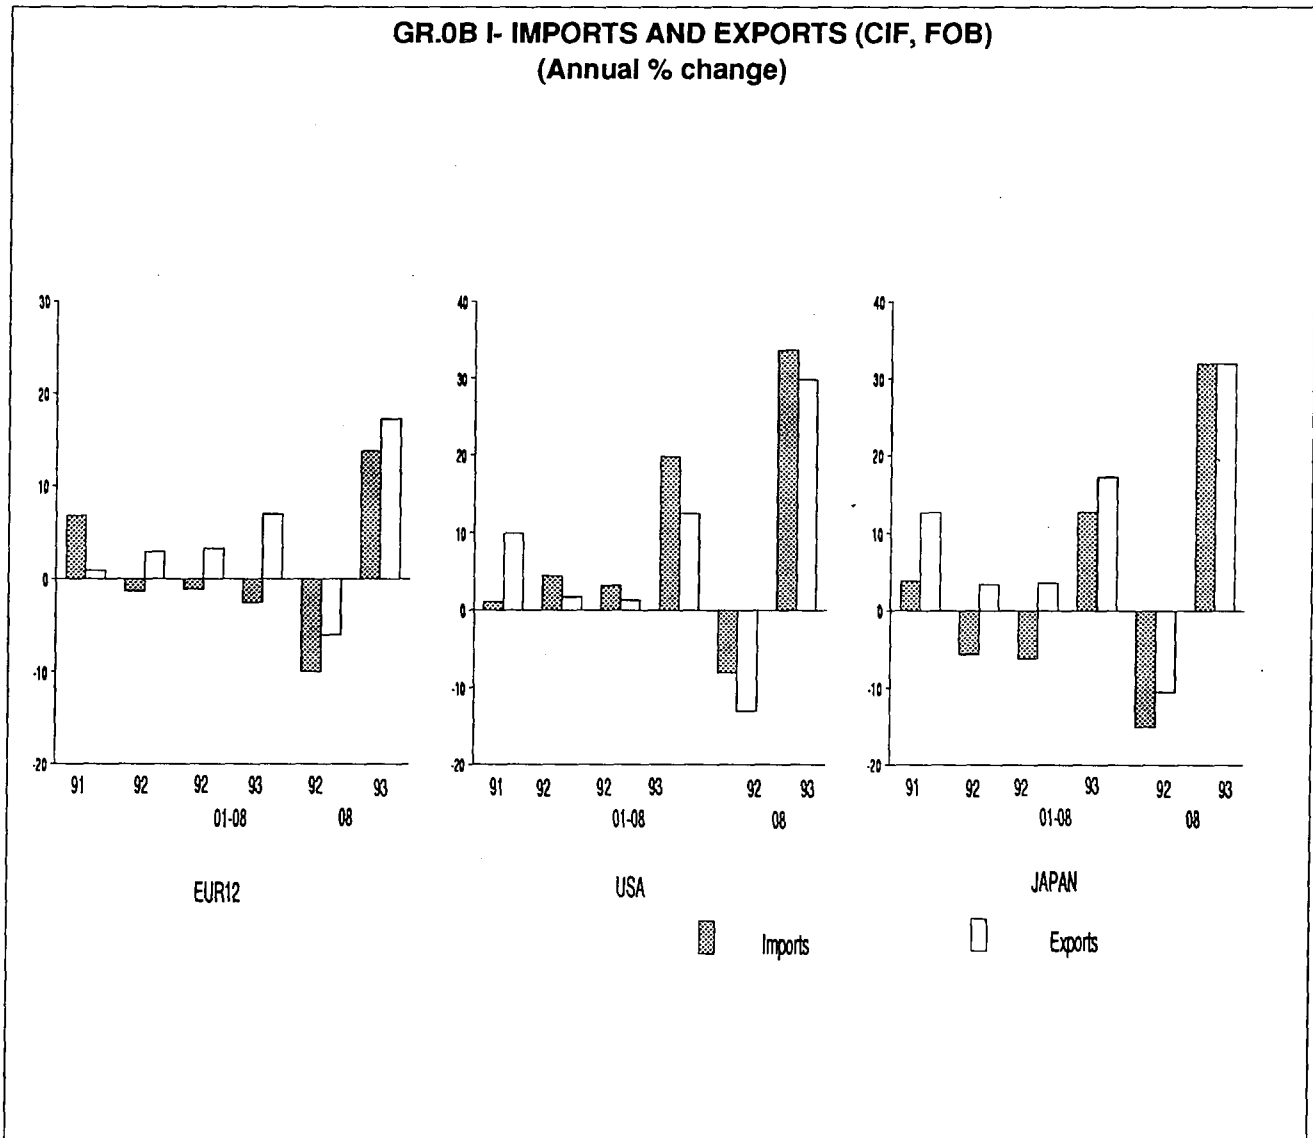

EXTERNAL TRADE FOR THE EUROPEAN UNION: Results for August 1993.

The difference between the rates of increase of exports and imports for the period January-August 1992 and 1993 reached 10 points for the European Union, -7 points for USA and 4 points for Japan.

The cumulative deficit in the **European Union's** external trade was ECU -13.1 billion for the first eight months of 1993, compared with ECU -41.3 billion for the corresponding period in the previous year. Imports fell by 2.6% between January-August 1992 and the same period in 1993, while there was a substantial increase in exports (7%).

Japan showed a positive trade balance of ECU 67 billion over the same period ECU -14.5 billion up on January-August 1992. Japan's exports increased by 17.2 % in ecus and 7% in dollars between the two periods. In yen, they dropped by 2.5%. Imports increased by 12.8% in ecus and 3% in dollars and dropped by 8.2% in yen.

The **United States'** cumulative trade deficit for January-August 1993 was ECU -74.1 billion, 26.1 billion up on the first eight months of 1992. Imports were up by 20% in ecus and 9% in dollars and exports by 12.5% and 3% respectively.

1 billion = 10⁹

GLOBAL TRENDS IN EXTERNAL TRADE

EXTRA-TRADE FOR THE MEMBER STATES: Results for August 1993.
Italy and Germany experienced surplus during the period January- August 1993
which were 7 billion ECU bigger than the corresponding figures of 1992.

Italy's trade balance picked up by ECU 7.4 billion between the first eight months of 1992 and the corresponding period in 1993: imports fell by 7%, while exports rose by almost 12%, partly thanks to the devaluation of the lira.

Germany's trade surplus increased by ECU 7 billion, with a 1.6% drop in imports and a 5.6% increase in exports over the period January-August 1993.

Spain's trade balance picked up by some ECU 5 billion between January-August 1992 and the same period in 1993, following the drop of almost 20% in imports, which were made more expensive by the parity of the peseta. Exports increased by 9.4%.

The deficits of the **BLEU** and the **Netherlands** were ECU 3.8 billion and ECU 3.3 billion respectively down when compared with the first eight months of 1992. Imports fell by 5.4% and 3% respectively, while exports rose substantially by 18% and 15%, respectively.

Denmark's trade surplus increased by ECU 1.1 billion, with a drop of 6.2% in imports and an increase of 6.8% in exports.

The **United Kingdom's** deficit decreased slightly by ECU 0.8 billion, with imports 3.2% up on the level for the first eight months of 1992 and exports 6.4% up.

Portugal's deficit was slightly down by ECU 0.2 billion, with exports and imports both showing a reduction of almost 12%.

The trade balances of **Greece, France and Ireland** deteriorated slightly compared with the first eight months of 1992. Exports by Greece and Ireland were up by 21%, while imports were 9% up for Greece and 31% up for Ireland. France's imports and exports were respectively 0.8% and 1.1% down compared with the first eight months of 1992.

**EXTRA-EUROPEAN UNION TRADE BY PARTNER COUNTRY:
Results for August 1993. The trade deficit with the United States and Canada
was halved in January-August 1993, when it was ECU 5.6 billion.**

The European Union had a trade deficit with the industrialized countries of ECU 21.1 billion for the first eight months of 1993, which was ECU 15 billion less than for the corresponding period in 1992. This improvement was due to trade with the United States and Canada worth ECU 6.4 billion. The trade deficit with Japan decreased by ECU 4.2 billion, while that with the EFTA countries remained more or less the same as for the same period in 1992. The trade surplus with the other countries of Western Europe was up by ECU 2.7 billion.

Imports from the industrialized countries fell sharply for January-August 1993 compared with the same period in 1992 (-6.2%). Imports from the United States and Canada fell by 4.1%, and imports from the EFTA countries by 4.4%. Imports from Japan fell by 11.2%. Exports to the industrialized countries increased by 2.1%. They were supported by exports to the United States (+7%). Exports to the EFTA countries fell by almost 4%. Exports to Japan and to the other countries of Western Europe rose by 2.3%.

Trade between the European Union and the developing countries showed a surplus of ECU 13.1 billion for January-August 1993, an increase of more than ECU 10 billion over the corresponding period in 1992. Trade with the countries of the Mediterranean Basin showed a cumulated surplus of almost ECU 8 billion, which was 6 billion more than for the corresponding period in 1992. The trade balances with the Latin American and ACP countries and the Asian NICs, which were in deficit for January-August 1992, moved into surplus for January-August 1993. They were ECU 4.3 billion ECU 2.9 billion and ECU 3.1 billion respectively. The deficit with the OPEC countries was reduced by half to ECU 0.5 billion.

Imports from developing countries fell by 3.8% compared with January-August 1992. Imports from the OPEC countries fell by 6.7% and those from the countries of the Mediterranean Basin by 8.7%. Imports from the Latin American and the ACP countries fell sharply, by 14.1% and 24.7%. Only imports from the Asian NICs continued to grow between January-August 1992 and the same period in 1993 (+1.3%). Exports to the developing countries increased by 6.8%. They were supported by the exports to the Asian NICs (18.6%) and the countries of the Mediterranean Basin (12%). Exports to the Latin American countries increased by 16% between the first eight months of 1992 and the same period in 1993. Exports to the OPEC countries fell by 4.7%. Exports to the ACP countries fell slightly (-0.9%).

There was a trade surplus with the countries of Central and Eastern Europe of ECU 1 billion in January-August 1993, compared with a deficit of ECU 0.9 billion for the corresponding period in 1992. Imports from these countries increased by 7.8%, while exports increased by some 17%.

The European Union's trade balance with China showed a deficit of ECU 5.4 billion for the first eight months of 1993, an improvement of ECU 1.5 billion over the corresponding period for 1992. Imports from China increased by 17.7%. Exports to China exploded (87.7%).

EUROPEAN UNION'S EXTERNAL TRADE BY PRODUCTS: Results for August 1993.
Trade in manufactured products (SITC 5-8) produced a surplus which was some ECU 18 billion greater for January-August 1993 than for the corresponding period in 1992.

The trade deficit in fuels (SITC 3) was reduced by almost ECU 5 billion to ECU 31.1 billion for January-August 1993. The surplus on **machinery and transport equipment** (SITC 7) exceeded ECU 31 billion for the first eight months of 1993, an improvement of ECU 13 billion. The trade balance in chemicals (SITC 5) was ECU 18.3 billion compared with ECU 13.5 billion for January-August 1992. The deficit in other manufactured goods (SITC 6+8) remained stable compared with the first eight months of 1992 at ECU 11.3 billion. The deficit in raw materials (SITC 2+4) was nearly ECU 14 billion, an increase of ECU 2.7 billion over January-August 1992. Trade in food products (SITC 0+1) was in deficit ECU -0.7 billion compared with ECU 3.1 billion for the first eight months of 1992.

Imports of machinery and transport equipment and **chemicals** fell slightly between the first eight months of 1992 and the corresponding period in 1993 (-1.3% and -1.1%). Imports of chemicals increased by 5%. Imports of fuels fell by 4.3%. The cost of the European Union's crude oil supplies expressed in ECU per barrel remained stable on average for January-August 1993 compared with the corresponding period in 1992. Imports of raw materials fell sharply (-10.4%), while imports of food products fell by 7.6%.

Exports of **machinery and transport equipment** increased by 10.1% compared with the first eight months of 1992. The growth in exports of chemicals was greater (+12.5%). Exports of other manufactured goods increased by 6%. Exports of food products grew slightly (+2.4%).

(1) The ECU is a "basket" monetary unit based on the market exchange rates of certain quantity of each Community currency weighted on the basis of the average gross national product over five years and of the intra-Community trade of each Member State. The rates used here are averages of the daily rates.

List of products : SITC, rev. 3

0-9 Total trade

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s.

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals

- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

7 Machinery and transport equipment

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
