Foreword

1. Introduction

The monthly bulletin on external trade, published by Eurostat in the B series, Short-term trends, sets out to provide within the shortest possible deadlines data on short-term trends in the European Union's external trade. In particular, it contains data on the European Union's trade flows with its trading partners and the various economic areas and a breakdown of this data by major product group. The bulletin also provides an overview, based on data from various international sources, of the place occupied by the European Union in the external trade of its main trading partners and of third countries. Trade flows between Member States are recorded under the Intrastat system and will be published at a later date.

The European Union's external trade statistics at the most detailed classification level are published monthly on CD-ROM (B series: Intra and extra-EU trade).

Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External Trade Statistical Yearbook (Series A)*".

External trade statistics are also available on line via the Eurostat data banks (Comext).

The catalogue of Eurostat publications and a detailed methodological description can be found in "*External Trade Statistics User's Guide*" published in all languages of the European Union.

2. Sources

Since 1978, the Member States have transmitted European Union external trade statistics according to a uniform methodology laid down by Council Regulation (EEC) No 1736/75. This regulation was amended to take account of the new developments in 1988, i.e. the introduction of the new external trade classification entitled "Combined Nomenclature" (CN) and the new "Single Administrative Document".

The tables in this bulletin are compiled by Eurostat from the detailed data transmitted on magnetic tape by the Member States; these data are broken down according to the eight-digit subheadings of the Combined Nomenclature.

Eurostat wishes to take this opportunity of thanking the relevant departments in the Member States for their cooperation, which enables it to compile these harmonized European Union statistics and to ensure their quality.

3. Coverage

The results of the European Union statistics relate to special trade. This comprises:

- 1) imports of goods placed in free circulation on their arrival at or on leaving warehouses, imports for inward processing and imports after outward processing (customs procedures);
- 2) exports of European Union goods, exports after inward processing and exports for outward processing (customs procedures).

Transit and warehousing traffic are not covered by European Union statistics.

4. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union excluding the French overseas departments. Thus Greenland, the Canary Islands and Ceuta and Melilla are not covered, while the Azores and Madeira for Portugal and the Balearics for Spain are.

From October 1990, the external trade data of the Federal Republic of Germany, the other Member States and EUR 12 relate to the Federal Republic of Germany in its borders after 3 October 1990.

5. *Goods classification*

In this publication the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of correspondence tables drawn up by Eurostat on the basis of the Combined Nomenclature (CN).

6. *Trading partners: countries and economic areas*

The results of the European Union are broken down by country of origin, country of consignment and country of destination in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom).

When goods that originate in third countries and are not in free circulation in the European Union are imported, EU statistics state the country of origin. When such goods are exported, the country of destination is specified.

7. *Units*

Values

The statistical value of goods on import is equal to the customs valuation or to a value determined by reference to the concept of customs valuation (in the case, for example, of imports from other Member States). It is the CIF value (cost, insurance, and freight).

The statistical value of goods on export is equal to their value at the place and time at which they leave the statistical territory of the exporting Member State. It is the FOB value (free on board).

The value is expressed in European units of account (ecus). The ecu is a "basket" currency unit based on the market exchange rates of a certain quantity of each European Union currency according to a weighting system involving the five-year average of each Member State's gross national product and intra-EU trade balance. The rates used in this bulletin are averages of daily rates. The bulletin contains a table showing the conversion rates used.

Quantity

The statistics give the net weight of the goods.

8. *Confidentiality*

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The relevant legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data; it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, statistical procedure, quantities, country, partner, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of these headings on the results for the European Union as a whole; in particular, trade data on these headings are included at higher levels of aggregation and in the totals.

On the other hand, the statistics are supplied on the strength of customs documents and do not take account of any amendments made by some Member States at the end of the year in drawing up accounts on intergovernmental trade. In view of this, drawing up a trade balance may produce figures that vary sometimes considerably from the official national figures.

9. *Corrections*

Every month the Member States send Eurostat a magnetic tape containing the results for the current month.

In order to correct these results, the Member States also send every month a magnetic tape containing monthly corrections covering the previous 24-month period.

Indices

1. Introduction

Changes over time in the value of trade are influenced by variations in prices and the quantities marketed. Indices are used to measure these two effects. In general, a system of indices is chosen so that the product of the volume index and the price index expresses the value index. Several systems of indices meeting this requirement may be regularly used. The results obtained by using one system will generally be different from those obtained by using another. For various reasons the Member States do not use a common system, and the level of breakdown of their indices by product group and by partner area also varies. Eurostat has therefore devised its own external trade indices which enable it to calculate, for each Member State, European Union indices on a strictly comparable basis. These indices may be consulted on the Trend database developed by Eurostat.

2. Sources of data

There are basically two ways of obtaining information on prices: conducting price surveys by directly approaching importers and exporters and using data collected by the customs authorities. At present only customs data are available in all the Member States. Eurostat therefore calculates indices of unit values (values divided by quantities) and uses them as price variation indicators. The computing programs contain a system for automatically identifying extreme unit values pointing to unlikely price movements.

3. Extreme values

To avoid a number of restrictions involved in using customs data, Eurostat decided to adopt two basic principles in calculating unit value indices: using the most detailed data possible and always bearing in mind that the object of the exercise is to break down variations in value into a "price" component and a "volume" component. Two rules are applied in order to exclude unlikely price movements. The first is that, given the general level of inflation, the price of a product should not be very different from its level a year ago. Any variation of five or more points is regarded as suspect. The second – more restrictive – rule is that the variation in the price of a product in relation to the most recent month for which data are available should not be very different from the average price variation for similar products. Applying these rules prevents extreme variations due to factors that are unconnected with prices and would otherwise distort the unit value index. For products whose unit values are rejected, the variations are taken to be the same as those for similar products.

4. Classification used

The United Nations Standard International Trade Classification (SITC), revised for the third time in 1988, was drawn up on the basis of the Harmonized Commodity Description and Coding System (HS). Using tables of correspondence between the various classifications (Nimexe, Combined Nomenclature and SITC), Eurostat has been able to publish an uninterrupted time series of external trade indices from 1979 to the present.

From 1994 onwards, external trade publications will give indices calculated from 1989 on the basis of the following SITC Rev. 3 aggregates:

TOTAL: all commodities;
0+1: foods, beverages and tobacco;
2+4: crude materials, except fuels;
3: fuels
5+6+7+8: manufactured goods.

By compiling other correspondence tables, Eurostat is able to supply complete time series based on other classifications.

5. *Types of indices and rebasing*

Eurostat calculates Fisher's "ideal" annual chain indices. Since the "basket of goods" marketed at international level varies rapidly over time, the annual chain permits the updating of the index weightings. Each month the changes in unit values in the product groups at detailed level are weighted in order to obtain the changes in unit values in the various major product categories. Since these changes are based on the previous year, a chain of unit values is obtained. The corresponding volume index chain is the ratio of the unit value variation to the variation in value for the month in question compared with the monthly average for the previous year. The indices published each month are calculated by multiplying the above-mentioned chains by the annual indices for the previous year, a fixed reference period having been chosen (at present 1990). The annual unit value chains are obtained by weighting the monthly chains by the volumes, while the annual volume chains are calculated by dividing the annual value variations by the unit value chains.

6. *General comments*

- Only data on normal trade (statistical procedure 1) are used to calculate the unit value indices; however, data on total trade (covering all the statistical procedures) are used to calculate the value indices from which the volume indices are obtained.
- The unit value indices are calculated on the basis of values expressed in ecus.
- For any further information on the methods used to calculate the indices, please refer to Eurostat's specialised publications.

Commentary and graphs

The commentary refers to the state of the database on 25.10.1994

N.B. : Intra-EC and Extra-EC Foreign Trade of France.

The Foreign Trade statistics of France published by Eurostat are produced by the French Customs. In fact, these statistics differ from those published nationally by the French Customs. The statistics published by Eurostat are generated by a specific IT process of the French Customs. This IT process had to be rewritten because of the introduction of Intrastat.

Throughout 1994, there was a marked difference between the data published by the French Customs and that published by Eurostat. After checking and correcting the IT process, a new set of statistics for the period January 1993 to July 1994 will be produced and will be available at the end of October. The provision of statistical data from the French Customs to Eurostat will then return to normal.

These statistics will be published in the N° 12/94 Monthly Bulletin.

Trends in European Union trade

SEASONAL ADJUSTMENTS: RESULTS

After fairly steady improvement throughout 1993 the seasonally-adjusted figures for the European Union's exports to the rest of the world are showing very little change since the beginning of 1994. For the second time in a row, there was a slight drop in March 1994 (-0.6% compared with February). In spite of this fact, the results for the first quarter show a strong improvement (+17.5%) in comparison with the same period of 1993.

Despite a jittery performance since the start of 1993, the seasonally-adjusted figures for the European Union's imports from the rest of the world have again been showing an upward trend since the second quarter of

1993. This trend is confirmed in 1994 and they continue at a high level in spite of some fluctuations (-2.5% in February and +1.2% in March). During the first quarter of 1994 imports were running at 9.4% above their level for the corresponding quarter of 1993.

As a consequence of the improvement registered since the third quarter of 1991, the European Union's seasonally-adjusted trade balance shows that the figures are balanced for the first three months of 1994 in spite of a deficit of ECU 0.3 billion in March. By way of comparison, there was a deficit of ECU 7.8 billion in the trade balance for the first quarter of 1993.

(1) Seasonal Adjustment via X11/ARIMA procedure.

GLOBAL TRENDS IN EXTERNAL TRADE

EXTERNAL TRADE OF THE EUROPEAN UNION: Results for March 1994 (*)

The gap between the rates of change between exports and imports during the first three months of 1994 was +7.0 points for the European Union, -4.3 points for the United States and -0.2 points for Japan.

The external trade deficit of the **European Union (EU)** went down from ECU 12.6 billion to ECU 6.4 billion between the two first quarters of 1993 and 1994. This improvement of the extra-EU's trade balance is mainly due to the increase of the exports (17.8%); EU imports grew somewhat less (10.8%).

The trade deficit of the **United States** went up from ECU 21.8 billion in the first quarter of 1993 to ECU 29.6 billion in the same period of 1994. While US imports increased by 16.1%, exports rose 11.8% (both in ECU). In US

dollar terms, the difference between the percentage increase of both imports and exports was 4.1% on the import side.

The **Japanese** external trade surplus went up ECU 3.1 billion to ECU 27.9 billion between the two first quarters of 1993 and 1994. Both imports and exports increased roughly by the same amount in ECU (12.8% and 12.6% respectively) and in US dollars (6.6% and 6.4% respectively). In terms of Yen, Japan's imports went down 5.7%, while exports decreased by 6.3%.

() These figures should be regarded with caution, due to the introduction of the INTRASTAT system in the beginning of 1993.*

GLOBAL TRENDS IN EXTERNAL TRADE

EXTERNAL TRADE BY EU MEMBER STATES: Results for March 1994.

Germany and Italy have registered the largest surpluses among the EU countries during the first three months of 1994 (ECU 3.2 billion and ECU 2.3 billion respectively), while the United Kingdom and the Netherlands recorded the biggest deficits (ECU 6.5 billion and ECU 4.8 billion respectively).

The two EU countries with the most significant surpluses in the first three months of 1994 were Germany and Italy. **Germany** decreased its extra-EU trade surplus from ECU 4.1 billion to ECU 3.2 billion between the two first quarters of 1993 and 1994. While imports increased by 10%, exports rose 6.7%. **Italy** also registered an important surplus in the first three months of 1994 (ECU 2.3 billion), when for the same period of 1993 it showed a deficit of ECU 0.3 billion. This improvement is mainly due to the increase of Italian extra-EU exports (20.4%); imports increased by only 2.6% between these two periods. **France** saw its extra-EU trade balance improve from a deficit of ECU 3.3 billion for the first quarter of 1993, to a surplus of ECU 1.3 billion for the same period in 1994. The improved balance is mostly due to a growth of exports by 32.6%, while imports increased by only 0.6%, during the same period.

Denmark's trade surplus went down ECU 0.2 billion to ECU 0.4 billion between the first three months of 1993 and 1994. Extra-EU imports increased by 17.4%, while exports rose 10.5%. **Ireland's** trade was balanced in the period January-March 1994. Both imports and exports increased strongly between the two first quarters of 1993 and 1994 (23.5% and 26.1% respectively).

Both **Portugal** and **Greece** registered the same trade deficits in the first quarter of 1994 as for the same period in 1993 (ECU 0.6 billion and ECU 0.8 billion respectively). While Portugal recorded a similar increase of both imports and exports between these two periods (14.1% and 17.6% respectively), Greece registered an increase of its exports of 28.5%, while imports went up 9.5%.

Both the **BLEU** and **Spain** experienced significant decreases of their deficits between the first three months of 1993 and 1994 (from ECU 0.8 billion to ECU 0.1 billion in the case of the BLEU, and from ECU 1.6 billion to ECU 0.7 billion for Spain). These two countries experienced large increases of their extra-EU exports (33.2% for the BLEU, 33.7% for Spain). BLEU's imports went up 19.7% between the first two quarters of 1993 and 1994, while Spain's imports increased by 9.9%.

The two EU countries with the largest deficits in the first quarter of 1994 were the **United Kingdom** (ECU 6.5 billion, up from ECU 6 billion in the same period of 1993) and the **Netherlands** (ECU 4.8 billion, ECU 0.9 billion more than in the first quarter of 1993). While for the Netherlands the increase of the imports was slightly bigger than the rise of the exports (18.5% and 14.8%), for the United Kingdom it was the opposite (3.0 percentage points on behalf of the exports).

EUROPEAN UNION EXTERNAL TRADE BY PARTNER COUNTRY.

TRADE IN TERMS OF VALUE: Results for March 1994.

ECU 4.5 billion improvement in trade deficit with industrialized countries between the first quarters of 1993 and 1994.

In the three first months of 1994 the extra-EU trade deficit with **industrialized countries** amounted to ECU 7.9 billion, ECU 4.5 less than in the corresponding period of 1993. The balance of trade with the United States and Canada improved by ECU 4.5 billion and remained slightly negative (ECU -1.5 billion). Trade with Japan showed an improvement of ECU 1 billion, to a deficit of ECU 5.7 billion in the first quarter of 1994. The European Union's balance of trade with the EFTA countries showed a deficit of ECU 2.1 billion in the first quarter of 1994, compared with a deficit of ECU 0.9 billion in the same period of 1993.

EU imports from industrialized countries increased by 7.7%. Imports from EFTA countries and the United States and Canada increased by 10.9% and 5.3% respectively. Imports from Japan were almost unchanged (+0.1%).

Exports from the European Union to industrialized countries rose by 17.3% between the first three months of 1993 and 1994. Export to United States and Canada and Japan rose steadily (by 30.5% and 20.6% respectively), while EU-exports to the EFTA countries showed a more moderate increase (6.4%).

EU trade with **developing countries** showed a surplus of ECU 4.4 billion the first quarter of 1994, compared with a surplus of ECU 2.3 billion the same period of 1993. The EU surplus with Mediterranean countries was ECU 3.4 billion for the period in 1994, about ECU 1.5 billion higher than for the period in 1993. The balance of trade with OPEC countries showed an unchanged deficit of ECU 0.5 billion. EU trade with ACP countries showed a decrease of ECU 1.3 billion to a deficit of ECU 0.8 billion, while EU trade with the countries of Latin America were

up just ECU 0.2 billion to a surplus of ECU 0.4 billion. The balance of trade with Asian Newly Industrialized Countries (NICs), improved by ECU 1.2 billion and achieved a surplus of ECU 1.1 billion for the first quarter of 1994.

Imports from developing countries into the European Union rose by 11.5% in the first quarter of 1994, compared with the corresponding period in 1993. Imports from OPEC countries increased slightly by 0.1%. Goods imported from Latin America, ACP countries and Mediterranean countries, rose by 23.1%, 19.9% and 9.3% respectively. Imports from Asian NICs rose by 13.1%.

European Union exports to developing countries rose sharply compared with the first quarter of 1993 (+16.3%). EU-exports to Asian NICs rose sharply by 30.2% and exports to Latin America and Mediterranean countries, rose by about 26% and 20% respectively. EU-exports to OPEC countries showed a minor increase of 0.6%, while EU-exports to ACP countries were the only ones to fall compared with the first three months of 1993 (15.6%).

The balance of trade with the countries of **Central and Eastern Europe** recorded a surplus of ECU 0.5 billion in the first quarter of 1994, ECU 0.3 billion up from the same period of 1993. EU imports from this area rose by 22.4%, compared with a rise of 25.4% for the exports from the Union to these countries.

Trade with **China** showed a deficit of ECU 3.1 billion in the first three months of 1994, an increase of ECU 0.7 billion compared with the same period of 1993. Imports from China rose sharply by 28.5% and exports to China rose by 27.0%.

EUROPEAN UNION EXTERNAL TRADE BY PRODUCT.

TRADE IN TERMS OF VALUE: Results for March 1994. EU exports of machinery and transport equipment (SITC 7) rose by 20.9% in the first quarter of 1994, compared to the same period of 1993.

The **surplus** in machinery and transport equipment (SITC 7) was up more than ECU 4.6 to ECU 12.3 billion in the first quarter of 1994, when the first quarters of 1993 and 1994 are compared. The external trade balance in chemical products (SITC 5) showed a surplus of ECU 7.0 billion, up slightly by ECU 1.0 billion, compared with the same period in 1993. EU's deficit in other manufactured products (SITC 6 + 8) decreased by almost ECU 2 billion, amounting to ECU 5.2 billion for the first quarter of 1994. The deficit in fuel products (SITC 3) went down by ECU 0.8 and amounted to almost ECU 11 billion, for the first three month of 1994. Trade in crude materials (SITC 2 + 4) showed a deficit of ECU 6.5 billion, an increase of ECU 1.2 billion, compared with 1993. The deficit in food products (SITC 0 + 1), increased by some ECU 0.2 and amounted to ECU 0.6 billion the first quarter of 1994.

EU imports of machinery and transport equipment rose by 12.7% between the first quarters of 1993 and 1994, those of chemical products also showed an important increase (17.7%). Imports of other manufactured products rose more moderately (9.1%). Imports of crude materials rose by 19.3% and imports of food products rose by 14.4%, while those of fuel materials were down by 3.4%.

EU exports of machinery and transport equipment rose sharply by 20.9% compared with the first quarter of 1993. Exports of other manufactured products increased by 16.9%, while exports of chemical products grew by 17.3%. Exports of food products were 12.3% up compared to the first quarter of 1993. Exports of both crude materials and fuel materials increased by around 10.5% between the two first quarters of 1993 and 1994.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

List of products : SITC, rev. 3

0-9 Total trade

0 Food and live animals

00 Live animals other than animals of division 03

01 Meat and meat preparations

02 Dairy products and birds' eggs

03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof

04 Cereals and cereal preparations

05 Vegetables and fruit

06 Sugars, sugar preparations and honey

07 Coffee, tea, cocoa, spices, and manufactures thereof

08 Feeding stuff for animals (not including unmilled cereals)

09 Miscellaneous edible products and preparations

1 Beverages and tobacco

11 Beverages

12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

21 Hides, skins and fur skins, raw

22 Oil seeds and oleaginous fruits

23 Crude rubber (including synthetic and reclaimed)

24 Cork and wood

25 Pulp and waste paper

26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)

27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)

28 Metalliferous ores and metal scrap

29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

32 Coal, coke and briquettes

33 Petroleum, petroleum products and related materials

34 Gas, natural and manufactured

35 Electric current

4 Animal and vegetable oils, fats and waxes

41 Animal oils and fats

42 Fixed vegetable fats and oils, crude, refined or fractionated

43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s.

5 Chemicals and related products, n.e.s

51 Organic chemicals

52 Inorganic chemicals

53 Dyeing, tanning and colouring materials

54 Medical and pharmaceutical products

55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations

56 Fertilizers (other than those of group 272)

57 Plastics in primary forms

58 Plastics in non-primary forms

59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

60 Complete industrial plant appropriate to section 6

61 Leather, leather manufacture, n.e.s, and dressed fur skins

62 Rubber manufacture, n.e.s

63 Cork and wood manufacture (excluding furniture)

64 Paper, paperboard and articles of paper pulp, of paper or of paperboard

65 Textile yarn, fabrics, made-up articles, n.e.s, and related products

66 Non-metallic mineral manufactures, n.e.s

67 Iron and steel

68 Non-ferrous metals

69 Manufacture of metals, n.e.s

7 Machinery and transport equipment

70 Complete industrial plant appropriate to section 7

71 Power-generating machinery and equipment

72 Machinery specialized for particular industries

73 Metal working machinery

74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s

75 Office machines and automatic data-processing machines

76 Telecommunications and sound recording and reproducing apparatus and equipment

77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)

78 Road vehicles (including air-cushion vehicles)

79 Other transport equipment

8 Miscellaneous manufactured articles

80 Complete industrial plant appropriate to section 8

81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s

82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings

83 Travel goods, handbags and similar containers

84 Articles of apparel and clothing accessories

85 Footwear

87 Professional, scientific and controlling instruments and apparatus, n.e.s

88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks

89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
