## NOTE

This edition combines external trade and balance of payments statistics for the Community, the aim being to provide the reader with all statistical information relating to the Community's external transactions.

Owing to different periodicities of data collection (monthly for external trade, quarterly for balance of payments), figures for the balance of payments will appear four times a year in this publication.

The statistical tables will be preceded by a concise analysis which will comment upon the main economic trends. To this end, certain Community aggregates will be estimated if the necessary data is available for most member states.

In the commentary on recent balance of payments developments, use will be made of the latest information available for the main balances even if the detailed breakdown of this information by sub-post has not yet arrived.

## **Part 1: COMMENTARIES**

## **Commentary: External Trade**

The commentary refers to the state of the CRONOS database on 25. 9. 1992  
TREND database on 25. 9. 1992

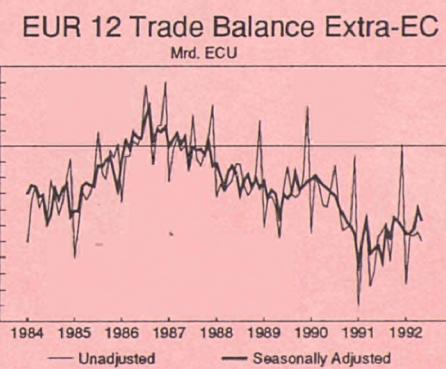

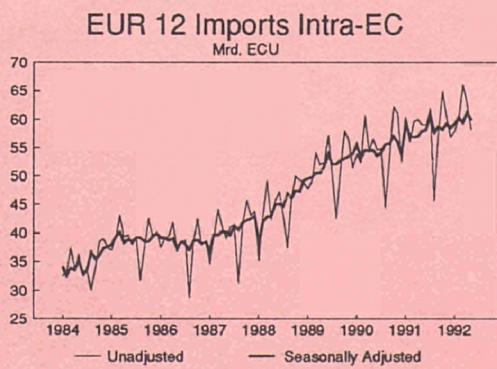

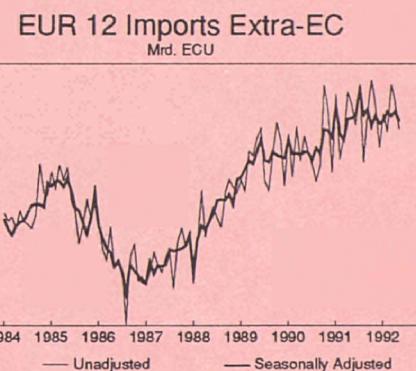

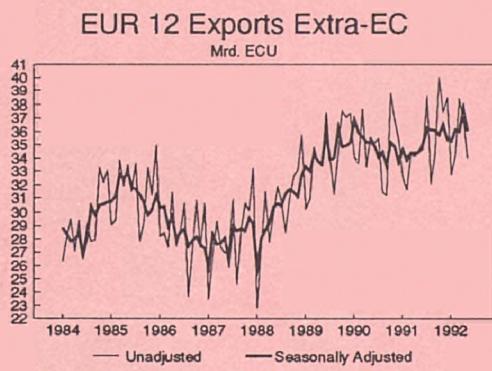

## Seasonal Adjustment: Results

Seasonally adjusted European Community exports to the rest of the world (extra-EC) picked up again in mid-1991, after the downward tendency at the end of 1990. They are now situated again at the level recorded at the beginning of 1990. In May 1992, seasonally adjusted extra-EC exports dropped by 4.4% compared to April 1992.

Seasonally adjusted European Community imports from the rest of the world (extra-EC) are stabilising around a high level, recorded since the second half of 1990. In May 1992, seasonally adjusted extra-EC imports dropped by 2.2% compared to April 1992.

The European Community's seasonally adjusted trade balance started to improve slightly during the second half of 1991 compared to the first half of 1991 and continued this movement in the first months of 1992. The trade balance fluctuated around a record low level in the first half of 1991. It is now back at its mid-1990 level. In May 1992, the seasonally adjusted Community trade deficit stood at -4.7 mrd ECU.

Trade between EC Member States (intra-EC) continues to fluctuate around a slightly upward movement, a tendency recorded since the beginning of 1991. In May 1992, seasonally adjusted trade between European Community Member States dropped by 2.1% compared to April 1992.

(1) As from October 1990, the territory of the Federal Republic of Germany includes the territory of the former German Democratic Republic, including East Berlin.  
Community results are drawn up accordingly.

(2) Seasonal Adjustment via X11/ARIMA procedure

**GLOBAL TRENDS: Results for May 1992.**  
**Japan's surplus reaches a record high at ECU 7.6 billion. The deficits of the Community and the United States both stand at ECU 6 bn.**

The net result of May 1992's extra-Community trade was a deficit of ECU 6 bn, an improvement of almost 2 bn compared with May 1991. It must be remembered, however, that the figures for May 1991 were heavily weighted by a steep increase in Community imports following the end of the Gulf War, while exports did not take off again until the second half of 1991. The trade balances of France, Italy and the Netherlands each contributed half a billion ecus to this improvement in the Community's external trade figures, while Ireland's improved by ECU 0.3 bn. The extra-Community trade figures of the other Member States remained much the same as those of May 1991, except for Spain's which worsened by ECU 0.2 bn.

Community imports measure by volume were 5.4% lower than in May 1991; exports were also slightly lower (-1.1%). The gap between trends in imports and exports, which in May 1991 had been 10%, narrowed to 4% in May 1992.

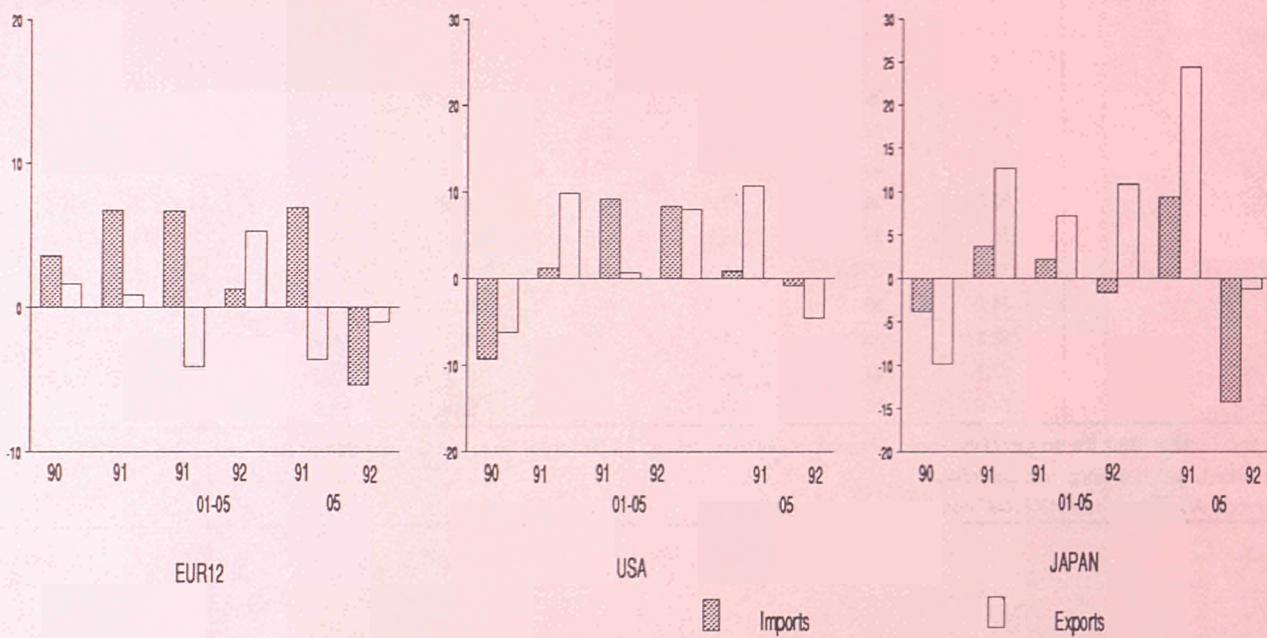

Imports measured by volume decreased by 5.8% between May 1991 and May 1992; exports by volume decreased by 5.6%.

The Community's supplies of crude oil cost \$18.78 per barrel in May 1992, 3% more than a year previously. This rise was more than offset by the intervening depreciation of the dollar, and the net result is that the price of oil in ecus has fallen by 2%.

The United States' trade deficit for May 1992 was ECU 5.8 bn, compared with 4.7 bn in May 1991. Imports remained steady when expressed in ecus (down 0.8% compared with May 1991), but in dollar terms the fall was more than 6%. Exports expressed in ecus were down 4.6% from the high level of May 1991, or 10% in dollars.

Japan turned in a surplus of ECU 7.6 bn in May 1992, up 2 bn on May 1991. Imports were down 14.2% on the high level of May 1991, 20% down in dollar terms and 14% in yen. Exports were down 1.2% in ecus on the figures for May 1991, which had seen Japanese exports burgeoning. May 1992 exports were down 6% in dollars compared with May 1991, and 1% in Yen.

**EXTRA-COMMUNITY TRADE BY PARTNER COUNTRY: Results for May 1992.**  
**Community trade with developing countries showed a surplus of ECU 0.3 bn; the deficit with industrialized countries totalled ECU 5.3 bn.**

Three-quarters of the improvement in the Community's deficit compared with May 1991 is attributable to an improvement in the balance of trade with the developing countries, and a quarter to trade with industrialized countries.

The deficit with industrialized countries was ECU 5.3 bn, half a billion ecu better than May 1991. The Community's trade with the United States showed an improvement of almost a billion ecu compared with May 1991, but remained in the red by ECU 1.7 bn. The balance of the Community's trade with Japan deteriorated by a further ECU 0.2 bn to ECU -2.8 bn; trade with the EFTA countries remained ECU 0.6 bn in the red, as in May 1991.

Imports from the industrialized countries were down 4.4% compared with May 1991, the result of an 11.3% decline in the import flows from the United States. Imports from Japan were down 2% from their unusually high level of May 1991; those from the EFTA countries were stable, 1% down on May 1991.

Exports to the industrialized countries were a further 3.2% down on the already weak level of a year before. For the EFTA countries the decline was 2%, for the United States 0.6% and for Japan 18.3%.

The balance of trade with developing countries showed a surplus of ECU 0.3 bn in May 1992, an improvement of ECU 1.4 bn compared with May 1991. The deficit on trade with the OPEC countries narrowed by ECU 0.3 bn, the result of the lower cost of the Community's supplies of crude oil, which were

2% cheaper (in ECU terms) in May 1992 than a year earlier. Trade with the Asian newly industrialized countries was in the red by ECU 0.1 bn, down from 0.3 bn a year earlier. There was an improvement of ECU 0.1 bn in the Community's trade with the ACP countries and also with the Mediterranean countries, the balances rising to ECU +0.4 bn and ECU -0.2 bn respectively. The balance of trade with Latin America improved by ECU 0.7 bn to ECU -0.6 bn in May 1992.

Imports from the developing countries shrank by 8.1%, partly because the levels observed in May 1991 had been unusually high. The decline affected all economic zones, and was particularly pronounced in the case of the Asian newly industrialized countries (-13.1%), the Mediterranean countries (-10.3%), the ACP countries (-7.7%) and Latin America (-13%). For the OPEC countries the decline was no more than 3.4%.

Exports to the developing countries showed an improvement of 2.6% compared with May 1991. For the OPEC countries the improvement was 4.7%, for the ACP countries 0.9% and for Latin America 7%. Exports to the Mediterranean countries fell by 6%, and those to the Asian newly industrialized countries by 5%.

The deficit on the Community's balance of trade with the countries of central and eastern Europe was ECU 0.2 bn in May 1992, compared with 0.4 bn a year earlier. Imports from these countries were down by 6.2%; exports improved by 0.9%.

\* Estimate.

**EXTRA-COMMUNITY TRADE BY PRODUCT: Results for May 1992:**  
**Machinery and transport equipment improve by almost one and a half a billion ecus.**

The narrowing in the Community's trade deficit was the result of the sharp improvement in the balance on machinery and transport equipment (SITC 7), which totalled ECU 2 bn in May 1992, compared with ECU 0.7 bn a year earlier. Chemicals (SITC 5) showed a surplus of ECU 1.5 bn, much the same as in May 1991. The deficits on fuel products (SITC 3), raw materials (SITC 2+4) and food all improved by almost ECU 0.2 bn, to -4.5 bn, -2.2 bn and -0.6 bn respectively. The balance on "other manufactured goods" (SITC 6+8) was similar to that of a year earlier, at around -1.4 bn.

Imports of machinery and transport equipment were 6.1% down on May 1991, and those of "other manufactured goods" down by 4.6%. The reduction in imports of fuel products was less substantial at 3.3%. Crude materials and food imports were down by 6.4% and 5.4% respectively. Imports of chemicals remained fairly steady, down 0.6%.

Exports of machinery and transport equipment showed a 3.5% improvement on May 1991. Chemical exports also improved, but by only 1.1%. Exports of "other manufactured goods" were down by 5.5%; food exports showed little change (-1%).

**INDIVIDUAL MEMBER STATES' AND INTRA-COMMUNITY TRADE:**  
**Results for May 1992. Germany's balance of intra-Community trade improves**  
**by ECU 0.8 bn from May 1991 to May 1992.**

Germany and Ireland each showed a net surplus of ECU 0.2 bn on extra-Community trade in May 1992. In the case of Germany this figure was much the same as for May 1991, but for Ireland the improvement was ECU 0.3 bn. Denmark's extra-Community trade was in balance, France's very slightly in the red, but still showing an ECU 0.5 bn improvement on a year earlier. Portugal's deficit on extra-Community trade was ECU 0.3 bn, Italy's and the BLEU's both 0.6 bn. The Italian deficit had improved by ECU 0.4 bn from May 1991. Spain's deficit widened by ECU 0.2 bn to ECU 1.2 bn; the Netherlands' narrowed by 0.5 bn but still stood at ECU 1.5 bn. The United Kingdom's deficit on extra-Community trade was almost ECU 2 bn.

Intra-Community trade was slightly down on a year earlier (-1.2%) but firmer than extra-Community imports, which were 5.4% down.

The Netherlands showed the biggest surplus on intra-Community trade, at ECU 1.3 bn, followed by Ireland's 0.6 bn, 0.3 bn up on a year earlier. The BLEU, Denmark and Germany were all just in surplus, Germany showing an improvement of ECU 0.8 bn over the figures for May 1991. The United Kingdom's May 1991 surplus lost 0.5 bn to become a deficit of 0.3 bn. France's deficit, much the same at 0.4 bn, was an improvement of 0.4 bn on the position of a year earlier. Both Greece and Portugal were in deficit by ECU 0.6 bn on intra-Community trade; Spain's deficit was 1.0 bn and Italy's 1.3 bn.

(1) External Trade Statistics (Imports CIF, Exports FOB).

(2) Intra trade balance not zero due to CIF/FOB recording and asymmetric recording of bilateral flows by individual Member States.

\* Estimate.

: Not available.

**World trends - preliminary figures for the first quarter of 1992. The Community current account deficit fell by ECU 2 bn compared with the first quarter of 1991, but still stands at ECU 18 bn. The United States current account was in balance. Japan's current account showed a surplus of ECU 24.8 bn, up ECU 14.2 bn.**

Preliminary figures for the first quarter of 1992 indicate a deficit on the Community's current account of around ECU 18 bn, down by ECU 2 bn from the first quarter of 1991. The main reason for this improvement was a reduction in the trade deficit, which was cut from ECU 10.1 bn in the first quarter of 1991 to ECU 7.8 bn in the first quarter of 1992. France's trade account came back into balance, resulting in a gain of ECU 3.5 bn; there was little change in the trade balance of any other Member State. The deficit on invisible exports and imports remained stable at around ECU 10 bn: the balance on investment incomes deteriorated, particularly in Germany and France, but was offset by an improvement in unrequited transfers, particularly in Germany.

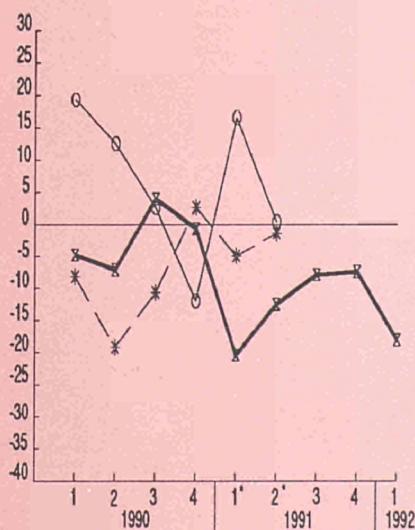

The United States' current account reached equilibrium in the first quarter of 1992. In the corresponding quarter of 1991 there had been a surplus of ECU 13.3 bn (\$17.9 bn) created by the substantial transfers resulting from the Gulf War. The balance of official transfers showed a net deficit of ECU 2.4 bn

(\$3.1 bn); the corresponding figure for the first quarter of 1991 had been a surplus of ECU 13 bn (\$17.4 bn). The United States' trade deficit deteriorated very slightly in ecus, up from 10.7 bn to 11.1 bn, but remained stable in dollars at around \$14 bn. The balance shows a substantial inflow of capital (ECU 16.5 bn; \$20.8 bn), and a slight decline in reserves. But Errors and Omissions reached a record level at ECU -15.6 bn (\$19.7 bn).

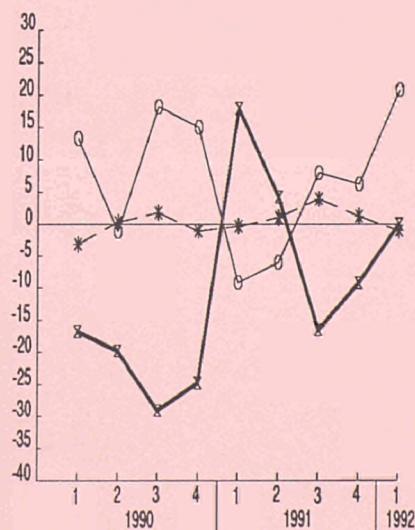

Japan's current account showed a first-quarter surplus of ECU 21.8 bn (\$3.4 bn; ¥3 536 bn), compared with ECU 7.6 bn in the same quarter of 1991 (\$10.2 bn; ¥1 361 bn). The trade surplus improved by more than ECU 9 bn, leaping from ECU 15.5 bn in the first quarter of 1991 (\$20.8 bn; ¥2 777 bn) to ECU 24.8 bn in the first quarter of 1992 (\$31.4 bn; ¥4 023 bn). The Japanese deficit on invisible trade fell by ECU 4.7 bn, but the 1991 figures had been inflated by payments made in connection with the Gulf War. Japan's balance shows a substantial outflow of capital (ECU 27.8 bn; \$35.2 bn; ¥4 510 bn) and a very slight decline in reserves.

## Member States' balance of payments

Balance of payments by country (billion ecu)

—×— : current balance      —○— : capital balance

—\*— : reserves

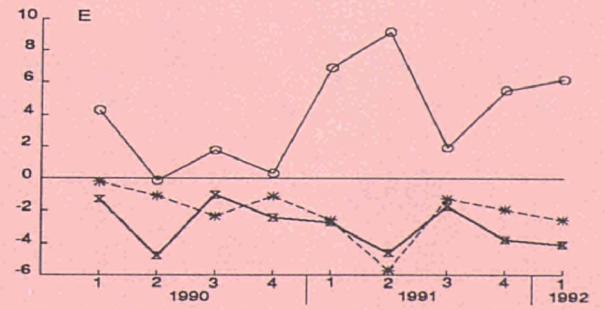

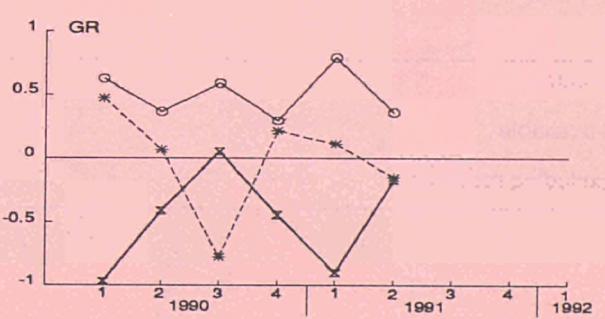

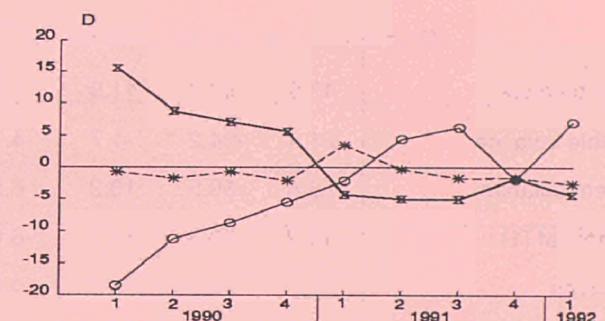

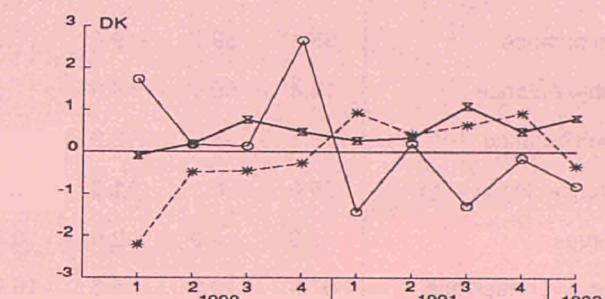

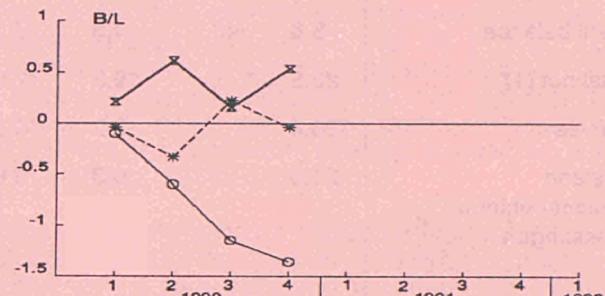

**BLEU:** The balance of payments on a transactions basis for 1991 is not yet available, but estimates of the balance on a cash basis suggest that the Belgo-Luxembourg current account surplus probably improved slightly as a result of an increase in the surplus on invisible trade, which offset a deterioration in the trade balance.

**Denmark:** The first quarter of 1992 showed Denmark with a current account surplus of ECU 804 million, compared with ECU 267 million in the corresponding quarter of 1991. The surplus on the balance of trade improved slightly, whilst the deficit on invisibles was halved. Outflows of capital were slightly down on the 1991 first quarter, at ECU 806 million compared with ECU 1.427 bn; reserves were down by ECU 334 million.

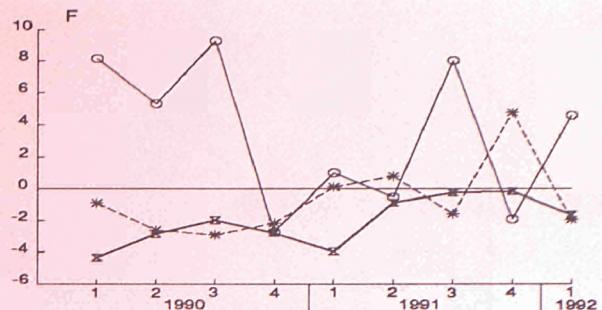

**Germany:** The German current account balance for the first quarter of 1992 showed similar results to those for the corresponding quarter of 1991. The surplus on trade was ECU 5.5 bn; the deficit on invisibles ECU 9.8 bn. However, the apparently stable balance on invisibles actually conceals a deterioration in the surplus on investment incomes, down by ECU 2.5 bn as a result of the steep increase in debits. Official transfers were heavily in deficit during the first quarter of 1991 as a result of transfers made in connection with the Gulf War, but have improved in 1992 to a surplus of ECU 4.2 bn. The net inflow of capital for the quarter was ECU 7 bn; reserves fell by ECU 2.6 bn.

**Greece:** The Greek balance on a transactions basis for the final two quarters of 1991 is not yet available, but estimates inferred from the balance on a cash basis indicate that the Greek current account deficit may have improved slightly under the effects of a fairly substantial improvement in the surplus on invisible trade - travel in particular - despite a further deterioration in the visible trade balance.

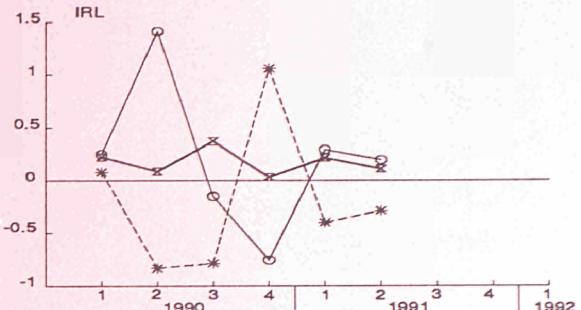

**Spain:** The deficit on Spain's current account for the first quarter of 1992 was ECU 4.1 bn, compared with ECU 2.7 bn for the corresponding quarter of 1991. The trade deficit worsened by ECU 0.9 bn; the surplus on invisibles narrowed by ECU 0.4 bn. The net inflow of capital was ECU 6.2 bn; reserves declined by ECU 2.6 bn.

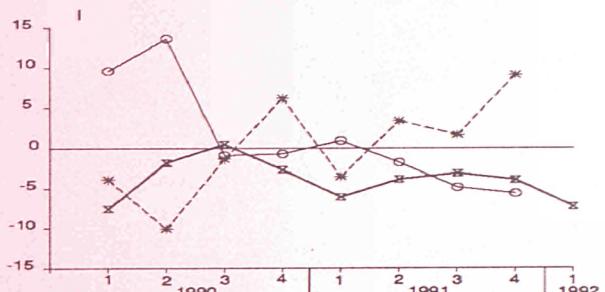

France: For the first quarter of 1992 the French trade figures were almost in balance. This represented an improvement of ECU 3.5 bn over the corresponding period of 1991. However, the deficit on invisible trade deteriorated sharply, from ECU 0.3 bn to ECU 1.5 bn, the result of a ECU 1.4 bn worsening of the deficit on income from investments. The current account showed a net deficit of ECU 1.6 bn, after a deficit of ECU 4 bn in the corresponding quarter of 1991. Net capital inflow to France was ECU 4.6 bn; reserves fell by ECU 1.9 bn.

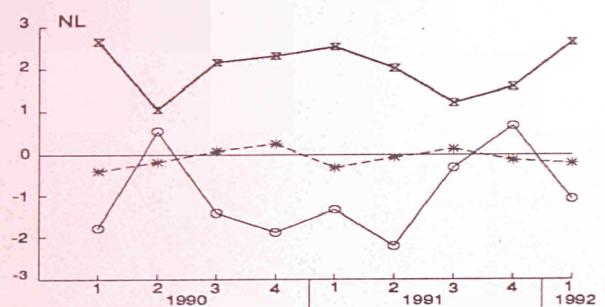

Ireland: Ireland's current account balance remained stable in the first two quarters of 1991 in comparison with the corresponding period of 1990. The trade balance deteriorated very slightly, whilst invisible trade improved a little. Net inflows of capital were slightly down on 1990, whilst reserves fell in approximately similar proportions.

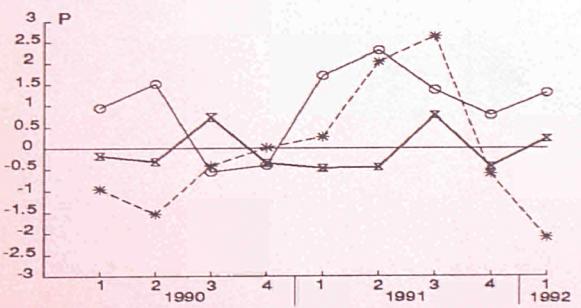

Italy: The Italian current account deficit for the first quarter of 1992 was ECU 7.3 bn, up from ECU 6.1 bn in the corresponding quarter of 1991. The deficits on trade and invisibles both widened by ECU 0.6 bn. Travel, transport and investment income balances each declined by ECU 0.2 bn.

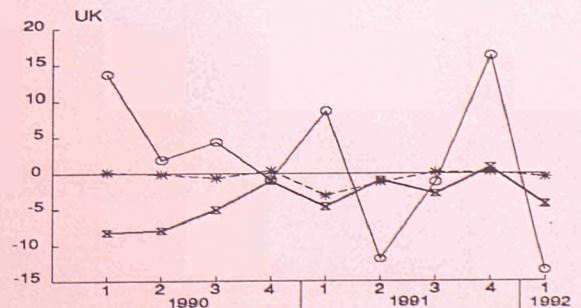

Netherlands: The Netherlands current account surplus improved very slightly during the quarter to ECU 2.6 bn. The balance of trade gained ECU 0.7 bn to ECU 3.2 bn, but invisibles, which had been in balance in the first quarter of 1991, slipped to a deficit of ECU 0.6 bn. The surplus on investment income deteriorated as a result of a decline in credits. Net capital outflow was ECU 1.1 bn; reserves fell slightly.

Portugal: The Portuguese current account balance for the first quarter of 1992 turned around to show a surplus of ECU 224 million, after a deficit of ECU 468 million in the corresponding quarter of 1991. The trade balance deteriorated slightly, but the surplus on invisibles practically doubled. Net inflows of capital were ECU 1.3 bn; reserves fell by ECU 2.1 bn.

United Kingdom: The UK current account deficit for the quarter was ECU 4.2 bn, compared with ECU 4.6 bn in the corresponding quarter of 1991. The trade deficit improved slightly to ECU 5.1 bn. The surplus on invisibles increased from ECU 606 million to ECU 840 million. There was a substantial net outflow of capital - ECU 13.5 bn, and reserves diminished slightly, but the Errors and Omissions item is so high (18.2 bn) that the balance cannot be interpreted with any degree of certainty.

## Foreword

Two important changes have taken place in 1988 with regard to the collection of external trade statistics:

- (i) The introduction of the Single Administrative Document, which not only covers trade in Community goods between Member States but is also intended to be used for the corresponding formalities in trade with non-member countries. This simplification of declaration procedures in the exchange of goods marks an important step towards completion of the internal market.
- (ii) The simultaneous entry into force of a new goods classification known as the Combined Nomenclature (CN), which is intended to meet Common Customs Tariff and statistical requirements alike. This nomenclature is based on the Harmonized Commodity Description and Coding System (HS), whose aim is to enhance the worldwide comparability of external trade statistics.

As a result of both these changes, customs and statistical departments were faced with a considerable amount of work until the procedures had been properly introduced and tested and formed part of normal working practice.

This meant that there were delays in the forwarding of data in all the Member States. In addition, there was bound to be a higher quota of errors and corrections, so that the first month's data are not directly comparable with those of the preceding year and therefore need to be interpreted with caution.

In particular, it should be noted that considerable divergences have arisen at subheading level between the Combined Nomenclature and the formerly used Nimexe, leading to a break in the goods-related time series between 1987 and 1988. Up to December 1987 this Bulletin used the SITC Rev. 2, which was worked out using the 6-digit Nimexe, while from January 1988 it uses the SITC Rev. 3, which has been drawn up using the 8-digit subheadings of the Combined Nomenclature.

As an aid to interpretation of the statistics, Eurostat has published in Theme 6 'Foreign Trade, Series E: Methods' brochures entitled 'Nomenclature of goods, CN-Nimexe correlation tables'. These provide a comparison between the old and new nomenclatures as well as showing the links between the Combined Nomenclature (CN) and its offshoots.

Eurostat will be glad to provide users of European statistics with any further information or explanations they may require with regard to these new developments.

## Important note

As from October 1990 the foreign trade figures of the Federal Republic of Germany, the other Member States and of EUR 12 concern the Federal Republic of Germany as constituted from 3 October 1990.

In Tables B and C the reader will find the trade of the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

## Introduction

Part III of the present report gives the most recently available data on the overall balance of payments (quarterly and annual flows) for each of the Member States of the European Community and for the Community as a whole (totals for EUR 12) and also for the United States and Japan.

Comparative tables for the main balances of the balances of payments of industrialized countries are also included.

All these data are presented according to a layout based on the one suggested in the fourth edition of the International Monetary Fund's publication, *Balance of payments manual*. They are derived from data prepared by the authorities in each country according to national definitions and methodologies. Eurostat has created a nomenclature of the posts of the balance of payments, which harmonizes, as far as possible, the data compiled by different countries using different collection systems. The data in this publication are broken down according to this classification. A shorter version of Eurostat's balance-of-payments layout is also given in the monthly publication *Eurostatistics*.

Eurostat has also published monographs on the national balance-of-payments methodologies of nearly all the Mem-

ber States (Germany, United Kingdom, France, Denmark, BLEU and the Netherlands); these manuals contain references to the fourth edition of the IMF's manual.

The figures in this publication are expressed in millions of European currency units (ecus), the value of which in national currency is given in the table 'Ecu conversion rates'.

The total of quarterly data can differ from the annual data because updates are sometimes carried out only on annual data and because data are converted into ecus by different conversion rates (annual average rate and quarterly average rate).

The same data, expressed in national currency and ecus, are contained in the Cronos management system of chronological series; the annual series exist from 1960 onwards and the quarterly series from 1970 onwards.

Additional information on the database and also on the methodology of balances of payments may be obtained from Eurostat's Division C3 — 'Balance of payments and analysis of international and intra-Community transactions'.

# The balance of payments: concepts and definitions

## Preliminary remarks

The definitions given below have been drawn up on the basis of information contained in the *Balance of payments manual*, fourth edition, published in 1977 by the International Monetary Fund.

## Basic concepts

The balance of payments is defined as the record of a country's international transactions with the rest of the world (or, in other words, transactions of its residents with non-residents).

These transactions may involve merchandise, services, transfers, loans issued or received, market securities, foreign exchange, etc.

The various transactions are recorded in the balance of payments by the double-entry system of bookkeeping. For instance, the import of a commodity is recorded under the heading 'merchandise' with a minus sign and in the capital account with a plus sign.

Likewise, all other transactions (including unrequited transfers) are entered twice, the amounts being identical but having in one case a plus sign and in the other a minus sign. The sum of all the items in the balance of payments is obviously always equal to zero, and the balance of payments is therefore always in balance.

This being so, how is it that we can talk about surpluses and deficits on the balance of payments?

When the balance of payments is said to be in balance or out of balance, this does not refer to the balance as a whole but simply to one of its component parts, that is to say, one item or a collection of items. The various items in the balance of payments may therefore be used, much like building blocks, to construct the kind of analytical presentation needed. There is, therefore, not one single balance of payments, but a whole series of balances. In order to define one of these balances of payments, an imaginary line may be drawn at some significant point in the list of items and we may say that all the transactions appearing above the line are those that have to be financed, whilst all those appearing below the line are the sources of finance.

A disequilibrium in the balance of payments may therefore be regarded as a deficit above the line, offset by the net total of transactions below the line. For this purpose we first need a standard presentation of all the transactions described in the balance of payments.

## The balance of trade (merchandise)

The balance of trade is often regarded as the most important item because it deals with merchandise which, in value terms, often makes up the main item in the balance of payments.

The balance of trade as a component of the balance of payments differs from the balance of trade drawn up on the basis of external trade statistics because of methodological differences.

External trade statistics are drawn up on the basis of customs statistics and import data, being evaluated on a cif basis, which include the cost of transport and insurance; the balance of trade as a component of the balance of payments, on the other hand, is drawn up on a fob/fob basis. There are a number of other differences with regard to scope, chronology and evaluation. Although these differences are often only marginal, they may in certain cases reach substantial proportions.

## Services

The main items included under services are all the transactions on transport, insurance on transport, travel, investment income and earnings from work, government transactions not included elsewhere, etc.

*Transport* covers freighting and other distribution services relating to merchandise, as well as services of the same type performed for most other goods. The other category of services included under the heading 'transport' includes services performed by carriers, principally for the carriage of passengers, which are not classified under the heading 'travel', together with goods and services acquired by carriers and consumed in their operations.

*Travel* covers goods and services acquired from an economy by non-resident travellers during their stay on the territory of that economy and for their own use.

*Insurance on transport* means the insurance of moveable property whilst it is in transit.

*Investment income* covers income of non-residents from their financial assets invested in the compiling economy (debit) and income of residents from their financial assets invested abroad (credit).

*Earnings from work* covers wages, salaries and other remuneration (whether in cash or in kind) earned by workers from the work they perform for an economic unit whose place of residence is different from their own (frontier workers, seasonal workers, etc.).

*Government transactions n.i.e.* covers transactions by the resident public sector, or other resident sectors, with non-resident public sectors. The main transactions are carried out by embassies and consulates abroad, military organizations and other bodies abroad, common military organizations, etc.

Other goods and services provided or received by the government are also included under this heading. For unrequited transfers carried out by the public sector, please see below.

### **Unrequited transfers**

Unrequited transfers are transfers undertaken without a *quid pro quo*, for instance a donation, a remittance by an emigrant worker, a country's contribution to an international organization or countries' contributions to the budgets of the European Community institutions.

### **The current account**

The sum of the headings 'merchandise', 'services' and 'unrequited transfers' constitutes the current account. Occasionally, government aid to developing countries is not included in the current account, but aggregated with certain loans (which are normally to be found in the capital account) under the heading 'official aid'. This is not the case with the balance drawn up by Eurostat, which includes all official transfers.

Services and unrequited transfers taken together are usually referred to as 'invisibles', or 'invisible transactions'. This description enables a distinction to be drawn between these elements and visible transactions (or merchandise).

Another aggregate is that referred to as the 'balance of goods and services', which is an expression of the net transfer of resources between an economy and the rest of the world. In contrast, the current account — according to the definition adopted by Eurostat — represents transactions which add or subtract certain elements to or from an economy's foreign financial holdings (apart, of course, from changes in value). The current account is the balance most frequently used, even if it cannot be regarded as the sole indicator of how a country's balance of payments is behaving.

### **The capital account**

The capital account records capital transactions, including the net acquisition of foreign financial assets.

The capital account may also be defined as the account which reflects all those transactions that finance current transactions.

Capital account is divided into two parts:

- capital, excluding reserves,
- reserves.

### **Capital, excluding reserves**

The classification of standard components under this heading is based on the following criteria:

- (1) The type of capital (direct investment, portfolio investment and other capital).
- (2) The traditional distinction between the long term and the short term based on the initial contractual maturity, that is to say, respectively, more than one year or one year or less.

- (3) The additional breakdown by sector of the creditor or debtor in the compiling economy.
- (4) The customary distinction between assets and liabilities.

The standard components are:

*Direct investments* covers all capital transactions between, on the one hand, direct investment enterprises and, on the other hand, the direct investors themselves.

Direct investments are made with the aim of acquiring an interest in an enterprise operating on the territory of an economy other than the home economy of the investor, the aim of the latter being that of acquiring effective decision-taking power with regard to the management of the enterprise.

*Portfolio investments* covers investment in long-term bonds and corporate equities other than direct investments and reserves.

*Other capital* is a residual category subdivided into long-term and short-term maturities, the public sector, commercial banks and other sectors.

### **Reserves**

This group covers those assets that are conceived of as available for use by an economy's central authorities in meeting balance of payments needs, such as recourse to International Monetary Fund loans or loans from the European Monetary Cooperation Fund.

The balance of the heading 'Reserves' also contains contra-items for allocations of SDRs and also, in the case of some countries, exchange-rate adjustments.

It should be pointed out, that, unlike the situation in the past, monetary authorities' liabilities are no longer given below the line but are included with those of the public sector under the group 'Capital, excluding reserves'; for this reason the balance of transactions on reserves cannot be compared to the balance of official payments.

### **Errors and omissions**

Apart from the current and capital accounts, the balance of payments also includes an errors and omissions item.

The net total of errors and omissions is a contra-entry which offsets any surplus of credits over debits, or vice versa. This total may be a substantial figure when the balance of payments statistics are derived from a variety of sources, and it may be an important element in an analysis of the balance of payments by, for instance, revealing a capital outflow which is not recorded elsewhere.

**Theme 6 — External trade**

Catalogue of regular publications

(See Eurostat 'User's guide' for complete price list and order form)

**Series A: Yearbooks***External trade statistical yearbook*

Data on the Community's position in world trade and information on the development of the Community's external trade and the trade between its Member States from 1958 to 1991.

**Series B: Short-term trends***External trade monthly statistics*

(with glossary in all Community languages)

Monthly, quarterly and annual trends in the external trade of the Member States, broken down by partner countries and groups of goods (sections and divisions of SITC, Rev. 3)

**Series C: Accounts, surveys and statistics***External trade analytical tables*

Annual publication (with glossary in all Community languages)

Data on the Community's external trade and trade between the Member States, broken down by partner countries, at the 8-digit level of the Combined Nomenclature, in 13 volumes each for imports and exports.

*Quarterly data on microfiche*

The external trade statistics are published quarterly on microfiche for the various aggregate levels. These editions relate to the various classification systems (CN, SITC, NACE etc.). Full details of these publications are contained in the 'User's guide'

*GSP statistics*

Quarterly, cumulative on microfiche

Annual paper publication comparing imports under the GSP broken down by beneficiaries and products, with imports under the special trade system.

**Series D: Studies and analyses**

- Trade between EC and the Mediterranean countries (published in 1988)

- EC-Yugoslavia trade (published in 1988)

- Analysis of agricultural trade between EC and the developing countries 1970-1986 (published in 1989)

- Statistical analysis of EC trade in high-tech products (published in 1989)

- EC-Latin America trade 1979-87 (published in 1989)

- EC-Comecon trade 1979-87 (published in 1989)

- EC commodities imports from the developing countries 1976-87 (published in 1990)

- Analysis of EC-NIC trade (published in 1991)

- International trade in services 1979-1988 (published in 1991)

- European Community direct investment 1984—1988 (published in 1991)

- EC external trade indices (published in 1991)

**Series E: Methods***External trade statistics: User's guide*

*Second edition (third edition in preparation)*

This handbook provides the user with basic information on the methodology employed, lists the publications available on paper, microfiche and magnetic media, and includes an order form and price lists.

*Nomenclature of goods — Combined Nomenclature (Publications in English and French):*

- Self-explanatory texts

- Cross-reference product index

- Correlation tables CN

CN: SITC, Rev. 3; US; NACE/CLIO(D); CAT.TEXT; AGRI.REGL

SITC, Rev. 3; US; NACE/CLIO(D); CAT.TEXT; AGRI.REGL CN

Yearly evolution of CN

- Confidential settings CN

- Confidential settings SITC

The external trade statistics of the Community (Combined Nomenclature and SITC) are available on a monthly basis in the Comext data bank; they can be consulted on-line via the WEFA host. The results compiled by Eurostat are also disseminated on magnetic tape and CD-ROM.
