# Introduction

This publication contains the input-output tables (IOT) of the Community countries, harmonized in accordance with the European system of integrated economic accounts (ESA), for the year 1980.

## EUROPEAN SYSTEM OF INTEGRATED ECONOMIC ACCOUNTS (ESA)

The ESA is the Community version of the United Nations system of national accounts (SNA). It gives common definitions for the complete set of national accounts, input-output tables and financial (flow of funds) accounts supplied to Eurostat.

In the ESA the economy is broken down in different ways for different purposes. For the detailed analysis of the production and use of goods and services, the economy is split into 'branches' which are groups of units of homogeneous production each engaged in a single activity. Data on income, expenditure and financial flows are not available for such units, but only for the institutional units (e.g. companies) which own them, and then relate to all its activities. Institutional units are grouped into 'sectors' (household sector, government sector, corporate enterprise sector, etc.) for which a complete set of current, capital and financial accounts is available.

## EUROSTAT NATIONAL ACCOUNTS PUBLICATIONS

The series National Accounts ESA has five parts.

- Aggregates

For rapid publication of the main expenditure and income aggregates in national currencies, ECU, purchasing power parities and volume and price indices, starting in 1960.

- Detailed tables by branch

Which give a breakdown into 25 branches of gross value-added, compensation of employees, employment and gross fixed capital formation from 1970.

Consumption of households is also split into about 50 purpose categories.

● Detailed tables by sector

- Detailed tables by sector

Supply a full set of current, capital and financial accounts from 1970 for eight sectors and some sub-sectors.

- General government accounts and statistics

Further develop the analysis of the general government sector with considerable detail of its receipts (e.g. by tax type) and expenditure (by type and purpose) in a public finance presentation.

- Input/output tables

Full input-output tables, at producers' prices, are produced every five years (1970, 1975 and 1980). A breakdown is made distinguishing the domestically produced goods from imports.

### *Data collection and storage*

Harmonized national accounts data in accordance with ESA are collected annually from countries by means of standardized questionnaires 9-12 months after the end of the year. They are stored in Eurostat's time series data base Cronos which is available for consultation via Euronet. The input-output tables are not suitable for Cronos and are stored separately.

## EXTERNAL TRADE DATA

Nimexe external trade data, grouped in terms of 125 NACE/CLIO products and aggregated into 27 branches of the input-output table (sub-group of R44 relating to goods), are available on microfiches, in a detailed geographical breakdown, from the year 1975.

### **Layout of this volume**

This volume consists of 3 parts. The first part outlines the general features of the 1980 input-output tables, and some problems relating to the harmonization of the tables.

The second part opens with a table summarizing by branch and country the commodity flow accounts for 1980. The items included are intermediate inputs, value-added and imports in the case of resources, and

intermediate uses, final consumption of households, gross fixed capital formation and exports in the case of uses.

The total resources/uses are expressed in both ECU and PPS.<sup>1</sup>

There is then a comparative table showing the total

technical coefficients by branch and country for 1975 and 1980.

In the third part one will find the input/output tables for each country: first the total flows, then flows of domestic origin and imports, and lastly the inverse of the (I-Ad) matrix.<sup>2</sup>

### Input/output tables available

The Eurostat IOT data base contains the following tables :

	1959	1965	1970	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980
B	Q	Q	Q					Q					
DK			Q			A		Q					Q
D	Q	Q	Q					Q	Q				Q
F	Q	Q	Q	A	A	A	A	Q	A	A	A	A	Q
E								Q					Q
IRL			Q					Q					
I	Q	Q	Q	A	A	A	A	Q			Q		Q
L		Q	Q										
NL	Q	Q	Q		A	A		Q	A	A	A		Q
P										A	A	A	Q
UK			Q	A	A			Q				Q	
EUR 6		Q	Q										
EUR 9			Q					Q					

Q = Tables at producers' prices with a breakdown into flows of domestic origin and imports (EEC and third countries).

A = Tables without a breakdown of flows by origin.

The IOT can be obtained on magnetic tape (against payment) or on computer print-outs, by applying to the following address :

Division B1 – Input/output tables  
Eurostat  
BP 1907  
L-2920 Luxembourg.

## 1. GENERAL CHARACTERISTICS OF THE 1980 INPUT/OUTPUT TABLES

### Methodology

The methods adopted by the Member States to compile the 'five-year' input/output tables (IOT) for 1970, 1975 and 1980 are described in the European System of Integrated Economic Accounts (ESA), of which they form an integral part.<sup>3</sup>

<sup>1</sup> The ECU reflects market exchange rates between the currencies, whereas PPS measure relative prices in the various countries. More detailed information is available in 'Eurostat-National Accounts ESA-Aggregates — 1960-84 — Luxembourg 1986'.

Conversion rates used :

BFR	DKR	DM	DR	ESC	FF	HFL	LIT	PTA	UKL
1 PPS =									
40.9	8.29	2.65	39.5	35.3	5.85	2.82	847	71.0	0.543
1 ECU =									
40.60	7.83	2.52	59.32	69.55	5.87	2.76	1189	99.70	0.598

<sup>2</sup> I is the unit matrix.

Ad is the matrix of the vertical coefficients of domestic origin.

<sup>3</sup> For an analytical description of this methodology, reference should be made to the following publications :

- Eurostat: *Methodology of the Community input/output tables 1970-75* (Volume 1-1976).
- Eurostat: *European System of Integrated Economic Accounts — ESA — second edition* (1979).

<sup>4</sup> Further information is obtainable from the publication:  
— Eurostat: *ESA National accounts — Input/output tables 1975-83*.

Adjustments and improvements have to be made to the methodology to take account of new situations which did not exist at the time when the previous set of IOT was drawn up, and these are acceptable only insofar as they do not significantly change the characteristics required by the ESA and therefore impair the comparability of the IOT for the different periods.

The changes made in the 1975 IOT vis-à-vis the 1970 IOT were needed to take account of the introduction of the VAT system,<sup>4</sup> whereas the 1980 tables differ from the 1975 tables in that they contain the adjustments needed to integrate these general 'economic' IOT and the energy IOT.

This integration has two consequences: a need for a more detailed breakdown of economic activity than the traditional R-44 NACE-CLIO breakdown (see the section on nomenclatures) and a change in the treatment of natural gas.

It was decided to treat natural gas 'net' in this last set of IOT, instead of 'gross' as it had been hitherto. In the past the nationally produced natural gas produced by the NACE-CLIO branch 132 (extraction and purifying of natural gas), was 'sold' to branch 162 (gas distribution), which was responsible for its distribution to final or intermediate users, together with the gas which it imports direct.

In the new system it is branch 132 which distributes direct the natural gas which it produces or imports, while branch 162 distributes the other types of gas. This method of treatment makes the table easier to understand and avoids a duplication in value which is not balanced by a duplication in physical quantities.

In order to make the data on value-added more readily comparable, the Member States have been asked to break down taxes linked to production (R22) into its component items : taxes on products (R221) and other taxes linked to production (R222).

The old code 110 has therefore been replaced in a number of countries by the new codes 111 and 112.

### **System of prices and breakdown of the tables**

The IOT published in this volume are valued according to the traditional system of prices, i.e. producers' prices/ex-customs prices net of deductible VAT, as was the case in 1975.<sup>1</sup>

However, for analytical purposes, this system of prices is not satisfactory, since the flows of a given product are not valued in a uniform manner, because they may or may not include VAT, depending on whether or not the purchasers are entitled to a refund of VAT on the goods purchased. Similarly, the analysis of the inputs of a given branch is rendered more difficult by the fact that the branch may or may not include taxes linked to production, depending upon the type of products it purchases.

The IOT supplied to users on tape therefore contain values net of all VAT. The tables for non-deductible VAT are not available, since the statistical institutes which compiled them regard them as confidential. In cases where countries have supplied tables on taxes on products, it is easy to calculate a table at basic prices.

Appendix 1 contains a list of all the tables available to users.

### **Countries covered**

Among the EEC Member States, Luxembourg and Ireland were unable to take part in the Community IOT programme; Belgium and Greece are still working on their 1980 IOT, which were not yet available when this publication went to press. The Spanish and Portuguese statistical institutes managed to compile the IOT contained in this publication, although they were not bound by Community agreements.

Spain's IOT is the first to be produced by the national statistical institute<sup>2</sup> and has been drawn up according to the requirements of the ESA, which has been adopted as the national methodology for Spain.

<sup>1</sup> The IOT of Greece, Spain and Portugal are exceptions to this rule. They cannot be fully comparable with those of the other countries, because in 1980 their systems of indirect taxation were based not on VAT but on cascade turnover taxes, similar to those which existed in the other Member States prior to 1975.

<sup>2</sup> The Spanish IOT available for previous years were compiled by private research institutes.

Portugal too has adopted a system of national accounts based on the ESA, and the IOT contained in this publication is the 'five-year' version of the 'annual' table already available.

### **The treatment of imports**

In the five-yearly input-output tables, the breakdown into three components according to the origin of the product is given for each flow in the tables of intermediate consumption and final uses:

- origin: domestic,
- origin: imports from the EC (EUR 10),
- origin: imports from third countries.

The element-by-element sum of these three subtables gives the corresponding table 'all origins'.

The breakdown is needed partly with a view to the construction in the future of a consolidated IOT for the Community as a whole, based on the IOT of the Member States. An approximate Community aggregation has been made (despite the absence of figures for Belgium and Greece) for the initial introductory tables containing EUR totals next to the figures for the individual countries, so that the typical values for each country can be compared with a European average.

In this volume, the table 'all origins' is presented first, then follows the table of domestic origin and lastly the table of total imports origin. The breakdown of imports table between EC and third countries is available on request.

## **2. THE NOMENCLATURE OF THE BRANCHES**

Each branch is defined as a grouping of units of homogeneous production. The set of activities covered by a branch is identified by reference to a product classification. The nomenclature used for the ESA, on which the Community IOT were based in the past, comprised a 44-branch aggregation of the NACE-CLIO (R44).

In 1975 the 'energy' IOT were drawn up for the first time, showing flows for the energy branches in physical quantities in addition to the traditional flows in value terms. The nomenclature comprises a 43-branch aggregation of the NACE-CLIO (R43), which contains a more detailed breakdown of the energy branches or large consumers of energy than that in the R44, and a less detailed breakdown of other branches (particularly in the services sector).

For the 1980 'economic' and 'energy' IOT a new 59-branch aggregation of the NACE-CLIO was drawn up on the principle that the use of one basic nomenclature for both applications would simplify the task of preparing the tables and provide a more detailed breakdown of the information available.

The codes for this new nomenclature are given in Appendix 2, together with the precise content based on the NACE-CLIO groups.

It is of course possible, simply by adding together the branches at R59 level, arrive at the R44, which will continue to be the nomenclature used for comparisons in time and in space.

The relationship between the old R44 codes and the new R59 codes is shown in Appendix 3.

#### **(a) The nomenclature of the branches by country**

##### *Denmark*

Nomenclature used: R59.

Exceptions: Branch 135 includes branch 136,  
Branch 290 includes branch 270,  
Branch 810 also includes branches 850  
and 890.

##### *Federal Republic of Germany*

Nomenclature used: R44.

Exceptions: none.

##### *Spain*

Nomenclature used: R44.

Exceptions: Branch 030 includes branch 110,  
Group 730 (Inland water transport) is included in branch 630 instead of branch 610,  
Olive oil and wine production are included in branches 411 and 425 respectively, instead of being a part of branch 01.

##### *France*

Nomenclature used: R59.

Exceptions: none.

##### *Italy*

Nomenclature used: R59.

Exceptions: none.

##### *Netherlands*

Nomenclature used: R59.

Exceptions: Branch 075 includes branch 071,  
Branch 137 includes branches 135 and 136,  
Branch 157 includes branches 151, 153 and 155,  
Branch 617 includes branches 611 and 613,  
Branch 750 includes branch 850,  
Branch 770 includes branch 890.

##### *Portugal*

Nomenclature used: R44.

Exceptions: Branch 030 includes branch 050,  
Branch 210 includes branch 230,  
Branch 270 includes branch 290.

#### *United Kingdom*

Nomenclature used: R59.

Exceptions: Branch 031 includes branch 033,  
Branch 071 includes branch 075,  
Branch 097 includes branch 110,  
Branch 570 includes branch 550,  
Branch 613 includes branch 617,  
Branch 690 includes branch 710,  
Branch 790 includes branches 750 and 770,  
Branch 810 includes branches 850, 890 and 930.

#### **(b) The nomenclature of branches for the Community IOT and the introductory tables**

In order to show up tables comparing the various countries and to calculate the Community IOT a decision has to be made as to the type of aggregation to be used. As the individual countries use different levels of aggregation, two different approaches are possible in theory but unsatisfactory in practice:

The first method of treatment is designed to achieve the maximum degree of comparability among the countries. If one country aggregates branches, this aggregation has to be made in the tables of all the others, with the result that a very considerable volume of information is lost.

The second method of treatment is to go to the other extreme and to make no alterations to the tables of individual countries to take account of aggregations of branches in other countries. Thus, in theory, a total 'labelled' as EEC may contain data relating to only one country.

An empirical compromise was found between the conflicting requirements of comparability and the maximum possible degree of breakdown, by applying the following rule:

The IOT are in any event reduced to R44 level; if one of the four largest countries aggregates branches, this aggregation is made in the tables of all the other countries.

The application of this rule has resulted in the following aggregations:

##### *Community IOT and summary table of commodity flow accounts for 1980*

Branch 570 includes branch 550.  
Branch 690 includes branch 710.  
Branch 790 includes branches 750 and 770.  
Branch 810 includes branches 850, 890 and 930.

##### *Comparative table of technical coefficients 1975-80*

Branch 630 includes branch 650.  
Branch 790 includes branches 550, 570, 690, 710, 750, 770 and 790.  
Branch 810 includes branches 850, 890 and 930.

### 3. METHODOLOGICAL PROBLEMS BY COUNTRY

Eurostat has noted that in some instances the original IOT submitted by the Member States diverge from the rules laid down in the ESA.

Eurostat has rectified some of the divergences and the adjustments are included in the published tables.

The divergences which it proved impossible to rectify are listed below, country by country, together with the main items which are missing from the IOT.

One divergence from the ESA rules to be found to a greater or lesser degree in the tables of all the countries concerns the treatment of *intra-branch consumption*.

This should in fact comprise only :

- exchange between the groups of which the branch is composed;
- imported products.

In addition to the consumption internal to the groups of a limited number of branches includes in a list of exceptions to the rule.

In practice, a number of countries do not apply the rule (e.g. the United Kingdom); and in such cases the diagonal is clearly overestimated in relation to the ideal.

Other countries (e.g. France) apply the rule but to the national nomenclature. The breakdown of activities in the national nomenclatures is such that it is relatively easy to establish the relationship between them and the R44 or the R59 of the NACE-CLIO, but as a rule there is not a one-to-one relationship between the groups in the NACE-CLIO and the 'groups' in the national nomenclature. Thus, transactions are excluded from the diagonal when they are effected within a 'national' group and included when they are effected between two 'national' groups in the same branch. Thus, if there is a more detailed breakdown of the national groups than of the corresponding groups in the NACE-CLIO, the diagonal will be overestimated, whereas if the reverse situation is found, the diagonal will be underestimated.

#### (a) Denmark

##### *Definition of branch*

The structure of costs (columns) in the IOT for the most part reflects the information originally supplied by the inquiry units which make no distinction between the principal activity and secondary activities. Thus, in this type of IOT, the economic activities are not shown according to the ESA rules, which require the use in the IOT of an analytical unit (branch) which comprises a grouping of units of homogeneous production with a single activity.

The uses (rows) in the Danish IOT are therefore a recalculation of the original data, which was made in order to balance the resources and uses for each sector.

#### *Table of primary inputs*

It was not possible to calculate the consumption of fixed capital (code 080), with the result that codes 030, 070 and 180 relate to gross flows rather than the net flows referred to in the headings.

Gross wages and salaries (code 010) include employers' social contributions (code 020).

Codes 111 and 112 (taxes on products) are shown net of the corresponding production subsidies.

#### (b) Federal Republic of Germany

##### *Valuation of flows*

The tables published here contain values at producers' prices net of all VAT (deductible or non-deductible) because the tables for deductible VAT have not yet been sent to Eurostat.

#### *Table of primary inputs*

Gross wages and salaries (code 010) include employers' social contributions (code 020).

Production subsidies (code 120) and taxes on products (codes 111 and 112) are shown not separately but as a single net figure (code 170).

#### (c) Spain

##### *Valuation of flows*

The tables published here contain values at producers' prices, including taxes on products.

#### *Table of primary inputs*

It was impossible to calculate the consumption of fixed capital (code 080), hence codes 030, 070 and 180 relate to gross flows rather than the net flows referred to in the headings.

##### *Breakdown of imports and exports*

The table containing the breakdown of exports and imports according to whether they are imported from/ exported to Community countries or third countries is not available. The vector used for distinguishing origin and destination was estimated by Eurostat.

##### *Final uses*

The figures for the collective consumption of private non-profit institutions are included in those for the final consumption of general government.

#### (d) France

##### *Table of primary inputs*

France's IOT does not include the breakdown of value-added at market prices into its component items: compensation of employees, operating surplus, taxes on products, etc.

**(e) Italy***Table of primary inputs*

Italy's IOT does not yet include the breakdown of value-added at market prices into its component items: compensation of employees, operating surplus, taxes on products, etc.

**(f) Netherlands***Definition of branch*

The figures used to compile the Netherlands IOT are taken more or less direct from inquiries in which the inquiry units are local units; only the activities of the largest local units have been broken down to the level of the corresponding kind-of-activity units (KAU).

Thus, the branches are not completely 'pure' in the ESA sense, because they still include secondary activities.

*Final uses*

The figures for the collective consumption of private non-profit institutions are included in those for the final consumption of households.

**(g) Portugal***Valuation of flows*

The INE (Instituto Nacional de Estatística) compiled different kinds of IOT. One at purchasers' prices, a second at producers' prices including the taxes on products and a third at basic prices. The last one is shown here.

*Table of primary inputs*

Gross wages and salaries (code 010) include employers' social contributions (code 020).

It was not possible to establish the value of the consumption of fixed capital (code 080), hence codes 030, 070 and 180 relate to gross flows rather than the net flows referred to in the headings.

*Final uses*

The figures for the collective consumption of private non-profit institutions are included in those for the final consumption of general government.

**(h) United Kingdom***Reference year*

The complete IOT published here relates to 1979. The only figures available for 1980 are the total figures for balances of uses/resources, which were used for the corresponding introductory table.

*Table of primary inputs*

Gross wages and salaries (code 010) include employers' social contributions (code 020).

The consumption of fixed capital is available only with a breakdown of 35 groupings of the NACE-CLIO groups; some items therefore relate to gross values, although the headings describe them as net (codes 030, 070 and 180).

**4. CALCULATION OF THE COMMUNITY TABLE**

The Community table should comprise data for EUR 10, Luxembourg and Ireland not being available one is limited to EUR 8. On the basis of the input-output tables for

the eight States in 1980, the table will be calculated, after the availability of the IOT for Belgium and Greece, in two main stages: first, the national tables, converted beforehand into the common unit, the ECU, are added together; secondly, the table thus obtained is subjected to the following operations in order to take the date for intra-Community trade into account.

In the national tables, the uses of each product are broken down according to their origin, namely:

- total,
- value from domestic production,
- imports from Community countries (EUR 10),
- imports from third countries.

In the Community table, what was previously regarded as imports from the EC now becomes Community output: imports from third countries only constitute the import table.

Although in the national tables the figures include the branches' internal consumption of products imported from the EC, this should be deleted from the Community table, since it is regarded as internal consumption of Community output. However, this solution would have the disadvantage of decreasing Community output, which would thus no longer correspond to the sum of each country's output. For this reason, the general solution adopted in the case of intra-Community imports is also adopted here, i.e. the merging of imports from Community countries with the value of domestic production.

Similarly, in the table of primary inputs and resources the row 'imports cif of similar products from EC countries' is deleted. In theory, for reasons of balance it is necessary to delete the whole of the column corresponding to exports to EC countries in the table of final uses, since, for each product, the sum of exports to EC countries should be equal to the sum of imports from the Community. In practice, this is not the case, for three reasons.

Firstly, despite the efforts to harmonize them, a given country's import figures are not always equal to the corresponding export figures of the country of origin, owing either to different recording dates or to uncertainty of the place of origin or destination.

Secondly, there is a difference in valuation: exports are valued at fob prices, imports at cif prices: the difference is mainly the costs of insurance and transport between the two countries concerned.

Thirdly the absence of the table for Luxembourg and Ireland adds a little more imbalance.

These disparities explain the presence of an additional column, called 'Adjustment', in the table of final uses. This adjustment thus represents the difference between recorded intra-Community imports and exports.

Finally, there is one last line to be considered, namely taxes linked to imports of similar products from EC countries. As such taxes are levied within the Community, they are logically classified as taxes linked to production and are added to row 11 of the table on primary inputs.

## ANNEX 2

## Classification of branches

Serial No	Code	Heading	Definition in terms of NACE-CLIO groups
1	010	Agricultural, forestry and fishery products	011/030
2	031	Coal and coal briquettes	111
3	033	Lignite (brown coal) and lignite briquettes	112
4	050	Products of coking	120
5	071	Crude petroleum	131+133 <sup>1</sup>
6	073	Refined petroleum products	140
7	075	Natural gas	132 <sup>1</sup>
8	095	Water (collection, purification, distribution)	170
9	097	Electric power	161
10	098	Manufactured gases	162
11	099	Steam, hot water, compressed air	163
12	110	Nuclear fuels	151/152
13	135	Iron ore and ECSC iron and steel products	211/221
14	136	Non-ECSC iron and steel products	222/223
15	137	Non-ferrous metal ores; non-ferrous metals	212+224
16	151	Cement, lime, plaster	242
17	153	Glass	247
18	155	Earthenware and ceramic products	241+248
19	157	Other minerals and derived products (non-metallic)	231/239+243/246
20	170	Chemical products	252/259+260
21	190	Metal products	311/316
22	210	Agricultural and industrial machinery	321/328
23	230	Office machines, etc.	330+371/374
24	250	Electrical goods	341/347
25	270	Motor vehicles and engines	351/353
26	290	Other transport equipment	361/365
27	310	Meat and meat products	412
28	330	Milk and dairy products	413
29	350	Other food products	411+414/423
30	370	Beverages	424/428
31	390	Tobacco products	429
32	410	Textiles and clothing	431/439+453/456
33	430	Leathers, leather and skin goods, footwear	441+442+451
34	450	Timber and wooden furniture	461/467
35	471	Pulp, paper, board	471
36	473	Paper goods, products of printing	472/474
37	490	Rubber and plastic products	481/483
38	510	Other manufacturing products	491/495
39	530	Building and civil engineering works	505/509
40	550	Recovery and repair services	620+671+672
41	570	Wholesale and retail trade	610+630+640
42	590	Lodging and catering services	660
43	611	Railway transport services	710
44	613	Road transport services	721/725
45	617	Inland waterways services	730
46	631	Maritime and coastal transport services	741+742 <sup>1</sup>
47	633	Air transport services	750

# Introduction

Cette publication fournit les tableaux entrées-sorties (TES) des pays de la CE, harmonisés selon le Système européen de comptes économiques intégrés (SEC), pour l'année 1980.

## SYSTÈME EUROPÉEN DE COMPTES ÉCONOMIQUES INTÉGRÉS (SEC)

Le SEC est la version communautaire du Système de comptabilité nationale des Nations unies (SCN): il fournit des définitions communes pour l'ensemble des comptes nationaux transmis à l'Eurostat, y compris les tableaux entrées-sorties.

Le SEC prévoit, à différentes fins, deux modes de découpage de l'économie. Pour l'analyse détaillée de la production et de l'utilisation de biens et services, l'économie est découpée en «branches», lesquelles regroupent des unités de production homogène exerçant chacune une seule et unique activité. Toutefois, les données sur les revenus, certaines dépenses et les flux financiers ne sont pas disponibles pour de telles unités de production homogène, mais seulement des unités institutionnelles (p. ex. les sociétés). Ces flux concernent l'ensemble des activités des unités institutionnelles, lesquelles sont regroupées en «secteurs» (ménages, administrations publiques, sociétés et quasi-sociétés, etc.). Pour chaque secteur, on dispose d'un ensemble complet de comptes des opérations courantes, de comptes de capital et de comptes financiers.

## PUBLICATIONS EUROSTAT SUR LES COMPTES NATIONAUX

La série Comptes nationaux SEC comprend cinq publications :

- Agrégats

Pour la publication rapide de séries longues (à partir de 1960) concernant les principaux agrégats; en monnaie nationale, en Écus, en parités de pouvoir d'achat, en indices de volume de prix.

- Tableaux détaillés par branche

Donnent une ventilation en 25 branches de la valeur ajoutée brute, de la rémunération des salariés, de l'emploi et de la formation brute de capital fixe à partir

de l'année 1970. La consommation des ménages est également ventilée en 50 fonctions.

- Tableaux détaillés par secteur

Donnent un ensemble complet de comptes des opérations courantes, de comptes de capital et de comptes financiers à partir de 1970, pour sept secteurs et certains sous-secteurs.

- Comptes et statistiques des administrations publiques

Développent l'analyse du secteur des administrations publiques dans une présentation budgétaire, avec de nombreux détails sur les recettes (p. ex. par catégorie d'impôt) et les dépenses (par type et par fonction).

- Tableaux entrées-sorties

Des tableaux entrées-sorties aux prix départ-usine sont établis tous les cinq ans (1970, 1975, 1980). Une distinction est faite entre biens de production intérieure et importations.

## Collecte et stockage de données

Les données harmonisées des comptes nationaux établis selon le SEC sont collectées chaque année, auprès des pays, à l'aide de questionnaires standardisés, 9 à 12 mois après la fin de l'année de référence. Elles sont stockées dans Cronos, la base de données chronologiques de l'Eurostat, qui peut être consultée par l'intermédiaire du réseau Euronet. La base Cronos n'est pas adaptée au stockage des tableaux entrées-sorties, qui bénéficient d'un autre support.

## DONNÉES DU COMMERCE EXTÉRIEUR

Les données du commerce extérieur Nimexe, regroupées en termes de 125 produits de la NACE/CLIO et agrégées en 27 branches du TES (le sous-ensemble de R44 relatif aux biens) sont disponibles sur micro-fiches, dans une ventilation géographique détaillée, à partir de l'année 1975.

## Plan de ce volume

Ce volume se compose de trois parties. Dans la première sont exposées les caractéristiques générales des tableaux entrées-sorties 1980, ainsi que les problèmes relatifs à l'harmonisation des tableaux.

Dans la deuxième partie figure essentiellement un tableau qui résume par branche et par pays l'équilibre ressources/emplois par branche pour 1980. Les éléments pris en compte sont les coûts intermédiaires, la valeur ajoutée et les importations pour les ressources alors que, pour les emplois, il s'agit des emplois intermédiaires, des consommations finales des ménages, de la formation brute de capital fixe et des exportations.

Le total ressources/emplois est indiqué aussi bien en

Écus qu'en standards de pouvoir d'achat (SPA) (¹).

Vient ensuite un tableau comparatif présentant les coefficients techniques totaux par branche et par pays pour 1975 et 1980.

Dans la troisième, les tableaux entrées-sorties sont présentés séparément pour chaque pays : en premier lieu les flux totaux, ensuite les flux d'origine interne et d'origine importée et enfin l'inverse de la matrice (I-Ad) (²).

### Disponibilité des tableaux entrées-sorties

La base de données TES de l'Eurostat contient les tableaux suivants :

	1959	1965	1970	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980
B	Q	Q	Q					Q					
DK			Q			A		Q					Q
D	Q	Q	Q					Q	Q				Q
F	Q	Q	Q	A	A	A	A	Q	A	A	A	A	Q
E								Q					Q
IRL			Q					Q					
I	Q	Q	Q	A	A	A	A	Q		Q			Q
L		Q	Q										
NL	Q	Q	Q		A	A		Q	A	A	A		Q
P										A	A	A	Q
UK			Q	A	A			Q					
CE 6		Q	Q										
CE 9			Q					Q					

Q = Tableaux des prix départ usine avec décomposition entre flux d'origine interne et importations (CEE et pays tiers).

A = Tableaux sans décomposition des flux en fonction de l'origine.

Les TES peuvent être obtenus sur bande magnétique (contre paiement) ou sur listing à l'adresse suivante :

Division B1 – Tableaux entrées-sorties  
Eurostat  
BP 1907  
L-2920 Luxembourg.

## 1. CARACTÉRISTIQUES GÉNÉRALES DES TABLEAUX ENTRÉES-SORTIES 1980

### Méthodologie

Les méthodes suivies par les pays membres pour élaborer les tableaux entrées-sorties (TES) «quinquennaux» relatifs aux années 1970, 1975 et 1980 sont décrites dans le Système européen de comptes économiques intégrés (SEC), dont ils font partie intégrante (³).

(¹) L'Écu reflète les taux de change de marché entre les devises, tandis que les SPA mesurent plutôt les prix relatifs entre les pays. Des informations plus détaillées sont disponibles dans «Eurostat- Comptes nationaux SEC-Agrégats 1960-1984 — Luxembourg 1986».

Taux de conversion utilisés :

BFR	DKR	DM	DR	ESC	FF	HFL	LIT	PTA	UKL
1 SPA =									
40,9	8,29	2,65	39,5	35,3	5,85	2,82	847	71,0	0,543
1 Écu =									
40,60	7,83	2,52	59,32	69,55	5,87	2,76	1189	99,70	0,598

(²) I représente la matrice unité.

Ad représente la matrice des coefficients verticaux d'origine interne.

(³) Pour une description analytique de cette méthodologie, le lecteur est prié de se référer aux publications suivantes :

- Eurostat : *Méthodologie des tableaux entrées-sorties communautaires 1970-1975* (volume 1-1976).
- Eurostat : *Système européen de comptes économiques intégrés — SEC, 2<sup>e</sup> édition* (1979).

(⁴) D'autres renseignements peuvent être trouvés dans la publication Eurostat- Comptes nationaux SEC — Tableaux entrées-sorties 1975-1983.

De nouvelles situations n'existant pas au moment de l'élaboration des TES précédents ont motivé l'introduction de modifications et d'améliorations méthodologiques, qui sont acceptables dans la mesure où elles n'altèrent pas substantiellement les caractéristiques prévues par le SEC et donc la comparabilité des TES entre les différentes périodes.

Les modifications concernant les TES de 1975 par rapport à ceux de 1970 s'expliquent par la nécessité de prendre en compte l'introduction du système de la TVA (⁴), tandis que les tableaux de 1980 comprennent, par rapport à ceux de 1975, les adaptations dues à l'intégration souhaitée entre les tableaux généraux de type «économique» et les TES de l'énergie.

Les conséquences de cette intégration sont de deux ordres : la demande d'une désagrégation plus poussée de l'activité économique par rapport à la désagrégation traditionnelle de la R44 de la NACE-CLIO (voir le chapitre consacré à la nomenclature) et le traitement du gaz naturel.

En ce qui concerne ce dernier problème, on a voulu introduire dans ces TES un traitement «net» à la place du traitement «brut» traditionnel. En effet, dans le passé, le gaz naturel de production nationale était «vendu», de manière plus ou moins fictive selon les pays, de la branche NACE-CLIO 132 (Production de

gaz naturel) qui l'extract, à la branche 162 (Gaz distribué) qui en assure la distribution aux utilisateurs finals ou intermédiaires, en même temps que le gaz directement importé par cette branche.

Dans le nouveau système, c'est la branche 132 qui distribue directement le gaz naturel qu'elle produit ou importe, tandis que la branche 162 distribue les autres types de gaz. Ce genre de traitement rend le tableau plus compréhensible et évite un double emploi en valeur auquel ne peut pas correspondre un double emploi en quantités physiques.

En vue d'améliorer la comparabilité des données sur la valeur ajoutée, il a été demandé aux pays membres de désagréger les impôts indirects sur les produits (R22) entre ses composants : impôts sur les produits (R221) et autres impôts indirects sur la production (R222).

L'ancien code 110 a donc été remplacé par un certain nombre de pays par les nouveaux codes 111 et 112.

### Système de prix et décomposition des tableaux

Les TES publiés dans le présent volume sont évalués suivant le système de prix traditionnel, c'est-à-dire aux prix départ-usine/départ-douane hors TVA déductible, comme cela a été le cas en 1975 (¹).

Toutefois, à des fins analytiques, ce système de prix n'est pas satisfaisant, car les flux ne sont pas évalués, pour un même produit, de façon homogène, vu qu'ils comprennent ou non la TVA suivant que les acheteurs ont ou non droit au remboursement de la TVA sur les biens achetés. Dans le même ordre d'idées, le fait d'inclure ou non les impôts sur la production suivant le type de produit acheté par une branche déterminée rend l'analyse des entrées de cette branche plus difficile.

Pour ces raisons, les TES fournis aux utilisateurs sur bande magnétique sont évalués nets de toute TVA. Les tableaux de TVA non déductible ne sont pas disponibles, car ils sont considérés comme confidentiels par les instituts statistiques qui les ont élaborés. Pour les pays qui ont fourni les tableaux des taxes sur les produits, un tableau aux prix à la production peut facilement être calculé.

L'annexe 1 fournit la liste de tous les tableaux à la disposition des utilisateurs.

### Pays représentés

Parmi les pays membres de la CEE, le Luxembourg et l'Irlande n'ont pas pu adhérer au programme communautaire des TES : la Belgique et la Grèce sont encore en train d'élaborer les TES 1980 qui n'étaient pas

(¹) Font exception à cette règle les TES de la Grèce, de l'Espagne et du Portugal. Ils ne seront pas parfaitement comparables avec ceux des autres pays, étant donné que leur système d'impôts indirects n'était pas encore basé, en 1980, sur la TVA mais sur les impôts «en cascade» sur le chiffre d'affaires tels qu'ils existaient dans les autres pays membres avant 1975.

(²) Les TES espagnols disponibles pour les années précédentes avaient été élaborés par des organismes de recherche privés.

encore prêts au moment de confier cette publication à l'éditeur. L'Institut statistique espagnol et son homologue portugais, bien que n'étant pas liés par les accords communautaires, ont pu élaborer les TES qui sont présentés ici.

Le TES de l'Espagne est le premier du genre élaboré par la statistique officielle (²). Il est construit suivant les règles du SEC qui a été adopté comme méthodologie nationale par l'Espagne.

Le Portugal a adopté, lui aussi, un système de comptabilité nationale de type SEC, et le TES présenté ici constitue la version «quinquennale» du «tableau annuel», déjà disponible.

### Le traitement des importations

Dans les TES quinquennaux, on connaît, pour chaque flux des tableaux des échanges intermédiaires et des emplois finals, la décomposition en trois éléments selon l'origine du produit :

- origine : intérieur,
- origine : importations de la CE (EUR 10),
- origine : importations des pays tiers.

La somme élément par élément de ces trois sous-tableaux redonne évidemment le tableau correspondant «toutes origines».

Cette information permet une analyse des échanges commerciaux entre les pays membres.

La décomposition est également nécessaire en vue de la future construction, à partir des TES des pays membres, d'un TES consolidé pour l'ensemble de la Communauté. Une sorte d'agrégation communautaire a été calculée, en dépit de l'absence de la Belgique et de la Grèce, pour les tableaux introductifs initiaux dans lesquels se retrouvent les totaux EUR à côté des données des différents pays, de façon à pouvoir comparer les valeurs typiques de chaque pays à une moyenne européenne.

Dans ce volume sont présentés d'abord le tableau «toutes origines», ensuite le tableau d'origine intérieur et le tableau d'origine importations totales. La décomposition entre les importations d'origine de la CE et des pays tiers est disponible sur demande.

## 2. LA NOMENCLATURE DES BRANCHES

Chaque branche est définie comme un regroupement d'unités de production homogènes; l'ensemble des activités relatives à une branche est décrit par référence à une classification de produits. La nomenclature prévue par le SEC, à partir de laquelle ont été construits les TES communautaires dans le passé, consistait en une agrégation en 44 branches (R44) de la NACE-CLIO.

C'est en 1975 qu'ont été élaborés pour la première fois les TES dits «de l'énergie» qui ont la caractéristique de présenter, pour les branches énergétiques, des flux en quantités physiques à côté des traditionnels flux en valeur. La nomenclature consiste en une agrégation en

43 branches de la NACE-CLIO (R43) qui, par rapport à la R44, détaille davantage les branches énergétiques ou grosses consommatrices d'énergie et moins d'autres branches (essentiellement les services non marchands).

Pour l'exercice TES «économiques» et TES «énergétiques» 1980, une nouvelle agrégation en 59 branches de la NACE-CLIO a été proposée, afin que cette nomenclature de base commune aux deux applications facilite le travail de construction des tableaux eux-mêmes et augmente les informations disponibles.

Les codes de cette nouvelle nomenclature ainsi que leur contenu exact en fonction des groupes de la NACE-CLIO sont présentés à l'annexe 2.

Naturellement, en additionnant simplement les branches au niveau de la R59, on peut obtenir le R44 qui demeure la nomenclature à utiliser pour effectuer des comparaisons dans le temps et dans l'espace.

Les relations entre les anciens codes de la R44 et les nouveaux de la R59 figurent en annexe 3.

### a) La nomenclature des branches par pays

#### Danemark

Nomenclature utilisée : R59.

Exceptions: la branche 135 comprend la branche 136, la branche 290 comprend la branche 270, la branche 810 comprend également les branches 850 et 890.

#### République fédérale d'Allemagne

Nomenclature utilisée : R44.

Exception : aucune.

#### Espagne

Nomenclature utilisée : R44.

Exceptions: la branche 030 comprend la branche 110; le groupe 730 (Service de navigation intérieure) fait partie de la branche 630, au lieu d'être rattaché à la branche 610; les productions d'huile d'olive et de vin sont respectivement rattachées aux branches 411 et 425 et ne font donc pas partie de la branche 01.

#### France

Nomenclature utilisée : R59.

Exception : aucune.

#### Italie

Nomenclature utilisée : R59.

Exception : aucune.

#### Pays-Bas

Nomenclature utilisée : R59.

Exceptions: la branche 075 comprend la branche 071, la branche 137 comprend les branches 135 et 136, la branche 157 comprend les branches 151, 153 et 155, la branche 617 comprend les branches 611 et 613, la branche 750 comprend la branche 850, la branche 770 comprend la branche 890.

#### Portugal

Nomenclature utilisée : R44.

Exceptions: la branche 030 comprend la branche 050, la branche 210 comprend la branche 230, la branche 270 comprend la branche 290.

#### Royaume-Uni

Nomenclature utilisée : R59.

Exceptions: la branche 031 comprend la branche 033, la branche 071 comprend la branche 075, la branche 097 comprend la branche 110, la branche 570 comprend la branche 550, la branche 613 comprend la branche 617, la branche 690 comprend la branche 710, la branche 790 comprend les branches 750 et 770, la branche 810 comprend les branches 850, 890 et 930.

### b) La nomenclature des branches pour les TES communautaires et pour les tableaux introductifs

La présentation de tableaux comparatifs entre pays et le calcul des TES communautaires pose le problème du type d'agrégation utilisé. En effet, étant donné que les niveaux d'agrégation varient d'un pays à l'autre, deux approches différentes sont théoriquement possibles mais non satisfaisantes dans la pratique :

Le premier type de traitement tend à assurer le degré maximal de comparabilité entre les pays. Dans la mesure où un pays effectue un regroupement, il doit être répété pour tous les autres. La conséquence est une perte d'informations très importante.

Le deuxième type de traitement, qui tombe dans l'excès inverse, ne modifie pas les tableaux des pays pour tenir compte des regroupements de branches présentés dans les autres pays. En théorie, un total «étiqueté» EUR peut donc contenir des données concernant un seul pays.

Un compromis empirique entre les exigences contradictoires de comparabilité et de degré maximal de détail a été trouvé en appliquant la règle suivante :

les TES sont réduits dans tous les cas au niveau de la R44; lorsqu'un regroupement existe dans un des quatre pays les plus importants, il est reproduit dans tous les autres.

L'application de cette règle a entraîné les regroupements suivants :

#### *TES communautaire et tableau récapitulatif de l'équilibre ressources-emplois pour 1980*

La branche 570 comprend la branche 550.

La branche 690 comprend la branche 710.

La branche 790 comprend les branches 750 et 770.

La branche 810 comprend les branches 850, 890 et 930.

#### *Tableau comparatif des coefficients techniques 1975-1980*

La branche 630 comprend la branche 650.

La branche 790 comprend les branches 550, 570, 690, 710, 750, 770 et 790.

La branche 810 comprend les branches 850, 890 et 930.

### 3. PROBLÈMES MÉTHODOLOGIQUES PAR PAYS

L'Eurostat a constaté l'existence d'un certain nombre de divergences par rapport aux règles établies par le SEC dans les TES envoyés par les pays membres.

Certaines de ces divergences ont été corrigées par l'Eurostat, et les corrections figurent dans les tableaux publiés.

Lorsque les divergences n'ont pas pu être corrigées, elles sont indiquées ci-dessous pays par pays en même temps que les principaux éléments manquants des TES.

Une divergence par rapport aux règles du SEC qui concerne un peu tous les pays a trait au traitement des **consommations internes à la branche**.

En effet, celles-ci devraient uniquement comprendre :

- les échanges entre les groupes de la branche,
- les produits importés,

abstraction faite des consommations internes aux groupes d'un nombre limité de branches comprises dans une liste qui fixe les exceptions à la règle.

En pratique, un certain nombre de pays n'appliquent pas la règle (p. ex. le Royaume-Uni) et, dans ce cas, la diagonale est nettement surestimée par rapport à une situation idéale.

D'autres pays (p. ex. la France) appliquent la règle, mais au niveau de la nomenclature nationale. Les nomenclatures nationales ont une décomposition des activités qui permet un passage relativement facile vers la R44 ou la R59 de la NACE-CLIO, mais ne comprennent pas, en général, une correspondance unique entre les groupes de la NACE-CLIO et les «groupes» de la nomenclature nationale. Une transaction est donc exclue de la diagonale lorsqu'elle se passe à l'intérieur d'un groupe «national», mais y est incluse lorsqu'elle concerne deux groupes «nationaux» de la même branche. Si les groupes nationaux sont plus détaillés que

les groupes correspondants de la NACE-CLIO, il y a donc surestimation de la diagonale tandis qu'à l'inverse, si les groupes nationaux sont moins détaillés, on obtient une sous-estimation.

#### a) Danemark

##### *Définition de la branche*

La structure des coûts (les colonnes) du TES reflète en grande partie les informations fournies à l'origine par les unités d'enquête à l'intérieur desquelles aucune distinction n'est opérée entre l'activité principale et les activités secondaires. Dans ce type de TES, les activités économiques ne sont donc pas représentées suivant les règles du SEC. Celles-ci prévoient en effet l'utilisation, à l'intérieur des TES, d'une unité d'analyse (la branche), qui représente un regroupement d'unités de production homogènes et caractérisées par une activité unique.

Les emplois (les lignes) du TES danois sont donc recalculés par rapport aux données d'origine, de façon à arriver à la correspondance, pour chaque secteur, entre ressources et emplois.

##### *Tableau des entrées primaires*

Les amortissements (code 080) n'ont pas pu être évalués du fait que les codes 030, 070 et 180 représentent des flux bruts et non des flux nets, comme le prévoit leur dénomination.

Les salaires et traitements bruts (code 010) comprennent les cotisations sociales (code 020).

Les codes 111 et 112 (impôts sur les produits) sont nets des subventions à la production correspondantes.

#### b) République fédérale d'Allemagne

##### *Évaluation des flux*

Les tableaux publiés ici sont évalués selon un système de prix départ-usine hors toute TVA (déductible ou non), car les tableaux de la TVA déductible ne sont pas encore parvenus à l'Eurostat.

##### *Tableau des entrées primaires*

Les salaires et traitements bruts (code 010) comprennent les cotisations sociales (code 020).

Les subventions à la production (code 120) et les impôts sur les produits (codes 111 et 112) ne sont pas fournis séparément mais uniquement sous forme de solde (code 170).

#### c) Espagne

##### *Évaluation des flux*

Les tableaux publiés ici sont évalués selon un système de prix départ-usine comprenant les taxes sur les produits.

##### *Tableau des entrées primaires*

Les amortissements (code 080) n'ont pas encore pu être évalués, si bien que les codes 030, 070 et 180 représentent des flux bruts et non des flux nets comme le prévoit leur dénomination.

## Désagrégation des importations et des exportations

Le tableau comprenant la désagrégation des exportations et des importations selon leur provenance/destination (pays CEE ou pays tiers) n'est pas disponible. Le vecteur qui distingue la provenance et la destination a été estimé par l'Eurostat.

### *Emplois finals*

Les données relatives à la consommation collective des administrations privées sont comprises dans les données concernant les consommations finales des administrations publiques.

## d) France

### *Tableau des entrées primaires*

Le TES de la France ne comprend pas la désagrégation de la valeur ajoutée aux prix du marché entre ses composants (salaires et traitements bruts, excédent brut d'exploitation, impôts sur les produits, etc.).

## e) Italie

### *Tableau des entrées primaires*

Le TES de l'Italie ne comprend pas encore la désagrégation de la valeur ajoutée aux prix du marché entre ses composants (salaires et traitements bruts, excédent brut d'exploitation, impôts sur les produits, etc.).

## f) Pays-Bas

### *Définition de la branche*

Les données utilisées pour l'élaboration du TES néerlandais dérivent plus ou moins directement d'enquêtes dont les unités sont les établissements : seules les activités des établissements les plus importants ont été désagrégées au niveau des unités économique (UAE) correspondantes.

Les branches ne sont donc pas complètement « pures » au sens du SEC, puisqu'elles comprennent encore des activités secondaires.

### *Emplois finals*

Les données concernant la consommation collective des administrations privées sont comprises dans celles relatives à la consommation finale des ménages.

## g) Portugal

### *Évaluation des flux*

L'INE (Instituto Nacional de Estatística) a fourni un TES aux prix d'acquisition, un autre aux prix départ-usine sans déduction des taxes sur les produits, et un troisième aux prix de production. Ce dernier est présenté ici.

### *Tableau des entrées primaires*

Les salaires et traitements bruts (code 010) comprennent les cotisations sociales (code 020).

Les amortissements (code 080) n'ont pas pu être évalués, si bien que les codes 030, 070 et 180 représentent des flux bruts et non des flux nets, comme le prévoit leur dénomination.

### *Emplois finals*

Les données relatives à la consommation collective des administrations privées sont comprises dans celles

concernant les consommations finales des administrations publiques.

## h) Royaume-Uni

### *Année de référence*

Le TES complet publié ici se réfère à l'année 1979. Pour l'année 1980, on dispose uniquement de données globales sur les équilibres ressources-emplois qui ont été utilisées pour le tableau introductif correspondant.

### *Tableau des entrées primaires*

Les salaires et traitements bruts (code 010) comprennent les cotisations sociales (code 020).

Les amortissements ne sont disponibles que dans un détail de 35 postes regroupant les groupes de la NACE-CLIO; en conséquence, certains éléments sont évalués en brut, même si la description les indique en net (codes 030, 070 et 180).

## 4. LE CALCUL DU TABLEAU COMMUNAUTAIRE

Le TES communautaire devrait contenir les données pour EUR 10. En pratique, la non-disponibilité des TES pour l'Irlande et pour le Luxembourg ne permet qu'une évaluation pour EUR 8. A partir des TES des huit pays membres présents pour 1980, le tableau sera, après la disponibilité de la Belgique et de la Grèce, calculé en deux étapes principales : on additionne tout d'abord les tableaux des pays préalablement convertis en unité commune UCE. Ensuite, on effectue sur le tableau ainsi obtenu les opérations suivantes, afin de prendre en compte les données du commerce extérieur intra-communautaire.

Dans les tableaux par pays, les emplois de chaque produit sont ventilés selon leur origine, à savoir :

- total,
- valeur provenant de la production intérieure,
- importations en provenance des pays de la Communauté (EUR 10),
- importations en provenance des pays tiers.

Dans le tableau communautaire, ce qui précédemment était considéré comme importations en provenance de la CE devient désormais production communautaire. Seules importations prévues sont celles en provenance des pays tiers.

Alors que, dans les tableaux nationaux, on comptabilise effectivement les consommations internes aux branches de produits importés de la CE, celles-ci devraient être annulées dans le tableau communautaire puisque considérées comme consommation interne de la production communautaire. Toutefois, cette solution aurait l'inconvénient de diminuer la production communautaire, qui ne correspondrait plus dès lors à la somme des productions nationales. Pour cette raison, c'est la solution générale qui a été adoptée également pour les importations intracommunautaires, à savoir là aussi les importations en provenance des pays de la Communauté sont agrégés avec les valeurs de la production interne.

Dans le même ordre d'idées et au sein du tableau des entrées primaires et ressources, la ligne « importation caf de produits de la CE » s'annule. Symétriquement et en théorie, on est amené à annuler entièrement la colonne

correspondant aux exportations vers les pays de la CE dans le tableau des emplois finals car, pour chaque produit, la somme des exportations vers les pays de la CE devrait être égale à la somme des importations en provenance de la Communauté. En pratique, ce n'est pas le cas, pour trois sortes de raisons.

D'une part, malgré les efforts d'harmonisation, les données d'importations d'un pays ne sont pas toujours égales aux données d'exportations correspondantes du pays d'origine, soit en raison de dates d'enregistrement différentes, soit à cause d'une connaissance inexacte du lieu d'origine ou de destination.

D'autre part, il existe une différence de valorisation : les exportations sont évaluées aux prix fob, les importations aux prix caf; la différence réside dans les frais

de transport, de commerce et autres coûts de distribution entre les deux pays concernés.

Enfin, l'absence du tableau du Luxembourg et de l'Irlande introduit un petit déséquilibre supplémentaire.

Ces disparités expliquent l'existence d'une colonne supplémentaire dans le tableau des emplois finals, appelée « ajustement statistique ». Cet ajustement représente donc la différence entre les importations et les exportations intracommunautaires.

Il reste une dernière ligne à prendre en considération; il s'agit des impôts liés à l'importation de produits similaires en provenance de la CE. Puisque ces impôts sont bien prélevés au sein de la Communauté, ils sont logiquement classés en impôts liés à la production, et viennent s'ajouter à la ligne 11 du tableau des entrées primaires.

Taxes linked to imports of similar products from EEC countries (excluding VAT)	610	Impôts liés à l'importation de produits similaires en provenance de la Communauté (à l'exclusion de la TVA)
Taxes linked to imports of similar products from third countries (excluding VAT)	620	Impôts liés à l'importation de produits similaires en provenance des pays tiers (à l'exclusion de la TVA)
Total taxes linked to imports of similar products (excluding VAT)	690	Total des impôts liés à l'importation de produits similaires (à l'exclusion de la TVA)
Imports of similar products from EEC countries at ex-customs prices	710	Importations de produits similaires en provenance de la Communauté aux prix départ douane
Imports of similar products from third countries at ex-customs prices	720	Importations de produits similaires en provenance des pays tiers aux prix départ douane
Total imports of similar products at ex-customs prices	790	Total des importations de produits similaires aux prix départ douane
VAT imposed on domestic and imported products	870	TVA grevant les produits nationaux et importés
Total resources	980	Total des ressources

BRANCHES AND SUB-BRANCHES Description	NACE- CLIO (R 44)	BRANCHES ET SOUS-BRANCHES Libellé
Agricultural, forestry and fishery products	010	Produits de l'agriculture, de la sylviculture et de la pêche
Coal, lignite (brown coal) and briquettes	030	Houille, lignite, agglomérés et briquettes
Products of coking	050	Produits de la cokéfaction
Crude petroleum, natural gas and petroleum products	070	Pétrole brut, gaz naturel, produits pétroliers
Electric power, gas, steam and water	090	Énergie électrique, gaz, vapeur et eau
Electric power, steam, hot water, compressed air	091	Énergie électrique, vapeur, eau chaude, air comprimé
Gas distributed by pipes	093	Gaz distribué
Water	095	Eau
Production and processing of radio active materials and ores	110	Minerais et produits de la transformation des matières fissiles et fertiles
Ferrous and non-ferrous ores and metals, other than radioactive	130	Minerais et métaux ferreux et non ferreux autres que fertiles et fissiles
Ferrous metals and minerals	131	Minerais et métaux ferreux
Non-ferrous metals and minerals	133	Minerais et métaux non ferreux
Non-metallic mineral products	150	Minéraux et produits à base de minéraux non métalliques
Chemical products	170	Produits chimiques
Metal products except machinery and transport equipment	190	Produits et métaux à l'exclusion des machines et du matériel de transport
Agricultural and industrial machinery	210	Machines agricoles et industrielles
Office and data processing machines, precision and optical instruments	230	Machines de bureau, machines pour le traitement de l'information, instruments de précision, d'optique et similaires
Electrical goods	250	Matériel et fournitures électriques
Motor vehicles	270	Véhicules et moteurs automobiles
Other transport equipment	290	Moyens de transport autres que véhicules automobiles
Meats, meat preparations and preserves, other products from slaughtered animals	310	Viandes, préparation et conserves de viande, autres produits de l'abattage
Milk and dairy products	330	Lait et produits laitiers
Other food products	350	Autres produits alimentaires
Beverages	370	Boissons
Tobacco products	390	Produits à base de tabacs
Textiles and clothing	410	Produits textiles, habillement
Leathers, leather and skin goods, footwear	430	Cuir, articles en cuir et en peau, chaussures
Timber, wooden products and furniture	450	Bois et meubles en bois
Paper and printing products	470	Papier, articles en papier, articles imprimés
Rubber and plastic products	490	Produits en caoutchouc et en plastique
Other manufacturing products	510	Produits des autres industries manufacturières
Building and construction	530	Bâtiments et ouvrages de génie civil
Recovery and repair services	550	Récupération et réparation
Wholesale and retail trade	570	Services de commerce
Lodging and catering services	590	Services de restauration et hébergement
Inland transport services	610	Services de transport intérieur
Maritime and air transport services	630	Services de transports maritimes et aériens
Maritime transport and coastal services	631	Services de transports maritimes et par cabotage
Air transport services	633	Services de transports aériens
Auxiliary transport services	650	Services annexes des transports
Communication services	670	Services de communication
Services of credit and insurance institutions	690	Services des institutions de crédit et d'assurance
Business services provided to enterprises	710	Services fournis aux entreprises
Services of renting of immovable goods	730	Services de location de biens immobiliers
Market services of education and research	750	Services d'enseignement et de recherche marchands
Market services of health	770	Services de santé marchands
Recreational and cultural services, personal services, other market services n.e.c.	790	Services récréatifs et culturels, services personnels, autres services marchands n.d.a.
General public services	810	Services d'administration générale des administrations publiques
Non-market services of education and research provided by general government and private non-profit institutions	850	Services d'enseignement et de recherche non marchands des administrations publiques et privées
Non-market services of health provided by general government and private non-profit institutions	890	Services de santé non marchands des administrations publiques et privées
Domestic services and other non-market services n.e.c.	930	Services domestiques et autres services non marchands n.d.a.

COSTI PRIMARI E RISORSE Denominazione	Codice Code	PRIMAIRE INPUTS EN MIDDELEN Omschrijving
--	----------------	---

Retribuzioni lorde	010	Bruto lonen en salarissen
Contributi sociali a carico dei datori di lavoro	020	Sociale verzekерingspremies ten laste van werkgevers
Risultato netto di gestione	030	Netto exploitatieoverschot
Prodotto netto al costo dei fattori	070	Netto toegevoegde waarde tegen factorkosten
Ammortamenti	080	Afschrijvingen
Valore aggiunto al costo dei fattori	090	Bruto toegevoegde waarde tegen factorkosten
Imposte indirette sulla produzione (IVA esclusa)	110	Belastingen in verband met de produktie (exclusief BTW)
Contributi alla produzione	120	Exploitatiesubsidies
Imposte indirette sulla produzione al netto dei contributi alla produzione (IVA esclusa)	170	Belastingen in verband met de produktie verminderd met exploitatiesubsidies (exclusief BTW)
Prodotto netto ai prezzi di mercato	180	Netto toegevoegde waarde tegen marktprijzen
Valore aggiunto ai prezzi di mercato	190	Bruto toegevoegde waarde tegen marktprijzen
Produzione effettiva ai prezzi ex-fabbrica	290	Werkelijke produktie tegen prijzen af-producent
Trasferimento di sottoprodotti ordinari di prodotti simili ai prezzi alla produzione	310	Overboekingen van koppelprodukten en van substitutieprodukten tegen voortbrengingsprijzen
Trasferimento di prodotti residuali ai prezzi alla produzione	330	Overboekingen van incidentele verkopen tegen voortbrengingsprijzen
Totale dei trasferimenti ai prezzi alla produzione	390	Totale overboekingen tegen voortbrengingsprijzen
Contributi all'esportazione	410	Exploitatiesubsidies in verband met de uitvoer
Produzione distribuita ai prezzi ex-fabbrica	490	Waarde van de verdeelde produktie tegen prijzen af-producent
Importazioni cif di beni e servizi provenienti dalla Comunità	510	Invoer van soortgelijke produkten uit de Gemeenschap (cif)
Importazioni cif di beni e servizi provenienti da paesi terzi	520	Invoer van soortgelijke produkten uit derde landen (cif)
Importazioni cif di beni e servizi	590	Totale invoer van soortgelijke produkten (cif)
Imposte indirette sulle importazioni di beni e servizi provenienti dalla Comunità (IVA esclusa)	610	Belastingen in verband met de invoer van soortgelijke produkten uit de Gemeenschap (exclusief BTW)
Imposte indirette sulle importazioni di beni e servizi provenienti da paesi terzi (IVA esclusa)	620	Belastingen in verband met de invoer van soortgelijke produkten uit derde landen (exclusief BTW)
Imposte indirette sulle importazioni (IVA esclusa)	690	Totale belastingen in verband met de invoer van soortgelijke produkten (exclusief BTW)
Importazioni di beni e servizi provenienti dalla Comunità ai prezzi fuori-dogana	710	Invoer van soortgelijke produkten uit de Gemeenschap tegen prijzen af-grens
Importazioni di beni e servizi provenienti da paesi terzi ai prezzi fuori-dogana	790	Totale invoer van soortgelijke produkten tegen prijzen af-grens
IVA gravante i prodotti nazionali e importati	870	BTW op nationale en invoerprodukten
Totale delle risorse	980	Totale middelen

BRANCHE E SOTTO-BRANCHE Denominazione	NACE- CLO R 44	BRANCHES EN SUB-BRANCHES Omschrijving
Prodotti dell'agricoltura, della silvicolture e della pesca	010	Landbouw-, bosbouw- en visserijproducten
Carbone, lignite, agglomerati e briquette	030	Steenkool, bruinkool, briketten
Prodotto della distillazione del coke	050	Produkten van de cokesovenbedrijven
Petrolio greggio, gas naturale, prodotti petroliferi	070	Aardolie, aardgas, aardolieprodukten
Energia elettrica, gas, vapore e acqua	090	Elektriciteit, gas, stoom en water
Energia elettrica, vapore, acqua calda, aria compressa	091	Elektriciteit, stoom, warm water, samengeperste lucht
Gas distribuito	093	Gedistribueerd gas
Acqua	095	Water
Minerali e prodotti della trasformazione delle materie fissili e fertili	110	Ertsen en produkten van de verwerking van splijt- en kweekstoffen
Minerali e metalli ferrosi e non ferrosi, esclusi quelli fertili e fissili	130	IJzerertsen, non-ferrometaalsersten en metallurgische produkten met uitzondering van splijt- en kweekstoffen
Minerali e metalli ferrosi	131	IJzererts en ferrometalen
Minerali e metalli non ferrosi	133	Non-ferrometaalsersten en -metalen
Minerali e prodotti minerali non metallici	150	Mineralen en produkten op basis van niet-metaalhoudende mineralen
Prodotti chimici	170	Chemische produkten
Prodotti in metallo, esclusa le macchine e i mezzi di trasporto	190	Produkten uit metaal, met uitzondering van machines en transportmiddelen
Macchine agricole e industriali	210	Machines voor landbouw en industrie
Macchine per ufficio e per l'elaborazione dei dati, strumenti ottici, di precisione e simili	230	Bureaumachines, machines voor informatieverwerking, fijn-mechanische en optische instrumenten e.d.
Materiale e forniture elettriche	250	Elektrotechnische installaties en voorzieningen
Autoveicoli e relativi motori	270	Automobielen, motoren
Mezzi di trasporto, esclusi gli autoveicoli	290	Transportmiddelen, andere dan automobielen
Carni e loro preparazioni e conserve, altri prodotti della macellazione	310	Vlees, vleeswaren en conserveren, overige slachtpprodukten
Latte e prodotti caseari	330	Melk en melkprodukten
Altri prodotti alimentari	350	Overige voedingsmiddelen
Bevande	370	Dranken
Prodotti a base di tabacco	390	Tabaksprodukten
Prodotti tessili, abbigliamento	410	Textielprodukten, kleding
Cuoio, articoli di cuoio e di pelle, calzature	430	Leder, lederwaren, schoeisel
Legno e mobili in legno	450	Hout en houten meubelen
Carta, articoli di carta, articoli di stampa	470	Papier, papierwaren, drukwerk
Prodotti in caucciù e plastica	490	Rubber- en plastic artikelen
Prodotti delle altre industrie manifatturiere	510	Produkten van de overige, be- en verwerkende industrie
Edilizia e opere pubbliche	530	Gebouwen, weg- en waterbouwkundige werken
Recupero e riparazioni	550	Recycling en reparatie
Commercio	570	Diensten van de handel
Pubblici esercizi e esercizi alberghieri	590	Diensten van hotels, cafés en restaurants
Trasporti interni	610	Diensten van vervoer te land en diensten van binnenvaart
Trasporti marittimi e aerei	630	Diensten van de zee- en luchtvaart
Trasporti marittimi e cabotaggio	631	Diensten van de zee- en kustvaart
Trasporti aerei	633	Diensten van luchtvaart
Attività connesse ai trasporti	650	Diensten van aan het vervoer verwante activiteiten
Comunicazioni	670	Communicatiediensten
Istituti di credito e di assicurazione	690	Diensten van krediet- en verzekeringsinstellingen
Servizi prestati alle imprese	710	Diensten verleend aan ondernemingen
Locazione di beni immobili propri	730	Diensten van verhuur van onroerende goederen

This volume consists of two parts.

The first part outlines the general features of the 1980 input-output tables, and some problems relating to the harmonization of the tables.

The second part shows some comparative tables. The commodity flow accounts and the technical coefficients for 1975 and 1980.

In the third part one will find the input-output tables for the member countries: first the total flows, then flows of domestic origin and imports, and lastly the inverse of the matrix (I-Ad).

Ce volume se compose de trois parties.

Dans la première partie sont exposés les caractéristiques générales des tableaux entrées-sorties 1980, ainsi que les problèmes relatifs à l'harmonisation des tableaux.

La deuxième partie présente les tableaux comparatifs. D'abord l'équilibre ressources-emplois et les coefficients techniques pour 1975 et 1980 ensuite.

La troisième partie rassemble les tableaux entrées-sorties pour les pays membres. En premier lieu les flux totaux, ensuite les flux d'origine domestique et ceux importés et enfin l'inverse de la matrice (I-Ad).
