

# COMMISSION OF THE EUROPEAN COMMUNITIES

COM(79) 11 final.

Brussels, 14 March 1979

## ECONOMIC EFFECTS OF THE AGRI-MONETARY SYSTEM (updated versions 1979)

---

(Communication from the Commission to the Council)

## Introduction

On 10 February 1978 the Commission presented to the Council a communication on the economic effects of the agri-monetary system (COM(78)20 final). In view of the Council's interest in this document, especially in the statistics, which provided valuable guidance for its discussions on the agri-monetary system, the Commission now presents updated versions of the tables contained in its earlier communication. Generally speaking, the figures obtained since the previous publication have not invalidated but, in most cases, have provided further justification for the earlier comments, thus confirming the Commission's view that the present agri-monetary system must be dismantled as rapidly as possible.

This communication contains only the tables which it has been possible to bring up to date. General comments and opinions advanced in the previous communication and not repeated here remain, in the Commission's view, fully valid.

PART I

Summary tables and graphs

Table A - Breakdown of value of Member States' final agricultural production, according to monetary situation of Member State

|                                  | %                                    |                      |                                   |                      |
|----------------------------------|--------------------------------------|----------------------|-----------------------------------|----------------------|
|                                  | At current prices and exchange rates |                      | At 1970 prices and exchange rates |                      |
|                                  | "1974" <sub>1)</sub>                 | "1976" <sub>1)</sub> | "1974" <sub>1)</sub>              | "1976" <sub>1)</sub> |
| Member States with positive MCAs | 33,6                                 | 35,1                 | 33,4                              | 34,1                 |
| Member States with negative MCAs | 61,9                                 | 60,2                 | 62,6                              | 61,8                 |
| Member State with zero MCA       | 4,5                                  | 4,7                  | 4,0                               | 4,1                  |

## ANNEX B

### Statistics

#### I - Statistics by product:

##### 1. Quantities

|                                |                |
|--------------------------------|----------------|
| a) Production                  | Tables 1 - 20  |
| b) Production and availability | Tables 21 - 30 |
| c) Trade                       | Tables 31 - 68 |
| d) Degree of self-supply       | Tables 69 - 74 |

##### 2. Prices

|                                      |                |
|--------------------------------------|----------------|
| a) Market prices/Intervention prices | Tables 75 - 83 |
| b) Producer prices/Prices of inputs  | Tables 84 - 88 |

#### II - General statistics:

|  |                 |
|--|-----------------|
| 1. Production and intermediate consumption | Tables 89 - 94  |
| 2. Trade                                   | Tables 95 - 100 |

---

Products (not all of which are included in each table) are listed in the following order: wheat, rye, barley, maize, sugar, fresh vegetables, fresh fruit, beef and veal, pigmeat, lard, poultrymeat, eggs, milk, butter and cheese. Member States are listed in the usual order: Germany, France, Italy, Netherlands, BLEU, United Kingdom, Ireland and Denmark.

---

Notes. AUA = Agricultural unit of account

n.d. = not available

punctuation of figures follows 'continental' practice

1) Usable production of crops grown for sale as dessert fruit.

2) From 1970 to 1974 without the quantities not harvested; since 1975 including the quantities not harvested

3) Until 1971 total biological production including kitchen gardens. For 1972, the harvested production (including kitchen gardens) of strawberries and citrus fruit, total biological production (including kitchen gardens) of other fruit. For 1973 the harvested production (including kitchen gardens). From 1974, the harvested production not including kitchen gardens

4) Break in method in 1972 and 1973 following the adoption of the concept of "harvested production".
