Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

I. NOTICE

1. Introduction

ECONOMIC AND MONETARY UNION, international negotiations such as the URUGUAY ROUND and the many bilateral contacts between the European Union and the other partner countries make it necessary to provide a geographical breakdown of the current account.

The fact that certain Member States of the European Union have sent revised and better harmonised data, has made it possible to improve the quality and extend the scope of the statistical information given in this publication, on the geographical breakdown of the EU current account.

Contrary to the previous publication, the part concerning the geographical breakdown of the total current account of the European Union with partner countries (one hundred) is not included. This year the data sent by the Member States has been judged insufficient by EUROSTAT, in order to make reliable estimates at the European Union degree.

The publication contains two parts:

- A geographical breakdown of the European Union trade for each major item of the current balance.
- A geographical breakdown of the current account for the EU, its Member States, the European Union Institutions, the USA and Japan with the major economic zones and some individual countries (the levels of detail being different depending on the declaring country).

2. The Current Balance

The balance of payments records, for a given period and country, all the transactions which have taken place between residents and non-residents.

Each transaction is recorded under the double balance system, i.e., an identical amount appears with opposing signs.

The balance of payments may be subdivided into two parts:

- the balance on current account;
- the balance on capital account (which records changes in claims and liabilities vis-à-vis the rest of the world).

The concept of the current account balance as presented in this study, is in accordance with the IMF recommendations given in the "Balance of Payments Manual" (IMF, 4th edition, 1977).

3. Definitions of the items

These definitions are in accordance with the Eurostat scheme.

- Merchandises

This item includes all movable property, the ownership of which is transferred from a resident to a non-resident or vice versa. According to the IMF recommendations, these figures should be based on customs data. These data are cif/fob. Corrections are made to obtain fob/fob data: cif contracts include flows relating to the transport and insurance of the merchandise, which must be reclassified under the corresponding services.

Certain transactions are not recorded by the customs authorities since no border is crossed (ships, aircraft, etc.). These therefore need to be identified and added to the merchandise item. Other flows are recorded by the customs authorities when the border is crossed but do not result in a change of ownership. These flows should be identified and subtracted from the merchandise item.

- Services

Transactions relating to transport, tourism and other services of any kind.

- Transport

Transport services comprise three main categories: international freight transport, international passenger transport and auxiliary services.

Auxiliary services include all types of port services (handling, storage, etc.) and hiring of vehicles/vessels with crews.

Eurostat has statistics on sea freight and air freight, and passenger transport by sea and by air. Other forms of transport (road, rail, space, etc.) are aggregated with auxiliary services under the "other transport" item.

This publication presents informations limited to the transport item.

- Tourism

The debit side of the tourism item comprises expenditure (leisure, work, health, study...) by residents living abroad for one year or more. This is referred to as "tourist expenditure". The credit side includes purchases of the same type made by foreign travellers on the national territory. These are referred to as "tourist revenue".

International transport costs to the destination are recorded under the heading "transport", but all movement within the country, and cruises, are entered under "tourism".

- Other services

This item comprises all trade in services other than tourism, and transport. It covers highly varied sectors such as insurances, trade earnings, banking, advertising, business services, construction services, communication services, fees and royalties for films and TV broadcasts, income from patents, and miscellaneous services in a residual sub-item. In this publication, only statistical informations concerning the global item other services, are given.

- Investment income

This item comprises the interest and dividends on direct and portfolio investments and loans. Because of the lack of available data, profits that have been reinvested have been subtracted from investment income.

- Labour income

This item mainly contains the wages of cross-border and seasonal workers.

- Government transactions

This item comprises transactions concerning official bodies abroad (embassies, consulates, military establishments, etc.) and joint military organisations (such as NATO).

- Unrequited transfers

This comprises transfers of private funds (by emigrant workers to their country of origin, or migrants to their country of destination, etc.) and official unrequited transfers (subscription to international organisations, public development aid, gifts, pension payments, etc.).

- Other not allocated

This is an item of adjustment of the french balance of payment headed "other goods and services". That is an item of reconciliation between statistics of external trade and statistics based on transactions.

4. Calculating the European Union current balance.

The current balance accounts given in this document are Eurostat's estimates made on the basis of the balances published by the Member States.

These balances have been corrected to ensure harmonisation and certain missing data have been estimated (see methodology).

The estimates for the balance EUR12 current account correspond to the sum of the estimates for the 11 current account balances of the 12 Member States (Belgium and Luxembourg produce a joint balance). Added is the balance of the European Union Institutions.

The current transactions of the Member States are broken down geographically between intra-EUR12 and extra-EUR12. The latter component is then broken down by countries and geographic or economic zones. Allocating the transactions to the appropriate partner is done according to the criterion of residence of that partner.

To analyse the European Union's trade with the rest of the world, all intra-EU flows must be deducted and only extra-EU flows taken into account.

5. Geographical breakdown

Calculating the geographical breakdown of the European Union's current balance presents several problems of coverage and quality. Precise information on the residence of partners is not always available. The criteria for identifying the partner for certain current transactions may sometimes be insufficient (breakdown of flows in line with the currency used for settlement, for example).

That part of the current balance which poses most difficulty is the "invisibles" (all the services, income from labour, income from investment, government transactions and unilateral transfers). The multiplicity and complexity of a major part of these flows make the statistical apparatus less reliable to record and assess them properly. This is perfectly illustrated by "investment income" as the increasing complexity of transnational financial dealings makes it very difficult to assess.

On the other hand, trade in goods can be illustrated much more reliably, thanks to the availability of quite detailed customs records which facilitate assessment of the trade and determination of the partners.

6. Conclusion

It is thus better to pay better attention to structures than to amounts, to trends rather than to absolute values, and to cover ratios rather than balances (the value of balances by partner country being less very meaningful).

BLEU : Belgo-Luxemburg Economic Union

DK : Denmark

DE : Germany

GR : Greece

ES : Spain

FR : France

IR : Ireland

IT : Italy

NL : Netherlands

PO : Portugal

UK : United Kingdom

EI : European Institutions

Note "Asymmetries" :

The balance between the European Union and intra-EUR12 should be nihil. The amounts corresponding to net represent intra-Community asymmetries

Note "Items" :

The item "Not allocated services" exists only in the French current balance. The corresponding amounts for EUR12 are therefore the same as for France.

For the following partner zones: "Class I", "Other industrial countries", "Class II", "ACP", "Other developing countries" and "Class III" and for 1992, the "Other not allocated" item has been estimated by Eurostat.

III. METHODOLOGY

1. General methodological approach

1.1 Harmonisation

Most of the corrections affecting methodology made by the Member States appeared in the study "International trade in services - EUR12 from 1983 to 1992", where they are given with rather more detail. The only ones included here are those with an effect on the assessment of the extra-European Union flows which must be broken down.

1.2 Breakdown by partner zones

On this subject, the Member States provided somewhat dissimilar information with respect to both quantity and quality.

The overall rule which was observed in the entire study was thus to preserve consistency with the EUROSTAT estimates of extra-European Union flows which were published in the study "International trade in services - EUR12 from 1983 to 1992".

In addition, certain missing partner zones have been reconstituted, either from details provided in the questionnaire for the country making up these zones or from the complementary questionnaire.

The whole set of raw data obtained from the Member States is nevertheless generally sufficient to arrive at correct estimates. Certain countries have their breakdown by partner zones restricted to a division between intra and extra-EU flows: this is the case with Denmark and Greece. This is also the only breakdown effected for USA and Japan. For Ireland only the figures corresponding with its current account with the world are available and published.

2. Details of transactions for each declaring country

B.L.E.U.

The National Bank of Belgium has sent revisions for the period 1987 to 1992 in millions BF. This improves the precision of aggregates on items and partner zones in comparison with the previous publication. The proportion of data without geographical breakdown is small for this period. These new data have served as a basis for distributing the data without geographical breakdown in the items "merchandise", "transport", "invest-

ment income" and "miscellaneous services". For these items, the flows for 1987 to 1992 which have not been broken down geographically have been reallocated over these items on a pro rata basis as a function of a known geographical breakdown of intra and extra-EU data. From 1983 to 1986, the non-broken-down flows were greater and have been reallocated in line with the geographical breakdown for 1987 to 1992, between intra and extra-EU but not between detailed partner zones.

From 1987 to 1992 the BLEU has provided a geographical breakdown with about 200 countries. Regrouping by zones has been made.

Other services

From 1987 to 1992, the geographical breakdown of the merchanting (net accounting) was estimated in proportion to the breakdown of other intra- and extra-EU services. From 1983 to 1986, the geographical breakdown of the merchanting was estimated in line with the average breakdown of other services between the intra- and extra-EU, calculated for the period 1987-1992.

Labour Income

This item included pensions from 1983 to 1986 which were estimated in proportion to the period 1987-1992. Pensions have therefore been deducted.

Unilateral transfers

From 1983 to 1986, pensions estimated in line with data for the period 1987-1992 were reclassified under transfers in conformity with the methodology applied from 1987.

DENMARK

Denmark's central statistical office, "Danmarks Statistik", submits revised data each year, usually relating to a period of two years. Eurostat has received revised data from 1990 to 1992.

Denmark has provided a detailed geographical breakdown by zones, but according to his request only the intra and extra-EU breakdown is published.

Other services

Insurance flows are recorded gross and a coefficient is applied to obtain net values while retaining the balance.

The merchanting item is recorded on a net basis. All the debits are nil, and only the net (reaffected in credit) with the world is considered exact. So between 1983 and 1992 the geographical breakdown of the world balance of merchanting is calculated pro rata on the basis of the gross credit (total value of transactions).

GERMANY

Each year, The Bundesbank submits revised data on several years.

A detailed geographical breakdown by partner zones has been carried out for Germany between 1987 and 1992.

Other services

For insurance, data are recorded gross, with a breakdown into premiums and indemnities. The data recorded are then adjusted to obtain net figures. On the credit side the premiums received by residents, minus the indemnities paid by residents, are shown. The debit side shows the premiums paid by residents minus indemnities received by residents. The flows are therefore reduced, but the balance does not change.

Investment income

Reinvested profits have been subtracted from "investment income".

GREECE

The National Bank of Greece provides figures in dollars each year.

Lack of data made it impossible to produce a detailed geographical breakdown, and the information is therefore restricted to the intra and extra-European Union headings.

Merchandise

Greece uses settlements to establish the "merchandise" item. No corrections have been made.

Transport

The Greek information does not fully correspond to the IMF recommendations. The transport account was reconstituted from partner data. The intra-Union transport flows correspond to the transport flows of the other Member States vis-à-vis Greece. The flows vis-à-vis the total (intra + extra) were extrapolated in the total/intra proportion of the other Member States.

Tourism

Greek credits are under evaluated in comparison with its partner debits. The figures have been replaced for the intra by data from the other Member States. The credits vis-à-vis the total (intra + extra) were extrapolated in the total/intra proportion of the other Member States.

Other services

The other services were reconstituted for the intra-Union part from partner data. The flows vis-à-vis the total (intra + extra) were extrapolated in the total/intra proportion of the other Member States. The distribution over the sub-items of other services was estimated in line with the structure of the other Member States to calculate the EUR12 aggregate.

Labour income

From 1983 to 1991 part of the debits items corresponds to services. The amounts of these services, estimated with the aid of partner data, have been deducted from labour income.

Unilateral transfers

From 1983 to 1991 unilateral transfers vis-à-vis the BLEU and European Union Institutions have been replaced by the corresponding data taken from the balance of payments of European Union Institutions established by EUROSTAT.

SPAIN

The National Bank of Spain generally sends revised data covering two years. In its most recent publications certain items have been revised for a longer period; these have not been taken into account in this publication. The flows with the European Union Institutions

cannot be detected for certain years and are probably included under the extra-EU heading. Corrections have been made to unilateral transfers and investment income, this affecting the intra-balance. No correction has been made, however, for the other items.

The zones "Class 2", "ACP", "Other developing countries" and "Class 3" have been reconstituted, thanks to the complementarity of several questionnaires. A detailed breakdown by partner zones has been effected for Spain. From 1991 to 1992, the following countries have not been discerned: Malta, Gibraltar, Vietnam, Mongolia, Cuba, Laos, Kampuchea and North Korea. They have been classified in "Other developing countries". The error made by this classification is not important for the geographical breakdown.

Investment income

From 1991 to 1992, flows with the European Union Institutions were not identified and were not taken into account in the intra-EU geographical breakdown. For the years 1991 and 1992, the non-broken-down flows were reclassified as intra-EU flows.

Unilateral transfers

The flows with the European Union Institutions are not identified from 1989-1992 and are not taken into account in the intra-Union geographical breakdown. From 1989 to 1992, the non-broken-down flows were reclassified as intra-Union flows.

FRANCE

The National Bank of France does not send revised data to EUROSTAT.

A detailed breakdown by partner zones has been carried out for France.

For 1992, the geographical breakdown is less complete because of the changes due to the implementation of the new questionnaire.

Two classification changes have occurred in the French system, the first in 1982-1983 and the second in 1988. The methodological change of 1988 causes breaks in the series which have been attenuated by back-extrapolation carried out by EUROSTAT, the basic principle being to use a single correspondence between the EUROSTAT and French classification for the entire period 1983-1992. For this purpose, data from the French publications for 1991 were used.

For 1992 accrued coupons are not included in the current account. For the current year, the geographical breakdown is not complete due to the new level of geographical breakdown which is not included in this publication. Some estimates based on settlements have been done to calculate EUR12. These estimates are not included in tables relating to France.

Merchandise

From 1983 to 1987 the item "merchandise" corresponds entirely with the same item in the French classification. From 1988 to 1992, part of the item "international merchanting" of the French system is included in the EUROSTAT heading "merchandise". No correction has been made for the years 1983-1987, "international merchanting" being included entirely under the EUROSTAT heading "merchanting".

Transport

From 1983 to 1987, a part of the "accessory costs of merchandise" in the French classification were included in the various "transport" sub-items in the data transmitted to EUROSTAT. From 1988 to 1992, France no longer included these under "transport", but they are to be found in the EUROSTAT heading "other services". For the years 1983 to 1987, corrections have, therefore, been made to the data transmitted in order to reclassify "accessory costs of merchandise" and render the EUROSTAT item "transport" equal overall with the French items "maritime transport" and "other transport" for the entire period.

The geographical breakdown of the corrected data between intra- and extra-Union is in line with the geographical breakdown of the old data for the period 1983-1987.

Other services

From 1983 to 1987, the "merchanting" item published by EUROSTAT (as a balance only) corresponds entirely to the "international merchanting" of the French system. From 1988 to 1992, it only includes parts: the National Bank of France has, in fact, redistributed its "international merchanting", one part being included in the EUROSTAT item "merchandise", the other part accounted for in net terms under the EUROSTAT item "other services". It has not been possible to correct this break in the series in 1988 for the items "merchandise" and "merchanting".

Investment income

For 1992 this item does not include accrued coupons.

IRELAND

Eurostat has received annual figures for the current account between Ireland and the World (total intra-EU and extra-EU) for the entire period from 1983 to 1992. Only these figures are published. Estimates were made in order to calculate the EUR12 aggregate.

Labour income

Labour income was estimated on the basis of the structure in the other Member States for the calculation of the EUR 12 aggregate. These amounts are not shown in the tables regarding Ireland.

ITALY

Italy has carried out estimates by partner zones.

The "Ufficio Italiano dei Cambi" sends data each year, and no revisions are made. The geographical breakdown of services is inadequate; a large part is not allocated geographically and one part of the transactions of these services is probably carried out with other European countries; a comparison of the Italian data with the bilateral data of the other Member States with Italy provides evidence for this. However, Italy has introduced a new system, the first results of which have been published in December 1992. These show a geographical breakdown of services with the other Member States which is more consistent. It has therefore been decided to use the available intra/world proportions recorded over the four months from December 1992 to March 1993. This was made in order to correct the intra-/extra-Union breakdown for services and investment income for the years 1983 to 1991. These data are taken from the monthly publication "Bolletino Statistico - Statistiche analitiche valutarie" issued by the UIC.

For 1992 data are provisional, geographical breakdown is based on settlements. Series breaks are due to changes in the Italian methodology.

NETHERLANDS

The National Bank of Netherlands sends, each year, revised data for several years.

The Netherlands have made detailed estimates by partner zones.

Other services

The merchanting is recorded on a net basis. All the debits are nil, and only the net (reaffected in credit) with the world is considered exact. So between 1983 and 1992 the geographical breakdown of the world balance of merchanting is therefore calculated pro rata on the basis of the gross credit (total value of transactions).

Government transactions

The item "Government transactions" is not present in the balance of payments for the European Institutions, so to increase the cohesion, the flows with them are reclassified in the item "miscellaneous services".

PORTUGAL

The National Bank of Portugal sends each year, data for one year, but only for the main items and no revisions are made. Portugal has made a detailed estimate by partner zones.

Transports

The National Bank of Portugal does not have data broken down between sea and air. The breakdown between sea and air for freight and passenger transport has been calculated on the basis of the structure in the Member States which presents data this way.

Other services

Concerning the insurances, the National Bank of Portugal does not have detailed data on premiums and indemnities. The data received are gross. A standard credit-reduction coefficient has been applied and the debits calculated in order to retain the balance.

UNITED KINGDOM

The CSO has made a detailed estimate by partner zones.

Each year, the Central Statistical Office sends revised data, usually relating to a period of two years. For this year, it has supplied data for the entire period from 1983 to 1992 consistent with the Pink Book 1993, and reclassified in the EUROSTAT nomenclature.

Investment income

This item has not been revised.

Re-invested profits have been subtracted from investment income.

Labour income

In the absence of data, the flows were estimated on the basis of partners' data in order to calculate the EUR12 aggregate. The estimated amounts were subtracted from the "miscellaneous services" item. These estimates are not included in the tables for the United Kingdom.

EUROPEAN UNION INSTITUTIONS

The EUROSTAT unit "Balance of payments" has provided estimates for the entire period 1983-1992, and no correction has been carried out.

EUR12

The EUR12 aggregate represents the sum of the flows of all the Member States plus the European Union Institutions. Calculating the EUR12, all the items estimated with the aid of the structure of those Member States having complete data are taken into account.

In the tables with EUR12 as declarant, the net amounts for intra-EUR12 correspond to the intra-European Union asymmetry.

UNITED STATES

It is not possible to provide a geographical breakdown by partner zones, because the data are insufficient; only an intra- and extra-European Union breakdown is therefore made.

For "transport", "travel" and "other services" and detailed items data source is the publication entitled "Survey of current business June 1993". From 1986 to 1992 the US Department of Commerce has sent revised data with a geographical breakdown of the main items, (merchandise, government transactions, investment income, unrequited transfers). The data source for "reinvested earnings" is "Survey of current business". Complementary data has been included from OECD and IMF for 1983 to 1985 and labour income.

Investment income

Reinvested profits have been excluded.

Unilateral transfers

The Unilateral transfers are recorded in net terms.

JAPAN

The data are taken from publications of the "Bank of Japan". These were expressed in dollars and have been converted into ECU. The breakdown of the Japanese current account is limited to intra and extra-European Union.

GEOGRAPHICAL CLASSIFICATION

Since July 1990, Germany's statistics include the former GDR.

By convention, "Total" is the sum of the two zones, intra-EUR12 and extra-EUR12.

The Class II total does not correspond exactly to the sum of the three sub-zones OPEC + ACP + Other Developing Countries, since Nigeria and Gabon belong both to the OPEC and the ACP.

European Commission

Geographical breakdown of the current account – EUR 12 1983 to 1992

Luxembourg: Office for Official Publications of the European Communities

1994 – 170 pp. – 21.0 x 29.7 cm

Theme 6: External trade and balance of payments

Series D: Studies and analyses

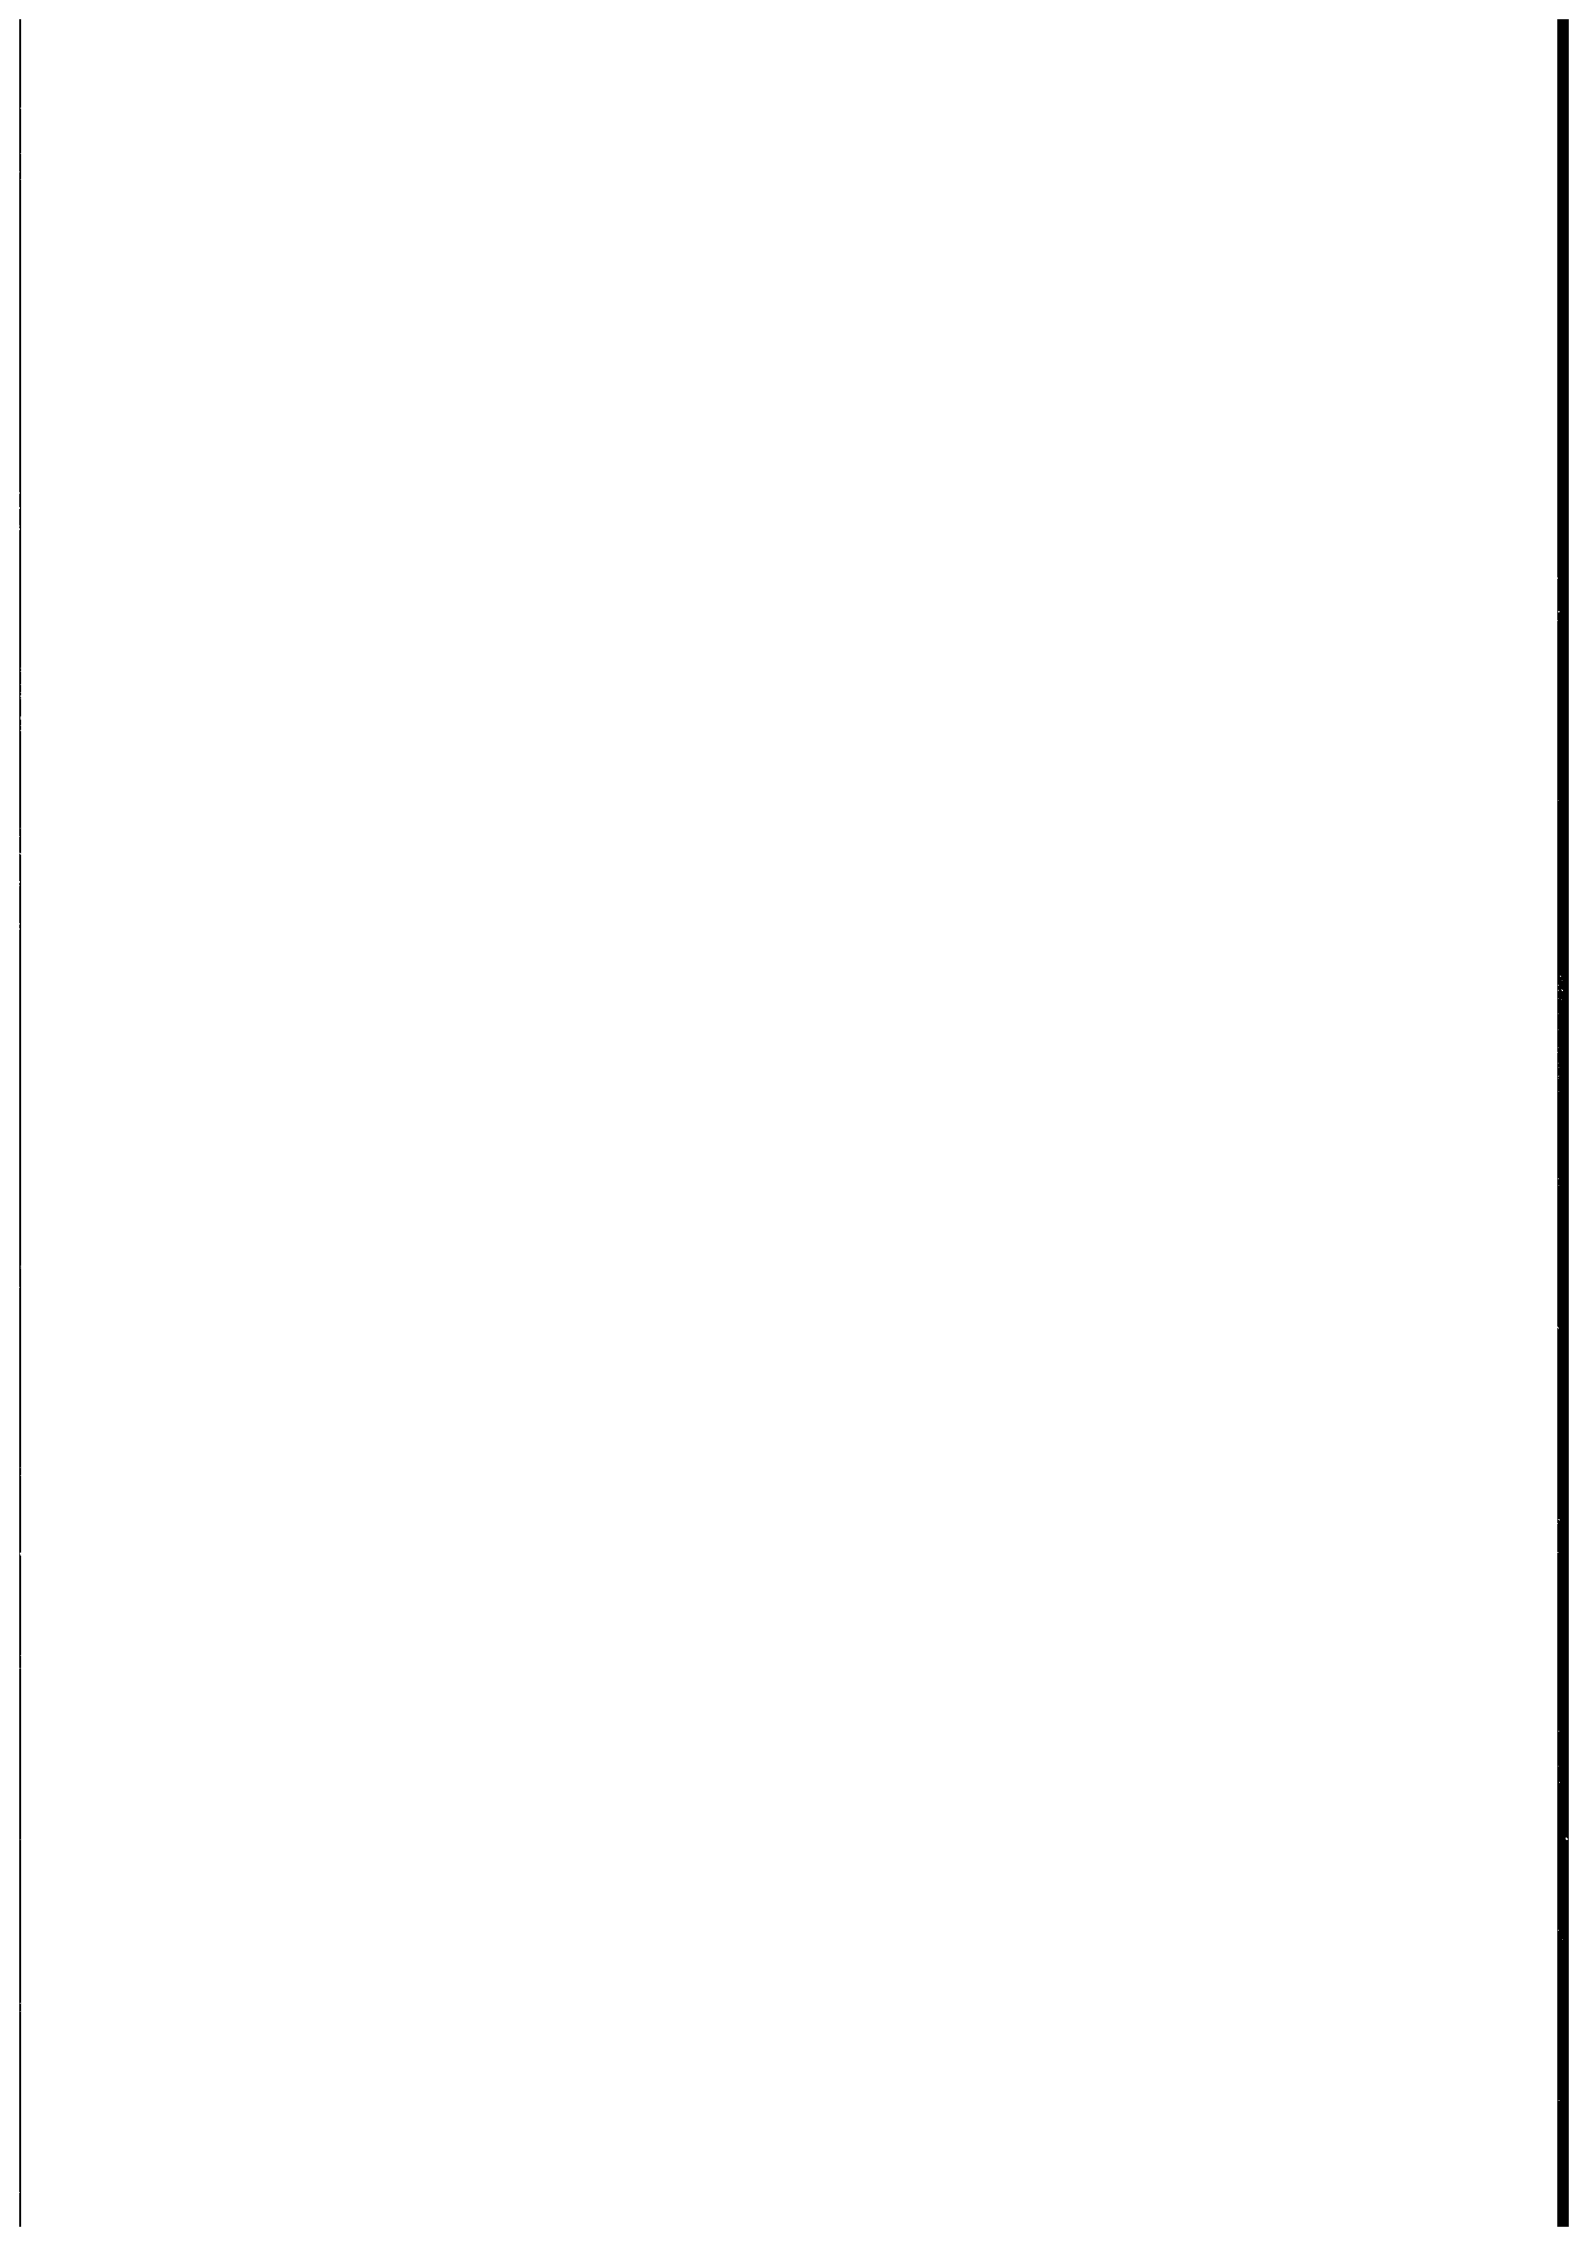

ISBN 92-826-8690-6

Price (excluding VAT) in Luxembourg: ECU 25

This document presents statistics on the geographical breakdown of the current account of the European Union (EUR 12) and its Member States for the period from 1983 to 1992. These figures are estimates calculated from balance-of-payments data.

Two levels of geographical breakdown are used in this publication.

- (i) A breakdown of the total current account between intra- and extra-EUR 12.
- (ii) A breakdown of extra-EUR 12 into zones (USA, Japan, EFTA, other industrial countries, OPEC, ACP, other developing countries, former State-trading countries).
