Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

I. NOTICE

1. Introduction

Economic and Monetary Union, bilateral and multilateral negotiations such as the "Uruguay Round", or in the framework of the World Trade Organisation, and the many relations between the European Union and its partners give high priority to statistical information on the geographical breakdown of its current account.

The fact that certain Member States of the European Union have sent revised and better harmonised data, has made possible relative improvements in the quality and scope of the statistical information given in this publication.

For the same reasons mentioned in the previous publication covering the period 1983-1992, the part concerning the geographical breakdown of the total current account of the European Union with partner countries (one hundred) is not included. In this area, the data sent by the Member States has been judged insufficient by Eurostat in order to make reliable estimates at European Union level.

This publication covers the period 1984-1993 and contains two parts:

- A geographical breakdown of European Union trade for each major item of the current balance: *merchandise, services* (including *transport, travel, other services*), *investment income, labour income, unrequited transfers, government transactions*, and the *total current account*.
- A geographical breakdown of the current account for the European Union, its Member States and the European Union Institutions with the major economic zones and some individual countries. The maximum level of detail is given for the following partners: *World Total (Intra + Extra-EUR12), Intra-EUR12, Extra-EUR12, Class I* made up of the *Industrialised countries* (including *Japan, USA, EFTA, and Other industrialised countries*), *Class II* made up of *Developing countries* (including *ACP, OPEC, and Other developing countries*), *Class III* which corresponds to the *Former State-trading countries*, and finally the *International Organisations*. *Japan and USA* also appear in the publication as declaring countries to allow comparability with European Union current flows.

Revisions have been made regarding the figures in the previous publication "Geographical breakdown of the current account EUR12, 1983-1992".

Eurostat also produces another publication on current trade: "International trade in services EUR12, 1984-

1993". This publication includes a higher level of detail on service items, but the geographical breakdown is limited to the Total (Intra + Extra-EUR12), Intra-EUR12, and Extra-EUR12.

2. The Current Balance

The balance of payments records, for a given period and country, all the transactions which have taken place between residents and non-residents. Each transaction is recorded under the double accounting system, i.e., an identical amount appears with opposing signs.

A *transaction* is an economic flow that reflects the creation, transformation, exchange, transfer, or extinction of an economic value and involves changes in ownership of goods, and/or financial assets, the provision of services, or the provision of labour and capital.

The *concept of resident* is like the one used in national accounts. It is based neither on nationality nor on legal criteria, but rather on the notion of center of economic interest. An institutional unit is a resident unit when its center of economic interest is in the economic territory of a country for a period of at least one year.

The balance of payments may be subdivided into two parts:

- the current balance (object of the present publication).
- the capital balance. It records changes in claims and liabilities vis-à-vis the rest of the World.

The concept of the current account balance as presented in this study, is in accordance with the IMF recommendations given in the "Balance of Payments Manual" (IMF, 4th edition, 1977).

The 5th edition of the "Balance of Payments Manual" will be applied to the 1994 data. In consequence Eurostat has established a questionnaire asking for data consistent with the new recommendations. A new publication will present the outcome in 1996.

3. Definitions of the items

These definitions represent the theoretical content of the items and are in accordance with the Eurostat scheme.

Merchandise

This item includes all movable property, the ownership of which is transferred from a resident to a non-resident or vice versa. According to the IMF recommendations, these figures should be based on customs data. These data are *cif/fob*. Corrections are made to obtain *fob/fob* data: *cif* contracts include flows relating to the transport and insurance of the merchandise, which must be reclassified under the corresponding services.

Certain transactions are not recorded by the customs authorities since no border is crossed (ships, aircraft, etc.). These therefore need to be identified and added to the "Merchandise" item. Other flows are recorded by the customs authorities when the border is crossed but do not result in a change of ownership. These flows should be identified and subtracted from the *merchandise* item.

Services

They regroup three main items: *transport*, *travel*, and *other services*.

Transport

Transport services comprise three main categories: *international freight transport*, *international passenger transport* and *auxiliary services*.

Auxiliary services include all types of port services (handling, storage, etc.) and the hiring of vehicles/vessels together with crews.

Eurostat has statistics on *sea freight and air freight and passenger transport by sea and by air*. Other forms of transport (road, rail, space, etc.) are aggregated with auxiliary services under the *other transport* item. This publication presents information limited to the *transport* item.

Travel

The debit side of the *travel* item comprises expenditure (leisure, work, health, study...) by residents living abroad for less than one year. This is referred to as "Tourist expenditure". The credit side includes purchases of the same type made by foreign travellers on the national territory. These are referred to as "Tourist revenue".

International transport costs to the destination are recorded under the heading *transport*, but all movement within the country, and cruises, are entered under *travel*.

Other services

This item comprises all trade in services other than tourism, and transport. It covers highly varied sectors such as *insurance* (including *insurance on transport*), *trade earnings*, *banking*, *advertising*, *business services*, *construction services*, *communication services*, *fees and royalties for films and TV broadcasts*, *income from patents*, and *miscellaneous services* in a residual sub-item. In this publication, only statistical information concerning the global item *other services*, are given.

Investment income

This item comprises interest and dividends on direct and portfolio investments and on loans. Because of the lack of available data, profits that have been reinvested have been subtracted from investment income.

Labour income

This item mainly contains the wages of cross-border and seasonal workers.

Government transactions

This item comprises transactions concerning official bodies abroad (embassies, consulates, military establishments, etc.) and joint military organisations (such as NATO).

Unrequited transfers

This comprises transfers of private funds (by emigrant workers to their country of origin, or migrants to their country of destination, etc.) and official unrequited transfers (subscription to international organisations, public development aid, gifts, pension payments, etc.).

Other not allocated

This item contains only the balancing item in the French balance of payments entitled "Other goods and services". This is a reconciliation item between the external trade statistics and the settlements statistics.

4. Calculation of the European Union current account balance.

The EUR12 current balance estimates correspond to the sum of the estimates for the 11 current balances of the 12 Member States (Belgium and Luxembourg produce a joint balance). Added is the balance of the European Union Institutions.

The Member States current account balances are broken down geographically between Intra-EUR12 and Extra-EUR12. The latter component is then broken down by countries and geographic or economic zones. Allocating the transactions to the appropriate partner is done according to the criterion of residence of that partner.

To analyse the European Union's current flows (credits and debits) with the rest of the World, all Intra-EUR12 corresponding flows must be deducted and only Extra-EUR12 flows taken into account. On the other hand the net balance between EUR12 and the Total (Intra +

Extra-EUR12) is more relevant to analyse the net balances of current trade between EUR12 and the rest of the World.

5. Remark

Calculating the geographical breakdown of the European Union's current balance presents several problems of coverage and quality. Precise information on the residence of partners is not always available. The criteria for identifying the partner for certain current transactions may sometimes be insufficient (breakdown of flows in line with the currency used for settlement, for example).

It is thus better to pay more attention to structures than to amounts, to trends rather than to absolute values, and to cover ratios rather than balances (the value of balances by partner country being less meaningful).

6. Partner zones published by compiling economy

I : Italy

NL : Netherlands

P : Portugal

UK : United Kingdom

EI : European Union Institutions

Net = Credit - Debit

Cover ratio = 100 X (Credit / Debit)

Asymmetry= [Credit EUR12 with Intra-EUR12] - [Debit EUR12 with Intra-EUR12]

Relative asymmetry = 100 X Asymmetry / [0.5 X (Credit EUR 12 with Intra-EUR12 + Debit EUR12 with Intra-EUR12)]

Cover ratio of EUR12 with Extra-EUR12 = 100 X [Credit EUR12 with Extra-EUR12 + (0.5 X Asymmetry)]

/ [Debit EUR12 with Extra-EUR12 - (0.5 X Asymmetry)]

In tables: "NA" - not available; "-" not relevant.

Note "Asymmetries" :

The balance between the European Union and Intra-EUR12 should be nihil. The amounts corresponding to net represent Intra-EUR12 asymmetries

Note "Items" :

The item "Not allocated services" exists only in the French current balance. The corresponding amounts for EUR12 are therefore the same as for France.

III. METHODOLOGY

1. Production process

Each year, the national banks, or the central statistical offices provide Eurostat with current account balance data using a common questionnaire. The data (generally in national currency and nomenclature) are recorded and checked. Afterwards they are harmonised according to Eurostat nomenclature. Incorrect data are corrected and missing data are estimated (see methodology). The tables resulting from harmonisation, correction and estimation are checked a second time. They are then sent to Member States, both in national currency and in ecus, to have their accord before publication. In case of divergences, original data revision, or mistakes, Eurostat updates the tables in question. Once this stage is over, the current account balances of the different Member States are converted in ecus and aggregated to obtain the current balance of the European Union.

2. General methodological approach

2.1. Harmonisation, correction and estimation

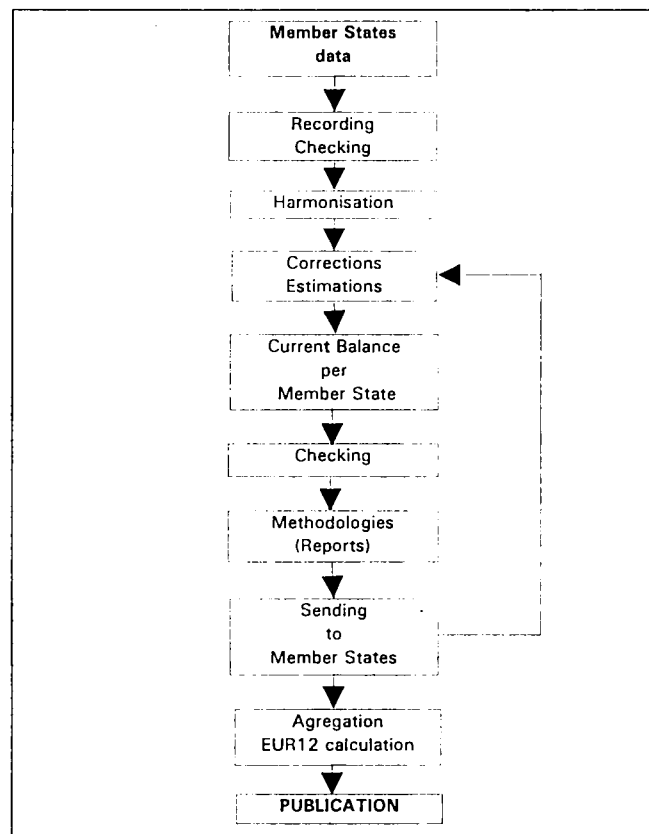

Most modifications concerning the methodology of the Member States appeared in the study "International trade in services - EUR12 from 1984 to 1993". This publication explains with rather more detail the methods of harmonisation, correction, and estimation of current account flows. The only ones described here, are those which have an effect on the evaluation of the main items of the current account balance included in this publication, and those affecting the assessment of the geographical breakdown current account flows.

2.2. Breakdown by partner zones

On this subject, Member States provided somewhat dissimilar information with respect to both quantity and quality.

The overall rule which was observed in the entire study was to preserve consistency with the EUROSTAT current flows estimates concerning partners World Total (Intra + Extra-EUR12), Intra-EUR12 and Extra-EUR12 which were published in the study "International trade in services - EUR12 from 1984 to 1993".

In addition, certain missing partner zones have been reconstituted by different methods.

- Reconstitution from details provided in the questionnaire for countries making up the missing zones - (this is the most frequent case).
- Reconstitution from available data, either from other Eurostat Balance of Payments questionnaires, or from previous series, or still from subsequent series. In this last case, Eurostat generally extrapolates the previous series, or retro-polates the subsequent series.
- Reconstitution from data available in other Member States.
- Reconstitution from data available in national publications.
- Reconstitution from data available in international publications: Eurostat (complementary sources such as external trade), OECD, IMF, WTO...

The whole set of raw data obtained from the Member States is nevertheless largely sufficient to obtain correct estimates. Certain countries have their breakdown by partner zones restricted to a division between Intra-EUR12 and Extra-EUR12 flows: this is the case of Denmark and Greece. On the other hand, Ireland has only provided its current account balance with the World Total (Intra + Extra-EUR12), and thus only this table is published. Besides, USA and Japan's current account data are only broken-down between Intra and Extra-EUR12.

3. Details of transactions for each declaring country

B.L.E.U.

From 1984 to 1986, there are a lot of missing data and the data not broken-down geographically are considerable. For these years, data from the monthly publication of the National Bank of Belgium are used together with OECD data.

From 1987 to 1993, data are more comprehensive.

Flows not broken-down geographically.

From 1987 to 1992, the flows that had not been broken-down geographically are reallocated on a pro rata basis as a function of a known geographical breakdown structure of Intra and Extra-EUR12 data. This concerns the items: "Merchandise", "Transport", "Travel", "Investment income" and "Other services".

For the items: "Income from patents" and "Other private unrequited transfers", the flows not broken-down geographically are reallocated to Intra-EUR12, for reasons of consistency.

From 1984 to 1986, the flows not broken-down geographically are reallocated on a pro rata basis as a function of the 1987-1992 geographical breakdown structure of Intra and Extra-EUR12 data. This concerns the items "Merchandise", "Transport", "Travel", "Investment income" and "Unrequited transfers".

Other services

Insurance

The National Bank of Belgium does not have detailed data on premiums and claims. The data received are gross: credits representing premiums paid by non-residents and claims received by residents. A flat-rate reduction coefficient is applied to the credits, and the debits are calculated in order to maintain the balance.

Merchanting

From 1987 to 1993, the geographical breakdown of "Merchanting" (net) is estimated pro rata on the basis of the breakdown of "Other services" between Intra and Extra-EUR12. From 1984 to 1986, it was estimated pro rata with the average breakdown of "Other services" between Intra and Extra-EUR12 calculated for the period 1987 to 1992.

Labour income

From 1984 to 1986, labour income included pensions, these are estimated pro rata on the basis of data for the period 1987 to 1992. Pensions are subtracted from labour income and included under transfers.

Unrequited transfers

From 1984 to 1986, the pensions estimated pro rata on the basis of the data for the period 1987 to 1991 are reclassified under transfers, in accordance with the methodology applied from 1987 onwards.

DENMARK

Denmark's central statistical office "Danmark's Statistik" usually sends revised data for two years. Eurostat has received this year in addition to 1993 data, revised data for 1991 and 1992.

Denmark has provided a detailed geographical breakdown of its current account. According to its request, as in previous years, only the tables corresponding to its current trade with the World, Intra-EUR12, and Extra-EUR12 are published.

Other services

Insurance flows have been reported gross, a fixed ratio has been applied to obtain net credits. Then, net debits have been recalculated in order to keep the balance of gross data unchanged.

"Merchanting" has been recalculated, because the real value of this service is the profit or loss on the transaction. Eurostat has considered that only the net with the World was accurate. The corresponding amount has been allocated to the credit item of "Merchanting", afterwards it has been broken-down amongst the other partners, following the given geographical breakdown structure of the gross credits. On the other hand, all debits have been set to zero.

Investment income

"Direct investment reinvested earnings" have been subtracted from "Investment income".

GERMANY

The Deutsche Bundesbank provides revised data each year, relating to a period of several years.

Other services

Insurance

Data are recorded gross, with a breakdown into premiums and indemnities. The data recorded are then adjusted to obtain net figures. On the credit side, we have the premiums received by residents, minus the indemnities paid by residents, and on the debit side, the premiums paid by residents minus indemnities received by residents. The flows are therefore reduced, but the balance does not change.

Investment income

Reinvested profits are subtracted from investment income. The flows are therefore reduced and the balance changes.

Government transactions

The item "Government transactions" is not included in the balance of payments of the European Union Institutions. Therefore for consistency reasons, the flows with the European Union Institutions are reclassified under the item "Banking".

GREECE

The National Bank of Greece provides data in US dollars each year. Eurostat has not received data for 1993. Data with the World come from the IMF.

Merchandise

Greece uses settlements to draw up the "Merchandise" item. No corrections have been made.

Transport

Greece's data are drawn up in a way that is far removed from the IMF recommendations. The transport account has been reconstituted on the basis of partners' data. The Intra-EUR12 transport flows correspond to the

transport flows of the other Member States in which Greece was involved. Revisions are due to changes in Italian methodology. The flows involving the Total (Intra plus Extra-EUR12) are extrapolated according to the proportion of the Total in the other Member States accounted for by Intra-EUR12 flows.

Travel

Greece's credits are under evaluated compared to debits of its partners. The figures have been replaced by Intra-EUR12 data of the other Member States. The credit items compared with the Total (Intra plus Extra-EUR12) have been extrapolated according to the proportion of the Total in the other Member States, accounted for by Intra-EUR12 figures.

Other services

Intra-EUR12 "Other services" are reconstituted on the basis of partners' data. The flows compared with the Total (Intra and Extra-EUR12), have been extrapolated on the basis of the proportion of the Total in the other Member States, accounted for by the Intra-EUR12 figures.

SPAIN

The "Banco de España" is the first central bank to send data in electronic format for 1993, in accordance with Eurostat's recommendations. Spain has started applying the IMF 5th manual for 1993 data and prepared for Eurostat data according to the 4th manual. 1993 data have been revised by the Bank of Spain. Unfortunately, Eurostat could not take all these revisions into account due to publication deadline reasons. Only "Merchandise" and "Investment income" have been revised. Corrections have been allocated to Extra-EUR12.

Other services

Insurance

For 1984, for the World and Intra-EUR12, premiums and indemnities are estimated pro rata, on the basis of the years 1985 to 1989.

Data have been recorded gross, with premiums and indemnities shown in detail. The figures have been adjusted to obtain net figures. The credit side shows the premiums received by residents minus indemnities paid by residents. The debit side shows premiums paid by residents, minus indemnities received by residents. Thus the flows are reduced but the balance remains unchanged.

Merchanting

As explained above, the value of service was selected to be the profit on the transaction, i.e. the difference between the purchase price and the resale price.

In addition, in order to allocate this profit unambiguously to a particular geographical area, the final purchaser is taken to be the sole party paying for the service. The geographical breakdown of the balance with the World is therefore calculated pro rata on the basis of the gross credits.

Investment income

From 1991 to 1992, flows with the European Union Institutions were not identified and were not taken into account in the Intra-EUR12 geographical breakdown. For the years 1991 and 1992, the non geographically broken-down flows are reclassified as Intra-EUR12 flows.

Unrequited transfers

From 1989 to 1992, flows with the European Union Institutions were not identified and were not taken into account in the Intra-EUR12 geographical breakdown. For the years 1989 to 1992, the non geographically broken down flows are reclassified as Intra-EUR12 flows.

FRANCE

The National Bank of France does not provide Eurostat with revised data.

A change of methodology has occurred in the French nomenclature in 1988. This change resulted in a new correspondence between French and Eurostat nomenclatures and in discontinuities in the series. From 1984 to 1987, revised data from the 1993 Bank of France publication were used together with 1988 correspondence in order to obtain unbroken series. In addition, estimates were carried out by Eurostat, in order to obtain a full data set.

Merchandise

From 1984 to 1987, the "Merchandise" item corresponds exactly to the "Merchandise" item in the French classification. From 1988 to 1993, part of the "International merchanting" item in the French classification was included in Eurostat's "Merchandise" item. No corrections

were made for the years 1984 to 1987 and "International merchanting" is included entirely under Eurostat's "Merchanting" item.

Transport

Eurostat "Transport" item corresponds to the total of "Sea transport" and "Other transport" in the French classification.

The geographical breakdown of the corrected data is calculated pro rata on the basis of the geographical breakdown of the old data for 1984 to 1987.

No corrections were made for the years 1988 to 1993.

Other services

Insurance

France's data are recorded gross. The credit side contains premiums paid by non-residents and indemnities received by residents. These figures were recalculated net.

From 1984 to 1987, the credit side comprises premiums received minus indemnities paid by residents and the debit side the premiums paid minus indemnities received by non-residents. Thus, the flows are reduced but the balance remained unchanged.

From 1984 to 1987, since there was no detailed breakdown of premiums and indemnities, these were estimated pro rata on the basis of the indemnities for the year 1988. In 1992 and 1993, the data for premiums and indemnities have been estimated pro rata for the period 1988 to 1991.

Merchanting

From 1984 to 1987, the "Merchanting" item published by Eurostat (balance only) corresponded exactly with the "International merchanting" item in the French classification.

From 1988 to 1993, it only included a part, since the National Bank of France had redistributed its "International merchanting" item. A part of it is now listed under Eurostat's "Merchandise" item.

For the entire period 1984 to 1991 the geographical breakdown was made pro rata on the basis of the credit side of the "International merchanting" item in the French classification. This was also the case for 1988 to 1991 when this item did not correspond to the "Merchanting" item published by Eurostat. For 1992 and 1993, the geographical breakdown has been done pro rata on the basis of gross credits corresponding to the Eurostat's "Merchanting" item.

Other not allocated

This item corresponds to the French item "Other goods and services". From 1984 to 1987, the geographical breakdown of this item between Intra-EUR12 and Extra-EUR12 is calculated pro rata on the basis of the geographical breakdown structure of the old data.

Investment income

For 1984 and 1985 data provided by the National Bank of France were used to avoid the discontinuity between 1985 and 1986 series as in the French publication.

From 1988 to 1991, Eurostat has received data for the reinvested profits. These small amounts have been subtracted from the "Investment income" item.

Government transactions

For 1984 and 1985 data provided by the National Bank of France were used to avoid the discontinuity between 1985 and 1986 series as in the French publication. Moreover, from 1984 to 1993 flows with the European Union Institutions are reclassified in Eurostat's item "Miscellaneous services".

IRELAND

Eurostat has only received the current account balance between Ireland and the World Total (Intra-EUR12 + Extra-EUR12) for the period 1984 to 1993, with revised data for 1992 and 1993. There was no information concerning the geographical breakdown.

As in the previous years, only the tables concerning the World are published.

Nevertheless, in order to calculate the EUR12 aggregate, estimates have been carried out to assess the flows with the other missing partners. To calculate all the flows with USA and EUR12, estimates have been carried out extrapolating the geographical breakdown covering the period 1979 - 1984 provided by Ireland. After that, all the flows concerning the other partners have been estimated on the basis of other Member States structure.

ITALY

The "Ufficio Italiano dei Cambi" has submitted 1993 data on floppy disk; no revisions were made.

The geographical breakdown is insufficient.

Data have been reconstituted by Eurostat using the received data and the data included in the publications: "Banca d'Italia, anno 1993. Assemblea generale ordinaria dei partecipanti" and "Ufficio Italiano dei Cambi: Bolletino Statistico - Statistiche analitiche valutarie" (N°2 to N°13).

Merchandise

From 1984 to 1993, flows with the World come from the "Banca d'Italia" publication and the geographical breakdown is estimated pro rata on the basis of the structures of received data and foreign trade data (1984-1991) for EFTA, ACP, Other developing countries. For 1993 credits, foreign trade data were used owing to the considerable credits that were not geographically broken-down.

From 1992 and 1993 the structure of foreign trade data is used for the geographical breakdown within Extra-EUR12.

Transport

From 1984 to 1993, flows of "Transport" item with the World come from "Banca of Italia" publication.

For "Transport", the 1993 geographical breakdown structure corresponding to the item "Trasporti" ("Ufficio Italiano dei Cambi") has been applied to the 1984-1993 flows with the World.

Travel

From 1984 to 1993, flows with the World come from the item "Viaggi all'estero" from the "Banca d'Italia" publication.

The 1993 geographical breakdown structure between Intra and Extra-EUR12 corresponding to the item "Viaggi all'estero" ("Ufficio Italiano dei Cambi") has been applied to the 1984-1993 flows with the World.

Other services

Flows with the World come from the "Banca d'Italia" publication. Insurance claims are subtracted from this item. The geographical breakdown is estimated according to the sub-items.

For the items "Trade services", "Banking", "Services between related companies", "Construction", "Communications", "Income from patents", and "Other miscellaneous services", the 1993 geographical breakdown structure corresponding to the monthly data of the "Ufficio Italiano dei Cambi" has been applied to the 1984-1993 flows with the World.

For the items "Advertising", "Fees and royalties for films and TV broadcasts" and "Insurance", the 1993 geographical breakdown structure corresponding to the received data has been applied to the 1984-1993 flows with the World.

Investment income

From 1984 to 1993, flows with the World come from "Redditi dei fattori da capitale" item of the "Banca d'Italia" publication.

The 1993 geographical breakdown structure corresponding to the received data is applied to the 1984-1993 flows with the World.

Labour income

From 1984 to 1993, flows with the World come from "Redditi dei fattori da lavoro" item of the "Banca d'Italia" publication.

For Intra and Extra-EUR12, the 1993 geographical breakdown structure corresponding to the received data is applied to the 1984-1993 flows with the World.

Government transactions

From 1984 to 1993, flows with the World come from "Servizi per il Governo" item of the "Banca d'Italia" publication.

The geographical breakdown is based on the geographical breakdown structure in other Member States.

Unrequited transfers

From 1984 to 1993, flows with the World come from "Trasferimenti unilaterali" item of the "Banca d'Italia" publication.

The 1993 geographical breakdown structure corresponding to the received data is applied to the 1984-1993 flows with the World.

NETHERLANDS

The "Nederlandsche Bank" has sent data concerning 1993. No revisions have been made on data corresponding to the period 1984-1992.

The geographical breakdown per country and partner zone, is quite detailed. Nevertheless, it was drawn up according to Eurostat new questionnaire.

International Organisations

Flows corresponding to the European Union Institutions have been subtracted from the corresponding amounts in International Organisations. They have been reallocated to Intra-EUR12.

Other developing countries

The flows corresponding to partner Other developing countries, are estimated in 1993, by extrapolating their relative share in the flows with the developing countries zone

Government transactions

The amounts corresponding to the payment by the European Union Institutions for services undertaken by the Netherlands for the collection of their own resources, have been reported under the credit item of "Government transactions". Eurostat has deleted them from this item and has reallocated them to the item "Miscellaneous services".

Other services

"Merchanting" has been recalculated, because the real value of this service is the profit or loss on the transaction. Eurostat has considered that only the net value with the World was accurate. The corresponding amount has been allocated to the credit item of "Merchanting", afterwards it has been reallocated amongst the other partners, following the given geographical breakdown structure of the gross credits. On the other hand, all debits have been set to zero.

The item "Miscellaneous services" has increased by the reallocation of the amounts deducted from the credits of the item "Government transactions". These amounts correspond to the payment by the European Union Institutions for the collection of their own resources. The item has also increased by the reallocation of the amounts corresponding to the sub-items "Processing", and "Repairs".

The "Insurance on transport" has been reported net. Eurostat has allocated these amounts to debits and has set the credits to zero.

PORTUGAL

"Banco de Portugal" has provided 1993 data containing a level of geographical breakdown different with that it has provided in previous years.

Other developing countries

First of all, it was necessary to estimate the flows from 1988 to 1993 with Nigeria and Gabon, which are countries belonging simultaneously to ACP and OPEC. Eurostat has estimated them according to their relative shares in the Developing countries zone during the period 1984-1987. After that, the flows corresponding to the Other developing countries zone were calculated for the period 1988 to 1993 according to the difference between flows with the total Developing countries, and flows with the total [ACP + OPEC - (Nigeria + Gabon)].

International Organisations

The flows corresponding to International Organisations, are estimated in 1993, by extrapolating their relative share in the flows with Extra-EUR12 zone in 1992.

Government transactions

The amounts corresponding to the payment by the European Union Institutions for services undertaken by Portugal for the collection of their own resources, have been reported under the credit item of "Government transactions". Eurostat has deleted them from this item and has reallocated them to the item "Miscellaneous services".

Other services

"Merchanting" has been recalculated, because the real value of this service is the profit or loss on the transaction. Eurostat has considered that only the net with the World was accurate. The corresponding amount has been allocated to the credit item of "Merchanting", afterwards it has been sub-divided amongst the other partners, following the given geographical breakdown structure of the gross credits. On the other hand, all debits have been set to zero.

The item "Miscellaneous services" has increased by the reallocation of the amounts deducted from the credits of the item "Government transactions" corresponding to the payment by the European Union Institutions for the collection of their own resources.

UNITED KINGDOM

Each year, the "Central Statistical Office" sends revised data, usually relating to a period of two years. This year, it has sent data for the entire period 1988 to 1993, with revised figures between 1988 and 1992.

The geographical breakdown level of detail by country and partner zone, is quite satisfactory. Nevertheless, it was drawn up according to Eurostat new questionnaire.

Other developing countries

The flows corresponding to partner Other developing countries, are estimated for the period 1984 to 1987, according to its relative share in the flows with the Extra-EUR12 zone between 1988 and 1993.

International Organisations

The amounts corresponding to the flows with the International Organisations, are estimated for the period 1984 to 1987, according to its relative share in the flows with the Extra-EUR12 zone between 1988 and 1993.

Investment income

Concerning the World Total (Intra-EUR12 + Extra-EUR12), the amounts relative to the items "Investment income" from 1984 to 1987, and "Reinvested profits" from 1984 to 1993 are taken from the "PINK BOOK" 1994 (CSO publication). The geographical breakdown of "Reinvested profits" is calculated according to the geographical breakdown of the item "Investment income". After that, for all levels of geographical breakdown, "Reinvested profits" have been subtracted from "Investment income".

Labour income

The United Kingdom records "Labour income" under "Other services". The corresponding amount is not singled out.

In relation to the World, the item "Labour income" is calculated applying to the item "Other services" a coefficient that is calculated on the basis of the other Member States structure (weight of "Labour income" in relation to "Other services"). The resulting amounts are weighted down by a standard coefficient of reduction, in order to take into account the geographical specificity of the United Kingdom which makes crossborder work less important. Afterwards, the geographical breakdown of

"Labour income" has been calculated on the basis of the geographical breakdown of the item "Miscellaneous services".

Government transactions

The amounts corresponding to the payment by the European Union Institutions for the services undertaken by the United Kingdom for the collection of their own resources, have been reported under the credit item of "Government transactions". Eurostat has deleted them from this item and has reallocated them to the item "Miscellaneous services".

Other services

The item "Miscellaneous services" has increased by the reallocation of the amounts deducted from the credit items of "Government transactions". These amounts correspond to the payment by the European Union Institutions for the collection of their own resources. The item has also increased by the amounts relative to reallocation of the sub-item "Culture". On the other hand the item "Other miscellaneous services" has decreased by the estimated amounts of the item "Labour income".

EUROPEAN UNION INSTITUTIONS

Eurostat's Balance of Payments Unit has provided revised data for the entire period from 1984 to 1993, with a geographical breakdown per partner country. No major corrections has been made on the items; on the other hand, all the geographical and economical zones have been reconstituted by putting together the individual countries which make them up.

EUR12

The EUR12 aggregate represents the sum of the flows of all Member States plus the European Union Institutions.

In calculating the EUR12 aggregate, all the items estimated on the basis of the structure in the Member States with complete data were taken into account.

In the tables with EUR12 as declarant, the net amounts for Intra-EUR12 correspond to the Intra-EUR12 asymmetry.

UNITED STATES

From 1984 to 1993, data come from the American publication "Survey of current business" (SCB). Generally, the main items are published in June, detailed services in September and reinvested earnings in August.

Complementary data have been included from the IMF for 1984 to 1985 and for the item "Labour income".

Geographical breakdown is available from 1986 onwards only. Only the geographical breakdown between Intra and Extra-EUR12 is presented in tables.

Investment income

Reinvested profits have been excluded.

Labour income

This item corresponds to the IMF item "Labour income".

Unrequited transfers

This item corresponds to the "Survey of current business" item "Unilateral transfers, net".

JAPAN

Data are taken from Bank of Japan publications "Monthly balance of payments". In these publications data are expressed in US dollars and have been converted into ecus. The geographical breakdown of the Japanese current account balance is limited to Intra and Extra-EUR12.

Services

The "Bank of Japan" includes "Government transactions", "Investment income", and "Labour income" under the item "Services". For reasons of information availability, Eurostat has subtracted the amounts corresponding to the first two items, but not those relative to "Labour income", because they are scattered amongst the sub-items of the item "Services".

GEOGRAPHICAL CLASSIFICATION

Since July 1990, Germany's statistics include the former GDR.

By convention, "Total" is the sum of the two zones, Intra-EUR12 and Extra-EUR12.

The Extra-EUR12 corresponds to the sum of the Classes I, II and III, the International Organisations, and the "Other not allocated".

The Class II total does not correspond exactly to the sum of the three sub-zones OPEC + ACP + Other Developing Countries, since Nigeria and Gabon belong both to the OPEC and the ACP.

European Commission

Geographical breakdown of the current account — EUR 12, 1984-93

Luxembourg: Office for Official Publications of the European Communities

1995 — 185 pp. — 21 x 29.7 cm

Theme 2: Economy and finance (violet)

Series D: Studies and research

ISBN 92-827-4294-6

Price (excluding VAT) in Luxembourg: ECU 25

This document presents statistics on the geographical breakdown of the current account of the European Union (EUR 12) and its Member States for the period from 1984 to 1993. These figures are estimates calculated from balance of payments data.

Two levels of geographical breakdown are used in this publication:

- (i) a breakdown of the total current account between intra- and extra-EUR 12:
- (ii) a breakdown of extra-EUR 12 into zones (USA, Japan, EFTA, other industrialized countries, OPEC, ACP, other developing countries, former State-trading countries).
