Balance of payments  
of the  
European Union  
Institutions

2001 Edition

**Balance of payments  
of the  
European Union  
Institutions**

**2001 Edition**

**Note to readers**

To make this publication more interesting and user-friendly, we have paid great attention to your needs as users. Please let us have your comments and reactions, positive or negative, as this will help us in our efforts to improve our product.

This publication constitutes the final report of the study conducted by Mr Richard MICHEL for Eurostat's "Balance of payments" unit under the co-ordination of Mr Stelios PANTAZIDIS, administrator in unit B5 of Eurostat.

# INTRODUCTION

## Definitions

The definitions given here conform to the manuals of the IMF and of the European System of Integrated Economic Accounts (ESA), since these two documents refer explicitly to the same concepts in the United Nations System of National Accounts (SNA).

## The territory of the institutions

The activity of the European Union Institutions is defined with reference to an economic territory in which the resident entities carry out a lasting and ongoing activity. This continuity is generally reflected in the ownership or long-term rental of buildings. The temporary activity of officials of the European Union Institutions on mission in a country is therefore excluded. Thus, it is a characteristic of the territory that it comprises only territorial enclaves in the countries where the various institutions are located. These enclaves are defined, in paragraph 205(d) of the new ESA Manual, as "... geographical territories situated in the rest of the world and used, under international treaties ...by general government agencies".

Thus, the only resident entities are the institutions themselves, excluding their officials and other agents who generally reside in their country of assignment. The complete list of the institutional units which form part of the State "European Union Institutions", within the meaning of the national accounts, is compiled on the basis of the criteria of existence of a complete set of accounts of these units and decision-making autonomy in respect of their principal function.

## Selection of units included under the European Union Institutions

The criteria listed in the ESA Manual may be applied more or less selectively to compile this list.

### *Units complying strictly with the criteria*

All five administrative bodies of the Communities financed by the **General Budget**, i.e. the Commission, the Parliament, the Council, the Court of Justice and the Court of Auditors are regarded as one independent entity. The European Investment Bank (**EIB**) also is included in the units, which have a complete set of accounts and decision-making autonomy in respect of its principal function.

### *Assimilated units*

The **ECSC**, the first body set up by a European Treaty, is considered here as an independent institution. However, since 1967 its executive body has been incorporated into the Commission, which now carries out the tasks formerly entrusted to the High Authority. Consequently, the ECSC no longer has a complete set of accounts. Part of its current administrative operations are covered by the Commission budget and its management bodies are included in the organization chart of the Directorates-General of the Commission. However, the ECSC has retained an important sphere of own activity, covered by an operational budget, financed by a specific resource (levies on iron and steel and mining products), and it raises funds on the capital market. But these two last activities have been interrupted since 1998, given that the ECSC treaty will end in 2002.

The **EDF** also has decision-making autonomy with specific budgetary rules and procedures as part of a multiannual program of income and expenditure under the periodic conventions signed between the Community and ACP countries. It will therefore be considered as a separate unit distinct from other Funds.

### *Bodies, which are not considered as autonomous units*

Some Funds, such as the European Agricultural Guidance and Guarantee Fund (EAGGF), the European Social Fund (ESF) and the European Regional Development Fund (ERDF), although involving substantial flows, do not have decision-making autonomy. Their accounts are included in the Commission's accounts. This is also the case for the various standing committees set up by the institutions to advise on and determine policy in relation to their decisions.

Bodies which are the subject of a budget annex only and which have been mentioned in the list of sources (Publications Office reporting to the Commission, the Economic and Social Committee reporting to the Council) are excluded from the list of institutional units.

In contrast, two units, which have both the legal status and the financial autonomy to be included, are not in the end covered because they do not have own resources. The Euratom Supply Agency does not levy any charge on transactions, while the European Agency for Cooperation relies entirely on subsidies from other institutions and acts purely as a technical body implementing Community cooperation activities.

Lastly, since June 1998 and the establishment of the European Central Bank (ECB), the ECB must also be regarded as an independent entity. However, the ECB has not been included in this publication.

In this publication, the balance of payments of the European Union Institutions thus deals with the flows of four distinct entities: the General Budget, the EIB, the ECSC and the EDF.

### **Specific nature of the balance of payments of the European Union Institutions**

According to the 5th balance of payments manual of the IMF (BPM5), the European Union Institutions have to be considered as an International Organisation. It consequently means that the treatment of the EU flows is similar to the treatment adopted for the extra-territorial entities such as embassies.

The specific nature of the institutions, as an autonomous entity, can be explained by analyzing the institutional sectors of which it is comprised. Within the meaning of the ESA, it is an entity without "households" or "market output", comprising mainly an institutional sector "General government (central government)" and an auxiliary sector "Other credit institutions". This latter finances its activities from resources other than monetary commitments. The relations of these two sectors with the Rest of the World are outlined in the balance of payments. The presentation of data complies with the ESA recommendation to differentiate between two sub-sectors in the "Rest of the World", i.e. "Community Member States" and "non-member countries and international organizations". This is covered in the tables by the distinction between "EU 15" and "EXTRA EU 15" flows.

The balance of payments of the European Union Institutions reflects these special features. The flows are concentrated on a limited number of items:

- Firstly, on the income side, those mainly describing current transfers from Member States, and, on the expenditure side, current transfers and capital transfers by the EU Institutions to Member States and third countries.
- As a result of the predominance of expenditure in the operating budget (Part B of the budget) over administrative expenditure, the volume of flows covering goods and services in the balance of payments of the EU Institutions is very small. Such expenditure, covered in Part A of the budget, corresponds to the activity of the institutions as producers of non-market services.
- The other important component of the balance of payments is that tracing the movements of long-term capital generated mainly by the EIB. These result in substantial interest flows, which appear in the "income" item of the current-account balance.

The balance of payments of the EU Institutions can be broken down into three main items, in order of importance:

- unrequited transfers
- long-term capital
- income from capital (and, to a lesser extent, income from work).

## METHODOLOGY, CONCEPTS AND DEFINITIONS

The methodology adopted to compile the 2000 EUI balance of payments did not fundamentally differ from previous years. However, two changes implemented since the reference year 1999 have to be mentioned.

The first change concerns the financial flows and investment income flows related to the portfolio liabilities of the European Union. The estimate of the geographical breakdown of these transactions – estimate based upon the currency of issue - is not available since 1999, because of the introduction of the EURO in 1999. In order to provide users with an estimate of the current and capital account flows at the Member States' level, a new item is published:

*'2.4. Current and capital account excluding investment income'.*

The second change also resulted from the introduction of the EURO. It deals with the currency unit used for publishing the figures: data related to the years prior to 1999 are in ECU, whereas data related to the years from 1999 onwards are in EURO.

### Sources<sup>1</sup>

The balance of payments of the EU Institutions is compiled mainly on the basis of accounting documents provided by the institutions covered by the publication. These sources therefore include:

- Revenue and expenditure account and financial statement relating to the operations of the Budget (5 volumes)
- Annual Report of the European Investment Bank
- ECSC Financial Report
- Commission Communication to the Court of Auditors, Parliament and the Council: Balance Sheets and Accounts of the European Development Funds.

In addition to these documents, the computer file of General Budget expenditures and receipts is used, permitting the geographical breakdown of the payments made from the General Budget.

The flows taken into account to compile the balance of payments of the EU Institutions are those, which actually took place during the year, i.e. appropriations used in the current financial year and those carried over from previous years. Likewise, all flows during the year relating to the current EDF (8th) and to previous EDFs (6th, 7th) are taken into account. Lastly, the flows relating to financial operations, in particular those involving the EIB and the ECSC are estimated on the basis of differences in assets and liabilities or variations in the cash position recorded in the financial reports.

### Breakdown by item

In view of the accounting nature of the documents used, the breakdown by item of various flows between the EU Institutions and the rest of the world is made using a table of conversion between accounting items and items of the balance of payments.

### Goods and services

Purchases of goods and services from the Member States are entered under the same headings as in the balance of payments between Member States. However, the item "Government services n.i.e" within the EUI balance of payments has to be further explained. Three important types of flows have been actually incorporated into this item: the EUI purchase of services which are not clearly included elsewhere, the

<sup>1</sup> For further details, see Annex II on page 133.

reimbursement of the costs incurred by the Member States in collecting the Community budget's own resources and the EUI expenses related to the rental, purchase or construction of buildings.

Other special features of the breakdown of goods and services by item involve, firstly, travel services which are considered to be zero, since they correspond in fact to the reimbursement of expenses incurred by officials on their trips and are therefore included in the component "Government services n.i.e". Secondly, the institutions are also an important purchaser of services linked to Research & Development. Two types of EUI actions exist in the R&D field. On one hand, in the case of direct action projects, the European Union is the main operator (particularly those carried out by the Joint Research Center). The budget thus allows a breakdown of expenditure into the different components of its factor cost (purchase of goods, wages, rental of buildings, purchases of studies, research services etc.). On the other hand, the budget includes what are known as indirect action headings. Indirect actions consist of contracts with research institutes or universities. For the most part, such flows are classified as a research/development service but can also cover wages paid to officials working on these indirect action projects.

### ***Compensation of employees***

Compensation paid to the employees of institutions is an important item in particular for the BLEU (almost two-thirds of the European Union flows are vis-à-vis BLEU). The taxes and social contributions levied on these salaries, but also the social benefits, are booked with the salaries. The European institutions act simultaneously as employer and social security fund, which means creating a notional flow of employers' social contributions corresponding to the social benefits actually paid. Thus, it is the gross wages and salaries, which appear on the debit side in the institutions' balance. This treatment applies only to officials or temporary staff with a contract of employment. Expenditure in connection with other employees - external experts or consultants holding service contracts - is classified with purchases of services.

### ***Investment income***

The volume of these flows corresponds mainly to the interest paid or received during the year in connection with stocks of portfolio investments (bonds) and other investments (borrowing and lending operations) held by the European Union Institutions, in particular the EIB and the ECSC, and to a lesser extent the Commission. A special feature involves the EIB surplus. The EIB surplus is in fact disbursed to the EIB reserves, which implies the growth of the liabilities of the EIB towards its shareholders (the Member States). Therefore, a flow within the EUI BOP has to be recorded as a counterpart to this operation. This flow thus corresponds to the disbursement to the Member States (following the capital structure of the EIB) of the net surplus of the previous financial year within the item investment income.

### ***Transfers***

The main problem in classifying the transactions of the European Union Institutions is to distinguish between current transfers and capital transfers in accordance with the Fifth Balance of Payments Manual. The IMF recognizes that this distinction is often problematical, and recommends that the capital transfers be classed as such positively while the others are classed as current transfers.

The transfers of the European Union Institutions fall into four major categories:

- 1 - Member States' contributions (credit)
- 2 - transfers linked to the common agricultural policy (debit)
- 3 - transfers linked to structural measures in the European Union (debit)
- 4 - external development aid from the European Union (debit).

Of the four categories, only the third is truly a combination of capital transfers and current transfers. With rare exceptions, the others represent current transfers.

## Capital transfers

The definition of these transfers is contained in paragraphs 295 and 344-5 of the BPM5. Two types of transfer concern the EU Institutions:

- 1 - debt forgiveness (by mutual agreement between creditor and debtor)
- 2 - transfers linked to the acquisition or disposal of a fixed asset (e.g. an investment grant)

Debt forgiveness always constitutes a capital transfer.

In the case of the second category, the question is more difficult to resolve. Certain grants are evidently capital transfers (e.g. infrastructure grants in less-favored areas); for others, the position is less clear (e.g. grants to retrain unemployed workers or to modernize production in economically depressed regions).

The principles drawn up by the IMF can be summed up as follows:

"The other capital transfers are mainly connected with investment grants. These aim to increase the formation of fixed capital for the recipient economy. For example, a contribution as part of an international aid program, for the construction of a dam etc., would be an investment grant. However, a global grant to a foreign government which could be used for a purpose other than financing an investment should preferably be classed as a current transfer".

With regard to current transfers of government, the IMF states that such transfers include subsidies or budget aid (except those linked explicitly to an increase in the capital stock of the recipient country), technical assistance grants etc. Thus current transfers of general government include educational grants awarded to non-residents to finance their training in the donor country or abroad.

It is important to correctly define the gross fixed capital formation of an economy. To ensure compliance with the SNA, it is necessary to exclude everything relating to human capital and natural resources such as air and watercourses. In contrast, it will include improvements to land, planting and mineral prospecting.

Consequently, capital transfers must take the form of specific measures designed to increase the assets of the recipient economy. For this reason, global development aid and grants to improve human capital (such as the vocational training of the unemployed) will be considered as current transfers.

The most problematic issue concerns grants to improve production, such as crop substitution or the reuse of existing premises for new forms of production. The difficulty is to know in such cases whether the definite change in the value of the asset involved in the restructuring truly represents an increase in value. In general, in view of the fact that such restructuring almost always implies renovation or refurbishing costs, and in order to avoid unnecessary complications, such transfers will be treated as capital transfers.

To sum up, capital transfers by the European Union Institutions mainly arise in connection with operations linked to the ERDF, the EAGGF Guidance Section and the Cohesion Fund.

## Current transfers

This item includes all transfers not classified under capital transfers.

## Financial operations

These operations, mainly linked to lending and borrowing activities and to the change in credit and currency and deposits, are classified following the recommendations of the BPM5. The sources used to compile the financial account consist of the annual financial report of the EIB and the ECSC, and of the accounting documents of the General Budget (Revenue and expenditure account and financial statement relating to the operations of the General Budget). The Commission and the ECSC are only minor players in this type of transaction, the main operator being the EIB. Both these institutions publish annual financial reports that list in detail the various loans granted and the securities issued on the bond market to finance them.

With regard to the previous edition of the EUI balance of payments, the presentation and the treatment of the flows related to the financial derivatives are different. Financial derivatives are now presented separately within the financial account. Moreover, only the total inflows and the total outflows are given with no breakdown between assets and liabilities.

### **Geographical breakdown**

The availability of information on the geographical breakdown of the EUI balance of payments varies according to the items and according to the sources used.

Concerning the Commission resources (mainly the Member States contributions), the geographical origin is well known and allows a precise geographical breakdown. For the Commission expenditures, the geographical codification contained in the Commission file is used, but it sometimes could not correspond to the concept of the final receiver, which is the one adopted for the balance of payments compilation. Otherwise, the criterion of geographical allocation used is the currency of payment. If no geographical information is available (less than 1% of the Commission flows in debit), an estimate of the geographical structure is applied.

Concerning the Parliament, the Council, the Court of Justice, the Court of Auditors, the Economic and Social Committee and Committee of Regions expenditure, which mainly consists of operating expenses, the transactions are allocated in function of the geographical location of these Institutions. However, a specific treatment has been adopted for the European parliamentarians' compensations, which are geographically allocated in function of the residence country of the parliamentarian.

Concerning the EIB and ECSC flows; the operating expenses are allocated to Luxembourg. For the investment income and the financial account of these two Institutions, either information is available (particularly for the loans, the receipts of interests and the change in currency and deposits), or the currency of issue is used (particularly for portfolio investment liabilities). Nevertheless, the estimate based upon the currency of issue is no more available since 1999 at the level of individual Member States, because of the introduction of the EURO in 1999. Last, concerning the EDF transactions, a quite complete set of information is available.

### **Unit of account:**

From 1999 onwards, European Union Institutions have used the EURO instead of the ECU for reporting their accounts. Therefore, the figures published are in EURO for the years from 1999 onwards, whereas figures related to the years prior to 1999 are in ECU.

### **Homogeneity of series**

This methodology has been applied to build the EUI balance of payments for the years 1994 to 2000. In addition, the previous years (1988-1993) have been retropolated according to the methodology changes described above.

## OVERVIEW

✓ The balance of payments of the European Union Institutions (EUI) - current and capital account credit flows - represented 1.24% of the EU gross domestic product in 2000. In 1999 this ratio was equal to 1.27%.

✓ The EUI BoP recorded a current and capital account surplus of EUR 5.9 billion in 2000. Over the 1989-2000 period, the current and capital account fluctuated between a surplus of EUR 6 billion and a deficit of EUR 5 billion (Figure 1). The cumulated balance over this period was positive (EUR 19.4 billion).

✓ The current and capital account credit flows increased by 4.4% in 2000, while the debit flows also increased by 3.0%. On the credit side, only the VAT related contribution, increased in 2000, whereas all the other receipts of the EUI were quite stable (Table 2). On the debit side, the expenditures related to services and income by EUI mainly explained the positive growth rate of the EUI debit flows in 2000 (Table 3).

✓ Nevertheless, over the whole 1996-2000 period, the growth of the EUI expenses has mainly been oriented towards ESF current transfers and capital transfers.

- The balance of payments of the European Union Institutions (EUI) - current and capital account credit flows - represented 1.24% of the EU gross domestic product in 2000. In 1999 this ratio was equal to 1.27%.

<sup>(1)</sup> Data shown in this overview are in ECU until 1998 and in EURO from 1999 onwards.

- The EUI BoP recorded a current and capital account surplus of EUR 4.1 billion in 2000. Over the 1990-2000 period, the current and capital account fluctuated between a surplus of ECU 6 billion (in 1994) and a deficit of ECU 5 billion (in 1996) (Figure 1).

The cumulated balance over this period was positive (EUR 17.6 billion).

FIGURE 1: EUI CURRENT AND CAPITAL ACCOUNT OVER THE 1990-2000 PERIOD

- The current and capital account credit flows increased by 4.6% in 2000, while the debit flows also increased by 5.0%. On the credit side, only the VAT related contribution, increased in 2000, whereas all the other receipts of the EUI were quite stable (Table 2). On the debit side, the expenditures related to services and income by EUI mainly explained the positive growth rate of the EUI debit flows in 2000 (Table 3).

**TABLE 2: MAIN CURRENT ACCOUNT CREDIT FLOWS**

	Credit flows in 2000 (EUR mio.)	Yearly growth rate 2000	Yearly average growth rate 1996/2000	Weight 2000	Average weight 1996/2000
<b>Goods &amp; Services</b>	141	-22,5%	3,3%	0,1%	0,2%
Income	10 983	11,2%	2,0%	10,4%	10,5%

FIGURE 2

- The EUI had a current and capital account surplus (excluding the investment income balance for which no geographical breakdown is available) vis-à-vis eight Member States in 2000. The total surplus with these eight Member States was EUR 24.6 billion. On the other hand, the EUI recorded a deficit with Finland, Luxembourg, Belgium, Ireland, Portugal, Greece and Spain for a total amount of EUR 14.9 billion. The EUI also recorded a EUR 6.1 billion deficit vis-à-vis "Non EU countries" (Table 4 and Figure 2).

- 2.2.3.2. Liabilities
  - 2.2.3.2.1. Short term credit
  - 2.2.3.2.2. Loans
  - 2.2.3.2.3. Currency and deposits
  - 2.2.3.2.4. Other liabilities
    - 2.2.3.2.4.1. Long term
    - 2.2.3.2.4.2. Short term

#### **2.2.4. Financial derivatives**

### 2.3. CURRENT AND CAPITAL ACCOUNT

### 2.4. CURRENT AND CAPITAL ACCOUNT EXCLUDING INVESTMENT INCOME

## ANNEX II

### SOURCES

#### GENERAL BUDGET REVENUE

*Revenue and expenditure account and financial statement.*

Volume II - section III Commission.

Table 3: Revenue of current exercise, column 5.

+ annual computer file of the General Budget receipts

#### GENERAL BUDGET EXPENDITURE

*Revenue and expenditure account and financial statement.*

Volume II - section III Commission.

Tables:

n° 2 - Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 - Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

n° 4 - Non dissociated credit "Use of the credit carried over by the budgetary authority" column 3.

n° 8 - Dissociated credit "Use of the payment credit for the financial year" column 6.

n° 9 - Dissociated credit "Use of the payment credit carried over from the previous financial year" column 4.

Breakdown of the research and development expenditures.

#### GEOGRAPHICAL BREAKDOWN OF THE GENERAL BUDGET EXPENDITURES:

File of the General Budget Expenditures<sup>2</sup>.

#### GENERAL BUDGET

#### ANNEX: LOANS-BORROWINGS ACTIVITIES

*Revenue and expenditure account and financial statement.*

Volume II - section III Commission.

List of the Commission loans related to the General Budget credits.

List of the loans and borrowings of the Commission.

Guarantee Fund.

#### GENERAL BUDGET CONSOLIDATED ACCOUNTS

*Revenue and expenditure account and financial statement.*

Volume IV Consolidated accounts

Consolidated balance sheets.

Explanatory notes of assets and liabilities.

---

<sup>2</sup> For year 2000 "General Budget Expenditures" file was available in another format than previous years (definition of beneficiary country was not always easy to specify). Sometimes it can explain some significant differences in data structure for one or another EU-MS.

## PARLIAMENT

*Revenue and expenditure account and financial statement.*

*Volume III - section I Parliament.*

Tables:

n° 2 - Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 - Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

Balance sheets.

## COUNCIL

*Revenue and expenditure account and financial statement.*

*Volume III - section II Council.*

Tables:

n° 2 - Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 - Non dissociated credit "Use of the credit carried over automatically from the previous financial year"

Balance sheets.

## COURT OF JUSTICE

*Revenue and expenditure account and financial statement.*

*Volume III - section IV Court of Justice.*

Tables:

n° 2 - Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 - Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

Balance sheets.

## COURT OF AUDITORS

*Revenue and expenditure account and financial statement.*

*Volume III - section V Court of Auditors.*

Tables:

n° 2 - Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 - Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

Balance sheets.

## ECONOMIC AND SOCIAL COMMITTEE, COMMITTEE OF REGIONS

*Revenue and expenditure account and financial statement.*

Volume III - section VI Economic and Social Committee, Committee of regions.

Tables:

n° 2 A- Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 A- Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

n° 2 B- Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 B- Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

n° 2 C- Non dissociated credit "Use of the credit for the financial year" column 3.

n° 3 C- Non dissociated credit "Use of the credit carried over automatically from the previous financial year" column 3.

Balance sheets.

## EUROPEAN INVESTMENT BANK

*Annual report of the European Investment Bank.*

Balance sheets.

Profit-and-loss account.

Statement of cash flows.
