INTRODUCTION

This special series in the publications of the Statistical Office of the European Communities contains the results of the first Community survey on the structures and breakdown of earnings in wholesale and in retail trade, banking and insurance in the nine Member States.

The aims and principles, the methods and definitions on which the survey is based have been worked out at Community level in collaboration with experts representing the governments and the employers' and the trade union organizations of member countries. Full details have been published in the first volume of the series which serves as a reference for the methodology employed in all the other volumes, published one for each country. Each book prints, successively for wholesale trade, for retail trade, for banks, and for insurance, five series of computer-produced tables of which three provide general results (A, B, C) and two provide detailed results (D, E). For technical reasons, it has been possible to prepare the tables and their adjacent text only in one bilingual version (English/French), but translations of the table headings into German, Italian, Dutch and Danish are to be found in Annex 3 of Volume 1 of the series.

Some tables involve a very fine breakdown of the data, and a corresponding reduction in the sample size per cell, which could impair the trustworthiness of the results. To mitigate the problem standard error has been calculated, and has been used to screen for publication all the means (earnings, age, length of service etc.) and the corresponding coefficient of variation. The figures with a standard error of 10 % or greater have not been published, but flagged with the symbol #; the figures for which the standard error is less than 5 % have been published as they are.

The present volume contains the data for Luxembourg, where the fieldwork was carried out through the good offices of the "Service central de la Statistique et des Etudes économiques" who were responsible in particular for the collection, and checking of the data about individual persons, for the coding of the data, and its transmission to the

Cette série spéciale dans les publications de l'Office statistique des Communautés européennes contient les résultats de la première enquête communautaire sur la structure et la répartition des salaires dans le commerce de gros et de détail, les banques et les assurances dans les neuf Etats membres.

Les objectifs, les principes, les méthodes et les définitions à la base de l'enquête ont été précisés au niveau communautaire en collaboration avec les experts représentant les gouvernements et les organisations patronales et syndicales des différents pays. Tous ces éléments ont été décrits dans le premier volume de la série qui a valeur de référence méthodologique pour tous les autres volumes publiés à raison d'un par pays. Chacun de ces volumes comprend, successivement pour le commerce de gros et de détail, les banques et les assurances, cinq séries de tableaux mécanographiques dont trois concernent les résultats généraux (A, B, C) et deux les résultats détaillés (D, E). Pour des raisons de caractère technique, les tableaux et les textes liminaires n'ont pu être établis qu'en version bilingue (anglais/français). Toutefois, les lecteurs d'expression allemande, italienne, néerlandaise ou danoise trouveront la traduction dans leur langue respective des intitulés des tableaux à l'annexe 3 du volume 1 de cette même série.

Certains tableaux comportant une ventilation très poussée, la fiabilité des résultats risquait d'être fortement altérée au-delà d'un certain seuil de fractionnement de l'échantillon de salariés enquêtés. Pour pallier ce risque, un programme de calcul d'erreur a été prévu pour la publication de toutes les valeurs moyennes (rémunération, âge, ancienneté, etc.) et des coefficients de variation correspondants. Les valeurs pouvant être affectées par une erreur supérieure ou égale à 10 % n'ont pas été publiées et ont été remplacées par un point; celles pour lesquelles la probabilité de l'erreur était supérieure ou égale à 5 % et inférieure à 10 % ont été publiées avec le signe # ; les valeurs dont l'erreur probable était inférieure à 5 % ont été publiées telles quelles.

Le présent volume concerne le Luxembourg où l'enquête sur le terrain a été réalisée par les soins du «Service central de la Statistique et des Etudes économiques» qui s'est notamment chargé de la collecte et du contrôle des données individuelles, de leur codification et de leur transmission à l'Office statistique des Communautés européennes, ce

Statistical Office of the European Communities, which arranged for the processing to derive the summary data for all Member States of the Community.

The monthly earnings refer to the month of October 1974 and the annual earnings to the year 1974; they are always expressed in Luxembourg francs.

The analysis of the survey has been carried out by Mr Gérard Aubrée, Administrator in the Division "Wages and Incomes" of the Direction "Demographic and Social Statistics"; the computer processing has been organized by Mr Michel Soubies, Analyst, and Mr Claude Weber, Programmer, in the Division "Automatic Data Processing" of the Direction "Statistical Methods and Processing of Data".

dernier ayant assuré l'exploitation des résultats au niveau communautaire.

Les rémunérations mensuelles se réfèrent au mois d'octobre 1974 et les rémunérations annuelles à l'année 1974; elles sont toujours exprimées en francs luxembourgeois.

L'exploitation de l'enquête a été menée par M. Gérard Aubrée, administrateur à la division « Salaires et revenus » de la Direction des statistiques démographiques et sociales; le traitement informatique a été assuré par M. Michel Soubies, analyste, et M. Claude Weber, programmeur, à la division « Informatique » de la Direction de la méthodologie statistique et du traitement de l'information.
