Foreword

1. Introduction

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with third countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT. The accession of three new member states in 1995 led Eurostat to recalculate its historical series for the European Union to include Austria, Finland and Sweden therefore figures published here concern the fifteen Members unless stated otherwise.

Trade statistics - both detailed and general results - have now proved their worth. They are an instrument of prime importance for all users, both public and private. For instance, they enable Community authorities to prepare for multilateral and bilateral negotiations on the common trade policy, they help European businesses carry out market surveys and thus improve their competitiveness and they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The monthly bulletin on external and intra-European Union trade, published by Eurostat in the B series, Short-term Trends, sets out to provide data on short-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on the one hand and between the Member States on the other.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

In view of the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the European Union, Eurostat has added a description of trade with these countries (Chapter 6) to that usually

given for Member States only. Eurostat also foresees broadening this information to include third countries (notably central and eastern European countries) in accordance with bilateral agreements yet to be finalised.

Statistics on external trade and intra-EU trade at the most detailed classification level are published monthly on CD-Rom (Series B: intra and extra-EU trade). They are also available on-line from Eurostat's database (Comext, Newcronos). Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External and Intra-EU Trade Statistical Yearbook (Series A)*".

2. Intra-EU trade

Statistics on trade between the Member States are based on Council Regulation (EC) N° 3330/91 of 7 November 1991 and on the various implementing regulations which have supplemented it or laid down rules on methodology, thresholds and forms. The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Intrastat. Its main features are:

- monthly statistical declarations sent directly by businesses to the competent national authorities;
- a system of thresholds abolishing all statistical obligations for almost two thirds of businesses;
- a close link with the VAT system.

Because of the introduction of this new system, the comparability of the intra-EU results prior to and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This was caused by the failure of some businesses to respond and to the introduction of thresholds which exclude the smallest businesses.

To correct this under-estimation, which varies according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- non-response by certain businesses;

- the movement of goods such as industrial plants, boats and aircraft, automobile and aircraft parts, military equipment and transport equipment repairs, which are not generally harmonised;
- the difference in statistical values for dispatches (FOB) and arrivals (CIF);
- the threshold effect: a business may be obliged to provide statistical information in one Member State while its client or supplier, depending on the case, in the partner country may be dispensed from providing any or certain types of statistical information (e.g. product classification);
- errors or omissions.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

3. *Extra-EU trade*

For data on the years 1978 to 1995, the Member States forwarded statistics on trade outside the European Union in accordance with a uniform methodology provided for in Council Regulation (EEC) N° 1736/75 and the regulations deriving from it. Since the beginning of 1996, data have been collected, transmitted and diffused in accordance with Council Regulation (EC) N° 1172/95 and its implementing rules (Council Regulation (EC) N° 840 196) which however retain the former methodological principles.

External trade statistics are usually recorded on the basis of customs declarations submitted by the declarant when clearing customs. The Single Administrative Document is used for this purpose. In some Member States, certain businesses are allowed to make a summary declaration.

Methodological notes and sources

1. Data sources

The tables in this publication on EU trade and that of the Member States were compiled by Eurostat using the detailed data forwarded by the Member States. Eurostat would like to take this opportunity to thank the departments concerned in the Member States for their co-operation, which makes it possible to compile these harmonised statistics and guarantee their quality.

Some of the tables in the first two parts describe the development of external trade as declared by some of the EU's most important trading partners. With the exception of Table 1C and the results concerning the EU, these tables were compiled from data taken from the tapes sent each month by the International Monetary Fund. The information in table 1C is taken from the Comtrade database, which is managed by the United Nations.

2. Coverage

Series concerning the European Union were recalculated to include Austria, Finland and Sweden and therefore relate to the Union of 15 members unless stated otherwise.

2.1. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union. From 1 January 1997 the statistical territory of France and Spain was modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Réunion) and the Canary Islands. The series concerning the Union and these two Member States will be recalculated as soon as Eurostat disposes of the necessary data

In the meantime this modification has led to a growth in intra-EU trade and a reduction in extra-EU trade which in 1995 amounted to ECU 10.6 billion for exports and ECU 1.6 billion of imports. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost ECU 9 billion.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories which are not part of the EU customs territory.

2.2 Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable property

recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control (for working, processing or repairs) are also regarded as arrivals or dispatches.

The reader should also note that statistics on trade between the Member States do not cover goods in transit.

2.3. Extra-EU trade

Statistics on trade with third countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *imports* are goods which enter the statistical territory of the European Union from a third country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), or following outward processing, or inward processing, or processing under customs control (goods for working, processing or repair) immediately, or after bonded warehousing;
- *exports* are goods which leave the statistical territory of the European Union for a third country after being placed under the customs procedure for exports (definitive export) or outward processing (goods for working, processing) or repair or following inward processing.

Statistics on trade with third countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures.

The field covered by statistics on trade with third countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception, however, of goods in transit. Goods placed in bonded warehouses and exports of goods after bonded

warehousing are included in the definition of general trade.

3. Statistical data

3.1. Trading partners: countries and economic areas

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), the country (or Member State) of final destination of the goods is the partner country.

The trading partner in the case of an intra-European Union arrival is always the Member State of consignment of the goods, even when the goods originate in third countries and have been placed in free circulation in the Member State of consignment. For imports (extra-EU trade) the partner country is the country of origin except in certain cases (returned goods, objects of art, etc.). Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

3.2. Goods classification

The most detailed results published by Eurostat and accessible to the public on magnetic medium are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonised System (HS) and comprises more than 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of conversion tables drawn up by Eurostat on the basis of the CN.

3.3. Statistical value

Although the data is collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in European Units of Account (ECU). The annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only, annual values are calculated as the sum of monthly values

3.3.1. Intra-European Union trade

The statistical value is based on the assessment for taxation purposes or the amount billed. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and insurance) which relate, for dispatches, to the journey to the border of the Member State from which the goods are dispatched and, for arrivals, to the journey to the border of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

3.3.2. Extra-European Union trade

The statistical value is based on the amount billed (real or provisional) or if it exists, on the customs value. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

3.4. Statistical secrecy

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it, and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only, or to exports only, or to only some of the variables recorded (value, statistical procedure, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of confidentiality on the results. In particular, subheadings which include confidential trade data are included at higher levels of aggregation and in totals.

4. Indices

4.1. Introduction

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis. These indices may be consulted in the TREND database.

4.2. Methodology

The data transmitted for external trade and intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators. The computer programs contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices. More detailed methodological notes may be obtained on request.

Trends in European Union trade

MAIN TRENDS IN WORLD TRADE

In January 1997 the European Union's trade balance reduced its deficit compared with January 1996, reaching ECU 2.2 billion.

In the same period, the United States' deficit worsened slightly, reaching more than ECU 15 billion, while Japan's external trade was in balance (compared with a small ECU 0.4 billion surplus in January 1996).

The EU as a whole confirmed in January 1997 its position as the world's leading exporter, while the United States was the most important world outlet.

In the first month of 1997, the EU's ¹ external trade balance showed a deficit of ECU 2.2 billion, whereas in January 1996 it had been ECU 3.9 billion. The growth rates of extra-EU exports and imports were 13.3% and 8.7% respectively.

Even if its share declined compared with 1996, during January 1997 the EU as a whole confirmed its position as the leading world exporter accounting for 18.6% of world exports (ECU 49.7 billion), while in imports it ranked second with 17.7% (ECU 51.9 billion).

In January 1997, the United States' trade deficit worsened slightly compared with a year earlier and amounted to ECU 15.5 billion. The growth rates of exports and imports over January 1996 were 12.8% and 15.2% respectively.

The United States confirmed its first place in the world ranking of importers with a share of 19.4% and the second place of exporters with a share of 15.6% .

In January 1997, Japan's trade situation was nearly in balance, down from the ECU 0.4 billion surplus registered in January of the previous year. This result was due to the gap between growth rates of Japanese imports and exports (+12.8% and +10.3% respectively).

As a result, the Japanese share of world exports fell to 9.3%, while its share of imports remained virtually stable at 8.4%.

¹ The European Union's figures for 1997 are provisional and subject to frequent revisions. The symbol ":" indicates that the figure is not available. The 1994 figures for the three new Member States (Austria, Finland and Sweden) are estimated using different international sources which do not follow EU methodology.

(3) U.N. Monthly Bulletin of Statistics - (Manufactured goods only for developed economies)

EXTRA-EU TRADE BY MAIN PARTNER

The EU balance with its Central and Eastern European (CEEC) partners showed the largest surplus in January 1997 (ECU 1.6 billion), followed by the other Asian countries (ECU 1 billion). In contrast, trade with China registered the highest deficit (ECU 2.1 billion).

Trade flows with the **United States** (the EU's most important individual partner, with shares of 18.3% and 19.4% respectively for exports and imports in 1996) showed a deficit of ECU 0.2 billion in January 1997. This represents a slight improvement compared with the same month of the previous year, when the EU-US balance showed a deficit of ECU 1.3 billion. Export and import growth rates for January 1997 were 19.9% and 5.7% respectively.

Between January 1996 and January 1997 the trade balance with **Japan** improved by ECU 0.6 billion to register an ECU 1.4 billion deficit, while in the same period trade with the **EFTA** countries worsened slightly, recording a deficit of ECU 0.8 billion.

EU exports to Japan were in fact quite dynamic in January 1997, with a growth rate over the previous year of 16.7%, while imports over the same period showed a negative rate of change (-3.2%).

In January 1997, EU exports and imports to the **CIS** and the **CEEC** partners showed very dynamic flows in comparison with January 1996 (growth rates of +17% and +23.4% for exports, while the corresponding imports grew by +37.7% and +14.1% respectively). As a result, the EU trade balances with CIS and CEEC partners (which in 1996 together accounted for around 14% of total extra-EU flows) worsened by ECU 0.5 billion and improved by ECU 0.6 billion respectively, registering a deficit of ECU 0.9 billion for CIS countries and a surplus of ECU 1.6 billion for CEEC partners.

The total values of EU exports to **DAE** and **other Asian countries** in January 1997 were quite similar (around ECU 6 billion), but growth rates were higher for the latter (14.9% compared with 11.5% for the former). The results were similar for imports, with growth rates of 7.2% for DAE countries and 10.2% for other Asian countries. As a result, the EU balance with these countries improved to ECU 0.1 billion surplus for DAE partners and ECU 1 billion for other Asian countries.

As for **Latin America**, the export growth rate was impressive (34.8% over the same period of the previous year) while the import growth rate was negative (-4%).

January 1997 saw a sharp rise in EU imports from **China** (+19.4% compared with January 1996), together with a decrease in the value of the Union's exports (-6.1%). As a result, the EU-China trade deficit rose by ECU 0.5 billion compared with January 1996 to reach ECU 2.1 billion.

Trade with **Oceania** showed a surplus of ECU 0.5 billion in January 1997, which means an improvement of ECU 0.1 billion in comparison with the same month of 1996.

As for **Africa**, it must be pointed out that extra-EU exports went down by 7.1%, while imports grew by 16% (However, these figures have to be interpreted taking into account the inclusion, since January 1997, of the Canary Islands and Réunion in the Spanish and French customs territories respectively).

EXTRA-EU TRADE BY MAIN PRODUCT

In January 1997, the EU's trade balance in machinery and transport equipment recorded the greatest surplus (ECU 6 billion), while fuel products showed the largest deficit (ECU 6.2 billion).

In January 1997 the deficit on **primary goods (SITC 0-4)** rose to ECU 8.9 billion compared with ECU 8 billion in January of the previous year.

The EU trade deficit in fuel products (SITC 3) grew to ECU 6.2 billion, while the balance for food, beverages and tobacco (SITC 0+1) and raw materials except fuel (SITC 2+4) showed a slight improvement and recorded deficits of ECU 0.5 billion and ECU 2.2 billion respectively.

Between January 1996 and January 1997, the growth rates of the flows for primary goods (which in 1996 accounted for 11.2% of total extra-EU exports and 28% of imports) were 13.3% for exports and 12.3% for imports.

The increase in international oil prices started in the second half of 1996, continued at the beginning of 1997 (the ECU cost of the EU's crude oil supplies rose by 35% in January 1997), and partly propped up the value of trade in fuel products (SITC 3). The export and import flows grew by 29% and 29.8% respectively. In addition, other raw materials (SITC

2+4) registered a growth rate for exports and imports of 10.3% and 1.1% respectively.

As for **manufactured products (SITC 5-8)**, which accounted for 87% of total extra-EU exports and 69% of imports in 1996, during the first month of 1997 the EU's external trade showed a surplus of ECU 7.4 billion compared with ECU 4.9 billion for the same period in 1996.

In January 1997, the EU surplus for machinery and transport equipment (SITC 7) and chemical products (SITC 5) reached ECU 6 billion and ECU 2.7 billion respectively, while other manufactured goods (SITC 6+8) recorded a deficit of ECU 1.3 billion.

Among the sections encompassing manufactured products, the most significant growth rates were recorded for trade in machinery and transport equipment (SITC 7), +14.4% for exports and +8.7% for imports.

EXTRA-EU TRADE BY MEMBER STATE

Germany and Sweden achieved the two largest extra-EU surpluses among the EU countries, while the Netherlands and the United Kingdom registered the highest external deficits.

In January 1997, **Germany** (together with Sweden) was the EU Member State with the largest extra-EU trade surplus (ECU 0.8 billion). This represents a deterioration (ECU 0.5 billion) over the previous year and is due to the negative gap (6 percentage points) between the growth rates for exports and imports.

Germany is also the most important EU player in trade with third countries. Its 1996 share of total extra-EU exports amounted to 28.2%, while the figure for imports was 24.7%.

The second-ranking country in trade value terms was the **United Kingdom** (which in 1996 accounted for 13.8% and 17.9% of exports and imports respectively). The UK also had the second largest trade deficit (ECU 0.9 billion) in January 1997.

Italy recorded a surplus of ECU 0.2 billion, which means an improvement of ECU 0.4 billion over January 1996. This improvement was due to the surge in extra-EU exports (+10.9%), while imports grew by only 4%.

In January 1997, **France's** imports increased faster than its exports over the same month in 1996, the growth rates being 6.5% and 3% respectively. As a consequence, France's trade balance worsened compared with the previous year and only reached a surplus of ECU 0.1 billion.

During the first month of 1997 the extra-EU deficit of the **Netherlands** went down by 0.5 billion compared with January 1996. However, it still represented the largest deficit among the EU Member States (ECU 2.3 billion). This deficit must, however, be interpreted

in conjunction with the intra-EU Dutch surplus and the country's transit role in EU trade. Between January 1996 and January 1997, Dutch exports recorded a growth rate of 3.7%, whereas imports decreased by 8.8%.

As for **Belgium/Luxembourg (BLEU)**, in January 1997 the growth rate of exports was higher than that of imports (18.6% and 7.9% respectively). Due to this fact, the overall balance of these two countries improved and recorded a smaller deficit of ECU 0.3 billion in comparison with the previous year.

In January 1997 **Finland** and **Sweden** registered a surplus in their extra trade balance. Finland's extra-EU exports and imports were particularly dynamic, showing growth rates of 10.8% and 14.4% respectively, while Sweden registered more moderate rates of change (+8% for exports and +8.5% for imports).

During the first month of 1997, **Austria's** growth rate for imports (10.3%) was higher than the corresponding rate for exports (1.2%), resulting in a deterioration in its trade balance.

Of the five remaining Member States (which together accounted for about 10% of extra-EU flows in 1996), **Greece** and **Ireland** registered positive growth rates in their extra-EU exports and negative growth rates in their imports (+35.6% and +7.2% for exports and -5.7% and -9% for imports respectively).

In contrast, for the period under consideration, **Portugal, Spain** and **Denmark** saw a higher growth in their imports than in their exports.

INTRA-EU TRADE BY MEMBER STATE¹

In January 1997, the Netherlands and Germany produced the two largest intra-EU surpluses, while Austria recorded the highest intra-EU deficit.

In January 1997 intra-EU trade showed a total value for dispatches (i.e. exports, which are the more reliable measure of intra-EU trade) of around ECU 89.2 billion, representing an increase of 3.1% compared with the same month of the previous year.

The **Netherlands** was the Member State with the largest intra-EU surplus. In January 1997 it grew to ECU 4.1 billion, up by 1.2 billion on the same period of 1996. However, as mentioned above, it must be stressed that this figure has to be interpreted in the light of the Dutch extra-EU deficit and the country's transit role in EU trade. In January 1997, the growth rate of Dutch intra-EU dispatches was 11.7%, while there was a sluggish performance for arrivals (+0.5%).

As in the case of extra-EU trade, **Germany** was the most important player in trade with the EU partners, its 1996 share of total intra-EU trade amounting to around 21%. During the first month of 1997, it registered the second largest intra-EU trade surplus (ECU 1.9 billion) - an increase of ECU 0.8 billion compared with the previous year.

France ranked second in volume of trade with EU partners, with a 1996 share of 15%. In January 1997, its intra-EU trade improved and showed a surplus of ECU 0.2 billion in comparison with the deficit registered in January 1996.

The **United Kingdom's** intra-EU deficit fell to ECU 0.2 billion. The UK's growth rates for arrivals and dispatches in January 1997 were close (10.2% and 9.2% respectively).

In general, **Italy** and **Ireland** saw more moderate growth rates at the beginning of 1997 compared with 1996. For dispatches, the rates were 4.2% and 4.5% respectively, while the figures for arrivals were -1.2% and 12.3%. As a result, the intra-EU surplus increased by ECU 0.4 billion for Italy and decreased by ECU 0.1 billion for Ireland in comparison with January 1996.

With a 1996 share of around 10%, **Belgium/Luxembourg (BLEU)** are also important players in intra-EU trade. In January 1997, these countries recorded an overall surplus of ECU 1.1 billion. This represented a slight improvement (ECU 0.1 billion) compared with the previous year.

As far as the three new Member States are concerned, **Sweden** and **Finland** confirmed their small surpluses with their EU partners, whereas Austria showed a deficit of ECU 0.7 billion.

Of the remaining four Member States (together accounting for around 12% of intra-EU trade in 1996), only **Denmark** and **Spain** displayed a small intra-EU surplus in January 1997 (ECU 0.1 billion each), while **Portugal** and **Greece** registered internal deficits of ECU 0.3 and ECU 0.6 billion respectively.

¹ On 1 January 1993, following the abolition of customs controls in the EU, a new collection system for intra-EU data (Intrastat) was introduced. Instead of being derived from customs declarations, trade figures are now compiled from data provided directly by companies.

SEASONALLY ADJUSTED TIME SERIES OF EU TRADE

Extra-EU trade¹

EU exports in January 1997 were 4% up on December at a seasonally adjusted ECU 53.5 billion. Year on year, a rise of almost 12% was recorded, marking the third highest increase of the past 13 months after July and October 1996. An already long-standing upward trend - albeit somewhat blurred by the extremely high July and October figures - thus appeared to continue.

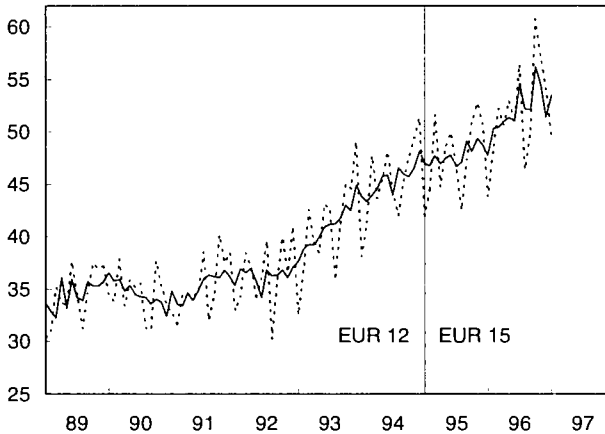

EU imports remained on an upward trajectory sustained ever since enlargement in January 1995. Compared with that month, they showed a seasonally adjusted increase of ECU 6.9 billion, or 15.6%, to ECU 51.1 billion, with the year-on-year rise standing at 9.3%.

The seasonally adjusted external trade balance improved slightly in January 1997 from ECU 1.6 to 2.4 billion, remaining within the ECU 1 to 4 billion range that had held sway since EU enlargement. Only in the second half of 1996 did the balance exceed these limits as a result of extremely high export figures.

Intra-EU trade²

In January 1997, seasonally adjusted intra-EU trade continued the levelling-off observed since August 1996. At around ECU 90 billion, it was ECU 2.6 billion, or 3%, higher than a year earlier.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

PRODUCT LIST : SITC REV. 3

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

PRODUCT LIST : SITC REV. 3

7 Machinery and transport equipment

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)

ECONOMIC ZONES 1997

The economic zones can overlap and must not, therefore, be used to make up larger units.

<p>1110: Intra-EUR15 Member States of the European Union 001 + 002 + 003 + 004 + 005 + 006 + 007 + 008 + 009 + 010 + 011 + 030 + 032 + 038 + 5910</p>	<p>1031: ACP³ Countries of Africa, the Caribbean and the Pacific – Lomé Convention 224 + 228 + 232 + 236 + 240 + 244 + 247 + 248 + 252 + 257 + 260 + 264 + 268 + 272 + 276 + 280 + 284 + 288 + 302 + 306 + 310 + 311 + 314 + 318 + 322 + 324 + 328 + 330 + 334 + 336 + 338 + 342 + 346 + 350 + 352 + 355 + 366 + 370 + 373 + 375 + 378 + 382 + 386 + 389 + 391 + 393 + 395 + 421 + 449 + 452 + 453 + 456 + 459 + 460 + 464 + 465 + 467 + 469 + 472 + 473 + 488 + 492 + 801 + 806 + 807 + 812 + 815 + 816 + 817 + 819</p>
<p>1811: Extra-EUR15 Grand total less European Union 5190 + 5200 + 5300 + 5400 + 5500 + 5920</p>	
<p>1021: EFTA Countries of the European Free Trade Agreement 024 + 028 + 037 + 039</p>	
<p>1820: OECD , excluding EU¹ Member states of the Organization for Economic Cooperation and Development 024 + 028 + 039 + 052 + 060 + 061 + 400 + 404 + 412 + 728 + 732 + 800 + 802 + 804 + 814</p>	<p>1051: Mediterranean Basin Countries and territories that make up the Mediterranean Basin 022 + 044 + 046 + 052 + 070 + 091 + 092 + 093 + 094 + 096 + 204 + 208 + 212 + 216 + 220 + 600 + 604 + 608 + 624 + 625 + 628</p>
<p>1120: CEEC² Countries of Central and Eastern Europe 053 + 054 + 055 + 060 + 061 + 063 + 064 + 066 + 068 + 070 + 091 + 092 + 093 + 094 + 096</p>	<p>1310: NAFTA Countries of the North American Free Trade Agreement 400 + 404 + 412</p>
<p>1815: CIS Commonwealth of Independent States 072 + 073 + 074 + 075 + 076 + 077 + 078 + 079 + 080 + 081 + 082 + 083</p>	<p>1058: Latin America 412 + 416 + 424 + 428 + 432 + 436 + 442 + 448 + 452 + 456 + 480 + 484 + 500 + 504 + 508 + 512 + 516 + 520 + 524 + 528</p>
<p>1053: OPEC Member States of the Organization of Petroleum Exporting Countries 208 + 216 + 288 + 314 + 484 + 500 + 612 + 616 + 632 + 636 + 644 + 647 + 700</p>	<p>1330: MERCOSUR Countries of the South Cone common market (in South America) 508 + 520 + 524 + 528</p>
	<p>1415: Dynamic Asian Economies (DAE) 680 + 701 + 706 + 728 + 736 + 740</p>

¹ OECD include Mexico since 1.1.1994, Czech Republic since 1.1.1995, Poland and South Korea since 1.1.1996.

² CEEC include Estonia, Latvia and Lithuania since 1.1.1992.

³ ACP include Eritrea since 1.1.1994.
