Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat.

Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat.

Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3ª pagina della copertina.

De publicaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publicaties kunt u zich wenden tot Eurostat.

Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat.

Encomendas: serviços de venda cujos endereços estão indicados na contracapa.

Eurostatin julkaisut on luokiteltu aiheen ja sarjan mukaisesti. Luokittelu ilmoitetaan kunkin julkaisun lopussa. Lisätietoja julkaisuista saa Eurostatista.

Tilauksia voi tehdä myyntitoimistoista, jotka on lueteltu takakannen sisäpuolella.

Publikationer från Eurostat klassificeras efter ämnesområde och serie. Denna klassificering står angiven i slutet av publikationen. För ytterligare information om publikationer – kontakta Eurostat.

Beställningar tas emot av de försäljningskontor som redovisas på omslagets sida 3.

Foreword

1. Introduction

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with third countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT. The accession of three new member states in 1995 led Eurostat to recalculate its historical series for the European Union to include Austria, Finland and Sweden; therefore figures published here concern the fifteen Members unless stated otherwise.

Trade statistics - both detailed and general results - have now proved their worth. They are an instrument of prime importance for all users, both public and private. For instance, they enable Community authorities to prepare for multilateral and bilateral negotiations on the common trade policy, they help European businesses carry out market surveys and thus improve their competitiveness and they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The monthly bulletin on external and intra-European Union trade, published by Eurostat in the B series, Short-term Trends, sets out to provide data on short-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on the one hand and between the Member States on the other.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

In view of the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the European Union, Eurostat has added a description of trade with these countries (Chapter 6) to that usually

given for Member States only. Eurostat also foresees broadening this information to include third countries (notably central and eastern European countries) in accordance with bilateral agreements yet to be finalised.

Statistics on external trade and intra-EU trade at the most detailed classification level are published monthly on CD-Rom (Series B: intra and extra-EU trade). They are also available on-line from Eurostat's database (Comext, Newcronos). Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External and Intra-EU Trade Statistical Yearbook (Series A)*".

2. Intra-EU trade

Statistics on trade between the Member States are based on Council Regulation (EC) N° 3330/91 of 7 November 1991 and on the various implementing regulations which have supplemented it or laid down rules on methodology, thresholds and forms. The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Intrastat. Its main features are:

- monthly statistical declarations sent directly by businesses to the competent national authorities;
- a system of thresholds abolishing all statistical obligations for almost two thirds of businesses;
- a close link with the VAT system.

Because of the introduction of this new system, the comparability of the intra-EU results prior to and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This was caused by the failure of some businesses to respond and to the introduction of thresholds which exclude the smallest businesses.

To correct this under-estimation, which varies according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- non-response by certain businesses;

- the movement of goods such as industrial plants, boats and aircraft, automobile and aircraft parts, military equipment and transport equipment repairs, which are not generally harmonised;
- the difference in statistical values for dispatches (FOB) and arrivals (CIF);
- the threshold effect: a business may be obliged to provide statistical information in one Member State while its client or supplier, depending on the case, in the partner country may be dispensed from providing any or certain types of statistical information (e.g. product classification);
- errors or omissions.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

3. *Extra-EU trade*

For data on the years 1978 to 1995, the Member States forwarded statistics on trade outside the European Union in accordance with a uniform methodology provided for in Council Regulation (EEC) N° 1736/75 and the regulations deriving from it. Since the beginning of 1996, data have been collected, transmitted and diffused in accordance with Council Regulation (EC) N° 1172/95 and its implementing rules (Council Regulation (EC) N° 840 196) which however retain the former methodological principles.

External trade statistics are usually recorded on the basis of customs declarations submitted by the declarant when clearing customs. The Single Administrative Document is used for this purpose. In some Member States, certain businesses are allowed to make a summary declaration.

Methodological notes and sources

1. Data sources

The tables in this publication on EU trade and that of the Member States were compiled by Eurostat using the detailed data forwarded by the Member States. Eurostat would like to take this opportunity to thank the departments concerned in the Member States for their co-operation, which makes it possible to compile these harmonised statistics and guarantee their quality.

Some of the tables in the first two parts describe the development of external trade as declared by some of the EU's most important trading partners. With the exception of Table 1C and the results concerning the EU, these tables were compiled from data taken from the tapes sent each month by the International Monetary Fund. The information in table 1C is taken from the Comtrade database, which is managed by the United Nations.

2. Coverage

Series concerning the European Union were recalculated to include Austria, Finland and Sweden, and therefore relate to the Union of 15 members unless stated otherwise.

2.1. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union. From 1 January 1997 the statistical territory of France and Spain was modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Réunion) and the Canary Islands. The series concerning the Union and these two Member States will be recalculated as soon as Eurostat disposes of the necessary data

In the meantime this modification has led to a growth in intra-EU trade and a reduction in extra-EU trade which in 1995 amounted to ECU 10.6 billion for exports and ECU 1.6 billion of imports. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost ECU 9 billion.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories which are not part of the EU customs territory.

2.2 Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable property

recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control (for working, processing or repairs) are also regarded as arrivals or dispatches.

The reader should also note that statistics on trade between the Member States do not cover goods in transit.

2.3. Extra-EU trade

Statistics on trade with third countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *imports* are goods which enter the statistical territory of the European Union from a third country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), or following outward processing, or inward processing, or processing under customs control (goods for working, processing or repair) immediately, or after bonded warehousing;
- *exports* are goods which leave the statistical territory of the European Union for a third country after being placed under the customs procedure for exports (definitive export) or outward processing (goods for working, processing) or repair or following inward processing.

Statistics on trade with third countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures.

The field covered by statistics on trade with third countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception, however, of goods in transit. Goods placed in bonded warehouses and exports of goods after bonded

warehousing are included in the definition of general trade.

3. Statistical data

3.1. Trading partners: countries and economic areas

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), the country (or Member State) of final destination of the goods is the partner country.

The trading partner in the case of an intra-European Union arrival is always the Member State of consignment of the goods, even when the goods originate in third countries and have been placed in free circulation in the Member State of consignment. For imports (extra-EU trade) the partner country is the country of origin except in certain cases (returned goods, objects of art, etc.). Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

3.2. Goods classification

The most detailed results published by Eurostat and accessible to the public on magnetic medium are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonised System (HS) and comprises more than 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of conversion tables drawn up by Eurostat on the basis of the CN.

3.3. Statistical value

Although the data is collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in European Currency Units (ECU). The annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only, annual values are calculated as the average of monthly values

3.3.1. Intra-European Union trade

The statistical value is based on the assessment for taxation purposes or the amount billed. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and insurance) which relate, for dispatches, to the journey to the border of the Member State from which the goods are dispatched and, for arrivals, to the journey to the border of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

3.3.2. Extra-European Union trade

The statistical value is based on the amount billed (real or provisional) or if it exists, on the customs value. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

3.4. Statistical secrecy

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it, and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only, or to exports only, or to only some of the variables recorded (value, statistical procedure, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of confidentiality on the results. In particular, subheadings which include confidential trade data are included at higher levels of aggregation and in totals.

4. Indices

4.1. Introduction

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis. These indices may be consulted in the TREND database.

4.2. Methodology

The data transmitted for external trade and intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators. The computer programs contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices. More detailed methodological notes may be obtained on request.

Trends in European Union trade

MAIN TRENDS IN WORLD TRADE

In the first seven months of 1997 the European Union's trade balance recorded a surplus of ECU 26 billion, while in the corresponding period of 1996 this surplus reached only ECU 18 billion.

During January-July 1997 the United States' deficit worsened, reaching more than ECU 100 billion, while Japan's external trade showed a surplus of ECU 36 billion.

During the first seven months of 1997 the EU as a whole confirmed its position as the world's leading exporter while the United States was the most important world outlet.

During the first seven months of 1997 the **EU's**¹ external trade balance improved and showed a surplus of ECU 25.9 billion, whereas in January-July 1996 it had recorded a smaller surplus of ECU 18 billion. The growth rates of extra-EU exports and imports were 13.8% and 12.2% respectively.

Although its share declined compared with 1996, in the period under consideration the EU as a whole confirmed its position as the leading world exporter, accounting for 19.3% of world exports (ECU 405.7 billion), while in imports it ranked second with 16.7% (ECU 379.8 billion).

In the period January-July 1997 the **United States'** trade deficit worsened compared with a year earlier and amounted to ECU 101.1 billion. The growth rates

of exports and imports compared with January-July 1996 were 23.5% and 23.1% respectively.

The United States confirmed its first place in the world ranking of importers with a share of 19.7% and the second place of exporters with a share of 16.5% .

In the first seven months of 1997 **Japan's** trade recorded a surplus of ECU 36.1 billion, up from ECU 26.4 billion registered in the corresponding period of the previous year. The growth rates of Japanese exports and imports were 15.2% and 11.6% respectively.

As a result, the Japanese share of world exports and imports were 10.2% and 7.8% respectively.

¹ The European Union's figures for 1997 are provisional and subject to frequent revisions. The symbol ":" indicates that the figure is not available.

EXTRA-EU TRADE BY MAIN PARTNER

The EU balance with its Central and Eastern European (CEEC) partners showed the largest surplus in the first seven months of 1997 (ECU 14.4 billion), followed by the other Asian countries (ECU 12.1 billion). In contrast, trade with Japan and China registered the highest deficits (ECU 11.7 and 11.8 billion respectively).

Trade flows with the **United States** (the EU's most important individual partner, with shares of 18.3% and 19.4% respectively for exports and imports in 1996) showed a small surplus of ECU 0.7 billion in the period January-July 1997. This represents an improvement compared with the same period of the previous year when EU-US trade reached a deficit of ECU 1.6 billion. Export and import growth rates for the first seven months of 1997 were 21.1% and 17.1% respectively.

Between January-July 1996 and the same period of 1997 the trade balance with **Japan** worsened by ECU 1.5 billion to register an ECU 11.7 billion deficit. Compared with the USA, EU exports to Japan were quite sluggish in the first seven months of 1997, with a growth rate over the previous year of 3.9%, while the growth rate of imports over the same period reached 7.3%.

The EU trade balance with the **EFTA** countries worsened, reaching a deficit of ECU 1.2 billion. The EU growth rates for exports and imports in the first seven months of 1997 were 7.7% and 8% respectively.

In January-July 1997, EU exports and imports to the **CIS** and the **CEEC** partners showed very dynamic flows (growth rates of +25.6% and +21.9% for exports while the corresponding imports grew by +23.7% and +19.1% respectively). The EU trade balances with these partners (which in 1996 together accounted for around 14% of total extra-EU flows) remained stable for CIS and improved by ECU 3.2 billion for CEEC countries. As a result the trade balances recorded a deficit of ECU 1 billion for the first and a surplus of ECU 14.4 billion for the latter.

The total values of EU exports to **DAE** and **other Asian countries** in the first seven months of 1997 were quite similar (around ECU 70 billion), but growth rates were higher for the latter (16.9% compared with 14.3% for the former). The results were the opposite for imports, with growth rates of 13.4% for DAE countries and 10.9% for other Asian countries. As a result, the EU surplus with these countries improved to ECU 8.3 billion surplus for DAE partners and ECU 12.1 billion for other Asian countries.

The export growth rate for **Latin America** was impressive (27.2% compared with the same period of the previous year) while the imports registered an increase of 9.8%.

The period January-July 1997 saw a sharp rise in EU imports from **China** (+20.6% compared with the same period of 1996), together with a moderate increase in the value of the Union's exports (+5.5%). As a result, the EU-China trade deficit rose by ECU 3 billion compared with January-July 1996 to reach ECU 11.8 billion.

Trade with **Oceania** showed a surplus of ECU 3.8 billion in the first seven months of 1997, which was an improvement of ECU 0.3 billion in comparison with the same period of 1996.

Extra-EU exports to **Africa** went down by 5.5% while imports grew by 6.5%. However, these figures have to be interpreted taking into account the inclusion, since January 1997, of the Canary Islands and Réunion in the Spanish and French customs territories respectively.

EXTRA-EU TRADE BY MAIN PRODUCT

In the first seven months of 1997 the EU's trade balance in machinery and transport equipment recorded the greatest surplus (ECU 57 billion) while fuel products showed the largest deficit (ECU 39 billion).

In the period January-July 1997 the deficit on **primary goods (SITC 0-4)** rose to ECU 56.4 billion compared with ECU 53.5 billion in the corresponding period of the previous year.

The EU trade deficit in fuel products (SITC 3) grew to ECU 38.6 billion while the balance for food, beverages and tobacco (SITC 0+1) showed an improvement and recorded a deficit of ECU 2 billion. Raw materials except fuel (SITC 2+4) recorded a deficit of ECU 15.9 billion, remaining almost stable in comparison with the same period of the previous year.

Between January-July 1996 and the same period a year later the growth rates of the flows for primary goods (which in 1996 accounted for 11% of total extra-EU exports and 28% of imports) were 12.2% for exports and 8.3% for imports.

Although it was much more moderate, the increase in international oil prices which started in 1996 continued at the beginning of 1997 (the ECU cost of the EU's crude oil supplies rose by 9.4% in the first seven months of 1997, whereas in USD the cost

remained almost stable), and partly propped up the value of trade in fuel products (SITC 3). The export and import flows grew by 10.8% and 11.4% respectively. In addition, other raw materials (SITC 2+4) registered a growth rate for exports of 15.6%, while imports registered an increase of 9.9%.

Manufactured products (SITC 5-8) accounted for 87% of total extra-EU exports and 69% of imports in 1996. During the first seven months of 1997 the EU's external trade showed a surplus of ECU 85.2 billion compared with ECU 77 billion for the same period in 1996.

In the period January-July 1997 the EU surplus for machinery and transport equipment (SITC 7) and chemical products (SITC 5) reached ECU 56.6 billion and ECU 23.8 billion respectively while other manufactured goods (SITC 6+8) recorded a small surplus of ECU 4.9 billion.

The most significant export and import growth rates were recorded for trade in machinery and transport equipment (SITC 7), reaching 14.7% for exports and 15.3% for imports.

EXTRA-EU TRADE BY MEMBER STATE

Germany achieved the largest extra-EU surplus followed by Italy while the Netherlands and the United Kingdom registered the highest external deficit.

In the period January-July 1997 **Germany** was the EU Member State with the largest extra-EU trade surplus amounting to ECU 21.5 billion. This was an improvement of ECU 5 billion compared with the same period of the previous year. Germany's growth rates for exports and imports were 12.8% and 9.4% respectively.

Germany is also the most important EU player in trade with third countries. Its 1996 share of total extra-EU exports amounted to 28.2% while the figure for imports was 24.7%.

The second-ranking country in trade value terms was the **United Kingdom** (which in 1996 accounted for 13.8% and 17.8% of exports and imports respectively). The UK also had the second largest trade deficit (ECU 8.7 billion) in the first seven months of 1997. However, it improved by ECU 3.1 billion in the period under consideration.

Italy recorded a surplus of ECU 13.2 billion exactly the same as January-July 1996. The growth rates of extra-EU exports and extra-EU imports were 6.5% and 8.7% respectively.

During the first seven months of 1997 **France's** imports increased faster than its exports over the same period in 1996, the growth rates being 11.2% and 8.2% respectively. As a consequence, France's trade balance worsened slightly compared with the previous year and reached a surplus of ECU 8.6 billion.

During January-July 1997 the extra-EU deficit of the **Netherlands** went up by 1.9 billion compared with January-July 1996. It has the largest deficit among the EU Member States (ECU 17.4 billion). This deficit must, however, be interpreted in conjunction with the intra-EU Dutch surplus and the country's transit role in EU trade. Between January-July 1996 and the same period of 1997, Dutch exports and

imports recorded impressive growth rates of 19% and 15.9% respectively.

During the first seven months of 1997 the **Belgium/Luxembourg (BLEU)** growth rate of exports was higher than that of imports (17.2% and 10.5% respectively). Due to this fact the overall balance of these two countries improved and recorded a smaller deficit of ECU 1.1 billion in comparison with the previous year.

In January-July 1997 **Finland** and **Sweden** registered surpluses in their extra-EU trade balance. Finland's extra-EU exports and imports recorded growth rates of 15.4% and 15.6% respectively. Sweden registered rates of change of 11.3% for exports and 10.1% for imports.

During the first seven months of 1997 **Austria's** growth rates for exports and imports were 22.5% and 17.5% respectively, resulting in a surplus in its trade balance (ECU 2.4 billion).

Of the five remaining Member States (which together accounted for about 10% of extra-EU flows in 1996), **Greece** and **Ireland** registered a high positive growth rate for their extra-EU exports (19.6% and 27.1% respectively). Greece recorded a negative growth rate for imports (-1.2%) while Irish imports increased by 19.5% compared with the first seven months of 1996.

Portugal registered a low export growth rate (3.7%) while imports were higher (6.4%). As a result its deficit went up to ECU 2 billion.

Finally, **Spain** and **Denmark** saw a positive gap between their growth rates for imports and exports, which produced a deterioration in their trade balances.

INTRA-EU TRADE BY MEMBER STATE¹

In the first seven months of 1997 the Netherlands and Germany produced the two largest intra-EU surpluses while the United Kingdom recorded the highest intra-EU deficit.

In the period January-July 1997 intra-EU trade showed a total value for dispatches (i.e. exports, which are the more reliable measure of intra-EU trade) of around ECU 664.8 billion. This represented an increase of 6.1% compared with the same period of the previous year.

The **Netherlands** was the Member State with the largest intra-EU surplus. During the first seven months of 1997 it grew to ECU 24.5 billion, up by 3.4 billion on the same period of 1996. However, as mentioned previously, it must be stressed that this figure has to be interpreted in the light of the Dutch extra-EU deficit and the country's transit role in EU trade. In January-July 1997 the growth rate of Dutch intra-EU dispatches was 6.1%, while the growth rate for arrivals was 2%.

As for extra-EU trade, **Germany** was the most important player in trade with EU partners, its 1996 share of total intra-EU trade amounting to around 21%. During the first seven months of 1997 it registered the second largest intra-EU trade surplus (ECU 14.5 billion) - an increase of ECU 2.7 billion compared with the previous year.

France ranked second in volume of trade with EU partners with a 1996 share of 15%. In the first seven months of 1997 its intra-EU trade registered a small surplus, improving by ECU 4.1 billion in comparison with the deficit registered in the corresponding period of 1996.

The **United Kingdom's** intra-EU deficit grew to ECU 7 billion. The UK's growth rates for arrivals and dispatches in this period were 17.5% and 15.9% respectively.

Italy saw moderate growth rates in the first seven months of 1997 compared with the same period of 1996. For dispatches the rate was 2.9% while the figure for arrivals was 9.1%. As a result, the intra-EU surplus went down by ECU 3.4 billion, amounting to ECU 4.1 billion.

For **Ireland**, between the first seven months of 1996 and 1997, both flows showed dynamic growths. Arrivals showed a higher growth rate than dispatches (16.9% and 12.5% respectively). The trade balance was stable at a surplus of ECU 5.6 billion.

With a total share of around 10% in 1996 **Belgium/Luxembourg (BLEU)** were also important players in intra-EU trade. During the first seven months of 1997 these countries recorded an overall surplus of ECU 7.5 billion. This represented a slight improvement (ECU 0.7 billion) compared with the previous year.

As far as the three new Member States are concerned, **Sweden** and **Finland** confirmed their small surpluses with their EU partners (ECU 1.1 billion and ECU 1.2 billion respectively), whereas **Austria** showed a deficit of ECU 5.9 billion.

Of the remaining four Member States (together accounting for around 12% of intra-EU trade in 1996), only **Denmark** displayed a small intra-EU surplus in the first seven months of 1997 (ECU 0.5 billion). **Spain**, **Portugal** and **Greece** registered deficits of ECU 3, 2.9, and 5.5 billion respectively.

¹ On 1 January 1993, following the abolition of customs controls in the EU, a new collection system for intra-EU data (Intrastat) was introduced. Instead of being derived from customs declarations, trade figures are now compiled from data provided directly by companies.

SEASONALLY ADJUSTED TIME SERIES

Extra-EU trade ¹

In July 1997 seasonally adjusted EU exports were 2.6% higher than in the previous month, thereby exceeding the ECU 61 billion level achieved in April. The year-on-year increase was, as in June, over 17%.

At just under ECU 55 billion, EU imports in July 1997 were slightly down by -0.8%. The year-on-year figures showed imports rising more steeply from month to month between May and July (11.5% in May, 13.4% in June and 15.5% in July).

As a result of the increase in EU exports and the parallel decrease in imports, the seasonally adjusted external trade surplus rose by ECU 2.1 billion to ECU 6.9 billion, thereby continuing the steady upward trend observed since December 1996.

Intra-EU trade ²

At ECU 95.9 billion, seasonally adjusted intra-EU trade in July 1997 was slightly down on the previous month (-0.7%). However, the upward trend observed since January 1997 appeared to continue, since the July figure was still higher than any previously recorded intra-EU trade figures.

..... Unadjusted series

———— Seasonally adjusted series

¹ The series described here relate to EUR 12 up to and including 1994 and to EUR 15 as from 1995 (when Finland, Sweden and Austria joined the EU).

² Dispatches are used to represent intra-EU trade. Figures for the years up to and including 1994 relate to EUR 12.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

PRODUCT LIST : SITC REV. 3

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

PRODUCT LIST : SITC REV. 3

7 Machinery and transport equipment

- 70 Complete industrial plant appropriate to section 7
- 71 Power–generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data–processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non–electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air–cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non–monetary (excluding gold, ores and concentrates)
