Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardised, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylised motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: for example, yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

Foreword

1. Introduction

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with non-member countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT. The accession of three new member states in 1995 led Eurostat to recalculate its historical series for the European Union to include Austria, Finland and Sweden; therefore figures published here concern the fifteen Members unless stated otherwise.

Trade statistics - both detailed and general results - have now proved their worth. They are an instrument of prime importance for all users, both public and private. For instance, they enable Community authorities to prepare for multilateral and bilateral negotiations on the common trade policy, they help European businesses carry out market surveys and thus improve their competitiveness and they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The monthly bulletin on external and intra-European Union trade, published by Eurostat in the B series, Short-term Trends, sets out to provide data on short-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on the one hand and between the Member States on the other.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

In view of the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the European Union, Eurostat has added a description of trade with these countries (Chapter 6) to that usually

given for Member States only. Eurostat also foresees broadening this information to include non-member countries (notably central and eastern European countries) in accordance with bilateral agreements yet to be finalised.

Statistics on external trade and intra-EU trade at the most detailed classification level are published monthly on CD-Rom (Series B: intra and extra-EU trade). They are also available on-line from Eurostat's database (Comext, Newcronos). Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External and Intra-EU Trade Statistical Yearbook (Series A)*".

2. Intra-EU trade

Statistics on trade between the Member States are based on Council Regulation (EC) N° 3330/91 of 7 November 1991 and on the various implementing regulations which have supplemented it or laid down rules on methodology, thresholds and forms. The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Intrastat. Its main features are:

- monthly statistical declarations sent directly by businesses to the competent national authorities;
- a system of thresholds abolishing all statistical obligations for almost two thirds of businesses;
- a close link with the VAT system.

Because of the introduction of this new system, the comparability of the intra-EU results prior to and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This was caused by the failure of some businesses to respond and to the introduction of thresholds which exclude the smallest businesses.

To correct this under-estimation, which varies according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- non-response by certain businesses;

- the movement of goods such as industrial plants, boats and aircraft, automobile and aircraft parts, military equipment and transport equipment repairs, which are not generally harmonised;
- the difference in statistical values for dispatches (FOB) and arrivals (CIF);
- the threshold effect: a business may be obliged to provide statistical information in one Member State while its client or supplier, depending on the case, in the partner country may be dispensed from providing any or certain types of statistical information (e.g. product classification);
- errors or omissions.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

3. *Extra-EU trade*

For data on the years 1978 to 1995, the Member States forwarded statistics on trade outside the European Union in accordance with a uniform methodology provided for in Council Regulation (EEC) N° 1736/75 and the regulations deriving from it. Since the beginning of 1996, data have been collected, transmitted and diffused in accordance with Council Regulation (EC) N° 1172/95 and its implementing rules (Council Regulation (EC) N° 840 196) which however retain the former methodological principles.

External trade statistics are usually recorded on the basis of customs declarations submitted by the declarant when clearing customs. The Single Administrative Document is used for this purpose. In some Member States, certain businesses are allowed to make a summary declaration.

Methodological notes and sources

1. Data sources

The tables in this publication on EU trade and that of the Member States were compiled by Eurostat using the detailed data forwarded by the Member States. Eurostat would like to take this opportunity to thank the departments concerned in the Member States for their co-operation, which makes it possible to compile these harmonised statistics and guarantee their quality.

Some of the tables in the first two parts describe the development of external trade as declared by some of the EU's most important trading partners. With the exception of Table 1C and the results concerning the EU, these tables were compiled from data taken from the tapes sent each month by the International Monetary Fund. The information in table 1C is taken from the Comtrade database, which is managed by the United Nations.

2. Coverage

Series concerning the European Union were recalculated to include Austria, Finland and Sweden, and therefore relate to the Union of 15 members unless stated otherwise.

2.1. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union. From 1 January 1997 the statistical territory of France and Spain was modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Réunion) and the Canary Islands. The series concerning the Union and these two Member States will be recalculated as soon as Eurostat disposes of the necessary data

In the meantime this modification has led to a growth in intra-EU trade and a reduction in extra-EU trade which in 1995 amounted to ECU 10.6 billion for exports and ECU 1.6 billion of imports. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost ECU 9 billion.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories which are not part of the EU customs territory.

2.2 Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable property

recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control (for working, processing or repairs) are also regarded as arrivals or dispatches.

The reader should also note that statistics on trade between the Member States do not cover goods in transit.

2.3. Extra-EU trade

Statistics on trade with non-member countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *imports* are goods which enter the statistical territory of the European Union from a non-member country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), or following outward processing, or inward processing, or processing under customs control (goods for working, processing or repair) immediately, or after bonded warehousing;
- *exports* are goods which leave the statistical territory of the European Union for a non-member country after being placed under the customs procedure for exports (definitive export) or outward processing (goods for working, processing) or repair or following inward processing.

Statistics on trade with non-member countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures.

The field covered by statistics on trade with non-member countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception, however, of goods in transit. Goods

placed in bonded warehouses and exports of goods after bonded warehousing are included in the definition of general trade.

3. Statistical data

3.1. Trading partners: countries and economic areas

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), the country (or Member State) of final destination of the goods is the partner country.

The trading partner in the case of an intra-European Union arrival is always the Member State of consignment of the goods, even when the goods originate in non-member countries and have been placed in free circulation in the Member State of consignment. For imports (extra-EU trade) the partner country is the country of origin except in certain cases (returned goods, objects of art, etc.). Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

3.2. Goods classification

The most detailed results published by Eurostat and accessible to the public on magnetic medium are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonised System (HS) and comprises more than 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of conversion tables drawn up by Eurostat on the basis of the CN.

3.3. Statistical value

Although the data is collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in European Currency Units (ECU). The annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only, annual values are calculated as the average of monthly values

3.3.1. Intra-European Union trade

The statistical value is based on the assessment for taxation purposes or the amount billed. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and insurance) which relate, for dispatches, to the journey to the border of the Member State from which the goods are dispatched and, for arrivals, to the journey to the border of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

3.3.2. Extra-European Union trade

The statistical value is based on the amount billed (real or provisional) or if it exists, on the customs value. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

3.4. Statistical secrecy

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it, and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only, or to exports only, or to only some of the variables recorded (value, statistical procedure, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of confidentiality on the results. In particular, subheadings which include confidential trade data are included at higher levels of aggregation and in totals.

4. Indices

4.1. Introduction

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis. These indices may be consulted in the TREND database.

4.2. Methodology

The data transmitted for external trade and intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators. The computer programs contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices. More detailed methodological notes may be obtained on request.

Trends in European Union trade

MAIN TRENDS IN WORLD TRADE

In the first ten months of 1998 the European Union's trade balance was ECU 15 billion in surplus, while in 1997 there was a surplus of ECU 38 billion.

During January-October 1998 the United States' deficit was ECU 199 billion (against a deficit of ECU 157 billion in 1997), while Japan's external trade showed a surplus of ECU 81 billion (compared with a surplus of ECU 57 billion in 1997).

During the period the EU as a whole confirmed its position as the world's leading exporter while the United States was the most important world outlet.

The euro-zone² had a surplus of ECU 69 billion in the first ten months of 1998.

During January-October 1998 the EU's¹ external trade balance recorded a surplus of ECU 14.6 billion: in 1997 it had been ECU 37.6 billion. The growth rates of extra-EU exports and imports were +2.6% and +6.9% respectively, lower than the +15.3% and +15.6% recorded for the flows in 1997.

In January-October 1998 the EU as a whole was the leading world exporter, accounting for 19.5% of world exports (ECU 609.5 billion), while in imports it ranked second with 18.2% (ECU 594.8 billion).

In the first ten months of 1998 the United States' trade deficit worsened by ECU 42.0 billion compared with 1997, reaching ECU 199.0 billion. The growth rates of exports and imports were , the first lower, the second higher than the EU at +1.0% and +7.1% respectively.

The United States took leading place in the world ranking of importers with a share of 21.6%, and was second amongst exporters with a share of 16.2%.

In January-October 1998 Japan's trade recorded a surplus of ECU 81.2 billion, up from the ECU 57.2 billion registered in 1997. The growth rates of Japanese exports and imports were -4.6% and -15.1% respectively.

As a result, the Japanese shares of world exports and imports were 9.4% and 6.5% respectively.

The euro-zone recorded a slightly decreased surplus of ECU 68.8 billion in January-October 1998, compared with ECU 71.7 billion in 1997. The growth rates of euro-zone exports and imports were +5.0% and +6.1% respectively.

1 The European Union's figures for 1998 are provisional and subject to frequent revisions. The symbol ":" indicates that the figure is not available.

2 Euro-zone/EUR-11: Member States participating in Phase III of Economic and Monetary Union (EMU) – Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, Netherlands, Austria, Portugal and Finland. The external trade of the EUR-11 is the total of the extra-EU trade of the EUR-11 and intra-EU trade between the EUR-11 and the 4 EU Member States not taking part in EMU (Denmark, Greece, Sweden and the UK). Since this includes figures derived from two different systems of data collection the EUR-11 totals must be interpreted with caution.

(*) EUROSTAT estimate

EXTRA-EU TRADE BY MAIN PARTNER

EU trade with its Central and Eastern European (CEEC) partners had the largest surplus in the first ten months of 1998 (ECU 23 billion), followed by Latin America (ECU 11 billion). In contrast, trade with Japan and China registered the highest deficits (ECU 28 billion and 21 billion respectively).

Trade flows with the **United States** (the EU's most important individual partner, with shares of 19.6% and 20.5% respectively for exports and imports in 1997) showed a surplus of ECU 6.8 billion in January-October 1998. This represents an improvement compared with 1997 when EU-US trade had a surplus of ECU 3.4 billion. Export and import growth rates were both strong at +13.9% and +11.3% respectively.

Between 1997 and 1998 the trade balance with **Japan** worsened by ECU 9.5 billion to an ECU 28.2 billion deficit. EU exports to Japan fell by -14.1%, while the growth rate of imports over the same period reached +10.5%.

EU trade with the **EFTA** countries improved to be in surplus by ECU 1.8 billion. The EU growth rates for exports and imports to these countries in the first ten months of 1998 were moderate in exports and weak in imports at +6.5% and +1.0% respectively.

In January-October 1998, EU exports to the **CEEC** and **CIS** grew (+14.7% and -5.1% respectively), while imports had a divergent pattern, with growth of +18.9% with the CEEC, and a fall of -10.0% for the CIS. The EU trade balances with these partners improved by ECU 1.1 billion for the CEEC and by ECU 1.3 billion for the CIS. As a result there were surpluses of ECU 22.7 billion with the CEEC and ECU 2.0 billion with the CIS.

Extra-EU exports to **Africa** rose by +12.2% while imports fell by -5.4%, resulting in a trade surplus of ECU 3.2 billion.

The export and import growth rates for **Latin America** were divergent at +10.3% and +1.2% respectively. This resulted in the trade surplus improving to ECU 10.9 billion.

EU exports to the **DAE** and **other Asian countries** in January-October 1998 show the effect of the financial crisis in the region, with falls of -23.3% and -11.1% respectively. The results were the opposite for imports, with growth rates of +14.1% for the DAE countries and +0.4% for other Asian countries. As a result, the EU balance with the DAE worsened to a deficit of ECU 13.8 billion and the surplus with the other Asian countries fell by 50% to ECU 7.7 billion.

The first ten months of 1998 saw a rise in EU exports and imports to **China** (+9.8% and +12.8% respectively). As a result, the EU-China trade deficit rose by ECU 2.7 billion to reach ECU 20.9 billion.

Trade with **Oceania** showed a surplus of ECU 4.3 billion in January-October 1998, a fall of ECU 1.5 billion in comparison with 1997. Growth rates were divergent at -0.9% for exports and +17.8% for imports.

EXTRA-EU TRADE BY MAIN PRODUCT

In January-October 1998 the EU's trade in machinery and transport equipment recorded the greatest surplus (ECU 67 billion) while fuel products showed the largest deficit (ECU 44 billion).

In first ten months of 1998 the deficit on **primary goods (SITC 0-4)** fell slightly compared with 1997 to ECU 72.4 billion.

The EU trade deficit in fuel products (SITC 3) fell to ECU 43.7 billion while the deficit for food, beverages and tobacco (SITC 0+1) fell to ECU 4.7 billion. The deficit for other raw materials except fuel (SITC 2+4) also fell to ECU 24.0 billion.

Between 1997 and 1998 the growth rates of the flows for primary goods (which in 1997 accounted for 11% of total extra-EU exports and 26% of imports) were -8.2% for exports and -9.6% for imports. This fall was mainly due to fuel products (SITC 3), which recorded falls of -18.5% for exports and -21.7% for imports.

Manufactured products (SITC 5-8) accounted for 87% of total extra-EU exports and 71% of imports in 1997. During January-October 1998 the EU's external trade showed a surplus of ECU 92.3 billion compared with ECU 121.5 billion for 1997.

In first ten months of 1998 the EU surplus for chemical products (SITC 5) fell to ECU 32.9 billion while that for machinery and transport equipment (SITC 7) fell to ECU 67.4 billion; other manufactured goods (SITC 6+8) recorded a deficit of ECU 8.0 billion.

Export and import growth rates for manufactured goods were +3.1% and +11.4% respectively.

(*) in percentage points

EXTRA-EU TRADE BY MEMBER STATE

Germany had the largest extra-EU surplus, followed by Italy and France, while the Netherlands and the United Kingdom registered the highest external deficits.

Germany is the most important EU player in trade with third countries. Its 1997 share of total extra-EU exports amounted to 28% while the figure for imports was 24%. In January-October 1998 **Germany** also had the largest extra-EU trade surplus, ECU 31.5 billion. This was an deterioration of ECU 0.9 billion compared with 1997. Germany's growth rates for exports and imports were +5.8% and +7.9% respectively.

The second-ranking country in trade value terms is the **United Kingdom** (which in 1997 accounted for 15% and 19% of exports and imports respectively). The UK also had the second largest trade deficit (ECU 26.3 billion) in first ten months of 1998. This worsened by ECU 13.6 billion over 1997. UK exports fell by -5.4%, while imports grew by +8.5%.

During January-October 1998 **France's** growth rates for exports and imports were +6.7% and +5.1% respectively. As a consequence, France's trade surplus grew to ECU 14.7 billion.

Italy recorded a surplus of ECU 16.7 billion, a fall of ECU 2.2 billion in comparison with 1997. The growth rates of extra-EU exports and extra-EU imports were +0.7% and +4.7% respectively.

During first ten months of 1998 the extra-EU deficit of the **Netherlands** grew by 3.0 billion compared with 1997. It has the largest deficit among the EU Member States (ECU 29.2 billion). This deficit must, however, be interpreted in conjunction with the intra-EU Dutch surplus and its transit role in EU trade. Between 1997 and 1998, Dutch exports and imports recorded growth rates of +4.2% and +7.5% respectively.

During January-October 1998 the **Belgium/Luxembourg (BLEU)** growth rates for

exports and imports were +0.3% and +7.6% respectively. The trade deficit fell to ECU 4.1 billion.

Spain saw growth rates of +0.3% for exports and +2.5% for imports, which produced a rise in its deficit to ECU 6.5 billion.

In first ten months of 1998 **Sweden** had a surplus of ECU 10.7 billion in its extra-EU trade balance. Sweden registered growth rates of -1.5% for exports and +2.0% for imports.

During January-October 1998 **Austria's** growth rates for exports and imports were +2.8% and +6.9% respectively, resulting in a surplus of ECU 3.2 billion.

In first ten months of 1998 **Finland** had a surplus of ECU 6.1 billion in its extra-EU trade balance. Finland recorded growth rates of +3.1% for exports and +1.6% for imports and is one of the two Member states where exports grew faster than imports.

Denmark had growth rates of -3.6% for exports and +4.0% for imports and its surplus fell by 36% to ECU 1.4 billion.

Ireland registered very high growth rates in January-October 1998 (+22.2% for exports and +22.7% for imports), and a surplus of ECU 2.7 billion.

Greece recorded growth rates of +0.0% for exports and +8.6% for imports. Its deficit fell to ECU 3.3 billion.

Portugal registered growth rates of +1.3% for exports and +4.1% for imports. Its deficit rose slightly to ECU 3.0 billion.

INTRA-EU TRADE BY MEMBER STATE¹

In January-October 1998 the Netherlands and Germany produced the largest intra-EU surpluses while the United Kingdom and Austria recorded the highest intra-EU deficits.

In first ten months of 1998 intra-EU trade showed a total value for dispatches (i.e. exports, which are the more reliable measure of intra-EU trade) of ECU 1,031.9 billion. This represented an rise of +6.8% compared with 1997. Intra-EUR11 dispatches were ECU 671.8 billion, an rise of +8.1% over 1997.

As for extra-EU trade, **Germany** is the most important player in trade with EU partners, its 1997 share of total intra-EU trade amounting to around 21%. During first ten months of 1998 it registered an intra-EU trade surplus of ECU 26.6 billion - up ECU 8.7 billion compared with 1997. The growth rate for dispatches was greater than the EU average, at +9.8%, while arrivals (+6.1%) was less.

France ranked second in volume of trade with EU partners with a 1997 share of 15%. In January-October 1998 its intra-EU trade had a deficit of ECU 5.1 billion. Growth rates for dispatches and arrivals were greater than the EU average, at +8.3% and +12.3% respectively.

The **United Kingdom's** intra-EU deficit worsened to ECU 8.5 billion (it is the largest deficit). The UK's growth rates for arrivals and dispatches in this period were low at +2.3% and +3.2% respectively.

The **Netherlands** was the Member State with the largest intra-EU surplus. During January-October 1998 it grew to ECU 38.8 billion, up by 0.6 billion on 1997. However, as mentioned previously, it must be stressed that this figure has to be interpreted in the light of the Dutch extra-EU deficit and its transit role in EU trade. The growth rates of Dutch intra-EU dispatches, at +2.5%, and arrivals, at +2.9%, were less than the average.

Italy had less than average growth rates of +4.7% for dispatches and +6.4% for arrivals in 1998 compared with 1997. As a result, the intra-EU surplus fell by ECU 1.3 billion, to ECU 3.8 billion.

During January-October 1998 **Belgium/Luxembourg (BLEU)** recorded an overall surplus of ECU 14.0 billion. This represented an improvement of ECU 2.0 billion over 1997. Growth rates were less than the EU average (+6.3% for dispatches and +4.9% for arrivals).

Spain had high growth rates of +10.1% for dispatches and +14.2% for arrivals. Its deficit rose to ECU 7.9 billion.

Sweden had a surplus of ECU 1.9 billion, and growth rates of +9.1% for dispatches and +8.3% for arrivals.

Austria had the second largest deficit, ECU 8.4 billion, with low growth rates of +4.0% for dispatches and +3.5% for arrivals.

Denmark also had low growth rates (+1.7% for the dispatches, +5.5% for the arrivals), its trade was in balance.

Between 1997 and 1998 **Ireland** had very divergent growth rates for dispatches and arrivals of +25.1% and +9.7% respectively. As a result the trade surplus grew to ECU 13.8 billion.

Portugal's intra-EU trade was sluggish, with growth rates of +3.9% for dispatches and +7.5% for arrivals. Its trade deficit was ECU 6.0 billion.

Finland's dispatches rose faster than arrivals (+12.0% and +7.9% respectively), and as a result its surplus rose to ECU 2.3 billion.

Greece had a deficit of ECU 8.0 billion, an increase of ECU 0.7 billion to 1997, with negative growth rates of -15.0% for dispatches and -10.6% for arrivals.

¹ On 1 January 1993, following the abolition of customs controls in the EU, a new collection system for intra-EU data (Intrastat) was introduced. Instead of being derived from customs declarations, trade figures are now compiled from data provided directly by companies.

Source: EUROSTAT-COMEXT

(1) Since the introduction of IntraStat the value of dispatches has been consistently higher than the value of arrivals. In theory, as dispatches are declared FOB and arrivals CIF, the value of arrivals should be about 1% higher than dispatches. Eurostat believes that dispatches are the more reliable measure as arrivals are considered to be underestimated.

Source: EUROSTAT-COMEXT

(1) Since the introduction of Intrastat the value of dispatches has been consistently higher than the value of arrivals. In theory, as dispatches are declared FOB and arrivals CIF, the value of arrivals should be about 1% higher than dispatches. Eurostat believes that dispatches are the more reliable measure as arrivals are considered to be underestimated.

(*) in percentage points

SEASONALLY ADJUSTED TIME SERIES

Extra-EU trade¹

Seasonally adjusted EU exports fell by -2.6% in September and by -2.2% in October 1998, reaching ECU 59.0 billion.

Seasonally adjusted EU imports fell by -1.0% in September 1998, then fell by -1.2% in October, to reach ECU 58.8 billion.

The seasonally adjusted external trade surplus was ECU 0.8 billion in September and ECU 0.2 billion in October 1998. The seasonally adjusted trade balance has been in surplus since December 1994.

Intra-EU trade²

Seasonally adjusted intra-EU trade fell -3.3% in September and rose +2.3% in October 1998 to ECU 103.4 billion.

..... Unadjusted series

_____ Seasonally adjusted series

¹ The series described here relate to EU-12 up to and including 1994 and to EU-15 as from 1995 (when Finland, Sweden and Austria joined the EU).

² Dispatches are used to represent intra-EU trade. Figures for the years up to and including 1994 relate to EU-12.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

PRODUCT LIST : SITC REV. 3

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

PRODUCT LIST : SITC REV. 3

7 Machinery and transport equipment

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
