<p><b>Press releases:</b> Eurostat publishes around 100 press releases every year in connection with the release of new data. The press releases include the key figures on the EU, the Member States and their partners. They are provided free of charge. They are also available on the Internet as soon as they are published: <a href="http://www.europa.eu.int/comm/eurostat/">www.europa.eu.int/comm/eurostat/</a></p>					Paper Html PDF
<p><b>Statistics in focus:</b> This collection is published regularly by Eurostat and provides up-to-date summaries of the main results of statistical surveys, studies and analyses. It covers all themes and consists of about four to eight pages per issue. Eurostat issues around 150 <i>Statistics in Focus</i> per year. Available as single copies or on subscription.</p>					Paper PDF
<p><b>Key indicators:</b> This collection provides the main indicators on a theme or sub-theme in an easy-to-carry booklet of up to 100 pages. Available as single copies or on subscription.</p>					Paper Html
<p><b>Panorama of the European Union:</b> This collection highlights the features and trends of a multi-sectoral theme or a sectoral sub-theme. The publications consist of around 200 pages and include analysis as well as tables and graphs. Available as single copies or on subscription.</p>					Paper CD-ROM
<p><b>Methods and nomenclatures</b> are intended for specialists who want to consult the methodologies and nomenclatures used for a theme, a sub-theme or a sector. Available as single copies.</p>					Paper CD-ROM
<p><b>Detailed tables</b> are intended for specialists. They present part, or all, of the statistical data compiled on a theme, sub-theme or sector. Available as single copies or on subscription.</p>					Paper CD-ROM
<p><b>Studies and research</b> summarise the results of European statistical studies and research and are intended for specialists. Available as single copies or on subscription.</p>					Paper CD-ROM
<p><b>Catalogues</b> provide rapid access to concise information on Eurostat's products and services. They are free of charge and include the <i>Mini guide</i>, a selection of Eurostat products and services, and <i>Statistical references</i>, the quarterly newsletter on Eurostat's latest products and services.</p>					Paper

## ..... Immediate access to harmonized statistical data

### **Eurostat Data Shops:**

#### **A personalised data retrieval service**

In order to provide the greatest possible number of people with access to high-quality statistical information, Eurostat has developed an extensive network of Data Shops (').

Data Shops provide a wide range of **tailor-made services**:

- ★ immediate information searches undertaken by a team of experts in European statistics;
- ★ rapid and personalised response that takes account of the specified search requirements and intended use;
- ★ a choice of data carrier depending on the type of information required.

Information can be requested by phone, mail, fax or e-mail.

(') See list of Eurostat Data Shops at the end of the publication.

### **Internet:**

#### **Essentials on Community statistical news**

- ★ Euro indicators: more than 100 indicators on the euro-zone; harmonized, comparable, and free of charge;
- ★ About Eurostat: what it does and how it works;
- ★ Products and databases: a detailed description of what Eurostat has to offer;
- ★ Indicators on the European Union: convergence criteria; euro yield curve and further main indicators on the European Union at your disposal;
- ★ Press releases: direct access to all Eurostat press releases.

For further information, visit us on the Internet at: [www.europa.eu.int/comm/eurostat/](http://www.europa.eu.int/comm/eurostat/)

---

A great deal of additional information on the European Union is available on the Internet. It can be accessed through the Europa server (<http://europa.eu.int>).

---

Eurostat is the Statistical Office of the European Communities. Its task is to provide the European Union with statistics at a European level, that allow comparisons to be made between countries and regions. Eurostat consolidates and harmonizes the data collected by the Member States.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of the information, Eurostat has set up a publications and services programme.

This programme makes a clear distinction between general and specialist users and particular collections have been developed for these different groups. The collections *Press releases*, *Statistics in focus*, *Panorama of the European Union*, *Key indicators* and *Catalogues* are aimed at general users. They give immediate key information through analyses, tables, graphs and maps.

The collections *Methods and nomenclatures*, *Detailed tables* and *Studies and research* suit the needs of the specialist who is prepared to spend more time analysing and using very detailed information and tables.

All Eurostat products are disseminated through the Data Shop network or the sales agents of the Office for Official Publications of the European Communities. Data Shops are available in 12 of the 15 Member States as well as in Switzerland, Norway and the United States. They provide a wide range of services from simple database extracts to tailor-made investigations. The information is provided on paper and/or in electronic form via e-mail, on diskette or CD-ROM.

As part of the new programme Eurostat has developed its website. It includes a broad range of on-line information on Eurostat products and services, newsletters, catalogues, on-line publications as well as indicators on the euro-zone.

## Foreword

### 1. Introduction

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with non-member countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT. The accession of three new member states in 1995 led Eurostat to recalculate its historical series for the European Union to include Austria, Finland and Sweden; therefore figures published here concern the fifteen Members unless stated otherwise.

Trade statistics - both detailed and general results - have now proved their worth. They are an instrument of prime importance for all users, both public and private. For instance, they enable Community authorities to prepare for multilateral and bilateral negotiations on the common trade policy, they help European businesses carry out market surveys and thus improve their competitiveness and they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The monthly bulletin on external and intra-European Union trade, published by Eurostat in the B series, Short-term Trends, sets out to provide data on short-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on the one hand and between the Member States on the other.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

In view of the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the European Union, Eurostat has added a description of trade with these countries (Chapter 6) to that usually given for Member States only. Eurostat also foresees

broadening this information to include non-member countries (notably central and eastern European countries) in accordance with bilateral agreements yet to be finalised.

Statistics on external trade and intra-EU trade at the most detailed classification level are published monthly on CD-Rom (Series B: intra and extra-EU trade). They are also available on-line from Eurostat's database (Comext, Newcronos). Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External and Intra-EU Trade Statistical Yearbook (Series A)*".

### 2. Intra-EU trade

Statistics on trade between the Member States are based on Council Regulation (EC) N° 3330/91 of 7 November 1991 and on the various implementing regulations which have supplemented it or laid down rules on methodology, thresholds and forms. The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Intrastat. Its main features are:

- monthly statistical declarations sent directly by businesses to the competent national authorities;
- a system of thresholds abolishing all statistical obligations for almost two thirds of businesses;
- a close link with the VAT system.

Because of the introduction of this new system, the comparability of the intra-EU results prior to and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This was caused by the failure of some businesses to respond and to the introduction of thresholds which exclude the smallest businesses.

To correct this under-estimation, which varies according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- non-response by certain businesses;

- the movement of goods such as industrial plants, boats and aircraft, automobile and aircraft parts, military equipment and transport equipment repairs, which are not generally harmonised;
- the difference in statistical values for dispatches (FOB) and arrivals (CIF);
- the threshold effect: a business may be obliged to provide statistical information in one Member State while its client or supplier, depending on the case, in the partner country may be dispensed from providing any or certain types of statistical information (e.g. product classification);
- errors or omissions.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

### **3. *Extra-EU trade***

For data on the years 1978 to 1995, the Member States forwarded statistics on trade outside the European Union in accordance with a uniform methodology provided for in Council Regulation (EEC) N° 1736/75 and the regulations deriving from it. Since the beginning of 1996, data have been collected, transmitted and diffused in accordance with Council Regulation (EC) N° 1172/95 and its implementing rules (Council Regulation (EC) N° 840 196) which however retain the former methodological principles.

External trade statistics are usually recorded on the basis of customs declarations submitted by the declarant when clearing customs. The Single Administrative Document is used for this purpose. In some Member States, certain businesses are allowed to make a summary declaration.

## Methodological notes and sources

### 1. Data sources

The tables in this publication on EU trade and that of the Member States were compiled by Eurostat using the detailed data forwarded by the Member States. Eurostat would like to take this opportunity to thank the departments concerned in the Member States for their co-operation, which makes it possible to compile these harmonised statistics and guarantee their quality.

Some of the tables in the first two parts describe the development of external trade as declared by some of the EU's most important trading partners. With the exception of Table 1C and the results concerning the EU, these tables were compiled from data taken from the tapes sent each month by the International Monetary Fund. The information in table 1C is taken from the Comtrade database, which is managed by the United Nations.

### 2. Coverage

Series concerning the European Union were recalculated to include Austria, Finland and Sweden, and therefore relate to the Union of 15 members unless stated otherwise.

#### 2.1. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union. From 1 January 1997 the statistical territory of France and Spain was modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Réunion) and the Canary Islands.

In the meantime this modification has led to a growth in intra-EU trade and a reduction in extra-EU trade which in 1995 amounted to ECU 10.6 billion for exports and ECU 1.6 billion of imports. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost ECU 9 billion.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories which are not part of the EU customs territory.

#### 2.2. Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable property recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control (for working, processing or repairs) are also regarded as arrivals or dispatches.

The reader should also note that statistics on trade between the Member States do not cover goods in transit.

#### 2.3. Extra-EU trade

Statistics on trade with non-member countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *imports* are goods which enter the statistical territory of the European Union from a non-member country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), or following outward processing, or inward processing, or processing under customs control (goods for working, processing or repair) immediately, or after bonded warehousing;
- *exports* are goods which leave the statistical territory of the European Union for a non-member country after being placed under the customs procedure for exports (definitive export) or outward processing (goods for working, processing) or repair or following inward processing.

Statistics on trade with non-member countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures.

The field covered by statistics on trade with non-member countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception, however, of goods in transit. Goods placed in bonded warehouses and exports of goods after bonded warehousing are included in the definition of general trade.

### **3. Statistical data**

#### **3.1. Trading partners: countries and economic areas**

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), the country (or Member State) of final destination of the goods is the partner country.

The trading partner in the case of an intra-European Union arrival is always the Member State of consignment of the goods, even when the goods originate in non-member countries and have been placed in free circulation in the Member State of consignment. For imports (extra-EU trade) the partner country is the country of origin except in certain cases (returned goods, objects of art, etc.). Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

#### **3.2. Goods classification**

The most detailed results published by Eurostat and accessible to the public on magnetic medium are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonised System (HS) and comprises more than 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of conversion tables drawn up by Eurostat on the basis of the CN.

#### **3.3. Statistical value**

Although the data is collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in European Currency Units (ECU). The annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only, annual values are calculated as the average of monthly values

##### **3.3.1. Intra-European Union trade**

The statistical value is based on the assessment for taxation purposes or the amount billed. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and

insurance) which relate, for dispatches, to the journey to the border of the Member State from which the goods are dispatched and, for arrivals, to the journey to the border of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

##### **3.3.2. Extra-European Union trade**

The statistical value is based on the amount billed (real or provisional) or if it exists, on the customs value. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

#### **3.4. Statistical secrecy**

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it, and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only, or to exports only, or to only some of the variables recorded (value, statistical procedure, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of confidentiality on the results. In particular, subheadings which include confidential trade data are included at higher levels of aggregation and in totals.

### **4. Indices**

#### **4.1. Introduction**

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis. These indices may be consulted in the TREND database.

#### 4.2. *Methodology*

The data transmitted for external trade and intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators. The computer programs

contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices. More detailed methodological notes may be obtained on request.

## **Trends in European Union trade**

## MAIN TRENDS IN WORLD TRADE

In the first ten months of 2000 the European Union's trade balance was euro -73 billion in deficit, while in 1999 there was a deficit of euro -15 billion.

During January-October 2000 the United States' deficit was euro 419 billion (against a deficit of euro 272 billion in 1999), while Japan's external trade showed a surplus of euro 93 billion (compared with a surplus of euro 85 billion in 1999).

During the period the EU as a whole confirmed its position as the world's leading exporter while the United States was the most important world outlet.

The euro-zone<sup>2</sup> had a surplus of euro 10 billion in the first ten months of 2000.

During January-October 2000 the EU's<sup>1</sup> external trade balance recorded a deficit of euro 73.5 billion: in 1999 it had been euro 15.1 billion. The growth rates of extra-EU exports and imports were +23.7% and +32.3% respectively, higher than the +3.6% and +9.7% recorded for the flows in 1999.

In January-October 2000 the EU as a whole was the leading world exporter, accounting for 17.7% of world exports (euro 764.2 billion), while in imports it ranked second with 17.8% (euro 837.7 billion).

In the first ten months of 2000 the United States' trade deficit worsened by euro 147.8 billion compared with 1999, reaching euro 419.4 billion. The growth rates of exports and imports were higher than to the EU at +30.3% and +38.5% respectively.

The United States took leading place in the world ranking of importers with a share of 23.5%, and was second amongst exporters with a share of 15.9%.

In January-October 2000 Japan's trade recorded a surplus of euro 93.5 billion, up from the euro 85.2 billion registered in 1999. The growth rates of Japanese exports and imports were +34.3% and +43.2% respectively.

As a result, the Japanese shares of world exports and imports were 9.9% and 7.1% respectively.

The euro-zone recorded a slightly decreased surplus of euro 9.7 billion in January-October 2000, compared with euro 44.5 billion in 1999. The growth rates of euro-zone exports and imports were +21.4% and +28.4% respectively.

1 The European Union's figures are provisional and subject to frequent revisions. The symbol "\*" indicates that the figure is not available.

2 Euro-zone/EUR-11: Member States participating in Phase III of Economic and Monetary Union (EMU) – Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, Netherlands, Austria, Portugal and Finland. The external trade of the EUR-11 is the total of the extra-EU trade of the EUR-11 and intra-EU trade between the EUR-11 and the 4 EU Member States not taking part in EMU (Denmark, Greece, Sweden and the UK). Since this includes figures derived from two different systems of data collection the EUR-11 totals must be interpreted with caution.

## EXTRA-EU TRADE BY MAIN PARTNER

**EU trade with the USA had the largest surplus in the first ten months of 2000 (euro 29 billion), followed by its Central and Eastern European (CEEC) partners (euro 18 billion). In contrast, trade with China and Japan registered the highest deficits (euro 37 billion and 34 billion respectively).**

Trade flows with the **United States** (the EU's most important individual partner, with shares of 24.1% and 20.6% respectively for exports and imports in 1999) showed a surplus of euro 28.7 billion in January-October 2000. This represents an improvement compared with 1999 when EU-US trade had a surplus of euro 17.2 billion. Export and import growth rates were both particularly strong at +26.9% and +21.8% respectively.

Between 1999 and 2000 the trade balance with **Japan** worsened by euro 4.2 billion to an euro 34.0 billion deficit. EU exports to Japan grew by +28.1%, while the growth rate of imports over the same period reached +21.0%.

EU trade with the **EFTA** countries worsened to be in deficit by euro 5.7 billion. The EU growth rates for exports and imports to these countries in the first ten months of 2000 were strong in exports and particularly strong in imports at +12.9% and +26.5% respectively.

In January-October 2000, EU exports to the **CEEC** grew by +24.0%, while imports had growth of +28.7%. The EU trade balance with these countries improved by euro 1.1 billion. As a result there was a surplus of euro 22.7 billion with the CEEC.

EU trade with the **CIS** grew by +30.4% for exports and +74.4% for imports. The trade balance

worsened by euro 13.7 billion to a euro 22.1 billion deficit.

Extra-EU exports to **Africa** rose by +16.2% while imports rose by +47.7%, resulting in a trade surplus of euro 13.8 billion.

The export and import growth rates for **Latin America** were divergent at +16.7% and +29.4% respectively. This resulted in the trade surplus decreasing to euro 3.6 billion.

EU exports to the **DAE** and **other Asian countries** in January-October 2000 show the recovery from the financial crisis in the region, with growths of +32.5% and +21.4% respectively. The results were similar for imports, with growth rates of +28.5% for the DAE countries and +46.6% for other Asian countries. As a result, the EU balance with the DAE worsened to a deficit of euro 21.9 billion and the deficit with the other Asian countries fell by 328% to euro 8.9 billion.

The first ten months of 2000 saw a rise in EU exports and imports to **China** (+26.7% and +41.2% respectively). As a result, the EU-China trade deficit rose by euro 12.4 billion to reach euro 36.9 billion.

Trade with **Oceania** showed a surplus of euro 6.3 billion in January-October 2000, a growth of euro 0.4 billion in comparison with 1999. Growth rates were divergent at +14.9% for exports and +21.2% for imports.

## EXTRA-EU TRADE BY MAIN PRODUCT

**In January-October 2000 the EU's trade in chemicals recorded the greatest surplus (euro 47 billion) while fuel products showed the largest deficit (euro 93 billion).**

In first ten months of 2000 the deficit on **primary goods (SITC 0-4)** rose slightly compared with 1999 to euro 122.8 billion.

The EU trade deficit in fuel products (SITC 3) rose to euro 92.6 billion while the deficit for food, beverages and tobacco (SITC 0+1) rose to euro 4.3 billion. The deficit for other raw materials except fuel (SITC 2+4) fell to euro 25.9 billion.

Between 1999 and 2000 the growth rates of the flows for primary goods (which in 1999 accounted for 10% of total extra-EU exports and 22% of imports) were +32.0% for exports and +51.5% for imports. This increase was mainly due to fuel products (SITC 3), which recorded rises of +86.4% for exports and +95.2% for imports.

**Manufactured products (SITC 5-8)** accounted for 87% of total extra-EU exports and 76% of imports in 1999. During January-October 2000 the EU's external trade showed a surplus of euro 58.2 billion compared with euro +59.7 billion for 1999.

In first ten months of 2000 the EU surplus for chemical products (SITC 5) rose to euro 47.1 billion while that for machinery and transport equipment (SITC 7) fell to euro 35.8 billion; other manufactured goods (SITC 6+8) recorded a deficit of euro 24.7 billion.

Export and import growth rates for manufactured goods were +23.0% and +26.1% respectively.

## EXTRA-EU TRADE BY MEMBER STATE

**Germany had the largest extra-EU surplus, followed by Sweden and Ireland, while the Netherlands and the United Kingdom registered the highest external deficits.**

Germany is the most important EU player in trade with third countries. Its 1999 share of total extra-EU exports amounted to 29% while the figure for imports was 24%. In January-October 2000 **Germany** also had the largest extra-EU trade surplus, euro 14.8 billion. This was an deterioration of euro 8.5 billion compared with 1999. Germany's growth rates for exports and imports were +20.6% and +29.3% respectively.

The second-ranking country in trade value terms is the **United Kingdom** (which in 1999 accounted for 14% and 18% of exports and imports respectively). The UK also had the second largest trade deficit (euro 45.6 billion) in first ten months of 2000. This worsened by euro 15.7 billion over 1999. UK exports grew by +25.4%, while imports grew by +32.4%.

During January-October 2000 **France's** growth rates for exports and imports were +17.1% and +30.2% respectively. As a consequence, France's trade surplus fell to euro 5.9 billion.

**Italy** recorded a surplus of euro 3.3 billion, a fall of euro 7.0 billion in comparison with 1999. The growth rates of extra-EU exports and extra-EU imports were +27.4% and +42.6% respectively.

During first ten months of 2000 the extra-EU deficit of the **Netherlands** grew by 13.1 billion compared with 1999. It has the largest deficit among the EU Member States (euro 49.7 billion). This deficit must, however, be interpreted in conjunction with the intra-EU Dutch surplus and its transit role in EU trade. Between 1999 and 2000, Dutch exports and imports recorded growth rates of +27.1% and +31.7% respectively.

During January-October 2000 the **Belgium/Luxembourg (BLEU)** growth rates for

exports and imports were +26.8% and +24.8% respectively. The trade deficit fell to euro 6.1 billion.

**Spain** saw growth rates of +27.4% for exports and +41.3% for imports, which produced a rise in its deficit to euro 16.3 billion.

In first ten months of 2000 **Sweden** had a surplus of euro 10.9 billion in its extra-EU trade balance. Sweden registered growth rates of +27.6% for exports and +39.4% for imports.

During January-October 2000 **Austria's** growth rates for exports and imports were +25.4% and +32.1% respectively, resulting in a surplus of euro 3.3 billion.

In first ten months of 2000 **Finland** had a surplus of euro 6.5 billion in its extra-EU trade balance. Finland recorded growth rates of +30.8% for exports and +36.7% for imports.

**Denmark** had growth rates of +14.8% for exports and +21.4% for imports and its surplus fell by 19% to euro 1.7 billion.

**Ireland** registered high growth rates in January-October 2000 (+33.9% for exports and +22.9% for imports), and a surplus of euro 7.9 billion.

**Greece** recorded growth rates of +46.8% for exports and +49.3% for imports. Its deficit fell to euro 5.1 billion.

**Portugal** registered growth rates of +32.5% for exports and +31.1% for imports. Its deficit rose slightly to euro 4.6 billion.

## INTRA-EU TRADE BY MEMBER STATE<sup>1</sup>

**In January-October 2000 the Netherlands and Germany produced the largest intra-EU surpluses while Spain and France recorded the highest intra-EU deficits.**

In first ten months of 2000 intra-EU trade showed a total value for dispatches (i.e. exports, which are the more reliable measure of intra-EU trade) of euro 1,268.9 billion. This represented a rise of +16.4% compared with 1999. Intra-EUR11 dispatches were euro 825.8 billion, a rise of +16.0% over 1999.

As for extra-EU trade, **Germany** is the most important player in trade with EU partners, its 1999 share of total intra-EU trade amounting to around 21%. During first ten months of 2000 it registered an intra-EU trade surplus of euro 33.0 billion - up euro 4.0 billion compared with 1999. The growth rate for dispatches was less than the EU average, at +15.5%, while arrivals (+15.8%) was equal.

**France** ranked second in volume of trade with EU partners with a 1999 share of 15%. In January-October 2000 its intra-EU trade had a deficit of euro 13.6 billion. Growth rates for dispatches and arrivals were the first, less than, the second, greater than the EU average, at +13.9% and +19.2% respectively.

The **United Kingdom's** intra-EU deficit improved to euro 7.0 billion. The UK's growth rates for arrivals and dispatches in this period were the first, high, the second, low at +18.5% and +12.9% respectively.

The **Netherlands** was the Member State with the largest intra-EU surplus. During January-October 2000 it grew to euro 61.7 billion, up by 16.1 billion on 1999. However, as mentioned previously, it must be stressed that this figure has to be interpreted in the light of the Dutch extra-EU deficit and its transit role in EU trade. The growth rates of Dutch intra-EU dispatches, at +20.7%, and arrivals, at +13.0%, were the first, greater than, the second, less than the average.

**Italy** had a less than average growth rate of +12.6% for dispatches and an average +15.7% for arrivals in 2000 compared with 1999. As a result, the intra-EU deficit fell by euro 2.9 billion, to euro 1.1 billion.

During January-October 2000 **Belgium/Luxembourg (BLEU)** recorded an overall surplus of euro 17.8 billion. This represented an improvement of euro 2.3 billion over 1999. Growth rates were greater than the EU average (+17.6% for dispatches and +18.1% for arrivals).

**Spain** had high growth rates of +18.5% for dispatches and +18.2% for arrivals. Its deficit rose to euro 16.1 billion.

**Sweden** had a surplus of euro 2.4 billion, and growth rates of +15.8% for dispatches and +17.9% for arrivals.

**Austria** had a deficit of euro 7.4 billion, with low growth rates of +15.4% for dispatches and +11.1% for arrivals.

**Denmark** at the opposite had high growth rates for dispatches (+17.2%) and low for arrivals (+13.1%), its trade was in surplus.

Between 1999 and 2000 **Ireland** had divergent growth rates for dispatches and arrivals of +17.3% and +25.9% respectively. As a result the trade surplus grew to euro 14.5 billion.

**Portugal's** intra-EU trade was sluggish, with growth rates of +6.9% for dispatches and +8.4% for arrivals. Its trade deficit was euro 8.7 billion.

**Finland's** dispatches rose faster than arrivals (+22.9% and +17.7% respectively), and as a result its surplus rose to euro 4.0 billion.

**Greece** had a deficit of euro 10.4 billion, the same as in 1999, with negative growth rate of -0.9% for dispatches and a low +2.5% for arrivals.

<sup>1</sup> On 1 January 1993, following the abolition of customs controls in the EU, a new collection system for intra-EU data (Intrastat) was introduced. Instead of being derived from customs declarations, trade figures are now compiled from data provided directly by companies.

(1) Since the introduction of Intra-stat the value of dispatches has been consistently higher than the value of arrivals. In theory, as dispatches are declared FOB and arrivals CIF, the value of arrivals should be about 1% higher than dispatches. Eurostat believes that dispatches are the more reliable measure as arrivals are considered to be underestimated.

Source: EUROSTAT-COMEXT

(1) Since the introduction of Intrastat the value of dispatches has been consistently higher than the value of arrivals. In theory, as dispatches are declared FOB and arrivals CIF, the value of arrivals should be about 1% higher than dispatches. Eurostat believes that dispatches are the more reliable measure as arrivals are considered to be underestimated.

(\*) in percentage points

## SEASONALLY ADJUSTED TIME SERIES

### Extra-EU trade<sup>1</sup>

Seasonally adjusted EU exports rose by +1.0% in November and fell by -0.9% in December 2000, reaching euro 83.8 billion.

Seasonally adjusted EU imports rose by +2.6% in November 2000, then rose by +1.9% in December, to reach euro 95.0 billion.

The seasonally adjusted external trade deficit was euro -8.6 billion in November and euro -11.2 billion in December 2000.

### Intra-EU trade<sup>2</sup>

Seasonally adjusted intra-EU trade rose +1.9% in November and fell -1.1% in December 2000 to euro 126.2 billion.

..... Unadjusted series

\_\_\_\_\_ Seasonally adjusted series

<sup>1</sup> The series described here relate to EU-12 up to and including 1994 and to EU-15 as from 1995 (when Finland, Sweden and Austria joined the EU).

<sup>2</sup> Dispatches are used to represent intra-EU trade. Figures for the years up to and including 1994 relate to EU-12.

## PRODUCT LIST : SITC REV. 3

### **0 Food and live animals**

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

### **1 Beverages and tobacco**

- 11 Beverages
- 12 Tobacco and tobacco manufactures

### **2 Crude materials, inedible, except fuels**

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

### **3 Mineral fuels, lubricants and related materials**

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

### **4 Animal and vegetable oils, fats and waxes**

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

### **5 Chemicals and related products, n.e.s**

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

### **6 Manufactured goods classified chiefly by material**

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

## PRODUCT LIST : SITC REV. 3

### **7 Machinery and transport equipment**

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

### **8 Miscellaneous manufactured articles**

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

### **9 Commodities and transactions not classified elsewhere in SITC**

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
