

Consumer price index

Supplement 2 □ 1995 Monthly

CONSUMER PRICE INDICES

This bulletin contains consumer price indices for the following series on the base 1985 = 100. It covers the period from April 1994 to July 1995.

	CONTENTS	PAGE
00	Relative part in % of each group in the weights	3
A.	Consumer Prices - General index.	4- 5
B.	Food (excl. drinks and meals out)	6- 7
B.1	Bread and cereals	8
B.2	Meat	9
B.3	Dairy products, eggs, oils and fats	10
B.4	Fruit, vegetables, potatoes	11
C.	Drinks (home consumption) and tobacco	12-13
C.1	Drinks (home consumption)	14
C.2	Tobacco	15
D.	Clothing and footwear (incl. repairs)	16-17
D.1	Clothing (incl. repairs)	18
D.2	Footwear (incl. repairs)	19
E.	Rent, heating and lighting	20-21
E.1	Rents and water charges	22
F.	Household goods and services	24-25
F.1	Furniture, floor coverings, household textiles	26
F.2	Household appliances, utensils and services	27
G.	Transport and communications	28-29
G.1	Private transport	30
G.2	Public transport	31
G.3	Communications	32
H.	Recreation and education, etc.	34-35
H.1	Recreational goods	36
H.2	Recreational services	37
H.3	Books, newspapers and magazines	38
J.	Other goods and services	40-41
J.1	Expenditure in hotels, pubs and restaurants	42
K.	Energy products	43
L.	Historical series 1956-1994: EC-countries	44
M.	Historical series 1956-1994: Non EC-countries	45
N.	Methodology	46
	TABLE OF SOURCES	47

EXPLANATORY NOTES

METHODOLOGY

The consumer price indices given here are the non-harmonised national indices which have different names in each country*. As far as trends are concerned, the general index published by EUROSTAT always corresponds to the general index published by the country. The component items of this general index are groups of national indices aggregated according to a harmonised classification conforming to the ESA (European System of Integrated Economic Accounts). For these groups, the price trends correspond to the trends noted by the national indices for the same classification field. The field covered by the general index varies according to country; as regards the population concerned (specific income bracket, certain socio-professional categories or total households), the geographical areas used (capital, urban areas, country as a whole, etc.) or method for seasonal adjustments. A fixed system is used in some countries, whereas in others a chain system is used (variable weightings). The reference years used at national level for the indices vary according to country. For ease of comparison, EUROSTAT has chosen 1985 as the common year for the presentation of these indices.

* NB : It should be noted that the figures in this publication are based on national methodologies. Therefore they may not be fully comparable one with another. The Member States of the European Union are currently working on a harmonisation project.

THE CALCULATION OF THE EUR15 INDEX

The EUR15 index as calculated by EUROSTAT is a weighted average of national price indices. The weight used is the proportion of each country in the final consumption of households for EUR15. The values of this consumption in national currency are converted into purchasing power standard (PPS); for this purpose the purchasing power parities of the G.D.P. are used. Up to 1990 purchasing power parities are those which result from the 1990 enquiry, extrapolated by using the implicate price index from the national accounts. Starting from 1990 onwards the purchasing power parities are calculated each year. The index calculated is a chain index of the "Laspeyres" type with weights changing each year. However, the weights are lagged by two years since the national accounts data needed become available only after two years. For example, the weights used for 1995 are those of 1993, for 1994 those of 1992. Moreover, national accounts data are often revised leading to revisions of the consumption weights. In order to avoid continuous modifications in the EUR15 index for previous periods, EUROSTAT has decided to "freeze" the weights which are used. Thus the EUR15 index will not be affected by revisions of the national accounts. However when Member States carry out major revisions in the price series for past years, EUR15 data will be calculated using these new series.
