## INDEX OF INDUSTRIAL PRODUCTION

August 1978 : Industrial production unchanged

The seasonally adjusted index of industrial production for the European Community is estimated by EUROSTAT to be 110.1 (1975=100) for the month of August 1978. The index fell by 0.4 % compared with the previous month due to unfavourable production trends in the investment and consumer goods industries. These developments were not offset by an improvement in monthly production in the intermediate goods sector.

While no clear pattern emerges over the last six months from an analysis of monthly changes in the index numbers of industrial production in the main branches, an examination of growth rates on a three month moving average basis (% A) reveals some interesting trends. By this measure, the growth in total community industrial production fell in every month from April to June, registered negative growth in July, and in August showed no change over the level of production in the period March-May. The growth of intermediate goods production on the three month moving average basis has declined steadily from April, and in August showed negative growth; the growth of consumer goods production has improved over this period but increased only marginally in August, whereas investment goods production has shown a more favourable trend with the three monthly results in August showing a 0.7 % increase over the period March-May.

A country by country analysis shows that while Luxembourg and Denmark recorded fast rates of growth in industrial production in August over the previous month, Germany and The Netherlands experienced unfavourable production trends. On a three month moving average basis, the growth of industrial production has improved significantly in Luxembourg and The Netherlands, and to a lesser extent in the UK and Germany. On the same basis of analysis, the negative rate of growth recorded by France was an improvement on the three month figure for July, but more adverse trends were noticeable for Italy and Belgium.

#### Hinweis

---

In dieser Ausgabe der 'Konjunkturindikatoren für die Industrie' werden die Produktionsindizes zum ersten Mal auf der Basis 1975=100 veröffentlicht. Neuberechnungen für alle von dieser Veröffentlichung umfassten Industriezweige sind im Gange. Augenblicklich können jedoch nur allgemeine makroökonomische Daten von EUROSTAT veröffentlicht werden. Wir weisen den Leser darauf hin, dass die veröffentlichten Produktionsdaten nur auf saisonbereinigten Reihen beruhen.

#### Note

---

This issue of 'Industrial Short-Term Indicators' is the first to include production data on the new base of 1975=100. Revised calculations are currently being made to all the sectors of industry covered in the publication, but for the moment EUROSTAT is able to publish only general macroeconomic data. Readers' attention is drawn to the fact that the data presented are on a seasonally-adjusted basis only.

#### Avertissement

---

Cette édition des 'Indicateurs conjoncturels de l'industrie' est la première comportant des données sur la production établies sur la nouvelle base 1975= 100. Des calculs révisés sont en cours pour tous les secteurs industriels couverts par cette publication pour l'instant EUROSTAT est en mesure de ne publier que des données générales de caractère macroéconomique. Le lecteur est rendu attentif au fait que les données publiées se limitent à celles établies sur une base désaisonnalisée.
