Monthly

## INDEX OF INDUSTRIAL PRODUCTION

On a short term trend basis continuing evidence of industrial production growth

---

The seasonally adjusted index of industrial production for the European Community reached the level of 119.2 (1975=100) in January 1980, a drop of 0.7% over the figure recorded in the previous month. The fall is due primarily to a sharp monthly downturn in Germany, and to a lesser, but none the less significant negative change in the Italian index. At the product regroupment level seasonally adjusted output in the Community's investment goods industries fell sharply in January compared with December whilst in the intermediate and consumer goods sectors changes were more moderate. Turning to the development of short-term industrial growth trends (see table 2), the evidence suggests that EUR-9 growth momentum has increased over the last four months, in stark contrast to the oft-repeated recent economic forecasts warning of the imminence of a cyclical downturn. Various factors have brought about this development, the most notable in terms of influence on the EUR-9 index being the unexpected strength and upturn in German and Italian industrial production in the fourth quarter of 1979. These developments have overcome the less favourable influence of uncertain production trends in France and the United Kingdom and in other Community countries.

Revised data for 1979 show that the EUR-9 index of industrial production increased by 4.4% over the figure recorded in the previous year, with growth in the member states ranging from +1.9% (France) to +6.6% (Italy). German industrial production rose by 5.5% in 1979, with all the other member states for which results are available, registering increases of between 3 and 4%. At the product regroupment level, industrial production growth trends by country varied widely in 1979, particularly in the investment goods sector where France registered a decrease of 3.0%, against a rise of 6.9% in Italy and 5.6% in Germany. Production growth was also negative in Luxembourg (-0.7%) and weak in the United Kingdom (+1.4%). Overall the EUR-9 index for the investment goods industries rose by 3.1% in 1979, compared with increases of 3.7% in the consumer goods sector and 5.9% in the intermediate goods industries. In the latter sector the range of yearly increases varied from 2.7% in Luxembourg to 7.7% in the United Kingdom, with most countries falling within the 3-4% band. However the spread in annual growth in the consumer goods industries was wider, with production increasing by 9.8% in Italy against a 0.5% fall in the United Kingdom. For the other six member states output growth in 1979 was in the range of 2-4%.

At a more disaggregated level, it is interesting to compare Community trends in average growth by branch between the periods 1971-4 and 1976-9. In almost all major sectors growth in the latter period was significantly below the rates recorded in the three years before the 1975 recession, the sole exception being NACE 35 (The manufacture of motor vehicles and parts) where average growth increased from 0.8% in the first period to 3.8% in the second. Elsewhere average growth either became negative after 1975 after being positive in 1971-4, as in the sectors NACE 36 (Manufacture of other means of transport) and 43 (Textiles) or remained around a zero rate in the two periods, as in NACE 451/2 (Footwear manufacture) and NACE 453, 454, 456 (Clothing industry), or finally, and more commonly, was reduced to less than 75% of its pre-recession average, as in NACE groups 22 (Production and preliminary processing of metals), 25/26 (Chemical and Man-made Fibres), 31/36 (Engineering and allied industries), 41/42 (Food, Drink and Tobacco industry), and 471/2 (Manufacture of pulp, paper, paperboard). It is interesting to observe however that growth rates in 1979 for all the above-mentioned industries were above the average rates recorded in 1976-9, and in some sectors (Textiles, Engineering, Motor vehicles, Shoes, Footwear, Clothing and Paper) growth was superior to the results of the 1971-4 period.
