

INDUSTRIAL SHORT-TERM TRENDS

Monthly

INDEX OF INDUSTRIAL PRODUCTION

No change in either the short or long term outlook for industrial production growth

The unadjusted index of industrial production for the European Community is estimated provisionally by EUROSTAT to have reached the level of 106.7 (1975=100) in July 1980, and to have fallen by 0.2% over the corresponding month of the previous year. It should be noted, however, that the latest data are based on the returns from only six countries (D,I,NL,L,UK,DK) which have a combined weight of only 0.76 in the EUR-9 index. The absence of data in particular for France (weight of 0.19 in EUR-9 index) for the month of July constitutes a serious gap and inhibits a more comprehensive short-term analysis of Community trends.

Bearing these factors in mind, the incomplete data available for the month of July suggest that there has been no change in either the short- or long-term industrial production growth outlook in the European Community. Thus, while the seasonally adjusted EUR-9 index of industrial production grew marginally during the month of July to reach an estimated level of 118.8 (1975=100), for the fourth consecutive month short-term growth rates (%A - see table 2) remained negative. Similar growth developments occurred in the Community's intermediate and consumer goods industries during this period, with the former regroupment showing slightly weaker trends, whilst in the investment goods sector results have been much more erratic. As explained previously, this is largely due to wide variations in production trends in this regroupment in the four largest Community countries.

Turning to industrial production growth trends in the member states, the latest data available show that short-term rates were negative for all reporting countries. Rates have turned sharply downwards in Germany and Netherlands in recent months whilst in the United Kingdom strongly negative growth rates were recorded for the sixth consecutive month. In Denmark a similar, though not quite so severe downturn in production has also been experienced. In Luxembourg short-term growth rates have weakened substantially over the last few months whilst in Italy there are signs that the country's strong growth performance over last three quarters may be coming to an end.

N O T E S

1. Significance of growth rates A and B

— per working day:

- A last 12 months with respect to preceding 12 months;
- B latest month with respect to the corresponding month of the previous year;

— seasonally adjusted:

- A last 3 months with respect to the preceding 3 months;
- B latest month with respect to the previous month.

2. Methodological notes relating to the tables are published as supplements to the monthly bulletin.

3. For additional information on the Index of Industrial Production contact EUROSTAT, tel.: 4301-3264 or 4301-3450.

For additional information on all other indicators contact EUROSTAT, tel.: 4301-3521 or 4301-3450.

4. N.B. : indicates that data are not available;
— indicates a non-existent series.
