

INDUSTRIAL SHORT-TERM TRENDS

Monthly

INDEX OF INDUSTRIAL PRODUCTION

Industrial production still slack

The provisional index of industrial production in the Community was 103.3 and 86.9 (1975=100) in July and August 1981 respectively. These indices are about 2.5% lower than those for the corresponding months of the previous year. The fact that these year-on-year decreases are much smaller than in the preceding months (when they were in the region of 3.5 to 6%) is hardly surprising if one examines the curve of the production index from the beginning of 1980 onwards (see also graph on page 5): the index fell during the first half of 1980 and then flattened out at a level which remained virtually constant from July 1980 onwards.

The seasonally adjusted index was 113.8 in July and 112.0 in August and has thus remained stable as compared with the second quarter, when its mean level was 113.2. In view of the low level of production always observed in July and August, however, these months may not provide a reliable indication of the underlying trend. If the index is converted to a three-month moving average (see Table II: comparison of average seasonally adjusted indices for the last three months with the preceding three months), it reveals a continuation of the stable trend apparent since the end of the first quarter. Since March 1981, this indicator has not varied significantly from 0.

At national level, an upward trend has been apparent since June (Table II) in several countries, especially France (+1.1 in August) and the United Kingdom (+1.8%), whereas the outlook in the Federal Republic of Germany (-0.4%) and Italy (-2.3%) is rather negative.

Recent developments in respect of the three main groups of industrial products have been an upturn in intermediate products (+0.4% in August, see Table II) and a downward trend in consumer and capital goods (-0.1 and -0.9% respectively).

N O T E S

1. Meaning of the trend in the graphs:
3-month moving average of seasonally adjusted indices.
2. Meaning of growth rates A and B:
- per working day:
A last 12 months with respect to preceeding 12 months;
B latest month with respect to the corresponding month
of the previous year;
- seasonally adjusted:
A last 3 months with respect to the preceeding 3 months;
B latest month with respect to the previous month.
3. Methodological notes relating to the tables are published as
supplements to the monthly bulletin.
4. For additional information on the Index of Industrial Production
contact EUROSTAT, tel.: 4301-2808 or 4301-3208.
For additional information on all other indicators contact
EUROSTAT, tel.: 4301-3521 or 4301-3208.
5. N.B. : indicates that data are not available;
- indicates a non-existent series.
